sanctified in Christ Jesus, called to be saints, ***with all*** who invoke the name of our Lord Jesus Christ, in all places, theirs and ours' (1 Cor. 1 2); 'to the church of God which is at Corinth, ***with*** all the saints in the whole of Achaia' (2 Cor. 1 1), 'to *the* churches of Galatia' (Gal. 1 2). The artificial character of the epistolary form comes further to light with special clearness when we direct our attention to the composition of the writings. In such manner real letters are never written.

i. In a very special degree does this hold true no doubt of 2 Cor. Many scholars, belonging in other respects to very different schools, have been convinced for more than a century and have sought to persuade others that this epistle was not written at one gush or even at intervals; that it consists of an aggregation of fragments which had not originally the same destination.

ii. 1 Cor. allows us to see no less clearly that there underlie the finished epistle as known to us several greater or smaller treatises, having such subjects as the following:—parties and divisions in the church (1 10-3 23), the authority of the apostles (4), unchastity (5-6), married and unmarried life (7), the eating of that which has been offered to idols (8-11 1), the veiling of women (11 2-15 [16]), love feasts (11 17-34), spiritual gifts (12-14), the resurrection (15), a collection for the saints (16 1-4)—other passages being introduced relating to the superiority of the preaching of the cross above the wisdom of this world (1 18-31), the spirit in which Paul had laboured (2 1-16), the right of litigation between Christians (6 1-11), circumcised and uncircumcised, bond and free (7 18-24), the apostolic service (9), Christian love (13).

iii. With regard to Rom. it is even more obvious that the author accomplished his task with the help of writings, perhaps older 'epistles,' treatises, sayings handed down whether orally or in writing—although we must admit, as in the case of so many other books, both older and more recent, that we are not in a position to indicate with any detail what has been borrowed from this source and what from that, or what has been derived from no previous source whatever, and is the exclusive property of the author, editor, or adapter.

iv. With Gal. the case is in some respects different, and various reasons lead us, so far as the canonical text is concerned, to think of a catholic adaptation of a letter previously read in the circle of the Marcionites, although we are no longer in a position to restore the older form. We have in view the employment of such words as Peter (Πέτρος) alongside of Cephas (Κηφᾶς), of two forms of the name Jerusalem (Ἱεροσόλυμα alongside of Ἰερουσαλήμ), the presence of discrepant views (as in 3 7 29 and 3 16) of Abraham's seed; the zeal against circumcision in 5 2-4 6 12-13 alongside of the frank recognition that it is of no significance (5 6 6 15)—the cases in which the ancients charged Marcion with having falsified the text, though the textual criticism of modern times has found it necessary to invert the accusation.

There are to be detected, accordingly, in the composition of the 'principal epistles' phenomena which, whatever be the exact explanation arrived at in each case, all point at least to a peculiarity in the manner of origin of these writings which one is not accustomed to find, and which indeed is hardly conceivable, in ordinary letters.

40. Their contents: Paulinism.[1]

The contents of the epistles, no less than the results of an attentive consideration of their form, lead to the conclusion that the 'principal epistles' cannot be the work of the apostle Paul.

i. Is it likely that Paul, a man of authority and recognised as such at the time, would have written to the Christians at Rome—men who were personally unknown to him—what, on the assumption of the genuineness of the epistle, we must infer he did write? That he would have taken so exalted a tone, whilst at the same time forcing himself to all kinds of shifts in writing to his spiritual children at Corinth and in Galatia? One cannot form to oneself any intelligible conception of his attitude either to the one or to the other; nor yet of the mutual relations of the parties and schools which we must conceive to have been present and to some extent in violent conflict with one another if Paul really thought and said about them what we find in the 'principal epistles.'

ii. Even if we set all this aside, however, the doctrinal and religious-ethical contents betoken a development in Christian life and thought of such magnitude and depth as Paul could not possibly have reached within a few years after the crucifixion. So large an experience, so great a widening of the field of vision, so high a degree of spiritual power as would have been required for this it is impossible to attribute to him within so limited a time.

It does not avail as a way of escape from this difficulty to assume, as some do, a slow development in the case of Paul whereby it becomes conceivable that when he wrote the 'principal epistles' he had reached a height which he had not yet attained fourteen or twenty years previously. There is no evidence of any such slow development as is thus assumed. It exists only in the imagination of exegetes who perceive the necessity of some expedient to remove difficulties that are felt though not acknowledged. Moreover, the texts speak too plainly in a diametrically opposite sense. It is only necessary to read the narrative of Paul's conversion as given by himself according to Gal. 1 10-16 in order to see this. The bigoted zealot for the law who persecuted the infant church to the death did not first of all attach himself to those who professed the new religion in order to become by little and little a reformer of their ideas and intuitions. On the contrary, on the very instant that he had suddenly been brought to a breach with his Jewish past, he publicly and at once came forward with all that was specially great and new in his preaching. The gospel he preached was one which he had received directly. It was not the glad tidings of the Messiah, the long expected One, who was to come to bless his people Israel; it was the preaching of a new divine revelation, and this not communicated to him through or by man, but immediately from above, from God himself, God's Son revealed *in him*. With this revelation was at the same time given to him the clear insight and the call to go forth as a preacher to the Gentiles.

iii. Underlying the principal epistles there is, amongst other things, a definite spiritual tendency, an inherited type of doctrine (Rom. 6 17)—let us say the older Paulinism—with which the supposed readers had long been familiar. They are wont to follow it, now in childlike simplicity, now with eager enthusiasm, or to assail it, not seldom obstinately, with all sorts of weapons and from various sides. Some have already got beyond this and look upon Paulinism more as if it were a past stage, a surmounted point of view. One might designate them technically as Hyperpaulinists. They are met with especially amongst Paul's opponents at Corinth according to 1 and 2 Cor. Others remain in the rear or have returned to the old view, the Jewish or Jewish-Christian view which had preceded Paulinism. They are the Judaisers against whom above all others the Galatians are warned and armed. Both are groups which one can hardly imagine to oneself as subsisting, at least in the strength here supposed, during the lifetime of Paul. Plainly Paul is not a contemporary, but a figure of the past. He is the object or, if you will, the central point of all their zeal and all their efforts.

iv. Paulinism itself, as it is held up and defended in the 'principal epistles,' apart from diversities in the elaboration of details by the various writers, is nothing more or less than the fruit of a thorough-going reformation of the older form of Christianity. Before it could be reached the original expectations of the first disciples of Jesus had to be wholly or partly given up. The conception of Jesus as the Messiah in the old Jewish meaning of the word had to give place to a more spiritual conception of the Christ the Son of God; the old divine revelation given in the sacred writings of Israel had to make way for the newer revelation vouchsafed immediately by God, in dreams and visions, by day and by night, and through the mediation, if mediation it can be called, of the Holy Ghost: the law had to yield to the gospel. For these things time—no little time—was needed, even in days of high spiritual tension such as must have been those in which the first Christians lived and in which many are so ready to take refuge in

[1] Cp § 47.

order to be able to think it possible that the 'principal epistles,' with their highly varied contents could have been written so soon after the death of Jesus as the theory of Pauline authorship compels us to assume.

v. Writers and readers, as we infer from the contents, live in the midst of problems which—most of them at all events—when carefully considered are seen not to belong to the first twenty or thirty years after the death of Jesus. We refer to questions as to the proper relation between law and gospel, justification by faith or by works, election and reprobation, Christ according to the flesh and Christ according to the Spirit, this Jesus or another, the value of circumcision, the use of clean or unclean things, sacrificial flesh, common flesh and other ordinary foods and drinks, the Sabbath and other holy days, revelations and visions, the married and the unmarried condition, the authority of the apostles, the marks of true apostleship and a multitude of others.

We must not be taken in by superficial appearances. Though Paul is represented as speaking, in reality he himself and his fellow apostles alike are no longer alive. Everywhere there is a retrospective tone. It is always possible to look back upon them and upon the work they achieved.

Paul has planted, another has watered (1 Cor. 3 6). He as a wise master-builder has laid the foundation; another has built thereupon (3 10). He himself is not to come again (4 18). He and his fellow-apostles have already 'been made a spectacle unto the world, both to angels and to men,' God has 'set them forth as men doomed to death, lowest and last'—*i.e.*, given them the appearance of being persons of the lowest sort (4 9). Their fight has been fought, their sufferings endured. It is already possible to judge as to the share of each in the great work. Paul, to whom Christ appeared after his resurrection 'last of all,' 'the least of the apostles,' has 'laboured more abundantly than they all' (15 8-10); he has run his course in the appointed way (9 26 *f.*), a follower of Christ (even as others may be followers of himself, 11 1), whose walk in the world can readily stand comparison with that of others, even the most highly placed in Christian circles (2 Cor. 1 12 11 5 12 11), who has been ever victorious, whom God has always led in triumph, making manifest the savour of his knowledge by him in every place; 'unto God a sweet savour of Christ,' by his coming forward testifying, as in the sight of God, of the sacrifice made by Christ in his death; sufficient for all things (2 14-16); a pattern of long-suffering, patience, and perseverance, who had more to endure than any other man (4 8-10 6 4-5 7 5 11 23-27), an ideal form whose sufferings have accrued to the benefit of others and been a source of comfort to many (4 10 *f.* 1 4-7).

vi. A special kind of Christian gnosis, a wisdom that far transcends the simplicity of the first disciples and their absorption with Messianic expectations haunts and occupies many of the more highly-developed minds (1 Cor. 1 17-31 2 6 16 and elsewhere). In Rom. 9-11 the rejection of Israel is spoken of in a manner that cannot be thought to have been possible before the fall of the Jewish state in 70 A.D. The church is already conceived of as exposed to bloody persecutions, whereas, during Paul's lifetime, so far as is known to us, no such had as yet arisen (Rom. 5 3-5 8 17-39 12 12 14 2 Cor. 1 3-7); she has undoubtedly been in existence for more than a few years merely, as is usually assumed, and indeed requires to be assumed, on the assumption of the genuineness of the epistles.

The church has already, from being in a state of spiritual poverty, come to be rich (1 Cor. 1 5). Originally in no position to sound the depths, consisting of a company of but little developed persons, the majority of its members though still in a certain sense 'carnal' are able to follow profound discussions on questions so difficult as those of speaking with tongues, prophecy, or the resurrection (1 Cor. 12-15). There are already 'perfect' ones who can be spoken to about the matters of the higher wisdom; spiritual ones who can digest strong nourishment; understanding ones who have knowledge (2 6-16 3 1-3 10 15). The church is in possession of their traditions (11 2 23 15 3): epistles of Paul which presented a picture of him different from the current tradition received from those who had associated with him (2 Cor. 1 13 10 10). There is an ordered church life to the following of which the members are held bound. There are fixed and definite customs and usages—such as regular collections of charitable gifts (2 Cor. 9 13) or the setting apart, when required, of persons whose names were in good repute, and who had been chosen, by the laying on of hands (8 18 *f.*).

In a word, the church has existed not for a few years merely. The historical background of the epistles, even of the principal epistles, is a later age. The Christianity therein professed, presupposed, and avowed, in a number of its details does not admit of being explained by reference to the period preceding the date of Paul's captivity or even that of his death in 64 A.D. Everything points to later days—at least the close of the first or the beginning of the second century.

Necessary limitations of space do not allow of fuller elucidations here. The reader who wishes to do real justice to the view here taken of the question as to the genuineness of Paul's epistles will not stop at the short sketch given here, but will consult the following works among others:—

(*a*) On the subject as a whole, Loman, 'Quæstiones Paulinæ' in *Th.T*, 1882, pp. 141-185; cp 593-616, 1886, 55-113; cp 319-349 and 387-406; Steck, *Galaterbrief*, 1-23, 152-386. (*b*) On Rom. and Cor., Van Manen, *Paulus*, 2 and 3. (*c*) On Gal., Steck, *Galaterbrief*; cp Loman, 'Quæst. Paul.' in *Th.T*, 1882, pp. 302-328, 452-487; 1883, pp. 14-57; 1886, pp. 42-55; and Loman's *Nalatenschap*, 1899; (*d*) for a general survey of the entire Pauline group, Van Manen, *Handleiding*, iii., §§ 1-98 (pp. 30-63).

To the question as to the bearing of the conclusions of criticism upon our knowledge of the life and activity of Paul, the answer must frankly be that in the first instance the result is of a purely negative character. In truth, this is common to all the results of criticism when seriously applied. Criticism must always begin by pulling down everything that has no solid or enduring foundation.

41. Paul's life and work: negative results.

Thus all the representations formerly current—alike in Roman Catholic and Protestant circles—particularly during the nineteenth century—regarding the life and work of Paul the apostle of Jesus Christ, of the Lord, of the Gentiles, must be set aside, in so far as they rest upon the illusory belief that we can implicitly rely on what we read in Acts and the 13 (14) epistles of Paul, or in the epistles alone whether in their entirety or in a restricted group of them. These representations are very many and—let it be added in passing—very various and discrepant in character: far from showing any resemblance to one another, they exhibit the most inconsistent proportions and features. But, however different they were, they all of them have disappeared; they rested upon a foundation not of solid rock, but of shifting sand.

So, too, with all those surveys of Paulinism, the 'ideas,' the 'theology,' the 'system' of Paul, set forth in accordance with the voice of tradition, as derived from a careful study of the contents of Acts and the epistles, whether taken in their entirety or curtailed or limited to the 'principal epistles' alone. Irrevocably passed away, never more to be employed for their original purpose, are such sketches, whether on a large or on a smaller scale, whether large or narrow in their scope, sketches among which are many highly important studies, especially within the last fifty years. Henceforward, they possess only a historical interest as examples of the scientific work of an older school. They do not and could not give any faithful image or just account of the life and teaching of Paul, the right foundation being wanting.

This, however, does not mean, as some would have us believe, that the later criticism has driven history from the lists, banished Paul from the world of realities, and robbed us even of the scanty light which a somewhat older criticism had allowed us, to drive away the darkness as to the past of early Christianity. These are impossibilities. No serious critic has ever attempted them or sought to obscure any light that really shone. The question was and is simply this: what is it that can be truly called history? Where does the light shine? To see that one has been mistaken in one's manner of apprehending the past is not a loss but a gain. It is always better, safer, and more profitable, to know that one does not know, than to go on building on a basis that is imaginary.

The results of criticism, even of the most relentless

criticism, thus appear to be after all not purely negative.

42. Positive results. Foundations. Though at first sight they may, and indeed must, seem to be negative, they are not less positive in contents and tendency. The ultimate task of criticism is to build up, to diffuse light, to bring to men's knowledge the things that have really happened. As regards Paul's life and work, now that the foundations have been changed, it teaches us in many respects to judge in another sense than we have been accustomed to do. Far from banishing his personality beyond the pale of history, criticism seeks to place him and his labours in the juster light of a better knowledge. For this it is unable any longer in all simplicity to hold by the canonical Acts and epistles, or even to the epistles solely, or yet to a selection of them. The conclusion it has to reckon with is this :—(*a*) That we possess no epistles of Paul ; that the writings which bear his name are pseudepigrapha containing seemingly historical data from the life and labours of the apostle, which nevertheless must not be accepted as correct without closer examination, and are probably, at least for the most part, borrowed from 'Acts of Paul' which also underlie our canonical book of Acts (see above, § 37). (*b*) Still less does the Acts of the Apostles give us, however incompletely, an absolutely historical narrative of Paul's career ; what it gives is a variety of narratives concerning him, differing in their dates and also in respect of the influences under which they were written. Historical criticism must, as far as lies in its power, learn to estimate the value of what has come down to us through both channels, Acts and the epistles, to compare them, to arrange them and bring them into consistent and orderly connection. On these conditions and with the help of these materials, the attempt may be made to frame some living conception of the life and work of the apostle, and of the manner in which the figure of the apostle was repeatedly recast in forms which superseded one another in rapid succession.

Towards this important work little more than first essays have hitherto been made. The harvest promises to be plentiful ; but the labourers as yet are too few. We must, for the time being, content ourselves with indicating briefly what seem to be the main conclusions.

Paul was the somewhat younger contemporary of Peter and other disciples of Jesus, and probably a Jew by birth, a native of Tarsus in Cilicia.

43. The historical Paul. At first his attitude towards the disciples was one of hostility. Later, originally a tentmaker by calling, he cast in his lot with the followers of Jesus, and, in the service of the higher truth revealed through them, spent the remainder of a life of vicissitude as a wandering preacher. In the course of his travels he visited various lands : Syria, Asia Minor, Greece, Italy. Tradition adds to the list a journey to Spain, then back to the East again, and once more westwards till at last his career ended in martyrdom at Rome. With regard to his journeys, we can in strictness speak with reasonable certainty and with some detail only of one great journey which he undertook towards the end of his life : from Troas to Philippi, back to Troas, Assos, Mitylene, Samos, Miletus, Rhodes, Patara, Tyre, Ptolemais, Cæsarea, Jerusalem, back to Cæsarea, Sidon, Myra, Fair Havens, Melita, Syracuse, Rhegium, Puteoli, Rome (Acts 16 10-17 20 5-15 21 1-18 27 1-28 16).

Perhaps at an earlier date he had been one of the first who, along with others of Cyprus and Cyrene, proclaimed to Jews and Gentiles outside of Palestine the principles and the hopes of the disciples of Jesus (Acts 11 19 *f.*). Possibly, indeed probably, we may infer further details of the same sort from what Lk. and the authors of the epistles have borrowed from the 'Acts of Paul,' as to the places visited by Paul, and the measure of his success in each ; in which of them he met with opposition, in which with indifference ; what particular discouragements and adventures he encountered ; such facts as that he seldom or never came into contact with the disciples in Palestine ; that even after years had passed he was still practically a stranger to the brethren dwelling in Jerusalem ; that on a visit there he but narrowly escaped suffering the penalty of death on a charge of contempt for the temple, which would show in how bad odour he had long been with many.

As regards all these details, however, we have no certain knowledge. The Acts of Paul, so far as known to us, already contained both truth and fiction. In no case did it claim to give in any sense a complete account of the doings and sufferings of the apostle in the years of his preaching activity. The principal source which underlies it, the journey narrative, the so-called 'We-source,' is exceedingly scanty in its information. It says not much more, apart from what has been already indicated about the great Troas-Philippi-Troas-Rome journey, than that Paul, sometimes alone, sometimes in company with others, visited many regions, and preached in all of them for at least some days, in some cases for a longer period.

It does not appear that Paul's ideas differed widely from those of the other 'disciples,' or that he had emancipated himself from Judaism or had outgrown the law more than they. Rather do one or two expressions of the writer of the journey-narrative tend to justify the supposition that, in his circle, there was as yet no idea of any breach with Judaism. At any rate, the writer gives his dates by the Jewish calendar and speaks of 'the days of unleavened bread' (*i.e.*, after the passover), Acts 20 6, and of 'the fast' (*i.e.*, the great day of atonement in the end of September), 27 9. He is a 'disciple' among the 'disciples.' What he preaches is substantially nothing else than what their mind and heart are full of, 'the things concerning Jesus' (τὰ περὶ τοῦ Ἰησοῦ). It may be that Paul's journeyings, his protracted sojourn outside of Palestine, his intercourse in foreign parts with converted Jews and former heathen, may have emancipated him (as it did so many other Jews of the dispersion), without his knowing it, more or less—perhaps in essence completely—from circumcision and other Jewish religious duties, customs, and rites. But even so he had not broken with these. He had, like all the other disciples, remained in his own consciousness a Jew, a faithful attender of temple or synagogue, only in this one thing distinguished from the children of Abraham, that he held and preached 'the things concerning Jesus,' and in connection with this devoted himself specially to a strict life and the promotion of mutual love. What afterwards became 'Paulinism,' 'the theology of Paul,' was not yet. Still less does it ever transpire that Paul was a writer of epistles of any importance ; least of all, of epistles so extensive and weighty as those now met with in the Canon. So also there is no word, nor any trace, of any essential difference as regards faith and life between him and other disciples. He is and remains their spiritual kinsman ; their 'brother,' although moving in freedom and living for the most part in another circle.

For doubting, as is done by E. Johnson, the formerly anonymous writer of *Antiqua Mater* (1887), the historical existence of Paul and his activity as an itinerant preacher outside the limits of Palestine, there is no reason. Such doubt has no support in any ancient document, nor in anything in the journey-narrative that, in itself considered, ought to be regarded as improbable ; on the other hand, it is sufficiently refuted by the universality of the tradition among all parties regarding Paul's life and work (cp Van Manen, *Paulus*, 1 192-200).

It is true that the picture of Paul drawn by later times differs utterly in more or fewer of its details from the original. Legend has made itself master of his person. The simple truth has been mixed up with invention ; Paul has become the hero of an admiring band

of the more highly developed Christians; the centre, at the same time, of a great movement in the line of the development of the faith and expectations of the first disciples; the father of Paulinism — that system which, at first wholly unnoticed by the majority, or treated with scorn and contempt (cp § 4, n. 2), soon met with general appreciation, and finally found world-wide fame, however at all times imperfectly understood.

44. The legendary Paul.

It is difficult, or almost impossible, to indicate with distinctness how far Paul himself, by his personal influence and testimony, gave occasion for the formation of that which afterwards came to be associated with his name, and which thenceforward for centuries—indeed inseparably for all time, it might seem—has continued to be so conjoined, though very probably, if not certainly, it had another origin. We find ourselves here confronted with a question involving a problem similar to that relating to the connection between John, originally a simple fisherman of Galilee, one of the first disciples of Jesus, and John the Divine, the father of the illustrious Johannine school which speaks to us in the Fourth Gospel and in the three epistles bearing his name.

45. In Acts of Paul.

The following seems certain: Paul, of whom so little in detail is known, the artisan-preacher, who travelled so widely for the advancement and diffusion of those principles which, once he had embraced them, he held so dear, was portrayed in a no longer extant work which can most suitably be named after him Acts of Paul, based partly on legend, partly on a trustworthy tradition to which the well-known journey-narrative may be reckoned. There he comes before us, now enveloped in clouds and now standing out in clear light; now a man among men, and now an ideal figure who is admired but not understood. At once the younger contemporary of the first disciples, and yet as it seems already reverentially placed at a distance apart from them; a 'disciple' like them, yet exercising his immediate activity far outside their circle; full of quite other thoughts; in a special sense guided by the Holy Spirit; a 'Christian' who bows the knee before the Son of God and is entrusted with 'the gospel of the grace of God' (Acts 20 24); in the main, perhaps, so far as his wanderings and outward fortunes are concerned, drawn from the life, yet at the same time, even in that case, in such a manner that the reader at every point is conscious of inaccuracy and exaggeration, and finds himself compelled to withhold his assent where he comes across what is manifestly legendary.

So in the story of Paul's conversion, his seeing of Jesus in heaven, his hearing of Jesus' voice, his receiving of a mandate from him (Acts 22 21 26 16-18); the word to Ananias that he is to be instructed by Jesus himself and filled with the Holy Ghost (9 16-17); the representation of Paul as receiving visions and revelations (22 17-21 16 9 *f.* 18 9 *f.* 27 23); the record of how he was wont to be led by the Holy Spirit (13 4 16 6 *f.* 19 21 20 22 21 4 10-12); the description of his controversy with Elymas Barjesus, whom he vanquishes and punishes with blindness (13 6-12); the healing of the lame man at Lystra and the deification that followed (14 8-18); the vision of the man of Macedonia at Troas (16 9); the casting out of the evil spirit at Philippi (16 16-18); the liberation from prison at the same place (16 25-34); the imparting of the Holy Ghost to disciples of the old school at Ephesus by the laying on of hands (19 1-7); the cures there wrought and castings out of evil spirits (19 11 *f.*); the vengeance of the evil spirit who recognises indeed the superiority of Paul, but not that of other men (19 16); the giving up and burning of precious books at Ephesus (19 19); perhaps also the affair of Eutychus at Troas (20 7-12), and the details respecting Paul's sojourn at Melita (28 1-10).[1]

We are here already a good distance along the road upon which a younger generation, full of admiration for its great men, yet not too historically accurate, is moving, setting itself to describe the lives of Peter, Paul, Thomas, John, and others, in the so-called apocryphal Acts, or, more particularly (Gnostic), 'circuits' (Περίοδοι).

[1] For a fuller list see Van Manen, *Paulus*, 1 176-192.

Lk. also moves in the same direction, but with this difference, that his Paul (see Van Manen, *Paulus*, 1 164-169), under the influence of the current in which his spiritual life is lived, stands nearer again to Peter, yet in such a manner that it is still more impossible to present before one's mind an image of anything recorded of him among the often discrepant and mutually conflicting details, not a few of which are manifestly incorrect (*id.*, *l.c.* 169-176).

The writer of the Acts of Paul never shows any acquaintance with epistles of Paul, however much one might expect the opposite when his way of thinking is taken into account. On the contrary, the 'historical details' in the epistles, or at least a good part of them, appear themselves to be taken from the Acts of Paul, since they are not always in agreement with what Lk. relates in his second book, although they are manifestly speaking of the same things. Lk. must have modified, rearranged, supplemented, perhaps also in some cases more accurately preserved, what he and the writers of the epistles had read in the book consulted by them, a work lost to us, or, if you will, surviving in a kind of second edition as the Acts of the Apostles. In this lost Acts of Paul, Paul had become (in contrast to what, even by the admission of the journey-narrative, he really was) the hero of a reforming movement, the exponent of wholly new principles in the circle of those who wrought for the emancipation of Christianity from the bonds of Judaism and its development into a universal religion.

46. Home of Paulinism.

Where that circle, under the patronage of 'Paul,' must be looked for cannot be said with certainty. Probably it was in Syria, more particularly in Antioch; yet it may have been somewhere in Asia Minor. We may be practically certain, at all events, that it was not in Palestine; it was in an environment where no obstruction was in the first instance encountered from the Jews or, perhaps still worse, from the 'disciples' too closely resembling them; where men as friends of gnosis, of speculation, and of mysticism, probably under the influence of Greek and, more especially, Alexandrian philosophy, had learned to cease to regard themselves as bound by tradition, and felt themselves free to extend their flight in every direction. To avail ourselves of a somewhat later expression: it was among the heretics. The epistles first came to be placed on the list among the gnostics. The oldest witnesses to their existence, as Meyer and other critics with a somewhat wonderful unanimity have been declaring for more than half a century, are Basilides, Valentinus, Heracleon. Marcion is the first in whom, as we learn from Tertullian, traces are to be found of an authoritative group of epistles of Paul. Tertullian still calls him 'hæreticorum apostolus' (*adv. Marc.* 3 5) and (addressing Marcion) 'apostolus vester' (1 15).

47. Paulinism:[1] characteristic of epistles.

Whencesoever coming, however, the Paulinism of the lost Acts of Paul and of our best authority for that way of thinking, our canonical epistles of Paul, is not the 'theology,' the 'system' of the historical Paul, although it ultimately came to be, and in most quarters still is, identified with it. It is the later development of a school, or, if the expression is preferred, of a circle, of progressive believers who named themselves after Paul and placed themselves as it were under his ægis. The epistles explain this movement from different sides, apart from what some of them, by incorporating and working up older materials, tell us in addition as to its historical development and the varying contents of its doctrines.

i. Romans, with its account of what the gospel, regarded as a religious doctrine, is (1 18-11 36), and of what those who profess it are exhorted to (12-15 13), throws a striking light upon what

[1] Cp § 40.

Paulinism is, both dogmatically and ethically, for the Christian faith and life.

ii. 1 Cor. shows in a special way how deeply and in what sense Paulinism has at heart the practice of the Christian life, as regards, for example, parties and disputes within the church (1 10-3 23), the valid authority in it (4), purity of morals (5 and 6 12-20), the judging of matters of dispute between Christians (6 1-11), their mutual relations, such as those of the circumcised and the uncircumcised, of bondmen and freemen (7 18-24); the married and the unmarried life (8-11 1), the veiling of women (11 2-15 [16]), the love feasts (11 17-34), spiritual gifts (12-14), and the collection for the saints (16 1-4), along with which only one subject of a more doctrinal nature is treated: the resurrection (15).

iii. 2 Cor. gives above all else the impression how the person and work of 'Paul' in the circle addressed, or, rather, throughout the Christian world, had to be defended and glorified (1 3-7 16 10-13 10); and, in a passage introduced between its two main portions, how the manifestation of mutual love, by the gathering of collections for the saints, must not be neglected (8 *f.*).

iv. Gal. gives us an earnest argument on behalf of 'Paul' and the view of Christianity set forth by him, particularly his doctrine of justification by faith, not by the works of the law; as also for the necessity for a complete breach with Judaism.

v. In Eph. it is the edification of 'Pauline' Christians that comes most into prominence. So also in Phil., although here we have also a bitter attack on the apostle's enemies, and, in close connection with this, a glorification of his person and work (3 1-4 1). In Col., along with edification and exhortation, the doctrinal significance of Christ is expatiated upon (1 13-22 2 11-15); also that of 'Paul' (1 23-2 5); and an earnest warning is given against doctrinal errors (2 6-23).

vi. In 1 and 2 Thess., respectively, the condition of those who have fallen asleep (1 Thess. 4 13-18) and the exact time of the parousia (5 1-11) on the one hand, and the things which may yet have to precede that event (2 Thess. 2 1-12), on the other, are discussed.

vii. The Pastoral Epistles occupy themselves chiefly with the various affairs of the churches within 'Pauline' circles; Philemon with the relations which ought to subsist between slaves and their masters in the same circles.

Here we have variety enough, and many historical traits which, once arranged in proper order, can supply us with a conception of what 'Paul,' through all the vicissitudes of earnest opposition and equally earnest support among Christians, finally became—first in narrower, anon in wider circles, and at last in the whole catholic world—the apostle (ὁ Ἀπόστολος), the equal of Peter, or, strictly speaking, his superior.

48. History of Paulinism.

At the outset we find 'Paul' standing outside the circle of the Catholic church just coming into being, but held in honour by Marcion and his followers. Already, however, Lk., in virtue of the right he exercises of curtailing, expanding, modifying aught that may not suit his purpose in the material he has derived from other sources, has in Acts given 'Paul' a position of pre-eminence. Older fragments, whether of the nature of 'acts' or of the nature of 'epistles,' that had passed into circulation under Paul's name were, in whole or in part, taken up into writings on a larger scale, and remodelled into what are now our canonical 'Epistles of Paul.' A Justin can still, it would seem, pass him over, although spiritually Justin stands very close to Paul and shows acquaintance with him. Irenæus in his turn has no difficulty in using the Pauline group of Epistles, at least twelve of the thirteen—Philemon is not spoken of, nor is there as yet any word of Hebrews—as canonical, although not from predilection for their contents, but simply because he wishes to vanquish his great enemies, the gnostics, with their own weapons. That in doing so he frequently had failed to understand 'Paul' is clearly manifest (see Werner, *Der Paulinismus des Irenæus*, 1889). Tertullian advances along the path opened by Irenæus. Without really having much heart for the Paul of the Pauline Epistles, he brings out the 'apostle of the heretics' against the heretics, though, as regards 'history,' he holds to the older view that Christianity owed its diffusion among the nations to the activity of the Twelve. In association with these in their solitary greatness no one deserves for a moment to be mentioned, not even the historical Paul, unless, indeed, as their somewhat younger contemporary, 'posterior apostolus,' who might be regarded as having sat at their feet (*adv. Marc.* 4 2 5 2; see van Manen, *Paulus*, 2 262-276). In the so-called Muratorian Canon, among the authoritative writings of the NT, thirteen epistles of Paul are enumerated. Apollonius, about the year 210, brings it against the Montanist Themiso as a particularly serious charge that some forty years previously he had ventured to write an epistle in imitation of the apostle (μιμούμενος τὸν Ἀπόστολον; *i.e.*, Paul; Eus. *HE* v. 18 5). In truth, from that time onwards, in orthodox circles no one doubted any longer the high authority of 'Paul' the assumed writer of the thirteen (fourteen) epistles. It was only with regard to Hebrews that a few continued to hesitate for some time longer.

For our knowledge of Paulinism the thirteen epistles are of inestimable value. They are, when thus regarded, no less important than they were when they were considered—all of them, or some of them—as unimpeachable witnesses for the life and activities, especially the Christian thoughts and feelings, of the historical Paul, the only slightly younger contemporary of Peter and other original disciples of Jesus.

49. Post-'Pauline' Epistles.

In a complete study of Paulinism there come into consideration also Heb. 1 Pet. Ja. and other writings which breathe more or less the same spirit, or, as the case may be, take a polemical attitude towards it.

i. Hebrews, as being the expression of an interesting variation from the older Paulinism; a doctrinal treatise, rich in earnest exhortations, given forth as a 'word of exhortation' (λόγος τῆς παρακλήσεως, 13 22) in the form of an Epistle of Paul, though not bearing his name.

ii. 1 Pet., as being a remarkable evidence of attachment to 'Paul' among people who know that the group of letters associated with his name is closed, although they desire to bear witness in his spirit; in point of fact, a letter of consolation written for those who stand exposed to persecution and suffering.

iii. James, as an instance of seriously-meant imitation of a Pauline epistle, written by some one who had misunderstood and was seeking to controvert Paul's view of the connection between faith and works (2 14-26).

50. Apocryphal Epistles, Acts, etc.

On the other hand, there is a great deal that must be regarded as the product of a later time, and, however closely associated with the name of Paul, as lying beyond the scope of the present article.

i. (*a*) *Epistle to the Laodiceans.*—Antiquity knew of such an epistle, alongside of (*b*) the epistle *ad Alexandrinos*, mentioned in the Muratorian Canon (63-65) with the words added 'Pauli nomine fictæ ad hæresem Marcionis,' 'feigned in the name of Paul to the use of the heresy of Marcion.' This epistle to the Laodiceans, mentioned also in Jerome (*Vir. Ill.* 5, and elsewhere) was very probably our Epistle of Paul to the Ephesians, just as that to the Alexandrians was probably our Epistle to the Hebrews, or, it may be, a Marcionite redaction of it.

(*c*) Another Epistle of Paul to the Laodiceans occurs in many Latin MSS of the NT, and in old printed editions of the NT; in Luther's Bible, Worms, 1529; in the Dutch of 1560 by L.D.K.—probably Leendert der Kinderen; in 1600, after a copy by Nicolaus Biestkens van Diest; in 1614, Dordrecht, Isaack Jansz. Canin; and in English, cp Harnack, *ACL* 1 (1893) 33-37. See, further, Anger, *Ueber den Laodicenerbrief* (1843), and Lightf. *Colossians*, 274, who also gives a convenient summary of the views which have 'been held respecting this letter' (Hatch). The writing is composed of NT words of 'Paul,' probably to meet the demand for an epistle to the Laodiceans raised by Col. 4 16, and actually dating from the fifth, perhaps even from the fourth century.

ii. An *Epistle from the Corinthians to Paul* and the apostle's answer (=3 Cor.) which is brought into connection with the epistle named in 1 Cor. 5 9, were included in the Syrian Bible in the days of Aphraates and Ephraim, and centuries afterwards were still found in that of the Armenians.

They occur also in a MS of the Latin Bible dating from the fifteenth century and have been repeatedly printed, the best edition being that of Aucher (*Armenian and English Grammar*, 1819 p. 183). 'An English translation will be found in Stanley, *Epistles of St. Paul to the Corinthians*, 593' (Hatch). There are German and French translations in Rinck (1823) and Berger

(1891). They appear to belong to the third century and are conjectured to have been written against the Bardesanites, originally in Greek or Syriac, perhaps as portions of the *Acta Pauli*. Cp Harnack, *ACL* 1 37-39; Krüger, *ACL*, 1895, p. 11; *Nachträge*, 1897, p. 10; also Sanday, above, CORINTHIANS, §§ 19, 20 *b*.

iii. Fourteen epistles of Paul and Seneca are given in a number of later MSS; first named and cited by Jerome, *VT* 12, although hardly by that time read by very many.

The correspondence is reproduced in most editions of Seneca —*e.g.*, ed. Haase, 1878, vol. iii. 476-481—and discussed by (among others) Funk, 'Der Briefwechsel des Paulus mit Seneca,' *Theol. Quartalschr.*, 1867, p. 602; Lightf. *Philippians*[3], 327; Kreyher, *Seneca u. seine Beziehungen zum Christenthum*, 1887; Harnack, *ACL* 1 763-765. Their 'genuineness' is not for a moment to be thought of.

iv. Other special writings of a later date relating to Paul are found (apart from the Ebionite Acts of the Apostles already alluded to, mentioned by Epiphanius, *Haer.* 30 16, and the *Acta Pauli* = Παύλου πράξεις [also lost] mentioned by Origen, perhaps identical with the work called *Pauli Prædicatio* in Pseudo-Cyprian) in the *Acts of Peter and Paul*; the *Acts of Paul and Thecla*; the *Apocalypse of Paul*; Ἀναβατικὸν Παύλου mentioned in Epiphanius (see 2 Cor. 12 4; cp *PRE*[3] 1 670).

The Acts of Peter and Paul, as also those of Paul and Thecla, are printed in Tischendorf (*Acta Apostolorum Apocrypha* denuo ediderunt R. A. Lipsius et M. Bonnet, 1, 1891; cp APOCRYPHA, § 23, 2); the Revelation of Paul in Tischendorf (*Apocalypses Apocryphæ*). [References to the literature of the Apocalypse of Paul in Lat. Syr. Gk. and Ar. will be found in *Catalogue of Syr. MSS Univers. of Camb.* (1901), p. 1167 *f.* ET of all three by A. Walker, *The Apocryphal Gospels, Acts, and Revelations*, (1870).]

The best and most exhaustive discussion of the contents of these writings, alike with regard to Paul's life and activity, and with regard to his relation to Peter and other disciples of Jesus, though too exclusively under the influence of the Tübingen construction of history (see van Manen, *Th. T*, 1888, pp. 94-101), is given by R. A. Lipsius in his standard work—*Die apokryphen Apostelgeschichten u. Apostellegenden*, 1883-1890 (reviewed in *Th. T*, 1883, pp. 377-393; 1884, pp. 598-611; 1888, pp. 93-108; 1891, pp. 450-451), with which cp also the *Prolegomena* to the second edition of the *Acta* 1, 1891, and *PRE*[3] 1 664-666.

51. Literature.

'The literature which bears upon St. Paul is so extensive that a complete account of it would be as much beyond the compass of this article as it would be bewildering to its readers.' So, rightly, Hatch at the close of his article 'Paul' in *Ency. Brit.*[9], 1885.

i. For the *life* of Paul Hatch cited A. Neander, *Pflanzung*, etc., vol. i.[4], 1847, ET in Bohn's Standard Library and New York, 1889; F. C. Baur, *Paulus der Apostel Jesu Christi*, 1845, 1866-1867[2], ET 1875-1876; E. Renan, *Les Apôtres*, 1866, and *Saint Paul*, 1869; Krenkel, *Paulus der Apostel der Heiden*, 1869; A. Hausrath, *Der Apostel Paulus*, 1872[2], and art. 'Paulus' in Schenkel's *BL*; J. W. Straatman, *Paulus de Apostel van Jezus Christus* (1874); Beyschlag in Riehm's *HWB*; W. Schmidt in *PRE*[2]; Conybeare and Howson, *Life and Epp. of St. Paul*, 1851 (and often); F. W. Farrar, *Life and Work of St. Paul*; Lewin, *Life and Epp. of St. Paul*; [W. M. Ramsay, *St. Paul the Traveller and Roman Citizen*, 1896].

ii. With regard to the theology of Paul, in addition to several of the works already named: Usteri, *Die Entwick. des paulin. Lehrbegriffs*, 1824, 1851[6]; Dahne's book with the same title, 1835; A. Ritschl, *Die Entsteh. der altkathol. Kirche*[2], 1857; E. Reuss, *Hist. de la théol. chrétienne au siècle apostolique*[3], 1864; the essays appended to Jowett's *Epistles of St. Paul to the Thess., Gal., and Rom.*[2], 1859; C. Holsten, *Zum Evang. des Paulus u. Petrus*, 1868, and *Das Evang. des Paulus*, 1, 1880 [2, 1898]; O. Pfleiderer, *Der Paulinismus*, 1873, ET 1877; Sabatier, *L'apôtre Paul*[2], 1881; Menegoz, *Le Péché et la Rédemption d'après S. Paul*, 1882; Ernesti, *Die Ethik des Apostels Paulus*, 1882[3].

To these may be added C. C. Everett, *The Gospel of Paul*, 1893, and a number of other studies in books and periodicals; general works on Old Christianity, such as [W. R. Cassels] *Supernatural Religion*[6], 3 vols. 1875-1877; R. J. Knowling, *The Witness of the Epistles*, 1892; C. Weizsäcker, *Das Apostolische Zeitalter*[2], 1892, ET 1894-1895; J. B. Lightfoot, *Dissertations on the Apostolic Age*, 1892; F. J. A. Hort, *Judaistic Christianity*, 1898, and *The Christian Ecclesia*, 1898; O. Cone, *Paul: the Man, the Missionary, and the Teacher*, 1898; the various works on New Testament Introduction, such as those of Credner (1836); Reuss, 1874[4]; ET, 1884; Bleek-Mangold, 1886[4]; Hilgenfeld, 1875; B. Weiss, 1897[3]; ET, 1880, 1889[2]; G. Salmon, 1896[7]; S. Davidson, 1894[3]; H. J. Holtzmann, 1892[3]; W. Brückner, 1890; A. Jülicher, 1901[2]; Th. Zahn, 1900[2]; the commentaries on Acts and the Pauline Epistles, such as those in the later editions of Meyer, in the *Hand-Commentar zum NT* ([2] 1899 *ff.*; 'Acts' in [3] 1901), or in the International Critical Commentary (in which Romans [1895], Ephesians and Colossians [1897], Philippians and Philemon [1897], have already appeared); C. J. Ellicott, *Crit. and Exeget. Comm. on St. Paul's Epistles* [except Rom. and 2 Cor.], 1889-1890, etc., and cp the bibliographies in ACTS and the separate articles on the several epistles in this work. For advanced criticism see further the discussions already referred to (§ 34) by Bruno Bauer, Pierson, Naber, Loman, Steck, Völter, and van Manen.

The student who wishes further information upon the Pauline literature of recent years is recommended to consult the sections 'Apostelgeschichte und apostolisches Zeitalter' and 'Paulus' under the heading 'Literature of the New Testament' in the *Theologisches Jahresbericht* (vol. xix., edited by Holtzmann and Krüger, was published in 1900), which regularly, for the last nineteen years, has given a survey of the principal publications—mainly German, but not to the exclusion of foreign works—of the preceding year. A selection of the most recent literature relating to Paul, which is to be from time to time revised and supplemented, will be found in a list of the 'best books for general New Testament study at the present time' in *The Biblical World*, July 1900, pp. 53-80. Cp 'Theological and Semitic Literature' for the year 1900, a Supplement to the *American Journal of Theology*, April 1901, especially the NT and The First Three Centuries, pp. 35-49.

E. H., §§ 4-32; W. C. V. M., §§ 1-3, 33-51.

PAULUS, LUCIUS SERGIUS, 'deputy' (AV) or 'proconsul' (RV; ανθυπατος) of Cyprus at the time of Paul's visit, about 47 A.D. (Acts 13 7†). See CYPRUS, § 4.

PAVEMENT. The word is used occasionally in OT to translate רִצְפָּה, *rispah* (√רצף, Ass. *raṣāpu*, 'to join together'; cp Ar. *raṣafa*, 'to put together stones' in building), 2 Ch. 7 3 Ezek. 40 17 *f.* 42 3 Esth. 1 6.

1. Hebrew terms.

In 2 K. 16 17 occurs the compound phrase מרצפת אבנים (cp Syr. *rāṣiphtā d' kēphē* in Jn. 19 13 for λιθόστρωτον); in Jer. 43 9 RVmg. gives 'pavement' for מַלְבֵּן, but RV has 'brick-work' and AV translates the word here as elsewhere 'brick-kiln'; see BRICK.

𝔊 has in Ezek. 40 17 *f.* 42 3 τὸ περίστυλον, in 2 K. 16 17 βάσιν λιθίνην, and in 2 Ch. 7 3 Esth. 1 6 and Cant. 3 10 (in the last passage for רצוף) λιθόστρωτον. For Esth. 1 6, see MARBLE, and for Cant. 3 10, LITTER.

2. Lithostrōton.

The word λιθόστρωτον occurs once in NT, in a passage peculiar to the fourth gospel (Jn. 19 13). The writer tells us that after Pilate had questioned Jesus in the PRÆTORIUM [*q.v.*] (Jn. 18 28), he led him outside and sat (or set him?; see Blass, *Gramm. of NT*, 54, cp Justin, *Apol.* 1 35) upon the *bema* in a place called 'lithostroton, but in Hebrew GABBATHA' (εἰς τόπον λεγόμενον Λιθόστρωτον Ἑβραϊστὶ δὲ Γαββαθα).

Tatian (*Diatess.* § 136) uses the same words; *OS* 189 87 Γαββαθα λιθόστρωτον, 202 62 Γ. λιθόστρωτος; Vg. *Lithostrotos . . . Gabbatha*; Pesh. *rāṣiphtā d' kēphē . . . gephiphtā*, 'pavement of stones, etc.'; Delitzsch (*Heb. New Test.*[1]) renders by רצפה.

Here λιθόστρωτον is generally taken to mean a 'pavement' on which the *bēma* was placed to give it a suitable elevation. Borrowed from the Greeks, the word was used by Latin authors to denote a pavement of natural stones or of different coloured marbles [1] (see Rich, *Dict. of Gk. and Latin Antiqq.*, *s.v.*, 'Lithostroton'). Such pavements were first introduced into Rome, according to Pliny (*HN* 36 64), in the time of Sulla; in Pliny's own day there were fragments of a pavement dating from Sulla's time still at Præneste. Glass mosaics came into use later. Julius Cæsar is even said to have carried about with him on his military expeditions 'tessellata et sectilia pavimenta' to be laid down, wherever he encamped, in the prætorium (Suet. *Vit. Div. Jul.* 46); and we are told by Josephus (*Ant.* xviii. 4 6) that Philip the tetrarch's tribunal 'on which he sat in judgment, followed him in his progress.' Now it is thought by some scholars that Pilate, like Cæsar, had a portable pavement in the place (τόπος λιθόστρωτος) where his tribunal was set up. It is

[1] Cp Farrar, *Life of Christ*, 'the elevated pavement of many-coloured marble'—in this case a picturesque but doubtful description.

difficult, however, to understand how a mere portable pavement could have given a name to a locality. Other commentators think that the forecourt of the temple (*BJ* vi. 1 8 and 3 2), which is known to have been paved, is intended.[1] Pilate, however, can hardly have held his inquiry on a spot consecrated by the Jews. Nor is there much to be said in favour of the view that the לשכת הגזית, the meeting-place of the great Sanhedrin, which was half within, half without, the temple forecourt (see Schür. [(2)] 2 163, [(3)] 2 11) is meant (Lightfoot, Selden). Again, the view that the pavement intended was inlaid on a terrace running along one side of the prætorium does not seem to do justice to the Greek expressions.

The author speaks of a locality. It may be presumed, therefore, that he was thinking of some public place 'paved-with-stones' (cp *BJ* ii. 9 3, where we are told that on the occasion of the Jewish uprising when Pilate introduced the so-called 'ensigns' into Jerusalem, 'he sat upon his tribunal in the open market-place') where it was customary to place the *bēma*.[2]

We now have to consider the relation of this word to Gabbatha. Two views of this relationship have been held.

3. Relation to Gabbatha. 1. The words have been supposed to be practically synonymous. But the word 'Gabbatha' does not seem to mean 'pavement' or the like.

An Aramaised form (גבתא) of Heb. גַּב, 'back,' 'elevation,' is unknown. Nor is it likely that גבתא is for גבחתא with some such meaning as 'open space' (cp Heb. גַּבַּחַת, and see Dalman, *Worte Jesu*, 6). To suppose, again, that Gabbatha, if it can bear this meaning, means 'elevated place' = 'elevated pavement' is equally unsatisfactory. If the word means 'elevated place' the correct form would be גַּבְּתָא (st. emph. of a fem. גַּבָּא from גבב); so Zahn, Winer. Nestle, however, points out (Hastings, *DB*, under 'Gabbatha'[3]) that both origin and meaning of the word are doubtful. Winer gives as an alternative גבתא = גִּבְעֲתָא; but this could only mean 'hill' or the like.

2. The terms have been thought to be different names of the same spot. On this view 'elevated place' might, some commentators think, mean 'terrace,' the pavement (λιθόστρωτον) being set in the terrace. But we have already found 'terrace' unsuitable.

Brandt translates 'terrace,' but explains the use of גב differently. He thinks that the evangelist perhaps misunderstood some notice about the place where the sittings of the college of elders were held (he quotes *Sanh.* 18 *d*), and that he has made use of it in his narrative in a false connection.

There is perhaps more to be said in favour of the view of Meyer and Grimm—viz., that the different names were chosen from different characteristics of the place. Grimm thinks the Aramaic name 'was given to the spot from its *shape*, the Greek name from the nature of its pavement.' But here again, even if the Aramaic name means 'elevation,' it is too indefinite, one would think, to be a likely one.

Nestle is of opinion that 'the exact form and meaning' of the word 'must be left in suspense.'

It has been suggested as the most probable solution of the difficulty (Riehm, *HWB*) that the author thought of the proceedings as having taken place in the palace of Herod. In this case we are to understand by λιθόστρωτον a paved, open space, either immediately in front of the palace or at a short distance from it. But Lk. 23 6-16, if historical (see, however, GOSPELS, § 108), hardly seems to favour this. Josephus, indeed, tells us (*BJ* ii. 14 8) that Florus 'took up his headquarters at the palace, and on the next day had his tribunal set before it.' But we have no good reasons for supposing that Pilate was so privileged; and had the author been thinking of Herod's palace he would surely have been more explicit.

No such place as λιθόστρωτον-Gabbatha is known to have existed. The NT narrative in which the words

4. Conclusion. occur is hardly to be relied upon as a historical source;[1] it consists, as Keim has pointed out, of a series of dialogues. It seems not unlikely, therefore, that the place Lithostroton-Gabbatha existed, as a definite locality, only in the mind of the author. The writer realised that he must represent the sentence as given, after the Roman custom, in a public place. He knew that such open spaces were often paved with stones; whence the name λιθόστρωτον. He, or some editor, added as a Hebrew name Gabbatha. What suggested this name it is difficult, if not impossible, to determine. It may have been a purely artificial formation, the writer himself attaching no meaning to it.[2] Or possibly the *bema* itself was sometimes alluded to as הַגַּבָּה (Aramaised גבתא), 'the [artificial] hump' (fem. from גַּב),[3] and this suggested the name 'Gabbatha.' M. A. C.

1 So apparently Westcott (*Comm.* 272), who (comparing Talm. Jerus. *Sanh. f.* 18 *d*, quoted by Wünsche) thinks Gabbatha represents *Gab Baitha*, גב ביתא, 'the ridge (back) of the House,' *i.e.*, of the temple. Westcott ignores the difficulties of the word, both here and in his 'Introduction' (p. xii).

2 Cp Renan, *Vie de Jésus*, 412, 'Pilate, averti de leur présence monta au *bima* ou tribunal situé en plein air à l'endroit qu'on nommait *Gabbatha* ou, en grec, Lithostrotos, à cause du carrelage qui revêtait le sol.'

3 The article treats fully the philological difficulties of the word.

PAVILION. 1. סֻכָּה, *sukkah*, is rendered 'pavilion' in 1 K. 20 12 16 (cp SUCCOTH, 1), Ps. 18 11 [12] = 2 S. 22 12 Ps. 27 5 31 20 (also Job 36 29, which alludes to Ps. 18 11 and Is. 4 6, RV). AV, in fact, takes סֻכָּה as a synonym of אֹהֶל, and like Milton uses 'pavilion' as well as 'tabernacle' as a choicer expression for 'tent.' Elsewhere rendered 'booth' (Jonah 4 5 and often), 'covert' (Job 38 40), 'hut' (1 K. 20 12 16 RVmg. a misread passage; see SUCCOTH, 1), 'tabernacle' or 'tent.' See TABERNACLE, TENT.

2. קֻבָּה, *ḳubbāh*, Nu. 25 8† RV. RVmg 'alcove' (Sp. *alcova* = Ar. *al-ḳobbah*, 'vaulted recess'). The antiquity of the reading is vouched for by 𝔊 (if for εἰς τὴν κάμινον we may read εἰς τὴν καμάραν [cod. 15 has σκηνήν]; so Rödiger). But what can an 'arched pavilion' do in this narrative? Nothing indicates that a sacred tent of Baal-Peor or anything like it is meant.[4] *Ḳubbāh* must be a corruption due to the neighbouring word קֻבָה. The true reading is clearly חֻפָּה, which is practically 'nuptial chamber.' See TENT.

3. שַׁפְרִיר, *šaphrīr* (from √שפר, to glitter), Jer. 43 10† EV. The word probably means the glittering hangings of the royal canopy (G. Hoffmann, *ZATW* 2 68), and possibly occurs again in Mic. 1 11 (see SHAPHIR). See THRONE. T. K. C.

PEACE OFFERING. See SACRIFICE.

PEACOCKS (תֻּכִּיִּים, תּוּכִּיִּים; ταωνες; *pavi*). 1. Peacocks are mentioned, if an old opinion is correct, with 'apes' or 'monkeys' among the rarities brought to Solomon by the 'navy of Tarshish' (1 K. 10 22; cp *v.* 11; om. BL; and 2 Ch. 9 21; om. BA, τεχειμ [L]). The rendering 'peacocks' is favoured by most moderns,

1 Brandt (*Evang. Gesch.* 133) says it 'presupposes a regular government-building, with a raised terrace, where the procurator had a *sella curulis* set up and performed the duties of his judicial office—a building, which, so far as we know (and the elaborate histories of Flavius Josephus would hardly fail us here), did not exist.' But if we are unable to accept his explanation of גבתא (= 'terrace'), Brandt's words lose some of their force. On the whole question of the value of the fourth gospel as a historical source, see besides JOHN (SON OF ZEBEDEE), § 37, Oscar Holtzmann's recently published *Leben Jesu* (1901), 31 *ff.*, and J. Réville, *Le quatrième Évangile* (1901; for Jn. 19, especially pp. 265 *ff.*).

2 The writer would naturally wish, with no idea of deceiving his readers, to give a certain definiteness to the narrative, especially as he was making its general form so artificial. On the ancient idea of history cp Bolingbroke, *Letters on the Study and Use of History*, 1-4; Tylor, *Anthropology*, chap. 15.

3 The forms גַּבֹּתָם, Ezek. 1 18, and גַּבּוֹת perhaps presuppose a feminine גַּבָּה.

4 Aq. τέγος; Sym. πορνεῖον (πυρίνιον, etc.); Vg. *lupanar*; cp AVmg.'s view of גַּב in Ezek. 16 24 etc.; see HIGH PLACE, § 6, n. 3.

following Tg., Pesh., Vg., and the Jewish expositors. The philological basis of the theory, however, is very weak.

It is supposed that תֻּכִּי (*tukkî*?) is derived from the Tamil *tokei*, which in the old classical tongue means the peacock, though now it generally signifies the peacock's tail (so, *e.g.*, Max Müller, *Sc. of Lang.*, 209). Of course, if Ophir is somewhere on the Indian coast, as Lassen supposed, a Tamil origin gains in plausibility; but OPHIR [*q.v.*] is at any rate not in India.

It should also be noticed that 𝔊 (except $𝔊_A$ in 1 K.) knows nothing of 'apes and peacocks,' and that שנהבים, which precedes וקפים ותכיים, is certainly corrupt (cp EBONY, § 2 (*b*), IVORY, n. 3). In 1 K. 1011 we read of 'precious stones' as coming from Ophir. It is therefore neither rare animals nor vessels full of aromatic oil, etc. (Halévy; see APE), that we should expect to find mentioned in *v.* 22, but some precious stone. If Klostermann's emendation of the corrupt שנהבים be accepted, we shall do well to look out for the name of some precious stone which might be corrupted both into קפים and into תכיים (for these words probably represent the *same original*). Probably (see OPHIR) we should read והפנר [ו]הפנר—*i.e.*, 'and the *ḥipindu* stone' (written twice over in error). Cp HAVILAH.

On the peacock of Ceylon (*Pavo cristatus*), see Tennent, *Ceylon*, 1165. In the Talmud this bird is called טָוֹס; cp ταώς, Persian *tavus*. The Greeks called it 'Persian bird' (Aristoph. *Aves*, 484).

2. 'Peacock' (רְנָנִים) in Job 3913, AV, should rather be OSTRICH [*q.v.*]. T. K. C.

PEARL. Pearls (μαργαρῖται) are referred to in the NT several times (Mt. 76 1345 *f.* 1 Tim. 29 Rev. 2121), and in a manner which shows the great value then as now attached to them.

That they were well known in OT times also may be taken for granted, though the word μαργαρῖται does not occur in 𝔊. In AV 'pearl' renders *gābîš* in Job 2818; but see CRYSTAL. In RVmg. of Job 2818 it is suggested as a possible rendering for *pĕnînîm*; see CORAL.[1] Pearl or mother-of-pearl is at any rate probably the correct interpretation of the דַּר of Esth. 16; cp Ar. *durrun*, and see MARBLE.

Pearls are formed from the inner nacreous layer of the shell of a species of bivalved mollusc, *Avicula margaritifera*, which, although allied to the Ostreidæ, is not a true oyster. They are not produced in perfectly healthy animals, but are, as a rule, met with where overcrowding and the presence of parasitic worms, etc., have induced abnormalities. The inner layer of the shell of the same mollusc is known commercially as mother-of-pearl; this is still an article of commerce in Palestine, where it is frequently carved into religious ornaments. The shells are usually obtained by divers, and to this day the pearl-fisheries of the Red Sea and the Gulf of Persia rank amongst the most important. Pearls of an inferior colour and size are produced by several other species of mollusc. A. E. S.

PECULIAR TREASURE, PECULIAR PEOPLE. The former is the (Latinising) rendering (in EV of OT) of two Hebrew phrases; the latter, in AV of NT, of two Septuagint Greek phrases. It was only to be expected that expressions of such an origin would obtain a deeper significance in NT. This is not so marked, perhaps, in the case of the phrase in 1 Pet. 29, where λαὸς εἰς περιποίησιν (AV 'peculiar people,' RV 'people for God's own possession') mainly expresses the fact that the Christian body, like Israel of old, is God's purchased possession—a privilege, however, which involves moral duties—but certainly in the case of that in Tit. 214, where λαὸς περιούσιος (EV as before) is primarily, not 'a people acquired as a possession' (ὁ ἔγκτητος, Suidas), but 'a people fit to be God's own.' This is in fact the explanation of Vg. ('acceptabilem'; Wycliffe, 'acceptable'), which, although Bishop Ellicott thinks it too remote from the primary meaning, seems fairly to express the writer's meaning. Render, therefore, in Tit. 214, 'and (that he might) purify for himself a people fit to be his own, zealous of good works,' and in 1 Pet. 29, 'a nation devoted to God, a people owned by him' (cp CLEAN AND UNCLEAN, § 1 [6]). This last rendering (a people owned by God) is also the most suitable in Dt. 76 142 2618. In Ex. 195 Mal. 317 Ps. 1354 render 'a prized possession'; in Eccles. 28 'treasure' will suffice. So also in 1 Ch. 293. RV of OT needlessly retains, or even inserts, 'peculiar' everywhere except in 1 Ch. 293; in Dt. 76 'special' takes the place of 'peculiar,' and in Mal. 317, mg., 'jewels' becomes 'special treasure' (RV 'a peculiar treasure').

The primary meaning of סְגֻלָּה (8 times in OT) is no doubt 'possession' (*peculium*; cp Ass. *sugullâte*, 'herds,' Del. *Ass. HWB* 490). In 1 Ch. *l.c.* (ὃ περιπεποίημαι) and Eccl. *l.c.* (περιουσιασμοὺς[1]) it denotes the private property ('privy purse') of a king. Elsewhere it is applied metaphorically to Israel (סְגֻלָּה, Ex. 195 Mal. 317 [AV, 'jewels'], Ps. 1354; עַם סְגֻלָּה, Dt. 76 142 2618; λαὸς περιούσιος in Ex. and Dt. [also Ex. 2322], cp Tit. 214; εἰς περιποίησιν in Mal.; εἰς περιουσιασμόν in Ps.; Vg. *peculium*, *peculiaris*, except in Ps. [*possessio*], and Eccl. [*substantias*]).

PEDAHEL (פְּדַהְאֵל [see Ginsb.], § 30; as if 'El has redeemed,' cp PEDAIAH; φαδαηλ [BAFL]), a Naphtalite prince; Nu. 3428†.

Lagarde (*Sym.* 1877, p. 107) supposes a Pedahel to have written Ps. 25, which closes with a supernumerary *Pe*-distich (פְּדֵה אֱלֹהִים). The suggestion, however, might produce an embarrassing crop of similar theories elsewhere (B. Jacob, *ZATW* 16 [1896], p. 153, n.). On the origin of the name see PEDAHZUR.

PEDAHZUR (פְּדָהצוּר, § 43; as if 'the Rock [God] has redeemed,' but see below; φαδασσουρ [BAFL]), a Manassite prince; Nu. 110 (φαδασουρ [B]), 220 754 59 1023,† all P.

The other names containing the divine title צוּר (ZUR) having aroused suspicion, it is not unlikely that Pedahzur may also be a corrupt form. The meaning given above is indeed plausible; but it was natural that P, like the Chronicler, should endeavour to suggest a possible meaning for distorted names. If צורישדי (ZURISHADDAI) and צוריאל have arisen out of Asshūrī (= Geshūri), Pedahzur probably sprang from some S. Palestinian or N. Arabian ethnic. Pedahzur's son is called Gamaliel, which is probably (like Gemalli and Ammiel in Nu. 1312) one of the many distortions of Jerahmeel. Observe, too, that in Nu. 3423 'Hanniel b. Ephod' corresponds to 'Gamaliel b. Pedahzur' in Nu. 110. 'Ephod' (אפד) is probably a corruption of 'Rephael' (רְפָאֵל), 'Hanniel' (חַנִּיאֵל) of 'Hamael' (חמאל)—*i.e.*, Jerahmeel. Very possibly then Pedahzur, Pedahel, and Padi came out of Ṣarephāthi (*l* seems to be an afformative). The Jerahmeelites, also called Zarephathites, were most probably one of the most widely spread of the tribes of Canaan. See JERAHMEEL; cp also PASHHUR. T. K. C.

PEDAIAH (פְּדָיָה and פְּדָיָהוּ no. 3, perhaps [so Che.] adapted from an ethnic name Padi [so a king of Ekron, temp. Hezekiah, is called], but as it stands = 'Yahwè has redeemed,' see NAMES, §§ 30, 53, and PEDAHEL).

1. 'of RUMAH,' father of Jehoiakim's mother Zebudah (2 K. 2336). In 2 Ch. 365 ($𝔊^{BA}$) the name is given as Neriah (פ and נ confounded), whilst $𝔊^L$ both in K. and Ch. introduces from 2 K. 2418 Amital (Hamutal) the daughter of Jeremiah (ιερεμιου) of Libnah, and $𝔊^{BA}$ substitutes JIDLAPH, the daughter of εδειλ [B], or ειεδδιλα [A], which perhaps comes from Phadael (= Phadaia), a variant to Jidlaph (Che.).

2. b. JECONIAH [*q.v.*] (1 Ch. 318 *f.*, φα[λ]δαιας [BA], φαδαια [L]; in *v.* 19 $𝔊^{BA}$ substitutes σαλαθιηλ).

3. Father of JOEL [*q.v.*], a Manassite (1 Ch. 2720 פְּדָיָהוּ, φαλαδαια [B], φαλδει [A], φαδαιου [L]).

4. b. PAROSH [*q.v.*] (Neh. 325, φαδαι[α] [BℵAL]).

5. A priest (Neh. 84, φαδαιας), in 1 Esd. 944 PHALDAIUS, RV PHALDEUS (φαλ[α]δαιος [BA], φαδαιας [L]). Was he also a Psalmist? Lagarde thought so (see PEDAHEL), deducing this from the supernumerary distich beginning with the letter *pe* in Ps. 34.

6. A Benjamite (Neh. 117, φαλαια [Bℵ], -δ. [AL]).

7. A Levite overseer (Neh. 1313, φαδαια [BℵAL]).

PEDESTAL (כֵּן), 1 K. 731 RV, AV BASE. See LAVER.

[1] The Targ. reads מַרְגְּלִין—*i.e.*, really 'precious stones.' In Syr., too, the word has an extended meaning and includes chrysolite (cp Payne Smith, *Thes.*, *s.v.*).

[1] Cp Judith 1514 [11], where Vg. has 'universa quæ Holofernis peculiaria probata sunt.'

PEDIAS (πεδιας [B], παιδειας [A]), 1 Esd. 9 34 RV = Ezra 10 35, BEDEIAH.

PEKAH (פֶּקַח, § 50, see PEKAHIAH; φακεε [BℵAQL], φακες [Γ]). Son of Remaliah, king of Israel (735-730? See CHRONOLOGY, §§ 32, 34), perhaps a Jerahmeelite or Gileadite (see REMALIAH, ARGOB, 2), 2 K. 15 25 *ff.*, 16 1 5 Is. 7 1 2 Ch. 28 6†. We hear more than usual of the successful usurper (originally a *šâlîš*[1] or 'high officer' under PEKAHIAH) because he came into collision with the kingdom of Judah (see AHAZ, 1). A few years afterwards another revolution hurled him from the throne. His death is referred to by Tiglath-pileser, who, according to Schrader (*COT* 1 247; *KB* 2 32), claims to have killed Pekah himself. Winckler, however, reads differently, and makes Tiglath-pileser ascribe Pekah's death to his subjects, who probably felt the necessity of having a ruler who was acceptable to the Assyrian king (cp HOSEA). See ISRAEL, § 32, and on the war with the kingdom of Judah, in which Pekah is said to have taken part, see REZIN.

T. K. C.

PEKAHIAH (פְּקַחְיָה, 'Yahwè opens [or enlightens, the mind],' § 26, or else a clan-name = Pikhi; φακεσιας [B], φακειας [A], φακεια [L]), son and successor of Menahem, was murdered by Pekah (cp ARGOB, 2) after a reign of two years (737-736 B.C.); but 𝔊ᴸ gives him ten years (2 K. 15 22 *ff.*).

It may be questioned whether this king does not owe his literary existence to a misunderstanding. The author of Kings made Jotham and Ahaz of Judah contemporaneous with Zechariah, Shallum, Menahem, Pekahiah, and Pekah, kings of Israel. We infer this from the circumstance that 2 K. 15 8-31, which relates to these five kings, is interposed between 2 K. 15 7 (accession of Jotham) and 16 1 (accession of Ahaz). This allows very short reigns for these five kings, and although the revolutionary tendencies of N. Israel, produced by the swift alternations of political parties, may partly account for such short reigns, it will be some slight gain to remove Pekahiah from the list, as due to the error of a Jewish chronologist, who found the bold usurper Pekah sometimes referred to by the fuller name Pekahiah. T. K. C.

PEKOD (פְּקוֹד; in Jer. εκδικησον (BℵAQ], *visita* [Vg.]; ܠܐܠܚܢܝܐ; in Ezek. φακουκ [B], και φουδ [A], φακουδ [Q]; *nobiles* [?], ܦܩܘܕ), a Babylonian district mentioned in Jer. 50 21 Ezek. 23 23.† Granting that Merathaim should be Marrathim, S. Babylonia, we may naturally hold that Pekod, or rather Pekūd, is not a symbolic name meaning 'punishment,' but a geographical name = Puḳudu. In the Taylor cylinder inscription of Sennacherib, col. 1, line 45 (*KB* 2 84 *f.*), a people called the Puḳudu are mentioned with the Ḫamranu, the Ḫagaranu, and the Nabatu; and one of the Egibi tablets refers to a city called Piḳudu (Pinches, *RP* xi. 92) which is evidently in Babylonia. At the same time, it is not certain that the prophetic writers meant this place. Both Jer. 50 and (partly) Ezek. 23 have probably been edited so as to refer to peoples not originally meant (see PROPHET, § 45). For פקוד the prophets may have written רחוב[ת], Reḥoboth. See MERATHAIM; also *Crit. Bib.* T. K. C.

PELAIAH. 1. (פְּלָיָה, as if 'Yahwè has done a wonder' [cp 2 פלאיה], but originally an ethnic name to be explained like PALLU [*q.v.*]; the ה is an accretion [Che.]), a descendant of Zerubbabel; 1 Ch. 3 24 (φαρα [B], φαλαια [A], φαδια [L]).

2. (פְּלָאיָה, φαλαιας [L]), a Levite, expounder of the law (see EZRA ii., § 13 [*f.*]; cp i., § 8, ii., § 16 [5], § 15 [1] c); Neh. 8 7 (BℵA om., φαλαιας [L]) = 1 Esd. 9 48, BIATAS, RV PHALIAS (φαλιας [B], φιαθας [A], φαλαιας [L]), and signatory to the covenant (see EZRA i., § 7); Neh. 10 10 [11] (Bℵ* om., φελεια [ℵc.a mg.A], φαλαιας [L]).

PELALIAH (פְּלַלְיָה, as if 'Yahwè judges,' § 36; but this name, like Jeroboam, presumably comes from 'Jerahmeel,' cp PELAIAH), a name in the genealogy of

[1] For the origin of this term see EUNUCH.

Adaiah; Neh. 11 12 (Bℵ* om., φαλαλια [ℵc.a mg. inf.A], φαλλαλιου [L]). T. K. C.

PELATIAH (פְּלַטְיָה, as if 'Yahwè delivers,' §§ 30, 53, but really an ethnic name = PALTI [*q.v.*], the ה being probably an accretion [Che.]).

1. A descendant of Zerubbabel; 1 Ch. 3 21 (φαλλετι [B], φαλλετια [A], φαλατιας [L]).

2. A Simeonite captain, temp. Hezekiah; 1 Ch. 4 42 (φαλαεττεια [B], φαλεττια [A], φαλτιας [L]).

3. Signatory to the covenant (see EZRA i., § 7); Neh. 10 22 [23], (φαλτια [BA], φαλδεια [ℵ*], φαλτεια [ℵ?], φαλτιας [L]).

4. b. Benaiah, a 'prince of the people'; Ezek. 11 1 13 (φαλτιαν [BAQΓ], φαντιαν [B* in *v.* 1]).

Pelatiah and Jaazaniah are mentioned as belonging to a party of twenty-five men whom Ezekiel saw (in an ecstasy) at the door of the gateway of the temple. 'And while I was prophesying,' says Ezekiel, 'Pelatiah ben Benaiah died. And I fell on my face, and cried with a loud voice, Alas, O Lord, Yahwè, wilt thou make an end of the remnant of Israel?' Possibly Ezekiel regarded this as prophetic of the lot in store for those who resembled Pelatiah. See Davidson, Kraetzschmar, Bertholet.

PELEG (פֶּלֶג, φαλεκ [AEL] *Phaleg*), elder son of EBER, brother of JOKTAN, and father of REU; Gen. 10 25 11 16 *ff.* (φαλκ A* in *v.* 17) 1 Ch. 1 19 25 (φαλεχ [B*b], φαλεγ [BabL]); Lk. 3 35† (AV PHALEC). Taking this to be a geographical name, Knobel connected it with Phalga, a place situated at the confluence of the Chaboras and the Euphrates;[1] for another suggestion see Lagarde, *Or.* 2 50. The root-meaning is commonly thought to be 'division' (cp Gen. 10 25 [RJ]; 'in his days was the [people of the] earth divided,' נפלגה); cp. Judg. 5 15*b*, פְּלַגּוֹת, 'tribal divisions'? (Moore, Bu.; AV 'divisions;' RV 'watercourses'); cp DISTRICT. In connection with a wider study of the names in Gen. 10 *f.*, however, it is doubtful whether we can attach weight to conjectures based on the traditional reading 'Peleg.' 'Arpachshad' is very possibly a corruption of 'Arâb-cush' or 'Cush-ărâb.' When we consider how often, in the OT genealogical lists, old names are split into two, it is very possible that Peleg and his son Re'u represent different fragments of Jerahme'el (ירחמאל)—*i.e.*, פלג = מלח, and רעו = ראי. Cp PAGIEL. T. K. C.

PELET (פֶּלֶט, § 50). 1. Perhaps a secondary Calebite clan; cp BETH-PALET (1 Ch. 2 47: φαλεκ [B], φαλετ [A], φαλεγ [L]).

2. b. AZMAVETH, one of David's warriors; 1 Ch. 12 3 (ιωφαλητ [Bℵ], φαλλητ [A], φαλετ [L]). See DAVID, § 11 (*c*).

PELETH (פֶּלֶת; on the origin of the form see ZAREPHATH).

1. A Reubenite, father of On, the associate of Korah, Dathan, and Abiram; Nu. 16 1 (φαλεθ [BAF], φαλεκ [L]).

2. A Jerahmeelite; 1 Ch. 2 33 (θαλεθ [B], φαλεθ [A], φαλατ [L]). Cp JERAHMEEL, § 3.

PELETHITES, constantly coupled with the CHERETHITES [*q.v.*], 2 S. 8 18 and elsewhere—*i.e.*, probably, the Rehobothites (see REHOBOTH). The connection of the Pelethites with the Negeb, and more particularly with Zarephath, may be regarded as in the highest degree probable (see ZAREPHATH). Their true name indeed was 'Zarephathites,' and a severe struggle seems to have been necessary before they became David's faithful servants.

This depends, however, on the correctness of the view (in itself extremely plausible; see ZAREPHATH) that 'Pelethites' or 'Zarephathites' should be restored in place of 'Philistines,' not only in 1 S. 23 1 *f.* etc., 30 17, but also in 2 S 21 15 *ff.* Cp PELETH; SAUL, § 3.

Winckler (*GI* 2 185) supposes that Plēthi (or rather Palti) is derived from Peleth, and that Krēthi (original form Karti?) and Palti are the names of the *gentes* of the Negeb from which David was descended. Peleth, according to him, is the same as Peleṭ in Beth-peleṭ (בֵּית־פֶּלֶט), a place in the far S. of Judah towards Edom (Josh. 15 27). This ingenious view, however, does not take account of all the difficult textual phenomena. Probably Pelet = Peleth = Zarephath. For another view see JERAHMEEL, § 3. T. K. C.

[1] On the site of Phaliga see Peters, *Nippur*, 1 123, 311.

PELIAS (πεδιας [B], παιδειας [A]), AV 1 Esd. 9 34 = Ezra 10 35, BEDEIAH.

PELICAN (קָאָת; πελεκαν, ορνεον, καταρακτης, χαμαιλεων [or κοραξ?—transposition; see Zeph.]; *onocrotalus*, but in Ps. *pellicanus*). One of the unclean birds, Lev. 11 18 Dt. 14 17. The reference in Is. 34 11, however, seems due to thoughtlessness, at least if *ḳā'āth* means the 'pelican,' for this bird (like the bittern) loves marshy ground, whereas Edom (to the fate of which Is. 34 is devoted) was to become parched. On the other hand, the 'pelican' is well placed in the ruins of Nineveh (Zeph. 2 14), for there are many reedy marshes near the Tigris. In Ps. 102 6, again, the reference to the pelican (if קאת means this bird) indicates a conventionalised zoology; for though it may be true that the term מדבר (EV in Ps. 'wilderness') does not convey the meaning of 'desert,' it is certainly applied to relatively dry districts where the pelican would not be at home. The rendering 'pelican,' however, is by no means free from doubt.

It has been suggested by the supposed etymology of קאת, *ḳā'āth*, viz. קוא, 'to vomit,' which accords with the pelican's well-known habit of regurgitating its food; cp Talm. קוק (= קָאָת). One would certainly have expected, however, to find the pelican indicated by more characteristic features in the OT literature. Noticing that in Ps. 102 6 the *ḳā'āth* and the *kôs* (*i.e.*, 'owl') are mentioned in parallel lines, the question arises whether the former word may not be a mutilated form of *ḳadyāth*, and mean 'owl.' We find קַדְיָא, *ḳadyā* (Ass. *ḳadû*), in Tg. Onk. of Lev. 11 17 for כּוֹס, *kôs*, and it is not impossible that two species of owl (a great and a small?) may have been combined by the psalmist as images of desolation.

The pelican's habit of 'storing great quantities of fish in the capacious pouch under its lower mandible, and then disgorging them to feed its young' is well known; the fable of its feeding its young with its blood arose in Egypt, and was attached originally to the vulture (see Houghton, letter in *Acad.*, Apr. 5, 1884, p. 243 *f.*). There are, according to Tristram, two species of pelican found on the *coasts* of Syria—*Pelicanus onocrotalus*, or the White Pelican, and *P. crispus*, the Dalmatian Pelican, both birds of enormous size, about 6 ft. long, and the spread of their wings reaching over 12 ft. Tristram thinks that the allusion in Ps. 102 6*a* is to 'the melancholy attitude of this bird as, after gorging itself, it sits for hours or even days with its bill resting on its breast' (*NHP* 251). T. K. C.—A. E. S.

PELONITE (פְּלוֹנִי). 1. 1 Ch. 11 27 27 10, a corruption for PALTITE (*q.v.*)—*i.e.*, man of BETH-PELET (*q.v.*).

2. 1 Ch. 11 36, a corruption for GILONITE—*i.e.*, man of GILOH (*q.v.*); see ELIAM, 1, AHITHOPHEL (end).

PELUSIUM (סִין), Ezek. 30 15 AVmg. EV SIN.

PEN. The earliest writing implement was probably the stylus (γραφις,[1] γραφ[ε]ιον, in late writers στυλος), a pointed bodkin of metal, bone, or ivory, used for making incised or engraved letters on lead, clay, stone, wood, or wax. Such was the pen of Isaiah (Is. 8 1; חֶרֶט, γραφίς, *stylus*). The same word occurs in Ex. 32 4 (EV 'graving tool'; the implement with which the molten calf was fashioned; F has ῥαφίς), and should perhaps be read in Is. 44 13. See PENCIL. The iron pen (עֵט בַּרְזֶל, γραφεῖον σιδηροῦν, *stylus ferreus*) is also mentioned in Job 19 24 Jer. 17 1. The calamus or arundo, the hollow tubular stalk of grasses growing in marshy lands, was the true ancient representative of the modern pen. The use of such reed pens can be traced to a remote antiquity among the civilised nations of the East.[2] To make and mend them, a penknife (תַּעַר הַסֹּפֵר: Jer. 36 23†) or 'scribes' razor' (see BEARD) was required. A reed pen is probably intended in Ps. 45 2 (עֵט, κάλαμος, *calamus*) and in Jer. 8 8 (עֵט; σχοῖνος; *stylus*), and in 3 Jn. 13 (κάλαμος). The earliest specific allusion to the quill pen is in the *Etymologies* of Isidore of Seville, who died 636 A.D. ('instrumenta scribæ calamus et penna . . . sed calamus arboris est, penna avis, cujus acumen dividitur in duo'). That, however, does not prove that the quill pen was not in use earlier. A bronze pen, nibbed like a modern steel pen, found at Pompeii, is now preserved in the Museum at Naples.

On the 'pen of the writer' (Judg. 5 14, שֵׁבֶט סֹפֵר RV 'marshal's staff') see SCRIBE, 5.

[1] γραφίς was also used for a fine brush (*penicillus*, pencil) used in drawing.

[2] Hollow joints of bamboo were similarly employed.

PENALTY (Pr. 19 19 RV). See TRIBUTE, 7; cp FINE.

PENCIL (שֶׂרֶד, *séred*; 𝔊 incomplete and corrupt; Is. 44 13† RV), the instrument with which the wood-carver made his first rough sketch of the image he was to produce. Kimḥi and others think of a red-coloured thread (hence AV's 'line'); RVmg. records the sense 'red ochre'; RV gives 'pencil' (cp Aq. παραγραφίς—*i.e.*, stilus); Vg. *runcina*—*i.e.*, 'plane.' All plausible meanings, if justifiable.

שֶׂרֶד, however, seems to be corrupt; the root would mean 'to weave together.' We should expect חֶרֶט (see PEN). Haupt, however, would render שֶׂרֶד 'compasses,' and connect Ass. *sirdu* 'yoke' (see *SBOT*, *Isaiah*, Heb. 137).

PENDANTS (נְטִיפוֹת, Judg. 8 26 RV, AV 'collars'; נטפות Is. 3 19 RV, AV 'chains'). See RING, 2.

PENIEL (פְּנִיאֵל), Gen. 32 30 [31], in *v.* 31 [32] PENUEL.

PENINNAH (פְּנִנָּה, § 71; φεννανα [BAL]), wife of Elkanah (1 S. 1 2).[1] The name is apparently the singular of *peninîm*, a word of doubtful signification, in AV 'rubies' (see RUBY). As a woman's name it probably alludes to the complexion; cp Lam. 4 7. W. R. S.

PENKNIFE (תַּעַר הַסֹּפֵר; το ξυρον του γραμματεως; *scalpellum scribæ*), Jer. 36 23†. See PEN.

PENNY. Under this head we treat of the various coins of which the Greek names are translated by 'penny,' 'farthing,' and 'mite' respectively, reserving the 'drachm' and 'stater' for separate discussion (see STATER).

Penny is used in both AV and RV to represent δηνάριον (*denarius*), the silver coin issued by the Roman Imperial mint; it was current in all parts of the Empire, and in terms of it and its sixteenth part, the *as*, all public accounts were presented.

1. 'Denarius.'

Its normal weight during the time of Christ and until the reign of Nero was $\frac{1}{84}$ of the Roman pound—*i.e.*, 60 grains troy.[2] Its nominal value was $\frac{1}{25}$ of the Imperial gold coin, or *aureus*; of lower denominations, which were issued in bronze or copper, it contained 4 *sestertii*, or 16 *asses*. As an almost invariable rule it bore on one side (the *obverse*) the head of the Emperor or some member of the Imperial family, with titles—the 'image and superscription' mentioned in Mt. 22 20 Mk. 12 16 Lk. 20 24. On the *reverse* is a representation (usually historical or mythological) with an inscription either alluding to the object represented, or amplifying the titles of the person who figures on the obverse.

The denarius of Tiberius reproduced in next col. was issued between 16 and 37 A.D., and therefore current about the time of Christ. Around the laureate head of the Emperor runs the inscription TI . CAESAR . DIVI . AVG . F . AVGVSTVS ('Tiberius Caesar Augustus, son of the deified Augustus'). On the reverse the inscription PONTIF(ex) MAX(imus) completes the titles of Tiberius, whilst the seated figure, with her right hand resting on a sceptre, her left holding a flower, is the Empress Livia.

This then is the kind of coin in which the tribute was paid. A standard silver coin of the same normal weight (60 grs. troy) would at the present time be equivalent to 8¼d. The legal value of the denarius, however, is better estimated by its relation to the aureus. That coin weighed normally 126.3 grs. troy, and the denarius

[1] Bateson-Wright (*Was Israel ever in Egypt?* 231) connects Peninnah with Jephunneh, Elkanah being a son of Jeroham.

[2] The standard weight of the British shilling is 87.27272 grains, that of the sixpence 43.63636.

was therefore legally equivalent to $\frac{1}{16}$ of the same amount of gold, which, at the present rate of £3 : 17 : 10½ for the ounce troy, works out at 9.83d. The best idea of the actual purchasing power of the denarius is gained from its employment as a fair day's wage for the agricultural labourer (Mt. 20 2-14), from the payment of two denarii by the good Samaritan, and from the fact that the Roman legionary's pay in those times was 225

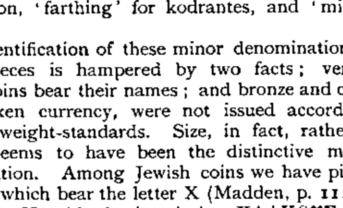
Denarius of Tiberius.

denarii a year, or ⅝ denarius a day. Hence it is clear that the American RV translation 'shilling,' if not entirely satisfactory, is nearer the mark than the English 'penny.'

2. 'Farthing.' Farthing is the rendering adopted for two Greek words, the κοδράντης, *kodrantes* (τὸν ἔσχατον κοδράντην, 'the last farthing,' Mt. 5 26; λεπτὰ δύο ὅ ἐστιν κοδράντης, 'two mites, which make a farthing,' Mk. 12 42) and the ἀσσάριον, *assarion* (δύο στρουθία ἀσσαρίου πωλεῖται, 'two sparrows sold for a farthing,' Mt. 10 29, cp Lk. 12 6). Both names are of Latin origin, *assārius* being a by-form of *as*, and *quadrans* representing the fourth part of the *as* in the Roman divisional system. Assarion must be the name of a provincial coin which corresponds in some way to the Roman *as*. In the Hellenistic system the unit was the silver drachm (for ordinary purposes ranking as equivalent to the denarius, but by the Romans for official purposes tariffed at ¾ denarius or 12 asses). This drachm contained 6 ὀβολοί or 48 χαλκοί. Now the evidence of the coins of Chios (see Imhoof-Blumer, *Griechische Münzen*, 660) shows that, in that island at least, the obol was equivalent to 2 assaria, and the drachm to 12 assaria. Since assarion thus corresponds to *as*, it follows that the χαλκοῦς, *chalkous* (or ¼ of the obol of 2 assaria) corresponds to the quadrans (or ¼ *as*). *Kodrantes* may therefore be regarded as an alternative name for this *chalkous*, used especially where it was desirable to be understood by non-Hellenistic readers. Hence its occurrence in the explanatory clause in Mk. 12 42; its use by Mt. 5 26, where Lk. 12 59 has λεπτόν (see § 2), has been explained by Mt.'s familiarity with the Roman system of accounting. As regards the quadrans itself, the Roman coin of that name ceased to be issued early in the first century B.C., and was revived for a short period under the Empire (from Nero to Trajan). There is no good evidence of its existence in the Roman currency during the time with which we are immediately concerned, nor is there any probability that a provincial coin was at any time known in common speech by the name of kodrantes. The bearing of this point on the text need not be discussed here.

3. 'Mite.' The word λεπτόν, *lepton*, already mentioned, is fittingly translated *mite* (Mk. 12 42 Lk 21 2 and 12 59). As to this coin there is much evidence confirming the equation of two lepta to one kodrantes given in the first passage, although most of that evidence seems to be derived from the same source. In Hebrew literature, however, we find the smallest Jewish coin, *pĕrūṭah*, equated with ⅛ Roman *as*. We need not hesitate to identify lepton and *pĕrūṭah*. From this, since we have identified chalkous and quadrans, it would seem to follow that the lepton was half the chalkous. Nevertheless, numismatists have serious difficulty in finding, among the small coins of Judæa, separate denominations for chalkous and lepton. The minute pieces of the Hasmonæan and Idumæan rulers, which it has been proposed to regard as a different denomination from the larger, seem to owe their small size and low weight to carelessness on the part of the moneyers, or to long circulation. On the other hand, the following consideration will show that chalkous and lepton are probably the same, and that the apparent discrepancy is due to different systems of valuation.

4. Chalkous and lepton. In addition to the system (A), in which the drachm was equivalent to 12 *assaria-asses*, there was in Judæa, at least during the second century, another system (B). According to it (see Kennedy, 429) the drachm was divided into 6 obols (mā'ōth) and 24 assaria (issārīm). To the same system presumably belonged the lepton-pĕrūṭah, which would bear the same relation to the assarion of system B as the chalkous-kodrantes did to the assarion of the system A.



There is much probability in the view advocated by Kennedy that we have in this double system a case of 'tariff' and 'current' values. System A represents the values adopted for accounting, B those according to which coins passed in ordinary transactions. The three systems with which we have to reckon may thus be stated in tabular form, where in each column 1 is placed opposite the unit in terms of which the other denominations in that column are calculated.

Denomination.	Roman System.	Provincial.	
		System A.	System B.
Denarius	1	.. }	1
Δραχμή, *drachme*	[¾]	1 }	
Sestertius	¼	..	..
'Οβολός, *obolos*	[⅛]	⅙	⅙
As	$\frac{1}{16}$	..	..
'Ασσάριον, *assarion*	[$\frac{1}{16}$]	$\frac{1}{12}$	$\frac{1}{24}$
Quadrans	$\frac{1}{64}$	..	..
Χαλκοῦς-λεπτόν, *chalkous-lepton*	[$\frac{1}{64}$]	$\frac{1}{48}$	$\frac{1}{96}$

On system A, the assarion, as $\frac{1}{16}$ of the denarius estimated at 9.83d., is to be rated at ⅝d., and the κοδράντης, kodrantes (χαλκοῦς, chalkous) at $\frac{3}{20}$d. On system B the assarion would be worth $\frac{3}{10}$d., and the χαλκοῦς-λεπτόν, chalkous-lepton $\frac{3}{40}$d. It is probably the lower values that we must assign to the words ἀσσάριον (assarion) and λεπτόν (lepton) wherever they are used in the NT, since there is nothing to show that they are not used in a popular sense.

If it is desirable not to use the actual Greek names, practical purposes are best served by the use of 'penny' for assarion, 'farthing' for kodrantes, and 'mite' for lepton.

The identification of these minor denominations with extant pieces is hampered by two facts; very few ancient coins bear their names; and bronze and copper, being token currency, were not issued according to accurate weight-standards. Size, in fact, rather than weight, seems to have been the distinctive mark of denomination. Among Jewish coins we have pieces of Herod I. which bear the letter X (Madden, p. 111), and of Agrippa II. with the inscription ΧΑΛΚΟΥΣ (*ib.* p. 146; the same legend occurs on other small coins issued perhaps from Antioch). The coin of Herod is probably

Coin issued (by Pontius Pilate) in 29-30 A.D.

like the latter, the χαλκοῦς-λεπτόν, *chalkous-lepton*. Of coins actually issued during the time of Christ, the small pieces of the Procurators (from $\frac{7}{16}$ to $\frac{6}{16}$ of an inch in diameter, and weighing from 40 to 23 grs. troy), may be regarded as of the same denomination, since they most nearly approach the two coins of Herod I. and Agrippa II.

As an instance, we give the accompanying coin, which was issued in the 16th year (LIS) of the Emperor Tiberius (ΤΙΒΕΡΙΟΥ ΚΑΙϹΑΡΟϹ), and therefore by Pontius Pilate in the year 29-30 A.D. The types are a sacrificial ladle (simpulum) and three ears

of corn bound together; on the reverse is the name of Julia (Livia), mother of the Emperor—ΙΟΥΛΙΑ ΚΑΙϹΑΡΟϹ.

5. Assaria.

The assaria may have been coins like the larger pieces of Herod I. (Madden, 107; two specimens in the British Museum weigh 107.9 and 97 grs. respectively). More probably, however, these were pieces of three χαλκοί, chalkoi (Madden, 108), and the commonest assaria were coins of the Syrian Antioch. In addition to its coins with Greek inscriptions meant chiefly for local use, this mint issued a series with Latin inscriptions, and with the letters S.C. (*i.e.*, *Senatus consulto*). These coins, resembling the issues of the Roman mint, were meant for more than local circulation. Under Augustus and Tiberius we find two denominations; the larger weigh from over 300 to 225 grs., and measure $1\frac{1}{5}$ to $1\frac{1}{10}$ inch; the smaller, from 150 to 114 grs., measure 1 to $\frac{9}{10}$ inch. The two denominations are generally supposed to be the *sestertius* and the *as*. In the smaller, therefore, we probably see the ***assarion*** of the NT.

Assarion of the year 31 A.D.

The assarion here illustrated was struck in the year 31 A.D. On the obverse, it bears a laureate head of the emperor with the titles TI(berius) CAESAR AVG(ustus) TR(ibunicià) POT(estate) XXXIII; on the reverse the letters S · C within a wreath.

PENTATEUCH. See HEXATEUCH.

PENTECOST. In J and E[1] (Ex. 34 18-26, cp 23 10-17) the feast of weeks is the second of the three festivals to be celebrated by the attendance of all males at the sanctuary. The expressions in the two forms of the law are not quite the same.

1. In J and E.

Ex. 34 22 runs 'thou shalt observe the feast of weeks (חַג שָׁבֻעֹת), [the feast] of the first-fruits of the wheat-harvest (בִּכּוּרֵי קְצִיר חִטִּים)'; Ex. 23 16, on the other hand, has 'the feast of harvest, the first-fruits of thy labours which thou sowest in the field (חַג הַקָּצִיר בִּכּוּרֵי מַעֲשֶׂיךָ).'

Substantially, both come to the same thing; Ex. 34 22 is merely expressed more precisely. It is not the feast of corn-harvest as a whole that is spoken of, but the festival at its conclusion, the wheat-harvest being the last to be reaped.

The time of celebration is thus clearly and distinctly fixed for the end of harvest. The first-fruits of the new harvest (בכרי מעשיך) are now presented—more precisely, the first-fruits of the wheat-harvest, for the first-fruits of the barley-harvest are presented at the beginning of harvest, at the feast of unleavened bread. A more exact, yet equally relative determination of the date seems to lie in the plainly ancient name Šābūʿōth; at least it is so taken in Dt. 16 9, where the feast of weeks is brought into a close time connection with the feast at the beginning of harvest. The duration of the corn-harvest (it is only the corn-harvest that is to be taken into account) is computed at seven weeks—an estimate which still answers fairly well to the climatic conditions of Palestine. These seven weeks of the harvest are the great annual season of gladness, the weeks of joy, *the* weeks κατ' ἐξοχήν. The 'joy of harvest' is proverbial among the ancient Hebrews (cp Is. 9 3 [2]); the period opens and closes with the two feasts we have named.

[1] The question of the literary relationship of the two passages is discussed elsewhere (PASSOVER, § 1; cp EXODUS ii., §§ 3, 4), but may be disregarded here, the answer to it having no bearing on the history of the development of the Pentecost feast.

The old law contains no further detailed enactment of any kind regarding this feast, the manner of its celebration, the sacrifices to be offered, or the like. Indeed, this is no case where definite offerings and legally fixed dues are to be rendered; it is a question of voluntary presentation of first-fruits, as it still stands enacted in Dt. (16 10): 'Thou shalt keep the feast of weeks unto Yahwè thy God with a tribute of a freewill offering of thine hand which thou shalt give according as Yahwè thy God hath blessed thee.'

The meaning of the gifts and of the feast as a whole is easily recognised when we hear in Hosea (9 4), that in exile the people shall have nought to eat but mourners' bread, since none of it shall have come up into the house of Yahwè. By this gift made to God, a gift which in turn is consumed by men in the joyous sacrificial meal, the whole is made holy (see TAXATION). That at the same time the gift has the character of a thank-offering is also manifest. The next step is easy: such an offering came to be regarded as a tribute of homage in which the deity is recognised as the 'lord,' the Baal of the land, and the bestower of the gifts of the soil. At how early a date this last conception came to be the leading and normative one we do not know. It finds explicit expression first in the passage of Dt. already quoted, where the offering to be offered at the feast is determined by the wealth of the offerer, in other words by the produce of his fields.

2. In D.

The law of Dt., as already seen, adds nothing to the ancient custom; all that it does is to lay greater stress on the character of the offering as a divine tribute which may be rightly claimed by the deity as due to him out of that which he has bestowed on his human vassal. This appears also in the precept of Dt. 26 1 *f.* (see below). In spite of the general tendency of Dt. to assign a historical origin to the feasts, we do not find in it in the present case any such definite reference to the Exodus as is found in that of the passover (see PASSOVER, § 6). Even here it is only in a quite general way that reference is made to the exodus when in Dt. 26 1 there is prescribed a sort of confession to be made at the bringing of the first-fruits (= tithes; see TAXATIONS), in which amongst other things the offering of the produce of the land is represented as a thanksgiving for the bestowal of the land. After the offering of the first-fruits at the autumn festival (see TABERNACLES, FEAST OF) had come to be so regarded, only a very short step was needed in order to bring the offering of the first-fruits at the harvest festival into connection with the same thought.

More important, however, than the points just mentioned are the changes which, though not indeed intended and enjoined by Dt., inevitably arose in the case of this feast as a consequence of the concentration of the worship at a central sanctuary; the fixing of a definite day in the calendar, and the transformation of the celebration from being a popular festival to being an act of public worship. On these points see, further, FEASTS, § 10.

3. In H and in Ezek.

The third stage in the development of the three feasts is marked by H in Lev. 23 15-21. Here again we find the date of the feast of weeks still left vague, just as it is in Dt. On the other hand, the amount and kind of the festal offering is more precisely determined in the law of H than before. It is no longer left to the discretion of the individual to bring as he chooses according to the yield of his land—this tribute of first-fruits has already become a fixed tithe to be paid at the sanctuary (see TAXATION)—but it is now laid upon the entire community[1] to bring a definite first-fruit offering; two first-fruit loaves (לֶחֶם הַבִּכּוּרִים) of new meal, of two tenths of an

[1] 'Out of your dwellings' (מִמּוֹשְׁבֹתֵיכֶם) in Lev. 23 17 does not mean, as has been supposed (so Graf and others), 'out of each several house,' so that every householder or owner of land would have had the duty of bringing this offering; it means 'out of your land'—*i.e.*, of home-grown flour (see Dillm. *ad loc.*).

PENTECOST

ephah, baked with leaven. With the loaves is performed the ceremony of waving, whence the loaves are called 'wave loaves.' They were to be leavened, for they were to be taken from what was in common daily use. In this we may safely conjecture a survival from ancient custom: at the beginning of harvest in the feast of unleavened bread the grain was offered raw, or roasted, or in the form of quickly-baked unleavened cakes (see PASSOVER); at the end of the harvest what was offered was fully prepared bread. It must not be taken as an argument against the antiquity of this religious custom that it is not mentioned in D or JE; JE has no ritual prescriptions at all as to the bringing of these offerings, and D has them only in the case of the passover, not in that of the harvest festival or of the autumn (ingathering) festival with its peculiar customs. For the pentecost offering H (Lev. 23 19) further orders two yearling lambs[1] as a sacrifice of peace offerings. The bread and the flesh, after having been presented to Yahwè, fall to the lot of the priests.

In the programme of Ezekiel, singularly enough, the pentecostal offering finds no mention; in 45 21, it has been introduced by a later hand and is absent from 𝔊.

The omission is perhaps connected with the fact that Ezekiel divides the entire ecclesiastical year into two portions, with two parallel series of feasts; thus no suitable place is left for pentecost. In any case, however, this proves that Ezekiel does not regard the feast of pentecost as of particular interest; and from this we can infer further that in his time it was the least important of the great yearly festivals.

4. In P.

In P (Nu. 28 26 *f.*) pentecost still continues to be a purely harvest feast. In agreement with the name 'feast of the first-fruits' is the specific ritual prescription, the bringing of a meal offering of new meal. To this characteristic pentecostal offering P adds, besides the stated daily offering, an accumulated series of animal sacrifices, just as in the case of the passover: two young bullocks, one ram, seven he-lambs of the first year as a burnt offering, besides a meal offering of three tenth-parts mingled with oil for each bullock, two tenth-parts for the ram and one tenth-part for each lamb. Lastly, there is a sin-offering, consisting of one he-goat. The fixing of a definite date is in the case of pentecost the natural consequence of the passover being fixed for 15th-21st Nisan. In P also we observe that a less value is attached to this feast than to the others: it is held only for one day, whilst the passover and tabernacle feasts are spread over a longer time. This valuation is also reflected in the fact that no significance as commemorating any event in the redemptive history of the nation is assigned to the festival.

5. In later Judaism.

Later Judaism made up for what was lacking in the law in this respect, and gave the feast the historical interpretation which it had hitherto lacked.

It was assumed, in accordance with Ex. 19 1, where the giving of the law is dated on the third month after the Exodus, that the promulgation of the law on Sinai was on the sixth or seventh of Siwan, the day of the feast of pentecost (*Pĕsăch.* 68 *b*; cp *Jubil.* 1 1 6 1 17 14 1 15 1 where God's covenants with Moses, Noah, Abraham, are made at new moon, or, as the case may be, on the sixteenth day of the third month). It is certain, however, that this metamorphosis of the feast of the corn harvest into the feast of the law-giving was late, probably not earlier than the destruction of the temple when the system of sacrifices and offerings came to an end. Even in Josephus and Philo we still find no trace of it. In Josephus (*Ant.* iii. 10 6, § 252) the feast is called Asartha (ασαρθα = Heb. עֲצֶרֶת, Aram. עֲצַרְתָּא); so also in the Talmud (*Pĕsăch.* 42 *b* and often). This expression will be intended to characterise the feast either as the 'conclusion' of the great feast of unleavened bread, or as the closing harvest festival. In the more precise dating of the feast the second day of the feast of unleavened bread was taken as the starting point for which the fifty days were reckoned and the 'sabbath' of Lev. 23 15 was taken to mean the first day of that feast.

We have dealt so far with the development of the feast as shown in the various stages of the written legislation.

6. Probable origin.

Unfortunately, in the case of the feast of pentecost we are not in a position to show from the historical books at what period it began to be celebrated, or what part it played in the religious life of the Israelites, although many passages allude in quite general terms to various feasts. It is not till the period of later Judaism is reached that we are expressly informed of its regular celebration. The narrative in Acts shows a multitude of worshippers from foreign parts as attending the festival in Jerusalem (Acts 2; cp Jos. *BJ* ii. 3 1, *Ant.* xiv. 13 4 xvii. 15 2). The silence of the older literature of course proves nothing against the observance of the feast in earlier times as attested by Josephus. As bearing on the question of the antiquity of the festival, however, the following circumstance is not without interest. So far as the great spring festival at the beginning of harvest is concerned, we hear that even the pre-Mosaic period knew something of the kind (see PASSOVER); of the autumn feast we are told that even the Canaanites had observed a closely allied festival and this festival had already become almost fully naturalised in Israel at the time of the division of the monarchy, as we see from 1 K. 12 32 (see TABERNACLES, FEAST OF). Pentecost, on the other hand, is not only relegated to a very subordinate part in P and passed over in complete silence by Ezekiel, but is also left unmentioned as existing in the older time. It would be too much to infer from this single circumstance that the feast was of late origin; and even from the difference of name in J and E (see above, § 1) it is by no means safe to conclude that it did not arise till after the revolt of the ten tribes (so Steuernagel on Dt. 16 1). Even on the assumption that E belonged to the northern kingdom and J to the southern (though this is by no means certain), all that could with certainty be inferred, would be a diversity of local designation, which there may very well have been, even in the case of an ancient feast.

There are other considerations, however, which, taken in conjunction with what has been already adduced, suggest the secondary character of pentecost. Under FEASTS (*q.v.*) the general thesis has already been propounded that all three feasts of harvest and ingathering were of Canaanite origin. This applies to pentecost in particular, in so far as it at least presupposes settlement in the country, and if it is of equal antiquity with the feast of the ingathering it will in all probability have had its origin also in the Canaanite worship. If, however, we closely scrutinise the significance of the feast we shall find that, coming between passover and tabernacles, it is, strictly, a superfluity. For this reason Ezekiel is able quietly to set it aside. If the purpose of the feast is to consecrate the harvest by offering the first-fruits to God, that has already been done at the passover feast, and very fittingly, at the beginning of harvest. If the chief stress is to be laid on its character as a harvest thanksgiving, then again it seems somewhat superfluous alongside of the great feast of the ingathering which was held at the close of the entire year's husbandry; there was no real occasion for a special feast of thanksgiving or consecration for each separate kind of produce. Strict symmetry is somewhat broken if a feast is held at the beginning and at the end of the corn harvest whilst there is only one to celebrate the ingathering of the fruits of vineyard and orchard. Thus arises the conjecture that perhaps the opening and closing feasts connected with the corn harvest were not, originally, essentially distinct feasts celebrated invariably and everywhere as separate; that it was one and the same feast celebrated at different times, according to the nature of the case, in different parts of the country. The difference between the times at which harvest begins is in Palestine very considerable; between the climate of the Jordan valley and that of Jerusalem and the colder

[1] In *vv.* 18 19 various other offerings are also enjoined as in Nu. 28 27 *f.* These, however, do not belong to the original text. See Dillm. *ad loc.*

districts of the 'hill country' it amounts to some three or four weeks. The beginning of the harvest at Jerusalem and the close of the harvest in the Jordan valley approximately coincide. In this way it becomes easy to see how, out of a single harvest festival, when celebrated at such different times, there should ultimately have arisen, as the separate districts of the country were brought into closer relations and religious customs tended more and more to be assimilated, a double feast, or to speak more accurately, a double celebration of the same festival idea. The connection of the passover with the feast of unleavened bread—a connection whereby the latter was thrust into the background by the passover feast—could not but favour the rise of an independent harvest festival.

7. Literature. See the relative sections in the Archæologies of Saalschütz, De Wette, Ewald, Keil, De Visser, Benzinger, Nowack; Orelli's art. 'Pfingsten' in *PRE*(2), vol. xi.; also the literature cited under FEASTS and PASSOVER. I. B.

PENUEL or **PENIEL** (פְּנוּאֵל, פְּנִיאֵל [Gen. 32 30[31] 31[32]]; Egypticised as Penu'aru [WMM, *As. u. Eur.* 168]; φανογηλ [BℵAL], but in Gen. ειδος τογ θεογ).

1. A place mentioned in connection with Jacob's wrestling with a divine being (Gen. 32 31[32], cp 33 10), and with the story of Gideon (Judg. 8 8*f.*, 17); fortified, it is said, by Jeroboam (1 K. 12 25). In Phœnicia the name Θεοῦ πρόσωπον was given to a promontory near Tripolis (Strabo, xvi. 2 15*f.*), perhaps because in profile it suggested a huge face. The god referred to in Penuel, 'face of God,' would be the God, originally hostile to the Jacob-tribe, who was worshipped at the sanctuary of the city (?) of Penuel. Where was this city situated? From the story in Genesis, as it stands, no sure conclusion can be reached, since it is uncertain (1) on which side of the JABBOK (*q.v.*) J's narrative means us to place Penuel, and (2) whether originally the story of Jacob at Penuel may not have been quite unconnected with the crossing of the Jabbok (or Yarmuk?). Conder thinks of the summit of the Jebel Ōsha' in S. Gilead; Merrill (*East of the Jordan*, 370) of the Tulūl eḏ-Dahab ('Hills of Gold'), between which the Jabbok forces its way into the Jordan. It was at any rate on a hill (Judg. 8 8), and it was near Succoth (if the received reading is correct), as both the Gideon-story and the Jacob-story agree. If the present writer's view of the true form of the name now read 'Succoth' be accepted, Penuel will be the Hebrew name of the 'tower,' or castle, of Salḥad (the true reading, not only for JEGAR-SAHADUTHA in Gen. 31 47, but also for 'Succoth' in Gen. 33 17*a*, Judg. 8 5 *ff.*). See SUCCOTH, and cp WRESTLING.

The reference to 'Penuel' in 1 K. 12 25 is due to corruption of the text. פנואל should probably be בני ישראל, 'the Israelites.'

2. Penuel appears twice as a personal name: (*a*) in the genealogy of Judah, 1 Ch. 4 4, cp *v.* 18 JERED; (*b*) in that of BENJAMIN (§ 9, ii. β) in 1 Ch. 8 25 (פניאל [Kt.]; φελιηλ [B]). T. K. C.

PEOPLE (עַם), Gen. 11 6. See GENTILES.

PEOR (הַפְּעוֹר, 'the Peor,' as if 'the cleft'; or, if the name is correct, cp פָּארָן, PARAN; φογωρ[1]).

1. A mountain 'that looketh toward Jeshimon' (AV), or 'that looketh down upon the desert' (RV), *i.e.*, NE of the Dead Sea (Nu. 23 28); cp 'Baal (of) Peor.' It was on 'the top of the Peor' that Balaam is said to have delivered his third oracle, and though a Mt. Peor is mentioned nowhere else, it is conceivable that a mountain not far from Beth-peor might have borne this name; Eusebius (233 79; 300 2) at any rate asserts this. It is, however, as Bennett (Hastings, *DB*, 3 743*a*) truly says, 'not certainly identified.' Conder's eloquent description of the prospect from his 'cliff of Peor'—*i.e.*, the narrow spur which runs out to Minyeh, overlooking the Dead Sea (*Heth and Moab*(3), 146*f.*)—may indeed make one wish to adopt his view of the scene of Balaam's prophecy; but, even if we accept the text as it stands, there are reasons against it, as well as against rival theories. Cp BETH-PEOR; Driver, *Dt.* 62, Buhl, *Pal.* 123. Wellhausen (*CH* 113) and Ed. Meyer (*ZAT* 1 129) assume the identity of 'Peor' and 'Pisgah,' which may be practically right, but raises a serious critical problem. Recognising this, B. W. Bacon (*Trip. Trad.* 229) supposes 'the Peor' in Nu., *l.c.*, to have been substituted by R_{JE} for 'the Pisgah' (cp Nu. 21 20). The problem of 'Peor,' however, cannot be treated alone; the set of names to which it belongs needs critical examination. 'Peor,' wherever it occurs, may be corrupt. See NEBO, § 2.

2. A late abbreviation of BAAL-PEOR (*q.v.*), Nu. 25 18 31 16 Josh. 22 17 (cp Dillm.).

3. See PAU.

4. A Judahite town, mentioned only by 𝔊BAL in Josh. 15 59*a* (φαγωρ) and by Eusebius (*OS* 300, 4 φογωρ), identified with the mod. *Kh. Fāghūr*, SW. from Bethlehem on the way to Hebron. T. K. C.

[1] There is mention of a φογωρ in Tobit 1 2 [ℵ].

PERAZIM, MOUNT (הַר־פְּרָצִים; for 𝔊 see BAAL-PERAZIM), Is. 28 21†, commonly identified with Baal-perazim.

In *Crit. Bib.*, however, Cheyne reads for הַר פְּרָצִים, עִיר פָּרִצִים, '(against) the city of liars,' ‖ עַם בֹּגְדִים. (On פריץ see Cheyne, *Ps.*(2), on Ps. 17 4*b*.)

PERESH (פֶּרֶשׁ; B om. φαρες [AL]; *Phares*) a Machirite name; 1 Ch. 7 16†. Peresh has a brother called Sheresh, and yet the text continues 'his sons were Ulam and Rekem.' 'Sheresh' is possibly a corrupt variant of 'Peresh' (Che.). Cp MANASSEH, § 9, ii.

PEREZ (פֶּרֶץ, apparently 'a breach,' but see below; φαρες), son of Judah by Tamar (Gen. 38 29 [J], 46 12 [P], Ruth 4 12 18, where AV PHAREZ; Mt. 1 3 AV PHARES). In Neh. 11 4 (σερες [B], cp Peresh and Sheresh in last article) the 'children of Perez,' are the Perez clan, called in Num. 26 20 [P] the PHARZITE, RV **Perezite** (הַפַּרְצִי [gentilic], ὁ φαρεσ[ι] [L]). Probably a place-name as well as a clan-name; see 2 S. 5 20, where, 'perazim' in BAAL-PERAZIM is popularly explained by 'perez-maim' (an outburst of water). In 2 S. 5 23*f.*, it has been maintained elsewhere (see MULBERRY), we should probably restore a place-name Perez-jerahme'elim (see below), and the same place-name meets us in 2 S. 6 8 as PEREZ-UZZAH. The special mention of 'the house of Perez' in Ruth 4 12 and the appending of the 'generations of Perez' in Ruth 4 18-22 (cp RUTH, BOOK OF) are completely accounted for by the theory that there is an older story underlying the narrative of Ruth, in which certain members of a Jerahmeelite family were made to take a journey to Miṣṣur (not Moab). Zarephath of Miṣṣur was a natural refuge for a Jerahmeelite family. Bethlehem (a corruption of Beth-jerahmeel?) had a Jerahmeelite or Calebite connection (1 Ch. 2 19 24 50 *f.*), and the post-exilic genealogical theorists regarded Hezron b. Perez as the father of Jerahmeel and Caleb (1 Ch. 2 9). See RUTH.

As to the origin of the name: the origins suggested in Gen. 38 29 and 2 S. 5 20, to which we may add 2 S. 6 7 (on the theory that the Zarephathites and not the Philistines were the captors of the ark) are popular fancies. 'Perez,' we may reasonably conjecture, is a mutilation and corruption of Zarephath, just as TAMAR (*q.v.*) is perhaps a corruption of Jerahme'elith. It is very significant that in Neh. 11 4 Shephatiah, who in Ezra 8 8 is closely related to Michael—*i.e.*, Jerahmeel (see MICHAEL, 10)—appears as son of MAHALALEEL (*q v.*) which is another popular or literary distortion of Jerahmeel, and that Mahalaleel is called a son of Perez. 'Perez Jerahmeelim' is therefore fully justified. Cp SHEPHATIAH, 9. T. K. C.

PEREZ-UZZAH (2 S. 6 8, or **Perez-uzza** 1 Ch. 13 11; διακοπη [BℵAL] οζα [or αζζα]), as if 'Breach of Uzzah.' The name of the place where Uzzah (*q.v.*) died, on the way from Kirjath-jearim to the 'city of David.' Probably, however, the name was rather different in the ancient story on which 2 S. 6 1-13 is based. The name which seems to be required is Ṣārefath (צרפת), out of which Pereṣ (פרץ) may easily have arisen; 'Uzzah' has perhaps come from *'azzah* (עַזָּה), which was appended to

Ṣarefath, as *rabbah* ('great') was appended to Ṣidon (Josh. 11 8 19 28). 'Perez-uzzah' thus became 'Strong (city) Zarephath.' See ZAREPHATH.

Winckler's view (*GI* 2 199) may be compared; see also H. P. Smith's Commentary. T. K. C.

PERFUME (רֹקַח, *rôḳaḥ*; ΜΥΡΟΝ ΜΥΡΕΨΙΚΟΝ, ΜΥΡΕΨΙΚΟΝ, *unguentum*, Ex. 30 25 35†; or רִקֻּחִים, *riḳḳūḥīm*, ΤΟΥΣ ΜΑΚΡΑΝ ΑΠΟ ΣΟΥ [BℵAQ], ΤΑ ΜΥΡΕΨΙΑ ΣΟΥ [Symm. in Q^mg.; so Aq. ΣΥΝΘΕΣΕΙΣ, Theodot. ΜΥΡΕΨΟΥΣ], *pigmenta tua*, Is. 57 9†). The art of manipulating and compounding odoriferous substances for the gratification of the sense of smell, is (needless to say) very ancient and very widely diffused, especially in the East, still the principal source of supply. For their supply of odoriferous materials the ancients, like ourselves, were dependent mainly on the vegetable kingdom—most frequently the odoriferous gum-resins or balsams which exude naturally or from wounds in the trunks of various trees and shrubs, but sometimes the wood, bark, or leaves themselves, rarely the flowers or seeds. There is no evidence of the Israelites having been acquainted with the use in perfumery of the animal products which elsewhere have played so great a part, such as Ambergris, Castor, Civet, Musk; perhaps the only animal substance so employed by them was ONYCHA (*q.v.*).

See ALOES, ALMUG, BALM, BALSAM, BDELLIUM, CALAMUS, CANE, CASSIA, CINNAMON, FRANKINCENSE, GALBANUM, LADANUM, MYRRH, SAFFRON, SPICE, SPIKENARD, STACTE, STORAX. The list supplies important evidence as to the geographical extent and limits of Hebrew trade and commerce (see TRADE AND COMMERCE).

As for the modes of preparation: some of the most important modern methods—such as those of distillation, infusion, tincture, enfleurage—were wholly unknown. The method of treatment with boiling oil or heated fat so as to produce a precious oil or ointment was, however, familiar; the process is apparently alluded to in Job 41 31 [23]. The pestle and mortar (Prov. 27 22), too, were indispensable for the preparation of the 'powder of the merchant' ['perfumer,' 𝔊] Cant. 3 6.

Perfumes may be applied either as fumigations or as unguents. On the former compare INCENSE.[1] On the latter compare OIL, ANOINTING, PERFUME BOXES.

On the religious symbolism of perfume and its use in divine service and in exorcisms see INCENSE, MAGIC, and SACRIFICE,[2] and on its place in social and festive life compare DRESS, § 4, and MEALS, § 11.

PERFUME BOXES, AV 'tablets' (בָּתֵּי הַנֶּפֶשׁ, *bāttē hannépheš*, Vg. *olfactoriola*), Is. 3 20†. A bag of myrrh was sometimes suspended from the neck (Cant. 1 13). But there is no other passage in which נֶפֶשׁ, *népheš* can be proved to mean 'perfume'; the supposed reference to 'scented words' in Prov. 27 9 (עֲצַת־נָפֶשׁ) is extremely doubtful. Hence Haupt (on Is. 3 20 in *SBOT*, Heb.) would connect this נפש with Ass. *pašâšu*, 'to anoint oneself' (cp *napšaštu*, Del. HWB, 551). 'Boxes of unguents' may perhaps be meant. W. R. Smith thought that 'some kind of amulet' was intended.

PERFUMERS. RV's substitute for AV's APOTHECARIES (*q.v.*).

By one of the curiosities of textual corruption the 'Jerahmeelites' (who stepped into fresh prominence after the exile) have become in the text of Neh. 3 8 הָרַקָּחִים, 'the perfumers'; by a similar corruption in *v.* 32, they have become הָרֹכְלִים, 'the merchants' (Che.). Cp SPICE MERCHANTS.

PERGA (ΠΕΡΓΗ, Acts 13 13 *f.*, 14 25; *PERGA*).[3] Perga lay, according to Strabo (667), on the river Cestrus, 60 stades, or 7½ m., from its mouth, the river being navigable as far as the town. As a matter of fact, the ruins of Perga at *Murtana*, about 12 m. NE. of Adalia (Attalia), are about 5 m. W. of the *Ak-Su* (Cestrus), but about the distance inland indicated by Strabo (hence Ptol. v. 5 7 reckons Perga among the inland towns—*μεσόγειοι*). The acropolis of the city was one of the heights on the fringe of the plateau between the Cestrus and the Catarrhactes: the town, in Strabo's time, and in the time of Paul, lay on the plain to the south of the hill.

On the hill itself stood the great temple of Artemis (Strabo, 667; *ἐπὶ μετεώρου τόπου τὸ τῆς Περγαίας Ἀρτέμιδος ἱερόν*): six fragmentary granite columns on a platform to the SE. of the hill have been considered to belong to the Artemisium; but this opinion is rejected on grounds of style by Petersen, in Lanckoronski (*Städte Pamph.* 1 36).

The greatness of the city was closely connected with the worship of Artemis (cp coins). Though called Artemis by the Greeks, this deity was similar to the Artemis of Ephesus (see DIANA), and the same as the Cybele of northern and eastern Phrygia. On coins she is sometimes Vanassa Preiia (written in the Pamphylian alphabet), 'the Pergæan Queen' (according to interpretation given by Ramsay in *J. Hell. Stud.*, 1880, p. 246, now commonly accepted), sometimes Artemis of Perga (*Ἀρτέμιδος Περγαίας*: see coin figured by Conybeare and Howson, 1 194). The type is either that of the Greek huntress Artemis,[1] with sphinx or stag by her side, and armed with the bow, or a native type representing the cultus-image, a stone column bearing a rude resemblance to a human figure (see PAPHOS, § 2). It is to this same deity that the name Leto belongs (cp inscr. published by Rams. in *Bull. de Corr. Hell.*, 1883, p. 263: *ἱερέα διὰ βίου θεᾶς Λητοῦς τῆς Περγαίων πόλεως*; and see Rams. *Cities and Bish. of Phrygia*, 1 90 *f.*). An annual festival was held in her honour (Strabo, *l.c.*). It is clear from this that Perga would be a centre of native feeling, in opposition to the Hellenic city of Attaleia, a later foundation. Hence the preaching of Paul and Barnabas made apparently no impression during their short stay; and the town was not sufficiently important to call for long-continued effort (contrast the case of Ephesus). For the probable route of Paul northwards, see PISIDIA.

Perga and SIDE (*q.v.*) seem to have been rivals in dignity, and both on their coins claim the title metropolis, and in ecclesiastical administration (but apparently not in civil) Pamphylia was divided between the two cities, Perga being the metropolis of the western part; when this division of the bishoprics between the two metropolitans was made, is not known. During the Byzantine period, Perga gradually fell into decay, and Attaleia took its place as the seat of the metropolitan and the chief city of Pamphylia. (For the history of Christian organisation in Pamphylia, see Ramsay, *Hist. Geogr. of AM* 415 *ff.*, and papers by Gelzer in *JPT* xii.). W. J. W.

PERGAMOS (ΕΙΣ ΠΕΡΓΑΜΟΝ, Rev. 1 11; ΕΝ Περγάμῳ, Rev. 2 12, thus leaving the nom. uncertain. AV *Pergamos* = ἡ Πέργαμος [Lat. *Pergamus*], found in Paus. v. 13 3, *ἐν τῇ Περγάμῳ τῇ ὑπὲρ ποταμοῦ Καΐκου*; *id.* vii. 16 1, viii. 4 9, etc., and in other authors. RV *Pergamum* = τὸ Πέργαμον [Lat. *Pergamum*], the usual form in inscriptions and authors [so always in Strabo and Polybius]).

A Mysian city, about 15 m. from the sea, commanding the valley of the Caicus (*Bakir Chai*), from which river it was distant about 4 m. to the N. This district was the richest land in Mysia (Strabo, 624). The earliest settlement occupied the conical hill, 1000 feet high, which rises between the Selinus on the W. and the Cetius on the E., both flowing southwards into the Caicus. The later Hellenic and Roman city spread over the ground at the foot of the hill, south-westwards beyond the Selinus. The modern town of *Bergama* covers part of the site of the lower town. The hill was the Acropolis of the later city.

1. History.

The town was of little importance until after the

[1] The קְטֹרֶת of Ex. 30 35, 'perfume' in AV, is in RV rightly translated INCENSE. So also Ecclus. 49 1; RV 'incense prepared by the work of the apothecary,' Heb. 'salted, the work, etc.,' קטרת סמים הממלח מעשה רוקח.

[2] See Tobit 8 3 Ecclus. 38 4 8 and reff. in *Rel. Sem.* 453, and on the אַזְכָּרָה (cp FRANKINCENSE) see INCENSE, § 4 (1), SACRIFICE.

[3] But *Perge* in Plin. *HN* 5 26, *Perga*, Pomp. Mela, 1 14.

[1] Sometimes this type shows the variation of a long tunic, in place of the ordinary short tunic appropriate to the huntress goddess.

death of Alexander the Great. On its strong hill King Lysimachus deposited 9000 talents of his treasure, and this was appropriated by its guardian, Philetærus of Tion in Pontus to found the independent kingdom of the Attalids (Strabo, 623 *f.*). With the support of Seleucus, the King of Syria, Philetærus consolidated his power (284-263 B.C.) and bequeathed it to his nephew Eumenes I. (263-241 B.C.). The glory of Pergamos began with the reign of Attalus I., another nephew of Philetærus (241-197 B.C.). The prestige of the Pergamene kings was gained by their championship of Hellenic civilisation against the Gauls or Galatians, who for long terrorised western Asia (see GALATIA, § 1). After defeating the Gauls near the sources of the Caicus (cp Paus. i. 8 2), Attalus took the title of king. His success inspired Pergamene art.[1] Other victories added to the dominions of Attalus a large part of western Asia Minor, as far as Pamphylia (Pol. 18 41); and he enlarged his capital so that it became the fairest city in the East. Then the Seleucid power increased, and the Pergamene kingdom was reduced to its original narrow limits; but having sided with Rome in the struggle with the Seleucid monarchy Attalus gradually reconquered his lost possessions, and by the peace of 189 B.C. received from Rome all within the Taurus. Under his son, Eumenes II. (197-159 B.C.), Pergamos reached the zenith of her splendour. He carried on the artistic and scientific schemes of his father. He it was who built the great Altar of Zeus, and beautified the temple and grove of Athena Nicephorus below the Acropolis (cp Strabo, 624, Pol. 16 1). He also enlarged the library founded by Attalus, which rivalled ultimately that of Alexandria, and contained 200,000 books (Strabo, 609). Attalus II., his brother (159-138 B.C.), founded Attalia and PHILADELPHIA (*q.v.*). Attalus III., the last king (138-133 B.C.), who inherited little of the capacity of his ancestors, left a will[2] stipulating that Pergamos and other cities should be free, whilst the rest of his kingdom was bequeathed to the Romans. One Aristonicus, who claimed to have the blood of the Attalids in his veins, made an abortive attempt to seize the kingdom.

Pergamos continued to be the capital of the Roman province[3] (from 129 B.C.), even as it had been the capital of the Attalid monarchy—a position which had its justification in history, and was recognised for at least the next two hundred years. There is, however, nowhere any express statement to this effect.[4]

The three cities, Smyrna, Pergamos, and Ephesus were in fact rivals for the honour of being capital of the Province (each called itself πρώτη Ἀσίας), and in this struggle Pergamos had nothing but her history to set against the steadily growing commercial supremacy of her rivals; and in the end the rivals won. Ephesus, lying on the main route of eastern trade, asserted her superiority over both Smyrna and Pergamos.[5] Probably the practical fact of the supremacy of Ephesus was recognised popularly long before it became the official view, and the change came about gradually and without any official imperial enactment. The order of enumeration in Rev. 1 11, Ephesus, Smyrna, Pergamos, etc., is true to the facts of the time, and the two commercial cities stand at the head of the list.

That for the first two centuries of the Roman occupation of Asia Pergamos was in the official view the chief

[1] Plin. *HN* 34 84; Paus. i. 25 2. See Harrison, *Myth. and Mon. of Anc. Athens*, 474 *f.*; Gardner, *Hist. of Gk. Sculpture*, 452 *f.*

[2] Suspicion has sometimes been cast upon the genuineness of the will; but an inscription has vindicated the honour of Rome (see Fränkel, *Inschriften von Perg.* i., no. 249).

[3] Phrygia Magna had been separated from the rest of the Pergamos realm; it was given to Mithridates of Pontus until 120 B.C., when he died. It was not definitely attached to the Province of Asia until Sulla's time, 84 B.C.

[4] For the expression of Pliny, *HN* 5 30, *longe clarissimum Asiæ*, is simply on a level with that of Strabo, 623, ἐπιφανὴς πόλις, both primarily referring to the place of the city in history and art. Strabo's remark, *l.c.*, ἔχει δέ τινα ἡγεμονίαν πρὸς τοὺς τόπους τούτους τὸ Πέργαμον, shows how little we have to do with any definite officially-fixed status.

[5] The long struggle for supremacy has continued, and Ephesus has had to yield the palm to Smyrna, which is now the greatest city in Asia Minor (see Murray, *Handbook to AM*, 70 *f.*, and cp SMYRNA).

city of the province, is to be gathered indirectly from the fact that, as early as 29 B.C., the city possessed a temple dedicated to Rome and Augustus by the Provincial Synod (Κοινὸν Ἀσίας) as its place of meeting (Tac. *Ann.* 4 37). Ephesus was not then recognised as a leading city. Pergamos thus gained the honour of the Neokorate before either Smyrna (temple erected to Tiberius, 26 A.D., Tac. *Ann.* 4 56) or Ephesus[1] (temple to Claudius, 41-54 A.D. possibly). The second Neokorate (and second temple of the Emperors) in the case of Pergamos dates from the reign of Trajan; in the case of Ephesus only after 127 A.D., in the reign of Hadrian (see NEOCOROS). The discussion of this point is necessary as upon a correct appreciation of the position of the city depends the interpretation of the striking phrase of Rev. 2 13, 'thou dwellest, even where Satan's seat is' (so AV; better, RV 'where Satan's throne is,' ὅπου ὁ θρόνος τοῦ Σατανᾶ).

2. Reference in Rev. 2 13.

Various interpretations have been proposed.

(*a*) In view of the special prominence at Pergamos of the worship of four of the greatest deities[2] of the pagan religion—Zeus, Athena, Dionysus, and Asclepius—some have referred the phrase thereto. Zeus Soter (the Saviour), Athena Nicephorus (Bringer of Victory) were honoured as having given victory over the Galatai. Athena's greatest temple as Warden of the City (Polias) occupied nearly the highest point of the Acropolis. This view must be rejected on the ground that Pergamos in no wise stood in the position of champion of pagan ritual against Christianity. Moreover, in Asia Minor the most formidable rival of the new religion was not the religion of Greece, but the development of that primitive Oriental nature-worship which presented itself with overpowering might in the cult of the so-called Aphrodite of Paphos and Diana of Ephesus.

If any city and worship merited the figure in the Apocalypse, it was Ephesus with her goddess Diana; more especially as perhaps already at the time of the composition of the Apocalypse there had occurred a pagan revival at Ephesus (this revival took place as early as 104 A.D. See Hicks, *Inscr. of Brit. Mus.* 3 67-87, and cp Rams. *Ch. in Rom. Emp.* 143).

(*b*) More specifically, some have seen in the phrase a reference to the great Altar of Zeus on the terrace below the temple of Athena Polias.

The sacrificial altar proper consisted, like that at Olympia, of the ashes of the sacrifices (Paus. v. 13 8), but rose in this case from the centre of a platform about 90 feet square and 20 feet high, with a flight of steps cut into it on the western side. This substructure has been recovered, together with the famous frieze of the Gigantomachia which ran round it. This frieze is 'a theatrical work of tremendous energy' (Holm, *Gk. Hist.*, ET, 4 468): in it the whole Hellenic pantheon appeared in conflict with the Giants, many of the latter being represented with a human body ending in serpents' coils (see Mitchell, *Hist. of Gk. Sculpture*, 573 *f.*).

Artists' skill combined with the natural grandeur of its position to make the great altar a fit emblem of the kingdom of Satan as the smoke of the sacrifice rose into the air from the huge platform 800 feet above the city. Still, we must be on our guard against our modern feeling for what is picturesque or grand. Would a dweller in the great cities of Asia, among the treasures of an art which lived only through its connection with religion, feel that the altar at Pergamos was something apart and typical?

(*c*) A third view is that the reference is to the worship of Asclepius, whose temple was, as usual, the centre of a medical school, with the right of asylum (Tac. *Ann.* 3 63; Paus. ii. 26 8). Under the empire this cult was fashionable (cp coins), and Asclepios ultimately became the representative deity of the city. The snake was his special attribute (cp art. 'Asklepios' in Roscher's *Lex.*

[1] The temple dedicated to Augustus some time before 5 B.C. was not one that entitled the city to be called *Neocoros*, because (1) it was a dedication by the city merely, not by the Κοινόν, (2) it stood in the precinct of Artemis, not independently. Cp Hicks, *Inscr. of Brit. Mus.*, no. 522.

[2] Cp the oracle in Fränkel, *Inschr. von Perg.* 2 239, of date about 167 A.D., where all four are mentioned.

der Myth. 1 615 *ff.*, and Pauly-Wiss. *Realenc.* 2 1642 *ff.*; Farnell, *Cults of the Greek States*), and the snake was to the Christians the symbol of evil (cp Rev. 12 9 20 2 2 Cor. 11 3). His special title was 'Saviour' (Σωτήρ, or Σωτὴρ τῶν ὅλων), which would have very different associations for the Christian. In spite of these striking features, the reference in Rev. can hardly be to this worship.

Laodiceia also had an Asklepieion, and SMYRNA (*q.v.*). The word θρόνος also undoubtedly refers to the Acropolis hill; but the temple of Asclepius lay in the plain, at some little distance from the town (Pol. 32 27, cp Paus. v. 13 3).

(*d*) The reference is to the primacy of the city as a centre of the worship of the emperors; it was the earliest and the chief centre of that worship, which was the outward expression of loyalty to the imperial system. 'Refusal to comply with the established and official worship of the emperors' became the 'regular test and touchstone of persecution' (Rams. *Church in the Rom. Emp.* 250 *f.*), for the imperial cultus was part of the machinery of government, and such refusal constituted treason. The whole history of early Christianity is the story of the passage from legality to absolute proscription. If Rev. 2 13 was written after the accession of Trajan (98 A.D.) the expression 'throne of Satan' becomes specially appropriate. For, towering at the very summit of the Acropolis, there had recently been erected the temple of Trajan, a symbol visible far and wide of that worship which was the declared foe of Christianity. The primacy of Pergamos in the province, and as the seat of the imperial cult, explains the allusion to the martyr Antipas. For Antipas must be taken to typify a long series of 'faithful witnesses' who had defied the power of 'Satan' at the tribunal of the Roman governor, whose duty it was to proceed against the illegal religion. The reference of *v.* 13 may be to the persecution of Domitian (after 95 A.D.). [Cp ROMAN EMPIRE.] The thought of official persecution has suggested the words of *v.* 12, 'he that hath the sharp two-edged sword,' selected from the description in Rev. 1 12 *ff.* (cp *v.* 16). The actuality of the message to Pergamos as compared with the colourlessness of most of the other messages (especially of that to Ephesus) probably throws some light upon the place of composition.

For the history of the Pergamene kingdom see Holm, *Gk. Hist.*, ET, 4 279 *f.*, 464 *f.*, with references there. Good account of history and recent discoveries by Ussing, *Pergamos* (1899). The results of the German excavations are as yet only partially published. W. J. W.

PERIDA (φερειδα [Bℵ]), Neh. 7 57 = Ezra 2 55 PERUDA (*q.v.*).

PERIZZITES, RV PERIZZITE (הַפְּרִזִּי; οι φερεζαιοι [or -ζεοι] [BℵADEFL]; in Ezra 9 1 φερεσθει [B], -ρεζι [A]), one of the pre-Israelitish populations of Palestine (Gen. 15 20 Ex. 3 8 17, etc.; see AMORITES); also PHERESITES[1] (in 1 Esd. 8 69; RV -EZITES, so EV 2 Esd. 1 21 and AV Judith 5 6). The name, however, requires renewed investigation, the prevalent theory being open to serious objection.

1. References. We begin by collecting the biblical notices. According to Judg. 1 4 *f.* the 'Perizzites' were overcome by Judah and Simeon; but Josh. 17 15 (as the text now stands; 𝔊^BA omits the two names) mentions 'the Perizzites and the Rephaim' as occupying a wild un-cleared region (יַעַר), perhaps N. of Shechem, which was to be taken from them and cleared by the b'nē Joseph. According to Josh. 11 3 they dwelt in the hill-country' (like the Amorites, etc.). In Gen. 13 7 34 30 (J) the Canaanites and the Perizzites are mentioned together; also in 2 Esd. 1 21 (*ferezei*), with the addition of the Philistines. In Gen. 10 16 *f.* (R) the Philistines are not mentioned at all (but cp *v.* 14), and the Perizzites too are conspicuous by their absence.

2. Earlier theory. Some of these data have been thought (*e.g.*, by Dillmann and Kautzsch[1]) to favour the theory that the Perizzites were survivors of the pre-Canaanitish population of W. Palestine, which, after the Canaanitish invasion, could maintain itself only in the open country. But to infer from Gen. 10 15, where the Perizzites are not mentioned, that they were pre-Canaanitish, is difficult in the face of Gen. 13 7 34 30 (see, however, Kautzsch). J no doubt believed that the Perizzites (if that be really the name) were a separate people, contemporary with the Canaanites. As to the reference to the 'Perizzites and the Rephaim' in Josh. 17 15, it gives no support to Dillmann's theory, הפרזי and הרפאים being most probably alternative readings (cp REPHAIM).

3. Later theories. Since פְּרָזִי, Dt. 3 5 1 S 6 18 (cp VILLAGE), means the inhabitants of unwalled villages, it is plausible to deny any distinction between פְּרִזִּי and פְּרָזִי, and to suppose that the term 'Perizzite' is really a clan-name equivalent to פְּרָזִי (so Moore, *Judges*, 17). But there are still stronger grounds for thinking that פרזי is really an early corruption of גרזי, GIRZITE.

𝔊 may be quoted for the theory that 'Perizzite' is the name of a clan, for in Dt. and 1 S. it has φερεζαιοι (-ζε. 𝔊^A in Sam.); the other Gk. versions have ἀτείχιστοι, ἀτείχιστος (cp Symm. in Judg. 5 11 Zech. 2 4). It appears to be more probable, however, that the older view that Perizzites is the name of a people is nearer the truth. פרזי may be a corrupt form either of צרפתי, 'Zarephathite' (see PELETHITES), or of גרזי, 'Girzite' (*i.e.*, Geshurite). It is somewhat in favour of 'Zarephathite' that in Josh. 17 15 'Perizzite' and 'Rephaim' are put side by side for the same people, and that פלשתי is almost certainly (like רפאים) a corruption of צרפתים. It is also true, however, that נ and פ are liable to confusion, and in 1 S. 27 8 H. P. Smith proposes to emend גרזי into פרזי (the Perizzites and those dwelling in Gezer are combined in 𝔊 of Josh. 16 10). At any rate, the people referred to cannot be safely described as a remnant of the pre-Canaanitish population of Palestine. T. K. C.

PERSEPOLIS (περσεπολειν [A], περσιπολιν [V], in accus.). The city where, according to 2 Macc. 9 2†, Antiochus Epiphanes attempted to plunder a temple (or temples, ἱεροσυλεῖν); he was put to flight by the people of the country, and broke up his camp with disgrace (shortly before his death). See ELYMAIS, where it is pointed out that the name Elymais in the ∥ passage, 1 Macc. 6 1, is probably corrupt. From 2 Macc. 1 13 it appears that a temple of Nanæa was meant. Now NANÆA (*q.v.*) was an ancient Elamite goddess. It would be not unnatural that out of the statement 'Persepolis is a city renowned for wealth' (Περσέπολίς ἐστι πόλις ἔνδοξος πλούτῳ) should arise the corrupt reading, 'Elym(a)is in Persia is a city renowned for wealth' (ἐστὶν ελυμ(α)ις[2] π. ε. πλ.). But that there was a temple of Nanæa near the ruins of Persepolis in 164-163 B.C. is not probable. For Persepolis was not in Elymais; it was the capital of Persia proper, and had long since been shorn of its splendour by Alexander the Great, who gave up the city to be plundered, and caused the royal palaces (those can hardly have been temples—only fire-altars) to be set on fire. It is, therefore, not as having any direct connection with biblical history (like Susa), but simply as the original home of the Achæmenian dynasty, and as the seat of the sepulchres of its kings, that Persepolis with its still magnificent ruins interests us.

See Nöldeke, art. 'Persepolis,' *EB*(9); Stolze, *Persepolis*, 2 vols., Berl. 1882 (an account of the expedition of F. C. Andreas, with introd. on the inscriptions by Nöldeke); Flandin et Coste, *Perse ancienne*, and *Voyage en Perse* (1851-52); Dieulafoy, *L'art antique de la Perse* (1881); Curzon, *Persia* (1892), 2 248 *ff.* T. K. C.

PERSEUS (περσευς), 'king of Chittim' (see KITTIM, end), is alluded to in 1 Macc. 8 5. The reference is to the battle of Pydna (168 B.C.),[3] in which

[1] 1 Esd. 8 69 agrees with Ezra 9 1 (glossed, see Guthe, *SBOT*).

[1] Riehm, *HWB*(2) 1211.

[2] επολις would be confounded with ελυμ[α]ις (εμυλ[α]ις) under the influence of the tradition that Nanæa's was the temple referred to.

[3] Near modern *Azam* on the coast-road on the west shore of the gulf of Salonica.

Perseus was defeated and the Macedonian kingdom brought to an end (cp MACEDONIA).

His conqueror was L. Æmilius Paullus. At SAMOTHRACE [*q.v.*], Perseus surrendered to the victor, and was taken as a captive to Rome, but allowed to pass the remainder of his days as a state-prisoner at Alba on Lake Fucinus. This was the end of the empire of Alexander which had lasted for 144 years. For the character and aims of Perseus, see Mommsen, *Rom. Hist.* ET 2 287 *f.* 293 *f.* W. J. W.

PERSIA

Name (§ 1).	Religion and culture (§§ 7-9).
Biblical references (§ 2).	Chronology (§ 10).
Land and people (§ 3).	History (§§ 11-20).
Language and literature (§§ 4-6).	Bibliography (§ 21).

1. Name. Under the name Persia **Media** also is included, Persia and Media, when known to the Hebrews, having been closely united.

Media in Hebrew is מָדַי: ethnic, מָדַי a Mede.

Persia is פָּרַס; ΠΕΡCωΝ [BNAL; both Theod. and 𝔊 in Dan.], but in Dan. 11 2 τῇ περσίδι [BAQ, 87], in 2 Ch. 36 20 μήδων [BAL] (so, in the reverse way, Περσῶν for מדי in Is. 21 2); adj. **Persian,** פַּרְסִי, Neh. 12 22; פַּרְסָיָא [*Kt.*], פָּרְסָאָה [*Kr.*] in Dan. 6 28 [29] (Aram.); τοῦ Πέρσου [BNAL]; five times plur. in EV **Persians**. In the inscriptions of the Achæmenids, O. Persian *Pārsa uta Māda*, Semitic version *Parsu* (gentilic *Parsā*), and *Madāi* (*da-a-a*) [Nabūn. Cyl. *Parsū*], Sus. or Elam. version *Paršin* and *Mata* (gentilic *Paršir*).

'Persia' and 'Persians' are the designations of the kingdom and dynasty (respectively) of Cyrus and his successors after the commencement of the Greek period (on פָּרַס in Ezek. 27 10 see PARAS).

The passages both Hebrew and Aramaic are 2 Ch. 36 20 22 *f.* = Ezra 1 1 *f.* 8 3 7 4 3 5 7 24 6 14 7 1 9 9 Neh. 12 22, besides Dan. (11 2) and Esth. (5 1 10), which are later than the Chronicler. The only one of the passages in Ezra-Neh. that appears on the surface to be free from the Chronicler's redaction is Ezra 9 9, and even if this passage be really from Ezra's hand, the presumption from the usage as exhibited is strong against the authenticity of the word פָּרַס; of course, if the contention of C. C. Torrey (see EZRA, § 1, n. 2) be right, and the Chronicler's hand is the only one to be recognised in Ezra, the case is still clearer. Even in Dan. 9 1, where Darius is said to have been made king over the kingdom of the Kasdīm, he is called not 'the Persian,' but 'son of Ahasuerus, of the seed of the Medes.'

With these phenomena agrees the usage of Babylonian contract tablets from Cyrus to Artaxerxes, where the king's name appears as 'Cyrus (Cambyses, Darius, etc.), king of Babylon, king of the countries,' or simply 'king of the countries' (see *KB* 4, 1896, p. 258 *ff.*, Peiser's transl.).

No doubt Cyrus is called 'king of Persia' (*Parsu*) in the Chronicles of Nabonidus, 2, *l.* 15, but also king of *Anšan* (an Elamitic province; on the relation between these see Tiele, *BAG* 469), Id. *ib. l.* 1, Cyrus Cylinder, *l.* 12; but these both represent him prior to the capture of Babylon. The Cyrus Cylinder, *ll.* 20-22, gives his formal title thereafter: 'Cyrus, king of hosts, great king, mighty king, king of Babylon (lit. *Tintinki*), king of Šumer and Akkad (entire Babylonia), king of the four quarters (of the world), son of Cambyses, the great king, king of (the city) Anšan, grandson of Šišpiš (= Old Pers. Cišpiš, Gk. Teïspes), the great king, king of [the city] Anšan,' etc. (For all these see *KB* 3 2 *ff.* 120 *ff.*, and especially Hagen in Delitzsch and Haupt, *Beitr.* 2 205 *ff.*)

Even in the Old Persian inscriptions, where we find Darius naming himself 'king in Persia' (*Pārsaiy*), this title does not appear alone.

Thus, *Behistun*, 1 1, 'I, Darius, the great king, the king of kings, king in Persia, king of the provinces,' and the much more common expression 'I, Darius, the great king, king of kings, king of the countries of many tribes, king of this great earth far and wide' (Inscr. Alvend, *ll.* 11 *ff.*), or more briefly 'the great king, king of kings, king of these many regions' (Inscr. Persepolis, 2, *ll.* 1 *ff.*), and the like, in connection with which he sometimes calls himself 'a Persian' (as Inscr. Naksh-i-Rustam, 1, *l.* 13); these more general titles are those exclusively found in the (Persian) inscriptions of Xerxes and his successors, Artaxerxes I., Artax. Mnemon, and Artax. Ochus (see for these Spiegel, *APK*, esp. 2, 42, 46, 48, 50, 52, 58, 60, 62, 64, 66, 68—transl. on opp. pp.; especially Weissbach and Bang, *APK* 12, 30, 32, 34, 36, 38, 40, 42, 44, 46—transl. on opp. pp.).

Persia (*Parsā*) is mentioned repeatedly as one province of the empire (*Behistun*, 1 14 34 2 7, etc.). In the first inscription of Persepolis (Spiegel, 46 *ff.*, Weissbach, 34 *f.*) Darius speaks of 'this land Persia' more particularly, as is natural. In accord with these facts is the assumption by the Greek kings of a title similar to that of the earlier Babylonian kings; so Antiochus Soter (280-260 B.C.) in his cuneiform inscr. 1 1 *ff.* (Schr. *KB* 3 2 136, transl. by Peiser):—'Antiochus, the great king, the mighty king, the king of hosts, king of Babylon, king of the countries, . . . princely son of Seleucus the Macedonian (*Makkadunai*) king, king of Babylon.'

It seems probable that the Chronicler's frequent use of the name פָּרַס is intended to distinguish the empire that began with Cyrus from the Macedonian power that overthrew and assumed it. F. B.

Some scholars identify the Persians with the Paršuaš or Baršuaš of the Assyrian inscriptions; but this is very doubtful as, even in the time of the Sargonids, they still lived much more to the N. than the Persians did during the Median rule. Paršuaš seems rather to be an Assyrian form of Parthavaš, the Parthians, called Παρδυαῖοι by the Greeks.

2. Biblical references. In Gen. 10 2 MADAI [*q.v.*] is named among the sons of Japheth, following Gomer and [Ma]gog—*i.e.*, the Gimirrhi and the Lydians—and preceding Javan—*i.e.*, the Ionians and others. Persia is not mentioned, but is certainly regarded by the author as belonging to Media. 2 K. 17 6 and 18 11 relate how the king of Assyria, after having conquered Samaria, transferred the captives from the kingdom of Israel to 'the towns of Media.' In Is. 13 17 the Medes 'who do not care for silver nor desire gold' are called upon by Yahwè to fight the Babylonians. Cp Is. 21 2, where Elam is added to Media. 'The kings of Media' are mentioned among others in Jer. 25 25 and 51 11 as enemies of Babylon. In Ezra 6 2 a decree of Cyrus is found at Aḥmetha (Ecbatana) in the country of Media.

The references in the OT to the Persians, either singly or joined to the Medes, are rather many, but only in the later historical books and in Daniel and Esther. It is very improbable that they are meant in Ezek. 27 10 38 5, where they are said to serve in foreign armies with LUD and Put or with Cush (cp PARAS). Perhaps פתרס should be read instead of פרס.

Kings of Persia are mentioned in Ezra 9 9; Cyrus in 2 Ch. 36 22 *f.* Ezra 1 1 *f.* 8 3 7 4 3 5; Darius in 4 24 Neh. 12 22; Artaxerxes in Ezra 7 1; all three in 6 14. Cyrus the Persian also in Dan. 6 29 [28] 10 1, and *passim*. For Darius the Mede in Dan. 6 and *passim*, see DARIUS. The prince or angel of the Persians is mentioned in Dan. 10 13 20. By 'the kings of Medes and Persians,' Dan. 8 20, is meant the whole Medo-Persian empire. Belshazzar's empire is given to the Medes and Persians, Dan. 5 28. The immutable laws of the Medes and Persians are referred to in Dan. 6 9 13 16 [8 12 15] (cp Esth. 1 19); their army, seven princes, princesses in Esth. 1 3 14 18, and the chronicles of their kings in 10 2.

In the NT the Persians and Persia never occur, only, in Acts 2 9, Μῆδοι with the Parthians and Elamites.

3. Land and people. The Medes and Persians mentioned in the Bible inhabited in historical times only a part of Irān or Erān, the land of the Aryans, which extended W. to E. from the Zagros range to the Hindu Kush and the Indus, and N. to S. from the Caspian Sea and the Turanian steppes to the Erythræan Sea or Persian Gulf. The western countries Persia, Media proper, and Little Media (Atropatene) are separated from the eastern provinces, of which Bactria, Margiana (Merv), and Sogdiana (Sughda) are the best known, by an immense barren desert, running from N. to S. and ending only where the coastland, in a corresponding degree inhabitable, of the Persian Sea begins. It is only along the SE. shore of the Caspian Sea that the land of the Hyrcanians unites the eastern and western parts of Irān.

As a whole, Irān, lacking large rivers and extended valleys, and for the most part mountainous and cold, is

not particularly fertile. There are several exceptions, however, such as Persia itself, and especially the north-eastern provinces, Bactria and Sogdiana, where the climate is mild and the soil rich. It is remarkable that just those two important satrapies did not rise against Darius, whilst rebellion everywhere prevailed. In general it may be said, that Irān was a country well fitted to foster an industrious, proud, manly, and warlike race, and to be for some centuries the centre of a mighty empire.

It is quite certain that the founders of this empire, the Medo-Persians, were not the original inhabitants of the country. They belonged to the Aryan stock. When the Assyrians, as they often did, directed their expeditions to Media, and even built there some strong places to maintain their supremacy, the kings they fought did not bear Aryan names, which become more frequent only in the time of the Sargonids. Aryan tribes, coming from the NW. or the N., and spreading first in the eastern part of the land, seem to have conquered the western regions little by little, and to have settled there in small independent kingdoms, before the Median monarchy was established. If there is any truth in what Bērōssos tells about a Median dynasty reigning over Babylon in the remotest times, this dynasty has nothing in common with the Aryan Medes, but probably was of the same origin as the Kassites, Elamites, and other eastern neighbours of Babylonia.

A complete ethnology and glossology of the Iranian peoples would be out of place here, as our scope is limited to the two nations with whom the Hebrews came into contact.

4. Language.

The Old Persian language we know from the inscriptions of the Achæmenids and from the proper names and sundry words recorded by the ancients. It is closely allied to the Avestan language (the two dialects of which seem to have been spoken in the eastern and northern parts of the empire), and more remotely to the Vedic and Sanskrit languages. About the language of the Medes we know very little. Judging from the Median names that we know, and from the fact that Darius used the same Aryan language for the great Behistun inscription in Media as he did for those he had incised in Persia, we may assume that the Old Median language differed only dialectically from the Old Persian. Still, the inscriptions of the younger Achæmenids show that the Old Persian was then already in decline, and perhaps supplanted by a younger dialect or by the widespread Aramaic. Some scholars call the second of the three languages used in the Achæmenian inscriptions Median. If so, it would not be the language of the rulers, who were certainly Aryans, but the idiom of the conquered race, who may have constituted the majority of the population. In all probability the second language is better called Susian or Neo-Susian, as the idiom of the province where the Persian kings had their principal residence could hardly be wanting in their inscriptions.

The system of writing used for the Persian text of the Achæmenian inscriptions is one of those commonly called cuneiform. It has been taken for granted that it was taken by the Persians either from the Babylonian or Assyrian, or as some think, from the Susian, cuneiform.

5. System of writing.

An accurate comparative study of the three systems, however, shows clearly that this is not the case. The Susians reduced the many hundreds of Babylonian signs to some hundred and twelve, but retained the syllabic character of the writing, the same signs for the same or cognate sounds, and the use of determinative signs with the same signification. Not so the Persians. All they took from their predecessors was the wedge in three shapes— 𒁹, 𒀸, and 𒌋. They rejected all determinatives, only separating the words by a sloping wedge 𐏐, and, instead of a syllabary, they composed a real alphabet of thirty-six signs, none of which corresponds to the sign expressing the same sound in the Babylonian or Susian writing, or looks like a modification of it. If they had intended only to simplify the older syllabaries, they would at least have retained the simple vowel signs of the Babylonians; but for *a*, *i*, and *u* they write 𐎠, 𐎡, and 𐎢 instead of 𒀀, 𒄿 and 𒌋. Therefore, it is clear that they made independent combinations of the wedges. It is hardly conceivable, however, that they would have taken such trouble, only for the purpose of incising a few inscriptions, as the cuneiform, being only destined to be carved in stone or on clay tablets, could not be used for what had to be written on other material. They wrote royal annals, official documents, letters, and communications from the king to the Iranian satraps in their own language, and even the Aramaic or Greek despatches sent to the satraps and other governors of Western Asia and Egypt were translations of Persian originals. Now, for this purpose they apparently used, not the old Pahlavi, which appears first on the coins of the Arsacids, and, as its name indicates, is of Parthian origin, but one of the Aramæan alphabets of Babylonia or Assyria, adapted to their own idiom, and it is on such an already existing alphabet that the Old Persian cuneiform appears to be based. At any rate, in adopting this simple and practical method of writing instead of the clumsy system of their new subjects, the Persians showed great originality and a sound sense of the character of their language.

Weissbach (in *ZDMG* 48 664) tries to prove that the Persian cuneiform was invented not earlier than under Darius Hystaspis. But if the inscription of Cyrus, found at Murghāb, refers to Cyrus the Great, which is most probable, not to Cyrus the Younger, the brother of Artaxerxes I., as Weissbach holds, the Persian cuneiform must have been in use at least in Cambyses' time. Other arguments against Weissbach are urged by Ed. Meyer, *GA* 3 49.

We do not know whether there ever was a written literature, properly so-called, in this Medo-Persian idiom. If there was, it is now irretrievably lost. That is not very probable.

6. Literature.

Though no longer barbarians, the subjects of the Median and Persian kings were a simple, hard-working people, and even the higher classes were given to riding and shooting more than to the cultivation of fine arts and letters. The great kings themselves were totally absorbed by the founding, organising, and maintaining of a large empire, and by constant warfare against rebels and foreign nations.

National songs, epic and lyric, they certainly had; but these may have been transmitted orally from one generation to another. According to Pliny (*HN* 30 1), the Greek author Hermippus compiled his description of the Persian religion from two millions of original verses, and a well-known Persian tradition mentions two official copies of the holy scriptures of the Zoroastrians, preserved by the Achæmenian kings, one of which was burnt by Alexander, whilst the other was sent by him to Greece, to be studied and translated. There is some truth in both statements, however exaggerated they may be. But the religious documents of the Iranians were certainly composed in the language of the Avesta, even if they were not the same as the books, of which the Avesta known to us contains only the scanty remains, and this religious literature may have been the only one extant at the Medo-Persian time.

The inscriptions of Darius Hystaspis and his successors prove that they were worshippers of Auramazda, 'the great God, who created this earth, who created this heaven, who created happiness for man,' and to whom they owed their royal dignity as 'one king, one monarch over many.' It was this God who intrusted Darius with sovereign power over the land when it was full of lying rebels, and who helped him to smite them and to

7. Religion.

smother all revolt. Darius admonishes his subjects 'to obey the commands of this God, and to walk in the straight path unhesitatingly.' Now a God thus described has ceased to be a nature-god; he is the supreme being of an ethical religion. It is true that the Achæmenids, as well as Darius, continued to worship their old clan-gods (*hadâ bagaibiš vithibiš*); but even in the Avesta Mazda, the all-wise Lord, is surrounded by a staff of minor heavenly powers, Amešaspĕñtas and Yazatas, partly personifications of his own attributes, partly old Iranian gods, too popular to be neglected, and therefore assimilated with some modifications by the new creed. There is no essential difference between the theology, the demonology, and the moral doctrines of the inscriptions and those of the Avesta. The Persians may not have followed all the precepts of the holy scriptures as perhaps only the Magi did; but even the Avesta states that they were not observed everywhere among the Iranians, even in countries belonging to Mazda. The Auramazda of the inscriptions is no other than the Ahura Mazda of the Avesta. And if the Persians were Mazda-worshippers, as the younger Achæmenids certainly were, they were also Zarathustrians, for there is no other Mazdaism than the Zarathustrian. All suppositions to the contrary must be rejected as unhistorical. It has been said that the religion of the Persians, as described by Herodotus and other Greek writers, differs too much from the religion taught in the Avesta to be considered as identical with it. But there are manifest errors in Herodotus' description, and it must be taken into consideration that the Greek historian only states what he had heard about the real religion of the Persian people, whilst the Avesta contains the ideals of the priests. The same argument might be used to maintain that the Bible was unknown to or at least not acknowledged as the Word of God by not a few Christian rulers and nations. Moreover, the Avesta was certainly not composed in Persia, nor even in Media proper, and the religious observances may have differed in the various provinces, according to the divergent local traditions that could not be disavowed even after the new faith was accepted. So the same gods are called bagas in Persia and Media, yazatas in the country where the Avestan language was spoken. And though the name for priests in the Avesta is only atharvans and the name *maguš* is wholly unknown to it in that sense, it is the only name for priest in use as well in Persia as in Media, where the Magi formed a kind of tribe.

Whilst it is evident that the younger Achæmenids were Mazdayasnans we are not certain whether the same may be said of their predecessors of the older branch and of the Median kings. Those scholars who think that Zarathuštra was a contemporary of Darius' father Hystaspes (Vištâspa) cannot but regard them as the first confessors of the reformed religion, and others, though rejecting the premiss, equally hold that the Zoroastrian faith did not spread in Media and Persia till Darius I. ascended the throne, perhaps even later. According to both, Cyrus, Cambyses, and the kings of Media were polytheists, daêvayasnans as the Avesta calls them. Others again, and among them such historians as Nöldeke and Ed. Meyer, think it most probable that, at least from Phraortes (Fravartiš)—which even means 'confessor'—downwards, all the rulers of Media and Persia were Mazda-worshippers. The writer of this article is of the same opinion, on grounds developed elsewhere (see § 21, below) more amply than is here possible. If Cyrus, on his Babylonian cylinder, calls himself a worshipper of Marduk, as Cambyses appears on Egyptian monuments as an adorer of the gods of Memphis and Sais, it was only 'the priests' diplomacy' to which the kings did not object for political reasons. It has been truly said that trained historians (*historisch geschulten*, Nöldeke) could not be led astray by such royal decrees. Besides, Darius and Xerxes, though avowed Mazdayasnans, did quite the same.

Still, if the Zoroastrian religion was that of the kings and of the ruling race and the upper classes in Persia and Media—in a Susian inscription Auramazda is called the god of the Aryans (*annap arryanâm*)—it cannot be denied, and even the Avesta admits, that the worship of the old gods subsisted among the nomadic tribes and in various of the more remote parts of Irân. Mazdaism was never the generally accepted faith of all the Iranians. Not before the Sâsânids was it the only tolerated religion of the State, and even under the Achæmenids it may have been divided into different sects. (For a description of the Zarathustrian religion, see ZOROASTRIANISM.)

8. Art and architecture.

Like the religion of the Hebrews, the national religion of the Aryans of Irân, with its tendency to monotheism, its vague personification of ethical ideas, and powers of nature, its sober and generally prosaic character, was not fitted to create or develop a national art. Its cult required no large and splendid temples, but only some small and simple places of worship and altars in the open air. The only image of the deity we know of is the human figure in the winged circle, which is frequently seen hovering about the king's head, and is commonly thought to represent Auramazda or his *fravaši*, but may as well be meant for the *fravaši* of the king himself. Even this is borrowed from the Assyrians, who themselves had imitated it from the Egyptians. The statues of the goddess Anâhita, which, as Bērōssos (frg. 16) tells us, were erected by Artaxerxes Mnemon at Babylon, Susa, and Ekbatana, and to which a passage of her Yasht seems to allude, were doubtless of foreign origin, as (it is all but certain) was the new cult and even the goddess herself, in spite of her pure Iranian name. Nevertheless, it cannot be said that Persian architecture and sculpture have been borrowed or even imitated from their western neighbours, for they have indeed a character of its own. It is called eclectic by high authorities, and in a certain sense it is. But it is not entirely deficient in originality. The able artists who planned and adorned the admirable palaces of Persepolis and Susa were mostly inspired by Assyro-Babylonian models, and they asssimilated also not a few Egyptian motives; but, perhaps under the influence of what they had learned from Greek art in Asia Minor, they created a new style of building and sculpture which, by its elegance and taste, its boldness and finish, surpasses all oriental art in antiquity. It has been suggested that only Greeks, either captives or adventurers, could have done this, and that no Persians, tillers of the soil and warriors as they were, could ever have produced works of art of such excellence. This may be true in a measure. Whilst they may have had Greeks as technical advisers, and even as craftsmen of a higher class, it is improbable that a Greek would have conceived a plan of building so far different from his own standard of beauty, that, notwithstanding all its merits and charm, it must have seemed to him only adapted to the taste of barbarians. At any rate, Persian art is an artificial growth; it is a hot-house plant. It was invented only by the king's command, and lived only by the king's grace; therefore it did not develop. In two centuries it was not improved, but gradually declined. With the Achæmenids it rose, and with them it disappears.

What is true of Persian art and architecture may also be said to a certain extent of their civilisation in general.

9. Civilisation.

The Medes led the way, and the Persians, for a long time their vassals, followed, not only imitating the Median equipment, but adopting also the organisation Cyaxares had given to the army and (we may be sure) much more that was new to them before, and that was borrowed by the Medes from the older nations they had conquered.

Not that the Medo-Persians, before they came into contact with a more refined culture, had been an uncivilised nation. As Aryans proud of their Aryan descent, feeling their superiority to the aborigines whom they brought under their rule, they were a young, healthy, vigorous people, chivalrous and valiant, generous even to their enemies, though severe and even cruel to rebels and traitors. Their manners, while still unspoiled by opulence and luxury, were simple, except that they freely indulged in spirituous liquors. They hated nothing more than lying, and their given word was held sacred even where others proved false. But, as Herodotus tells us, they were prone to imitate strangers and to adopt foreign customs. The Medes inherited, with the empire of the Assyrians, their ancient civilisation. The Persians, after the conquest of Susa, found themselves in the capital of a still more ancient monarchy, known for its love of splendour and rich attire, and could hardly escape its influence. Then came the invasion of Babylonia, of Lydia and the Greek cities of Asia Minor, of Egypt. This led to the awakening of slumbering powers, but also, and perhaps in a greater degree, to moral degeneration. In marrying their nearest relations the Achæmenids of the younger branch followed the example of the Egyptians, for if the next-of-kin marriage (*ḫvaêtvadâta*), mentioned in the Avesta, was in its origin an Iranian institution, it was certainly restricted to the second degree of kinship, and only meant to keep the Aryan blood pure. From the Greeks the Persians learnt other sexual aberrations; and their court, where the heads of the first families were expected to appear regularly, and where even the young nobles were educated, soon became depraved by the bad consequences of harem life, by the arrogance of the eunuchs, and by the intrigues of foreign favourites and ambitious politicians.

10. Chronology.

For the chronology of the Median empire we are dependent entirely on Herodotus and Ctesias, though some synchronisms with Assyrian history may help us in a few cases. Ctesias is not to be trusted; his list of Median kings and the more than three centuries assigned by him as the total duration of their reigns, are equally fantastic. The computation of Herodotus is better, but also partly artificial. The reigns of 22, 40, and 35 years he assigns to Phraortes, Cyaxares, and Astyages may be nearly correct; but the 53 years for Deïoces serve only to fill up the round number of 150. The date of 647 B.C. for the beginning of Phraortes' reign corresponds with the date of the subjection of Babylon by Ašur-bāni-pal, and the troubled state of the Assyrian empire during the gigantic struggle against a mighty confederation was indeed very favourable to the founding of some central power among the chieftains of Media. Though victorious over its rebellious vassals and afterwards over Elam, its hereditary foe, Assyria seems to have exhausted its own powers in those wars and to have rapidly declined during Ašur-bāni-pal's last years. Under the Sargonids who preceded him, Media appears still to have been divided into small principalities. It cannot have been a monarchy before 647; but this may be the date of its foundation.

For the chronology of the Persian empire we have the Canon of Ptolemy, which is certainly to be trusted, the Babylonian contract tablets dated under the reigns of the Persian kings, and the synchronisms of Greek history.

See CHRONOLOGY, § 25, Table iii. Best edition of Ptolemy's Canon in Wachsmuth, *Einl. in das Stud. d. alt. Gesch.*, 305 *f.* Cp also Ed. Meyer, *Forschungen z. alt. Gesch.* ii., ch. 6, *Chron. Forschungen*, 436 *ff.*

We now give a short survey of the history of the Median and Persian empires.

According to Herodotus the Median tribes, living in a kind of anarchy and constantly quarrelling, but wishing to stop these everlasting raids and robberies, and to unite against the common foe, chose a king Deïoces, the son of Phraortes, who fixed his residence in Ecbatana and held a regular court.

11. History: Deioces.

The name Deïoces appears in Sargon's Annals as Dayaukku, a šaknu or governor of Man, who with Rusâ the Urarṭian plotted against Ullusun, the king of Man and vassal of the Assyrians, but was led captive by Sargon with his whole family and brought to Ḫamate (Hamath in Syria?). It is clear that this Mannæan conspirator, who was deported by the Assyrian king, cannot be the king who founded the Median empire.

Elsewhere a Bît-Dayaukku is mentioned in south-western Media, near Ellip. This Dayaukku, after whose house the Assyrians called his country, as *e.g.*, they called Israel Bît-Ḫumri and southern Chaldea or Sealand Bît-Yâkin, must have been the head of a princely or royal house of some importance, unless *Dahyauka* (as the Iranian form would be) were only a general title, corresponding to the Avesta *dahvyuma*, and meaning 'the lord of the land' (*der Landesherr*), as the present author suggested in his *Bab.-Ass. Gesch.* 263, n. 3. Glorified by popular tradition, this Dahyauka (he may have been the head of a dynasty or the chosen ἡγεμών of the Median tribes) grew into the founder of an empire, the Deiokes of Herodotus. The real founder of the monarchy, however, can have been only Phraortes, though a series of leading chieftains presiding over a confederation of tribes may have preceded him for even a much longer time than the fifty-three years assigned to Deiokes by Herodotus. However inviting it might be to regard the list of Median kings before Astyages, given by Ctesias, as comprising the names of such leading chieftains, the idea must be rejected, as the whole list is apparently a product of Ctesias' fancy, invented only to contradict Herodotus.

12. Phraortes, 647-625.

Phraortes (*Fravartiš*, cp the Avesta *fravarĕta*, 'confessor,' which is only etymologically connected with *fravaši*, 'guardian spirit') is said to have first subjugated Persia and afterwards, little by little, nearly the whole of Asia. At last, however, the Assyrian power, though already on its decline, proved too strong for him. An expedition against a king of Aššur, whom Berossos calls Saracos, was unsuccessful, and Phraortes himself succumbed. We may accept these statements as historical, though admitting that there is some exaggeration in what is told of Phraortes' conquests, and though we cannot explain why Sardanapalus (Ašur-bāni-pal) is called Saracus. For it is this king only who can be meant. The subjugation of Persia most probably falls in the reign of Teispes (Cišpiš)—who is the first Persian ruler, called by Cyrus the Great 'King of Anšan'—or a short time earlier. Elam, to which Anšan certainly belonged, had just been annihilated by Ašur-bāni-pal, and was bereft of all its old splendour and power; it therefore fell an easy prey to a young and valiant nation like the Persians, who, though unable to resist the Median conqueror, may have striven to extend their power, as a compensation for the loss of their independence. They found an opportunity to do so in the year 625 B.C., when at the same time Media was defeated by Assyria and lost its king, Ašur-bāni-pal died, and Babylon under Nabopolassar threw off the yoke of Aššur, so that none of the three neighbouring powers could prevent the Persians from penetrating into the very heart of Elam. It is understood that a large part of Elam may have remained independent for many years afterwards.

Jer. 49 35-38, where the fall of Elam is prophesied, and which the redactor ascribes to Jeremiah as being spoken by him about 597 B.C., cannot refer to this first invasion of the Persians, at least if the date is accurate. Twelve years later Ezekiel (32 24) speaks of Elam as having already descended into Sheol. [On these passages see PROPHET.] Is. 22 6, regarded by some scholars (Prašek, and others) as belonging to this time, is much older and dates from the time of Sennacherib and Hezekiah. Forty years later Cyrus the Great was master of the whole country.

Phraortes' son and successor Cyaxares (*Uvakhšatara*)

saw at once why his father, though victorious in his struggle with the rude and semi-barbarous tribes of Irân, was overcome by the veteran-warriors of such a military state as Assyria. His army was, in fact, deficient in training and organisation. Wishing to avenge his father, Cyaxares set himself to work, divided his troops into lancers, archers, and horsemen, and fortified his capital Ecbatana (Hagmatāna, 'the place of gathering'). Then, feeling stronger, he renewed his attack, defeated the Assyrians in a pitched battle, and invested Nineveh. Soon, however, he had to raise the siege. A wild horde of those northern nomads, included by the Greeks under the common name of Scythians and called by the Persians Saka, had invaded Media, and Cyaxares had to hurry home.

13. Cyaxares, 624-585.

Whether this invasion was connected with that other more terrible irruption of Scythians by which western Asia was devastated, is not certain. The Scythians with whom Cyaxares had to deal probably came from the NE. of the Caspian Sea, and, though of the same kin as the Iranians, were savage or at least barbarous nomads. They did not reign in Media, for Cyaxares was neither dethroned nor banished by them. They seem, however, to have domineered over the peaceful householders, and as a kind of Janissaries or Mamelukes to have even held the court in check. It is said that the king got rid of them by killing their chiefs at a banquet, after having made them drunk. It is an old and very common folk-tale, and is only the popular substitute for the historical fact that such a gang of barbarians, rendered careless by an easy victory, and enervated by indulging too freely in all the unwonted luxuries of civilised life, could not but be overpowered at last by the shrewd policy and the superior tactics of a real king. It seems that Cyaxares did not chase the Saka, but that they submitted to him and joined his army. In a few years this result was obtained. The whole drama was played between the first and second expeditions to Assyria. The second ended in the fall of Nineveh (607 or 606 B.C.), the first, preceded by the military reform, cannot have happened much earlier than 620 B.C., 625 or 624 being the year of the accession of Cyaxares. If Herodotus is right in stating that the Scythians ruled Asia for twenty-eight years, this cannot refer to Media, where they did not even rule.

Cyaxares now felt able to renew his attack on Assyria, which, though no more than a shadow of what it was before, still hindered the Medes in extending their empire to the NW. This time he was successful and destroyed Nineveh about 607-606 B.C. For it was to Cyaxares, not to Astyages, as Berossos and those who depend on him have it, that the fall of the old imperial city was due. It is difficult to decide whether Nabopolassar and his Babylonians joined the Medes as allies against the common foe. Both Ctesias and Berossos tell us so, and even without their testimony we should expect it. Allies they were, and the prince royal of Babylon was married to Cyaxares' daughter. The rising power of the Chaldeans was not to be neglected, and on the other side it was their interest to take an active part in the proceedings against a dynasty which, though paralysed, always claimed the suzerainty over Babylonia. If Herodotus does not mention the Chaldeans, he may have followed a one-sided Medo-Persian tradition. Lastly, it may be doubted whether Media would have left the Chaldeans in undisturbed possession of all the southern and south-western provinces of the Assyrian monarchy, which Nabopolassar's great son not only maintained, but extended, if they had remained inactive in this final struggle for the hegemony of Western Asia. At any rate, Media played the principal part, and it would now direct its victorious arms against Armenia, Cappadocia, and the rich and mighty kingdom of the Lydians. The Lydian frontier, however, was destined to be the limit of the Median conquests. After five years of fighting the war was still undecided, and both parties seem to have been rather tired of it. At least, when, on 28th May 585, a great battle, probably near the Halys, was interrupted by a total eclipse of the sun—the same that Thales the Milesian is said to have predicted—they accepted it as a divine warning and ceased all hostilities. Syennesis of Cilicia, probably chosen by Lydia, and Nebuchadrezzar, erroneously called Labynetus by Herodotus, chosen by Media, acted as arbiters, and peace was concluded by their mediation. Astyages, who seems in the meantime to have ascended the throne, since Phraortes is said to have died in the year of the battle, married the daughter of Alyattes, the king of Lydia.

14. Astyages, 584-550.

Astyages (*Ištuvegu* in the Nab. Cyr. Annals, cp Ctesias' Astyigas) is called by the Greeks (Herod., Æsch. *Pers.* 766 *f.*) a son of Phraortes. Since, however, he is called by the Babylonians king of the Ummanmanda—which, whatever it may mean, cannot have indicated the Medes, but rather (probably) the Scythians, as Cyrus is said to have slain the numerous Ummanmanda with his few troops—since moreover the rebels, who, in the reign of Darius, rose in Media and Sagartia do not call themselves sons of Astyages, but pretend to belong to the family of Cyaxares, Winckler (*Unters. z. alt. Gesch.* 124 *f.*) suggests, that Astyages was neither the son nor the lawful successor of Phraortes, but revived the Scythian supremacy in Media. It cannot be denied that this hypothesis is very alluring. To the arguments of Winckler may be added, that Cyrus himself, in his cylinder, glories in having defeated the Guti, the nomads of Mesopotamia, and the widespread Ummanmanda, the nomads of Irān, so that he himself seems to have regarded his conquest of Media as the liberation of that country from the yoke of a usurper. The man who delivered the greater part of the army of Astyages into the hands of Cyrus, Harpagus, belonged to the royal family. Finally, the name of Astyages has no Iranian sound, and is altogether unlike those of his predecessors. Be this as it may, Astyages' reign seems not to have been a glorious one. The only thing we know of it is, that he encroached on the dominions of Babylonia, then weakened by internal troubles and by the government of a mere antiquary, and placed a garrison in Ḥarrân, which the Chaldean kings regarded as belonging to their empire. As soon, however, as the Persians under Cyrus revolted, the Ummanmanda from all parts of the empire were ordered home to reinforce the army. Astyages may at the outset have defeated the Persians, and even have chased them as far as Pasargadæ; we could believe it, if it were not Ctesias who told it. It is certain, however, that Astyages' own troops gave him up to the enemy, and that the man who betrayed him was Harpagus, whom Cyrus afterwards rewarded by bestowing on him an all but royal dignity in Asia Minor. In this the Babylonian account and Herodotus agree; they are mutually complementary.

15. Significance of Median empire.

The history of the Median empire, very little of which unfortunately is known, is interesting as the first attempt of an Aryan or Indo-European people to found a great and conquering monarchy. But it was not much more than an attempt. In itself, the Median empire had no such great importance. Compared with the Assyrian empire which preceded, or with the Persian which followed it, it seems rather insignificant. It did not supplant the Assyrians, for this had been done already by the Chaldeans. All it could do, and this only after having failed at first and with the aid of the king of Babylon, was, to give the death-blow to the dying capital of the old empire, and to appropriate a part of the booty It was unable to conquer Lydia and felt obl ged to respect the

still mighty dynasty of Nabopolassar. Still, what it achieved was by no means contemptible. It liberated Irān from the Semitic suzerainty; it united the ever quarrelling tribes under a central power; it laid the foundations of a higher civilisation, and so paved the way for that Persian empire, which in a short time equalled, if it did not outrival, the once supreme monarchies of Babylon and Assyria.

16. Cyrus. With the title king of 'Anšan and Parsû,' Cyrus, a descendant of Achæmenes (*Hakhâmaniš*), ascended the throne of the empire. This does not mean that a new monarchy, the Persian, supplanted the Median, but rather that there was a change of dynasty, by which the Median was developed into a Medo-Persian empire, differing from the former only in this, that the Persian branch, hitherto subject, was henceforth uppermost. The Greeks make scarcely any difference between Medes and Persians, and the latter ever regarded the Medes as their nearest kin, and, provided they respected the Persian supremacy, treated them with marked distinction, and entrusted them with high offices and honours.

Cyrus (O. Pers. *Kŭruš* in the nominative, Bab. *Kuraš*) was certainly of royal descent.

When Herodotus makes him the son of a private Persian noble married to the daughter of Astyages, and Ctesias the son of a common herdsman, they only repeat two different traditions of a popular story, such as Orientals especially—and not only they—like to tell about the origin of great monarchs and conquerors, who, from an obscure and modest position, unexpectedly rose to large power and world-wide renown. (See CYRUS, § 1, to which must be added, that Darius calls Hakhâmaniš the *father* of Cyrus's great-grandfather Čišpiš, who is therefore not merely his descendant; he always distinguishes between *putra*, 'son,' and *taumâya*, 'of the family, descendant of.')

After having taken Ecbatana, the first care of Cyrus should have been to secure his supremacy over the Iranian provinces of the Median dominion. Before he could bring this to an end, however, he was compelled to wait for a more convenient season, since Crœsus, the king of the Lydians, had invaded Cappadocia and devastated certain cities which, by the treaty between Alyattes and Astyages, belonged to the Medes. Cyrus hurried to the frontier, and a battle was fought in the district of Pteria, near Sinope, which, according to Herodotus, remained undecided. Crœsus, however, seeing that the Persian army exceeded his own in number, thought it wiser to retreat, and to wait till the auxiliary troops of his allies, on which he reckoned, should have arrived. But he made the mistake of disdaining his enemy, and disbanded his army, feeling sure that Cyrus would not venture to march upon Sardis. This proved a fatal error. The Persian army advanced with great speed, invested the capital, and took it within a fortnight. Crœsus was taken prisoner, but not put to death by the conqueror, who treated him kindly, and even assigned him a city for his living.

The well-known narrative of Herodotus and Xanthus about the pyre on which Crœsus was to be burned with some of his subjects, but from which he was released by Cyrus's curiosity and the favour of the gods, cannot be regarded as history. Ctesias, though not partial to Cyrus, knows nothing of it, but ascribes the liberation of Crœsus to another miracle.

Cyrus being now master of Lydia, returned to his country, where much had still to be done before the whole of Irān had submitted to his rule. The conquest of the Ionian cities, which had refused to accept his suzerainty instead of that of the Lydians, and the subjugation of the valorous Lydians, he left to his generals, principally to Harpagus. Even the government of Lydia, where there was a single and last revolt, was safe in their hands.

It was only (seven or eight years after the fall of Sardis) in 539 that Cyrus could venture to grapple with the power which even Cyaxares had not dared to assail—Babylon. The overthrow of this monarchy and the capture of the imperial city is related elsewhere (see DARIUS, 2; BABYLONIA, § 69). It brought Cyrus to the acme of his power, and made it easy for him to extend it to the shores of the Mediterranean S. of Asia Minor. There is no record of any serious resistance on the part of the nations subject to Babylon; and certainly the Phœnician cities, though so often rebellious against Egypt, Assyria, and Babylonia, seem to have borne the light yoke of the Persians without reluctance.

On Cyrus's relations to the Hebrews see CYRUS, §§ 3-6.

Next to nothing is known about Cyrus's doings after the fall of Babylon in 538. It appears that he did not make it his residence, but installed his son Cambyses as viceroy, preferring to live at Susa, and especially perhaps at his own Persian capital Pasargadæ, which he had built and adorned out of the plunder of Ecbatana. Probably he was for most of the time engaged in one or another military expedition. He died on the battlefield about 529, nobody knows where, and the various sources mention different names for the remote and barbarous tribe which at last defeated and killed him. Whether his tomb at Pasargâdæ (*Murghâb*) was only a mausoleum erected by his son to his memory, or whether it really contained his last remains, it is difficult to say.

Cyrus was neither the bloodthirsty tyrant he is represented in some stories current among the Greeks, nor the ideal ruler of Xenophon's *Cyropædia*. It may be even doubted whether he was a great ruler, as he seems not to have done much for the organisation of his colossal empire. But that he broke with the hated Assyro-Babylonian system, respected every nationality, allowed every people to retain its own religion, laws, customs, language in its own home, proves him to have been a man of large views and, as such, a real statesman, highminded and generous, an Aryan of the Aryans. At any rate he was a great commander, and, if we may believe Herodotus, also a good tactician, one of those military geniuses who are born, not made.

17. Cambyses. Cambyses (*Kam̃bujiya*, or perhaps better *Kabujiya*), the son of Cyrus and Kassandana (also of Achæmenian descent), followed his father as ruler of the empire, and devoted the first four years of his reign to the preparation of an expedition against Egypt, which, as long as it was independent, threatened his south-western frontier. Polycrates of Samos, the kings of Cyprus, and the Phœnician cities were his allies, and with their help he gathered a large fleet, commanded by the Halicarnassian Phanes, who, till then in Egyptian service, had gone over to him. Before he left Persia, Cambyses secretly killed his own brother Bardiya, called Smerdis by the Greeks, who therefore, according to an ingenious remark of Nöldeke, cannot have been the governor of the eastern provinces of Irān, as Ctesias pretends. Then he put himself at the head of his army, entered Egypt, defeated the Egyptian army near Pelusium, and was soon the lord of the whole country. The Egyptian priests represented him to Herodotus as a brutal and cruel tyrant, an epileptic, unable to command his passions, as rude to his own wife and kin as to others, a scoffer, who laughed at the images of Ptah in Memphis, burned the mummy of Amasis, and with impious hand killed the sacred Apis. On the contrary, genuine Egyptian monuments depict him as a pious worshipper of those same gods, and a high priest of Sais praises him as the protector of his cult. The official representation on one side, popular gossip, inspired by national hate, on the other,—neither the one nor the other is to be trusted. But we may be sure that Cambyses' action in Egypt was unwise and impolitic, and that he could not control his violent passions. Certain it is, that even at home he was not popular. His successor Darius states that as soon as the king had left his country a rebellious spirit showed itself in all the provinces, Persia and Media not excepted. At last a Maguš, called Gaumâta (Gometes, Justin), who knew of the murder of Bardiya, and indeed may have perpetrated it himself, put forth a claim to be the real Smerdis, and was speedily acknowledged as such by the whole empire. Those who doubted kept silent, for they knew that their life was in danger, the Magian

having killed every one to whom the secret was known. That he really reigned is proved by Babylonian contract tables dated from the first year of Barziya. In the meantime Cambyses was hurrying home, though not yet aware of all that had happened; but when the terrible news reached him in Syria, he killed himself.

18. Darius. Upon this a member of a side-branch of the Achæmenids, named Darius (*Dârayavauš*), son of Hystaspes (*Vištâspa*), aided by six other representatives of the highest Persian nobility, succeeded in murdering the false Smerdis, and ascended the throne (522). (Cp DARIUS.) Darius states in his inscription at Behistun, that he restored the temples the Mage had destroyed and set right everything else that the usurper had altered; though it is not clear what kind of religious and social reforms 'Smerdis' had introduced. This, however, was only a first step. An arduous task awaited the young king. A spirit of rebellion was fermenting through the whole empire. 'There was much lying in the land.' In nearly every province, except those of western Asia, a pretender rose, and had to be put down. The history of these struggles and of the pacification of the empire cannot be narrated here in detail. Nor can we follow Darius in his useless and unsuccessful expedition against the Scythians, his crushing of the Ionian revolt, and his war with Greece; all this rather belongs to the history of Greece than to that of Persia.

Darius was not so great a general as Cyrus, but he was a greater king. He defined the rights and duties of the Satraps (*Khšathrapâvan*, אחשדרפן), the governors of the provinces, who were allowed a large autonomy, but were controlled by the 'eye of the king,' the first counsellor of the realm or other high officials, and, though themselves commanders of an army corps, were held in check by the garrisons of the fortresses, immediately under the king's command. To keep the reins of government in the hands of the central power, Darius constructed a net of highways and instituted a regular system of posts. He substituted a new and better coinage for that of the Lydians, which was more primitive; did his best to promote navigation and commerce—for example, by digging a canal between the Nile and the Red Sea. Instead of the compulsory presents which had in the olden time been extorted from the population, he assigned taxes for each province. The Persian nobles sneered at this and called the king a chaffer (κάπηλος); it seemed to them undignified, just as the mediæval knights would have thought it; but the people and certainly the state profited by it. Darius did not enlarge the empire of Cyrus; but he maintained it under great difficulties, and made it into an organised state. He could not indeed undo the mischief wrought in Egypt by Cambyses; his wise policy and accumulated favours could not withhold it from revolting; but perhaps if he had lived he would have recovered possession of it. The character of Darius stands very high; even the Greeks, whose national feelings he severely hurt, spoke of him with respect. And it was no vain boast when he claimed to have been neither a liar nor a despot, but to have ruled according to the law.

19. Xerxes. Unhappily, the son who succeeded Darius on the throne was in all points his inferior—Xerxes (*Khšayâršâ*), who reigned from 485-464. He is the king called Ahašweroš in the book of Esther (cp AHASUERUS). With him the decline of the monarchy began, and it was only the solid foundation Darius I. had given it that held it together for so long a time.

Of Persian history after Darius we know nothing except from foreign, and especially Greek, sources. Some of his successors record in their inscriptions the buildings they erected, either for their own use or in honour of the gods, and Xerxes, like his father, gives a list of the nations he ruled; but upon the events of their reign they are silent. Their struggles with the Greeks, who more than once withstood them bravely, and whom they never were able to subjugate, belong to the most interesting parts of ancient oriental history, but do not fall within the scope of the present work. Perhaps the Greeks, if they had been less divided by internal dissensions and had not had so many traitors in their ranks, disappointed in their ambition and greedy for money, might have succeeded in wresting from the Persians at least the supremacy of Asia Minor. What we gather from classic writers as to the affairs of the Persian court is a sad history of alternate weakness and cruelty, corruption, murders, intrigues, and broken faith. The vainglorious and at the same time cowardly Xerxes was succeeded by Artaxerxes (*Artakhšathra*) I., of the Long Hand, under whose reign Nehemiah his cupbearer and Ezra the scribe were allowed to go to Jerusalem to help their fellow-countrymen in their miserable state (cp ARTAXERXES). He was not a bad, but a very weak man, governed by courtiers and women.

20. Darius II. Nothus and his successors. We may pass over the short reign of Xerxes II., who was murdered like his namesake. His successor was Darius II., surnamed Nothus, who left the supreme power in the hands of his cruel and troublesome sister and consort Parysatis. Perhaps if she had succeeded, after her husband's death, in putting the sceptre in the hands of her beloved son, the ambitious but energetic and able Cyrus, the fate of the empire might have been different. But Artaxerxes II., surnamed Mnemon, ascended the throne, and during the long reign (404-358) of this mild and friendly but lazy monarch the power of Persia rapidly declined. It was he who suffered the foreign semi-idolatrous cult of the goddess called Anâhita by the Iranians to be introduced even in Media and Persia. Under his son and successor Ochus (*Vahuka*), who as king adopted the name Artaxerxes III., the monarchy seemed to revive. Cruel, harsh, murderous, indifferent as to the means which he selected to realise his plans, he was intensely hated. By his energy he smothered every revolt, humiliated the Egyptians (whom he deeply offended by ridiculing and persecuting their religion), the Phœnicians, and probably also the Jews (cp ISAIAH ii., §§ 9, 11, 21), and really restored for the time the Persian supremacy. Just, however, when the Macedonian power was rising, and with it the greatest danger that ever threatened the empire, Artaxerxes was murdered by Bagoas, an Egyptian eunuch, the same who pacified Judæa in 348, and (when Johanan the high priest had killed his brother Jesus) entered the temple to the great offence of the pious (Jos. *Ant.* xi. 7 1, § 297; cp ISRAEL, § 66). Bagoas placed on the throne Arses; but when the king tried to get rid of his patron, Bagoas poisoned him. Bagoas then gave the crown to a great-grandson of Darius II., Darius surnamed Codomannus, the worst choice he could well have made. Only a Cyrus, perhaps not even a Darius Hystaspis, might have held his own against the terrible onslaught and the tactics of such a general as Alexander the Great, and so saved the empire. Here, however, was a king no better than Xerxes, valiant perhaps in ordinary fights, but quickly confused in great emergencies, and in no wise equal to the gigantic task imposed on his weak shoulders. His tragic fate cannot make us blind to his great faults; but at the same time we cannot but feel disgusted at the burning of Persepolis by the conqueror. The flames which devoured the graceful buildings of the imperial city were to announce to the world that the lance of the Persian, which formerly reached so far, now lay broken for ever.

21. Bibliography. The best surveys of Medo-Persian history down to the time of Alexander are those of Th. Nöldeke (art. 'Persia,' Pt. i. in *EB*(9) [reprinted with emendations and additions in *Aufsätze zur pers. Gesch.* 1, 1884]) and F. Justi ('Geschichte Irans,' in *Gr. d. iran. Philologie*, 2 3-4 1900); cp his 'Gesch. d. alt. Persiens' in Oncken's *AG* 1 1 4. F. Spiegel, *Eran. Alterthumskunde*, 2, Bk. 5, pp. 236-632, Masp. 3, and above all E. Meyer's *GA* 1-3, 1884-1901 (cp *Entsteh.* and *Forschungen z. alt. Gesch.* 2 437-511 [Chronology]), should also be consulted. Interesting

monographs are (among others):—V. Floigl, *Cyrus und Herodot* (1881). J.V. Prašek, *Media u. d. Haus des Kyaxares*, 1890; *Forschungen z. Gesch. d. Alterth.* 1. 'Kambyses u. d. Ueberlieferung,' Leipz. 1897, 3, 'Z. Chronologie d. Kyros,' 'Z. der Behištuninschrift,' 1, Leipz. 1900, 'Die ersten Jahre Dareios des Hystaspiden,' u.s.w., in *Beiträge z. alt. Gesch.*, ed. by C. F. Lehmann, i., 1 26-50. Th. A. Lincke's endeavour to rehabilitate Cambyses in *Zur Lösung der Kambysesfrage* (1891) is ingenious but not convincing.

The O. Pers. cuneiform inscriptions first deciphered by Sir H. Rawlinson, Lassen, and Benfey have been satisfactorily edited by Fr. Spiegel, *APK*, 1881(2); more recently by Weissbach and Bang (1893). Cp Weissbach, *Die Achämenideninschriften zweiter Art* (1890), and Bezold and Haupt, *Die Ach. Inschr. Babylon. text* (1882).

PERUDA (פְּרוּדָא, 'separated'; φαδογρα [L]). The b'ne Peruda, a group of 'Solomon's servants' (see special article) in the great post-exilic list (see EZRA ii., § 9); Ezra 2 55 (RVmg. PERIDA; *φαδουρα* [BA]) = Neh. 7 57 (פְּרִידָא; EV PERIDA; *φερειδα* [Bℵ], *φαρ.* [A])=1 Esd. 5 33 (AV PHARIRA, RV PHARIDA, RVmg. PERUDA; *φαρ[ε]ιδα* [BA]).

PESTILENCE. The different biblical terms for pestilence having been considered elsewhere (see DISEASES), we are able to confine ourselves here to historical and exegetical details.

1. Frequency. The frequency of pestilences in ancient Palestine is strikingly shown by the words of Gad, 'David's seer,' to his king, 'Shall seven years of famine come to thee in thy land? or wilt thou flee three months before thy foes? or shall there be three days' pestilence in thy land?' (2 S. 24 13). There is no doubt a gradation in the calamities specified. To be three months at the mercy of a victorious foe, burning and spoiling in all directions, was worse than even seven years of famine; and even three days' pestilence of the most acute sort would be enough to destroy or to weaken a large part of the population of a city. The less severe calamity would also be more frequent than those which were more destructive. The fact remains, however, that famine, desolation from war, and pestilence, were three well-known terrors, and this is confirmed by 1 K. 8 37, Ezek. 5 12 17, Am. 4 10, in which these three calamities are again given as parallel misfortunes.

2. Egypt. The last of these passages (Am. 4 10) is *historically* very suggestive. EV renders 'I have sent among you the pestilence after the manner of Egypt' (בְּדֶרֶךְ מִצְרַיִם); G. A. Smith, 'by way of Egypt.' 'A pestilence' would be better. It is a pestilence of a bad type that is meant, just as in Is. 10 26*b* the 'rod lifted up in the manner of Egypt' is 'a divine judicial act such as Egypt experienced.' The NE. corner of the Nile delta was justly regarded in antiquity as the home of the plague. G. A. Smith has well described the conditions which favoured the outbreak of plague in that district.

'The eastern mouth of the Nile then entered the sea at Pelusium, and supplied a great stretch of mingled salt and fresh water under a high temperature [always accompanied by fevers, as round the Gulf of Mexico]. To the W. there is the swampy Delta; and on the Asiatic side sandhills with only brackish wells. Along the coast there appear to have been always a number of lagoons, separated from the sea by low bars of sand, and used as salt-pans. In Greek and Roman times the largest of these was known as the Serbonian Bog or Marsh. . . . In Justinian's time, the "Bog" was surrounded by communities of salt-makers and fish-curers; filthy villages of underfed and imbecile people, who always had disease among them. The extremes of temperature are excessive.'[1]

In such a country plague must always have been ready to break out, and the infection must often have been brought by trading caravans to Palestine. This illustrates, not only Am. 4 10, but also a passage mistranslated both in AV and in RV, owing to the influence of the traditional prejudice of the Mosaic authorship of

[1] *HG* 157. Cp *Book of Isaiah*, 1 361.

Deuteronomy. The threat which is dramatically attached to the non-observance of the Deuteronomic law is that Yahwè will bring upon Israel 'all the diseases of Egypt which thou wast (not 'art') afraid of' (Dt. 28 60).

It may be partly owing to the consequences of plagues that we have so little historical evidence as to particular outbreaks of pestilence in ancient Palestine.

3. OT references. The references to plagues in Ex. 11 4 12 29 *f.* (the Tenth Plague), Nu. 11 33 (sickness following the quails), 25 18 26 1 (plague through Baal-peor), belong to a cycle of highly legendary didactic narratives (see PLAGUES [TEN]). The story of the boils in 1 S. 5 9-12[1] is also legendary. The honour of the ark of God had to be rescued; the offenders against the sanctity of Yahwè are naturally punished by pestilence, and possibly would have been represented as so punished, even had they dwelt in the N. of Palestine, and not in a part which was closely connected with Egypt by the avenues of commerce.[2] The passage describing the punishment of David's numbering of the people (2 S. 24) is also a didactic narrative; but we cannot deny that a pestilence may have coincided chronologically with the unpopular act of the king. A more authentic witness to a pestilence is the retrospective statement of Amos (4 10), referring to N. Israel. Lastly, we have the famous reference to a pestilence by which Sennacherib's army suffered greatly in 2 K. 19 35 (=Is. 37 36)—a reference which, in the light of literary and historical criticism, is most probably altogether legendary.

It may be well to pause for a little on the Sennacherib passage, because of the new tradition which has sprung up among critics, to the effect that the main fact of 2 K. has received independent confirmation from an Egyptian source.

4. Criticism of Sennacherib's pestilence. Herodotus, indeed, says (2 141) that when Sennacherib, 'king of the Arabians and Assyrians,' invaded Egypt and besieged Pelusium in the days of king Sethos, field-mice gnawed the quivers and shield-handles of the invaders, who fled precipitately. As Skinner puts the common theory—

'Since the mouse was among the Egyptians a symbol of pestilence, we may infer that the basis of truth in the legend was a deadly epidemic in the Assyrian camp; and this is the form of calamity which is naturally suggested by the terms of the biblical narrative. The scene of the disaster is not indicated in the OT record, and there is no obstacle to the supposition that it took place, as in the Egyptian legend, in the plague-haunted marshes of Pelusium' (*Isa. i.-xxxix.*, p. 275).

To this view there are several strong objections. (1) The mouse was not a symbol of pestilence; it is unwise to attempt to prove this by such a late authority as Horapollo (1 50), and such an obscure and corrupt narrative as that in 1 S. 6 (see EMERODS). The story of the field-mice is merely a mythological way of saying that Horus, to whom the mouse was sacred, repelled the foes of Egypt in an unaccountable way.[3] (2) The theory takes no account of the composite character of the Hebrew story. Two narratives of Sennacherib's dealings with Hezekiah have been welded together. According to the one (Is. 36 1-37 9), a report which Sennacherib heard, while still at Lachish,[4] caused him to move camp, and depart on his return to Nineveh ('Isa.' *SBOT* [Eng.], p. 49). According to the other (Is. 37 9*c*-21 33 36),

[1] The text has suffered in transmission (see EMERODS).

[2] G.A.Sm. (*HG* 158 *f.*) supports the historicity of the narrative by the considerations that Philistia was closely connected with Egypt, and that armies are specially liable to infection. The Philistines, he thinks, were struck 'while they were in camp against Israel.' If so, the tradition in 1 S. 5 seems to be not quite accurate (see *vv.* 6, 9, 10).

[3] Use was made of the essay of A. Lang on Apollo and the Mouse in *Custom and Myth* by the present writer in his *Introd. to Isaiah*, 333. More recently, Meinhold has, with German elaborateness, worked on the same lines (*Die Jes.-erzählungen, Jes.* 36-39 33-42). He is not perfectly clear on the narrative of 1 S. 5 *f.*, but inclines to follow Klostermann. In the article EMERODS, the investigation of the textual problems has been carried further. Wellhausen's treatment of the text of 1 S. 5 6 leaves much to be desired.

[4] 2 K. 19 8 (Is. 37 8) has been recast by the editor. See 'Isa.' *SBOT* (Eng.), *l.c.*

on the night after Isaiah had prophesied Sennacherib's failure to enter Jerusalem, a destroying angel went out and slew 185,000 warriors in the Assyrian camp. Both narratives are very late, but the former (rumour), being less didactic, is to be preferred to the latter (pestilence). For the origin of the story of the pestilence,[1] see HEZEKIAH, § 2.

The prism-inscription of Sennacherib may also be quoted against the historicity of the pestilence narrative. If Hezekiah troubled himself to send a special messenger with tribute to Nineveh, it is by no means likely that Sennacherib had been compelled to return by a calamity which almost destroyed his army, and would doubtless be regarded by Hezekiah as a special act of God. On the other hand, the contemporary history of Assyria confirms the accuracy of the 'rumour' narrative. In the following year Sennacherib had as much as he could do in counteracting the restless Chaldæan princes, and we can well believe that the rumour which caused him to move camp from Lachish was really concerned with the machinations of these opponents. The assassination of Sennacherib in the first narrative, too, is undoubtedly historical. Not knowing of it, the second narrator was obliged to represent the pestilence as a just punishment of the enemy of Yahwè.

5. Sickness of Hezekiah.

Many writers have held that the sickness of Hezekiah, referred to in 2 K. 20 (Is. 38), was the plague; and some, following Hitzig, have supposed that it was a case of the same plague as the Assyrian army is said to have suffered from, which 'had got among the people of the country, as sickness in the train of an army usually does.' This view is at first sight plausible. The compiler of the 'second (the pestilence) narrative' certainly held it (cp 'Isa.' *SBOT*), and it is confirmed by Is. 38 6, which implies that Jerusalem is in great danger from the Assyrians. This, however, is, if recent criticism may be followed, an error. The embassy of Merodach Baladan must have preceded the Assyrian invasion. It cannot have had any smaller motive than the wish to organise a general resistance to Assyria (see MERODACH-BALADAN).[2]

It is, however, by no means necessary to accept the compiler's *arrangement* of his material, any more than we always accept the arrangement of material in a gospel. The idea of the writer of 2 K. 19 35 is that the Assyrians who were attacked by the plague died suddenly. The boil (*šĕḥīn*) of Hezekiah seems to have lasted some little time, and need not have been a plague-boil. There are various boil-diseases, sometimes called after the respective cities where they are prevalent. That of Hezekiah may, for instance, have been a malignant carbuncle, for which (not less than for a plague-boil) a poultice of figs would be an appropriate remedy.

Dr. Lauder Brunton[3] has been led to view the disease as 'tonsilitis' from the similarity of some of the symptoms described in the Song of Hezekiah (Is. 38 10-20) with those of some cases of quinsy. Unfortunately, the connection of the Song with an event in the life of Hezekiah is plainly a scribe's fiction, and the psalm, as we may call it, should be grouped with other national psalms of thanksgiving for deliverance. We should hardly think of discussing the symptoms of disease implied in Ps. 6 30 and 88. T. K. C.

PESTLE (עֱלִי), Prov. 27 22. See MORTAR.

PETER. See SIMON PETER.

PETER, THE EPISTLES OF. *1 Peter.*—The so-called first General Epistle of Peter is addressed to 'the elect who are sojourners of the Dispersion in Pontus, Galatia, Capadocia, Asia, and Bithynia.' The hypo-

1. First Peter: its readers.

thesis that the letter was written by Simon Peter naturally carries with it the presumption that the persons addressed were Jewish Christians, and the expression 'sojourners of the dispersion' (*παρεπιδήμοις διασπορᾶς*, 1 1) lends it some support. But 'sojourners' (cp 2 11; Heb. 11 13) is probably employed figuratively of Christians in general as earthly pilgrims or strangers, and Weiss stands almost alone in supporting the opinion that the writer had in mind as his readers communities composed chiefly of Jewish Christians. Apart from the fact that the provinces referred to were the field of the Pauline mission, and the improbability that there were separate Jewish-Christian churches there, the epistle contains unmistakable indications that it was addressed to gentile believers, to whom alone are applicable the references to former practices and errors (1 14 18 2 9 *f.* 4 3 *f.*). The readers are represented as persons who had not seen Jesus, who had been 'redeemed' from a former 'vain manner of life' and 'called out of darkness,' and who as strangers and foreigners had a 'time of sojourn' to accomplish in the world, whilst their true fatherland was heaven.

2. Object.

The epistle has been variously interpreted as to its object. On the ground of 1 12 25 and 5 12, it has been maintained that the author, whether Peter or another, wished to establish in the churches of Asia Minor, which had been founded by Paul, the authority of this apostle, so far as it could be confirmed by the approval of the great 'pillar' of the Jewish Christian community, and to show the essential agreement of the two. This view has been to some extent supported by a few scholars who believe that Peter was the author of the epistle. To the older Tübingen school the writing had no other object than to mediate between the Pauline and Petrine factions in the early church. Schwegler accordingly says of the epistle that 'it is an apology for Paulinism written by a follower of Paul for the adherents of Peter—an apology which was effected simply that an exposition of the Pauline doctrine might be put into the mouth of Peter' (*Nachap. Zeitalter*, 2 2). A testimony from Peter to the orthodoxy of Paul was regarded from this point of view as a very effective means of reconciling the adherents of the two great teachers. If, however, such were the object of the writer, it is to say the least surprising that he did not make it more apparent and conspicuous. The passages referred to are too vague to admit of any such special application, and nothing seems to be farther from the writer's thought in general than the Pauline and Petrine controversy, which he stands far above and beyond. In 5 12, the 'grace of God' (*χάριν τοῦ θεοῦ*) does not necessarily refer to the Pauline 'gospel,' but may be explained by 1 13 (the words *εἰς ἣν στῆτε*, 'wherein ye stand,' are with doubtful propriety rendered in RV 'stand ye fast therein'). Without a distinctive dogmatic purpose, the writer addresses himself zealously to the comfort, admonition, and encouragement of his readers, who are assumed to be in need of such an exhortation on account of the persecutions which they are suffering for the sake of their Christian profession (3 12 16 4 4 12 *f.* 5 8-10). These persecutions are represented as proceeding from gentiles, and the writer's chief object is, as Lechler remarks, to impress upon his readers the indissoluble connection and succession of suffering and glory in the life of the believer as in that of Christ himself (1 11 2 21 3 18). Naturally related to this purpose is the prominence given to hope both expressly and indirectly (1 3 21 3 15 4 13 5 10).

If, however, the epistle shows distinctively neither a dogmatic nor a 'mediating' purpose, it is not without traces of the influence of Paul's theological ideas, and may properly be classified with the deutero-Pauline litera-

[1] Gesenius has already explained this. It should be observed that in Is. 37 36 the words 'that night' (see 2 K. 19 35) are omitted.
[2] Cp Che. *Intr. Is.* 221, 227; Marti, *Jesaia*, 265.
[3] Sir Risdon Bennett, M.D., *The Diseases of the Bible*, 144.

ture of the NT, which represents a weakened Paulinism, and may be regarded as denoting the transition from the thought of the great apostle to that of the Fourth Gospel. Faith is made prominent, as 'unto,' and 'the end of' 'salvation' (1 5 9); but its distinctively Pauline contrast with works is not expressed. The doctrine of atonement as set forth by Paul underlies the writer's apprehension of the death of Jesus, which he regards as 'fore-ordained from the foundation of the world'; but it is weakened in the direction of an 'ethical' significance (1 2 2 24 3 18 4 1). The idea of substitution is scarcely expressed, and the blood of Christ is conceived as having a purifying efficacy. He suffered that he might 'bring us to God.' Accordingly, the Pauline doctrine of justification does not find distinctive expression, and the apostle's terminology (δικαιοῦσθαι, δικαιοσύνη) is avoided.

3. Deutero-Pauline character.

The writer's Christology is only partially disclosed by a few intimations which show its general similarity to that of the deutero-Pauline Epistles to the Hebrews and the Ephesians (3 22 4 11; cp Eph. 1 20 Heb. 13 21). The legend of the descent of Christ to the underworld (3 19) appears to be a development of Eph. 4 8-10. In the vague eschatology the prominent Pauline features do not appear; but the idea of partaking of Christ's sufferings and rejoicings 'at the revelation of his glory' (4 13) is probably a reminiscence of Rom. 8 17, 'we suffer with [him] that we may also be glorified with [him]' (*συμπάσχομεν ἵνα καὶ συνδοξασθῶμεν*).

The literary relations of the epistle to the NT literature are many and unmistakable, though the question of dependence is in some cases indeterminable. That the author was familiar with several of the epistles of Paul, and adopted to some extent their ideas and terminology is generally conceded.

Weiss's contention that Paul borrowed from 1 Peter has few if any supporters, and has been characterised as 'the most desperate step taken by modern apologetics.' The parallels with Romans both in thought and phraseology leave no room for doubt of dependence on that epistle. Especially is this true of Rom. 12 1-13 14: cp 1 14 with Rom. 12 2 (*συσχηματίζεσθαι*, not elsewhere in NT); 4 10 *f.* with Rom. 12 3-8 (after the appropriation of an idea from Rom. 12 13); 4 8 1 22 with Rom. 12 9; 3 9 with Rom. 12 17; 2 13 *f.* with Rom. 13 1; 2 19 with Rom. 13 5 (*διὰ συνείδησιν*); 2 1 and 4 1 3 (reminiscences of Rom. 13 12 *f.*); 1 5 4 13 with Rom. 8 17 *f.*; 2 24 with Rom. 6 2 8 18; 3 3 *f.* with Rom. 2 16 29 (*κρυπτά, κρυπτός, ἐν κρυπτῷ*); 2 6 with Rom. 9 33 (citation from OT with Paul's deviations from the Septuagint). Several accords with other epistles of Paul indicate the writer's familiarity with Pauline ideas and forms of expression: cp 1 3, 2 Cor. 1 3; 2 2, 1 Cor. 3 2; 2 4 *f.*, 1 Cor. 3 16 *f.*; 2 11, Gal. 5 17; 2 16, Gal. 5 13; 2 24, Gal. 3 13; 3 6, Gal. 4 26; 3 7, 1 Cor. 7 35; 3 9, 1 Thess. 5 15; 4 3, Gal. 5 21; 5 14, 1 Cor. 16 20. The writer employs a considerable number of terms 'specifically Pauline,' among which may be mentioned *ἀποκάλυψις, ἐλευθερία, ἔπαινος, δόξα, καλεῖν, κληρονομία, καταρτίζειν, τιμή, χαρίσματα, συνείδησις, ἐν χριστῷ*. The plan and grammatical structure of the epistle also are Pauline.

1 Peter contains, in proportion to its length, a large number of words not used elsewhere in the NT. The writer's acquaintance with Mt., Lk., and Acts is probable from 2 12 3 14 16 4 13 *f.* (cp Mt. 5 10-12 16); 5 6 (cp Mt. 23 12), 1 10 *f.* (Lk. 10 24), 1 13 (Lk. 12 35), 1 12 (Acts 2 2), 1 17 (Acts 10 34 35). The accords with Hebrews do not necessarily show a literary relation of the two epistles. Those with Ephesians have been investigated in great detail without a conclusion on which scholars can agree. Perhaps the most that one is warranted in saying is contained in von Soden's remark that so many related expressions, thoughts, and interests indicate that both writers breathed the same atmosphere, and that possibly the writer of one of the epistles knew the work of the other. On relation of James see JAMES [GENERAL EPISTLE].

4. Other literary relations.

The dependence of the epistle upon the letters of Paul, and its Pauline tone, style, and doctrinal basis, indicate a writer who had made himself familiar with that apostle's works, and was in sympathy with his thought. The absence of the mystical profundity of Paul and the softening of some of the harder lines of his teaching as well as several striking accords with Hebrews, show the writer to have been in contact with the later Paulinism which marks the transition to the Johannine theology. Distinct foreshadowings of the ideas of the Fourth Gospel and the epistles ascribed to John are indeed not wanting, although there is no indication of the author's acquaintance with these writings. Cp 1 23 with 1 Jn. 3 9; 1 22 with 1 Jn. 3 3; 5 2, Jn. 10 16 21 16; 3 18, 1 Jn. 3 7; 1 19, Jn. 1 29. These considerations render the Petrine authorship of 1 Peter very improbable. It is very unlikely, besides, that Peter should have written at all to the Pauline gentile churches in Asia Minor. But if he wrote this epistle to them after the death of Paul, as is generally assumed by the advocates of the traditional view, it is surprising that he should not have mentioned to them their revered teacher. Apart from the address there is nothing in the internal character of the epistle to indicate its Petrine authorship. An independent type of doctrine which can with propriety be called Petrine is wanting.

5. Not Petrine.

There is no trace of the questions mooted in the apostolic age. Whilst the writer shows some contact with the Gospel-literature, there is no indication of the fresh and vivid recollections of an eye-witness of the life of Jesus, and the conspicuous ideas of Jesus' preaching, the kingdom of God, eternal life, the Son of Man, repentance, and the Son of God, find no expression. The author's conception of faith is unknown to the synoptics. The goal is not the synoptic 'eternal life' (*ζωὴ αἰώνιος*), but the Pauline 'glory' (*δόξα*). The sympathetic student of Paulinism by whom this epistle to Gentile churches was written cannot have been Peter, the apostle of the circumcision (Gal. 2 7), who 'stood condemned' before Paul at Antioch for 'dissimulation' (Gal. 2 11 *f.*) as to the vital question of the primitive Christian economy. The argument for an apostolical authorship based on 1 3 8 21 and 2 21-23 is groundless in view of analogous expressions in Hebrews. It is altogether improbable that the fisherman Peter who, according to Papias, required an interpreter should have command of a Greek style of the character of this writing. 'I am writing by Silvanus' (*Διὰ Σιλουανοῦ ἔγραψα*: 5 12) indicates Silvanus not as a translator or an amanuensis, much less as the author[1] 92-96 A.D. (v. Soden), but probably as the bearer of the letter (see Acts 23). The reference to Silvanus and to Mark (5 12 *f.*) doubtless belongs to the fiction of the authorship (1 1).

6. Not of apostolic age.

The historical conditions and circumstances implied in the epistle indicate, moreover, a time far beyond the probable duration of Peter's life. Ramsay (*Church in Roman Empire*, 284) calls attention to the fact that 'the history of the spread of Christianity imperatively demands for 1 Peter a later date than 64 A.D.,' the date generally assumed by the defenders of the Petrine authorship. These maintain that the persecutions implied in the passages previously referred to belong to the time of Nero. But the references to the trials to which the persons addressed are exposed do not well fit this period.

7. The persecutions.

The persecution is of wide extent, 'accomplished in the brethren who are in the world' (5 9), whilst that under Nero was limited. It was not until later that the Christians were subjected to a judicial inquiry such as is implied in 3 15, and that they were put on trial for their name (*ὡς Χριστιανός*, 4 16; cp CHRISTIAN, § 6). In the Neronian persecution they suffered for a special offence charged by the emperor in order to remove from himself the suspicion of having set fire to the city *abolendo minori Nero subdedit reos*, etc., Tac. *Ann.* 15 44), whilst in 1 Peter the Christians of Asia Minor are admonished not to subject themselves to punishment as 'evil-doers,' but to glorify God in this name if they suffer as Christians.

There is really nothing in 1 Peter which, fairly considered, applies to the Neronian period. As to the precise later time, however, to which the writing should be assigned one can hardly be very positive. Holtzmann, Hilgenfeld, and Pfleiderer, following Schwegler

[1] [Cp Zahn, *Einl.* 2 10, § 38; B. W. Bacon (*Introd.*, 1900, p. 157), who says, 'all things considered, 1 Peter may still represent to us the adoptive work of Peter, writing "by Silvanus" from Rome to the churches of Paul in Asia.']

and Baur, are quite certain that it could not have been written earlier than the time of Trajan (about 112 A.D.); and it must be conceded that the state of affairs regarding the Christians at that time, as set forth in Pliny's letter to the emperor, accords with certain indications in 1 Peter. Ramsay, (*op. cit.* 288), whilst admitting the force of Holtzmann's argument so far as it bears against the date 64 A.D., decides very positively in favour of 75-80 A.D. (cp PONTUS, § 2), thus doubtless excluding the Petrine authorship. His reason for this judgment is that there were conditions similar to those described in 1 Peter earlier than the time of Trajan, that is, in the last quarter of the first century. But since they also fit the later date, they furnish no ground for excluding it in favour of the earlier. The data supplied in the epistle and in known and precisely determinable historical circumstances do not warrant us in placing its composition more definitely than in the last quarter of the first, or the first quarter of the second, century. The vague greeting (5 13) has given rise to uncertainty as to the place from which the epistle was written. The words 'the elect (one) in Babylon' (ἡ ἐν Βαβυλῶνι συνεκλεκτή) have been interpreted as referring (α) to Peter's wife, (β) to the church in Babylon, and (γ) to the church in Rome. The view (α), though defended by Mayerhoff and Neander, has deservedly found little other support (see Zahn, *Einl.* 2 15*f.*, § 38), and the view β is without probability even on the presumption of the Petrine authorship, since there is no historical evidence of a residence of Peter in Babylon. The later date of the epistle renders it very probable that Babylon is employed figuratively for Rome, according to Rev. 14 8 16 19 17 5 18 2 10 21.

[1 Peter 5 13, ἀσπάζεται ὑμᾶς ἡ ἐν Βαβυλῶνι συνεκλεκτή. 'Babylon' might mean: (1) the Egyptian Babylon, a view which Chase (Hastings, *DB* 3 213*b*) dismisses perhaps too quickly. For the Roman fortress of Babylon in old Cairo see Butler's *Ancient Coptic Churches in Egypt.* The city was of some importance (Strabo, 17, p. 807), and is sometimes mentioned in ecclesiastical literature; Epiphanius (*Mon.*, ed Dressel, 6) even calls it τὴν μεγάλην Βαβ. The Talmud confounds the Alexandrians with the Babylonians (*Mĕnāḥōth*, 100*a*), because of the Egyptian Babylon. Could a similar confusion have been made by the writer of 1 Peter? To be sure, we should have to give up the opening verse in order to hold this theory, for tradition connected not Peter but Mark with the church at Alexandria. It is true the above-quoted passage adds, καὶ Μάρκος ὁ υἱός μου. But cp 2 Tim. 4 11

(2) Babylon on the Euphrates. But what evidence is there that Peter was ever at Babylon? Besides, we have sufficient evidence of the growing decadence of ancient Babylon (see Strabo, 16, p. 738; Plin. *NH* 6 122 *cetero ad solitudinem rediit;* Pausanias, viii. 33 3, cp i. 16 3). The Jews dwelt chiefly in the neighbouring cities of Seleucia and Nehardea, and in villages (Jos. *Ant.* xviii. 9 1-9).

(3) The evidence, both external and internal, in favour of Rome, seems to most scholars overwhelming. See Zahn, *Einl.* 2 17*ff.*, § 39. Asiatic Christians too would probably give this interpretation to the name (see Rev. as above; cp ROMAN EMPIRE).]

8. Extent of use.

The mention of 1 Peter in the spurious 2 Peter (3 1) as if written by the same author and addressed to the same readers, cannot of course be regarded as a 'witness' for its authorship. The relation between 1 Peter and 1 Clement is doubtful (2 9 4 8 cp 1 Clem. 36 2 and 49 5). The writer of Hermas furnishes a testimony only to its existence in the second quarter of the second century, and Papias and Polycarp were acquainted with it, according to Eusebius (*HE* 3 39 4 14)—traces of this knowledge being found in fragments of Papias and the epistle of Polycarp. In the absence, however, of direct citation, and in view of the wavering and unsettled state of opinion as to canonicity during the second century, this use of 1 Peter by the writers in question furnishes no evidence even as to their own judgment regarding its authorship, if indeed, they may be supposed to have formed one. The case is similar with regard to Justin. 1 Peter is quoted as Peter's by Iren., Clem. Alex., Tert., and Orig. As to Tertullian, however, there is some doubt, and according to Westcott 'the actual traces of its early use in the Latin churches are very scanty' (*Canon*, p. 263n.). It is not mentioned in the Muratorian Canon.

9. Second Peter—its object.

2 *Peter.*—2 Peter, like the epistle ascribed to Jude, is vaguely addressed to Christians in general—'to those that have obtained the like precious faith with us' (1 1)—and there is nothing in the contents to indicate that Jewish or Gentile believers were especially intended. Yet in 3 1 the writer inconsistently assumes that the First Epistle was addressed to the same readers, and tells them (1 16 3 15) that they had received instruction from him (ostensibly Peter) and letters from Paul! 2 Peter was plainly written partly for the same purpose as was Jude—to warn the Christians of the time against certain persons whose false teaching and loose living were a menace to the church. This note is struck in 1 16 (σεσοφισμένοις μύθοις), in 2 1 (ψευδοδιδάσκαλοι, αἱρέσεις ἀπωλείας), in 2 2 (ταῖς ἀσελγείαις), and is emphasised, apparently in imitation of Jude, in 2 10-22. The warning is resumed in 3 14-18. The readers are put on their guard against 'mockers . . . walking after their own lusts,' as in Jude 18, with the additional indication that their mocking is at the delay of the 'coming' (παρουσία) of Christ. These 'mockers' forget the Deluge, and are unmindful of the judgment of 'fire' reserved for 'the heavens that now are and the earth' (3 5 7).

In this connection appears another purpose of the writing, upon which some think the chief emphasis to have been placed, that is, to assure the readers of the certainty of the Parousia in opposition to the scoffers who, it appears (3 4), were talking of its non-arrival or indefinite postponement. The delay, the writer assures them, is due to the Lord's long-suffering, in order that 'all should come to repentance' (3 9) before 'the day of judgment and destruction of ungodly men' (3 7).

Peculiar to the author is the eschatological catastrophe depicted in 3 10-12, which he thinks should be 'earnestly desired' and prepared for by 'holy living and godliness.' In the peculiar reference to Paul (3 15*f.*), Schwegler finds 'the real literary motive' of the epistle to be 'the reconciliation and blending, the final and enduring conclusion of peace' between the Petrine and Pauline 'tendencies' (*Nachap. Zeitalter*, 1 505). This reference, however, is too plainly incidental to the discussion of the Parousia to be regarded as the 'motive' of the letter. Baur reaches the same conclusion on the ground that the connection of the theoretical 'knowledge' (ἐπίγνωσις) and the practical 'virtue' (ἀρετή) or 'love' (ἀγάπη) in the Epistle is only another expression for the formula 'faith and works' (πίστις καὶ ἔργα), which in the formation of the Catholic church represented the union of Paulinism and Jewish Christianity (*NT Theol.* 297). This view perhaps shows a correct insight into the character, tendency, and age of the epistle; but as an interpretation of a conscious purpose of the writer it must be regarded as somewhat fanciful.

10. Relation to 1 Peter.

The relation of 2 Peter to 1 Peter renders a common authorship extremely doubtful. The name and title of the author are different. There are only a few words common to both which do not belong to the Christian vocabulary of the time or are not also found in the verses in Jude corresponding to a portion of 2 Peter. The style of the two epistles is different, that of 1 Peter being more facile, Hellenistic in vocabulary and form of words, and richer in thought, and that of 2 Peter showing an attempt to write in pure Greek, the formation of new words some of which belong to the technical-medical usage of the later Greek (see ἐξέραμα, 2 22 and καυσοῦσθαι, 3 10), and repetition of the same words, particularly prepositions.

In 1 Peter the second coming of Christ is regarded as nearer than in 2 Peter, and is called ἀποκάλυψις, whilst in 2 Peter it is designated παρουσία (1 Pet. 1 7 13 4 13; 2 Pet. 1 16 3 4). The terms κληρονομία (1 Pet. 1 4) and αἰώνιος βασιλεία (2 Pet. 1 11) also are significant, as well as the two forms of expression ἐπ' ἐσχάτου τῶν χρόνων (1 Pet. 1 20 [BℵA; ℵ* τοῦ χρόνου]) and ἐπ' ἐσχάτων τῶν ἡμερῶν (2 Pet. 3 3 [BℵA]). The prominent ἐλπίς of 1 Peter gives place to γνῶσις or ἐπίγνωσις in 2 Peter and ῥαντισμός to καθαρισμός. In the first Epistle

the diction shows the influence of the OT throughout, in the second not at all.

These differences in words and style have been noticed since the time of Jerome (Holtzmann, *Einl.* 526, and von Soden, *HC* 3*b* 193). Moreover, as to doctrinal differences, the atonement of Christ which is made prominent in the first Epistle is barely touched upon in the second. In contrast with the first Epistle the OT is little quoted in the second (2 22 3 8); but dependence upon it is apparent in several instances (1 19-21 2 1 15 16 3 2 5 6), and the apocryphal is not distinguished from the canonical literature (3 4-8). The familiarity with the Pauline writings evident in the author of the first Epistle does not appear in 2 Peter, and apart from Jude the accords with the NT literature are unimportant. The reference in 1 14 to Jn. 21 18 is doubtful.

Whilst all the indications point to a date later than that of the first Epistle, they do not serve for its precise determination. An advanced period in the second century, perhaps the latter half, is indicated by the warning against false teachers who are not mentioned in 1 Peter.

11. Late and non-apostolic.

The manner, however, in which they are characterised is so confused and vague that it is hazardous to attempt to apply the features indicated to any particular sect, although the opinion that the writer had antinomian Gnostics in mind is well-grounded. He betrays uncertainty and want of independence in having recourse to the figures and allusions of Jude which he distorts and confuses (cp 2 11 with Jude 9; 2 12 Jude 10; 2 17 Jude 12 *f.*; 3 2 Jude 17), and it is probable that he had in view the heretics against whom that Epistle was directed. They are false teachers who bring in 'destructive heresies' (2 1), and carry on their work of 'enticing unsteadfast souls' in a love of gain (2 14). The reference to Gnosticism is scarcely mistakable in σεσοφισμένοις μύθοις (1 16; EV 'cunningly devised fables'), and its phase is indicated in the charge that the false teachers promise a certain (false) 'liberty' (ἐλευθερία) while they themselves are 'bondservants' of corruption (2 19), and find support in the Pauline teaching, 'wresting' it 'to their own destruction' (3 16). The opinion appears tenable that this appeal of the writer to 'our beloved brother Paul' (3 15) indicates a disposition not so much to 'mediate' between the Pauline and Petrine parties—a matter which was doubtless far from his thought—as to combat the Gnostic and libertine tendencies of the time by placing the great apostle at his side against those who as Antinomians were perverting that apostle's teachings.

The reasons based on the character of the Epistle for doubting its Petrine authorship have been repeatedly stated and elaborated by the critical school, and no valid refutation of them has ever been effected. Although the writer's dependence upon Jude cannot now, as in Schwegler's time, be regarded as 'an axiom of NT criticism,' its probability and the consensus of authorities may be said to furnish a presumption against an apostolical authorship. The author endeavours rather too earnestly to make it appear that he is the original apostle Peter (1 1 14 18 3 15), and yet his appeal to an apostolic authority does not accord with this assumed rôle (3 2), even if 'your' (ὑμῶν [BℵA]) be the correct reading. The doubts regarding the Parousia implied in the Epistle and the expedient resorted to in order to answer them belong to a time far beyond the apostolic age. The classification of the Pauline Epistles with 'Scriptures' indicates a period not very remote from that of a developed conception of the canonicity of the NT writings, as does also the apparent reluctance to follow the writer of Jude in quoting the apocryphal Enoch. The supposition that an apostle should have written a letter like this addressed to no churches with which he had ostensibly had relations, touching no special needs or conditions of theirs, and warning against false teachers located nowhere and described partly in a vague and confused manner, partly in terms borrowed from another Epistle, is in the highest degree improbable.

The tardy recognition of 2 Peter in the early church supports the judgment of the critical school as to its unapostolical authorship. The few verbal accords in Clemens Romanus do not even show a literary dependence, much less the priority of 2 Peter. The case is similar with Hermas, 2 Clement, and the *Martyrium Polycarpi*. The apparent contact in Barnabas 15 4 (ἡ γὰρ ἡμέρα παρ' αὐτῷ χίλια ἔτη), and in Justin and Irenæus is explicable from Ps. 90 4. The passage in Theophilus *ad Autol.* 2 9, cited by Zahn, is questionable. According to Cassiodorus Clement of Alexandria commented on the writings of the Bible *ab ipso principio usque ad finem*, and Eusebius says that he explained all the canonical Scriptures, not omitting those which are disputed—the Epistle of Jude and the other Catholic Epistles. These statements render his acquaintance with 2 Peter probable but not certain. It is, however, worthy of note that in a passage in the *Stromata* Clement appears, like Irenæus, to have known only one Epistle of Peter (ὁ Πέτρος ἐν τῇ ἐπιστολῇ . . . λέγει). His attitude toward the second Epistle, if he knew it, was probably that of Origen, who speaks of it as 'doubted' (ἀμφιβάλλεται γάρ, Eus. *HE* 6 25). Eusebius says it was controverted and not received into the canon (οὐκ ἐνδιάθηκον μὲν εἶναι, *HE* 3 3 25). Didymus mentions it as a fact not to be concealed that it was regarded as forged (*falsatam*) and was not in the canon, and Jerome says that most persons deny it to have been written by Peter on account of its disagreement in style with the first. It does not appear in the Muratorian canon or in the Pĕshīttā.

12. Recognition.

13. Literature.

Besides the standard German and English Introductions to the NT and the works referred to in this article, the most important discussions of the two Epistles are contained in the commentaries or special works of Dietlein (1851; 2 Pet. only), Schott (1863), Huther in Meyer (1852, ET 1881), Frohnmüller 3 in Lange (1871), Ewald (*Die Sieben Sendschreiben*, etc. [1870]), Hundhausen (*Die beiden Pontifical-schreiben*, etc. [1873-1878]), Keil (*Pet. u. Judas* [1853]), Holtzmann and Schenkel (*Bib. Lex.*), Sieffert (*PRE*(2) [1883]), B. Weiss (*Der Petrinische Lehrbegriff* [1855], and *St. Kr.*, 1866, pp. 256 *ff.*, 'Die Petrinische Frage; Das Verhaltness zum Judasbrief'), Spitta (*Der 2 Brief des Pet. u. der Br. des Judas* [1885]), Hilgenfeld (*ZWTh.* [1873]), Immer (*NT Theol.*), Pfleiderer (*Das Urchristenthum*), E. A. Abbott (*Expositor*, 2nd Series, 3 49 *ff.*, on relation of 2 Peter to Jos.), Deissmann (*Bibelstudien* [1895], 244 *f.* 277 *ff.*), M'Giffert (*Hist. of Christianity in the Apostolic Age* [1897], 482 *ff.* 596 *ff.* 600 *ff.*), Harnack (*Die Chronologie* [1897], 450-475, 'Die unter dem Namen des Petrus fünf Schriften'), Bigg, *Peter and Jude* ('Intern. Crit. Comm.'), J. Monnier, *La prem. Ép. de l'apôtre Pièrre* (1900), Hort (a fragment, on 1 Pet. 1 1-2 17, published posthumously 1898), and F. H. Chase (articles in Hastings, *DB*, vol. 3; non-Petrine authorship of 2 Peter is granted).

[See also van Manen, *Handleiding voor de oudchristelijke Letterkunde* (1900), pp. 64-67; 1 Peter probably written in Asia Minor between 130 and 140, 2 Peter about 170, perhaps in Egypt. Van Manen regards the stay of Peter at Rome as highly uncertain, not to say, improbable, in spite of what Lightfoot brings forward in *Clement of Rome*, ii. 493.] O. C.

[The present position of conservative criticism may be seen from the sixth edition of part 12 of Meyer's commentary on the NT, which is the work of Prof. E. Kühl (1897). The attempt is there made to prove critically the authenticity of 1 Pet. and of Jude, as well as of 2 Pet. 2 3 3-18. The first Epistle of Peter was, Kühl thinks, addressed to Jewish Christians, and the passages 1 1 2 25 4 3 2 2 1 14 18 2 9 *f.* 3 6 are carefully studied in order to prove this. Unfortunately there is no trace of Jewish-Christian views (maintenance of the political forms of Judaism, of the prerogative of the Jewish people, and of the Mosaic Law as necessarily to be observed by those who are born Jews) anywhere in the epistle, which (as Weiffenbach has pointed out) may much more correctly be regarded as a monument of a mild and liberal Petrinism (cp Gal. 2 7 *ff.*), which made salvation depend exclusively on faith in Christ, and transferred the observance of the law by born Jews to the domain of custom. But this view of Christianity is not even conceivable apart from the influence of Paulinism. Nor has Kühl succeeded in making the existence of Jewish-Christian communities in the provinces of Pontus, etc. (1 1) in the pre-Pauline period at all probable. The opening verse (with the address of the epistle), together with the literary relation of 1 Peter to the Pauline epistles, points decidedly to the later—*i.e.*, post-Pauline—period. See further Chase, 'Peter, First Epistle,' Hastings, *DB* 3 782 *f.* (small type passage).

In his introduction to 2 Peter, Kühl begins by discussing the relation of 2 Peter to the Epistle of Jude and also the question

of its unity. His result is that at any rate 2 Pet. 2 1-3 2 was written under the influence of the Epistle of Jude. The picture of the 'libertines' in Jude is evidently a description of phenomena actually present to the writer; it has in a high degree the note of unity. The second chapter of 2 Peter, however, has a Janus-face, inasmuch as the first half of it deals with the lying teachers of the future, and the second with the errors of the present. It is, therefore, as compared with Jude, secondary. On the other hand, there are passages in the other parts of 2 Peter which either are (2 3, cp Jude 17 *f.*) or, apart from preconceived theory, may possibly be original as compared with passages in Jude. On the whole, the second Epistle of Peter, without this interpolation, is to be regarded as authentic.

It should be added that Bertholdt (*Einl.* [1819], pp. 3157 *ff.*) had already declared 2 Pet. 2 to be an interpolation dependent on Jude, that Ullmann (*Krit. Unters. des 2 Pet.* [1821]) would only allow chap. 1 1 to be the work of Peter, and that Gess (*Das apost. Zeugniss von Chr. Person*, 2 2 [1879], pp. 412 *ff.*) regarded 1 20*b* (ὅτι πᾶσα)—3 3*a* (γινώσκοντες) as an interpolation. Weiffenbach, too (*TLZ*, Nov. 26, 1898, col. 364 *ff.*), agrees with Kühl that 2 Pet. 2 1-3 2 is an interpolation dependent on Jude.]

PETHAHIAH (פְּתַחְיָה, § 27; 'Yahwè opens [the womb],' but adapted perhaps from an ethnic name such as תַּפּוּחִי, 'a Tappuhite' [Che.]).

1. Eponym of one of the twenty-four priestly courses; 1 Ch. 24 16 (φεταια [B], φεθεια [A], φαθια [L]).

2. A Levite, temp. Ezra; Ezra 10 23 (φαδαια [B], φααια [ℵ], φεθεια[ς] [AL]), Neh. 9 5 (BℵA om.; φεσσιας [L]) = 1 Esd. 9 23 PATHEUS (παθαιος [B], φαθ. [A], φεθειας [L]).

3. b. Meshezabel, of the Zerahite branch of the tribe of Judah, was 'at the king's hand in all matters concerning the people,' by which expression we are most probably to understand that he acted as commissary of the Persian king at Jerusalem in the absence of Nehemiah (Neh. 11 24, παθαια [B], φαθ. [AL], παθεια ℵ*], φαθ. [ℵc.a]).

PETHOR (פְּתוֹר; φαθουρα [BFL]), a place 'by the river,' where, according to the present text of Nu. 22 5 (Βαθουρα [A]), Balaam dwelt. In Dt. 23 4 [5] (𝔊BAL om.) it is called 'Pethor of Aram-naharaim,' a phrase which seems to imply an identification of Pĕthōr with a place called Pitru (see inscr. of Shalmaneser II., *RP*(2) 4 40, *KB* i. 133 162 *ff.*, and cp Schr. *KGF* 220 *ff.*, and, for Egyptian notices, *RP*(2) 5 38 6 32; WMM, *As. u. Eur.* 98 267). This important city lay on the W. of the Euphrates, or, more precisely, at the point where that river is joined by the Sagur (mod. *Sājūr*), therefore a few miles S. of Carchemish. The district containing it belonged to the Aramæans, who had been expelled by Tiglath-Pileser I., but had won Pitru back from a later Assyrian king. Shalmaneser II. adds that he himself recovered the place, and settled it anew with Assyrian colonists. In modern times this identification was first made by E. Hincks; it has been adopted by Sayce, Schrader, and Frd. Delitzsch.

See especially Sayce, 'The Site of Pethor,' *Acad.* Sept. 16, 1876, p. 291; Schr. *KGF* 220 *ff.*; Del. *Par.* 269.

That Pethor rightly stands in Dt. 23 5 [4] cannot be doubted, and it must have been read very early in Nu. 22 5, for on this passage Dt. 23 5 [4] is based. Nevertheless the earliest form of the story of Balaam cannot have traced his origin to a place called Pethor. For no such place as Pethor existed in the Euphrates region. Pĕthōr would be in Assyrian Pitāru, while Pitru would be in Hebrew Pether (Păthăr). Nor is it even certain that the true text of Dt. 23 5 placed Pethor in the far north; נהרים, in the phrase ארם נהרים (Aram-naharaim), may perhaps be a corruption of ירחמאל, a frequent gloss on ארם. If so, 'Pethor of Jerahmeel' refers to some place on the N. Arabian border.

The Euphrates is not the only stream called *par excellence* הַנָּהָר, 'the river'; there is another—that near which Rehoboth lay, the city of the Aramite king Shaul (see SAUL, 2). It was in short the river of Miṣrim, miscalled traditionally 'the river of Egypt' (see EGYPT, RIVER OF). This is the Wādy el-'Arīš, the border-stream of the N. Arabian land of Muṣri or Muṣur (see MIZRAIM). To obtain a clear and consistent geography the 'river' beside which was the home of Balaam, must be the river by which Rehoboth lay. This is confirmed by the fact (as we may fairly regard it) that Miṣrim (*i.e.*, Muṣri) occurs twice in a corrupted form in the list of Edomite (or perhaps, rather, Aramite —*i.e.*, Jerahmeelite) kings in Gen. 36 31-39 (see BELA, DINHABAH, ME-ZAHAB). No such place-name as Pethor, however, is known to have existed S. of Palestine. The name suggests a connection with פתר, 'to interpret (a dream),' and is improbable; indeed, in Nu. 22 5 Pesh. renders, not 'to Pethor,' but 'an interpreter of dreams' (*pāšōrā*). There must be a corruption in the text. Probably פתורה is due to an accidental shifting of the letters of the true word, which must have been צָרְפָתָה, 'to Zarephath.' The earlier form of Nu. 22 5 was, 'So he sent messengers to Bil'am ben Beor (or rather Achbor) to Zarephath, which is by the river, to the land of the b'ne Jerahmeel' (עמו comes from עַמּוֹן, which is not unfrequently a corruption of ירחמאל). C. Niebuhr's bold conjecture (*Gesch.* 1 295), 'Pathros' for 'Pethor,' at any rate implies a just disbelief in Pethor.

See Che. 'The Land of Muṣri,' etc., *OLZ*, May 1899.

T. K. C.

PETHUEL (פְּתוּאֵל, 'God's simple one'?—cp Ps. 19 7 [8]; Merx and Nowack prefer 𝔊's Βαθουηλ [see JOEL, § 1]), father of the prophet Joel (Joel 1 1).

An examination of the occurrences of the name JOEL (*q.v.*) suggests that it was a favourite S. Israelitish name, and it may even be held that there is a group of similar names, such as Eliel, Elijah, Elihu, and Eliab, and also Joel, which arose out of corruptions of Jerahmeel. It is noteworthy, as indicating one stage in the process of development, that one of the Joels also appears under the name IGAL (יגאל); see 2 S. 23 36; his father's name was Nathan (an expansion of the Jerahmeelite name Ethan). Kuenen (*Ond.*(2), § 69, n. 14, p. 354) has already suggested that 'Joel' may be an assumed name, and that the writer of the prophecy (who in 2 11 31 [3 4] alludes to Mal. 4 5 [3 23]), may call himself Joel (=Elijah) to indicate that he is 'the teacher for righteousness' (Joel 2 23?), the true Elijah announced in Mal. 4 5 [3 23]. Now it is far from improbable that Elijah was a Jerahmeelite—'of Zarephath-jerahmeel' (see THISBE)—and that not only Elijah and Joel [see above] but also Bethuel (see LABAN) or Pethuel is a worn-down form of Jerahmeel. The impulse to prophesy was perhaps specially strong among Jerahmeelites. Cp PROPHECY, § 7. T. K. C.

PETRA (סֶלַע), Is. 16 1 AVmg., EV SELA.

PEULTHAI, RV **Peullethai** (פְּעֻלְּתַי, like פלתי, a distortion of צָרְפָתִי, Zarephathite, צ and ע, ר and ל being confounded; ιαφθοσλααθι [B], φολλαθι [A], φελλαθι [L]), one of the sons of OBED-EDOM (*q.v.*), 1 Ch. 26 5†, in a context full of distorted ethnic and gentilic names. T. K. C.

PHAATH MOAB (φααθ' μωαβ [A]), 1 Esd. 5 11 = Ezra 2 6, PAHATH-MOAB.

PHACARETH (φακαρεθ [BA]), 1 Esd. 5 34 = Ezra 2 57, POCHERETH-HAZZEBAIM.

PHAEZELDAEUS (φαηζελδαιου [B]), 1 Esd. 5 38 RVmg. = Ezra 2 61, BARZILLAI.

PHAISUR (φαισουρ [B]), 1 Esd. 9 22 = Ezra 10 22, PASHUR, 3.

PHALDAIUS, RV **Phaldeus** (φαλ(α)δαιος [BA]), 1 Esd. 9 44 = Neh. 8 4, PEDAIAH, 5.

PHALEAS (φαλαιου [BA]), 1 Esd. 5 29 = Ezra 2 44, PADON.

PHALEK (φαλεκ [Ti. WH]), Lk. 3 35 AV, RV PELEG (*q.v.*).

PHALIAS (φαλιας [B]), 1 Esd. 9 48 RV = Neh. 8 7, PELAIAH, 2.

PHALLU (פַּלּוּא), Gen. 46 9 AV, RV PALLU (*q.v.*).

PHALTI (פַּלְטִי), 1 S. 25 44 AV, RV PALTI (*q.v.*).

PHALTIEL (פַּלְטִיאֵל), 2 S. 3 15 AV, RV PALTIEL.

PHANUEL (φανουηλ [Ti. WH]; cp PENUEL), of the tribe of Asher, father of Anna the prophetess (Lk. 2 36). See ANNA.

PHARACIM, RV **Pharakim** (φαρακεμ [B], φαρακειμ [A], om. L), a post-exilic family of Nethinim (1 Esd. 5 31) unmentioned in Ezra and Nehemiah. 'Sons of Pharakim' perhaps represents an original בְּנֵי הַפְּרָכִים—the guild who had the care of the temple-hangings; cp פרכם in Phœn. *CIS* i. no. 86 A 5 10. See NETHINIM.

S. A. C.

PHARAOH (פַּרְעֹה; φαραω; *Pharao*), the name given to all Egyptian kings in the Bible. Evidently like our expressions 'the Tsar,' 'the Mogul,' etc., it must have been a native word for 'king,' or one of the chief titles of the Egyptian rulers. The omission of the article shows its

1. History of name.

stereotyped use among the Hebrews. Later, the connection: Pharaoh, king of Egypt (Ex. 6 11, etc.), shows a tendency of the word Pharaoh to become a proper name, as which it seems to stand in the NT, etc. Josephus (*Ant.* viii. 6 2, § 155) correctly states that Pharaoh meant 'king' in Egyptian.

We are now certain that the word is derived from the expression for 'king' used by the later Egyptians.

The Coptic form is (ϵ)ⲣⲣⲟ, Lower Egyptian ⲟⲩⲣⲟ, with the article ⲡ(ϵ)ⲣⲣⲟ, ⲫⲟⲩⲣⲟ. So, already, Jablonski (*Opusc.* 1 376). The group of signs corresponding to this in the latest writings of the pagan Egyptians can be traced back through its representatives in demotic and hieratic to the early form *Per-'o*[1] (originally, '*o*,' final Aleph having fallen away) 'the great house, the palace.' This hieroglyphic group was first compared with the Hebrew word by de Rougé (cp Ebers, *Äg. u. Bücher Mosis*, 264). It is remarkable that the Greek tradition in Horapollo still knew that *οἶκος μέγας* = 'king.'

The expression occurs already in the texts of the pyramid-period from dynasty four onwards (later, *e.g.*, in the famous inscription of 'Una,' *l.* 8) in titles like 'only friend of the Great House.' 'Great House' is a paraphrase for 'king' due to reverence, exactly like the modern expressions 'the holy see' for 'pope,' 'the Porte' or 'the Sublime Porte,' etc. In the early period referred to, it was not yet possible to use 'great house' as perfectly synonymous with 'king.' Expressions like 'to follow the Great-House on his chariot' (Pap. Orbiney, 17 5; dyn. 19), in which the etymology begins to be forgotten, do not occur in the time of the Old or the Middle Empire. It is only in the vernacular style of the New Empire that the title can be used in the loose way quoted above;[2] it becomes the usual word for 'king,' superseding the earlier expressions like *ḥnf* ('His Majesty') and *stn*, only at a much later date. Consequently the Hebrews can have received it only after 1000 B.C.

In confirmation of this, we see from the Amarna letters that the title was unknown in Asia about 1400 B.C. The absence of the word in the Assyrian texts (the alleged *Pir'u*, king of Egypt, belongs rather, as Winckler has shown, to the Arabian country *Muṣri*) is, however, no cogent argument. No Semitic language except Hebrew adopted the word; the Koranic form Fir'aun shows the influence of Syrian Christianity.

The rendering in Hebrew orthography is remarkably good and archaic. The strange vocalisation is supported by 𝔊 and, therefore, must not be abandoned too lightly;[3] perhaps it represents an archaic pronunciation.

Other Egyptian etymologies which have been suggested cannot be upheld. *p-Re'* 'the sun' (Rosellini, Wilkinson, etc.), for example, never was the common designation of the king, and would, in Hebrew letters, give only פרע. Lepage Renouf, *PSBA* 15 421, proposed a Hebrew derivation from the root פרע, ('to be noble') with little probability.

We proceed to an enumeration of the various Pharaohs mentioned in the OT.

2. OT Pharaohs. 1. Abraham's Pharaoh (Gen. 12 15 *f.*) has, on the basis of a computation of the lives of the patriarchs, been placed in dynasty 12. If the latest chronology is to be followed, we ought rather to go back to dynasty 11. As, however, this Pharaoh seems to be only a misunderstood prince of southern Palestine (cp the parallel Gen. 26 and see MIZRAIM, § 2 *b*), all discussions are idle.

2. Joseph's Pharaoh lived, according to Ex. 12 40, some 430 years before the Exodus. The usual theory with regard to the Exodus (see below, 3) would bring us down to about 1700 B.C. That would correspond with the period of the Hyksos dynasty, perhaps more accurately with the reign of its first kings. The tradition of Apophis (EGYPT, § 52)—whether it rest on a correct calculation or on Josephus' confusion of Hyksos and Israelites—is remarkable, but would bring us to the end of the Hyksos-time, which does not seem to furnish a smooth calculation. All this depends, however, on the Exodus-chronology.

3. The Pharaoh of the oppression and his successor (cp Ex. 2 23 4 19) would according to Ex. 1 11 be undoubtedly Rameses II. and his son, Me(r)neptaḥ. This theory has now, however, been finally upset by the discovery of the Israel-stele which proves that in Merneptaḥ's fifth year Israel was in Asia. See EGYPT, §§ 58-60, on this conflict. It may be mentioned that the mummy of the alleged Pharaoh of the Exodus (Merneptaḥ) has recently been found in Thebes and is now in the museum of Cairo. A theory of Bunsen, placing the Exodus in the troubled time of Amenophis IV. and his immediate successors (1400 B.C. and later; EGYPT, § 56), might be supported by Josephus's extract from Manĕtho; but its four or five kings are in such inextricable confusion that nothing can be proved by the passage. For the rest, there is much that militates against such theories. [Cp MOSES.]

4. The Pharaoh contemporary with Solomon, father-in-law of the Israelite king (1 K. 9 16 24 11 1, etc.), and also of his adversary Hadad (11 18),—if one and the same person are meant,—would be one of the last kings of the twenty-first Tanitic dynasty, or Shoshenḳ I., the founder of dynasty twenty-two (EGYPT, § 63). It is, however, again very doubtful whether originally the reference was really to some Egyptian ruler(s) and not rather to Muṣrites (see HADAD, MIZRAIM, § 2 *b*).

5. In 1 K. 14 25, it is very remarkable that Shishak—Shoshenḳ I.—is called not Pharaoh, but simply king of Egypt. Griffith (in his most valuable article 'Pharaoh' in Hastings' *BD*) draws the conclusion that the verse containing the expression belongs to a source earlier than the Pentateuchal sources, which employ regularly the expression Pharaoh. [But cp *Crit. Bib.*, where it is held that there is a confusion between Cushi, king of Miṣrim, and Shishak, king of Miṣraim.]

6. On Pharaoh-Necho see NECHO, and (7) on Pharaoh Hophra see HOPHRA. The latter is meant by the Pharaoh of Ezek. 29 32. [Cp, however, PROPHECY, and *Crit. Bib.*] W. M. M.

PHARATHON (ⲫⲁⲣⲁⲑⲱⲛ [Aℵ^c.a V]), 1 Macc. 9 50 RV, AV **Pharathoni**. See PIRATHON.

PHARISEES. See SCRIBES AND PHARISEES.

PHAROSH (פַּרְעֹשׁ), Ezra 8 3 AV, RV PAROSH (*q.v.*).

PHARPAR (פַּרְפַּר; ⲁⲫⲁⲣⲫⲁ [B], ⲫⲁⲣⲫⲁ [B^a mg. b], ⲫⲁⲣⲫⲁⲣⲁ [A], ⲫⲁⲣⲫⲁⲣ [L]; *Pharphar* [Vg.]), one of the 'streams (נהרות) of Damascus,' 2 K. 5 12. The identification of the Pharpar can hardly be doubtful, though it has not been so unanimously agreed upon as that of its fellow-stream, the ABANA or AMANA [*q.v.*]. Those who insist on interpreting 'Damascus' in the question of Naaman to mean the city of that name have to identify the Pharpar with the Nahr Taura,[1] which is one of the principal streams into which the Nahr Baradā

[1] . The later Egyptians omitted the initial p, a popular etymology taking it for the article, which was felt to be ungrammatical as long as the expression was used for '*the* king'—*i.e.* of Egypt.

[2] In this period it is frequently written playfully  'the great (double) house,' which does not alter the pronunciation. In Greek times, even a feminine t-[p]er-'o, Copt. ⲧⲉⲣⲣⲟ 'the queen' can be formed.

[3] The only analogy would be ⲣⲉⲙⲁⲱ 'rich man.' This stands, however, for *reme-'o*, and the short vowel has been coloured to *a* by the '*Ain*. *Per*, 'house,' on the other hand, has in all cases been shortened down to *P* (cp PIBESETH, PITHOM) and does not seem ever to have had two syllables. The question remains open. The king Pheron of Herodotus may be one of that historian's many misunderstandings, and may simply have meant 'king.'

[1] So Rev. W. Wright of Damascus, *Leisure Hour*, 1874, p. 284 (cp *Expos.*, Oct. 1896, p. 295 *f.*), and long ago Benjamin of Tudela. This identification is supported by the Arabic version.

is divided, and contributes largely to the fertility of the 'meadow-land' (*el-merj*) of Damascus. It may of course be permitted to assume that there was a time when the Nahr Taura flowed through Damascus, not merely, as it does now, a little to the N., for the site of the city of Benhadad cannot have been exactly coincident with that of the Damascus of to-day.[1] But how unnecessary it is to put this limitation on the meaning of 'Damascus,' will be seen by comparing 2 S. 8 5 *f.* 1 Ch. 18 5 *f.* Is. 7 8 Am. 1 3 (?), where Damascus is used as the name of the leading Aramæan state. In the question of Naaman, it is not Damascus the city but Damascus the country that forms the natural antithesis to Israel. As soon as these facts are grasped, it becomes natural to identify the Pharpar with the *Nahr el-A'waj* ('the crooked'),[2] which is the only independent stream of importance in the required district besides the Baradā. This river has two principal sources.

One source is near the village of 'Arnī, on the E. side of Hermon, the other, in a wild glen, 2 m. above the village of Beit Jenn, known to travellers on their way from Bāniās to Damascus. The two streams, called the Nahr 'Arnī and the Nahr Jennānī, unite at Sa'sa' and form the *A'waj* which flows from this point onwards in a general direction NW. by N.; it is no 'brawling brook' (W. Wright) but a copious stream, from which, according to Porter, ancient canals carry the water to places in the neighbourhood of Damascus. It dies out at last in a marsh a little to the S. of that in which the Baradā disappears.

The name Pharpar has been thought to survive in that of the Nahr (Wādy) Barbar, which also rises on the E. side of Hermon, but farther to the N., and flows S. of Damascus.[3] Burton indeed declares, 'There is absolutely no *Wady Barbar.* . . . But there is a *Jebel Barbar* which may be seen from Damascus' (*Unexplored Syria*, 1 115, n. 8). This, however, does not really touch the identification of names. T. K. C.

PHARZITES (הַפַּרְצִי), Nu. 26 20 AV, RV PEREZITES. See PEREZ.

PHASEAH (פָּסֵחַ), Neh. 7 51 AV, RV PASEAH (*q.v.*).

PHASELIS (φαcηλιc [ℵV], Bαcιλειδαν [A],[4] 1 Macc. 15 23), a Dorian colony on the confines of Lycia and Pamphylia, standing on a small peninsula, the first land sighted on the voyage from Cilicia to Rhodes (Livy, 37 23), 'over the sea of Cilicia and Pamphylia' (Acts 27 5). It was not originally Lycian (cp Strabo, 667); but later it was incorporated, and finally became a member of the Lycian League (cp coins, and *CIG* 4324, 4332: so Kalinka in Kiepert's *Festschrift*, 1898, p. 167 *f.*), and marked the eastern limit of Lycian extension. The town possessed no fewer than three harbours, and was a great place of maritime trade (Strabo, 666; Thuc. 2 69, τὸν πλοῦν τῶν ὁλκάδων τῶν ἀπὸ Φασήλιδος, and *id.* 8 88; Pol. 30 9). A testimony to its far-reaching commerce is the fact that, before the middle of the sixth century B.C., it shared in the Hellenion, or sanctuary and 'emporium' of the Greeks at Naucratis in Egypt (Herod. 2 178).[5] Hence Phaselis had a Jewish colony in 139 B.C. (1 Macc. 15 23).

The importance of Phaselis lay not solely in commerce. Above it rose the Solyma mountains (*Takhtali Dagh*), which left only a narrow passage by the sea—the pass of Mt. Klimax—which was often overflowed by the waves when the wind was E.: here Alexander and his army barely escaped with their lives in 334 B.C. (Strabo, 666 *f.*; cp Spratt and Forbes, *Travels*, 1 198 *f.*). In Roman times the commerce of Phaselis had degenerated into piracy, with the result that the town lost its independence in 77-75 B.C.[1]

The place is now called *Tekir-ova*: it shows considerable remains of its harbours, and of a theatre, stadium, and temple. The temple of Athens at Phaselis claimed to possess the spear of Achilles (*Paus.* iii. 3 8).

See further description in Beaufort, *Karamania*, 56 *f.*

W. J. W.

PHASIRON, THE SONS OF, an unknown Arabian tribe whom Jonathan the Maccabee smote (1 Macc. 9 66 φαcιρων [A], φαcειρων [ℵ], φαριcων [V]), if 'sons of Pharison' (so V) is not due to a misunderstanding of בְּנֵי פָרִיצִים, 'members of a robber-band'; cp Dan. 11 14. T. K. C.

PHASSARON, RV **Phassurus** (φαccoyρoy [A]), 1 Esd. 5 25 = Ezra 2 38, PASHHUR (RV), 3.

PHEBE (φοιβη [Ti. WH]), Rom. 16 1 AV, RV PHŒBE (*q.v.*).

PHENICE. 1. (φοινικη [Ti. WH]), Acts 11 19, etc., AV, RV PHŒNICIA (*q.v.*).

2. (Φοίνιξ, or Φοινιξ [Ti. WH]), Acts 27 12, AV, RV PHŒNIX.

The corn-ship from Alexandria in which Paul was being conveyed to Italy (Acts 27 6) was so long weather-bound at Fair Havens on the S. coast of Crete that the voyage could not be accomplished that year (*v.* 9), and it became necessary to select a harbour in which to winter (*v.* 12). The centurion, who in a ship of the imperial corn-fleet ranked as senior officer (Ramsay, *St. Paul the Traveller*, 323 *f.*), took the advice of the captain and the sailing-master (EV wrongly 'the master and the owner' for κυβερνήτης and ναύκληρος of *v.* 11), and resolved to run westwards if possible to port Phœnix (in which attempt, however, they failed).

To this course Paul himself was opposed, on what grounds we are not told;[2] nor again is his precise position in the ship made clear.

The expression in *v.* 12 (οἱ πλείονες, 'the more part advised') must not be taken to imply a general consultation of the entire ship's company (Weiss, *Apostelg.*, *l.c.*). Nor can we accept the vague statement that Paul was 'a person of rank whose convenience was to some extent consulted, and whose experience as a traveller was known to be great' (so Ramsay, *op. cit.*), as helping to explain how a prisoner should have taken part in a council of experts. The liberty accorded to Paul at Sidon (*v.* 3) obviously stands in a quite different category. Paul had absolutely no experience of the central or western Mediterranean; and captains and sailing-masters were scarcely likely to ask the opinion of amateur sailors. We must be on our guard against the falsity of the perspective of the writer of Acts, who of course looks at all from the point of view of his hero, and depicts Paul everywhere as the central figure. It may be doubted whether anything more ought to be extracted from the narrative of events at Fair Havens than the fact of a general objection urged by Paul with characteristic vigour and directness against the proposal when it became known to the ship's company. Is it possible that Paul's desire to remain at Fair Havens had its origin in a prospect of missionary work? The important town of Gortyna was only a few miles from this point of the coast (Strabo 478. See GORTYNA).

It is clear from a general consideration of the circumstances (see FAIR HAVENS) that Phœnix must be sought to the westward of the great gulf of Messara, which begins at Cape Matala, about 6 m. W. of Fair Havens. It was during the run across this gulf that the squall broke which drove the ship off her course (*v.* 15), and ultimately caused her to drift upon the coast of Malta (*v.* 27).

Phœnix is mentioned by Strabo as a coast settlement on what he calls the 'isthmus' of Crete—*i.e.*, the narrow part of the island between Mount Ida and the mountains of the broad western end (475, κατοικίαν

1 Cp Sayce, *Patriarchal Palestine*, p. 24.

2 So Nöldeke, Robinson, and especially Porter (*Five years in Damascus*, 1 290; 'The Rivers of Damascus,' *Journ. of Sacred Lit.*, July and Oct., 1853). Burton doubtfully identifies with the stream of *'Ain Fījeh* (*Unexplored Syria*, 1 115). But this stream joins the *Baradā*.

3 It has been surmised that anciently the stream joined that now called the *Nahr A'waj*, and was popularly confounded with it, and Dr. Thomson (*LB* 3 430) states that one of the existing smaller tributaries of the *Sābirānī* (the name of the *Nahr A'waj* in the first part of its course) comes down the *Wādy Barbar*.

4 Φάσηλις, authors; Φασηλίς, inscrr.; Φασηλ(ε)ιτῶν, coins.

5 It struck coins with a variety of types in the sixth and early part of the fifth century B.C., ceasing on the rise of the Athenian empire (about 466 B.C.). Cp Hill, *Brit. Mus. Cat. of Greek Coins*, [*Lycia*].

1 Cic. *Verr.* iv. 10 21, *Phaselis illa, quam cepit P. Servilius, non fuerat urbs antea Cilicum et prædonum: Lycii illam, Græci homines, incolebant . . . asciverunt sibi illud oppidum piratæ primo commercio, deinde etiam societate.*

2 Acts 27 10 merely gives his summing up of the consequences foreboded by him if the present anchorage was abandoned: 'voyage' (τὸν πλοῦν) refers of course only to the proposed run to port Phœnix, not to the entire voyage.

. . . πρὸς τῇ νοτίῳ Φοίνικα τὸν Λαμπέων).[1] Phœnix is commonly identified with the modern village and harbour of *Loutró* some miles to the SW., a position in conformity both with the notice in Strabo and with that of Ptolemy (iii. 17 3).

Ptolemy locates in this part of Crete a harbour Phœnicūs (Φοινικοῦς λιμήν) and a town Phœnix (Φοίνιξ πόλις). In the *Synecdemus* of Hierocles (14, ed. Parth) Phœnix appears, under the form Phœnice, as a bishopric, along with a place Aradena —both in the neighbourhood of the island of Clauda (Φοινίκη ἤτοι Ἀράδενα, νῆσος Κλαῦδος). Aradena is further mentioned by Steph. Byz., under the name Araden, as a Cretan town which was also called from its position Anopolis, 'Upper City' (Ἀραδὴν πόλις Κρήτης· ἡ δὲ Ἀνώπολις λέγεται διὰ τὸ εἶναι ἄνω). Both the name Araden or Aradena and the name Anopolis survive unchanged—*Anopolis* or *Anapolis* being that of a group of villages on the plateau N. of Loutró, W. of which, about a mile inland from the harbour, is the village of *Aradhena*. Both at Aradhena and at Loutró are found ancient remains (those at the latter place Roman); but the chief ancient Greek site is on a hill on the southern edge of the plateau. Here was the ancient Araden to which was transferred the name of the harbour Phœnix (Loutró).[2]

Loutró is described as 'the only secure harbour in all winds on the S. coast of Crete' (cp Smith, *op. cit.*, 261), and Captain Spratt writes that it is 'the only bay to the westward of Fair Havens in which a vessel of any size could find any shelter during the winter months' (quoted by Smith, *op. cit.*, 92, where similar testimony by others is collected). That imperial ships were sometimes to be found there is proved by an inscription from Loutró (dating from the reign of Trajan) given in full by Smith, *op. cit.*, 269 *f.*

It is all but impossible, however, to make the identification which thus appears so conclusive agree with the description of the harbour in Acts 27 12.

There it is described as λιμένα τῆς Κρήτης βλέποντα κατὰ λίβα καὶ κατὰ χῶρον (AV 'and lieth toward the south west and north-west'; RV 'looking north-east and south-east,' RVmg. Gk. '*down the south-west wind and down the north-west wind*').

1. If we adopt the rendering of AV, the identification of Phœnix with port Loutró must be surrendered; that harbour faces E.—*i.e.*, is open to winds ranging from NE. to SE. We must then identify with the harbour W. of the promontory of Loutró (ending in Cape Muros), called Phineka Bay in the Admiralty Chart.[3] Soundings ranging from three and a half fathoms to one would make it as good an anchorage as Loutró port. If the objection to wintering at Fair Havens was that it lies open to the E. (Acts 27 12), the same objection would apply to port Loutró.[4] The evidence of navigators acquainted with the coast (cp Smith, *l.c.*) is against the actual existence of a sheltered anchorage on the W. of the peninsula, and the charts do not decide the point.

2. If we adopt the rendering of RV ('looking NE. and SE.') we must interpret κατὰ λίβα and κατὰ χῶρον as 'looking down the direction of' the winds named.

This translation is supported by reference to Herod. 4 110, 'they were borne along by wind and wave' (ἐφέροντο κατὰ κῦμα καὶ ἄνεμον), to which objection is made on the ground that there the usage is of a ship in motion (the objections urged by Page, *Acts of the Apostles*, note *in loc.*, that 'a harbour does not *move* and must look κατὰ λίβα whether λίψ is blowing or not,' and that 'if λίψ and χῶρος represent, not points of the compass, but winds in motion, then κατὰ λίβα καὶ κατὰ χῶρον involves the assertion that two winds are blowing at the same time,' are surely in the highest degree sophistical). The expression of Arrian (*Per. Eux.* 3, ἄφνω νεφέλη ἐπαναστᾶσα ἐξεράγη κατ' εὖρον) is not clear (see Smith, *op. cit.*, 89, note, for discussion). Josephus, speaking of the places between Joppa and Dora, says that they were all δύσορμα διὰ τὰς κατὰ λίβα προσβολάς (*Ant.* xv. 9 6). Thucydides describes a steady N. wind as κατὰ βορέαν ἑστηκώς (6 104).

In spite of the examples quoted, however, the phrase in Acts is obscure: it seems due to a confusion of ideas. Just as in English 'to look down the wind' means to look in the direction in which it is blowing, so in Greek; nevertheless, βλέπω used of a harbour would naturally imply 'facing,' 'turned towards.'

3. The explanation of Conybeare and Howson (*Life and Ep. of St. Paul*, 2 400) is that 'sailors speak of everything from their own point of view, and that such a harbour [as that of Loutró] does "look"—from the water towards the land which encloses it —in the direction of 'south-west and north-west.' (Similarly what we read in Farrar [*St. Paul*, 711] is surely not to be justified by appeals to the natural phraseology of *v.* 27; cp Page, *l.c.*)[1]

It must be remembered that neither Paul nor the writer of Acts ever saw the harbour.

Literature.—Chiefly J. Smith's *Voyage and Shipwreck of St. Paul* (4), 1880. Bursian, *Geogr. v. Griech.*, with authorities therein mentioned. W. J. W.

[1] Lampa (Lappa, coins and inscrr.) was at a site in the interior now called *Polis*.

[2] There is some evidence that the name Phœnix still survives in the locality (cp J. Smith, *Voyage and Shipwreck of St. Paul* (4), 258); it probably bears reference to the existence in early days of a Phœnician trading-post at this point.

[3] (Pub. 1861, from survey by Mr. Millard in 1859; large corrections, July 1864.)

[4] This objection would be met, however, by what we read in Smith, 261, 269.

PHERESITES (φερεζαιοι [BAL]), 1 Esd. 8 69 AV, (RV **Pherezites**) = Ezra 9 1, PERIZZITE.

PHICHOL (פִּיכֹל; φικολ [AD], φιχολ [DEL]), general of Abimelech, king of Gerar (Gen. 21 22 32 [RV **Phicol**]; 26 26). The name, like MICHAL (*q.v.*), is probably corrupted from אֲבִיחַיִל, Abihail, but ultimately, like Abimelech, from Jerahmeel.

The absurd rendering 'mouth of all' (cp Gen. 41 40) is as old as the Midrash (*Ber. rabba*, on Gen. 21 22). Whiston, the translator of Josephus, connects Phicol with Φικολα, the name of the native village of Joseph, the famous tax-collector under Ptolemy Euergetes (Jos. *Ant.* xii. 4 2); so also Fürst. An Arabic etymology (*fakala*, 8, 'to give attention to') has also been ventured. Delitzsch (*Par.* 270) compares the Hittite name Pīsiri; but we require a Semitic name like Abimelech.

T. K. C.

PHILADELPHIA (φιλαδελφια, Rev. 1 11 3 7 [WH], φιλαδελφεια, most minuscules, inscrr. and classical authors), a Pergamene foundation, as is evident from its situation on the gentle slopes at the base of the steeper hills (Mt. Tmolus) commanding the site, a position dictated, not by military, but by commercial considerations (Ramsay, *Hist. Geogr. of AM* 86, *Cities and Bish. of Phrygia*, 2 353 n.; cp Holm, *Gk. Hist.* ET 4 477).

1. History. It was built by Attalus II. Philadelphus (159-138 B.C.), who also founded Attaleia in Pamphylia (see ATTALIA). The town lay on the southern side of the valley of the Cogamus (or Cogamis: Ramsay, *Cities and Bish. of Phryg.* 1 196 n.), a tributary of the Hermus, near the road uniting the Hermus and Mæander valleys. It stood, therefore, on the confines of Lydia and Phrygia, on the south-western edge of the volcanic region called Katakekaumene, or 'Burnt Region': it was, however, properly a Mysian town (Strabo, 628) separated from the bulk of the Mysians by the aforesaid 'Burnt Region,' which itself also was variously claimed as Lydian, Mysian, or Phrygian, from the interlacing of the bounds of the three peoples in this district. The volcanic nature of its soil was the cause alternately of the prosperity and the misfortunes of Philadelphia.

Philadelphia's staple export was wine: its coins show the head of Dionysos, the type being doubly appropriate, as Dionysos Kathegemon was a great deity at Pergamos (cp the coins of Dionysopolis, also founded by Attalus II., Ramsay, *op. cit.* 1 126). Some part of its prosperity was doubtless derived from its hot springs (cp Joan. Lyd. 75, 349, where the hot springs of Hierapolis and LAODICEA [*q.v.*] are also mentioned), which are still much used; probably connected in some degree with these was the celebrity of the city for its festivals and temples, the number of which gained it the title of 'miniature Athens.' Frequent destructive earthquakes, however, threw heavy burdens on its finances (Strabo, 579, 628). The status of the town is evidenced by the fact that the *Koinon* of Asia, which, according to some unknown rule of rotation, held its festival in the chief cities of the Province (*e.g.*, Ephesus, Smyrna, Sardis, Pergamos, Laodiceia), met also at Philadelphia (*CIG* 1068, 3428). For some time the town even changed its name to Neocæsareia, and struck coins under that name during the reigns of Tiberius, Caligula, and Claudius (Ramsay, *op. cit.* 1 201). The change was made in recognition of the aid rendered by Tiberius on the occasion of the great earthquake of 17 A.D. (Tac. *Ann.* 2 47).

In later Byzantine times, Philadelphia was a large and warlike city (Georg. Acropol. 111, μεγίστη καὶ πολυάνθρωπος), and was a bulwark of civilisation in this quarter, until, in 1379 or 1390, the united forces of the Byzantine Emperor Manuel II. and the Osmanli Sultan Bayezid I. compelled its surrender to the Turks.

[1] Ramsay (*St. Paul the Traveller*, 326) suggests that 'the sailors described the entrance as one in which inward-bound ships looked towards NW. and SW., and that in transmission from mouth to mouth the wrong impression was given that the harbour looked NW. and SW.'

Possibly this energy, bravery, and self-reliance is traceable to the infusion of Macedonian blood; for Macedonian colonists (the Mysomakedones of Pliny, *HN* 5 120, and Ptol. v. 2 15) were planted among the Mysians by the Seleucid kings, S. of Philadelphia, on the road to Ephesus, in the modern *Uzum-Ova* (Ramsay, *op. cit.* 1 196).

The church of Philadelphia, though not unreservedly praised, like that of Smyrna, stands second in point of merit in the list of those addressed in the Apocalypse. Both Smyrna and Philadelphia were troubled by those 'who say they are Jews, and are not' (Rev. 2 9 3 9). Ignatius, writing a few years later, also found it necessary to warn the Philadelphians against the preachers of Judaism (*ad Phil.* 6) as well as against disunion (chap 7). In Philadelphia the Jewish element predominates, as against the Hellenism rampant in Pergamos (Rev. 2 13). The town is still to a large extent Christian (cp Rev. 3 12). Its modern name is *Ala-Sheher.*[1]

2. NT references.

PHILARCHES (ο φυλαρχης [VA]), 2 Macc. 8 32 AV, regarding the word as a proper name; but RV 'the phylarch.'

PHILEMON, EPISTLE TO (προς φιλημονα; so Ti. WH with ℵA and other MSS, but fuller superscriptions also occur mainly to indicate that the Epistle was written by the apostle Paul and at Rome, see Tisch. 8*a*) is the name of a short composition which has come down to us from antiquity as the thirteenth in the NT collection of 'Epistles of Paul.' Tertullian (*adv. Marc.* 5 21) is the first who expressly mentions the writing as included by Marcion among the ten epistles of Paul accepted by him, adding the remark that this was the only epistle whose brevity availed to protect it against the falsifying hands of the heretic ('soli huic epistolæ brevitas sua profuit ut falsarias manus Marcionis evaderet'). It retained its position undisturbed, although now and then (as, for example, by Jerome) its right to do so had to be vindicated against some ('plerique ex veteribus') who thought the honour too great for an epistle having no doctrinal importance. Others did not fail to praise this commendatory letter of the apostle on behalf of a runaway slave as a precious gem showing forth Paul's tenderness and love for all his spiritual children, even those who were the least of them if judged by the standard of the world.

1. History.

F. C. Baur was the first (*Pastoralbr.* 1835; *Paulus*, 1845) who found himself led by his one-sided preoccupation with the four 'principal epistles' (see PAUL; PHILIPPIANS, EPISTLE TO THE, § 1) to raise difficulties with regard to the Epistle to Philemon. Its close relationship to Ephesians, Philippians, Colossians, especially the last-named, which he found himself unable to attribute to Paul, was too much for him, although in this case his 'tendency-criticism' failed him. The considerations he urged in addition were certain ἅπαξ λεγόμενα, the romantic colour of the narrative, the small probability of the occurrence, some plays upon words and the perhaps symbolical character of Onesimus,—points which, all of them, can be seen set forth in detail in *Paulus*[(2)], 2 88-94.

Thorough-going disciples of the Tübingen school, such as Rovers in his *Nieuw Testamentische letterkunde* (1888), followed in the footsteps of their leader although with occasional modifications in detail. Rovers saw in the epistle a concrete illustration of what is laid down in Colossians as to the relation between masters and slaves. Pfleiderer (*Paulinismus*, 1890, pp. 42 *f.*), although impressed by the simplicity and naturalness of the motive of Philemon, could not get over its agreement with Colossians, and, taking refuge in the consideration that Onesimus seemed to betray an allegorical character, ended by regarding the epistle as a symbolical illustration of the relation between Christian slaves and their masters as set forth in Col. 3 22-4 1. Similarly Weizsäcker (*Apost. Zeitalter*[(2)], 1892, 545), who found himself compelled in view of Colossians to regard Philemon 'as an illustrative example of a new doctrine bearing on the Christian life, the allegorical character of which is already shown by the very name of Onesimus.'

Those who did not adopt the Tübingen position in its entirety, but endeavoured to rescue at least some of the 'minor' Pauline epistles—such critics as Hilgenfeld and S. Davidson—either argued for the genuineness or sought a way out of the difficulty of maintaining its genuineness as a whole by a hypothesis of interpolations. So Holtzmann *ZWT*, 1873, pp. 428-41 (with regard to *vv.* 4-6, controverted by Steck *JPT*, 1891, pp. 570-584), and W. Brückner, *Chron. Reihenfolge*, 1890, pp. 200-3 (as regards *vv.* 5 *f.*, controverted by Haupt, *Komm.* 1897, p. 10).

The conservative school carried on its opposition to Baur and his followers with greater or less thoroughness in various introductions and commentaries, the most recent being that of M. R. Vincent who (*Comm.* 160 [1897]), after briefly summing up the objections, proceeds: 'It is needless to waste time over these. They are mostly fancies. The external testimony and the general consensus of critics of nearly all schools are corroborated by the thoroughly Pauline style and diction and by the exhibition of those personal traits with which the greater epistles have made us familiar.' So also Zahn (*Einl.*[(2)] 1 322 [1900]), with the usual pathos, and adding a couple of notes: 'That this epistle also, with its fullness of material which could not have been invented (note 7), should without any support for tradition and without any adequate reason whatever having been suggested for its invention, have been declared to be spurious, does not deserve more than a passing mention (note 8).' J. P. Esser also expresses himself in a similar manner in an academic thesis that seeks to treat the subject with the utmost possible exhaustiveness, *De Brief aan Philemon*, 1875.

The criticism which refused to accept as an axiom the doctrine of the four 'principal epistles' of Paul (see PAUL, §§ 30, 32, 34) did not make itself much heard. Bruno Bauer was quite silent, and its other representatives contented themselves, as a rule, with the declaration—sometimes more, sometimes less, fully elaborated—that we do not possess any epistles of Paul at all. R. Steck wrote the treatise already referred to (*JPT*, 1891) in which he concentrated attention upon the double character of the epistle, as a private letter and as a writing apparently intended for the Pauline church; repeated some of the objections of Baur and others; maintained that the ultimate design of the author was to 'present vividly' the apostle's attitude to the slavery question, as seen in 1 Cor. 7 21 *f.*; and took special pains to emphasise the view that the unknown writer had made use, in his composition, of a correspondence between Pliny and Sabinianus preserved in the *Epistles* of Pliny (9 21 24) to which Grotius had long ago called attention (see below, § 4). Van Manen (*Handl.* 59 [1900]) devoted two sections to a statement of his views as to Philemon.

2. Form and contents.

On the assumption of the correctness of the received tradition regarding the canonical epistles of Paul, and of the identity of the Onesimus of Philem. 10 with the person named in Col. 4 9, the statement usually met with is that Onesimus, a runaway slave, christianised by Paul and sent back by the apostle to his master with our present 'letter to Philemon,' originally belonged to Colossæ, where also lived his master Philemon, a man of wealth inasmuch as he owned a slave (!), who, either from Ephesus or perhaps at Ephesus itself (for we cannot be certain that the apostle ever visited Colossæ), had been converted by Paul.

Any one, however, who will allow the epistle to tell its own story must receive from it a somewhat different

[1] *Ala-Sheher*—the 'spotted (or parti-coloured) city' (see Murray's *Handbook to A.M.* 83). Older books call it, by a mere error, *Allah-Sheher*—the 'City of God.'

impression. There is in it no information as to who Philemon was—he is mentioned in the NT nowhere else and is known only by later tradition—nor as to where he was living when Paul, according to Philem. 10-20, sent back to him his former slave Onesimus, after he had christianised him and so made him a brother of the master who could be spoken of as a beloved fellow-worker of Paul and Timothy, owing his conversion to Christianity to the former (*vv.* 1 19). The reader is not further advanced in his knowledge when Philemon is named by the tradition of a later age as a presbyter, a bishop, a deacon, or even an apostle, and Onesimus is reputed to have been bishop of Ephesus. For the unpreoccupied reader this little document of ancient Christianity represents itself in various lights, now as a letter written by Paul and Timothy to Philemon, Apphia, Archippus, and a domestic church (*vv.* 1 2*a* 3 22*b* 25), now as written by Paul alone to Philemon (*vv.* 2*b* 4-22*a* 23 24). Sister Apphia and Archippus, the fellowsoldier of Paul and Timothy according to *v.* 2, are nowhere else met with in the NT, unless Archippus be, as many suppose, identical with the person named in Col. 4 17—which may or may not be the case. That Apphia and Archippus should be respectively the wife and the son of Philemon, as many are ready to assume, is a gratuitous supposition which has no solid ground, and has against it the strangeness of the collocation 'Apphia the sister, Archippus our fellowsoldier and the church in the house that is thine, Philemon (*σου*).'

Paul a prisoner of Christ Jesus and brother Timothy, so we learn from the epistle, address themselves with words of blessing to the persons named (*vv.* 1 2*a* 3), or otherwise Paul alone does so to Philemon (2*b*). Next Paul goes on to say to Philemon that he thanks God always for his well-known love and his exemplary faith (*vv.* 4-7), upon which he, as Paul *πρεσβύτης* (the aged) and a prisoner of Christ Jesus, beseeches him to receive his son Onesimus whom he sends to him, though he would willingly have kept him beside himself, as a beloved brother (*vv.* 8-16). Whatsoever expenses may have been incurred the apostle promises to defray (*vv.* 17-20). He might enjoin; but he trusts to the goodwill of Philemon, of whose hospitality he hopes ere long to be able to partake (*vv.* 21-22*a*) through the mediating prayers of all of them (*διὰ τῶν προσευχῶν ὑμῶν*, 22*b*); next he conveys to *him* the greetings of Epaphras, his fellow-prisoner in Christ Jesus, and of Mark, Aristarchus, Demas, Luke, his fellow-workers (*vv.* 23 24), and the epistle closes with a word of blessing upon all (*v.* 25).

A surprising mixture of singular and plural both in the persons speaking and in the persons addressed.

3. Composition. This double form points at once to some peculiarity in the composition of the epistle. It is not a style that is natural to any one who is writing freely and untrammelled, whether to one person or to many. Here, as throughout the discussion, the constantly recurring questions as to the reason for the selection of the forms, words, expressions adopted find their answer in the observation that the epistle was written under the influence of a perusal of 'Pauline' epistles, especially of those to the Ephesians and the Colossians. Take the examples in which one or more persons near Paul are named as the writers :—

Col. 1 1 as Philem. 1 'Brother Timothy.' Again, why does Paul call himself in Philem. 9 *δέσμιος Χριστοῦ Ἰησοῦ*, and not as elsewhere *δοῦλος* or *ἀπόστολος*? The answer is found in Eph. 3 1 4 1. What is meant by the inclusion of other names besides that of Philemon among the addressees? For answer see 1 Cor. 1 2 2 Cor. 1 1. Archippus comes from Col. 4 17, the epithets *συνεργός* and *συνστρατιώτης* from Phil. 2 25. The 'church which is in the house' from Col. 4 15. The prayer in *v.* 3 from Rom. 1 7 1 Cor. 1 3 2 Cor. 1 2 Gal. 1 3 Eph. 1 2 or Phil. 1 2. The thanksgiving and commemoration of *v.* 4 from Rom. 1 8 9 1 Cor. 1 4 Eph. 1 16 5 20 Phil. 1 3 Col. 1 3. The continual hearing of Philemon's love and faith towards all the saints (*v.* 5) from Eph. 1 15 Col. 1 4. The expression *ὃν ἐγέννησα* (*v.* 10) from 1 Cor. 4 15 cp Gal. 4 19. The sending of Onesimus in *vv.* 10 *f.* from Col. 4 8 or Eph. 6 21 *f.* although in these passages it is Tychicus, a free man; *πρὸς ὥραν* of *v.* 15 from 2 Cor. 7 8 Gal. 2 5; the 'brother beloved' and 'servant in the Lord' of *v.* 16 from Col. 4 7 9. The 'reckoning' of *v.* 18 from Phil. 4 15; 'I Paul' *vv.* 19 from Gal. 5 2 Eph. 3 1; 'with my hand' from 1 Cor. 16 21 Gal. 6 11 Col. 4 18; the names in *vv.* 23 *f.* from Col. 1 7 4 10 12 14 although now Epaphras takes the place of Aristarchus, 'the fellow-prisoner,' as Onesimus a slave takes the place of the free man, the 'brother beloved' in Col. 4 9. The final benediction comes from Phil. 4 23.

Such phenomena are adverse to the supposition that Paul can have written the epistle. The thing is possible indeed, but certainly not probable.

4. Authorship. Rather may we say that no one could repeat himself so or allow himself to be restricted to such a degree by the limitations of his own previous writings. Nor can we think of Paul, however often we are told that he did so, as having put a private letter, after the manner here observed, into the form of a church epistle. We need not pause to conjecture what was the relation between him and Philemon, or where the latter had his home—whether in Colossæ, Ephesus, Laodicea, somewhere else in Asia Minor, or perhaps even somewhere beyond its limits; nor yet as to the circumstances and date of his conversion by the apostle, or as to the reason why the runaway slave Onesimus, who as yet was no Christian, should have betaken himself precisely to Paul the prisoner—at Cæsarea, shall we say, or at Rome? The romantic element in the story does not need to be insisted on. It is to be put to the credit of the writer who may very well perhaps have made use of the story which has been so often compared with it (see above; Plin. *Epist.* 9 21 24). A freedman (*libertus*) of Sabinianus makes his escape and seeks refuge with Pliny, who was known to him as a friend of Sabinianus who also lives in Rome, whereupon Pliny sends him back with a commendatory letter in which he pleads for the runaway from the standpoint of pure humanity. Our unknown author makes the freedman into a slave whom he brings into contact, at an immense distance from his home, with Paul, Philemon's spiritual father, who converts Onesimus also, and thereupon sends him back with a plea for the slave from the standpoint of Christian faith and Christian charity. He has thus presented us with an ideal picture of the relations which, in his judgment, that is according to the view of Pauline Christians, ought to subsist between Christian slaves and their masters, especially when the slaves have in some respect misconducted themselves, as for example by secretly quitting their master's service. One might also add that he thus has given a practical commentary on such texts as Col. 3 22-25 Eph. 6 5-9 1 Cor. 7 21-22 (see Steck).

The author's name and place remain unknown. He is to be looked for within the circle from which the 'epistles of Paul' to the Ephesians, Philippians, Colossians, emanated; nor can Philemon be much later in date. Probably it was written in Syria or, it may be, in Asia Minor about 125-130. In any case, later than Paul's death about 64 A.D. and at a time when men had begun to publish letters under his name, when also they had formed the habit of adorning him with titles of honour such as 'bondman' (*δέσμιος*) 'of Christ Jesus,' 'aged' (*πρεσβύτης*), 'being such an one as Paul, etc.' (*τοιοῦτος ὢν ὡς Παῦλος, κ.τ.λ.*), the 'I Paul' (*ἐγὼ Παῦλος*) implies a name of high authority (*vv.* 1 9 19), when further the Christology of the church had already so far developed that it was possible to use convertibly the designations Christ, Jesus, Christ Jesus, Jesus Christ, and to speak of him as the fountain of grace and peace as God himself is (*vv.* 3 25) and as 'the Lord' who is the centre towards whom all the thinking and striving of believers is directed (*vv.* 3 5-9 20 23). On the other hand, it is of course earlier than Tertullian's *Marcion*.

If the epistle can no longer be regarded as a direct product of Paul's spirit, so full of Christian charity, it nevertheless remains to show by an example

5. Value. what Christianity at the time of its composition had been able to achieve as a guiding and sanctifying force in the case of certain special problems of life, and what the several relations were amongst believers of that time.

6. Literature. The commentaries of J. B. Lightfoot (*Philippians*, 1868, [10] 1890), H. von Soden (*HC*[2], 1891), Ellicott (*Philippians*, 1861, 1888), E. Haupt (*Gefangenschaftsbriefe*, 1897), M. R. Vincent (*Philippians*, 1897) will be found useful, though all of them accept the Epistle as genuine. Cp also Holtzmann (*Einl.*[3] 246-7), S. Davidson (*Introd.*[3] 1 153-160), Zahn (*Einl.*[2] 1 pp. 311-326), Steck (*JPT*, 1891, pp. 570-584), Van Manen (*Handl.* 59).

W. C. v. M.

PHILETUS (φιλητος [Ti. WH]), mentioned with Hymenæus in 2 Tim. 2 17†. That he was really a teacher opposed to Paul, is altogether unprovable (see HYMENÆUS); he is but a type of Gnostic teachers who obtained influence after Paul's time. He takes the place of the Alexander coupled with Hymenæus in 1 Tim. 1 20—why, it is useless to conjecture. T. K. C.

PHILIP (φιλιππος [AℵV]). Two of the five Philips of Macedon are named in the Apocrypha.

1. Philip II., father of ALEXANDER the Great, 1 Macc. 1 1 6 2; see ALEXANDER, 1.

2. Philip V., mentioned together with his (illegitimate) son PERSEUS (*q.v.*) in 1 Macc. 8 5 as an example of the warlike success of the Roman arms.

As is well-known, Philip V. was finally defeated at Cynoscephalæ in Thessaly (197 B.C.), Perseus at Pydna (168 B.C.). See further Smith's *Dict. Class. Biog.*, *s.v.*, and *Ency. Brit.*[9], *s.v.* 'Macedonian Empire.'

3. One of the 'friends' (or, according to 2 Macc. 9 29, a foster-brother) of Antiochus Epiphanes to whom was entrusted the bringing up of the child afterwards known as Antiochus Eupator (164 B.C., 1 Macc. 6 14 *f.*). 'In thus designating Philip and not Lysias (cp 3 32 *ff.*) as regent and guardian to the minor Antiochus, he may have been influenced by the utter failure of the campaign conducted by Lysias against Judæa' (*Camb. Bible*, ad loc.). For his fate see LYSIAS. Another tradition tells that fearing the young son he fled to Ptolemy Philometor (2 Macc. 9 29). He is commonly identified with :—

4. A barbarous Phrygian whom Antiochus Epiphanes left in charge of Jerusalem (about 168 B.C.), which he governed with great cruelty (2 Macc. 5 22, cp 6 11). Fearing the growing strength of Judas the Maccabee he sought help from PTOLEMY [*q.v.*, § 4 (1)], the governor of Cœle-Syria, who sent GORGIAS and NICANOR (8 8 *ff.*). It is not improbable that he was the messenger who brought the tidings of the ill success of Lysias to Antiochus (1 Macc. 6 5), which makes the account of his advancement to high office more intelligible.

5. The chancellor of Antioch whose excesses caused Lysias and Antiochus Eupator to withdraw from the invasion of Judæa (2 Macc. 13 23). In spite of the difference in the traditions he is possibly to be identified with (3) and (4) above.

6. For Philip (Herod), see HEROD, FAMILY OF, §§ 9, 11.

PHILIP, THE APOSTLE, and PHILIP, THE EVANGELIST. In the NT two followers of Jesus, both bearing the name of Philip, are clearly distinguished.

1. Distinct persons. (i.) The name holds the fifth place in all four lists of the twelve apostles; in Mt. (10 3) Mk. (3 18) and Lk. (6 14) that of Bartholomew is coupled with it, in Acts (1 13) that of Thomas (see APOSTLE). Nothing further is related concerning this apostle, save in the Fourth Gospel (see below, § 5). (ii.) In Acts 6 5 a Philip is reckoned as one of the 'seven' at Jerusalem. According to 8 5-40 he labours as a missionary in Samaria after the death of Stephen his fellow deacon (by *vv.* 1 14 18 he is expressly distinguished from the apostle), and baptizes the Ethiopian eunuch. In 21 8 *f.* (belonging to the 'we'-source) we learn that he received Paul on his last journey to Jerusalem as his guest at Cæsarea, and that his four unmarried daughters, endowed with the gift of prophecy, were there with him. In this passage he is described as one of the seven and also as 'the Evangelist' (on the title see EVANGELIST, and MINISTRY, § 39 *a*, *b*). Ewald attributed to him an original gospel (see GOSPELS, § 157 A, ii *d*).

In the account of Philip in Acts there are various points demanding attention.

2. Credibility of Acts. (*a*) In the first place it is surprising to find that in Acts 21 10 Agabus is brought in to foretell to Paul his destiny.

This is no sufficient reason, however, for regarding the mention of the prophetic daughters of Philip in *v.* 9 as (1) a mistake of the author's, or (2) as a gloss. Both allegations are simply bold attempts to escape the difficulty involved in the statement in the verse, that the evangelist had prophetic daughters, as against the assertion of the Church Fathers that the prophetic women were daughters of the apostle (see below, § 4 *b*, *c*) The deletion of *v.* 9 would not in any case remove the difficulty that Agabus is in this chapter introduced as if he had never been mentioned before, while yet his name is actually met with in 11 28. A much preferable supposition would be that according to the 'we'-source it was the daughters of Philip who made the prediction to Paul and that a redactor of Acts bearing in mind 1 Cor. 14 34 (women to keep silence) found something objectionable in this and therefore put the prophecy into the mouth of Agabus.

(*b*) Whilst 8 40 prepares the reader for the presence of Philip in Cæsarea it is not easy to see why Ashdod is named as the place to which he was 'caught away.'

If an interval of time (a short interval, of course) had been specified within which Philip had been found at Ashdod, we might suppose the true explanation to be that that city was named on account of its considerable distance from the place where the eunuch had been baptized. This specification of time being absent, perhaps the source used by the author of Acts at this point contained an account of some occurrence in Ashdod which has not been preserved to us.

(*c*) The statement of 8 14-17 that the converted Samaritans were not able to receive the Holy Ghost save by the laying on of hands of the apostles, as well as the whole story of Simon Magus (see MINISTRY, § 34 *c* and SIMON MAGUS) must be regarded as quite unhistorical. The account of Philip's missionary activity in Samaria, on the other hand, is not similarly open to question, nor yet that of the conversion of the eunuch, although it will hardly be denied that this last seems to have received later touches. Such a touch, in particular, may be seen in the miraculous 'rapture' of Philip, parallel to that of Habakkuk in Bel and the Dragon (*v.* 35 [36]) or to the sudden appearances and disappearances suggested by 1 K. 18 18 2 K. 2 16; clearly it serves to bring the narrative to an effective close.

3. Significance of Philip in Acts. Even as regards those statements about Philip, however, which are not in themselves incredible, it is necessary to bear always in mind their obvious suitability to the purpose of the writer of Acts.

The Samaritans occupy an intermediate position between Jews and Gentiles. As for the eunuch, he is indeed a Gentile, yet a Gentile of the class which already stands very near to Judaism (8 27 *f.*). The person specially fitted to be the first missionary of the gospel to people of this description will be not one who comes from the straitest Jewish circles but one who is represented (6 1) as having been chosen in the interests of the Hellenists,—that is, of the Jews of the Dispersion resident in Jerusalem,—and who therefore also, after the manner of so many other Jews having relations with Greeks, bore a Greek name (cp NAMES, § 86).

Thus Philip comes to be the character in Acts to whom the preliminary stages of the mission to the Gentiles are assigned. The original apostles take knowledge of the Samaritan mission and give it their sanction only at a later stage. The difficulty as to whether a Jewish-Christian missionary may or may not enter a Gentile house is not raised so far as Philip is concerned, but only afterwards in the case of CORNELIUS (*q.v.*), who in 10 2 is designated as proselyte indeed, but throughout the whole of the rest of the narrative is treated as a Gentile pure and simple. Thus the story advances step by step. This, however, raises the question whether in what we are told about Philip there may not be much which, if not freely invented, has at least been arranged and combined to suit the plan of the author.

4. Statements of the oldest fathers. Before passing on to what the Fourth Gospel has to say about Philip, it will be well that we should notice at how early a date in the writings of the church fathers the evangelist Philip begins to be taken for the apostle of the same name, the explanation being, obviously, to be sought in the conscious or unconscious

wish to have an apostolic head to whom reference can be made, especially in dealing with heretics.

(*a*) Whether Papias shared the confusion is uncertain. According to Eusebius (*HE* iii. 39 9) Papias recorded in his book that he had received from the daughters of Philip the account of a raising from the dead (νεκροῦ ἀνάστασιν) which had occurred in their father's time and neighbourhood (κατ' αὐτόν; not 'through his instrumentality'), as also the information that Justus Barsabas drank deadly poison with impunity. The excerpt from Papias published by de Boor in *TU* v. 2 170 which goes as far back perhaps as to Philip of Side (*circa* 430) proceeds in immediate continuation of the words quoted under JOHN, SON OF ZEBEDEE (§ 4 *h*) to say: 'The said Papias recorded, as having received [it] from the daughters of Philip, that Barsabas, who also is Justus, having when put to the trial by unbelievers drunk the poison of a serpent, was kept unharmed in the name of Christ. He records, moreover, yet other wonders and especially what happened in the case of the mother of Manaimus [Acts 13 1?], she who rose again from the dead.'[1] As Papias carries back his information only to Philip's daughters, he would appear not to have been personally acquainted with their father. Zahn's view (*Forschungen*, 6 166 *f.*) that the words of Eusebius (*HE* iii. 39 9) 'Papias being a contemporary of theirs' (κατὰ τοὺς αὐτοὺς—*i.e.*, of Philip and his daughters [not κατὰ τὰς αὐτὰς, of Philip's daughters] ὁ Παπίας γενόμενος) are to be taken as proving that Eusebius found in the book of Papias attestation of that writer's acquaintance, not only with the daughters of Philip but also with Philip himself, becomes all the more improbable if Zahn (109) is right in his conjecture that Papias had been brought up in the same city of Hierapolis in Phrygia where he afterwards came to be bishop, and where Philip, after spending the whole of the latter part of his life there, was also buried (so Polycrates; see *b*, below).[2] It thus becomes a possibility that by the Philip whose utterances, just like those of Andrew, Peter, John, the son of Zebedee, and the rest, he had learned only at the mouth of third persons (see JOHN, SON OF ZEBEDEE, § 4 begin. and *b*), Papias may have intended the evangelist at Hierapolis.[3] He does not use, however, the distinctive designation 'apostle' (ἀπόστολος), but calls all his authorities simply 'disciples of the Lord' (μαθηταὶ τοῦ κυρίου), and distinguishes them simply as living or dead.

(*b*) In Polycrates of Ephesus (*circa* 196 A.D.) the confusion of the two Philips is express and complete: 'Philip, him of the twelve apostles, who lies buried in Hierapolis, and two daughters of his who grew old as virgins, and that other daughter of his who after having discharged her citizenship in the Holy Ghost is at rest in Ephesus.'[4]

Eusebius who has preserved these words for us (*HE* iii. 31 3 = v. 24 2) not only utters no caveat, as he is careful to do in the parallel case where Irenæus confuses the two Johns (JOHN, SON OF ZEBEDEE, § 7*a*, end), but actually in his own words with which he prefaces and closes the citation in iii. 31 2 6 (notwithstanding the reference he makes in the intermediate passage—iii. 31 5—to Acts 21 8 *f.*) as also in iii. 39 9 designates the Philip referred to by Polycrates as 'the apostle' (τὸν ἀπόστολον). It is in the highest degree improbable, notwithstanding the contention of Zahn (*l.c.* 162 *f.*), that he is here using the word 'apostle' in its wider sense in which it is equivalent to 'evangelist' (see MINISTRY, § 39 *b*). Zahn (p. 7 n. 2) is able to adduce but one solitary passage in which Eusebius follows this wider usage, and here he is following another writer pretty literally (*HE* i. 13 11): 'Thaddæus an apostle, one of the seventy' (Θαδδαῖον ἀπόστολον ἕνα τῶν ἑβδομήκοντα).

(*c*) Clement of Alexandria (*Strom.* iii. 6 52 *f.*, p. 535, ed. Potter; also in Eus. *HE* iii. 30 1) enumerates Philip along with Peter and Paul as belonging to the category of married apostles: 'for Peter indeed and Philip both became fathers, and Philip also gave his daughters to husbands; and Paul in like manner,' etc, (Πέτρος μὲν γὰρ κ. Φίλιππος ἐπαιδοποιήσαντο, Φίλιππος δὲ κ. τὰς θυγατέρας ἀνδράσιν ἐξέδωκε. καὶ ὅ γε Παῦλος, etc.).

According to Zahn (173) Clement here really intends the apostle Philip, since he states about his daughters something different from what was known about the daughters of the evangelist. We find, however, that Zahn himself (170) infers from Polycrates that the fourth daughter of Philip the Evangelist must have died or remained in Palestine as a married woman; and it has further to be observed that Polycrates regards the third daughter as having been married, for he mentions only two as being virgins. Thus the discrepancy between Clement and Polycrates is not so great as had been supposed.

[1] Παπίας ὁ εἰρημένος ἱστόρησεν ὡς παραλαβὼν ἀπὸ τῶν θυγατέρων Φιλίππου ὅτι Βαρσάβας ὁ καὶ Ἰοῦστος δοκιμαζόμενος ὑπὸ τῶν ἀπίστων ἰὸν ἐχίδνης πιὼν ἐν ὀνόματι τοῦ Χριστοῦ ἀπαθὴς διεφυλάχθη. Ἱστορεῖ δὲ καὶ ἄλλα θαύματα καὶ μάλιστα τὸ κατὰ τὴν μητέρα Μαναΐμου τὴν ἐκ νεκρῶν ἀναστᾶσαν.

[2] Even if we held with Corssen (*ZNTW*, 1901, p. 292) that Harnack (*ACL* ii. [=Chronol.] 1 3-25) has proved that in Euseb. (*l.c.*) we must after αὐτοὺς supply χρόνους, and that in all such cases the time of the emperor last mentioned is meant, the passage would not involve the view that Philip was still alive. Moreover, Harnack's contention is difficult, and our passage is not in his list. So also in *a*, *l.* 5 (above), χρόνον (after κατ' αὐτόν) is linguistically inadmissible, and reference to an emperor impossible.

[3] The possibility is further increased if the view of the words of Eusebius which is taken in GOSPELS, col. 1816, n. 1, is accepted.

[4] Φίλιππον τὸν τῶν δώδεκα ἀποστόλων, ὃς κεκοίμηται ἐν Ἱεραπόλει, καὶ δύο θυγατέρες αὐτοῦ γεγηρακυῖαι παρθένοι, καὶ ἡ ἑτέρα αὐτοῦ θυγάτηρ ἐν ἁγίῳ πνεύματι πολιτευσαμένη ἣ ἐν Ἐφέσῳ ἀναπαύεται.

In fact, Lightfoot (*Colossians* 45 *f.* [1875]) found himself able to make the assertion that Polycrates intended by the Philip who lived in Hierapolis, not the evangelist with his four prophetically-gifted daughters, but the apostle, who had three daughters, not so endowed, one of whom was a married woman, and that there has been no confusion between the two men at all.[1] This, however, is quite unlikely, as the church fathers never bring the two men into contrast as Lightfoot does, but invariably speak of only one Philip as having had daughters about whom there was something to say. The variations in the accounts of these daughters (according to the Montanist Proclus in the Dialogue of Gaius directed against him [ap. Eus. *HE* iii. 31 4] all four daughters of Philip were buried in Hierapolis) are, we may rest assured, merely variants of an identical story relating to one family only.

This, however, being granted, we must not overlook the further circumstance that Clement (*Strom.* iii. 4 25, p. 522 ed. Potter) declares Philip to have been the person to whom Jesus, according to Mt. 8 22 = Lk. 9 60, said 'leave the dead to bury their own dead, and follow me.' This identification rests assuredly on the simple fact that in Jn. 1 43 Jesus is represented as saying to Philip 'follow me' (the other cases where the word is employed are those of Levi or Matthew, in Mk. 2 14 = Lk. 5 27 = Mt. 9 9, and of the rich man in Mk. 10 22 = Mt. 19 21 = Lk. 18 22). Thus here also Clement is thinking of the apostle, and nowhere seems to mention the evangelist as a different person; so also later writers (see in Zahn, p. 171, n. 1).

(*d*) According to Heracleon (*circa* 190 A.D. in Clem. *Strom.* iv. 9 73, p. 595, ed. Potter) Philip died a natural death (see JOHN, SON OF ZEBEDEE, § 5, end). Whether Heracleon intends the apostle or the evangelist or does not at all distinguish between the two remains uncertain.

(*e*) The Montanists towards the end of the second century referred to the four daughters of Philip, along with Agabus and other Old-Christian prophets in justification of their claim that the gift of prophecy was still among them (Eus. *HE* v. 17 3 iii. 31 4, Orig. in Catenæ [vol. 5] in Epist. ad Cor. [Cramer, p. 279]).

5. The Fourth Gospel.

The Fourth Gospel, in virtue of its repeated references to Philip, would supply material for some characterisation of the apostle were it not that unfortunately all the most important of the narratives in connection with which his name occurs must be regarded as unhistorical.

To this category belong that of the feeding of the five thousand (6 5-7), that of the visit of the Greeks (12 20-22; cp GOSPELS, § 140 *c*; JOHN, § 27), that of the call of Philip (1 43-46),—a narrative which so far as its connection with the calling of Peter and Andrew (1 35-42) is concerned is wholly irreconcilable with the synoptists' account of the call of the brothers (Mk. 1 16-18 and ||s); the narratives cannot refer to distinct incidents (it is inconceivable that disciples, once called, should have left Jesus and then have been called by him once more just as if they had never been with him). Equally unhistorical is it that Jesus ever said: 'he that hath seen me hath seen the Father' (14 9).

If, however, we decide that the figure of Philip serves in Jn. as the embodiment of an idea, then we shall find the idea so expressed to be the same as that in Acts; it is he who makes the first preparatory steps for the admission of Gentiles to Christianity by being, along with Andrew (the only other of the twelve who bears a Greek name), the intermediary through whom the inquiring Greeks are brought to Jesus. Perhaps this is also the reason why his home is given (as also that of Andrew) as having been a city of Galilee with a mixed Gentile population (Jn. 1 44, recalled also in 12 21).[2] The same point of view would be disclosed in

[1] Similarly Corssen (*ZNTW*, 1901, pp. 289-299), who, however, charges the Montanists (below *e*) with identifying the two Philips.

[2] It must not be overlooked that in Mk. 4 16-21 it is Capernaum rather than Bethsaida that appears to be the home of Andrew, and that in the time of Jesus Bethsaida did not belong

its being Philip who brings NATHANAEL [*q.v.*] to Jesus, if indeed we are to understand by this mysterious personality the apostle Paul for whose activity Philip prepares the way in Acts.[1] Philip's appearing also among the seven may moreover explain why it is to him that the question of Jesus in 6 5 is addressed: 'whence are we to buy bread?' It is thus the figure of the evangelist that underlies the Philip of the Fourth Gospel. Since, however, he is represented as an apostle, we see that the confusion of the two persons already spoken of can be traced back even to this gospel. After the same fashion as the non-apostolic John of Ephesus (see JOHN, §§ 3-7), the other non-apostolic church-head of Asia Minor is elevated to the apostolic dignity. Finally, as Philip has assigned to him a rank in the apostolate that is inferior to the highest, we can perceive that both in 6 7 and in a less characteristic passage, 14 8-10 (Lord, shew us the father), he is intended to figure as one of the many persons in the Fourth Gospel who are still deficient in the true knowledge of the divinity of Christ.

6. Later traditions.

(*a*) Philip the evangelist is usually reckoned as one of the seventy (Lk. 10 1). (*b*) As for the apostle—the apostle at least of Jn. 1 44 12 21—the only reminiscence in tradition is the statement that he began a missionary journeying from Galilee. (*c*) All the other legends relating to the apostle rest upon what we are told of the evangelist. Whilst Tischendorf (*Acta apost. apocr.*, 75-104; *Apocal. apocr.*, 141-156) and Wright (*Apocr. Acts of the Apostles*, 1871, pp. 69-92 of the English translation) give fragments only, and Lipsius (*Apokr. Ap.-gesch.* ii. 2 1-53 and *passim*) had access to no further materials, a large part of a consecutive work—viz. the first to the ninth and also the fifteenth and last πρᾶξις of the *Acta Philippi*—was published by Batiffol in the *Analecta Bollandiana*, 9 (1890) 204-249, and dealt with by Lipsius (in his 'Ergänzungsheft,' 1890, pp. 65-70), by Stölten (in *JPT*, 1891, pp. 149-160), and by Zahn (6 18-24). The basis of this work is gnostic; but it has undergone much revision in the catholic sense. It represents Philip as having exercised his missionary activity not only in Phrygia (particularly at Hierapolis) but also in almost every other province of Asia Minor as well as in the 'city of Asia,' in addition to Samaria, Ashdod (cp Acts 8 5-40), from Parthia 'to the cities of the Candaci' by the sea, or in 'Parthenia by the sea of the Candaci' (cp Queen Candace in Acts 8 27), in 'Carthage (a corruption from Κανδάκων?) which is in Ashdod,' in 'Hellas the city of the Athenians' (plainly due to the Ἕλληνες of Jn. 12 20), in Nicaterapolis in Hellas, in Scythia, in Gaul (=Galatia?), etc. He is accompanied by his sister Mariamne instead of his daughters. His death is represented at one time as having been a natural one, at others as having been by hanging, or crucifixion, head downwards, along with stoning. When at a later date it came to be perceived that the evangelist was a different person from the apostle, a see and place of burial were assigned to him at Tralles in Caria. (*d*) On the *Gospel of Philip* see APOCRYPHA, § 26, 9. In the Pistis Sophia there mentioned (32, 70 *f.* of the MS translated by Schwartze, ET by G. R. S. Mead, 1896) it is Philip (along with Thomas and Matthew) who has to write out all the words of the risen Jesus. Zahn's view (*Gesch. d. NTlichen Kanons*, ii. [761-] 768) that the gospel of Philip came into existence in the first decades of the second century rests on no solid basis (cp Harnack, *ACL* ii. (=*Chron.*) 1 592 *f.*). P. W. S.

PHILIPPI (φιλιπποι [Ti. WH]) in early Christian times was a considerable city of Macedonia not far from the Ægean.

1. History.

It took its name from King Philip (the father of Alexander the Great) who towards the middle of the fourth century B.C. had made himself master of the neighbouring gold mines and the ancient Crenides (Κρηνίδες) or 'Fountains,' upon the site of which he founded a frontier city which was called after himself. About 167 B.C. it came into the possession of the Romans, who divided Macedonia into four regions or free republics—having for their respective capitals Amphipolis, Thessalonica, Pella, and Pelagonia

to Galilee at all but to the tetrarchy of Philip. Perhaps Jn. names Bethsaida because of the identity of name of tetrarch and apostle (see BETHSAIDA, § 3), but perhaps on account of the etymology, as both Andrew and Peter were fishermen.

[1] Holtzm. *BL* iv., 1872; O. L[orenz], *ZWT*, 1873, pp. 96-102; Schwalb, *Unsre 4 Evangelien*, 1885, pp. 358-360; Pfleid., *Urchrist.* 700 n. With 'an Israelite' in *v.* 47 cp 2 Cor. 11 22, also Gal. 1 13 *f.*; with 'no guile,' 1 Thess. 2 3 (δόλος); with 'any good thing out of Nazareth?' in *v.* 46, cp Acts 22 8 26 9; with 'I saw thee,' *v.* 48, cp Gal. 1 15; with 'of whom Moses and the prophets did write,' *v.* 45, cp Rom. 3 21; with 'come and see,' *v.* 46, cp 1 Cor. 9 1.

PHILIPPI

—the inhabitants of which, however, were not allowed to have connubium or commercial dealings with each other outside the limits of their respective regions (see Livy, 45 29). This policy of isolation broke the power of 'free' Macedonia. In 42 B.C. Macedonia became the scene of the struggle between the opposing forces in the civil war; and by the beginning of the Christian era we find it a Roman province governed now by a senatorial, now by an imperial legate (see MACEDONIA, § 2, end). Philippi was fortified and raised to the rank of a military colony by Octavianus, the conqueror on the adjoining plains of Pharsalia, under the title of Colonia Julia Augusta Victrix Philippensium. The inhabitants both old and new—and the latter class was exceptionally numerous—received the *jus Italicum*, whereby they practically enjoyed equal privileges with the citizens of Rome itself. As a 'colony' Philippi henceforth became much more than a mere city with suburbs; rather it became a great department, 'with boroughs and secondary towns' of which it formed the administrative centre, as Vincent remarks (*Comm. on Phil.*, xvi. [1897]). There were at that time cities of first and second, third and fourth rank, and perhaps even of still lower grade. Marquardt (*Röm. Staatsverw.* 1 188 [1873]) himself speaks in one case of a 'seventh' alongside of the 'first'—the title borne by Ephesus, Pergamus, and Smyrna in Asia. He regards it as indubitable that the expression 'first' (πρώτη) had reference solely to the precedence in the festival with which the games of the κοινὸν Ἀσίας were inaugurated. However this may be, we now understand what the much discussed expression (πρώτη τῆς Μακεδονίας πόλις) used with reference to Philippi in Acts 16 12 means.

It is not said that Philippi was *the* first city or the capital of Macedonia, or the first city of Macedonia—

2. Explanation of Acts 16 12.

Paul being supposed to have begun his labours in Europe there, because he had not halted at Neapolis or because that city did not count, belonging as it still did to Thrace (?). All that is said is that Philippi at that time was regarded in those parts as a 'first,' that is, 'first class' city. The variants clearly show how very soon the key to the only true explanation had been lost.

Ti.WH and Nestle read, with ℵAC etc. ἥτις ἐστὶν πρώτη τῆς μερίδος Μακεδονίας πόλις, κολωνία; B has πρώτη μερίδος τῆς M.; E πρώτη μερίς M.; D κεφαλὴ τῆς M. πόλις κολ.; and some cursives and translations follow D in taking no account at all of μερίδος or μερίς. This word can safely be regarded as a 'correction' just like D's κεφαλή or Blass's conjecture πρώτης again adopted by Zahn (*Einl.*(2) 1 376), as if, the division of Macedonia in 167 B.C. into four regions being called to mind, it were still possible to speak of the 'first μερίς,' or Hort's conjecture of τῆς Πιερίδος Μακ. No conjecture is necessary, nor need we, with WH, seek the possible corruption in πρώτη τῆς μερίδος.

If we simply read with MSS 'which is a first (class) city of Macedonia, a colony' (ἥτις ἐστὶν πρώτη τῆς M. πόλις, κολωνία), all the variants are explained, the meaning being perfectly intelligible.

The name of the ancient Philippi long survived in that of the now extinct village of Filibedjik or Filibat. Of the city colony only a few ruins are extant.

In Old-Christian writings Philippi was mentioned as the seat of a church, the first in Europe, founded by Paul on his so-called second missionary journey.

3. Paul's visits.

Here on a certain Sabbath day, at a place of prayer by the river, outside the city gate, he is said to have come into contact with the worshippers, especially the devout women, and to have made the acquaintance of a certain Lydia, a seller of purple from Thyatira in Asia, who 'worshipped God' and after having been baptized along with her family by Paul received him in her house. Then comes the narrative of the maid—probably a slave—with a spirit of divination who had brought her masters much gain by her soothsaying. These men now came forward as accusers and prosecutors of Paul and his companion Silas, who are beaten with rods and cast into prison, but delivered from it in a miraculous way, the jailor and

his household being baptized and the apostles honourably restored to freedom. This narrative may embody some kernel of truth, taken from the journey-narrative which was incorporated with the lost Acts of Paul underlying our canonical book of Acts (see PAUL, § 37 [*a*]); but as we now read it in Acts 16 12-40 it is assuredly not credible in its entirety, but has been palpably retouched, and dates from a later time (cp PAUL, § 33; and van Manen, *Paulus*, 1 109-111).

In Acts mention is made a second time of a visit by Paul to Macedonia, in which connection Philippi is again named; this was on the third so-called missionary journey, and when Paul was turning his steps for the last time towards Jerusalem (Acts 20 1-6).

Philippi is once more mentioned in 1 Thess. 2 2 with manifest reference to the events described in Acts 16 12-40; in Phil. 1 1 (cp 4 15 *f.*) as the abode of Christians who have been long known to Paul (see PHILIPPIANS [EPIST.], § 3); and in the superscription of the epistle of Polycarp as the seat of the church of God to which Polycarp and the elders with him are represented as having sent an epistle when Polycarp had taken over from Ignatius the task laid upon him of sending epistles to various churches (Ign. *ad Pol.* 8; see PHILIPPIANS, § 12).

W. C. v. M.

PHILIPPIANS (EPISTLES).

There fall to be considered two Old-Christian documents—those bearing the names of Paul and of Polycarp respectively.

I. Paul's Epistle.

1. History of criticism. The first of the two constitutes one of the NT group of 'epistles of Paul' (ἐπιστολαὶ Παύλου), 'to Philippians' (πρὸς Φιλιππησίους) being the shortest form of the title—adopted by Ti. WH after ℵABK, etc. Down to 1845—or, shall we say, to 1835?—no one had doubted its right to this position. Men saw in it an expression, greatly to be prized, of the apostle's love for a church which he had founded, written while he was languishing in prison, probably in Rome, and sent by the hand of Epaphroditus who had been the bearer of material and spiritual refreshment for Paul, had fallen sick, and was now on the point of returning to his home in Philippi. The only point on which doubt seemed possible was as to the place of composition—whether Cæsarea or Rome.

Paulus (1799), Böttger (1837), Thiersch, and Böhmer declared for Cæsarea; elsewhere the voice was unanimous: 'the apostle's testament; written in Rome' (Holtzmann). 'The testament of the apostle and the most epistolary of all epistles'—'der brieflichste aller Briefe.'

Then came F. C. von Baur with his thesis that only four of the epistles of Paul (Gal., 1 and 2 Cor., Rom.) could be accepted as indisputably genuine—a thesis that he employed as a criterion in determining the genuineness of all the rest (*Die sogen. Pastoralbr.* 1835, p. 79; *Paulus*, 1845). Tried by this standard Philippians had, in Baur's view, to be at once rejected (*Paulus*, 1845, pp. 458-475).

The replies of Lünemann (1847), B. Brückner (1848), Ernesti (1848 and 1851), de Wette (1848), and others were not effective. Indeed, the support given to Baur by Schwegler (1846), Planck (1847), Köstlin (1850), Volkmar (1856) did not advance the question more than did Baur's own reply to Ernesti and others published in *Theol. Jahrbb.* 1849 and 1852, and afterwards incorporated in *Paulus*(2), 1866-7, 2 50-88. Hoekstra (*Th. T.* 1875) and Holsten (*JPT.* 1875-6) sought to base the Tübingen position as to Phil. upon the solid foundation of a more strict and searching exegesis, rejecting all that in their judgment could not be relevantly urged, and adding such other arguments as seemed to them to have weight. Both these critics, however, still started from the genuineness of the four 'principal epistles.' So Hitzig, Hinsch, Straatman, Kneucker, Biedermann, and various others ranged themselves more or less decidedly upon the same side.

At the same time, not merely among thorough-going apologists, but also among friends of the Tübingen school, such as Hilgenfeld, Schenkel, Pfleiderer, Lipsius, Hatch (*Ency. Brit.*(9), 1885), S. Davidson (*Intr.*(3), 1894), and others, there were very many who found themselves unable to accept the result of Baur's criticism so far as the Epistle to the Philippians was concerned.

Without realising it very clearly, both advocates and opponents of the genuineness found their stumbling-block, from the beginning, in the axiom of the genuineness of the 'principal epistles' of Paul. Of necessity, however closely attached to Baur and his school, or however little bound to one another by common principles, they at once fell into two groups—each of them, in itself considered, most singularly constituted—which felt compelled to maintain or to reject the Pauline origin of our epistle, in the one case because it did not appear to differ from the principal epistles as a whole more than did these from each other, in the other case because assuredly, whether in few or in many respects, it seemed when compared with them to breathe another spirit, and in language and style to betray another hand.

A way of escape has been sought—but unsuccessfully—by means of the suggestion, first made by le Moyne in 1685 and afterwards renewed by Heinrichs (1803), Paulus (1812), Schrader (1830), and Ewald, that the Epistle was not originally a unity.

C. H. Weisse saw in it (*Beitr. z. Kritik der paul. Br.* 1867), besides some later insertions, two epistles: Phil. 1-3 1*a* and the fragment 3 1*b*-4. Similarly Hausrath (*NTliche Zeitgesch.*(2) 3 398 *f.*): one letter written after the first hearing, a second some weeks later after the gift of money from Philippi. W. Brückner (*Chron. Reihenfolge*, 1890) assumed various interpolations; Völter (*Th. T.* 1892), a genuine and a spurious epistle which have been fused together in that which we now possess. Names and titles will be found more fully in Holtzmann, *Einl.*(3), 1892, 266-272; S. Davidson, *Introd.*(3), 1894, 1 161-182; Vincent, *Comm.* 1897; Zahn, *Einl.*(2), 1900, 1 369-400; and other writers of introductions and commentaries.

A newer way, at first allowed to pass unnoticed, was shown by Bruno Bauer (*Kritik der paul. Briefe*, iii. (1852), 110-117, cp *Christus u. die Cäsaren*, 1877, pp. 373-4), when he determined to make his judgment upon this epistle independently of that upon the four 'principal epistles,' his main conclusion being that it was not earlier than the middle of the second century. He was followed, so far as his leading principle was concerned, by Loman, Steck, van Manen.

Loman, however, did not go more closely into the question of the origin of Philippians. Steck intimated his adhesion in an incidental statement in his *Galatians* (p. 374) that in Philippians we hear some 'echoes' of the controversy between Paulinism and the older party of the followers of Jesus. Van Manen's view was set forth in his *Handleiding*, 3, §§ 51-58.

Thorough criticism has no other course open to it but that of condemning any method which ties the hands in a matter of scientific research. Before everything else it demands freedom. Exegesis must not be content to base itself on results of criticism that have been arrived at in some other field; rather is it the part of exegesis to provide independent data which may serve as a foundation for critical conclusions. The epistle to the Philippians, like all other Old-Christian writings, requires to be read and judged entirely apart and on its own merits, independently of any other Pauline epistles, before anything can be fitly said as to its probable origin (cp PAUL, §§ 34, 36).

The writing comes before us as a letter, not of course of the same type as those commonly written at the period, of which we have recently received so many examples in the *Oxyrhynchus Papyri* (i. and ii.—1898-99; cp PAPYRI, and EPISTOLARY LITERATURE), but as a letter of the sort that we know from the New Testament, and especially from the Pauline group (see OLD-CHRISTIAN LITERATURE, § 18; PAUL, § 39); a letter, to judge from the opening sentence, written by Paul and Timothy, but, to judge from all that follows, by Paul alone. In it we find Paul speaking, as a rule, as if he were a free man, yet sometimes, particularly in 1 7-17, as if he were a prisoner. He is full of sympathetic interest in those whom he is addressing. He tells them that his thoughts are continually about them and their excellences (1 3-11 2 12), how he yearns to see them once more (1 8 26 2 24 26), how they are properly speaking the sole object for which he lives, his joy and his crown (1 24 4 1). The epistle purports to be addressed to all the saints in Christ Jesus at Philippi with the bishops and deacons (1 1 4 5), known and loved brothers, disciples, and friends of the apostle; still, the impression it gives is rather as if it had been written for a wider circle of readers, among whom the Philippians play no other part than that of representing the excellent Christians addressed, who nevertheless required to be spoken to seriously about many and various things that demanded their unremitting attention.

2. What Phil. seems to be.

3. Contents. The writer, as Paul, declares his thankfulness to God for the fidelity of his readers to the gospel, and his earnest yearning after them all and their continued spiritual growth (1 3-11). He refers to the misfortunes that have recently happened to him and to that which in all probability lies before him, pointing out how his bonds have served to promote the cause of Christ both amongst unbelievers and amongst the brethren, and how Christ to his great joy is being preached, whatever be the reasons and however diverse be the ways; how he is in a strait between his desire to be released and his desire to go on with life, whilst in any case hoping to be able to glorify Christ in his body (1 12-26). Next, he exhorts his readers, whether he be present or absent, and very specially in the latter case, to let their manner of life be worthy of the gospel of Christ, after the example of him who, being in the form of God, had humbled himself by taking the form of a bondservant, being found in fashion as a man, and becoming obedient even to the death of the cross (1 27-2 18). He then proceeds to speak of his intention to send Timothy—joint author of the epistle, according to 1 1—whom he highly commends, and Epaphroditus his 'brother,' 'fellow-worker' and 'fellow-soldier,' and at the same time the 'messenger' (ἀπόστολος) and 'minister' of the Philippians to the need of Paul. Epaphroditus has been sick nigh unto death, and sore troubled because they had heard he was sick, and yet he is recommended to the Philippians as if he were a stranger (2 19-30). The writer, as Paul, goes on, abruptly, to a vigorous onslaught on his enemies, prides himself upon his Jewish birth, glories in his conversion, describes his unremitting efforts towards the Christian goal, and exhorts to imitation of his example. For those whom he addresses he is himself a 'type,' his conversation a 'conversation in heaven' (3 1-4 1). Lastly, comes a new series of exhortations, to Euodia and Syntyche, Synzygus and all the other brethren, to conduct themselves in all things in accordance with the word and example of Paul who is addressing them (4 2-9); an expression of thanks for the gift, received from them by the hand of Epaphroditus, which has recalled the memory of previous kindnesses, and has been welcome at this time, although not indispensable (4 10-20); greetings to and from all the saints, and a benediction (4 21-23).

4. Difficulties. Some things here are certainly not easily intelligible or very logical, whether we regard the form or the substance. We may point, for example, to the unusual although genuinely 'Pauline' 'Grace to you and peace from God our Father and (the) Lord Jesus Christ' in the exordium (1 2), 'Now unto our God and Father be the glory for ever and ever, Amen' at the close (4 20), followed by the prayer 'The grace of our Lord Jesus Christ be with your spirit' (4 23) instead of the well-known customary formula of salutation and greeting. The address, moreover, to 'all the saints of Christ Jesus at Philippi, with the bishops and deacons' (1 1) seriously raises the question, Who are they? Where do they live? Contrast, too, the double authorship (Paul and Timothy) of the Epistle as seen in 1 1 with the fact that from 1 2 onwards Paul alone speaks and in 2 19 speaks of Timothy as if he had nothing to do with the Epistle. Observe also the peculiarly exaggerated manner in which the Philippians are addressed, as if they and they alone were by way of exception Christians, worthy to absorb the apostle's every thought, and as if it was for them alone that he lived and endured, and how, once more, towards the end (4 15) he names them in a singularly lofty tone as 'ye Philippians.' How he again and again praises himself, holds himself up as a pattern, as the best example that can be given for the imitation of his disciples and friends: not only when he speaks so ecstatically of his thanksgivings and prayers, the significance of his sufferings and possible death, the tie between him and his present or absent readers (1 2-30 2 1 12 16 *f.* 27 *f.*), but also when he boasts of his pure Hebrew descent, his faith, his unceasing effort to be perfect, and to walk as an example (3 5-21 4 9-14).

Note how the writer salutes '*every* saint in Christ Jesus' and sends greetings from '*all* the saints, especially those that are of Cæsar's household' (4 21 *f.*), he being a prisoner yet apparently in free communication with the people of the Prætorium, the imperial guard in Rome to whose charge he had been committed (1 7 13 *f.* 17). Consider how impossible it is to picture clearly to oneself his true relation to the supposed readers at Philippi, the circumstances by which he and they are surrounded, the occasion for writing or sending the epistle, unless a considerable part of its contents be left out of account. All is confused and unintelligible as long as one thinks of it as an actual letter written in all simplicity and sent off by Paul the prisoner at Rome to his old friends at Philippi after he has been comforted and refreshed by their mission of Epaphroditus to him. Wherefore, in that case, the bitter attack and the self-glorification so intimately associated with it (4 2-21)? Wherefore the Christological digression (2 6-11), with the substance of which (on the assumed data) one might presume the reader to have been already long familiar? Why the proposal to send Timothy 'shortly' (ταχέως), whilst yet the writer himself hopes to come 'shortly,' and Epaphroditus is just upon the point of setting out (2 19 24 *f.*)? Could not Epaphroditus, if necessary by letter, have sent the wished-for information touching the Philippians which is spoken of in 2 19? What was Epaphroditus in reality? a fellow-worker of Paul? or a messenger of the friendly Philippians (2 25)? Why did he need to be warmly recommended to the Philippians as if he were a stranger, though they had already been full of solicitude on account of the illness from which he has now happily recovered (2 26-30)? How can this give occasion for the exhortation to hold 'such' in honour (2 30)? Even Euodia and Syntyche, Synzygus and Clement (4 2 *f.*), simple though they seem, have long been the subjects of various perplexing questions. Who were they? symbolical or real persons? In what relation did they stand to one another, to Paul, to the community addressed? Why the reminiscence of what Philippi had previously done for the apostle (4 15 *f.*)? Only to give him an opportunity to say that he valued the good-will of the givers more than their gift (4 17)?

5. Not a letter. The solution of these and other riddles of a like nature raised by the Epistle lies in the recognition that it is not really a letter, in the proper sense of that word (see above, § 2), but an edifying composition in the form of a letter written by Paul to the church of Philippi and intended to stir up and quicken its readers. Or rather, let us say, its hearers; for epistles of this sort were designed first and foremost to be read in the religious meetings of the congregation. No more precise determination of the occasion for the composition and sending of the epistle—such as is usually sought in the receipt of the gift alluded to (for the first time) in 4 10-18 (cp 2 25 30)—can be given. The writer knows the proper form of a 'Pauline epistle' and he follows it without troubling

himself as to whether everything that he says exactly fits its place or not. Hence his naming of Timothy as joint writer of the Epistle (1 1) although he makes no further mention of him, apart from 2 19 23, where he speaks of him as if he were a third person. Hence, too, his vague expression 'all the saints in Christ Jesus at Philippi' and the strange addition, explicable only from 1 Cor. 1 2 and 2 Cor. 1 1, '*With* the bishops and deacons' (1 1), his benedictions (1 2 4 23), his greetings (4 21 *f.*), his thanksgiving for, and high praise of, the church he is addressing, which yet has to be admonished with such earnestness; his exaltation of Paul and his relation to 'the whole Prætorian Guard and all the rest' (1 13), his intercourse with them that are of Cæsar's household (4 22); his praise of Timothy (2 20-22), of Epaphroditus and of the always attentive Philippians (2 25-30 4 10-18); in a word, everything that strikes the reader as strange and perplexing as long as he is endeavouring to regard the epistle as a genuine letter of Paul to the church he had founded at Philippi. His 'Philippians' are ideal Christians of the good old times to which the living generation may acceptably have its attention directed, and at the same time they are the 'you' amongst whom are found faults and shortcomings, and even 'dogs,' 'evil workers,' and 'concision' (3 2). The aim of the writer is no other than to edify, to incite to patience and perseverance by pointing to the example of Paul and others, including the church addressed, with its illustrious past.

6a. Composition.

The author is acquainted with the canonical epistles to the Romans, the Corinthians, the Galatians, perhaps also the Ephesians, as is shown by the 'parallel' pass-words and allusions, to which defenders as well as assailants of the 'genuineness' are accustomed to point in order to prove either the identity of the writer with the author of the 'principal epistles' or his dependence on those writings.

A careful examination makes it evident that many of the phenomena can be accounted for only by imitation.

For example: the naming of Timothy (1 1) as joint writer of the epistle although its further contents show that he was not so, cp 2 Cor. 1 1; the expression 'with the bishops and deacons,' alongside of all the saints at Philippi (1 1, cp 1 Cor. 1 2 2 Cor. 1 1); the expression 'Jesus Christ' in 1 2 after 'Christ Jesus' in *v.* 1, cp Rom. 1 7 (1 Cor. 1 3 2 Cor. 1 2 Gal. 1 3 Eph. 1 2); the calling of God as witness of the sincerity of Paul's desire towards his readers (1 8, cp Rom. 1 9); the expression 'test the things that differ' (*δοκιμάζειν τὰ διαφέροντα*, 1 10), elsewhere only in Rom. 2 18, cp 12 2; the bonds (*οἱ δεσμοί*) of the prisoner, who nevertheless seems to walk at liberty (cp *ὁ δέσμιος* Eph. 3 1); the strange word (and therefore explained by *ἐλπίς*) 'expectation' (*ἀποκαραδοκία*) 1 20, elsewhere only in Rom. 8 19; the great importance attached, without any apparent reason, to Paul's coming (1 26, cp Rom. 1 10-13); the expansion 'the same love, etc.' (*τὴν αὐτὴν ἀγάπην κ.τ.λ.*, 2 3-4) as compared with the exhortation, originally standing by itself, 'to mind the same thing' (*τὸ αὐτὸ φρονεῖν*), cp 2 Cor. 13 11 Rom. 12 16; the use of such words as 'form' (*μορφή*), *ἁρπαγμός* (AV 'robbery,' RV 'a thing to be grasped at'), 'equality' (*ἴσα*), 'empty himself' (*κενοῦσθαι*), 'greatly exalted' (*ὑπερυψοῦν*) in 2 6-11, even though perhaps not borrowed from our existing Pauline epistles; the *likeness* of men (2 7), cp with the *likeness* of sinful flesh (Rom. 8 3); the words in 2 10 *f.* borrowed from the OT in accordance not with the text of Is. 45 23 𝔊 but with that of Rom. 14 11; the stringing together of purely Pauline expressions (such as *ὥστε, ὑπηκούσατε, πολλῷ μᾶλλον, ἡ παρουσία* and *ἡ ἀπουσία μου*) for which no reason is apparent in the context (2 12); the echo of Rom. 7 18 in 2 12 *f.*; the expression 'to run in vain,' 'to labour in vain,' 'praise in the day of Christ,' 2 16, cp Gal. 2 2 4 11 2 Cor. 1 14; the sending of Timothy and the praise accorded to him 2 19-22, cp 1 Cor. 4 17 16 10; the assurance, very strange in the connection in which it occurs, that the writer himself will speedily come 2 24, cp 1 Cor. 4 19; the 'supposed to be necessary' and 'speedy' sending of Epaphroditus (2 25 28, cp 2 Cor. 9 5 8 22); the unintelligible imperative (*προσδέχεσθε*) in 2 29, with reference to the highly appreciated Epaphroditus, cp Rom. 16 2; the deviation after 'such' (*τοιοῦτοι*) in 2 30, cp 1 Cor. 16 16 18; the impossibility of explaining 'the same things' (*τὰ αὐτά*) in 3 1 otherwise than as referring to what occurred elsewhere in some previous passage in the group of epistles to which this originally belonged; the keenness of the attack in 3 2-6 19, which is fully in harmony with much in 2 Cor. 10-13 and Gal. but not with the present epistle; the unintelligibleness of the assurance 'for we are the circumcision,' 3 3, as long as we do not bear in mind such words as those in Rom. 2 25 28 *f.*; the necessity for explanation of 'glorying in Christ Jesus and not trusting in flesh' (*καυχώμενοι ἐν Χριστῷ Ἰησοῦ καὶ οὐκ ἐν σαρκὶ πεποιθότες*), 3 3, by referring to such texts as Rom. 2 17 23 11 1 2 Cor. 11 21-23 Gal. 1 13 *f.*; and so forth.

Perhaps the special features connected with Paul's sojourn as a prisoner in Rome, as also the allusion to succour previously received by him from the Philippians according to 4 15 *f.*, may be both borrowed from some written source; if this be so, the source in question cannot, in view of the discrepancies, be the canonical book of Acts, but must be rather a book of 'Acts of Paul' which underlies it (PAUL, § 37).

6b. Not patchwork.

However many the traces of the writer's use of earlier materials, it does not seem advisable, and certainly in no case is it necessary, to regard his work as a chance or deliberate combination of two or more epistles or portions of epistles. The epistle as a whole does not present the appearance of patchwork. Rather does it show unity of form; we find a letter with a regular beginning and ending (1 1 *f.* 4 20-23); a thanksgiving at the outset for the many excellences of the persons addressed (1 3-11, cp Rom. 1 8-12 1 Cor. 1 4-9) notwithstanding the sharp rebukes that are to be administered later; personalia; exhortations relating to the ethical and religious life; all mingled together yet not without regard to a certain order. Here and there some things may be admitted to interrupt the steady flow of the discourse; 3 1 or 3 1*b* raises the conjecture of a new beginning; the 'things' spoken of here are not different from those which we meet with elsewhere in other Pauline epistles—even in Rom., 1 and 2 Cor., Gal. There also, just as here, we repeatedly hear a change of tone, and are conscious of what seems to be a change of spirit. Yet even apart from this, to lay too great stress upon the spiritual mood which expresses itself in 3 2-6 as contrasted with that of 1 3-11, or, on the whole, of 1-2, would be to forget what we can read in 1 15 17 2 21 and the calm composure shown in 3 *f.*

No unmistakable trace can be shown of conjunction or amalgamation of two or more pieces of diverse origin, apart from what admits of explanation from use having been made of existing writings—say, the reading of certain Pauline epistles. Rather does everything, even that which has been borrowed, reach the paper through the individual brain and pen of the writer. Witness the unity of language and style which becomes all the more conspicuous whenever we compare the work with, for example, a Johannine epistle or a chapter from the synoptical gospels.

There is but one so-called conclusive proof that there were originally more than one epistle—whether genuine or not genuine—of Paul to the Philippians: the much-discussed testimony of Polycarp (*Phil.* 3 2). There we read of Paul that he had not only in his time orally instructed the Philippians but also written them 'letters, into which if you look carefully you will be able to have yourselves built up into the faith that has been given you' (*ἐπιστολὰς, εἰς ἃς ἐὰν ἐγκρύπτητε, δυνηθήσεσθε οἰκοδομεῖσθαι εἰς τὴν δοθεῖσαν ὑμῖν πίστιν*). It is not necessary, however, as is done by some scholars, to explain the plural number (letter[s]) by reference to Latin idiom (*epistolæ*), or, with others, to think that Polycarp is exaggerating. Chap. 13 2 clearly shows that he well knows the difference between *ἐπιστολή* and *ἐπιστολαί*; 11 3 (qui estis in principio epistulæ ejus), that he knows of but one epistle of Paul to the Philippians; 11 2, that he regards 1 Cor. 6 2 as belonging to the instruction given by Paul to the Philippians, whilst we moreover meet with other traces of acquaintance with Pauline epistles. The inference lies to our hand: the plural form (*ἐπιστολαί*) in 3 2 is to be explained by the writer's intention of pointing to a group of epistles by Paul which his readers might read for edification, and the Philippians also might regard as written for them. A remarkable evidence indeed, not of the earlier existence of more than one epistle of Paul to the Philippians, but of the way in which in the

middle of the second century the group of Pauline epistles was regarded—not as a chance collection of private letters, but as one destined from the first for the edification of various churches.

After what has been said it is hardly possible to think of Paul as the writer of Phil.

7a. Author not Paul.

In itself considered it is possible indeed that the apostle should have written in the form of a letter to a particular church a composition which was in truth no real letter, but a writing designed for purposes of general edification. This is not impossible; but it is hardly at all probable. The same remark applies to the writer's method of borrowing one thing and another from extant 'Pauline epistles'—even if sometimes the borrowing amounts perhaps to no more than a slight unconscious reminiscence of what he had at some time read. Possible also, but still less probable, is it that he should have written in so impalpable a manner regarding his then surroundings—his recent vicissitudes, what might be awaiting him in the future, his relation to the community addressed, what was happening within it—and above all that he should write in so exalted a tone of himself as an 'example' whose sufferings are significant for them all.

What finally puts an end to all doubt is the presence of unmistakable traces of the conditions of a later period. Amongst these are to be reckoned in the first instance all that is vague and nebulous in the supposed historical situation, the firmly held conception of 'Paul,' his 'bonds,' his presence and absence. More particularly, everything that points to a considerably advanced stage in the development of doctrine. Christianity has freed itself from Judaism. 'Saints' may be called so, not because of their relation to the law, nor as children of Abraham, but in virtue of their standing 'in Christ Jesus' (1 1 4 21). Righteousness, or the fruit of righteousness, is attained not through the law but 'through Jesus Christ' (1 11, cp 3 9). Not the Jew but the believing Christian belongs to the true Israel (3 3).

It is no longer Jesus who is by preference spoken of—the expression occurs only twice (2 10 19) according to Tischendorf's text; usually it is 'Christ Jesus,' or 'Christ,' sometimes 'Jesus Christ.' God is in a special sense his father (1 2). His 'day' is spoken of (1 6 10 2 16), the righteousness obtained through him (1 11), the abundance that is had in him (1 26). He can be the subject of preaching (1 15 17 *f.*); *the* life (1 21); his spirit a stay for believers (1 19), and he himself glorified in the body of the apostle (1 20). In him is comfort (2 1), he is the highest object of human striving (2 21), whose work must be done (2 30), in whom alone can there be glorying (3 3), for whom everything may well be sacrificed (3 7), the knowledge of whom is worth all else (3 8), who lays hold of those who are his (3 12), in whom is the calling of God (3 14), to be hostile to whose cross is the saddest of all things (3 18), who is to be looked for from heaven as Lord and Saviour (3 20), who shall make us like unto himself (3 21), in whom we must stand fast (4 1), whose 'thoughts' (νοήματα) we must have (4 7), through whom or in whom God blesses us (4 19), whose grace may be invoked upon us (4 23), our Lord at whose name every knee must bow (2 10 *f.*), who came down from heaven, who was in the form of God and who humbled himself, became man, suffered and died, and was glorified above all (2 6-11).

The church already possesses its 'bishops and deacons' (1 1), its factions, its parties and schools (1 15 17 3 2), its good old times (1 5 2 12). The unity of the faith is in danger (1 27 *f.*, cp 2 2 *f.*), there is suffering on account of the faith (1 29 *f.*), there is an aiding of prisoners (2 25 30), with regard to which we find a testimony in Lucian's *De Morte Peregrini*.

In a word: all points back to an Old-Christian development that cannot at so early a date as 64 A.D., the assumed death-year of Paul, have attained to such a degree of maturity as we see it here possessing. Let it not be said, however, on this account, that the unknown writer who conceals himself behind the name 'Paul' or, if you will, 'Paul and Timothy,' was a forger or fraudulent person. Nothing gives us the smallest title to cast any such imputation on his character. He simply did what so many had done before him, and so many others were to do after his day; more from modesty than from any arrogance or bluntness of moral sense do such men write under the name of some one whom they esteem, in whose spirit they wish to carry on their labours, and under whose spiritual protection, as it were, they wish to place their literary efforts. The 'Paul' whom this author brings before his readers is the motive—indispensable or at least desirable—for glorying over against those who are accustomed to exalt themselves over well-known predecessors, as we learn from 2 Cor. 5 12.

7b. Real author.

The author himself lived at a later date; we know not where. Presumably in the same circle as that in which the 'principal epistles' had their origin, and not long after the production of these, probably in Syria or Asia Minor, about the year 125 A.D. In any case not earlier than the beginning of the second century and not later than the testimony of Polycarp already cited, dating from the middle of the century, or indeed, when we bear in mind Marcion's use of the letter, not later than 140 A.D. What we can securely infer from the epistle itself is no more than this; that it appeared after the 'principal epistles,' and in dependence on them, yet by another hand than any of those which we find at work there, as is shown by the divergences by which, notwithstanding many things they have in common, its language and style are distinguished.[1] Our author, like the writers of the 'principal epistles,' belonged to the Pauline school. Yet he was, so far as we can judge, less dogmatically inclined than these writers, or at least than the authors of Rom. and Gal.; rather was he one who directed his thoughts by preference to the practice of the Christian life. He knows well of conflicting tendencies and divergent schools and parties, yet he glides lightly over them and in the character of Paul unhesitatingly places himself above them all (1 18), if only his readers are obedient and adhere to that which has once been taught (2 12 3 16 *f.* 4 9). Questions of doctrine leave him unmoved, if only his readers will bear in mind the watchwords: struggle, ceaseless struggle (3 12-16); a walk in accordance with the gospel of Christ, in unity of the spirit (1 27); after the pattern given by Paul (*passim*, especially 1 21-26 2 17 *f.* 3 17 4 9-13), Timothy, Epaphroditus (2 19-30), and other Philippians of the good old days (1 3-11 4 10-18), only thinking the thoughts which were in Christ Jesus (2 5).

8. Value.

The historical as distinguished from the abiding religious and ethical value of this writing, even although it makes no contribution to our knowledge of the life of Paul, is not slight. It throws light for us upon the history of Paulinism and the course of this quickening practical movement within Christianity during the first half of the second century.

9. Literature.

Useful commentaries, though all written from the standpoint which accepts the genuineness as proved, are those of R. A. Lipsius (*HC*(2), 1892), Meyer-Haupt (1897), M. R. Vincent (1897), J. B. Lightfoot (1868, 1891), A. Klöpper, *Der Brief des Apostels Paulus an die Philipper* (1893). Valuable discussions will be found in F. C. Baur (*Paulus*(2), 2 50-88, 1867), Hoekstra (*Th. T*, 1875), Holsten (*JPT*, 1875-1876), Grimm (*ZWT*, 1873), Hilgenfeld (*ibid.*, 1873-1877-1884), J. Cramer (*Nieuwe Bijdragen*, 1879, 1-98); cp Holtzmann (*Einl.*(3), 1892, p. 266-272), S. Davidson (*Intr.*(3), 1894, 1 161-182), Zahn (*Einl.*(2), 1 369-400), Van Manen (*Handl.* 49-51).

[1] The divergences are best set forth by Hoekstra, *Th. T*, 1875, pp. 432-435 and Holsten, *JPT*, 1876, pp. 297 *ff.*, although in using either of these studies, one cannot escape the feeling that, throughout, both of these scholars have given too much weight to the dogma of the genuineness of the 'principal epistles.'

PHILIPPIANS (EPISTLES)

II. Polycarp's Epistle.

10. Polycarp's epistle : text.

The Epistle of Polycarp to the Philippians has long held a place, by universal consent, among the writings of the 'Apostolic Fathers.' Its title in that group according to Zahn (ed. Gebhardt-Harnack-Zahn, 1876, p. 110, also in the editio minor [3], 1900, p. 114), runs: *τοῦ ἁγίου Πολυκάρπου ἐπισκόπου Σμύρνης καὶ ἱερομάρτυρος πρὸς Φιλιππησίους ἐπιστολή*. In Lightfoot[2] (1889, pt. ii. vol. 3, p. 321) it is simply *πρὸς Φιλιππησίους*. Neither the longer nor the shorter title can be regarded as original. The epistle is now extant in its entirety only in a faulty Latin rendering by the same hand as that which translated the longer recension of the Ignatian epistles. We know the Greek text of chaps. 1-9 from nine MSS, which all go back to the same ancestor (*v o f g b c n s a*=G), and are usually called ἀκέφαλοι because they contain the Greek text of the acephalous 'Barnabas'—*i.e.*, of Barn. 5_7 (. . . *τὸν λαὸν κ.τ.λ.*)—21. Chap. 13 is found in Eus. *HE* iii. 36 $_{14\text{-}15}$.

11. Form and contents.

The work is in the form of an epistle written by 'Polycarp and the presbyters who are with him,' or by Polycarp alone, to the church of God at Philippi which had invited him to write the epistle (3_1 13_2), we are not told how or why. The 'presbyters' are mentioned as joint writers of the epistle only in the exordium; for the repeatedly recurring 'we' elsewhere does not necessarily imply them. 'Polycarp' speaks in chaps. 1-14 to 'brethren,' to whom his attitude is after the manner of 'Paul' in his epistles. He declares his joy at their friendly reception of Ignatius and his companions on their journey to Rome (1), gives some exhortations (2), declares that he cannot compare himself with Paul (3), gives directions and precepts for married women and widows (4), for deacons, youths (*i.e.*, laymen) (5), presbyters, himself and others (6). He warns against Docetism and exhorts to faithful adherence to the views that have been handed down (7). He points to the perseverance of Christ Jesus, the blessed Ignatius, Zosimus, Rufus, Paul and the rest of the apostles (8 *f.*), urges his readers to follow their example (10), laments the falling away of the former presbyter Valens and his wife, yet desires that they should be gently dealt with (11). He incites to the examination of the scriptures, to a holy walk, to prayer for others (12). He will take care, on the request of the Philippians and Ignatius (see Ign. *ad Pol.* 8), that letters should be sent to Antioch in Syria, and says a word in commendation of the epistles of Ignatius accompanying his own; also of Crescens, the bearer, and his sister (13 *f.*).

12. Polycarp the author?

The author of this epistle, according to tradition, was Polycarp, a disciple of the apostles, especially of John, who made him bishop of Smyrna, where about 166 or 167-168 A.D., he suffered martyrdom at an advanced age. The difficulties, however, in the way of our accepting this tradition are insuperable.

In the first place, it has to be asked what motive was there for Polycarp, the bishop of the church at Smyrna, to address such an epistle at all to the church at Philippi—with which so far as we can trace, he had nothing to do? What is said in 3_1 (cp 13_2) about the epistle having been invited is manifestly invention.

Further, we must not overlook that, though doubtless the writing gives itself out to be a letter, it is in reality nothing of the sort, but rather, in the author's own language, a treatise 'concerning righteousness' (*περὶ τῆς δικαιοσύνης*, 3_1, cp 9_1). The form is taken from the Pauline 'epistle,' on the whole coinciding most with that of the pastoral letters, or those of Ignatius, though also now and then showing affinities with the first Epistle of Clement to the Corinthians. Its dependence on all these continually strikes the eye.

Now, it is, in itself considered, certainly possible, yet at the same time it is not at all likely, that Polycarp, under his own name or as 'Polycarp and the presbyters that are with him,' should have written a treatise 'concerning righteousness' in the form of an epistle to the church at Philippi. Rather does it lie in the nature of the case that a third person should have made use of his name in this manner.

The same observation has to be made upon the circumstance that the writer, in the character of Polycarp, refers to the charge laid upon him by Ignatius. Ignatius himself, however, in his letter to Polycarp (8_1) had said that on account of his hasty departure from Troas for Neapolis he was no longer able to write to all the churches, wherefore he, Polycarp, must now instead send letters 'to the churches in front'—a fiction upon which the real Polycarp could hardly have proceeded, though for a third party this would have presented no difficulties. Or if it be held that we are not at liberty to speak of fiction in this connection because Ignatius had really said what we read in the passage cited above, how then could his friend Polycarp have passed over his words, have written a treatise in place of an epistle to the Philippians, and in the so-called letter assume the appearance of having written, not to please Ignatius, but because the writing had been called for by the persons addressed (3_1, cp 13_2)?

There are other difficulties also. The date of Polycarp's death is unknown.

The tradition that speaks of 166 or 167-8 as Polycarp's death-year rests upon some indications of Eusebius (*Chron.* and *HE* 4 14 *f.* 5 5 20), yet it appears to be inadmissible. The same authority, however, speaks (*HE* 3 36) of Polycarp not only as a contemporary of Ignatius and Papias, but also as already in the third year of Trajan (98-117) bishop of Smyrna and at that time in his full vigour. For this reason many scholars, such as Hase, Wieseler, Duker, Keim, Uhlborn, J. Réville, Rovers (*Th.T*, 1881, pp. 450-464), Killen, van Loon (*Th.T*, 1893, p. 312 *f.*), have during ever so many years not hesitated to use their freedom in this connection, and have assigned as the death-year of Polycarp various dates between 147 and 178; more particularly, however, many scholars since Waddington (1867)—such as Renan, Aubé, Hilgenfeld, Gebhardt, Harnack, Völter, Lightfoot, Zahn, and again Harnack (*ACL* 2 1 {1897}, pp. 325-9, 334-356—have fixed upon the year 155-6 as the date, basing their conclusion on what they read in the *Martyrium Polycarpi*, chap. 21. Unfortunately it is not possible to place reliance even on this passage. The purport of the supposed statement is uncertain; it requires a number of guesses to be made before it can be taken in the sense that is desired; and in the most favourable event yields a statement that stands and falls with the twofold, far from probable, view (1) that chap. 21 is an integral part of the main work, although it was still unknown to Eusebius and Jerome; (2) that the *Martyrium* itself is as old as it claims to be, and was written within a year after the martyrdom of Polycarp (see OLD-CHRISTIAN LITERATURE, § 14).

The oldest tradition we possess regarding the date of Polycarp is that given by Irenæus, who (*Adv. Hær.* 3 $3\text{-}4$, written about 180) speaks of him as one whom he had known in his earliest youth (*ἐν τῇ πρώτῃ ἡμῶν ἡλικίᾳ*), who at that time was bishop of the church of Smyrna, and of whose successors 'down to the present time' (*οἱ μέχρι νῦν διαδεδεγμένοι τὸν Πολύκαρπον*) he is able to speak. To what is said by Irenæus here and elsewhere, as also in the Epistle to Florinus wrongly attributed to him (see OLD-CHRISTIAN LITERATURE, § 25), Eusebius has nothing new of any consequence to add, beyond his indications as to the death-year in 167-8, which are certainly not to be accepted. Irenæus names no such year.

We should certainly not go very far astray if, in view of what Irenæus tells us about Polycarp, we were to seek his death about the middle of the second century. At that date the Ignatian letters, with which our present epistle is connected, had not yet been written (see OLD-CHRISTIAN LITERATURE, § 22), and thus the latter cannot have been the work of Polycarp.

It is of no avail to attempt—as some scholars have done, with Daillé (1666), and others with A. Ritschl (1857), Völter (1892), Meyboom (1897)—to meet these difficulties by assuming our present epistle to be greatly interpolated, so that in its original form it can still be regarded as older than the Ignatian Epistles. The

assumption of the many interpolations required finds no support in the MS tradition nor yet in the textual phenomena or in external testimony—as has been rightly pointed out by Zahn and Lightfoot among others.

The conclusion remains—notwithstanding Zahn and Lightfoot, who (albeit supported by Harnack) have not succeeded in proving the 'genuineness'—that our 'Epistle of Polycarp to the Philippians' is the work of an unknown hand, in the spirit of the epistles of Ignatius, though not, in view of the differences in style and language, by the same author, as a sequel to that group, and not, as has been conjectured, with the object of recommending them, or of controverting Docetism. The 'Pauline' epistles are much more strongly recommended (3 3) than the Ignatian (13 2); and the polemic against Docetism in chap. 7 comes too little into the foreground for us to be able to regard it as one of the main objects of the writing. The epistle is a well-meant, though by no means important, composition of the edifying order, made up in great part of borrowed words, and in no respect showing much independence, written after Polycarp's death about the middle of the second century, and before Irenæus, who (*Adv. Hær.* iii. 3 4) praised it as 'an able epistle' (ἐπιστολὴ ἱκανωτάτη) from which we can learn the manner of Polycarp's faith and how to preach the truth; probably, therefore, about 160 A.D.

13. Author unknown.

The best editions, with introductions and running commentaries, though from first to last dominated by the view that the work is really an epistle written by Polycarp and sent to the church at Philippi, are those of Theod. Zahn (*Ignatii et Polycarpi Epistulæ*, in *Patrum apostolicorum opera*, ed. Gebhardt, Harnack, Zahn, Fasc. ii. 1876) and J. B. Lightfoot (*The Apostolic Fathers:* ii. S. Ignatius, S. Polycarp, vol. i. and iii.(2), 1889). Cp Zahn, *Forschungen*, 4 (1891) 249-283, 'Zur Biographie des Polycarpus und des Irenæus'; Harnack, *ACL* 1 (1893) 69-74, on the transmission of the text, and *ACL* ii. 1 (=*Chronologie*, 1897) 325-9, 334-356, 381-406 on Polycarp's person, his death-year, and the genuineness of the epistle; G. Krüger, *Gesch. d. altchristl. Litt.* 1895, p. 17 *f.*; G. Uhlhorn, *PRE*(2), *s.v.* 'Polykarp'; Waddington, 'Mém. sur la Chronol. de la vie du rhéteur Ælius Aristide' in *Mém. de l'inst. imp. de la France*, t. xxvi., 1867; J. Réville, *De anno dieque quibus Polycarpus Smyrnæ martyrium tulit*, 1880; Rovers, *Th.T*, 1881, pp. 450-464 ('De marteldood van Polycarpus'); W. D. Killen, *Anc. Church*, 1883(4); van Loon, *Th.T*, 1893, p. 312 *f.*; Van Manen, *Handl. d. Oudchrist lett.*, 1900, pp. 82-84. W. C. v. M.

PHILISTINES

1. Name. Philistines is the name of a people whose territory in the time of the Israelite kingdoms adjoined that of Israel on the SW. and separated Judah from the sea.[1]

פְּלִשְׁתִּים, *pĕlishtīm* (seldom with the article), rarely פְּלִשְׁתִּיִּים, *pĕlishtiyyīm*; sing. פְּלִשְׁתִּי; פְּלֶשֶׁת, *Pĕlésheth*, the country, or its inhabitants collectively, appears—so far as OT usage goes—to be a poetical back-formation from פְּלִשְׁתִּי, *Pĕlishtī*, 'Philistine,' taken naturally as a gentile adjective;[2] 𝔊 in the Hexateuch—also Ecclus. 46 18 47 7 50 26 1 Macc. 3 24 and cod. B in Judges—Φυλιστιειμ, occasional variant Φιλιστιειμ, elsewhere 𝔊 ἀλλόφυλοι;[3] Aq. Symm. Φυλιστιαῖοι; Jos. Παλαιστῖνοι; Vg. *Philisthiim*, *Philistini*, *Palæstini*.

[1] [On certain questions raised in other articles, such as the possibility of a confusion between the rightful possessors of the name *Pĕlishtīm* and a people with whom the Israelites were in frequent relation, dwelling in N. Arabia and especially in the NEGEB (*q.v.*), and called properly *Ṣārĕphāthīm* or *Jeraḥme'elim* see *Critica Biblica*, and for the data on which in other articles frequent emendations of MT have been proposed, leading up to new views of Israelitish history see a series of articles in the present work, especially SAUL; cp also JERAHMEEL, § 4, LAMENTATIONS, OBADIAH, PELETHITES, PSALMS.]

[2] Possibly a poetical archaism; cp Assyr. *Palastu. Pilistu.*

[3] On the usage of ἀλλόφυλος in Greek and the significance of this rendering in 𝔊, see Stark, *Gaza*, 67 *ff.*, Rel. *Pal.* 75 *f.* In the age of the translation the hellenised population of the seaboard were in a peculiar sense 'aliens' to the Jews; cp Is. 9 11 [12], where 𝔊 gives Ἕλληνες. The hatred expressed in Ecclus. 50 26 is not a mere reminiscence of ancient wrongs, as the deeds of the Maccabæan time prove. The translation ἀλλόφυλοι is therefore not an etymological attempt on the name פלשתים or פלתי, as has sometimes been surmised, nor does it preserve the historical memory that the Philistines were of a different (non-Semitic) race. An ancient etymology is found in *Onom. Vatic.* (Lagarde, 200 99), θαυμαστοί (פלא).

The Philistine country at this period embraced the maritime plain from somewhere near Joppa in the N. to the desert S. of Gaza, a district about 40 m. in length; the line of low hills between the plain and the Judæan highlands, with the broad valleys running inland, was debatable ground between Philistines and Israelites (see below, § 13); the boundaries—except on the S., where they are fixed by nature—shifted at different times (see GASm. *HG*, chaps. 9 *f.*). To this country the name *Palæstina*, properly equivalent to Philistia, and so used in AV (**Palestina:** Ex. 15 14 Is. 14 29 31), was first applied by the Greeks; in a less precise use it was, however, early extended to the hinterland as far as the Jordan, thus including Judæa (see Rel. *Pal.* 38 *ff.*; Stark, *Gaza*, 58 *f.*).

2. Country.[1] The southern part of the maritime plain is level or gently undulating, with a rich soil, well-watered, and nearly all capable of cultivation. Between the plain and the steep western slope of the Judæan plateau, separated from the latter by a series of longitudinal valleys, is a curving line of hills, rarely rising to an elevation of 1000 ft., cut through in three or four places by wide valleys which run to the very foot of the mountains of Judah, whence a defile ascends to the central highland. The coast from Carmel to Gaza, a line of sandhills and cliffs from 30 to 100 ft. high, is without a natural harbour even for small vessels; the cities near the sea (Gaza, Ashkelon, Ashdod, Joppa, Dor) provided themselves for their need with such havens (μαιουμᾶς) as they could, but never rivalled the Phœnicians in commerce or sea-power. One of the world's great thoroughfares of land traffic, however, traversed the country. At Gaza the road from Egypt, through the desert and the roads from Arabia over which were brought the products of Yemen and yet more distant climes met; thence led N. along the coast the route to Phœnicia, Syria, and the East. The position of Gaza gave it also great political and military importance (see GAZA).

There can be no doubt that this part of the coast was settled and civilised at a very remote time. The Amarna despatches (about 1400 B.C.) by their very form prove that, with the whole of Western Syria, it had been, at an earlier period, for many generations under the influence of Babylonian culture, and doubtless under Babylonian dominion. The Pharaohs of the eighteenth dynasty included it in their empire as part of the district which in their inscriptions is called *Ḫaru* (Ḥōr), and some of its cities are repeatedly mentioned on their monuments as well as on those of their successors (see WMM, *As. u. Eur.* 148 *ff.*) In the Amarna despatches we find the names of Gaza, Lachish, Ashkelon, Gath, Gezer, Jabneel, Joppa, Aijalon, and other cities. The inhabitants belonged—as names of places, persons, and deities, as well as expressions and idioms in the correspondence, prove—to the stock which we call comprehensively Canaanite.

In Dt. 2 23, in a catalogue of the former populations of Palestine and its neighbour lands, an antiquarian author tells us that the Caphtorim (*i.e.*, Philistines, see below, § 4) exterminated the AVVIM (עַוִּים, 𝔊 Εὐαῖοι) who dwelt in villages as far as Gaza; and Josh. 13 3 includes the Avvim with the five tyrants of the Philistines as occupants, at the time of the Israelite settlement, of the southern end of the maritime plain 'which is reckoned to belong to the Canaanites.' The author apparently does not regard the Avvim as Canaanites; whether they were an historical people, or, like the giant Rephaim in the land of Ammon (Dt. 2 20), a legendary race,[2] can hardly be determined.

[1] See GASm. *HG* 148 *f.* 201 *ff.*

[2] So, *e.g.*, Bertheau, *Zur Gesch. d. Israeliten*, 142.

Hebrew tradition preserved the memory of the fact that, like the Israelites and the Aramæans, the Philistines were immigrants or invaders in historical times. They came, according to this tradition, from Caphtor (Am. 9 7, cp Dt. 2 23).[1] In both ancient and modern times there has been wide divergence of opinion as to the country intended by this name—Cappadocia, the Egyptian delta, Cyprus, Crete.[2] The question can be settled only by other evidence about the origin of the Philistines, and fortunately such evidence is not altogether lacking. From the monuments of Rameses III. we learn that in his eighth year he carried on a campaign in Palestine against foes who had invaded Syria from the N., overwhelming the kingdoms which lay in their path:[3]

3. The Philistine invaders.

'No country,' we read 'could withstand their arms—Ḥeta, Kode (the coast N. of Arvad), Carchemish, Arvad, nor Alashia. The invaders annihilated them, and all encamped in the heart of Amara' (*i.e.*, the region of the southern Lebanon and the Bikā', on the borders of territory which acknowledged the dominion of Egypt). 'Their main force was made up of Purusati, Ṯakkara (pronounced, perhaps, Zakkara), Shakrusha, Dano (elsewhere Danona), Vashasha'; in another text the Shardana also (who probably came by sea) are named. The Pharaoh marched against them into Palestine; he commemorates in reliefs as well as inscriptions a battle on both land and sea,[4] in which he gained a great victory over the invaders. The scene of this battle at the 'Tower of Rameses III.' is not certainly known; it seems clear, however, that it was in Palestine or Phœnicia (De Rougé, Brugsch), not on the coast of the Delta (Chabas and many after him); Müller (*As. u. Eur.* 177 *f.*) locates it on the Phœnician coast; Maspero (*Struggle*, 466 *f.*; cp 470, n. 4) somewhat farther S., possibly at the mouth of the Belos, in the Bay of Acre, or in the vicinity of Turris Stratonis.[5]

The Purusati were manifestly the leading people among the invaders; they are always named in the first place, and sometimes alone. Champollion recognised in the name *Purusati* the *Pĕlishtīm* of the OT, and the identification of the names has been accepted by an increasing number of Egyptologists and biblical scholars.[6] It is formally unimpeachable; the Egyptian *r* in proper names often represents a foreign *l*, a sound which the Egyptian language did not possess. Historically, also, as we shall see, the combination has a very high degree of probability (see § 8, and cp CAPHTOR).

Purusati is then the national name of this people (observe also the regular anarthrous use in OT). Therewith the etymologies which derive the words פְּלִתִּי פְּלִשְׁתִּים from a Semitic root (Eth. *falasa*, migrate, emigrate, wander abroad; *felāsate*, migration, wandering; *falāsī*, sojourner, foreigner; cp Arab. *falaṣa*, *falata*, Heb. *pālaṭ* [Ges., Movers, Stark, and many]), assuming that the name was given to these immigrants by an indigenous Semitic people (Canaanites or Hebrews), fall to the ground; and formal objections, though of themselves decisive, may be waived.[7] On other etymological conjectures, see below, § 4.

In the representations of these peoples on the monuments we find peculiarities of garb, armour, and type of feature which, by the aid of other monuments, we recognise as distinctive of the populations of the southern coasts of Asia Minor and the islands of the Ægæan.[8] This is confirmed by the names of these 'sea peoples' so far as they can with any confidence be identified; in particular instances the identifications may be questioned; but several of them are seemingly beyond dispute, and the concurrence cannot be fortuitous.

4. Whence did they come?

De Rougé saw in the Ruku of Merneptaḥ the Λύκιοι; his Akayvaš may perhaps be 'Αχαιϝοι; Danona has been combined with Δαναοί, the Ṯakkara with Τευκροί—the last very improbably.[1] At an earlier time Lycians, Ionians, Dardanians, Sardinians, Tyrsenians, appear among the foes of the Egyptians as mercenaries or as pirates.[2] The Cherethites of the OT are not improbably islanders from Crete, as 𝔊 in the prophets understands (see CHERETHITES); the connection of the Cherethites with the Ṯakkara (CAPHTOR, § 2) is phonetically impossible (Müller, *MVG* 5, n. 2). The attempt to connect the name *Pĕlištīm* with Πελασγοί (Hitzig, *Urgesch.* § 22 *f.*), or with the Πενέσται in Thessaly (Hitzig, *GVI* 1 38; see Kneucker, *BL* 4 542) requires no discussion. Renan traces to the Philistines some European words very early naturalised in Hebrew such as *parbār* (περίβολος), *mĕkērāh* (Gen. 49 5, μάχαιρα), *pīlegeš* (*pellex*), *liškāh* (λέσχη), *kaphtōr* (*capitul*; *Hist.* 1 157 *f.*; cp 2 33).

The southern coast of Asia Minor is called in the Egyptian inscriptions Keftō,[3] a name which we are thus warranted in connecting with Caphtor, whence, according to Hebrew tradition, the Philistines came.[4] A form still more closely approximating to Caphtor occurs in a catalogue of African and Asiatic names with which the walls of a temple at Ombos are decorated—viz., *Kptār* (Sayce, *Crit. Mon.*[(2)] 13, WMM, *MGV* 5 *f.*). The material of these lists, compiled in the last century B.C., is taken from older sources; no principle of order is observed, and the position of the name gives no further clue to the situation of Caphtor. That in the ethnographical table (8th cent.) in Gen. 10 (*v.* 14) the Caphtōrīm are set down as descendants of Miṣraim-Egypt can no more be used to determine the position of Caphtor than to establish the ethnic affinities of the people; the Caphtōrīm are here simply the Philistines of the author's time, whose dependence upon Egypt is expressed in the familiar genealogical scheme, just as in P's table the intimate political and commercial relations of the Canaanites to Egypt are expressed by making Canaan a brother of Miṣraim.

To what race the Purusati and their allies belonged is again a question upon which the monuments cast some light. The Egyptian artists manifestly meant to represent the sea peoples as distinct from the Semitic populations of Palestine and Phœnicia in complexion and physiognomy as well as in civilisation; their traits differ hardly less from the Ḥeta, and resemble those of peoples whom we have good reason to regard as European. Their armour also is of a Western type (WMM, *As. u. Eur.* 362 *ff.*; *MVG* 11 *f.*).

5. Of what race?

The evidence of language unfortunately fails us. The names of the peoples which took part in the invasion have been referred to above (§ 4); no personal names of kings or chiefs occur in the Egyptian inscriptions.[5] In the OT not only are the names of places in Philistia—as we should expect—native, that is, Canaanite (see above, § 2), but also, with very few exceptions, the names of persons who figure in the story as Philistines. The same is true of the names in Assyrian inscriptions. To infer from this, as has sometimes been done,[6] that the Philistines were *ab origine* a Semitic race is unwarranted; the utmost that the facts prove is that they early adopted the language of the country in which they settled (see below, § 12). Almost the only certainly Philistine proper name in the OT is Achish (אָכִישׁ, Αγχους, Ακχους) king of Gath in the time of David and Solomon

1 In Jer. 47 4 (=29 4 𝔊), *Caphtor* is not in 𝔊. In Gen. 10 14 the gloss, 'whence proceeded the Philistines,' was probably meant to be attached to *Caphtorim* rather than to *Casluḥim* as in the present text.

2 See CAPHTOR; Stark, *Gaza*, 75 *ff.*; Dillm. on Gen. 10 14.

3 See WMM, *As. u. Eur.* 359 *f.*; *MVG* v. (1900) 1 32 *ff.*; Maspero, *Struggle of Nations*, 465 *f.*

4 See, however, WMM, *As. u. Eur.* 177 n.: the inscription would seem to imply that the two engagements were distinct.

5 The brief statement of Justin (xviii. 3 5) that the Sidonians, driven from their city by a king of the Ascalonites, founded island-Tyre (1209 B.C.) has often been thought to refer to the invasion or early conquests of the Philistines. See Movers, *Phönizier*, ii. 1 315 *f.*; Stark, *Gaza*, 155; WMM, *As. u. Eur.* 388; *contra*, Winckler, *GI* 1 223.

6 See Maspero, *Struggle of Nations*, 463, n. 1.

7 Against the whole theory see Hitzig, Kneucker, etc.; most recently WMM, *MVG* v. (1900) 1 3 n.

8 See WMM, *As. u. Eur.*, chaps. 26-29; *MVG* 9 *ff.*; Maspero, *Struggle*, 461 *ff.*

1 See De Rougé, *Revue archéologique*, new ser., 16 31-45 81-103 (1867); Maspero, *Struggle*, 464, n. 3; WMM, *As. u. Eur.* 357, 368; cp *MVG* 3.

2 WMM, *As. u. Eur.* 369 *ff.*

3 See WMM, *As. u. Eur.* 337 *ff.*; especially *MVG* 9 *ff.*, where it is shown that this name is not applied to Cilicia alone.

4 On this point see the new evidence adduced by Müller, *MVG* 6 *ff.*

5 The ruler of Dor in the Papyrus Golenischeff is Bidir.

6 See especially Schwally, 'Die Rasse der Philistäer,' *ZWT* 34 103 *ff.* (1891).

(1 S. 21 10 [11] *ff.* 1 K. 2 39 *f.*),[1] with which we may compare Ikausu king of Ekron in the seventh century (in inscriptions of Esarhaddon and Ašur-bāni-pal; *KB* 2 148 240) and Ekašo in a recently published Egyptian text, containing names from Kefto.[2] The title *sěren* (סֶרֶן), used in the phrase the 'five *lords* of the Philistines' (see below, § 12), is probably a word of their own language, and may be connected with *τύραννος*, by which it is rendered in the Targum and the Peshitta.[3]

Another fact which is not without a bearing on the question of the origin of the Philistines is that they did not practise circumcision (1 S. 18 25 *ff.*): in the older historical books of the OT (Judges, Samuel) the opprobrious epithet 'uncircumcised' (עָרֵל) is applied only to them (Judg. 14 3 1 S. 17 26), and is repeatedly used alone as a self-evident equivalent of 'Philistine' (Judg. 15 18 1 S. 14 6 31 4, especially 2 S. 1 20).[4] This usage shows that they differed in this respect from the other neighbours of Israel in that age (cp Jer. 9 25 [24] *f.*); it may with some confidence be inferred that the Philistines were neither Semites nor Egyptians.[5] The 'sea-peoples' of Merneptah's monuments were uncircumcised,[6] and the same may safely be affirmed of their successors in the time of Rameses III. among whom the Purusati appear.

If the opinion that the Philistines came from southern Asia Minor and the regions beyond be correct, we shall not think of their appearance in Palestine as the irruption of a horde of barbarians. Their homes lay within the sphere of that ancient Ægean civilisation which researches on the continent and the islands have brought to light in our own time. The vases and other products of the art of Keftō depicted in the tomb of Rekhmirē' give evidence that its inhabitants were not inferior in taste or skill to those of Western Asia Minor and Greece in the 'Mycenæan' age (see WMM, *As. u. Eur.* 347 *ff.*). Recent excavations in Crete have added greatly to our knowledge of this civilisation; and it is not unreasonable to expect that from them some fresh light may fall on the problems of these paragraphs.[7]

6. Not barbarians.

What we learn of the Philistines from the OT gives no ground for the common opinion that they were merely warlike barbarians. The rapidity and permanence of their conquests, their political organisation and administration, may fairly be urged on the other side.

7. Time of invasion.

We have seen (§ 3) that the Purusati first appear on the Egyptian monuments in the reign of Rameses III. (see below, § 8; WMM, *MVG* 35). From his inscription we learn that they had already conquered all northern Syria W. of the Euphrates. There is good reason to believe that the Hittite empire, which even in its decadence must have been a considerable power, was broken up by them.[8] It is not likely that this was the work of a single year, nor that the Pharaoh intervened at the first appearance of the invaders (see WMM, *MVG* 32 *f.*). What were the immediate results of the successes of which Rameses boasts we cannot say;[1] in his twelfth year he was again engaged in a campaign against Amara; the later years of his reign passed in peace. Under his feeble successors the Egyptian possessions in Syria were lost; a century after Rameses III., the king of Byblos boasts that neither his father nor his grandfather had been subject to the Pharaoh. In this period the Philistines and their allies must have established themselves in Palestine; for the last years of the 20th dynasty an Egyptian official, Wen-Amon, who touched at Dor on his way to Phœnicia, calls it a city of the Ṭakkara (see above, § 3), and his report makes the impression that they had been for some time settled there.[2]

This date (12th cent. B.C.) agrees well with the indications of the OT history, where the Philistines appear in the half century preceding the establishment of Saul's kingdom as invaders of districts long occupied by Israel (Movers, *Phön.* ii. 1 315 *f.*; cp Ewald *GVI* 1 348 *ff.*); the necessity of a united defence against them was, indeed, the cause of the kingdom (1 S. 4 9 16; see further below, § 9). The story of Samson represents them a generation earlier as in full possession of the maritime plain and the valleys of the Shĕphēlah, and ruling over Judah (Judg. 13-16, cp 10 7).[3] It has often been surmised that the migration of the Danites (Judg. 18) was occasioned by the conquests of the Philistines who, if they did not themselves dispossess the tribe of its settlements in the lowlands, pressed the Canaanites back upon them (Judg. 1 34 *f.* Josh. 19 47).

The references to Philistines at a much earlier time must be regarded as anachronisms. The ruler of GERAR [*q.v.*] in the time of Isaac is called in Gen. 26 (J) 'king of the Philistines;'[4] in Gen. 21 (E) also, where the same story is told of Abraham, the king is supposed to be a Philistine (see *vv.* 31 34). The name of the king, Abimelech, however, is Canaanite (cp Abimilki, of Tyre, in the Amarna despatches). The Amarna despatches (about 1400 B.C.) and the monuments of Rameses II. (about 1340-1273) recording his Syrian campaigns prove conclusively that the Philistines had not yet appeared in Palestine. All that Gen. 21 26 shows is that Gerar lay in territory which, at the time the legends arose, was subject to the Philistines.[5] In Ex. 13 17 (E) 'the Philistine route' is a natural way for the author to describe the direct road from Egypt to Canaan, but cannot be taken as evidence that at the date of the Exodus the Philistines were already in their later seats. A like observation may be made about Josh. 13 3. The ode of triumph, Ex. 15 14, is from too late a time to be taken as evidence to the contrary (see EXODUS, § 6).

8. The conquest.

What set the Purusati and their confederates in motion we can only uncertainly conjecture. From the fact that they appear on the monuments of Rameses III. accompanied on land by their wives and children, who, together with their effects, are transported in carts drawn by oxen (see Maspero, *Struggle*, 462; WMM, *As. u. Eur.* 366), their movement has generally been regarded as a true migration, whole tribes leaving their homes in a venture of new fortunes (so, *e.g.*, E. Meyer, *GA* 1 317), and it has been conjectured that the pressure of the great northern 'Völkerwanderung' which brought the Phrygians into the central table-land of Asia Minor thrust out before it the peoples nearest the sea or the confines of Syria (Maspero, *Struggle*, 461 *f.*). Others have thought that the invaders were not migrating tribes but soldiers by trade—mercenaries to-day, robbers to-morrow—who after the manner of their kind in later times carried their homes with them (WMM, *As. u. Eur.* 360 *f.*). Some of them, or of their kinsmen, had served in the armies of the Hittites in their wars with

[1] Other names commonly regarded as Philistine are PHICHOL (פִּיכֹל, Gen. 21 22 26 26), MAOCH (מָעוֹךְ, 1 S. 27 2), ITTAI (אִתַּי, 2 S. 15 19 18 2, etc.), GOLIATH (גָּלְיָת, 1 S. 17). See the special articles.

[2] WMM, *As. u. Eur.* 389 n.; *MVG* 8 *f.* The connection of Achish with Anchises suggested itself to the adherents of the Pelasgic hypothesis (Hitzig, Kneucker).

[3] Klostermann on 1 S. 5 8; WMM, *MVG* 12. Others, regarding *sěren* as a Semitic word, consider it a dialect equivalent of Hebr. *sār*; or connect it with *sěren*, 1 K. 7 30, 'axles.'

[4] If in Herod. 2 104 the people of the coast are meant—not merely the Jews, as is possible—it would only prove that they had fallen into the custom of their neighbours in later times.

[5] See CIRCUMCISION, § 3. It is remarkable that Gen. 34 assumes that the inhabitants of Shechem were uncircumcised; cp, however, Josh. 5 2 *ff.*

[6] See (against Brugsch) WMM, *PSBA* 10 147 *ff.* (Jan. 1888); *As. u. Eur.* 357 *f.*

[7] The surmise has been hazarded—somewhat prematurely—that the Philistines brought with them the Cretan linear script, from which the 'Phœnician' alphabet was developed.

[8] See E. Meyer, *GA* 1 319; Maspero, *Struggle*, 466; WMM, *MVG* 35.

[1] Maspero's opinion (*Struggle*, 470; cp 466, n. 3) that the prisoners taken by the Pharaoh in the war against the Purusati and their allies were planted by him in the Shĕphēlāh and at Dor is highly improbable.

[2] Papyrus Golénischeff; see Golénischeff, *Recueil de Travaux*, 21 74 *ff.*; Erman, *ZÄ* 38 1 *ff.*; WMM, v. 1 19 *ff.*

[3] The exploit of Shamgar (Judg. 3 31) properly stands after the story of Samson, as in many MSS of 𝔊.

[4] The title is a parallel to 'Jabin king of Canaan,' Judg. 4 2.

[5] According to Gen. 21 34 this was the case with Beersheba also; but this redactional verse conflicts with *v.* 32.

Rameses II. (WMM, *l.c.*, 354 *ff.*); and they had now perhaps discovered the weakness of the decadent empire. Their successes opened to them new fields of conquest and plunder, and brought them at last to the very doors of Egypt.

It is certain, at least, that they did not long occupy the old Hittite territory, and left no permanent traces there. In the early years of Rameses III. they were in force in the southern Lebanon or perhaps even in Galilee. A hundred years later we find the Ṭakkara established at Dor, on the coast south of Carmel (see above, §§ 3, 7). Their allies, the Purusati, had kept the advance; the maritime plain farther south was in their hands; the Cherethites occupied a region farther inland, in the Negeb. The first movement probably followed the coast, where their sea force could co-operate with them. Soon, however, they extended their conquests to the interior, and we may be sure that it was not the hills of Judæa that first attracted them, but the Great Plain and the rich and flourishing Canaanite cities which stood at so many avenues of entrance into it, from Jokneam and Megiddo to Beth-shean, for an attack upon which Dor on the coast might well serve as a base. When, at the end of Saul's reign, we find Beth-shean—commanding the descent to the Jordan valley and the great East road—in the hands of the Philistines (1 S. 31 10), we may safely assume that the cities between it and the coast plain had not been left in peace to their native rulers.[1] The brunt of the invasion thus fell at the outset on the Canaanites; and that the blow was severe may be inferred from the fact that when the Philistines were forced to relinquish them, these cities passed seemingly without a struggle into the power of Israel (see below, § 11).

This conception of the course of Philistine conquest finds support in the fact that the earliest invasion of the territories of the Israelite tribes of which we have historical testimony (1 S. 4) was by way of Aphek in the plain of Sharon (see APHEK), not by the southern valleys. The Ephraimite peasants made a poor stand at Eben-ezer against these formidable warriors; the Ark of Yahwè was captured; and, seemingly by one victory, the whole of the central highlands came under Philistine supremacy.[2] Judah was probably subdued about the same time. The conquerors established posts throughout the land, where a Philistine officer (*nĕṣīb*), probably with a few soldiers, collected imposts and kept watch upon the doings of the inhabitants, very much, we may suppose, as did the Egyptian officials in Palestine in the days of Amenophis III. and IV., whose reports were found in the archives of Tell el-Amarna (so at Gibeah in Benjamin, 1 S. 10 5 13 3 *f.*; at Bethlehem, 2 S. 23 14). At any symptom of revolt a larger force was sent to punish the attempt by plundering the land and laying it waste (1 S. 13 17 *f.* 14 15). So firmly established was their power that Hebrews served in their armies even in such *razzias* against their own countrymen (1 S. 14 21), as David came near doing at a later time (1 S. 29).

9. Subjection of Israel.

Saul and Jonathan, at the head of a small body of tribesmen, took up arms against their masters; the daring exploit of Jonathan and his armour-bearer led to a general rout of the Philistine punitive expedition which was operating from Michmash (1 S. 14); but the victory was not followed up (14 36-46). A battle in the Valley of Elah (probably the modern Wādy es-Sanṭ; see ELAH), near Socoh, is famous in story as the scene of the single combat of David with Goliath, the giant of Gath, 1 S. 17 (see GOLIATH). We are told that 'there was sore war against the Philistines all the days of Saul' (1 S. 14 52); but few particulars are given us (see ISRAEL, §§ 13 *ff.*, SAUL). David, who distinguished himself as the leader of a partizan corps in this struggle (1 S. 18 19 8), and still found opportunities, in the free-booter's life which he led in the south after his breach with Saul, to deal a blow to his people's foes (1 S. 23), was in the end constrained by the persistent enmity of Saul to go over to Achish, the Philistine king of Gath, in whose contingent he, with his six hundred followers, appeared at the rendezvous of the Philistine armies at Aphek at the opening of the campaign in which Saul lost his life, but was turned back by the suspicions of the council of chiefs (1 S. 28 1 *f.* 29). The Philistines entered the Great Plain probably by the way of Dothan and struck the army of Saul near Jezreel; the Israelites, dismayed perhaps by the chariots, fell back to Mt. Gilboa, and, in the battle which followed, the Philistine archery decided the day; Saul and three of his sons were slain (1 S. 31). The decisive victory made the Philistines again absolute masters of all central Palestine; the Israelites in the plain and the Jordan valley fled from their towns (1 S. 31 7); Abner, Saul's cousin and marshal, established ISHBAAL (*q.v.*), the only remaining son of Saul, at Mahanaim in Gilead (2 S. 2 8), where he reigned for a few years, perhaps as a vassal of the Philistines.[1] A new kingdom was erected in Judah over which David became king (2 S. 2 1-4). Since this was accomplished without interference from the Philistines, it is safe to assume that it was with their consent, and—as a consequence—that David ruled in Hebron as a Philistine vassal, as he had previously held Ziklag as a feof from Achish (see DAVID, § 6). The elevation of David was resented by Saul's house; the Philistines doubtless saw no reason to intervene in the quarrel. The opinion, based on 2 S. 2 9, that Abner reconquered for his master from the Philistines the highlands of Ephraim[2] is not reconcilable with the well-attested facts.[3]

10. Time of Saul.

When David, after the assassination of Ishbaal, raised his ambition to a national kingdom of all Israel (2 S. 5), the Philistines immediately invaded Judah to chastise their rebellious subject, moving up the valley of Rephaim. There David, who at the news of their approach had taken refuge in his mountain fortress ('the HOLD,' 1 S. 22 4 *f.*, etc.), attacked them at Baal-perazim and routed them so completely that they left their gods in the field (2 S. 5 17-21). A second engagement in the same valley had a similar issue, David pursuing the retreating foe as far as Gezer (2 S. 5 22-25). Incidents of other conflicts are related in 2 S. 21 15-17 18 19-22 (cp 1 Ch. 20 4 *ff.*); and the roll of David's brave comrades in 2 S. 23 8 *ff.* preserves the memory of many daring deeds in battle with the Philistines (see DAVID, § 7); but, taking it all together, we find far less about this war of independence than, in view of the comparative fulness of our information concerning David and his reign, we should expect. In 2 S. 8 1 a deuteronomistic editor tells us that David defeated the Philistines and subdued them (cp Judg. 4 23); unfortunately the more specific statement in his source has been transmitted to us in a corrupt text: 'the bridle of the metropolis'—if it be legitimate to render thus [cp METHEG-AMMAH]—which David is said to have taken from the Philistines, is a most improbable expression for 'the hegemony,' even if the latter were itself intelligible in this connection. The parallel passage in 1 Ch. (18 1) has 'Gath and its dependencies,' which may be substantially right (see DAVID, *l.c.*).

11. Of David.

There is much probability in the surmise that the liberation of Israel from the Philistine yoke was not achieved by its own unaided efforts. Egypt about this time began to reassert its dominion over Palestine, and first of all, necessarily, over the Philistine plain. We have, indeed, only indirect evidence of this; but

[1] 1 S. 31 7, where Klostermann, Budde, and Smith emend the text ('in the *cities* of the plain'; 1 Ch. 10 7 'in the plain'), can hardly refer to the strongly fortified cities.

[2] The story of Samuel's crushing defeat of the invaders and its results (1 S. 7 5-14) is a pragmatic fiction which is contradicted by the whole history of the period.

[1] Kamphausen, *ZATW* 6 44 (1886).

[2] Ewald, *GVI*(3) 3 154; Ed. Meyer, *GA* 1 361; Köhler, *Bibl. Gesch.* 2 246; Wellhausen, *IJG*(2) 1 58.

[3] See Kamphausen, *ZATW* 6 44 *ff.* (1886); Stade, *GVI* 1 260; Kittel, *Hist.* i. § 43.

it is convincing. The list of Shoshenk's conquests in Palestine in the reign of Jeroboam does not include any of the Philistine cities; it seems impossible to understand this in any other way than that this part of the country had been previously subjugated. The capture of Gezer, 1 K. 9 16, also implies that the cities farther south had been already subdued by the Egyptians (see WMM, *As. u. Eur.* 389 *f.*, *MVG* 38 *f.*). The Philistines, thus forced to defend their own territory, must have given up the attempt to resubject the Israelites. The relations of David to the Philistines after his independence was achieved seem to have been uniformly friendly; his bodyguard was recruited from among them (see CHERETHITES AND PELETHITES); and in Absalom's revolt not only was this corps faithful to the king but besides them six hundred men of Gath were in David's service, their colonel, Ittai, commanding one of the three divisions in the battle in which Absalom fell. The Egyptian conquest seems to have ended the Philistine peril to Israel; the Phœnicians probably at this time recovered Dor, the Israelites fell heir to the cities along the Great Plain (1 K. 4 12);[1] henceforth we find the Philistines only in the southern half of the maritime plain, between Gaza and Joppa. It is not true, however, that this region was included in the empire of Solomon as has sometimes been erroneously concluded from 1 K. 4 21 [5 1] (MT, cp 𝕲 246*b*, also 2 Ch. 9 26), and from 1 K. 4 9.[2]

12. Civilisation. The Philistine invaders were conquerors of an alien race, who were doubtless numerically a small minority among the peoples they had subjected; and, as so often in similar cases, the vanquished gave laws to the victors. Of whatever stock and speech the invaders may have been, in Palestine they very soon adopted the language of the country; the Philistine names in the OT and the Assyrian inscriptions are, as has been observed above, almost without exception Semitic—specifically, Canaanite. The Philistines worshipped the gods of the country, also. DAGON (1 S. 5 Judg. 16 23 *ff.*) was not the national god of the invaders but a Semitic deity who had long been worshipped in Palestine; Astarte (1 S. 31 10; see ASHTORETH) and BAAL-ZEBUB (2 K. 1 2 *f.*) are Canaanite divinities. Of the religion we know little beyond this. They had temples (1 S. 5 31 10 Judg. 16); Herodotus (1 105) heard that the temple at Ashkelon was the oldest seat of the worship of Aphrodite Urania. There were images in the temples (1 S. 5 1 *ff.*), and they carried idols with them into battle (2 S. 5 21), as the Israelites carried the ark; the oracle of Baal-zebub at Ekron was highly reputed in the ninth century (2 K. 1 2); their soothsayers were famous (Is. 2 6). Priests and worshippers on entering the temple of Dagon at Ashdod were careful not to set foot on the threshhold (1 S. 5 5; cp Zeph. 1 9).

Politically, the five chief Philistine cities, ASHDOD, GAZA, ASHKELON, GATH, EKRON (1 S. 6 17; see also Josh. 13 3 Judg. 3 3), which had not improbably been settled by different tribes, formed a confederation. Ashdod seems to have been at first the foremost city of the league; it is named first in the oldest list of Philistine cities (1 S. 6 17); in the temple of Dagon in Ashdod the ark of Yahwè captured at Ebenezer was deposited (1 S. 5). This pre-eminence was probably due to political causes, such as the settlement of the leading Philistine tribe, or perhaps the choice of Ashdod as the meeting-place of the council of chiefs. The situation of Gaza, the key of Syria both commercially and strategically, could not fail in time to give it the advantage (cp Josh. 13 3). It does not appear that any one of the cities had an actual hegemony in the confederation. In the vicissitudes of later centuries the relative power and importance of the cities frequently changed (see Stark, *Gaza*, 142). Gath and Ekron never attained the same

1 Compare Shoshenk's list, Müller, *As. u. Eur.* 166 *ff.*

2 So Thenius; see against him Stark, *Gaza*, 173.

rank as the cities nearer the coast; but their position brought them into closer connection with Israelite history. Gath disappears after the eighth century; it had probably sunk into insignificance.

Each of the five cities was mistress of the adjacent territory, other cities and villages being subject to it (1 S. 6 17 *f.*).[1] The rulers of the five cities are called *sĕrānīm* (סְרָנִים, 𝕲 σατράπαι [𝕲B in Judg. ἄρχοντες, but σατραπίαι in 3 3], Vg. *reguli*, *satrapæ*, *principes*, Tg., Pesh. 'tyrants'). In war each doubtless commanded the contingent of his own city; matters of common concern were decided by them in the council of the chiefs (1 S. 29 3 *ff.*); in time of peace also they acted together in the public interest (Judg. 16); the citizens of Ashdod and of Ekron call them together to determine what shall be done to relieve those cities of the plague which the presence of the ark had brought upon them; they consult the soothsayers and carry out the directions of the response (1 S. 5 *f.*). That their office was hereditary is nowhere said, but may probably be assumed. Achish of Gath is called 'king' (*mélek*, 1 S. 21 10 [11] 27 2), though as ruler of Gath he was one of the *sĕrānīm*;[2] the title 'king' would naturally be given by the Hebrew historian to the ruler of any city, whether one of the five or not.

We see from the Egyptian monuments as well as from the OT that the Philistines had an effective military organisation, and a tactical skill which Asiatics have seldom displayed (see WMM, *As. u. Eur.* 365). The army in column, by regiments and companies, under their officers (*sārīm*), passes in review before the *sĕrānīm* (1 S. 29 2). They had chariots (1 S. 13 5 [read 3000], 2 S. 1 6), in which, as in the Hittite chariotry, a shield-bearer stands beside the spearman (see CHARIOT, col. 729). Their strength, however, was in their well-armed footmen;[3] their archers were of formidable skill (1 S. 31 3), reminding us of the fame of the Cretan bowmen. The Ṭakkara at Dor maintained a fleet, which followed Wen-Amon to Byblos and blockaded the port to prevent his returning to Egypt (Papyrus Golénischeff).

13. Later OT references. The Egyptian conquest probably broke up the Philistine confederacy; the descendants of the invaders mingled with the native population of the region and disappeared in it, while leaving it their name, and, doubtless, infusing into it something of their character. Henceforth the history is that not of a people but of a country, or rather of the individual cities in it. (See ASHDOD, ASHKELON, EKRON, GATH, GAZA.) It must suffice here to refer very briefly to some notices in the OT of the relations of Israel to its neighbours on the SW. side. Gezer, as we have seen already (§ 11), was added by the Pharaoh to the territory of Solomon (1 K. 9 16); according to 2 Ch. 11 8 Rehoboam fortified Gath as well as the cities in the Judæan Shĕphēlāh; Gibbethon was besieged by Nadab ben Jeroboam (1 K. 15 27), and again a quarter of a century later in the reign of Elah ben Baasha (1 K. 16 15 *ff.*); the Chronicler records that some of the Philistines brought voluntary presents to Jehoshaphat (2 Ch. 17 11); in the reign of Jehoram of Judah they are said to have invaded Judah, and carried away the royal treasure with the king's wives and children (2 Ch. 21 16 *f.*);[4] in the time of Jehoash Hazael king of Damascus took Gath, and invaded Judah on that line (2 K. 12 17); Uzziah broke down the walls of Gath, Jabneh, and Ashdod, and built cities in the territory of Ashdod (2 Ch. 26 6, from an old source); in the days

1 Cp Jos. 13 2 (*gĕlīlōth*), 15 45-47 Judg. 1 18.

2 The difference of opinion between Achish and 'the *sĕrānīm*' in 1 S. 29 does not imply the contrary.

3 See the figures in *As. u. Eur.* 364 *f.*; and cp the descriptions in 1 S. 17 4-8 45 2 S. 21 16.

4 It is noteworthy for the conditions of the Chronicler's age that the Arabians are so frequently associated with the Philistines in his account of these conflicts; cp Neh. 4 7 [1], and see ARABIA, § 3.

PHILISTINES

of Ahaz the tables were turned, and the Philistines conquered and occupied many cities in the Judæan Shĕphēlāh and Negeb (2 Ch. 28 18); Hezekiah waged successful war on the Philistine cities, even as far as Gaza, if we may trust the brief notice in 2 K. 18 8;[1] but the Assyrians soon deprived him of his annexed territory. Amos (1 6-8) denounces the judgment of Yahwè on the Philistine cities, because in some recent war they had carried away the population of whole districts and sold them to the Edomites;[2] such a thing might have happened under Amaziah, when Judah was greatly weakened by the disastrous conflict with Israel which the king had provoked (2 K. 14 11 *ff.*). Am. 6 2 (later than Amos) perhaps refers to the catastrophe which befell Gath at the hands of Sargon in 711 (see GATH, § 1). Isaiah, in an early prophecy (9 12 [11]), sees the Philistines on one side, and the Syrians on the other, devouring Israel; whether the Philistines actually assailed the northern kingdom at this time is not known. Is. 20 is dated in the year in which Sargon's Tartan besieged Ashdod (711 B.C.), and predicts the failure of its vain reliance on Egyptian aid. In later prophecies the judgment that is to come upon the Philistines as well as on other foreign nations and lands, is foretold, and sometimes depicted in lurid colours;[3] but, apart from the fact that the genuineness and age of many of these passages are controverted questions, the language and imagery are of too general—we might say, typical—a character to enable us to recognise a specific historical situation.

14. Relations with Assyria.

Philistia, together with Israel and Edom, was conquered and made tributary to the Assyrian empire by Rammān [Adad]-nirāri III., in the last years of the ninth century (*KB* 1 190; ASSYRIA, § 32). Tiglath-pileser III. (745-727) enumerates among his vassals about the year 734, Mitinti of Ashkelon and Ḥanūn of Gaza (*KB* 2 20). Both took part, with Rezin of Damascus and Pekah of Israel, in the revolt which the king put down in 734-732. Ashkelon, where Mitinti was succeeded by his son Rukipti, probably made its submission (see Tiele, *BAG* 235); Ḥanūn fled to Egypt at the approach of the Assyrians, and Gaza was captured and plundered; from the language of Tiglath-pileser in his account of these events it has been inferred that he set an Assyrian governor over it (Winckler, *GI* 1 219). Ḥanūn must, however, soon have recovered his throne, for in 720, in alliance with the Egyptian Sib'u—the same 'Sō' (סוא, perhaps to be pronounced Sewe; see SO) in whom Hoshea the last king of Israel had vainly trusted (2 K. 17 4)—was defeated and made prisoner by Sargon in the battle at Raphia (*KB* 2 54). It was, perhaps, about the same time that Sargon deposed Azuri king of Ashdod, and set his brother Aḫimiti on the throne; the anti-Assyrian party shortly expelled him and made a certain Yamani (or Yavani) king. The war thus provoked ended in 711 with the capture of Ashdod, Gath, and other cities, and the deportation of their inhabitants, their places being filled by colonists from the E. of the Empire, and the district placed under an Assyrian governor (*KB* 2 64 *ff.*; see also ASHDOD). This immediate administration did not continue long; for Mitinti of Ashdod appears among the vassals of Sennacherib.

In the great revolt against Sennacherib, in which Hezekiah of Judah played a prominent part, Ṣidḳa of Ashkelon was involved, with disastrous consequences to himself; he was carried prisoner to Assyria, and Šar-ruludari, the son of a former ruler, made king in his room; Sennacherib, in his inscription, names as cities of the kingdom of Ṣidḳa which he had taken, Beth-dagon, Joppa, Benebarak, Azuru (*KB* 2 92). In Ekron the anti-Assyrian party had seized their loyal king Padi and sent him a prisoner to Hezekiah. Sennacherib severely punished the insurgents of Ekron, compelled Hezekiah to deliver Padi up, and restored him to his throne, 701 (*KB* 2 92 *ff.*). When Hezekiah's turn came, Sennacherib annexed the Judæan cities he had taken and plundered to the territories of the loyal kings, Mitinti of Ashdod, Padi of Ekron, and Ṣilbel of Gaza (*KB* 2 94; see ISRAEL, § 34; HEZEKIAH, § 2, and references there). After the time of Sennacherib the cities of Philistia seem not again to have revolted against the Assyrians.

Esarhaddon names among his western vassals Ṣilbel king of Gaza, Mitinti of Ashkelon, Ikausu of Ekron, Aḫimilki of Ashdod, together with Manasseh of Judah, the kings of Edom and Moab, and others (*KB* 2 148). The same names appear under Ašur-bāni-pal (*ib.* 240). It was the time of the long peace in Manasseh's reign. In the attempt of Egypt under Tirhakah to throw off the yoke of Ašur-bāni-pal (see EGYPT, § 66*b*), the cities on the coast remained loyal to Assyria, as also in the revolt of Phœnicia, and the Arabian war (*KB* 2 160 168 *ff.* 216 *ff.*). The account of the long siege of Ashdod by Psammeticus (29 years; Herod. 2 157) attests renewed attempts of Egypt to subject this coast (see EGYPT, § 67). During the Scythian irruption Ashkelon was taken, and its great temple of 'Aphrodite Urania' spoiled (Herod. 1 105).

The collapse of the Assyrian empire in the last quarter of the seventh century, enabled Necho II. to carry the Egyptian arms to the Euphrates (608); in the course of this campaign he took Gaza (Κάδυτις, Herod. 2 159). Necho's defeat at Carchemish (605) was speedily followed by the reconquest of all Western Syria from the Amanus to the borders of Egypt (cp 2 K. 24 7) by Nebuchadrezzar. So far as our sources go, the southern coast cities offered no such resistance as the Babylonians encountered at Tyre and Jerusalem.[1] The demonstration of the Pharaoh Hophra (Apries) had at least no lasting results. Nabonadius called upon his tributaries as far as Gaza to contribute to the building of the great temple of Sin at Ḥarran (*KB* iii. 2 98).

15. Under Persian rule.

After the fall of the Babylonian empire, Gaza alone opposed the advance of Cambyses on his way to Egypt (Polyb. 16 40). In the provincial organisation of Darius, Palestine (with Phœnicia and Cyprus) was included in the fifth satrapy (Herod. 3 91); it furnished its quota of ships to the fleet of Xerxes (Herod. 7 89). Ashkelon was, for a time at least, subject to Tyre (Scylax, in *Geogr. min.* ed. C. Müller, 1 79); Eshmunazar records the cession of Dor and Joppa to Sidon (*CIS* no 3 l. 19 *f.*). Gaza (*q.v.*) was autonomous, and so prosperous that Herodotus found it not inferior to Sardes (Herod. 3 5; see E. Meyer, *GA* 3 139). What part these cities took in the repeated attempts of Egypt to shake off the Persian yoke, and in the revolts of Megabyzus and Evagoras (see PERSIA, § 20), our scanty sources do not tell us; in the great rebellion of the 'Syrians and Phœnicians, and almost all the peoples of the sea board' in the last years of Artaxerxes Mnemon (Diod. Sic. 15 90) they may have been involved; without at least their benevolent neutrality, Tachos could scarcely have engaged in his operations in Phœnicia in 361.[2] If they joined with the Phœnician cities in the rising against Ochus—as is not improbable, since the Jews also seem to have been implicated—they at least offered no opposition to the Persians in their advance against Egypt; the exemplary fate of Sidon may have warned them to submit while there was time (see PERSIA, § 20).

When Alexander, after taking Tyre, marched down the coast on his way to Egypt, it was again Gaza alone

1 See HEZEKIAH, § 2; Winckler, *GI* 220 226.
2 Winckler (*Alttest. Unters.* 183 *f.*, *GI* 1 199) emends and interprets, 'because they totally depopulated Edom'; see also Löhr, *Unters. z. Amos*, 4.
3 See Jer. 25 15 *ff.* 47 Zeph. 2 4 *ff.* Ezek. 25 15 *ff.*, also Zech. 9 5-7 Obad. 19.

1 See, however, Stark, *Gaza*, 224 *f.*; Berossus names among Nebuchadrezzar's captives not only Jews and Phœnicians, but also Syrians and the peoples near Egypt (Jos. *Ant.* x. 11 1); cp also Philostratus (*ap.* Syncell. 221 D).
2 See Judeich, *Kleinasiatische Studien*, 164 *ff.*

that resisted his passage; it was taken only after a siege of two months' duration; the city was sacked, and the remnant of its inhabitants sold into slavery (332 B.C.).[1] The strategic importance of Philistia made it the scene of frequent conflicts between the successors of Alexander.

16. Alexander and his successors.

In the assignment of satrapies after Alexander's death (323), Syria fell to Laomedon; in 320 Philistia and Judæa, with the rest of Cœle-Syria and Phœnicia, were seized by Ptolemy I., who garrisoned Gaza and Joppa. Antigonus, in 315, took these cities without much difficulty, though Tyre stood a fifteen months' siege. In 312 Ptolemy reconquered the country; a pitched battle being fought in the spring near Gaza (Diod. Sic. 19 80 *ff.*); but in the autumn he was driven out again by Demetrius and Antigonus, dismantling the fortifications of Acco, Joppa, and Gaza in his retreat (Diod. 19 93); the peace of 311 left Antigonus in possession of this coast; Gaza was refortified by him, and was the base of his unsuccessful operations by land and sea against Egypt in 306. In 302 Ptolemy invaded Syria and laid siege to Sidon, but retired upon an erroneous report of Antigonus's advance, leaving garrisons to hold the cities he had taken.

The disposition of Syria in the partition after the battle of Ipsus (301) was disputed, both Seleucids and Ptolemies in later times claiming that they had acquired the right to it;[2] the question of actual possession at the moment lay between Ptolemy and the remaining garrisons of Demetrius. Ptolemy in no long time acquired southern Palestine, and perhaps some points in Phœnicia, which he administered by a strategos. The theatre of the Syrian wars of 275-274, 261-250, 246-240, was farther north; and their outcome strengthened and enlarged the Ptolemaic empire in Syria.[3] A determined attempt to wrest these possessions from Egypt was made by Antiochus the Great, beginning in 219. The Egyptians strengthened the fortifications of Gaza, which was necessarily the base of their defensive operations; but the campaign of 218 must have brought it, along with most of southern Palestine, into the power of Antiochus; since we find him preparing at Gaza for the projected invasion of Egypt. One of the great battles of antiquity was fought at Raphia in the spring of 217; Antiochus was completely defeated, and Ptolemy recovered southern Syria (Polyb. 5 82-86). In 201 Antiochus resumed the attempt; Cœle-Syria fell into his hands almost without a blow; Gaza, however, held out, and was taken only after a stubborn resistance. The Egyptians made an effort to recover the territory; but their defeat at Paneion in 200[4] put an end to a rule which had lasted for a century; all Syria was henceforth embraced in the empire of the Seleucidæ. The revenues of Cœle-Syria were assigned by Antiochus as a dowry to his daughter, Cleopatra, whom he married to the youthful Ptolemy. The ambition of the Egyptian court to reconquer the country precipitated the fresh attacks on Egypt by Antiochus Epiphanes in 170-168.

Long before the Macedonian conquest, commerce had doubtless brought to the coast, as it did to the cities of the Nile delta, considerable numbers of Greeks; the importance of the trade with Greece, which was probably chiefly in their hands, may be judged from the fact that in the Persian period Gaza struck coins of Athenian types and of Athenian standard weight and fineness (see Schürer[(3)], 2 84). In the following centuries the influence of Greek civilisation was much more profound and wide-reaching. The city government was framed upon Greek models, the types and legends of their coinage are mainly Greek; the gods whom they worshipped are for the most part the great gods of Greece: Zeus, Poseidon, Apollo, Athene, Aphrodite, Helios, and others; the Greek language was doubtless extensively spoken in the cities; Ashkelon had, in Roman times, famous schools, and not a few men of distinction in Greek literature were educated there (Steph. Byzant. *s.v.*)—in short, it might appear on a superficial survey of these facts that the region was completely Hellenised. Such a conclusion would, however, be a serious exaggeration. Greek was the language of commerce and of culture; in the cities, probably, most men were able to speak as much Greek as they needed; but as late as the end of the fourth century A.D., the country people about Gaza spoke only Aramaic—which in the Persian period had gradually supplanted the older Canaanite vernacular (cp ARAMAIC, §§ 2 *f.*)—while even in the city the lower classes spoke Aramaic, and there were those who understood no other tongue.[1] The same was true at Ashkelon, and doubtless elsewhere, generally.

17. Greek civilisation.

In religion, also, the fact that the gods bear Greek names does not necessarily indicate that the gods and their worship were purely Greek. In many cases, unquestionably, the name has been given to a native deity and the cult was either native or syncretistic. The chief temple of Ashdod in Maccabæan times was Dagon's; the great god of Gaza was Marnas—an Aramaic title; the identification with Ζεὺς Κρηταγενής is part of the late legendary connection of Gaza (Μίνῳα) with Crete;[2] the Aphrodite Ourania of Ashkelon is in all probability Atargatis-Derketo, also a Syrian deity,[3] just as in the Persian period the Aramaic names Marnas and ATARGATIS (*q.v.*) superseded a Canaanite Baal and Astarte, so they became in turn Zeus and Aphrodite without changing their nature.

During the Maccabæan struggle the Syrian armies operated in general from the Philistine plain, ascending by the pass of Beth-horon or Emmaus, or farther S. by Beth-zur. Levies from the country fought on the Syrian side; slave-traders accompanied the army to buy the expected prisoners (1 Macc. 3 41).

18. The Asmonæans.

In a raid into the lowland Judas took Ashdod, plundering the city and destroying the images of the gods (1 Macc. 5 68). To prevent such excursions of the Jews, Bacchides fortified and garrisoned Emmaus, Beth-horon, Thamnatha, Pharathon, and Gazer (1 Macc. 9 50-52). In 147 Jonathan, fighting in the cause of Alexander Balas against Demetrius, made an expedition against Joppa, but found the city too strong to be carried by assault; turning back he defeated Apollonius near Ashdod, pursued the retreating enemy into the city, and burned it with its great temple of Dagon (1 Macc. 10 75-85, cp 11 4); Ashkelon received him with open arms (10 86). Alexander rewarded him by bestowing upon him the city and district of Ekron (10 89). Later, as a supporter of Alexander's son Antiochus, Jonathan received the submission of Ashkelon, and besieged Gaza and compelled it to sue for terms (between 145-143 B.C.; 1 Macc. 11 60-62); shortly after, Simon took Joppa and put a Jewish garrison in it (1 Macc. 12 33 *f.*); after the treacherous murder of Jonathan by Trypho at Ptolemais, Simon drove out the inhabitants of Joppa, settling Jews in their place and annexing it to his own territory (1 Macc. 13 11; see JOPPA, § 2); having taken Gazer by siege, he pursued the same course with it (1 Macc. 13 43-48). Antiochus Sidetes seems to have taken these places from John Hyrcanus,[4] but was constrained by Roman intervention to restore them. Alexander Jannæus at the beginning of his reign besieged Ptolemais, but was compelled by Ptolemy Lathurus to retire from it. The subsequent withdrawal of both Lathurus and Cleopatra, however, left him a free hand, and he conquered Raphia, Anthedon, and finally Gaza, which after a siege of a year he took by treachery and gave over to pillage and flames, 96 B.C. (Jos. *Ant.* xiii. 13 3, *BJ* i. 4 2). In Josephus (*Ant.* xiii. 15 4) we have a list of the cities which were subject to Alexander Jannæus; it includes all the cities from Carmel to Rhinocorura (with the single exception of Ashkelon)—Strato's Tower, Apollonia, Joppa, Jamnia, Ashdod, Gaza, Anthedon, Raphia, Rhinocorura.

Pompey freed these cities from Jewish rule, restoring them to their own citizens and incorporating them in the province of Syria (63 B.C.; Jos. *BJ* i. 7 7). Gabinius (57-55 B.C.) rebuilt many of these places which had been wholly or in part demolished by the Jews (*Ant.* xiv. 5 3; *BJ* i. 8 4). Cæsar restored Joppa to the Jews (*Ant.*

19. Under the Romans.

xiv. 106). Antony bestowed on Cleopatra the whole coast from the Egyptian desert to the Eleutherus except the cities Tyre and Sidon (36 B.C.; Plut. *Ant.* 36; Jos. *BJ* i. 18 5). Augustus (in 30 B.C.) added to the kingdom of Herod Gaza, Anthedon, Joppa, and Strato's Tower; the last Herod rebuilt and named Cæsarea. In the division of Herod's kingdom Gaza was put immediately under the governor of Syria; the same disposition was made of Joppa and Cæsarea when Archelaus was deposed (6 A.D.); Ashdod and Jamnia were given to Salome; upon her death their revenues were paid to the empress Livia and subsequently to Tiberius (see Schürer, *GJV*(3) 2 78). Ashkelon enjoyed the privileges of a free city during all these changes, maintaining the liberties it had gained in 104 B.C. In 66 A.D., at the beginning of the war with Rome, the Jews in Cæsarea were slaughtered by their fellow-townsmen, with the connivance of the procurator, Gessius Florus.[1] In revenge the insurgents set fire to Ptolemais and Ashkelon, and demolished Anthedon and Gaza,[2] with many unwalled towns in the country (*BJ* ii. 18 1). Joppa was taken by the Romans under Cestius Gallus and its Jewish population massacred (*BJ* ii. 18 10); it was reoccupied by the Jews (see *BJ* ii. 20 4), who held it until its destruction by Vespasian (*BJ* iii. 9 2 *ff.*).

After the destruction of Jerusalem in 70, Jamnia, which since the Asmonæan times had been inhabited chiefly by Jews, and Lydda became the seats of the most famous Jewish schools; and in the other towns of this region there was a considerable Jewish population, among whom Jewish Christians are frequently mentioned.

G. F. M.

PHILOLOGUS (φιλολογος), greeted in Rom. 16 15, together with JULIA [*q.v.*]. It is a common slave-name, and occurs not unfrequently in the inscriptions of the imperial household (*CIL* 6 4116, etc). According to Pseudo-Hippolytus he was one of the seventy disciples, and tradition makes him bishop of Sinope.

PHILOSOPHY. See HELLENISM, WISDOM LITERATURE.

PHINEES. 1. 1 Esd. 5 5 2 Esd. 1 2*b*, also 1 Esd. 8 2 28 = Ezra 7 5 8 2 PHINEHAS (§ 3), 1.
2. 1 Esd. 5 31, RV **Phinoe** = Ezra 2 49 PASEAH, 2.
3. 1 Esd. 8 63 = Ezra 8 33 PHINEHAS, 3.
4. 2 Esd. 1 2*a*. See PHINEHAS, 2.

PHINEHAS (פִּינְחָס, once פִּנְחָס, 1 S. 1 3; φ[ε]ινεες [BAFL]).

The name is very un-Hebraic, and since the mother of Phinehas ben Eleazar is described (Ex. 6 25) as one of the daughters of Putiel (cp Potiphera'), it is plausible to seek for an Egyptian origin.

1. Is the name Egyptian or Hebrew?

Hence Lauth (*ZDMG* 25 [1871], 139), followed by Nestle (*Eigennamen*, 112 [1876]), and formerly by Cheyne (*Proph. Is.*(3) 144), explained Phinehas as 'the negro,' the corresponding Egyptian form being well-attested (see § 2). All such theories, however, seem to be inferior in probability to the rival hypothesis.

The present writer ventures to think that, if the name were Egyptian, it must have honorific meaning. We might perhaps suppose פנחס to be an early corruption of פענח, which in צפנת פענח (ZAPHNATH-PAANEAH) may be a misvocalisation of the Egyptian name Pianḫi (or some similar form); ס and ע were often confounded. But considering that the evidence before us (see MOSES, § 6) seems to favour a N. Arabian origin for Moses and his relatives, and that 'Phinehas' in the Hexateuch is the name, not only of an individual, but also of a hill with which, not the individual, but his father (though 'Eleazar' really comes from a clan-name) is associated,[1] also that the Levites certainly had Jerahmeelite affinities, and that the father of the second Phinehas bears a name which is probably a mutilation of Jerahmeel, it becomes more probable that פנחס is to be explained as a mutilated and corrupt form (through פחמן) of ירחמאל (Jeraḥme'el). The name Jeraḥme'el could of course be given both to an individual and to a locality. Cp TIMNATH-HERES. PUTIEL (cp note 3 below), is פלתי with the afformative אל. It is possible, however, that Putiel and POTIPHERA (*q.v.*) were early explained as = 'devoted to El,' or 'to Rē'.' On the supposed Ephraimite connection of the second Phinehas see SHILOH, and note that 'Ephraim' is not unfrequently a corruption of 'Jerahmeel' (*e.g.*, Judg. 17 1 19 1 1 S. 1 1).

T. K. C.

On the assumption, however, that the name Phinehas is of Egyptian origin the following details deserve consideration.

2. A second answer to the question.

It seems to stand for Egyptian *pe(')-nḥēsi*,[2] later without the vocalic ending, in Coptic letters πενϩηϲ (cp *Ptoemphaneis*, Ptol. iv. 7 34, mutilated *Ptæmphæ*, Plin. 6 192, 'the country of the negro').

The ִ of the biblical punctuation could be an archaic rendering of ē, which stands mostly for old ā. The fact that the article is often written (*p'ī* or even *p'y*, Liebl. 884 add.) like the demonstrative must not be misunderstood; it is only an attempt at expressing the helping sound ĕ before two double consonants, notwithstanding the biblical î—a *scriptio plena* which seems to show that the name was felt to be foreign. The meaning 'the negro' does not imply black skin, the designation *n(e)ḥēsi* applying also to all brownish Hamitic tribes of Eastern Africa (WMM, *As. u. Eur.* 112). Therefore, the name means nothing but 'a child of darker (brunette) complexion.' The name begins to appear in dynasty 18 and becomes most frequent in dynasty 19 to 21. By the time of dynasty 26 (about 666 B.C.) it seems to be rare, if not obsolete. It was superseded by P-ekōš (πεκυσις), 'the Cushite.'

W. M. M.

3. Bearers of the name.

1. Son of Eleazar and of one of the daughters of Putiel.[3] He is mentioned as accompanying the Israelites against Midian (Nu. 31 6 *ff.*), and as sent to admonish the trans-Jordanic Israelites for erecting their altar by the Jordan (Jos. 22 13 30 *ff.*). He is, however, more especially renowned for his zeal and energy at Shittim in the matter of the Midianitess COZBI (*q.v.*, Nu. 25 6 *ff.*), to which repeated allusion is made in later Judaism, cp Ps. 106 30 *f.* 1 Macc. 2 26 (φινεως [A]) and Ecclus. 45 23. The story (the opening of which is lost) is a later addition by P to the already composite 25 1-5 (JE), and is probably an artificial attempt to antedate and foreshadow the zealous endeavours of Nehemiah to purify the remnants of the Jewish *Gōlah* (cp Bertholet, *Stellung d. Israeliten*, 147). See NUMBERS, § 7, and *Oxford Hex. ad loc.*

[1] See also the slaughter at Ashkelon and Ptolemais, *BJ* ii. 18 5.

[2] In the case of Gaza, at least, this demolition can have been but partial; see Schürer, 2 88.

[1] On the analogy of Josh. 19 50 we may assume that the hill of Phinehas (Jerahmeel) in Josh. 24 33 was traditionally assigned to Eleazar. Originally, however, אלעזר must have been עזר[י]אל; *i.e.*, it was a clan-name.

[2] Written mostly .

[3] For a view of the name Putiel which implies two stages in the history of the name, see above, § 1. According to the ordinary view, the second of the two stages represents the entire history of the name. Both views are illustrated by the fact that in Eg.-Aram. inscriptions and papyri of the fifth and fourth century B.C. פוט, 'devoted to,' appears in the form פט, *e.g.*, פטאסי ('of Isis,' etc.). An earlier example is פטסרי (in Gk. inscr. πετοσιρις) in an inscription found at Teima in Arabia (*CIS* ii. no. 113).

The importance of Phinehas in P lies in the fact that he is in the direct line from Aaron, and hence (as the father of Abishua) enters into the genealogy of the high-priests (1 Ch. 6 4 [5 30] 50 [6 35] Ezra 7 5 = 1 Esd. 8 2 2 Esd. 1 2*b* **Phinees**). The Chronicler, moreover, speaks of him as the ruler over the porters 'in time past' (1 Ch. 9 20). In the days of the 'return' the b'ne Phinehas form one of the priestly classes (Ezra 8 2 = 1 Esd. 5 5 8 29, φορος [B], PHINEES), at the head of whom stands Gershom (see GERSHOM, GERSHON).

Like his father Eleazar, Phinehas rarely appears previous to P. In Judg. 20 28 the statement that he stood before Yahwè in the days of the Judges is no doubt a gloss (cp SHILOH); the whole chapter in its present form is post-exilic. (Cp Moore, *Judges*, 434, and see JUDGES, § 13.) Ancient, on the other hand, is the announcement affixed to Jos. 24 (E_2) of the death of Eleazar and his burial in the GIBEAH OF PHINEHAS[1] [*q.v.*] which was given to Phinehas in the hill-country of Ephriam (*v.* 33). 𝔊^BAL adds also that Phinehas himself was afterwards buried in the same 'Gibeah' (ἐν γαβααρ [-αθ [A], γη βααρ, L] τῇ [γῇ B^ab] ἑαυτῶν [ἑαυτοῦ A]): Dt. 10 6 (Eleazar succeeds Aaron at Moserah) is probably also E.

2. Phinehas b. Eli[2] and his brother HOPHNI [*q.v.*] were 'sons of Belial' who, for their wickedness and wantonness towards the offerers of sacrifices, incurred the wrath of Yahwè and perished together at Eben-ezer when the ark was taken by the Philistines (1 S. 1-4). The son of Phinehas born upon that fateful day receives the name ICHABOD [*q.v.*].

According to Budde's analysis (*SBOT*), the old narrative in 1 S. 4 related the loss of the ark without further comment; it is a later writer (E_2) who in 2 *f.* ascribes the disaster to the wickedness of Eli's sons and to their father's laxity (esp. 3 14*b*), and finally it is a Dt. writer who lays even greater stress upon their iniquity and actually foreshadows their fate. There is much to be said, however, in favour of H. P. Smith's view that 1 S. 2 12-17 22-25 [27-36 ?], 4 1*b*-7 1 is a fragment of an independent history of the Elidæ. This torso (which is already composite) contains two peculiarities: (*a*) the association of the family with Moses, and (*b*) the prominence of Shiloh. It may, therefore, be conjectured that this narrative formerly stood in the closest connection with another in Judg. 18 *f.* where, too, a descendant of Moses and the foundation of a shrine (perhaps in the original story that not of Dan but of Shiloh) play an important part.[3] The Mosaic associations and the unique description of the power of the ark (1 S. 4 5 *ff.*) may further suggest that the narrative is a fragment of that account of the Exodus a trace of which survives in Nu. 10 29-36 (itself also composite); cp EXODUS i., § 5 *ff.*, KADESH, § 3.

Another son, Aḥitub, was the father of Ahiah (= Ahimelech),[4] who appears as a priest in the time of Saul (1 S. 14 3).[5] It is a remarkable fact that the famous line of priests from Eli to Abiathar is ignored in the later genealogies, with the curious exception of 2 Esd. 1 1, where Phinehas b. Heli (= Eli) and Phinehas b. Eleazar occur in the ancestry of Ezra (see GENEALOGIES i., § 7 [4]).

An interesting question arises as to the precise relation between Phinehas (1) and (2). The latter, according to MT an Ephraimite, seems to disappear from history only to be represented in a later age by the former, a shadowy and unreal character whom also tradition connects with Ephraim. At all events the iniquity of the Ephraimite son of Eli (cp esp. 1 S. 2 22*b*) is amply atoned for in later tradition by the zeal (cp esp. Nu. 25 6 *ff.*) of the younger namesake. That (1) is an image of the son of Eli is denied however by We. (*Prol.*[(4)] 142), but there are at all events certain considerations which point to a connection between the two. The names Eli, Hophni, and Phinehas are of the same un-Hebraic cast as Moses and Gershom, and (unless we have recourse to emendation) find their only explanation from Egyptian, or from S. Palestinian dialects (Sabæan, Sinaitic, etc.); the tradition in 1 S. 2 27 (although due to R_D; see We., *l.c.*) seems, moreover, to connect the house of Eli with Moses (cp also Jochebed and Phinehas' son ICHABOD [*q.v.*]).[1] The relation of Phinehas b. Eli to Phinehas the grandson of Aaron finds an analogy in the cases of Eliezer and Gershom b'nē Moses compared with Eleazar and Gershon b'nē Aaron.[2] The conjecture is perhaps a plausible one that the 'stone of help' (Eben-ezer) in 1 S. 4 has some connection with the grave of Eleazar (Josh. 24 32), also the burial-place of the Aaronite Phinehas; note the explanation of the name in 1 S. 7 12.

3. Eleazar b. Phinehas, a priest temp. Ezra (Ezra 8 33 = 1 Esd. 8 63, PHINEES).

T. K. C., § 1; W. M. M., § 2; S. A. C., § 3.

[1] Prof. Cheyne, however, proposes to read 'Gibeah of Jerahmeel,' regarding both 'Phinehas' and 'Eleazar' as corruptions of clan-names (see § 1).

[2] Eli's origin is not given, no doubt because he was previously mentioned in the longer narrative of which 1 S. 1 *ff.* in its present form is an excerpt. Marq. (*Fund.* 12 *f.*) recognises the traces of a double tradition in the very full notices given in *v.* 1 (see ELKANAH i., JEROHAM i., SAMUEL). Is *v.* 1 a confused combination of marginal notes giving the parentage and origin of both Elkanah (*v.* 1) and Eli (*v.* 3)? [Note, however, the view respecting the name Eli in § 1, and compare SHILOH.]

[3] For a parallel but somewhat different theory depending on emended texts, see MICAH, SHILOH; cp also MOSES.

[4] Prof. Cheyne has suggested that both Ahiah and Ahimelech may be popular corruptions of Jerahmeel.

[5] The statement, perhaps, does not belong to the original document (J). It has nothing to do with the chapter, and is more probably a gloss introduced on account of the 'priest' in *vv.* 19 36*b*.

PHINOE (φινοε), 1 Esd. 5 31 RV, AV PHINEES; see PASEAH, 2.

PHISON (φ[ε]ισων [BNA]), Ecclus. 24 25 AV, RV PISHON. See PISON.

PHLEGON (φλεγων) is saluted in Rom. 16 14. Cp ROMANS (EPISTLE). His name occurs in the apocryphal lists of the 'seventy' given by Pseudo-Dorotheus and Pseudo-Hippolytus. Tradition made him bishop of Marathon, and the Greek church commemorates his martyrdom on April 8th.

PHŒBE (φοιβη), the 'sister,' 'deaconess' (RV^mg.: διακονος) of the church at Cenchreæ, who, according to Rom. 16 1 *f.*, had been a 'helper [or 'patroness'] of many,' including the writer. See further, ROMANS and (for the nature of her diaconate) DEACON.

PHŒNICIA.

CONTENTS.

By the Phœnicians are meant the inhabitants of the commercial coast towns of Canaan. The name is of Greek origin. For a long time its prototype was thought to have been found in the Egyptian *Fenḥ-u* (vocalisation unknown), but it has since been shown (notably by W. M. Müller, *As. u. Eur.* 208 *f.*) that this Egyptian word is not the name of a nation but a poetical designation of the (Asiatic) barbarians—possibly indeed only a traditional scribal error for *Feḥu*. The name Φοῖνιξ is rather a Gk. derivative from φοινός, 'blood-red,' with the common old suffix, -ικ.

1. Names.

The name Phœnix is by no means rare in the ancient Grecian world as a place-name indicating the presence of a reddish colour. Thus there was a brook Phœnix near Thermopylæ, a mount Phœnix in Bœotia and in Caria, a town Phœnikè in Epirus, and so on (cp Meyer, *GA* 2, § 92)—where it is out of the question to suppose that 'Phœnician' settlements are meant.

This name was given by the Greeks to the Canaanite seafaring men, as well as to the most highly-prized of all their imports, purple, and to the palm, which was likewise introduced by them (first at Delos, *Od.* 6 103). Probably φοίνιξ denoted first the purple, then the 'purple-men,' and finally the tree they imported.

[1] The identification of these names has been also made by Wellh. *CH*[(3)] 371 (1899). See also ICHABOD, JOCHEBED.

[2] If Eli's genealogy has indeed found its way into 1 S. 1 1 (see § 2, n. 1, above), we might venture to find a trace of it in בן ירחם, which name is no other than Jerahmeel. Eli may have been a Jerahmeelite; the relation between the Kenites, Jerahmeelites, and other clans of the south appears to have been a close one (see JERAHMEEL, § 3).

The Greek genealogic poetry provided the Phœnicians with an eponym—Phœnix king of Sidon,—who was identified with a Cretan god and hero Phoinix, whose daughter Europa, originally a Bœotian and Cretan goddess, thus became a Sidonian princess. For what reason Cadmus, the son of Agenor, the eponym and founder of the Cadmeia of Thebes, was made the brother of Phœnix we do not know; he had, at any rate, nothing to do with Phœnicia. At a still later time Cadmus became the brother of Europa, which resulted in the latter's becoming the daughter of Agenor, and her father Phœnix becoming her brother. A further analysis of this legend does not belong here; cp Meyer, *GA* 293 *ff.* The Latin Pœnus is probably rather a contraction of 'Phoinix' than an older form without the suffix.

Kaft, which frequently occurs in the Egyptian inscriptions of the New Empire, passed for a long time as another old name for Phœnicia; Φοινίκη is thus rendered in the hieroglyphic text in the bilingual decree of Canopus. There are cogent reasons, however, for rejecting this view, and seeking for Kaft outside the Semitic world, perhaps in Cilicia (cp CAPHTOR, § 4). The name may be connected with the enigmatical name JAPHETH [*q.v.*], and the Gk. 'Ιάπετος (the name of a Cilician god, in Steph. Byz., *s.v.* Ἄδανα and Ἀγχιάλη).

In the OT the Phœnicians generally are named צידנים, Sidonians; for instance Itoba'al, king of Tyre, is called 'King of the Sidonians' in 1 K. 16$_{31}$; cp Judg. 10$_{6}$ $_{12}$ 18$_{7}$ 1 K. 5$_{20}$ 11$_{1}$ $_{5}$ $_{33}$ 2 K. 23$_{13}$; and in the genealogy of the nations, Gen. 10$_{15}$ (cp Judg. 3$_{3}$= Josh. 13$_{4-6}$). In the same way King Hiram II. of Tyre is called in an inscription מלך צרנם, 'King of the Sidonians,' and on coins of the time of Antiochus IV. Tyre is called אם צרנם, 'the metropolis of the Sidonians'—*i.e.*, Phœnicians. In Homer the Phœnicians are often called Σιδόνιοι (*Il.* 6$_{290}$ *Od.* 15$_{118}$ 4$_{618}$), their land Σιδονίη (*Il.* 6$_{291}$ *Od.* 13$_{285}$); but Φοίνικες is also found (*Il.* 23$_{743}$ *f.*; *Od.* 13$_{272}$ 14$_{288}$ *ff.* 15$_{415}$ *ff.*). Both names occur together in the celebrated verses concerning Menelaus' wanderings (*Od.* 4$_{84}$ *f.*). The name of the *town* Sidon is found in *Od.* 15$_{425}$. From the fact that Sidon, not Tyre, is mentioned, we must not draw political conclusions as some have done; through the influence of the ethnic name 'Sidonian' the name of Sidon was familiar to the Greeks at an earlier time than that of Tyre, although the latter was then much the more important. Roman poets, too, frequently use 'Sidonius' (as a synonym for 'Pœnus') in the sense of 'Phœnician' (cp Ovid, *Fast.* 3$_{108}$ etc.).

A precise definition of Phœnicia can hardly be given. The boundaries assigned by Herodotus, Scylax, Strabo, Pliny, and Ptolemy vary greatly. The last-mentioned (v. 15$_{4}$) reckons Phœnicia from the Eleutherus to the brook Chorseas S. of Dor. Accepting this view, we may describe Phœnicia as the coast-land at the foot of Lebanon and of the hill-country of Galilee down to Carmel. Marathus and Arados, however, lie N. of this territory, and in the S. the border is fluctuating and arbitrary. The impossibility of fixing a definite boundary line between the Phœnicians and the other Canaanites is specially obvious in the more remote times before the settlement of the Israelites and the Philistines. The limits above assigned correspond roughly to the name *Zahi* by which the Egyptians at the time of their conquests designated the Phœnician coast (cp WMM, *As. u. Eur.* 176 *ff.*). The origin of this name is unknown.

2. Origin and nationality.

Herodotus relates that the Phœnicians, as they themselves declare, were originally settled upon the 'Red' Sea, and came thence to the Syrian coast (1 1 7$_{89}$). The 'Red' Sea is of course the Indian Ocean, more especially the Persian Gulf. It would seem therefore that there once was a Phœnician tradition which, like that in the OT, made their ancestors immigrants from Babylonia.[1]

[1] The story was afterwards further embellished; support for it was found in the names of the islands Tylos and Arados of Bahrein on the Persian Gulf (Strabo, xvi. 3 4 2 *f.*). On the story of Trogus Pompeius, see SODOM AND GOMORRAH.

The long prevailing derivation of the name Phœnicia from the Egyptian Punt (Lepsius), a land that was located by older writers in S. Arabia, is quite impossible. The Egyptian Punt is the incense-bearing Somali-coast in Africa, whose inhabitants (Eg. *Punti*, Lepsius wrongly *Puna*) have nothing whatever to do with Pœni, Φοίνικες.

The Phœnicians themselves reckoned their land to Canaan (for the evidence, see CANAAN, § 1), and with perfect justice. They are, in fact, a branch of the Canaanites, which, at the beginning of the time historically known to us (about 1500 B.C.), had occupied many places on the coast, while the intermediate region was still in the hands of an Amorite population (cp AMORITES, CANAAN).[1]

One evidence of this is supplied by the Phœnician language, which differs only dialectically from the other Canaanite dialects known to us (Hebrew and Moabite); see WRITING. Though it exhibits in many instances a younger vocabulary (*e.g.*, יתן, to give, אלן, God), it has frequently retained older grammatical forms and words which in Hebrew have become obsolete.[2]

In fact it was simply the difference between the conditions of life of the coast-land and those of the interior, that gradually separated the Phœnicians from their fellows who had settled farther inland—much in the same way as the Dutch were severed from the other N. Germans. Their different historical development, and above all the occupation of Palestine by the Israelites, enlarged the breach.

3. Commencement of the history.

As to the age of the Phœnician towns we possess no information, for of course no historical value attaches to the statement of Africanus (in Syncellus, 31) that the Phœnicians said they had a historical tradition reaching back for 30,000 years. Far more moderate is the assertion of Herodotus (2$_{44}$) that, according to native tradition, Tyre and its temple of Hercules had been founded 2300 years previously—*i.e.*, about 2730 B.C. Even in this, however, no one will venture to find a real tradition. According to another statement the founding of Tyre was much later. Justin (18$_{2}$) relates that for a long time after their immigration (see above, § 2) and the founding of Sidon the Phœnicians lived on the coast, but that being then overcome (*expugnati*) by the king of Ashkelon, they took to their ships, and founded Tyre the year before the fall of Troy. To what year the latter event is assigned here cannot be gathered from the context; but when we find in Menander of Ephesus, the historian of Tyre, a Tyrian era that begins in the year 1198-7 B.C. (Jos. *Ant.* viii. 3 1, § 62, *c. Ap.* i. 18, § 126; and thence Eus. *a. Abr.* 745) we may regard it as almost certain that this is the epoch intended. Now it was at this time that there occurred the great movement among the nations which resulted in the occupation of Ashkelon and the neighbouring places by the PHILISTINES (*q.v.*) and also affected the Phœnician cities (see § 5). It is possible, therefore, that the statement of Justin and Menander's era preserve a recollection of these events. On the other hand, the date may rest simply on some chronological combination no longer known to us. It is, at any rate, historically certain from the Amarna tablets that, in the fifteenth century, the island-city of Tyre was already extant, and one of the most powerful cities of Phœnicia.

Whether the lists of Phœnician kings mentioned by later writers (Tatian, *adv. Græc.* 37; Porphyry ap. Eus. *Præp. ev.* x. 9 12, from Sanchuniathon) possessed any value for the older period, is uncertain. If there were any historical lists going

[1] This is probable on the following ground. As late as the last millennium B.C., new Phœnician towns were planted upon the northern foot of Lebanon—Botrys under Hiram I. of Tyre, Tripolis probably not until the time of the Persians. How to account for the existence of a (much mutilated) Phœnician inscription in N. Syria two hours W. of Zenjirli (Winckler, *AOF* 1 305), is not clear. The inscription belongs to the time about 750-700 B.C.

[2] Cp Stade, 'Erneute Prüfung des zwischen dem Phœn. u. Heb. bestehende Verwandtschaftsgrades,' in *Morgenländische Forschungen*, 1874.

back to the second millennium or even farther, they must have been written in cuneiform, which it is hardly likely that anyone in later times could read.

Should the Babylonian archives at any time give us any authentic information regarding the expeditions of Sargon and Naram-sin into Syria (according to Nabonidus' inscription about 3750 B.C.), we may expect to find that there was in Phœnicia in the fourth millennium a state of things more or less similar to what we find two thousand years later when the Egyptians came to Asia. That the relations between Babylonia and Syria were exceedingly ancient and were never interrupted, is shown by the Amarna tablets; presumably every great power which took shape in Babylon sought to extend its dominion over Syria as well; we know that this is true also of the Elamite conquerors (about 2200 B.C.). Hence the use of the Babylonian language and script was familiar at the court of all the Syrian princes whether Semitic or not. It is specially, however, in the sphere of art and religion that we can see how ancient and deeply-rooted Babylonian influence was, and we shall find this to be the case in Phœnicia as well as elsewhere. But there must always have been close relations also with the empire on the Nile.[1]

These long ages are, however, gone beyond recall. Our information regarding the history of Syria, and therefore of Phœnicia, begins with the Egyptian conquest in the sixteenth century. Even then, however, the details supplied by the triumphal inscriptions of the victorious Pharaohs are meagre to the last degree; it is only the annals of Thutmosis III. that yield somewhat fuller material, to which are to be added notices in Egyptian works, such as pre-eminently the papyrus Anastasi I. (see PALESTINE, § 15), where Phœnician (among other) places are named. Our store of facts receives important additions from the Amarna tablets.

For the centuries from the ninth to the seventh we have good information in the Assyrian inscriptions (cp Fr. Del., *Wo lag das Paradies?* 281 *ff.*); and, moreover, most of the Phœnician towns are occasionally mentioned in the OT.

From these sources, we obtain the following list of Phœnician towns from Carmel northwards:—

4. List of Phœnician towns.

1. Acco (עַכּוֺ, Judg. 1 31; Josh. 19 30 corr. for עַכֹּה), a separate principality in the Amarna tablets. See PTOLEMAIS.

2. Akzib (אַכְזִיב, Egyptian *'Aksapu*, Ass. *Akzibi*). See ACHZIB.

3. Mahalliba (so in Assyrian; מַחְבֶּל, in Josh. 19 29 [see AHLAB, n.]; corrupted to אַחְלָב in Judg. 1 31).

Akzib and Mahalliba do not occur in the Amarna letters; they were small towns probably belonging to one of the neighbouring principalities.

4. Ḳanā (קָנָה, Jos. 19 28)=Eg. *Ḳanā*, a separate principality in the Amarna letters. See KANAH.

5. Tyre (צֹר, 'the rock'; old Latin Sarra), on a rocky island in the sea, about half an English mile (4 stadia) from the shore, with an area of about 130 acres, without wells or vegetation, In time of war, when the mainland was in the hands of the enemy. the Tyrians had to depend on water from cisterns; in ordinary times the water supply was carried over in boats, as is already mentioned in pap. Anastasi. On the coast was a suburb which the Greeks called Palætyros. They wrongly supposed the settlement on the shore to be older than that on the island. The local name was Usu or Uzu (Ass. Ushu=Eg. Authu), often mentioned in the Amarna tablets. There is much probability in the suggestion of Prašek and Cheyne (see ESAU, HOSAH), that Usoos, the brother of Hypsuranios of Tyre in Philo's story, the man who first ventured to sea on a log, is simply the eponym of Palætyros.

6. Sarepta (צָרְפַת), a place at the foot of Lebanon belonging to Sidon (1 K. 17 9)=Eg. Zarpta, Ass. Ṣariptu, not mentioned in the Amarna tablets. Cp ZAREPHATH.

7. Sidon (צִידֹן), the greatest of the Phœnician or 'Sidonian' towns, and already in the time of the Amarna letters the principal rival of Tyre, with a harbour secured seawards by a range of rocks. See SIDON.

[1] This is sufficiently proved by the fact that from very early times Byblos was known to the Egyptians (as 'Kupna'), and that the prescriptions preserved on the papyrus Ebers (written about 1550 B.C.) mention a remedy of 'a Semite from Byblos' in which several Semitic loan-words occur (cp WMM, *Ægyptiaca*, 77 *ff.*). See GEBAL i.

8. Berytus (Biruta in the pap. Anastasi, Birutu and [much more frequently] Biruna in the Amarna letters), the modern *Beirūt.* In ancient times it was not an important place. In the time of the Amarna letters it belonged originally to the principality of Byblos, and afterwards became independent; it does not occur in the OT or in the Assyrian inscriptions.

9. Byblos (Phœn. *Gebal;* see GEBAL, i.; גְּבַל, Josh. 13 5 1 K. 5 32 Ezek. 27 9, Ass. *Gublu*, Egyptian *Kupna*), the seat of a great goddess, 'the mistress of Byblos' (Baaltis), mentioned in pap. Anastasi and very often in the Amarna letters. Byblos stood in relation with Egypt from very ancient times (see col. 3733, n. 1), and always was one of the principal Phœnician towns; it was in possession of the greater part of the shore of Mt. Lebanon from Beirūt northwards. In the time of the Armarna letters it was lord of Berytos and of two other places on the coast, Sigata and Ambi. Southwards of Byblos runs the stream Nahr Ibrāhīm, the ancient Adonis, associated with the death of ADONIS (*q.v.*, § 2). At its sources lay the sacred Apheḳa, אפק, Josh. 13 4 19 30 Judg. 1 31 (see APHEK, 1). The town Tripolis is of much later origin (see below, § 21).

10. Arka at the northern end of the Lebanon range on the plain of the Eleutherus (Nahr el-Kebīr), by which the main road led from the coast to the Orontes-valley. This route is called by Thutmosis III. 'the coast-road,' by which he attacks the town 'Arḳantu. This town can be no other than 'Arḳa. In the Amarna tablets it is called Irḳata and has its own king; the Assyrians call it Arḳa; only Shalmaneser II. uses the older form Irḳanata. In the OT 'the Arkites,' הָעַרְקִי, are mentioned in Gen. 10 17 (see ARKITE).

11. Simyra, at the northern end of the Eleutherus plain (=Eg. Zamar, Ass. *Ṣumuri* and *Ṣimirra*), is often mentioned in the Amarna tablets; the Ṣimyrites, הַצְּמָרִי in Gen. 10 18 (see ZEMARITE).

12. Arados, on a small rock-island opposite Jebel Noṣairīye, in position and importance equal to Tyre, and already in the Egyptian period one of the principal seafaring places of Syria. Its Phœnician name was ארוד, Arwād (now Ruād), הָאַרְוָדִי, Gen. 10 18 Ezek. 27 8 11=Eg. *Aratu(t)*, Ass. *Arvada.* See ARVAD. Opposite to it lay a place called by the Greeks Antaradus (later Tortosa, now Ṭarṭūs); farther southwards, Marathus (now 'Amrīt) belonged to its territory. Marathus acquired importance and independence only in Hellenistic times (see below, § 22).

13. In Gen. 10 17 between the people of 'Arḳa and Arados are mentioned הַסִּינִי, 'the Sinites,' the inhabitants of Sin (see SINITE). This town, identified by Delitzsch (*Par.* 282) with Sianu in the Assyrian inscriptions, is not otherwise known.

The names of the dynasts of Tyre, Byblos, Arḳa, in the Amarna letters show that the inhabitants at that time were Canaanites—*i.e.*, Phœnicians. For Arados we have no direct proof; but its position is characteristically Phœnician, and no one will doubt that, as in later times (in the Assyrian inscriptions its kings have Phœnician names), so already in the sixteenth century it was inhabited by Phœnicians.

The Pharaohs of Egypt began the conquests of Syria at the end of the sixteenth century, a short time after the final expulsion of the Hyksos (see EGYPT, §§ 53 *ff.*). Thutmosis I. was the first who overran the whole of Syria to the banks of the Euphrates, and received the tribute of its dynasts. His son Thutmosis III. (1503-1449), in his twenty-second year, had to begin the conquest anew. He first defeated the Canaanites in the battle of Megiddo, and then conquered the northern parts of Syria. Thutmosis III. is the founder of the great Egyptian empire. Most of the Phœnician towns appear to have acknowledged his sovereignty without much fighting; only Simyra and Arados had to be taken by force. Simyra received an Egyptian garrison and became the principal stronghold of the Egyptian dominion on the coast. All the kings and petty princes of the Syrian and Phœnician towns became vassals of Egypt; they had to pay tribute and supply provisions for the Pharaoh and his army; their sons were educated at the Egyptian court and received their principalities from the hands of the Pharaoh, even if they succeeded their fathers. Under Amenophis II., who suppressed a great rebellion, and Thutmosis IV. the Egyptian supremacy remained unshaken; but during the long and peaceful reign of Amenophis III., at the end of the fifteenth century, its strength began to decline; and under his son Amenophis IV., whose interests were absorbed by the religious reformation he attempted in Egypt, it broke down altogether. From the north the Hittites invaded Syria and took one place after another; and they were supported by the nomads

5. The Egyptian dominion.

of the desert, and by many of the local dynasts who longed for independence (see HITTITES, §§ 8 *ff.*). Among these, Abdaširta and his son Aziru, the dynasts of the Amorites, in the northern part of the Lebanon, took a leading position. The Phœnician towns were divided; all their kings tried to gain as much as they could for themselves, but they all pretended to be faithful vassals of Egypt, even if they did as much harm to its interests as was possible to them. The Amarna tablets give a very vivid picture of these troubles. We see that Arados made itself independent; Simyra was conquered and destroyed by Aziru; the king of Arḳa was slain; the king of Sidon supported the rebels, in spite of his loyal letters, while Rib-hadad of Byblos held out to the last on the Egyptian side. In Tyre the king and his wife and children were slain; but here the Egyptians gained the supremacy again, and the new king Abimelech proved a faithful vassal like Rib-hadad. Both were pressed hard by the rebels. Usu was occupied by the Sidonians, who were supported by a fleet from Arados, and the Tyrians on their island suffered severely for the want of wood and water. Rib-hadad lost one part of the Byblian territory after another, and the inhabitants of Byblos had to sell their sons and daughters in payment of the provisions they imported from the sea. At last, when Rib-hadad had gone for help to Berytus, where an Egyptian officer was posted, his subjects revolted, shut the gates against his return, and joined the enemy.[1]

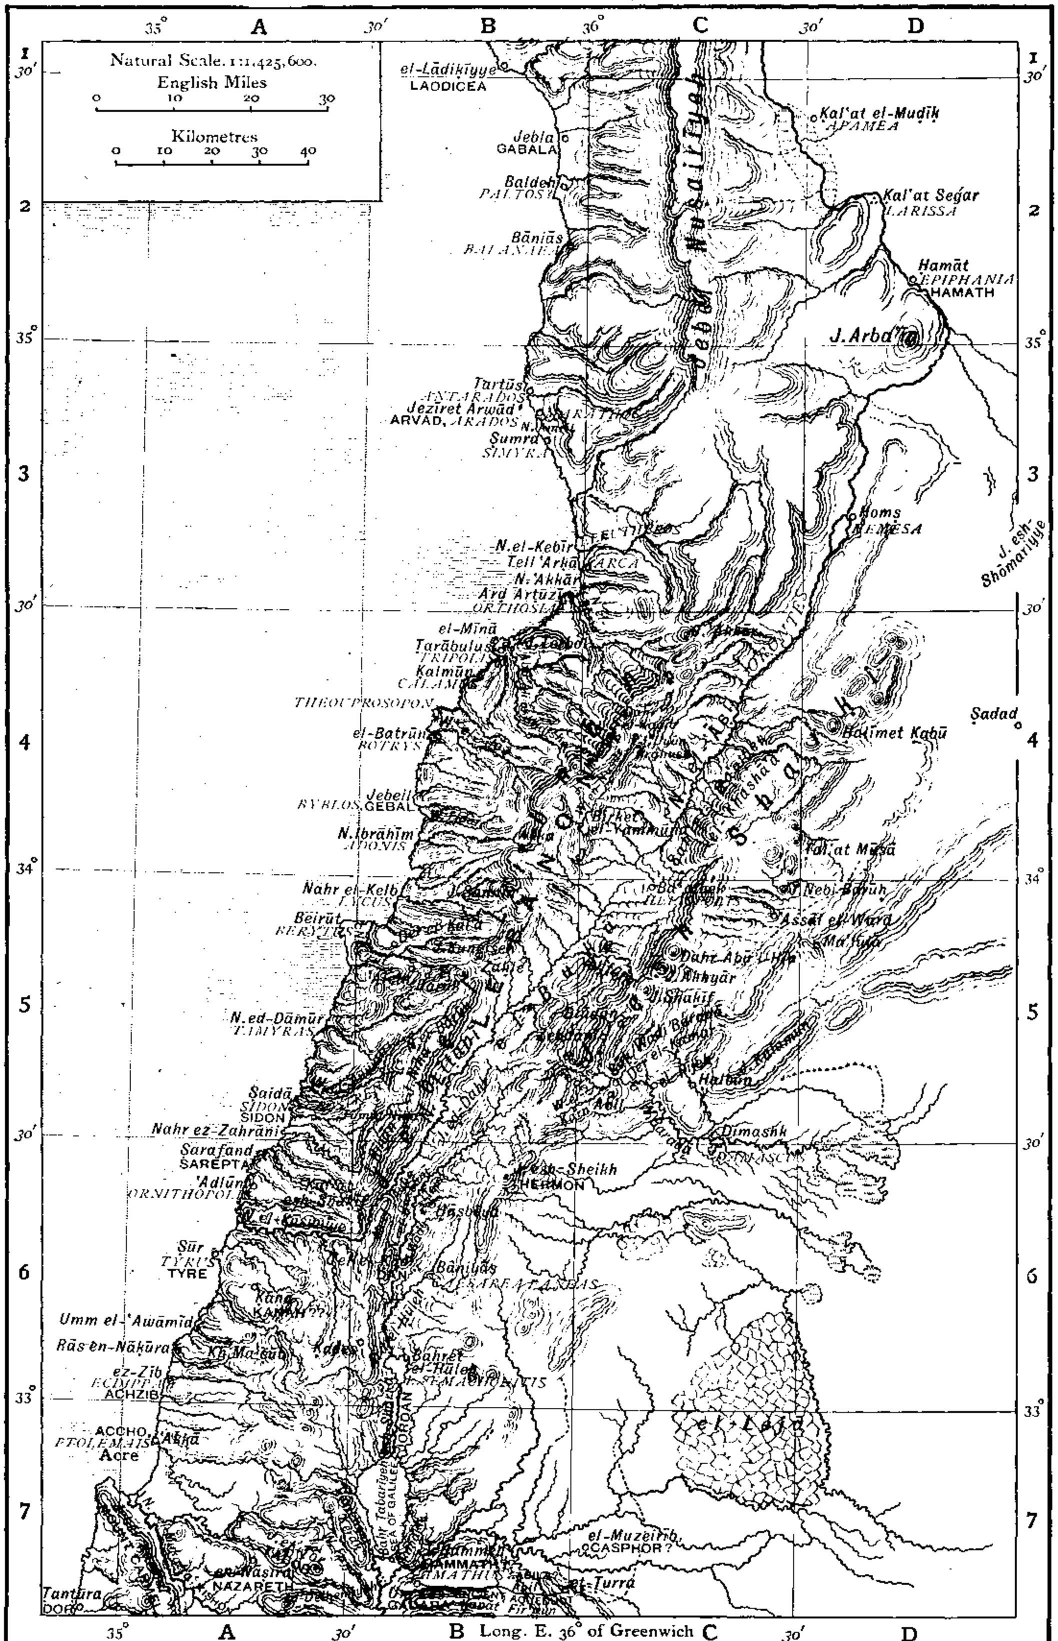
In the religious troubles under Amenophis IV. and his successors, the Egyptian power in Asia was reduced to nothing. Sethos I. (Setoy, about 1350 B.C.) had to begin the conquest anew. He slew the Bedouins, occupied Palestine and southern Phœnicia, made the Syrian magnates cut trees on the Lebanon for his buildings in Egypt, and fought, as it seems, with varying success against the Hittites. Neither Sethos, however, nor his son Ramses II., in spite of his victories, was able to subjugate the Hittites and the N. of Syria again. At last Ramses II. concluded a treaty with the Hittites, by which both empires recognised each other as equals and became friends. From that time (about 1320) onwards, Palestine and southern Phœnicia were for more than a century in the possession of the Egyptians. The boundary seems to have been formed by the Nahr el-Kelb, N. of Beirût, where three tablets of Ramses II. allude to his victories and fix the frontier; unfortunately, they are in very bad preservation. A visit which the king of Tyre paid to Egypt is mentioned in pap. Anastasi IV. *verso* 6, *l.* 3.

The peaceful state of Syria was again disturbed, first by the decay of the Egyptian power under the weak successors of Ramses II. and by the internal troubles which led to the rise of the twentieth dynasty with Setnekht and Ramses III., and perhaps also by a similar decay of the very loosely organised Hittite empire. Then followed the great invasion of Syria by a migration of peoples from Asia Minor and Europe, who came both by land and by sea; a migration about which some information has come down to us in the inscriptions of Ramses III. (about 1200 B.C.), who defeated the invaders on the frontier of Egypt. The final result of this migration was the occupation of the coast of Palestine by the Zakari (in Dor) and the Philistines (in Ashkelon and the neighbouring towns).

The empire of the Hittites henceforth disappears; it is dissolved into a great number of smaller states. Ramses III. still maintained a part of Canaan and fought against the Amorites; but under his feeble successors the power of the Pharaohs in Asia was again reduced to nought, although they never gave up the claim of supremacy over Palestine and Phœnicia. We possess part of an account of an official of the temple of Amon in Thebes,[2] who was sent by the high priest Hriḥor and the prince of Tanis Smendes (afterwards the first king of the twenty-first dynasty, about 1075 B.C.), to Byblos in order to get timber from Lebanon for the sacred bark of the god, and brought a statue of the god with him for his protection. The Phœnicians still regarded the great god of Thebes with some awe; nevertheless the Egyptian messenger was received with bad grace by Beder, prince of the Zakari of DOR (*q.v.*), and worse still by Zekar-ba'al prince of Byblos (see GEBAL i.). The latter proved that neither he nor his ancestors had been subjects of the Pharaohs, and when at last he gave the timber on religious grounds, he exacted the promise that he should be paid for it on the envoy's return.

The father-in-law of Solomon, and afterwards, in Rehoboam's time, Shishak, the first Pharoah of the twenty-second dynasty, once more renewed the Egyptian campaign to Palestine, but only with momentary success. Farther northward no Egyptian army again penetrated until the time of Pharaoh Necho in 608. There was no dominant power in Syria either, and the invasion of Syria by Tiglath-pileser I. who came to Arados and hunted in the Lebanon, was only a passing episode. So the Phœnician towns were left to themselves; the period of their rise and greatness begins, and with it the dominating position of Tyre in Phœnicia.

6. Phœnician colonies. The prosperity of Phœnicia was the result of sea-trade and colonisation. For a long time, scholars were inclined to put the beginning of Phœnician colonisation into much earlier times, and to suppose that in the second millennium B.C. they were dominant on all the islands and shores on the Ægean sea. We have since learnt, however, that this was a mistake. Certainly the Phœnicians went to sea as early as in the time of Thutmosis III. and his successors, and on the other hand, numerous remains in Greece and Egypt prove that there was a lively intercourse between the E. and the Greeks of the Mycenæan period during the whole time of the Egyptian empire; but the Oriental people, which at this time was most nearly connected with Greece, were the inhabitants of Kaft; and we know now that this was not Phœnicia, but another country farther to the W. (cp § 1).



On the other hand, the Greeks of the Mycenæan time (with Crete and Argos as the great centres of their civilisation) were far more enterprising than scholars had supposed; they came to the E. as mercenaries, pirates, and tradesmen, and brought their wares (Mycenæan pottery, arms, etc.) to Cyprus and Egypt. There can be no doubt that at a very early period (perhaps in connection with the great migration under Ramses III.) they settled on the southern coast of Asia Minor (Pamphylia) and in Cyprus, before the Phœnicians had any colonies there. In the time of the Amarna tablets there were no Phœnician colonies; probably their colonisation did not begin before the twelfth century, and it never reached the extent which used often to be dreamt of. In Cyprus they founded Citium and some other places; but to the Ægean sea they always came only as traders (as we see in Homer), and never possessed more than a few factories (probably on some islands, on the Isthmus of Corinth, etc.), from which they carried on their trade with the Greeks. This is the character of Phœnician colonisation generally; by far the larger number of the Phœnician colonies were mercantile settlements, factories, planted at sheltered points of the coast, or, still better, on a rocky island off it, like the towns of Phœnicia itself.

For the task of occupying extensive territories, for subjugation of foreign peoples or even assertion of political supremacy over them, the Phœnician cities were not powerful enough; they did not even possess

[1] For the chronology of Rib-hadad's letters see Knudtzon in *Beiträge zur Assyriologie*, 4 288 *ff.* (1901).

PHŒNICIA

the interior of the country adjacent to themselves. Never, for example, could such an idea have occurred to them as that of bringing a people like the Greeks to a condition of dependence. The history of Phœnician trade and colonisation presents many analogies with those of Portugal and Holland. The territory discovered by the Phœnicians and opened up to their commerce was much too large to be acquired by them. As a rule they were quite satisfied if they could carry on business in a peaceful way, exchanging the native raw products for the articles of industry and luxury produced by the East; and for this purpose the small settlements they possessed furnished a sufficient basis of operations. This fully explains (1) why the colonies continued to be dependent on the mother country; (2) how it came about that, when the nation within whose territory they lay gained in political and commercial strength, these colonies could, quite easily and without a struggle, disappear completely and leave no trace (as for example on the Ægean, and for the most part also in Sicily); (3) how it was that their influence on the nations with whom they had dealings was always so slight and for the most part limited to trade transactions and the transmission of manual dexterities.

Colonisation of a more thorough order, out of which sprang large and flourishing new commonwealths, occurred only in Cyprus and on the north coast of Africa. Besides this, Gades, and some other colonies in the land of Tarshish—*i.e.*, Southern Spain—ought to be mentioned here. When we consider the smallness of the mother-country, this achievement was indeed of itself no inconsiderable performance, rendered possible only by the fact that a great proportion of the settlers came from the Syro-Palestinian interior, the Phœnician towns in many cases supplying only the leaders and mercantile aristocracy of the new community. Occasionally also, as the legendary story of the founding of Carthage shows, internal disputes may have led to the migration of the defeated party.

All the Phœnician colonies were anciently regarded as having been founded from Tyre, and so far as the towns of Cyprus and North Africa are concerned this is confirmed by all our other information. It cannot be shown that any other of the Phœnician towns planted colonies.[1] We shall see that within the same period Tyre had a leading position also in home politics.

A splendid picture of the commerce of Tyre is given by Ezekiel[2] (27). The prophet represents the nations

7. Trade, industries.

as the *servants* of Tyre; but this is only to heighten the impression of the queenly city's greatness. It is plain that the Phœnicians had commercial relations with countries in which they neither had nor could have any colonies.

Apart from Ezekiel, and from the evidence of Greek writers, we have the four Greek words *χιτών* (כתנת), *χρυσός* (חָרוּץ), *ὀθόνη* (אֵטוּן), and *παλλακίς* (פילגש), as records of early Phœnician trade with Greeks. In Egypt we are told of a 'Tyrian quarter' at Memphis (**Τυρίων στρατόπεδον**, Herod. 2 112). The friendly relations between Hiram and Solomon (who had command of the harbours of Edom) enabled the Phœnicians to carry out (with Solomon) naval expeditions to the coasts of the Arabian Sea and the Indian Ocean as far as Ophir (1 K. 9 26 *ff.* 10 22). With the loss of Edom this field of activity was closed; on a later attempt of the men of Judah to reopen it see JEHOSHAPHAT.

The Phœnicians had also an overland trade, though this was less important than the waterborne. First in importance as Phœnician marts were the great trading *cities of Syria—Damascus, Hamath, etc. It is certain*, however, that Phœnician merchants had also direct relations with regions much more remote—Babylon, Nineveh, and various trade centres of Asia Minor and Armenia, as well as of Arabia. Detailed information, beyond what is known of ancient oriental commerce in general, is wanting here. The sketch given by Ezekiel (27) tells us only that all the peoples there enumerated brought their wares to the Tyrians, and this is quite accurate. It does not often occur that a centre of sea trade is also at the same time a city with extensive inland commerce. There can be no doubt whatever that the land commerce of the Semitic world was mainly in the hands of Syrian (Aramæan) merchants, and, next to these, in the hands of Arabian tribes living in the desert. It was by this agency that the wares of the East were brought to Tyre and the other cities of Phœnicia, where the products of the West, and of the native industries of Phœnicia, were received in exchange for them. In particular it may be regarded as certain that, apart from a short-lived attempt under Hiram, the Phœnicians never themselves brought from the country of its production the frankincense with which its merchants supplied the Mediterranean coasts (Herod. 3 107). Originally the incense-trade was from hand to hand; but afterwards, from the beginning of the last millennium B.C., the S. Arabian tribes—the Sabæans, and still more the Minæans—themselves took it up and sent yearly caravans to the Mediterranean centres of civilisation.

Herodotus (1 1) narrates: 'the Phœnicians as soon as they had arrived on the Syrian coast from their original seat on the shore of the Erythæan (Arabian) Sea at once began to make extensive voyages, and exported Egyptian and Assyrian (*i.e.*, according to the terminology of Herodotus, Babylonian) wares.' The picture thus given, though anachronistic, quite accurately expresses the essential features of Phœnician trade. Just as the history of the Syrian countries and the course of their civilisation was determined by their intermediate position between Babylon and Egypt, the two great foci of civilisation, so also it was from these countries that the Syro-Phœnician merchants derived not only many of their wares but also above all the patterns from which they worked, and their first artistic processes and methods.

By the Greeks the Phœnicians were regarded as the masters of invention; not only glass-making (cp GLASS, § 1), the preparation of purple and metal-work, but even weights, measures, and the art of writing (see WRITING) were carried back to them. The actual state of the case is certainly quite otherwise; not one of these discoveries was of Phœnician origin. All these conveniences the Phœnicians in common with the other Syrian peoples borrowed; but they carried them much farther after the appropriation.

Although the Phœnician cities drew a large proportion of their commercial wares from the interior, an extensive and busy native industry soon arose. Phœnician purple, Phœnician garments in colour, and Phœnician metal-work were specially famous, as the Homeric poems abundantly show (see *Il.* 6 289, *Od.* 15 415; *Il.* 23 741, *Od.* 4 618, 13 288 15 460, *Il.* 11 20). In *Od.* 15 425 Sidon is spoken of as 'rich in copper' (*πολύχαλκος*). Similarly the bronze and silver pateræ with engraved work after an Egyptianising style which have been found in the palace of Kalaḥ (Nimrūd), at Præneste in Latium, and elsewhere, are of Phœnician workmanship. The Egyptian monuments, too, frequently mention, in catalogues of tribute, Phœnician vessels of gold and silver, as also of iron and copper, often with blue and red enamel (WMM, *As. u. Eur.* 306).

The character of the Phœnician merchant nation, so receptive, so practical and soberminded, is nowhere

8. Art.

more strikingly seen than in the region of art. The question as to the essential nature of Phœnician art has for long been one of the most burning and difficult in the whole field of archæology. The difficulty lay partly in the fact that until now from Phœnicia itself only a very few monuments, none at all of a date earlier than the Persian period,

[1] Two apparent exceptions—(i.) Leptis between the two Syrtes, the founding of which is attributed by Sallust (*Jug.* 78) to Sidonians whom internal dissensions had driven from their home, and (ii.) the island Oliaros near Paros which is called by Heraklides Ponticus in Steph. Byz. Σιδωνίων ἀποικία—are to be explained by the extended use, mentioned above, of the name Sidonians. Leptis, which Pliny (5 76) speaks of as a Tyrian settlement, was really founded by the Carthaginians about 512 B.C. Nor is any weight to be attached to the facts that according to Steph. Byz. the island Melos was originally called Byblis from its mother town, and that Tarsus (which was not Phœnician at all) is in Dio Chrysost. (*Or.* 33 14) represented as being colonised from Aradus, not, as the other authorities have it, from Argos.

[2] The text is unfortunately not free from corruption (see especially *vv.* 19 23). See CANNEH, CHILMAD, JAVAN, § 1, etc.

have come down to us. The chief trouble, however, was created by the investigators themselves, who set out in search of a 'Phœnician style' and could not find one. The solution of the problem is very simple; we are now able to say very positively that there never was such a thing as a Phœnician style. Phœnician art, like that of Syria in general, simply exhibits in combination the *motifs* derived by it from a variety of quarters (in the first instance mainly from Babylon and Egypt), without any attempt at fusing them into any higher essential unity.

The stele of king Yeḥawmelek of Byblos (Persian period) represents the king, in Persian dress and bearing, before a seated goddess who is exactly reproduced after the pattern of Isis and Hathor with cow's horns and the sun-disk upon her head. Over her head hovers, as in all Egyptian steles, the winged sun-disk (Perrot and Chipiez, *Art in Phœnicia*, 1 69, fig. 23). This is typically Phœnician. A stele of Marathus exhibits a god in Egyptian dress, wearing an Egyptian helmet with the uræus serpent, and holding in his right hand an Egyptian hooked sword. With his left hand he holds, in Assyrio-Babylonian fashion, a lioness by the legs; his feet rest upon a lioness who in turn stands upon a hill-like pedestal—*motifs* which Hittite-Asiatic art developed still further from Babylonian models. Above the god hover two Egyptian emblems; the moon (crescent, with full moon shown within) and the winged sun-disk (*op. cit.* 2 11, fig. 7).

A few examples may be given of the way in which borrowed artistic symbols were so modified as to lose their original meaning. The Egyptian emblem of the moon became a half-moon, with the sun or a star above it; the sphinx became womanlike in form; the uræus serpents dependent from the winged sun-disk were changed into a bird's tail; out of the cross  grew the symbol  so familiar on Phœnician seals and Carthaginian steles, having, apparently, arms and legs added to it. In decoration, however, Phœnician art (and Syrian art generally) shows a certain independence in its employment of flower-like ornaments—lotos blossoms and rosettes—or of ornaments taken from the animal world, such as heads of wild goats, oxen, lions, and so forth. In this field a decorative 'Western-Asiatic' mixed style was developed, which, as already indicated, began to exert an influence on Greek art from the ninth century onwards.

For the rest, the art of Syria and Phœnicia follows the 'fashion,' that is, the ruling power. In the second millennium B.C. Egyptian models prevail; with the rise of Assyrian ascendancy, Assyrio-Babylonian *motifs* come more strongly into play; and these in their turn had to give place to the influence of Persia. Alongside of these Asiatic models, however, from the sixth century onwards, the influence of Greek art made itself increasingly felt, and had already become predominant within the Persian period, in the first instance in the technique (*e.g.*, in coins), and soon afterwards in *motif* as well.

In one department the Phœnicians maintained their superiority—that of navigation. Even in Xenophon's time, when the Greeks, especially the Athenians, had long been keen rivals of the Phœnicians by sea, and had defeated them in naval battles, a great Phœnician merchantman was regarded as a pattern of order and of practical outfitting (Xen. *Œc.* 8 11); and still later even Strabo speaks of the absolute supremacy of the Phœnicians in the arts of seamanship (xvi. 2 23). When Sennacherib caused Syrian carpenters to build him a fleet upon the Tigris for the subjugation of the Babylonians, he manned it with Tyrian, Sidonian, and Greek (Cyprian) sailors, just as Alexander brought Phœnician ships to Thapsacus on the Euphrates for his projected Arabian campaign (Arr. vii. 19 3). When the Egyptians under Psammetichus and Necho brought together a fleet it consisted mainly of Phœnicians; and it was by Phœnicians that, under Necho, the circumnavigation of Africa was accomplished (Herod. 4 42). In the fleet of Xerxes the Phœnicians (and of these the Sidonians) supplied the best vessels (Herod. 7 96). The war between the Greeks and the Persians was pre-eminently a struggle between the sea-power of Greece and that of Phœnicia.

9. Navigation.

We proceed now to a brief survey of the Phœnician religion.

10. Religion: underlying conceptions.

The Phœnicians applied to their gods the term *'ēlīm*[1] less frequently than the longer form, *'alonim* (so in the inscriptions of Eshmunazar and Yeḥawmelek), fem. *'alonot* (in Plautus), just as in Heb. the plu. אלהים, and in Aram. the lengthened form *ilāh*, came to be the forms in common use (cp NAMES, § 114 *f.*). The general word for 'goddess' in the Semitic dialects is either *ilât* (cp below) or *'Aštar* (Bab. ištar); but the Phœnicians employed exclusively the form *'Aštart*, *'Aštoret* (with the feminine terminations added to the feminine word).

Like other Semites, they believed that these divine powers can enter into relations with human communities, and that when they do so they accord them their protection and live a common life with their clients. They bestow blessing, prosperity, and victory, grant increase of the flocks and herds, and of the field, and in return have a share in all that their worshippers acquire or enjoy, above all in the common meal and in the spoil. In this, essentially, do worship and sacrifice consist (cp SACRIFICE). The tutelary deities are the lords and kings of the community which worships them; the community and each individual member of it are their servants or handmaidens or even their Metoikoi (*gēr*, very common in Phœn. proper names), their protegés, taken up and cared for by them. [Cp STRANGER.]

Connected with this is the idea that the gods are the blood-relations of their worshippers—an idea which the Phœnicians shared with the rest of the Semites, as is shown in the proper names which designate an individual as the brother or sister, father or mother, son or daughter of the divinity (see ABI-, AMMI-, NAMES IN, etc.). These names, however, are not of frequent occurrence among the Phœnicians; the idea that underlies them had plainly ceased to be intelligible.

The gods manifest themselves to men in objects the most diverse. Not unfrequently in rocks and mountains; thus the name given by the Greeks to the conspicuous headland between Byblos and Tripolis ('Theouprosōpon'), plainly represents the Phœnician *Pĕnū'ēl*; see PENUEL. Near Theouprosopon there is a dedicatory inscription to Zeus (Renan, *Miss. en Phén.* 146), obviously the El of the headland. Another form of manifestation was in trees and animals, especially in serpents. Still more prevalent, and manifestly also of greater antiquity, is the idea that the god has taken up his abode in movable stones or bits of wood. These are veritable fetishes, which can be carried about everywhere, and in which, accordingly, the divinity in the primitive nomad stage could accompany the tribe on its wanderings. Such 'animated stones' were supposed to have fallen from heaven, and were called by the Phœnicians βαιτύλια—*i.e.*, bait-el, 'God's house'; cp Jacob's pillar at Bethel[2] (see MASSEBAH). These stones may originally perhaps have remained unhewn; but in later times it became usual to give them a certain form—either a cone, or an obelisk with a pyramid-shaped head, or even a simple stele.

Such 'set-up' stones were to be found in every cult[3] and at every altar; they form the most usual dedicatory offering to the

[1] More particularly in the names *'Abd'elim* ('Αβδήλιμος, Renan, *Miss. en Phén.* 709, in meaning identical with 'Abd'alonim 'Αβδαλώνυμος), servant of the gods; *Amat'elīm*, maidservant of the gods, *Mattān'elīm* (gift of the gods, cp *Muthunilim*, *CIL* 8 10525), *Kalb'elīm*, dog of the gods (*CIS* 1 49; abbreviated to *kalbā*, *ib.* 52).

[2] Cp Philo Bybl. fr. 2, 19, where the *baitylia* are spoken of as an invention of Uranos; Damascius (*Vit. Isid.*, ed. Westermann [ap. Didot], 94, 203) has it that *τῶν βαιτυλίων ἄλλον ἄλλῳ ἀνακεῖσθαι θεῷ, Κρόνῳ, Δι*í*, Ἡλίῳ, τοῖς ἄλλοις.* Hence *bætulus*, a species of magic stone, in Pliny (37 135 etc.).

[3] Thus from the coins of Byblos we know of the cones in the court of the great temple, where the goddess of the town had her seat, and similar objects were to be found in the sanctuary of Aphrodite at Paphos, which, though Greek, was strongly influenced by Phœnicia.

divinity. By the Phœnicians, as by the Hebrews and other Canaanites, they were called *maṣṣēbath* (cp *CIS* 1 44—a maṣṣebah at Kition dedicated to Eshmūn; for votive and burial steles, as in the Piræus Inscr., see *Rev. Arch.* 3 ser. 11 5; *CIS* 1 116 etc.) or, otherwise, *naṣīb* (*CIS* 1 139—a naṣīb at Kition dedicated to Baalshamēm; cp the Malkiba'al steles [see below]; Steph. Byz., *s.v.* Νίσιβις [called Νάσιβις by Philo, 8]; σημαίνει δὲ, ὥς φησι Φίλων, Νάσιβις τὰς στήλας; ὁ δε Οὐράνιος νέσιβις, φησι, σημαίνει τῇ Φοινίκων φωνῇ λίθοι συγκείμενοι συμφορητοί,—in other words, cairns or stone-heaps like the Gr. ἕρματα, out of which on a precisely similar manner arose the hewn Hermæ or symbols of Hermes). Another name is *Ḥammān*, which in Phœnician must have been quite current (see below); it occurs also in OT (Is. 17 8 27 9, etc.) in conjunction with the Ashērim; so too in Palmyra. The name is probably identical with the Ἀμμουνεῖς of the Phœnician temples, from whose mystic inscriptions, according to Philo (1 5), Sanchuniathon derived his wisdom. The origin of the name is uncertain; Ḥammānīm in the OT is best translated 'ḥammān-pillars.'[1] Stone-cones of the kind described are often found delineated in the Carthaginian steles, also upon a stele from Libybæum (*CIS* 1 138). Cp MASSEBAH.

In close association with the stone-pillar we find the erected pole, or the tree-stump, precisely as in the Grecian cultus. This is called Ashērah (אֲשֵׁרָה) as in Hebrew (see ASHERAH). Copies of it in clay are very often found in the ruins of the temples of Cyprus.

A representation of a goddess, in clay, has been found in Cyprus, sitting within the tree-trunk of Ashera (cp Ohnefalsch-Richter, *Kypros*, 1 171; 2 Tab. 17 2), and we hear in the inscription of Ma'sūb of 'the Astarte in the Ashēra.' The word *Ashērah might therefore be used as a divine name. The only* known instance of this, however, is Abd-ašrat (also Abd-aširta) in the Amarna letters, where Ašrat is always written with the determinative sign of deity.

A variety of these poles may plainly be seen in Carthage steles; and closely associated with them, perhaps, are the quickly fading flowers and rootless plants of the Adonis gardens at the Adonis festival (cp ADONIS).

As to the origin of these modes of worship, Philo (2 8) relates that Usoos the brother of Hypsouranios of Tyre (cp below, § 12), after a sea voyage on a tree-trunk, erected two steles to the Fire and the Wind, worshipping them and making an offering of the blood of beasts. After the death of the two brothers, staves were consecrated to them, the steles adored, and their memory commemorated in a yearly feast. These staves and steles are the Ashērim and Maṣṣēbahs or *Ḥammānīm* —in the first instance doubtless, in Philo's view, some specially holy and ancient objects in Tyre.

When a people becomes settled, not only does it itself undergo a change as it accommodates itself to the land which it tills, the city it inhabits, the mountains and streams of its chosen home; its gods also no longer continue the same. They too abandon their nomadic life, settle, and become the lords of the soil upon which they are worshipped.

Thus an *El* or *Ilat* (or Astarte) becomes the *ba'al* or *ba'alat* of a definite locality, the god or goddess of some particular town or hill. Such divinities are many in Phœnicia. Thus the 'god of Sidon' is called 'Baal-ṣidon' (*CIS* i. 3 18 [Eshmunazar], Inscr. of Piræus, *Rev. Arch.* 3 ser. 11 5; on the gods of Tyre see below). The 'goddess of Byblos' is invoked as 'the mistress, the Ba'alat of Gebal' (*CIS* 1 1, cp GEBAL, 1). Rib-hadad too gives her this title in all his letters (the name is always written ideographically). In *Ḳarthadašt* (Kition) of Cyprus the people worship the god of the Lebanon on the mainland opposite, as

11. Gods without proper names.

[1] Baal-ḥammān was the chief deity of Punic N. Africa (found also in Libybæum, *CIS* 1 138). He is the god of the *ḥammān-stele* in which he had his abode, and the steles dedicated to him frequently bear the enigmatical name נצב מלכבעל (*CIS* 1 123 147 194 195 380; *Hadrumetum*, 9). Similarly the god Melki'aštart in Umm el-'Awāmid, S. of Tyre (*CIS* 1 8) and in the neighbouring Ma'ṣūb are designated *El-ḥammān.* His female counterpart is 'the Astarte in the Ashērah of El-ḥammān.' Melki'aštart is in fact the El-ḥammān. The *numen* occupying his *ḥammān*-pillar (Ba'al-ḥammān) is naturally his inferior, who in turn has an Ashērah in which dwells a female being, an Astarte.

'Baal-libanon, their lord' (*CIS* 1 5).[1] Among the hills behind Sidon there occurs a Ζεὺς ὄρειος—*i.e.*, a mountain-god pure and simple—to whom in an inscription (Renan, *Miss.* 397) two lions are dedicated.

A god can also take his name from specified attributes ascribed to him at a particular place of worship, or from his association with some particular religious object or custom.

A well-known instance of this kind is the BAAL-BERITH [*q.v.*] at Shechem: there was also a 'god of dancing' (Lat. Jupiter Balmarcodes, Gk. Βαλμάρκως κοίρανος κώμων), a god worshipped with festal dances at the sanctuary of Dēr el-Ḳal'a in the mountains behind Bērūt (cp *CIG* 4536, *CIL* 3 155, Cler.-Ganneau, *Rev. d'Arch. Orient.* 2 101 *ff.*; Euting, *SBAW*, 1887, p. 407, no. 129). Most renowned of all is Baal-ḥammān (*see above, § 10*).

All these gods and goddesses are strictly nameless, and are merely powers possessing a specified sphere of influence. So also with Ba'al-šamêm (see below, § 12). There is no god Ba'al and goddess Ba'alat. It is only very rarely that a genuine proper name occurs at all. The God of Tyre (Ba'al Ṣōr) indeed bears the name Melḳart (cp § 12); but even this is really no proper name but a compound of *Melek Ḳart*, king of the city. For worshippers, the god of their home, or of the temple which they frequent, is 'the Ba'al' or 'the Ba'alat' without qualification, and in ordinary life no other phraseology is used (cp 1 K. 17 *ff.*)

There is no need to specify what particular god is intended. It is quite usual, therefore, to give children such names as Ḥanniba'al, 'favour of Baal'; 'Azru-ba'al, 'help of Ba'al'; Ba'al'azar, 'Ba'al helps'; Ba'al-hanān, 'Baal is favourable'; 'Abd-Ba'al, 'servant of Baal'; Adoni-Ba'al, 'Baal is lord,' etc. In these cases the giver as a rule has in his mind some such god as Ba'al-hammān, Ba'al-šamēn, Ba'al-ṣidon, or the like. Often enough too, the god's name falls away altogether, and we get such names as Ḥanān or Ḥannō, 'Abdō, etc.

It is easy to understand how, ultimately, this should have given rise to the feeling that there was an absolute god Ba'al of whom the individual Ba'alim are only forms. This feeling must have developed greatly in Babylonia, and, to a certain extent, also among the Aramæans, where Bēl, Aram. B'el, actually became the proper name of a definite deity. It found its way into Phœnicia as well. In the first instance foreigners naturally formed the belief that there was a single Phœnician deity Ba'al. The Egyptians took over his cult and—in the new kingdom—worshipped him as identical with Sutekh (Set). The Greeks always designate him by his Aramaic name as Bēlos,[2] and identify him with Zeus,—and rightly, for everywhere the Baal of a place is the highest god of its proper pantheon. Similarly they explained Βααλτίς (so Philo, 2 25) or Βῆλθις (Melito in Cureton, *Spic. Syr.* 44; Hesych.) as the proper name of the goddess of Byblos. At last the Phœnicians themselves followed the example, at least in their system of the gods—the idea is found in Philo. In the native inscriptions indeed, and so, we may infer, in their worship, it never found a place; only one Greek inscription, from the neighbourhood of Antarados, mentions an altar of Βῆλος; here doubtless the Syrian, not the Phœnician, deity is intended (Renan, *op. cit.* 104).

Ba'alat is never employed in the formation of proper names, and is indeed of somewhat rare occurrence anywhere; to denote the feminine divinity the name Aštart is ordinarily used. In the religious conception, indeed, there is no difference between the two, only Astarte needs no complement of the name of a place; but the Astarte in the *Ashērāh* of *El-ḥammān* mentioned

[1] In Philo 2 7 these gods appear as mighty primæval men, from whom the mountains which they occupy (ὧν ἐκράτησαν) took their names. Thus the Lebanon, Antilibanus, Kasius, mount Βραθύ.

[2] It may here be remarked once for all that, later, the Aramaic form crept into use in all divine names. Philo has only the form Βῆλος. A late inscription from Berytus (Lebas, III. 1854 *d*) presents both forms in the two contiguous names Ἀβιδβηλου and Ὀζερβαλου. In Africa the pronunciation *ba'al* alone is found: cp Hannibal, Hasdrubal, etc. Serv. *ad Æn.* 1 729; 'Saturnus . . . lingua punica Bal deus dicitur.' The identification of Kronos and Ba'al is rare.

above might equally well have been called *ba'alath hā-ashērah.*

The Greeks were quite correct when for the most part they applied the designation *Astarte* to the goddess of Byblos (Cic. *Nat. Deor.* 3 59, Plut. *de Is.* 15). In Tyre Hiram I. built a temple to Astarte (Menander ap. Jos. *c. Ap.* 1 18, cp Philo 2 24). Itoba'al I. was priest of Astarte before he became king. In Sidon Astarte is the principal divinity (so throughout the OT; similarly, *e.g.*, Lucian, *Dea Syr.* 4). The Kings Eshmunazar I. and his son Tabnit are priests; the latter's sister, the queen-mother Am'aštart, is priestess of Astarte (cp inscr. of Tabnit and Eshm. II.); the king Bod'aštart raised a building to her (*CIS* 1 4). By the side of the goddess of the city we find also in Sidon an 'Astarte of the Baal of Heaven' (see below). From what we know we may presume that all the Phœnician towns had an Astarte as tutelary deity.

Alongside of Astarte is found the name Ilāt, 'goddess' (cp above). Ilāt had her priests in Carthage (*CIS* 1 243 *f.*), and, under the name 'the lady Ilāt,' a temple in Sulci. On the other hand, El is never found as the designation of any definite deity, and, even in personal names, occurs only in inscriptions from Byblos, in striking contrast to the Hebrew and Arabic usage[1] (cp NAMES, § 25). The same remark applies to *'adon*, 'lord.' The true name of the god known to the Greeks as ADONIS [*q.v.*] is undiscovered. Perhaps he remained nameless in the cultus, and it may well be that the case is similar with El. The ancients, indeed, have much to tell us of El (whom they identify with Kronos). Philo informs us that Ἦλος was made with four wings, of which two are at rest and the other two outstretched; also, he had two eyes open and two closed, so as to show that in sleeping he also waked and in resting flew. Upon his head he wore (after the Egyptian manner) two feathers. From this description De Vogüé (*Mélanges d' Arch. Orient.* 109) has identified him, perhaps rightly, upon Phœnician seals. His first seat was at Byblos; later he presented Byblos to Baaltis, Berytus to Poseidon and the Cabiri. In conformity with this, we find in Steph. Byz. the founding of Byblos and Berytus ascribed to Kronos. Thus the El of Byblos is probably one of the gods of the Byblos district. Accordingly El forms an element of the name of the king of Byblos, Elpa'al (אלפעל), known to us from coins; and also probably, in spite of the elision of א, in עינל, Ἔνυλος (Arrian, ii. 15 6)—*i.e.*, 'Ain'el, 'Eye of El.' In this case El (as Ba'al elsewhere) must be regarded as the abbreviation of some fuller divine name. But a similar El must also have been worshipped in other towns. It is stated by Philo (ii. 18 24; fr. 34 *f.*) that human sacrifices were offered to Kronos, and the Greek historians constantly speak of Kronos as the god to whom in Phœnicia, Carthage, and Sardinia, children were sacrificed.[2] This Kronos is certainly El, who, according to Philo, offered up his only son Ἰεουδ (cp ISAAC, § 3) in time of famine to his father Uranos, and also killed his son Sadidos and a daughter. Whether there was a separate El in every individual town, or whether he, too, had a no longer ascertainable proper name (such perhaps as El-Ḥamman Melki'aštart) we cannot say.

As man's civilisation and culture advance, the great cosmical forces, on which the course of the world depends, acquire for him increasing interest and importance. At first the community of worship takes no account of them at all. Sun, moon, and stars, it is thought, roll on in their courses unconcerned about men; the seasons come and go whether man sacrifices, or refrains from sacrificing, to the celestial powers by whom these changes are ordered. It is on the local powers who stand under these greater powers that the prosperity a man desires in his own immediate circle and in the home depends—fruitfulness of field and flock, success in trade, victory in war. To these local deities prayers are made and sacrifices offered, and to them the grateful worshipper returns thanks when the god has 'heard his voice and blessed him,' as the standing formula in the Phœnician inscriptions runs. Hence these local gods live with, and in, nature, like the 'Lord' worshipped at Byblos (see ADONIS), who according to the legend, was killed while hunting the boar far up in Lebanon, near the fountain of 'Afka, whereupon the spring became red with his blood (Lucian, *l.c.*).

Similar religious observances are met with elsewhere also. In Tyre the awaking (ἔγερσις; Menand., ap. Jos. *c. Ap.* 1 18, § 119) of Melḳart-Heracles was celebrated in the Macedonian month Peritios (Feb.-March, according to the Tyrian calendar; cp Gutschmid, *Kl. Schr.* 4 474 *ff.*); his death in the West occurs in colonial legends. In other places the gods are associated with other elements. Thus the god of Berytus doubtless a 'Baal Berūt,' is treated as god of the sea (Poseidon; Philo, 2 25). A Poseidon, to whom offerings were thrown into the sea, is found also in Carthage (Diod. 13 83, Polyb. 7 9); but the name by which he was there called is not known. Similarly, in Sidon honour was paid to a θαλάσσιος Ζεύς (Hesych., *s.v.*). In Berytus, according to Philo (2 11 17 25 27), he has associated with him seven other gods, the sons of Sydyk, 'the righteous' (2 11 20—*i.e.*, צדיק), the discoverers and patrons of navigation, called the Kabiri, 'great gods.' We know that their worship also reached Greece; but its Phœnician form is quite obscure.

No such deities are found upon the inscriptions; perhaps we should identify them with the Phœnician Pataikoi mentioned by Herod. (3 37), dwarf-like images placed at the bows of the ships (see CASTOR AND POLLUX)—modifications of the grotesque Besa (Bes) figures (which the Egyptians of the New Kingdom borrowed from the Semites and prized so highly) which appear so frequently upon Phœnician monuments.[1]

When, with the advance in civilisation, the good things of life for which man cares and toils increase, when his interests and connections, both political and commercial, are extended, and the community steps forth from its narrow isolation into a larger world, the local gods no longer suffice. There arises the need for higher powers who can exert their influence and extend their protection everywhere throughout the world. At the same time the religious conceptions are raised and intensified; man begins to realise his dependence upon the great cosmic powers, and feels the necessity of coming into close relations with them. Its influence is shown in two opposite directions; in the elevation of the local deities to a rank in which their influence is not local, or at least not exclusively so, and in the introduction into the local worships of the great cosmic powers, with the development of a worship specially dedicated to them, which gradually pushes into the background and ultimately supersedes the cults of the old local deities. Among the Israelites the first of these two processes triumphed and obtained undivided supremacy; the tribal-god Yahwè became the universal God—the ruler of heaven and of earth, besides whom there is no other. Elsewhere we usually find the two processes going on side by side, with no consciousness of their mutual opposition. So it was in Phœnicia.

We have already seen how it came to pass that the local deities rose to a position of larger significance. It was quite natural that the god who had protected Tyre and made it great and prosperous should continue to grant his aid when his worshippers removed to distant lands and founded cities there; and that the goddess of Byblos and other Astartes should manifest

[1] On the other hand in Syrian territory a god אל is found in the inscriptions of Zenjīrli and Gerjin, among the gods of Ja'udi, but always mentioned after the god Hadad. Along with El is named the god Rkb-'el (pronunciation unknown), who seems to have been the chief divinity of Šam'al (Bauinschrift ed. Sachau, *SBAW*, 1896, p. 1051) and bears the title בעל בית, 'lord of the house' (inscr. of Panamu) [cp WRS, *Rel. Sem.* 94 n.].

[2] Plato, *Minos*, 315; Diodor. 13 86 20 14; cp Justin, 18 6; Plut. *de superst.* 13; Porphyr. *de abstin.* 2 56; Suidas, Σαρδάνιος γέλως=schol. *Od.* 20 302, etc.

[1] W. M. Müller's conjecture (*As. u. Eur.* 310) that they are derived from the Babylonian Izdubar-type seems highly probable.

themselves as givers of prosperity and fruitfulness, and as patrons of sexual life, not within the narrow confines of the city alone ; to those who worshipped them they became gods capable of showing their power far and wide over the earth. For this reason it was that foreigners also turned to them and, to gain their protection, dedicated to them altars and temples. The festival of Adonis, for example, was celebrated throughout the Phœnician world ; the god of Lebanon was worshipped in Cyprus, etc. Of still greater importance in this connection is the similarity of the functions of the various gods, the Baals, Astartes ('Aštārōth), etc., leading as it does inevitably to the view that they are all but forms of one and the same mighty universal being. They are deemed to be the gods who rule the world and regulate all the phenomena of the cosmos. Here, especially, the Babylonian conception that the gods manifest themselves in the stars, finds a place (so Astarte, according to Philo, 2 24). In the cultus all these views are represented ; but the local tie, by which their worshippers stand to them in a quite different relation from that which they occupy towards similar gods of neighbouring places, still subsists. In feeling, however, and in religious idea, the sense of this local tie retreats more and more into the background, and ultimately its place is taken by the larger, more generalised conception of *the Baal, the Astarte,* etc., spoken of above.

There are instances, however, of the opposite development also. In isolated cases in the Phœnician cities, on the evidence of proper names, we can trace the worship of the sun-god Shemesh (Adoni-šemeš, *CIS* 1 88 [Idalium] ; Abd-šemeš, *ib.* 116 [Sidon] ; 107 [Citium]), and of the moon-god Yeraḥ[1] ('Abd-yeraḥ, on a seal, *TSBA* 5 456). Reference in this connection may be made also to the earth-goddess, invoked in Carthage, along with the sun and the moon (Polyb. 7 9), of whom Philo has much to say.

Above all, however, worship was given to the 'god of heaven' Ba'al-Šamēm.

His temples are found in Tyre,[2] in Umm el-'Awāmīd (*CIS* 1 7), Carthage (*ib.* 379), on the Hawk's Island near Sulci in Sardinia (*ib.* 139). He is the Ζεὺς ἐπουρανιος of the altar in Sarba beside the Nahr el-Kelb near Beirūt (Renan, *op. cit.* 332). Carthage borrowed his cult from Cyprus (Just. 18 5). To the religious consciousness of a later age he became the chief deity, equivalent to the Greek Zeus (cp Plautus, *Pœn.* 5 6 *f.*); he alone of all the gods is by Philo explained not as a deified man, but as the sun, who has been invoked from the earliest times (2 5). This narrows the conception far too much, although we may assume that he was believed to manifest himself particularly in the sun.

Corresponding to the 'god of heaven' we have the 'goddess of heaven,' the 'Astarte of the heaven of Baal' (עשתרת שם בעל), to whom we find Ešmun'azar setting up a temple by the side of the sanctuary of Ba'al-Sidon—a temple which is not to be confounded with that 'of our lady Astarte in the sea-land (coast-land).' This goddess was worshipped by other Syrian tribes as well.

Herodotus calls her Aphrodite Urania (i. 105 131), and (very incorrectly) regards the sanctuary of the goddess of Askelon [Atargatis—*i.e.*, the 'Attār (Astarte) of the god 'Ate (see ATARGATIS)] as the centre of diffusion from which her worship passed to Cyprus and Cythera. Compare also the *'Ataršamain—i.e.*, Atār of heaven (an Aramaic form)—worshipped by an Arabian nomad tribe (Ašur-bani-pal, col. viii. 112 124 : cp *KAT*(2) 148 414), and the 'queen of heaven,' worshipped in Jerusalem (Jer. 7 18 44 17 *ff.*). The merchants of Citium brought the cult of their goddess with them to Athens and erected a sanctuary to her there in B.C. 333 (*CIA* 2 168). In *CIA* 2 1588 (a tolerably old votive-insciption erected by Aristoclea of Citium) she is called 'Αφροδίτη οὐρανία. See QUEEN OF HEAVEN.

This Astarte was pre-eminently worshipped in Carthage and all over Punic North Africa. In Latin authors and inscriptions she is called Cœlestis, 'the heavenly goddess.' She is a virgin (Aug. *Civ. Dei*, ii. 4 26 ; *CIL* 8 9796 ; 'Deæ magnæ virgini cœlesti,' etc.), and so not the wife of Ba'alšamem ; but she stands in the inscriptions by the side of Saturn (*i.e.*, probably, Ba'al-ḥammān) as the chief goddess of N. Africa. In the treaty with Philip (Polyb. 7 19) the two appear as Zeus and Hera at the head of the Carthaginian pantheon (cp Aug. in *Heptateuch.* 7 16 : 'lingua punica Juno Astarte vocatur'). Ancient writers identify her more commonly with Urania. Her image, probably a cone of stone, was brought by the emperor Elagabalus to Rome, and wedded to the stone fetish of Emesa which was an object of veneration with him (Herodian, 5 6, Dio Cass. 79 12). For her aspect as moon-goddess, see below, § 13.

The divinity is 'king' as well as 'lord.' He stands over the community which he protects, in the same way as the earthly ruler does, only that the latter also is his subject. 'King' and 'queen' (Melek and Milkat) are used with extraordinary frequency in Phœnician personal names to denote some divinity (thus we have the name Abi-milki of Tyre as early as the Amarna tablets), just as in Israel down to the exile Yahwè was very often invoked as Melek (wrongly vocalised Molech). But here also we meet the same phenomenon as in the cases of El, Ba'al, and Ba'alat ; there is not a single inscription in which any god named Melek or Milkat is invoked. These, like the others, were obviously mere titles, whilst the names by which the deities were invoked varied. Perhaps we may co-ordinate Melek with the Melki-'aštart mentioned above (but not with Melḳart, which, when occurring in proper names, remains unchanged),[1] and Milkat with the 'queen of heaven' (Jer. *l.c.*)—*i.e.*, the Carthaginian Cœlestis. Here, too, no certainty is possible. See MOLECH.

None of the divine names hitherto mentioned have been genuine proper names ; but such names are, nevertheless, abundant enough. To this class belongs that of Melḳart of Tyre (see § 11), with reference to whom it may here be added that according to Philo he is the son of (the otherwise quite unknown) Damarūs, son of heaven and earth (2 22, τῷ δὲ Δημαροῦντι γίνεται Μελκάθρος ὁ καὶ 'Ηρακλῆς) ; and according to Eudoxus (ap. Athen. 9 392) son of Asteria (Astarte) and of Zeus. Another name of this class is that of Ešmūn, one of the chief gods of Sidon, where Ešmun-'azar (*l.* 17) built him a temple.

12. Gods with proper names.

In personal names Ešmūn is exceedingly frequent (for the pronunciation cp 'Αβδυζμοῦνος ; Lebas, 3 1866 *c*). He was also worshipped in Citium (*CIS* 1 42 *ff.*), and had a temple in Carthage (*ib.* 252). A trilingual inscription in Phœnician, Greek, and Latin, from a temple in Sardinia, gives him the enigmatical cognomen מארח, which is simply retained in the translations (*Æscolapio Merre*, 'Ασκληπίῳ Μηρρη), plainly because even then unintelligible. The inscription shows that Ešmūn was identified with Esculapius, whom Philo (2 20 27) names as son of Sydyk by a daughter of Cronos (El) and Astarte, and as brother of the Kabiri. On Ešmūn-'Aštart and Ešmūn-Melḳart, see below.

Another deity frequently found in compound proper names is צד (probably to be pronounced *ṣid*).

A Tyrian living in the Egyptian On is called Ṣidyaton ('Ṣid gives'), son of Ger-ṣid ('metoikos of Ṣid') cp *CIS* 1 101. Yatonṣid and 'Abdṣid are very frequently met with in Carthage ; for Ḥan-ṣid cp *CIS* 1 292. We do not find any trace of a worship of Ṣid ; but the gods Ṣid-melḳart, and Ṣid-tnt are both met with (see below). We may hazard the conjecture that Ṣid is the 'Αγρεύς of Philo (2 9), 'the hunter,' or his brother 'Αλιεύς, 'the Fisher,' who figure in that work as men of the primæval time.

The name can scarcely be separated from that of SIDON [*q.v.*]. Is it not most probable that both town and people have taken their designation from the god (cp the tribal names Asher, Gad, Edom, etc., derived from deities)? It may also be noted that Cheyne (*ZATW* 17 189) has rightly discerned the eponym of Ušu = Palætyrus in the Usöos named by Philo (2 8) as

[1] The name Ben-ḥodeš (Gk. Νουμήνιος), so frequently found in Cyprus, has nothing to do with a cult ; it merely denotes a child born at the new-moon. See BAR-SABBAS, NAMES, § 72.

[2] Menand., ap. Jos. *c. Ap.* 1 18, ἐν τοῖς τοῦ Διός ; Dios, *ib.* 1 17, τοῦ 'Ολυμπίου Διός τὸ ἱερόν.

[1] The Melekbaal and Melek'osir mentioned above cannot help us here.

the brother and rival of Samemrumos[1] of Tyre, who settled upon the mainland opposite and became the first seafarer (see above, § 10). This being so, the identification with Esau disappears, unless perhaps the region took its name from this deity[2] (see ESAU).

We are still less in a position to speak of the rest of the deities found in the Phœnician inscriptions.

Sankun, in **Σαγχουνιαθών**, written סכן, Sakkūn, in the very frequent Carthaginian proper name Ger-sakkūn (cp also 'Abd-sakkun, *CIS* 112 *a* [Abydos]), and אסכן (Eskūn) in an inscription from the Piræus (*ib.* 118), where an altar is set up לאסכן אדר—*i.e.*, doubtless 'to the mighty Eskūn' (cp בעלאדר).[3] פמי is found in many Cypriote names, but also in Carthage (*CIS* 1 197 617 670), in the names Pmy-šama' and Pmyatōn; it is written P'm in 'Abdp'm in Abydos (*ib.* 112 *c*). Ykn occurs in Ykn-šillem in Citium (*CIS* i. 10 13) and Carthage (*ib.* 484), D'm in D'm-ṣilleḥ (cp above), son of D'm-hanni, Gr. Δομσαλως Δομανω from Sidon (Athens, *CIS* 1 115), and in דעמלך, D'm-malak in Tyre (*ZDMG* 39 317). ססם (perhaps sūsim, horses, cp 1 K. 23 11) appears in 'Abd-ssm in Cyprus (*CIS* 1 46 49 53 93); see SISMAI. Again, we have חטרמסכר, a god or goddess who possessed a temple in Carthage (*CIS* 1 253 *f.*); the first part of the name according to the editors is connected with the Egyptian Ḥatḥōr, whilst the second part appears in the name Ger-mskr (*ib.* 267 372 886; cp ISSACHAR, § 6, end).

Of the female deities, only one, Tnt, claims attention. It has become customary to pronounce the name as Tanith; but there is no authority for this.[4]

In the name of the Sidonian 'Abd-tnt, Gr. **Αρτεμιδωρος** (*CIS* 1 116: Athens) the goddess is interpreted as Artemis; but whether the seven **Τιτανίδες ἢ Ἀρτέμιδες** of Philo (2 20), daughters of El and Astarte, have anything to do with her we do not know. She is elsewhere found only in Carthage where, as 'the lady Tnt of the Pne ba'al'[5] (that is, as Halévy has recognised, a place-name—'face of Ba'al' corresponding to PENUEL), she has a temple which was held in high repute, and is invoked, along with 'the lord Baal ḥamman,' in countless inscriptions, in which she is always given the first place.

Once (*CIS* 1 380), in her stead, we find mention of 'the mother, the mistress of Pne'ba'al'[6] (לאם לרבת פנבעל ולארן לבעל חמן). From this it would appear that the 'lady mother' (אמא) who in Carthage (*CIS* 1 177) is invoked along with the 'goddess of the cella' (בעלת החדרת), is only another name of Tnt; but whether the 'mother of the Ashera' in Citium (אם האשרת so read for האודת; *CIS* 1 13) is so also, remains undetermined. If further combinations are sought, we may perhaps discern in this motherly divinity the earth-goddess.

Whether we are to assume that the Phœnicians had also a goddess of Fortune or Fate, Gad (=τύχη), we cannot say. The frequent feminine name Gadna'mat with its variations (in Plautus Giddeneme 'pleasant fortune') is no proof of this.[7]

A large class of Phœnician divine names is formed by combining two simple names. Other Semitic tribes also thus combined names of opposite sexes. The often-quoted Phœnician divine name Melki'aštart is doubtless to be explained in the same way, as meaning the Melech who is the husband of Astarte. So also in Carthage we find a god Ešmun-'Aštart (*CIS* 1 245); another Ṣid-tnt of Ma'arat (Megara, the lower town of Carthage; *ib.* 247-249).

There is more difficulty in explaining similar combinations of

---

1 There was most probably a god bearing this strange name (Philo translates it Ὑψουράνιος) in Tyre.

2 Esau is as much a divine name as Edom. WMM rightly sees his female counterpart in the Syrian goddess 'Asīt (see EDOM, § 2; ESAU, § 1, n. 6). Whether the עבדאדם of the Carthaginian inscription (*CIS* 1 295; text difficult) should really be read 'Abdedom or 'Obed-edom (cp OBED-EDOM), and taken as proving the existence of a Carthaginian god Edom, the present writer does not venture to decide.

3 In Cirta, *CIS* 1 145, Baliddir, *CIL* 8 5279 19121 *ff.*

4 Hoffmann's acute combinations regarding this and other names (*Ueber einige Phœn. Götter*, 32 *ff.*) seem to the present writer quite untenable. At all events, they admit neither of proof nor of disproof.

5 Written פנאבעל, Euting, *Carthagische Inschriften*, 100.

6 This shows at the same time that P'ne-ba'al is really a locality, and that the rendering 'face of Baal' in which some have sought to find a mystic doctrine of theology is untenable.

7 Whether the masc. name גדעת in Idalium (*CIS* 1 93) ought to be pronounced Gad'ate, and is compounded from the Syrian divine name 'Ate (cp ATARGATIS), is doubtful; see Nöldeke, *ZDMG* 42 471 [1888], who compares Gid'on (see GIDEON).

PHŒNICIA

two masculine names, Ešmun-melḳart in Citium (*CIS* 1 16 *b*, 23-28), Ṣid-melḳart in Carthage (*ib.* 286), Melḳart Reṣeph (probably for Rešeph) on the old seal of Ba'alyaton—man-of-the-gods (*i.e.*, divine servant) of Melkarth-reṣeph: לבעליתן איש אלם איש למלקרת רצף (De Vogüé, *Mél.* 81; Levy, *Siegel u. Gemmen*, 31, no. 18, from Tyre). Perhaps we should reckon also to this class such names as Ba'al-adīr, Melek-ba'al, Melek-'osir, and the like. In the case of these names there is hardly any other course open than to assume an identification of the two gods to be intended—not a very Semitic idea.

13. Foreign gods, etc.

The Phœnicians showed in religion, as in so many other directions, their readiness to appropriate what was foreign. As in art, so also here, the influences of Babylonia (in the form in which these had reached Syria) and of Egypt are most apparent (though there are also Syrian gods). The influence of the two civilisations upon the character of the deities and of the religious symbols and amulets employed, has been referred to already (§ 8). In this instance it is the Egyptian element that predominates. The Ba'alat of Byblos is modelled exactly on the pattern of Ḥatḥor or Isis—with cow-horns on her head, between them the sun-disk, in her hand a sceptre with flowers.

Astarte was often similarly represented (see ASHTAROTH-KARNAIM); as she was also in the Syrian interior—for example, at Kadesh on the Orontes, where the goddess of the city was so fashioned. Hence the statement of Philo (2 24) that Astarte assumed as royal ornament the head of an ox. The symbol, later, ceased to be understood and was taken for a crescent moon (whence Lucian's designation of Astarte as **Σεληναίη**, *De Dea Syr.* 4), which along with the interpretation of Ba'al-šamēm as meaning Sun-god (see above) led to the result that the heavenly Astarte (*οὐράνια*) came to be regarded as a moon-goddess; so Herodian 5 6: *Λίβυες μὲν οὖν αὐτὴν Οὐρανίαν καλοῦσι. Φοίνικες δὲ Ἀστροάρχην* [corrupted from Astarte, the reference being to her star, see above] *ὀνομάζουσι, σελήνην εἶναι θέλοντες.* Modern scholars have long mistakenly sought to find in this identification with a moon-goddess the central conception of Astarte-worship.

Ba'alat of Byblos was connected with Isis and Osiris. Later we find the name of Osiris frequently present in proper names (*CIS* 1 9 13 [Umm el'Awāmīd]; 122 [Tyre]; 46 58 65 [Cyprus]); also Bast[1] (Bubastis), Horus ('Abdḥor, *ib.* 53; Cyprus; cp 46), Isis (perhaps in 'Abdis [?] עבדס, from Sidon in Carthage, *ib.* 308). The god Τάαυτος son of Miṣōr (Egypt), that is, the Egyptian Thoth, who plays so great a part in Philo (1 4 2 11 25 *ff.* 5 9) as inventor of writing and all wisdom, has not as yet been met with in the inscriptions.

It was from Syria that two deities zealously worshipped by the Phœnicians in Cyprus originally came—Rešep (pronounciation uncertain) and (possibly from Babylonia) 'Anat—both of whom the Egyptians of the New Kingdom adopted as war-gods[2] (see RESHEPH, ANATH).

'Anat has a temple in Citium (Euting, *SBAW*, 1885, no. 130), and another in Idalium characterised by the absence of any of these votive images of the god so common elsewhere in Cyprian temples.[3]

To Babylonia is due the influence exerted on the ritual of Adonis of Byblos by the legend of Tammūz. From the same source also came the cultus of Hadad (for such appears to be the right pronounciation of the Babylonian-Assyrian deity usually called Rammān), which we meet with not only in Syria but also in Phœnicia at Byblos in the name of Rib-addi in the Amarna tablets

---

1 אבסת in עבדאבסת, *CIS* 1 86 B 6 [Ḳartḥa-dašt in Cyprus] *ib.* 102 [Abydus]; Gk. Ἀβδούβαστος [Lebas, 3 1866 *c*; Sidon].

2 See WMM, *As. u. Eur.* 311 *ff.* Rešep is included, in the Hadad-inscription of Panamu, among the gods of the land of Ya'udi [Zenjirli]. He is identified with Apollo in the bilingual inscriptions, and has several names that are in part borrowed from the Greeks (Mkl='Αμυκλος [*CIS* 1 89 *ff.*, Idalium], אליית ='Ελειτας, and אלהיתם='Αλασιώτας—*i.e.*, of Alašia? [Euting, *SBAW*, 1887, p. 119 *f.*; Tamassus]). In Carthage he has a temple under the form ארשף, Aršaph (*CIS* 1 251; cp 'Abd'aršap *ib.* 393). Nöldeke (*ZDMG* 42 473 [1888]) rightly adduces also the name of the Palestinian town Arsūf (the Greek Apollonia); possibly the god had a temple there. [So, before Nöldeke, Clerm.-Ganneau, *Horus et saint Georges*, 16 *f.* (1877).]

3 See Ohnefalsch-Richter, *Kypros*, 16. In a Lapathos inscription we find ענת עז חים; cp עשתרת ארך חים and Dt. 30 20. That is, approximately, 'Anath in her fulness of vigour'; she is taken as the equivalent of Ἀθηνα σωτείρα νίκη (*ib.* 95). She is not elsewhere met with in Phœnician territory.

(see HADAD, RIMMON). His name does not occur in Phœnician inscriptions; but Philo (2 24) knows him as 'king of the gods' who, with 'the greatest Astarte' (ἡ μεγίστη Ἀστάρτη) and with Zeus son of Demarūs, rules the land by the authority of Cronos (El). Philo mentions also DAGON [*q.v.*], whom he takes for a corn-god, but who is of Babylonian origin, and whose cultus came to Philistia before the Philistine settlement (Dagan-takala, Am. Tab. 215 *f.*).

On Assyrian gods in Sidon, see below, § 21. Here and there also we find traces in the later period of the deity, originally from Gaza, known as Marna, 'our Lord' in the proper names 'Abdmarḥai (עבדמרני, *CIS* 1 16 *b*) and Maryeḥai (*ib.* 93 [Cyprus]; cp the Tyrian lamp with the dedication θεῷ Βεελμαρι *CIS* 1 p. 111). With the Macedonian period the Greek deities began to be introduced and, as we have already seen, to be put as much as possible on a level with the native ones.

Such, apart from a few other figures in Philo quite unintelligible to us, are the deities known to have been worshipped among the Phœnicians.

14. Pantheon, worship; state after death.

Though the general type, however, was the same everywhere, the details of the pantheon were, as might be expected, different in each individual city. The only one of these pantheons about which we possess precise information is that of Carthage, which we know through the Greek translation of the treaty between Hannibal and Philip of Macedon (Polyb. 7 9). In that treaty the gods of Carthage are arranged in groups of three, invoked in the following order:—(1) Zeus [Ba'al-šamēm], Hera ['Aštart šme Ba'al = Cœlestis], Apollo [unknown: hardly Rešep; many have thought of Ba'alḥammān, but Ešmūn is also possible]; (2) δαίμων Καρχηδονίων [Astarte of Carthage], Herakles [Melḳart], Iolaos [unknown; in any case he is thought of as a constant attendant of Melḳart];[1] (3) θεοὶ οἱ συστρατευόμενοι—by which we are to understand fetishes carried along with the army to the field as was the ark of Yahwè—, sun, moon, earth; (4) rivers, harbours, streams; (5) all the gods who inhabit (κατέχουσι) Carthage. The name most conspicuous by its absence is that of Tnt—for it cannot be represented by any of the deities mentioned.

The Phœnician worship differs in no essential particular from that of the allied members of the Semitic family. Sacred territories are dedicated to the various gods, and altars and maṣṣēbahs grow up. Out of these the image of the god is gradually developed, often (as we have seen) borrowing its forms from the nations more advanced in civilisation. The image of the god demands also a house for the god, a temple, which in the Phœnician cities was built throughout in the Egyptian style. Alongside of the newer, however, the older forms of religion continued to hold their ground. The arrangements of a Phœnician temple, as we learn from the coins and excavations in Cyprus (see Ohnefalsch-Richter; especially instructive is his [partly reconstructed] temenos of Idalium, Plate lvi.), included a large open court, in which stood the stone-fetish of the god and the worshippers set up their votive pillars (maṣṣēbahs) and divine images. Limitation of space forbids a lengthened discussion as to the various sacred animals (doves to Astarte, etc.), or of the festivals or the ritual.

From Carthage have been recovered several fragments of sacrificial ordinances (*CIS* 1 165 167-170—amongst them the great sacrificial tariff of Marseilles) which fix with exactitude the various dues of the priests, just as in P, or in the Greek ordinances relating to the same subject. Moreover, we have from Citium fragments of a list of expenses for temple servants and sacrifices (*ib.* 86), and from Carthage a fragment of a sacrificial calendar (*ib.* 166), as also of a list of large expenditures by the citizens on the temple (*ib.* 171). Amongst the personnel of the temple, the 'hair-cutters (barbers) of the gods' (גלב אלם, *CIS* 1 86 *a*(12), 257-259 588) have a prominent place (cp BEARD); as also have the temple-servants (86 247 *ff.*, etc.); other official designations (*e.g.*, 260 *f.* 377; and some in the passages already cited) still remain obscure (cp DOG, § 3).

Of all that the individual or the state receives by the favour of the god, a certain portion, and that the first and best—an ἀπαρχή or ראשית (*CIS* 1 5, as in OT)—is rendered to the giver. So also the deity receives a share of the spoils of war. The practice, the existence of which we know from the OT, of sacrificing to the god after any great victory or deliverance, if not all the prisoners, at least the best and choicest of them, 'upon the altar before the holy tent' was still followed in Carthage in 307 B.C., after the victory over Agathocles (Diod. 20 65). When angry, however, the godhead demands for propitiation also the blood of the worshipper's own kin. The maxim 'every firstborn is mine' plainly held good in Phœnicia also, and applied, as amongst the Israelites, to the firstborn of men as well as of earth (see FIRSTBORN). In ordinary times no doubt the debt was redeemed, as in Israel; but in times of extremity a man would offer to his god his own grown-up son. See MOLECH.

If it were his only son, the sacrifice would be all the more efficacious, as we learn from the story of El (like that of Abraham; see ISAAC) in the legend narrating the institution of this kind of offering (see above, § 11, col. 3743). As civilisation advanced, the Carthaginians sought to escape the dire obligation by setting apart for sacrifice children of slaves whom they brought up as their own. In 310, however, when Agathocles had reduced the state to the utmost straits and the enemy lay encamped before the city, they once more laid 200 boys of their noblest families upon the arms of the brazen image of Cronos where they were allowed to fall into the fiery furnace flaming beneath (Diod. 20 14). This seems to have been the last occasion on which matters were brought to such extremity; in the agonies of the Punic wars we do not read of any similar measure being resorted to.

In other cases, when a catastrophe threatens or has already befallen, the head of the state offers himself as a sacrifice to the offended deities and ascends the sacrificial pyre. So, according to the legend, did Dido-Elissa, the foundress of the city; so did Hamilcar after the battle on the Himera; and a similar step was meditated by King Juba of Numidia after the battle of Thapsus, and would actually have been taken by him if Cirta his capital had not shut her gates upon him.

The deity demands yet other sacrifices besides. Among these was circumcision—a practice borrowed by the Phœnicians, as by the Israelites, from Egypt (Herod. 2 108), and according to Philo (2 24) performed by El upon himself in the first instance and so imposed upon his subjects. We find no allusion, however, to the practice of castration in honour of the gods so frequently found in Syria and Asia Minor. On the other hand ecstatic 'prophets' who in honour of 'the Ba'al' perform wild dances and wound themselves with swords and spears in orgiastic frenzy, as was done by the followers of the goddess of Comana, and is even now done by the Persians at the mourning festival of Hasan and Husein, were known to the Phœnicians also (cp 1 K. 18 26 *ff.*). In the Golenischeff Papyrus (see § 5) a page of the King of Byblos, seized by the god during a sacrifice, gives an oracle in his ecstasy. Another sacrifice to the deity is the requirement that virgins should prostitute themselves in the service of the great goddesses and make over the profits to the temple treasury—a practice that was widely diffused among the Semites and the peoples of Asia Minor. Perhaps Robertson Smith is right in finding here a religious survival of primitive conditions, under which fixed marriages were still unknown and the sexual coitus was considered as a manifestation of the divinity in human life. We have direct evidence of the existence of the custom at Byblos (Luc. *De Dea Syr.* 6) and in Cyprus (Herod. 1 199, Justin 18 5). For another analogous practice in the service of the deity which seems to have been current in Phœnicia cp Eus. *Vit. Const.* 3 55.

With regard to what happens to men after death the views of the Phœnicians, as of the other Semitic peoples, remained quite undeveloped. From the sepulchral inscriptions of Eshmunazar and Tabnit we see that undisturbed rest in the grave was desired, and to ensure it imprecations were employed; to open a grave or coffin is an 'abomination unto Astarte' (Tabnit 6). It is, however, but a comfortless, shadowy existence that is lived in the dark kingdom of death 'among the ghosts or *Rephāīm*' (*Mot*, מות, the god of death, son of El, mentioned in Philo, 2 24). The Phœnician, like the Israelite, had no more heartfelt longing than for a descendant to continue his family and with it his earthly

[1] The existence of a God יאל (as conjectured by Berger in a dissertation cited by Nöldeke in *ZDMG* 42 471 [1888]) can hardly be said to have been sufficiently proved.

existence; 'to have no son or seed' is the heaviest curse the gods can inflict (Ešmun. 8 11 22, Tabnit 7).

In connection with the cultus, among the Phœnicians as elsewhere, there gradually developed a body of theological doctrines.

15. Theology and cosmogony.

The few allusions to these in the inscriptions, however, are practically unintelligible, as is shown by the texts of the Malakba'al-stelės,[1] and still more by the inscription of Ma'ṣūb (see above, § 10). This last would almost seem to suggest that the Israelite conception of an 'apostle' or messenger (מלאך) of the deity was not unfamiliar even in Phœnicia (cp the name Ba'al-mal'ak, *CIS* 1 182 455, etc.). In Cyprus arose the singular conception of a divinity in which man and woman are united, and which accordingly was represented as a bearded goddess.

The theologians of the Hellenistic period dragged this to light, calling the deity in question Aphroditus (Philochorus and Aristophanes *ap. Macrob.* iii. 8 2 *f.*, Hesych. *s.v.* Ἀφρόδιτος, etc.), and the church fathers are very ready to refer to the subject; but this deity never possessed much importance. It is portrayed on no monument, and the attempt to associate it with any of the divinities named above, still more to find it (as has sometimes been done) in the compound names of gods, is very precarious. It is not even certain whether it is really Phœnician at all, since, according to Hesych. (*l.c.*), it seems to have belonged originally to Amathus, which was not a Phœnician town.

Phœnician theology had its speculations about the origin and growth of the world, of mankind, of civilisation, and of its own home. Presumably these were embodied in a religious literature of the subject, which dealt with it somewhat after the manner of the narratives of Genesis. All our actual information on the subject, however, has to be taken from late recensions of it, written in Greek, and showing marked traces of foreign influences. In these writings, as in the many Jewish writings of the Hellenistic age, we have native scholars with patriotic arrogance seeking to exhibit to the then dominant race the antiquity and depth of the native traditions, and to prove that the Greeks really stole their wisdom and theology from the East, at the same time distorting it in the process. That these writings, however, rest not only on native traditions, but also, as was the case with the Jews likewise, on native written documents, is not to be questioned. On the other hand, the names of wise men of remote antiquity, who are alleged as authors of these works, are of very problematic authenticity.

Two cosmogonies have come down to us, the one from Sidon, the other from Byblos.[2] The former was narrated in Greek by Eudemus a pupil of Aristotle, and from him it was borrowed by Damascius (*De pr. prin.* 125) who subjoined a Neo-platonic interpretation. In a somewhat modified form the same Sidonian tradition is cited at a later date as the work of the ancient Sidonian Mochos (Μῶχος)[3] which had been translated into Greek, ostensibly by a certain Lætos, along with other unknown Phœnician authors[4] (Theodotos, Hypsicrates) in the time of Posidonius of Rhodes (first half of the last century B.C.). Damascius (*De pr. prin.* 125) has preserved for us an extract from this cosmogony also. Posidonius detected in it the atomic theory (Strabo, xvi. 2 24), just as Damascius found in it the Neo-platonic conception of the world. It does not at all follow from this, however, either that the writing of Mochus contained a single word about atoms—how Posidonius arrived at his view can be perceived clearly enough from the fragment which has come down to us—or that the writing was a 'literary fraud' as Rühl supposed.

[1] Berger in his discussion of these has doubtless established the literal meaning correctly enough; but that does not solve the whole problem (*J. As.*, ser. 7, tome 8 [1896]).

[2] It is no proof of Byblos being the religious metropolis of Phœnicia that we usually find on its coins, from the Hellenistic period onwards, the surname 'the holy' (לגבל קדשת. ἱερᾶς Βυβλου); for similar expressions occur on the coins of Sidon and Tyre (Σιδῶνος τῆς ἱερᾶς καὶ ἀσύλου [also with personification of the city-deity Σιδῶνος θεᾶς ἱερᾶς καὶ ἀσύλου καὶ ναυαρχίδος] and Τύρου ἱερᾶς καὶ ἀσύλου).

[3] According to Posidonius (Strabo, xvi. 2 24) he lived πρὸ τῶν Τρωικῶν. He passed into the later handbooks as one of the oriental founders of Philosophy; Diog. Lært. *prœm.* 1 (miswritten Ὦχος, followed by Suidas, *s.v.*), Iamblich. *Vit. Pyth.* 14 (ὁ φυσιόλογος, ancestor of the Sidonian prophets, and the rest of the Phœnician hierophants), Jos. *Ant.* i. 3 9 (with an unknown Hestiæus, and the Egyptian Hieronymus, and other writers of various nationalities, as alleged authorities for the story of the flood); Athen. 3 126 *a* (with Sanchuniathon).

[4] Tatian, *adv. Græcos*, 37 [copied by Clem. Alex. *Strom.* i. 21 117]; cp Rühl 'zu Menander von Ephesus u. Lætos,' *Rhein. Mus.* 50 141 *ff.*

Considerably later is our authority upon the Byblian traditions—Philo of Byblos, the well known writer of the period of Hadrian. He relied for his information upon an ancient sage, Sanchuniathon, who had drawn the primæval wisdom of Taaut from the writings of the Ἀμμουνεῖς in the temples (see above, § 10).[1] Whether there ever really was a Phœnician writing under the name of Sanchuniathon we do not know; in any case the tradition has been very greatly manipulated by Philo with two objects; first, to explain all mythology in the Euhemeristic sense, by making out all the gods to have been men—kings and others of primitive times who had been raised to divine honours after their death—and secondly to make out that the Greek mythology was only a depraved copy of the Phœnician.

The lateness of his traditions is shown also by the fact that he uses Aramaic forms of names (Βεελσαμήν, Ζωφασημίν, Βῆλος; only Σαμημροῦμος is the Phœnician pronunciation of Shamēmrām), and that he says the companions of El or Kronos bore the name Ἐλοειμ, *i.e.*, Κρόνιοι. This is of course the Heb. אלהים, *Elohim*, which is not met with in Phœnician, and thus Philo here betrays a Jewish influence not discernible elsewhere. From Philo we still possess large extracts in Eus. *Præp. Ev.*, which in their turn seem to have been taken from Porphyry.

In details the Sidonian cosmogony and that of Byblos differ from one another at many points. Fundamentally they are in closest agreement not only with each other but also with the old Hebrew myths which can still be clearly enough detected behind the narratives of Gen. 1 2 (see CREATION, § 7).

Of the Phœnician constitution and government we know almost nothing, even in the case of Carthage, not to speak of the other cities.

16. Constitution.

That their polity had a thoroughly aristocratic character might be presumed from the whole character of Semitic civil life, and is confirmed by the weight everywhere laid upon descent; this comes into special prominence in the long genealogies of the inscriptions. The 'eldest ones' (cp the πρεσβύτατοι in Marathos and Aradus; Diod. xxxiii. 5 2 3) who form the council of the king are the representatives of families; in Sidon the council seems to form a college of 100 members (Diod. 16 45). The most distinguished family is of course the royal; in Tyre the priest of Melḳarth ranks next the king (Justin. 18 4). In these little city-states, however, with their many wealthy merchant families the power of the king was limited in many directions by the council and the nobility. In Tyre at the time of the Chaldean suzerainty the monarchy was for a time abolished and a 'judge' (*šōphēṭ*) took his place as supreme authority (Jos. *c. Ap.* 1 21). Presumably the office was responsible, and limited in time, although in Tyre the tenure cannot have been for a fixed period, since we find individual judges ruling for 2, 10, 3 months, and then, apparently, two together ruling for 6 years (see below, § 20). Something similar may have occurred in other cities also, just as in Carthage from the time that we know anything of its history two suffetes (usually called 'kings' by the Greeks) figure as yearly officials at the head of the state; so also in other colonies, such as Gades. To the Hebrews also, as

[1] Compare the strange statement of Porphyry (Eus. *Præp. Ev.* i. 9 21 and x. 9 12) that Sanchuniathon, here called a native of Berytus, derived his account of the Jews from a writing of Jerombal (= Jeruba'al) the priest of God, of Jeuo (ἱερεὺς θεοῦ τοῦ Ἰευώ) that is, Yahwè, who had dedicated his work to King Abelbal or Abibal of Berytus. Whether this absurd story was Porphyry's own, or due to the inventiveness of others before him, we cannot tell; in any case it has nothing to do with Philo's Sanchuniathon. Its lateness is shown also by the part assigned in it to Berytus.

the Book of Judges shows, the conception of 'judges' as rulers of a state, with royal but not hereditary powers, was not unfamiliar.

17. Sources. Of the native histories written by the Phœnicians themselves nothing has come down to us, even in Greek translations, except a few extracts (preserved by Josephus), from the Chronicles of Tyre, which Menander of Ephesus had translated into Greek; they relate to the period extending from 969 to 774 B.C. (*c. Ap.* 1 18; *Ant.* viii. 5 3 [also viii. 3 1 on the era of Tyre], *Ant.* viii. 13 2) and to the siege under Elulæus (*Ant.* ix. 14 2). Josephus also (*c. Ap.* 1 21) gives the list of kings during the period from Nebuchadrezzar down to Cyrus (585-532 B.C.), but here, too, is doubtless dependent on Menander, although a little before (*c. Ap.* 1 20 = *Ant.* x. 11 1) he refers for the siege of Tyre by Nebuchadrezzar to the otherwise unknown Jewish and Phœnician history of one Philostratus.

In addition to these Josephus cites (*Ant.* viii. 5 3 = *c. Ap.* 1 17), for the period of Hiram I., the Phœnician history of Dios, who is closely dependent on Menander. He also is not otherwise known. It is probable that Josephus took all these fragments directly from a compilation by Alexander Polyhistor (v. Gutschmid; cp Wachsmuth, *Einl. in die alte Gesch.* 403 *f.*). These short fragments contain little that relates to the history of Phœnician colonisation.

18. Period of independence. We return now to the history of the mother country from the end of the Egyptian period onwards. The little we know for the immediately succeeding centuries relates only to Tyre. Tyre was successful not only in founding a colonial empire, but also in gaining the supremacy in the mother country. Our accounts begin —since they concern themselves with merely biblical interests—with the first HIRAM (*q.v.*).[1]

Of him we learn that he extended the city territory by mounds in the quarter Eurychoros (Jos. *c. Ap.* 1 13), substituted new temples for old, to Melḳarth and Astarte, dedicated a golden stele (κιών) to Ba'alšamēm in his temple and instituted the festival of the awakening of Melḳarth. He brought back to its allegiance the city of Utica which had refused to pay the usual tribute. Mention has already been made of his relations with Israel, and of his Ophir voyages (see also CABUL, HIRAM).

Josephus, in speaking of the successors of Hiram, gives only the duration of the life and of the reign of each down to the founding of Carthage. We may be sure, however, that Menander gave some further particulars. It is, at any rate, clear from the list of kings that usurpations and struggles for the succession were not unknown. Hiram's grandson was put to death by the four sons of his foster mother; of these the eldest held the throne for twelve years. Then followed further confusions, with regard to which tradition is very uncertain, until the priest of Astarte, Itoba'al, by violent means (see ETHBAAL) founded a new dynasty. Owing to his relation to Ahab, one or two facts respecting him have been preserved by Josephus. The length of his reign is unfortunately not known; Rühl, following the tradition of Theophilus, assigns him twelve years (876-866 B.C.), but according to most MSS he reigned thirty-two years (though the length of life assigned by tradition to him and to his son makes this doubtful) from 885-854 B.C. The three years famine of the period of Ahab and Elijah (1 K. 17 *f.*) is mentioned by Menander as having lasted one year.

Hiram I. is in the OT invariably called king of Tyre (2 S. 5 21 1 K. 5 15 9 10); Ethbaal, on the other hand, is king of the Sidonians (1 K. 16 31). This last is also the title borne on the oldest extant Phœnician inscription (*CIS* 1 5) by Hiram II.[2] who is also named by the Assyrians in 738; it is the inscription of a bronze sacrificial vessel which the 'governor (סכן) of Ḳarthadašt (Citium), servant of Hiram king of the Sidonians, dedicated to his lord the god of Lebanon (Ba'al-lebanon) as a "first fruits" (ἀπαρχή) of copper' (בראשת נחשת) in the temple upon the hill Muti Shinoas near Amathus (Ohnefalsch-Richter, *Kypros*, 1 19). The Tyrian dominion in Cyprus must accordingly have extended thus far. These designations show that, in the interval between Hiram I. and Ethbaal, the 'kings of Tyre' had become 'kings of the Phœnicians,' and thus had considerably extended their authority, in particular by acquiring the sovereignty of Sidon. This is confirmed by the Assyrian data, that the whole coast from 'Akko (near the Israelite frontier) to near Berytus was in the possession of Tyre.[1] Of Ethbaal we are told that he pressed even farther north; having founded the city of Botrys, to the N. of Byblos, in the neighbourhood of the Theouprosopon. Plainly the intention, which was not, however, effected, was to reduce Byblos also to dependence on Tyre. Of Ethbaal we learn further that he founded Auza in Libya. Under the third of his successors, Pygmalion (820-774), Timæus (and, following him, Menander) placed the founding of Carthage in 814-3; its mythical foundress is called the sister of the king. With Pygmalion Josephus's extract from Menander (Jos. *c. Ap.* 1 18) ends.

19. The Assyrian suzerainty. For the next century we get some information from the Assyrian data. The great westward campaigns of the Assyrians began in the beginning of the ninth century.[2] In 876 Ašur-nāṣir-pal invaded Syria and the dynasts of the interior as well as the kings of the sea-coast, of Tyre, Sidon, Byblos, Maḫallata (*sic*), Maisa (unknown), Ḳaisa (unknown), Amuri, 'Arvad in the sea,' brought tribute—brazen vessels and parti-coloured and white linen garments as well as silver, gold, lead, copper, and cedar wood. Shalmaneser II. (860-824) undertook the subjugation of Syria in a more thoroughgoing way. Only the more northerly, however, of the Phœnician dynasts were represented in the army of the allied Syrian princes which fought at Ḳarḳar in 854 (see AHAB, SHALMANESER). The remaining cities preferred to submit quietly and in 842 and 839 paid tribute to Shalmaneser as they also did later to his grandson Hadad-nirari III. (811-782) when he marched upon Syria.

As yet these expeditions led to no enduring suzerainty (see ASSYRIA, § 32). In the first half of the eighth century the movements of the Assyrians were restricted by the powerful opposition of the kings of Urartu. With Tiglath-pileser III. began those systematic invasions which ended in the virtual subjugation of the whole Syrian territory.

It is within this period that more precise information regarding Phœnicia first becomes accessible. Whilst the older Assyrian kings, as we have seen, mention (correctly or incorrectly) the names of a large number of Phœnician cities and dynasts, under Tiglath-pileser III. and Sargon there are only three Phœnician states —Aradus, Byblos, and Tyre. The coastland of the Eleutherus region, along with Ṣimyra, 'Arḳa, and Šiyana, now belongs to the kingdom of Hamath (Annals of Tiglath-pileser: 3 R. 9, 3 *ll.* 26 46), but is made by Tiglath-pileser into an Assyrian province. The Phœnician cities appear to have submitted without striking a blow. In 738 we find, amongst many other dynasts, Matanba'al of Arados, Šibittiba'al of Byblos, and Hiram II. of Tyre paying tribute to Tiglath-pileser. Soon afterwards Tyre showed signs of a longing for independence; a heavy tribute was exacted from Metinna (Mytton—*i.e.*, Mattān) of Tyre in consequence (about

[1] The individual items in Menander's list of kings vary in the tradition. We here follow the reconstruction of Rühl (*Rhein. Mus.* 48 565 *ff.*—although by no means certain at all points). In their original form the data seem to be quite authentic.

[2] That Hiram II., not Hiram I., is intended in the inscription has been shown by von Landau, *Beitr. zur Alterthumskunde des Orients*, 1 (1893).

[1] As cities taken by him from Tyre, Sennacherib (Prism Inscr. 2 38 *ff.*) enumerates:—Great and Little Sidon, Betzitti, Ṣarepta, Maḫalliba, Ušū (pr. Usū),—*i.e.*, Palætyrus,—Akzib, Akko. In Menander (Jos. *Ant.* ix. 14 2 28 5) we must, therefore, read ἀπέστη τε Τυρίων Σιδὼν καὶ Ἀκη καὶ ἡ Παλαιτύρος καὶ πολλαὶ ἄλλαι πόλεις (so LV), and not with the other MSS Ἀρκη = 'Arḳa.

[2] Various kings of Assyria set up steles by the Dog river near Beirūt; but these are in such bad preservation that not even the names can now be deciphered.

730 B.C.). The main portion of the Phœnician coastland still owned the sovereignty of Tyre; Elulaios (Ass. Lule), who reigned, as Menander says (Jos. *Ant.* ix. 14 2), thirty-six years (say 725-690), is therefore called by Sennacherib 'King of Sidon' (cp SIDON). On the other hand, Tyre lost its hold on Cyprus; seven Cyprian princes did homage to Sargon,[1] who set up a statue of himself in Citium. That Citium was lost to Tyre for a time is attested also by Menander.

Under Shalmaneser IV. (727-722) and Sargon (722-705) the Phœnicians appear to have remained quiet.[2] Under Sennacherib (705-681), however, when an anti-Assyrian league was planned in South Syria, Elulaios of Tyre gave in his adhesion to the project. The result is told elsewhere (see SENNACHERIB). It may suffice to quote the words of Sennacherib, 'From Lule king of Sidon I took his kingdom' (*COT* 1 279). Menander informs us that Elulaios again reduced Citium to subjection, and so reopened hostilities. In the great campaign of 701, however, Sennacherib in all essential respects recovered the supremacy, though Tyre, like Jerusalem, escaped being captured. The Tyrians lost the whole of their territory, and in Sidon a new king was installed, Tuba'lu (Ituba'al), who had to pay a fixed annual tribute. Elulaios himself fled to Cyprus, evidently to the recently re-acquired Citium. Here again Menander comes to our aid. He tells us that the Assyrian king Selampsas, after conquering all Phœnicia, made peace and returned home. Selampsas can only be Shalmaneser IV., as Josephus also assumes.[3] Therefore, doubtless, what is referred to is his campaign against Hosea of Samaria, who formed an alliance with Egypt against the Assyrians in 725. Perhaps the Phœnicians also at first participated in this action—it is to be observed that we learn nothing about Shalmaneser from Assyrian sources—but made their peace in good time.[4]

Next, however, Menander goes on to relate—taking no account of the intervening period, and without any knowledge of the wider political relations—that Sidon, Akko, Palætyrus, and many other cities of the Tyrians, revolted and yielded themselves to the Assyrian king. Accordingly, when the Tyrians themselves rebelled, and the king took the field against them, he was supported by 60 ships and 800 rowing boats, manned by Phœnicians. With only 12 ships, however, the fleet was scattered, and 500 were taken prisoners. The Assyrian king, withdrawing, stationed a garrison at Palætyrus (ἐπὶ τοῦ ποταμοῦ καὶ τῶν ὑδραγωγείων) to cut off the water supply. The Tyrians, however, with their reservoirs held out for five years (701-696), and presumably obtained satisfactory conditions. Thus one sees that the war followed the same course as under Abimelech at the time of the Amarna letters. The sea-fortress was impregnable—a fact admitted by Sennacherib himself, who passes over Tyre in eloquent silence. The possessions of Tyre on the mainland, however, were lost to it; in Usu Sennacherib received the tribute of the kings of the West, among others of Abdili'ti of Aradus and of Urumilki—the correct name also (אר[ו]מלך) of the grandfather of Yeḥaw-melek of Byblos (*CIS* 1 1)—of Byblos.[5] Her Cyprian possessions also Tyre had to forfeit; among the other names in the list of Cyprian vassal princes under Esarhaddon and Ašur-bani-pal appear these of Damišu, king of Karthadašt (Citium), Kistura of Idalium, and Rumišu of Tamassos.[6] From this date the Tyrians never again exercised sovereign rights in Cyprus.

Under Esarhaddon (680-668) arose new conflicts. Firstly, Sidon rebelled under king 'Abdimilkut (*i.e.*, Abdimilkat with the usual obscuration of the *a*), but after a long siege the city was conquered, and the king, who had taken refuge beyond seas with a Cilician dynast, was taken prisoner together with his host, and put to death (675). The rebellious city, which had so ill requited the Assyrians for its deliverance through them from the Tyrian ascendency, was destroyed, and its population deported. An 'Esarhaddon's town' was newly built on another site, and peopled with foreign settlers. Henceforward an Assyrian governor ruled here as well as in Ṣimyra. The possessions of Tyre on the mainland were now (if not before) placed under a similar officer, who received the high-sounding title 'governor of Tyre' although the city proper was never under his rule.[1] Tyre still remained unconquered, even though (presumably) compelled to pay tribute. The king, Ba'al (an abbreviation of some composite name), was attacked by Esarhaddon, probably on his second expedition to Egypt (670). The triumph stele of *Zenjirli* represents the king as leading captive the Æthiopian king Taharka and the king of Tyre[2] by a cord passed through rings on their lips; but in reality neither the one nor the other ever was his prisoner. Esarhaddon, however, caused the shore to be fortified, and cut off the Tyrians from water and supplies as his father had done. Neither he nor Ašur-bani-pal (668-626), however, met with more success than Sennacherib. On the subjugation of Egypt, however, Baal gave up the struggle, submitted to a 'heavy tribute,' sent his daughter and nieces to the harem of the great king, and despatched his son Yaḥimilki (Yeḥaumelek) to court, where Ašur-bani-pal received him to favour and dismissed him. At a later date we find Ašur-bani-pal, like Esarhaddon before him, placing Baal of Tyre at the head of the list of his Syrian and Cyprian vassals. Yakinlu of Arados, who seems to have made common cause with Baal, was less fortunate. He had to send his daughter and all his sons with rich gifts to the great king, and abdicate in favour of his son Aziba'al. Opposite Arados, at Antarados, Ašur-bani-pal raised a memorial stone (*PSBA* 7 141). These events belong to the earlier years of his reign. At a later date, after his expedition against Uaiti of Kedar, Ašur-bāni-pal called to account Usu and Akko which had been insubordinate, put to death the offenders, and deported some of the remaining inhabitants to Assyria.

20. The Chaldæan period.

The next decades are a blank. We have no precise information as to what occurred in the Phœnician cities during the period of the decline and fall of the Assyrian empire; this it would seem was materially hastened by the great Scythian invasion—which in 626 extended to Syria (see SCYTHIANS). At any rate the Phœnician cities, like Judah and its neighbours—the four Philistine cities, Edom, Moab, Ammon—recovered their independence for a while; in the list of all the existing states of which he prophesies the downfall, Jeremiah (in 604 B.C.) includes the kings of Tyre, of Sidon, and of the isles beyond the sea—*i.e.*, Cyprus (Jer. 25 22; cp 27 3 Ezek. 25-29). The inference is plain; Sidon also must have regained independence and received kings of its own—presumably of Phœnician origin (see below, § 21).[3] The time, however, for the independent life of petty states was past. When Assyria collapsed, Egypt sought once more to acquire the suzerainty of Syria (see EGYPT, § 68; JOSIAH). Its success was brief, though in 588 Apries

1 [Does this explain, 'even there (in Cyprus) thou shalt have no rest,' Is. 23 12? See Che. *Intr. Is.* 140; but cp Duhm, *ad loc.*]

2 The general expression 'who pacified Ḳuë (see CILICIA) and Tyre' [cp Che. *Intr. Is.* 144] supplies no sure evidence to the contrary.

3 [So Tiele, *BAG* 237 314; Che. *Intr. Is.* 144.]

4 In *GA* 1 (1884), p. 467, a different view is assumed; but the above now appears to the present writer the most probable solution. It is an untenable assumption of von Landau, in his study on the siege of Tyre by Shalmaneser in Menander (*Beiträge*, 1), to suppose that in the closing portion of his account Menander passes from Sennacherib's campaign to the war of Esarhaddon and Ašur-bāni-pal against Ba'al of Tyre, so that Menander has compressed into one the various Assyrian campaigns against Tyre. That the same occurrences should repeat themselves in sieges of Tyre lies in the nature of the case; the Amarna letters and the history of Nebuchadrezzar bear out this view. Alexander was the first to contrive the means for the thorough subjugation of the sea fortress.

5 Under Esarhaddon and Ašur-bāni-pal these places are taken by Matanba'al and Yakinlu of Arvad (see below) and Milkiasaph of Byblos.

6 Cp Schrader, *SBAW*, 1890, pp. 357 *ff.* It is not inconceivable that these three principalities may only then for the first time have been added to the list of the seven which had done homage to Sargon.

1 Wi. *GI* 1 201, n., corrected by Wi. *AOF* 1 441, n.

2 The intention of the representation was first perceived by Pietschmann (*Gesch. Phœn.* 303). See 'Ausgrabungen in Zendschirli' in the *Mittheil. aus d. Oriental-Saml. d. Berl. Mus.* Hft. 11 17 (von Luschan).

3 Winckler's attempt to set aside this evidence (*Alt. Unt.* 114 *ff.*) seems to the present writer inconclusive.

PHŒNICIA

(Pharaoh-Hophra) still hoped to preserve Palestine from becoming a prey to the Babylonians. He penetrated into Phœnicia, the cities of which were on the opposite side, and fought successfully against Sidon and Tyre (see Herod. 2 161).[1] When Nebuchadrezzar's army approached, however, Apries retired, leaving Syria to its fate. No sooner had Jerusalem fallen (586) than Nebuchadrezzar marched upon Phœnicia. The other cities would seem to have again submitted; but King Itobaal II. of Tyre once more defied the apparently inevitable. For fifteen years (585-573) Nebuchadrezzar laid siege to Tyre.

Ezekiel, who in 586 had prophesied the approaching assault (26-29), expected the annihilation of the haughty city. He was mistaken, however; once more the sea-fortress asserted her strength; the prophet was constrained in 570 to confess that Nebuchadrezzar and his army had had 'no-recompense' for the manifold fatigues of the siege (Ezek. 29 18). Yet it is evident that in the end Tyre became more dependent on the Babylonian King than it had previously been.

The list of kings which here again has been preserved to us (Jos. *c. Ap.* 1 21) shows that with the close of the siege Itobaal's reign came to an end—doubtless he was deposed. His successor was Baal II. (572-563) after whom judges (see § 16) took the place of kings,—at first, single judges for a few months, and afterwards, if the reading be correct,[2] two priests (or brothers) for six years; between them (according to Gutschmid, 'after them') Balatoros was king for a year. Then a ruler Merbaal was fetched from Babylon (555-2), who in turn was succeeded by Hiram III. (551-532), under whom the Chaldæan fell into the hands of the Persians.

In the struggles of the Assyrian and Chaldæan period, the political power of the Phœnician towns, and the position of ascendancy which Tyre had occupied in the Phœnician world, came to an end. Nor could the sway of Phœnicia over its colonies be any longer maintained. The spread of Greek trade and the development of the Greek naval power, broke up their solidarity, and when, even during the continuance of Chaldæan suzerainty, the Phœnicians of the west combined to withstand the Greeks, it was no longer Tyre but Carthage that stood at their head. Carthage never indeed broke with Tyre,[3] and for a long time continued to send tithes to the Melkarth of the mother city; but politically the relations came to be inverted; Carthage was a great power, Tyre a city-community subject to foreign lords. Even when, in consequence, the transmission of the tithes had been reduced to that of a trifling present, Carthage still continued to show filial piety by regularly sending festal embassies to Tyre (Arr. ii. 24 5 Polyb. xxxi. 20 12) until, after the defeat by Agathocles, the Tyrian Melkarth again once more received propitiatory offerings (Diod. 20 14).

The prosperity and commercial importance of Tyre suffered much less by the vicissitudes of war than is often supposed. Even if the connection of the city with the shore was cut off repeatedly for periods of years, the Assyrians and Chaldæans could do little to her sea power and her trade; the attempt to overwhelm her by the aid of the fleets of the other Phœnician towns was an entire failure. As soon as peace was restored the old relations with the interior were resumed; in fact, the import and export traffic forthwith became all the brisker from the temporary check. As for Sidon, which otherwise might have been a formidable rival, it needed a long breathing time in order to recover from its catastrophe under Esarhaddon. We must not forget, moreover, that during the period between Tiglath-pileser III. and Cyrus for 20 years of war there were 180 years of peace, in which trade and the general well-being must have prospered, the more because the connection with the great continental empire made business relations easier and more extensive; the sovereigns, too, were energetic in protecting the safety of the routes of traffic. Finally, her loss of colonial supremacy affected Tyre's commerce but little because it came about without any violent shock, and the community of speech and sentiment as well as the sharp antithesis to the Greeks kept the two portions of the Phœnician nationality together. If in Carthage the wares and art-products of Greece were imported in ever increasing quantity, neither could that city dispense with the products of the East; and it need not be said that the Carthaginian merchants sought for these at the fountain-head of Phœnician life rather than from Greek middle-men.

How prosperous Tyre was, and how dominating was her position in Phœnicia in 586 B.C., is visibly shown by Ezekiel[1] (27). It was not by a single blow that this queen of the seas lost her imperial state; the transference of power was gradual.

21. Persian period.

When the Persians in 539 entered upon the inheritance of the Chaldæans without meeting with any resistance from the peoples of Syria and Phœnicia, Sidon became the first and richest city of Phœnicia (cp Diod. 16 41). The best ships in the fleet of Xerxes were contributed by the Sidonians, whose king took the place of honour next the great king. Next in order came the king of Tyre, and after him the other vassal princes (Herod. 7 44 96 98 8 67; cp also 3 136 7 100 128; Diod. 14 79). This superiority of Sidon is doubtless chiefly to be accounted for by the fact that the advantage of situation which remained with Tyre during the period of the wars became a positive disadvantage when peace prevailed, and all the Phœnician cities equally belonged to a great empire.

It then became a positive disadvantage that Sidon was able to expand freely while Tyre was confined within a narrow space (in Strabo's time it was very closely built, the houses having more stories than in Rome); the many purple manufactories were indeed a great source of income, but did not add to the amenity of the city as a residence (16 2 23). Above all, the merchants and caravans must have found it much more convenient to expose their goods in Sidon than to ship them over to Tyre. Sidon accordingly became a successful competitor with Tyre. That the Persian kings deliberately set themselves to advance Sidon at the expense of Tyre is hardly likely; the situation existed before they came, and was not of their making. But they promoted its development; in Sidon the Persian kings had a park (*παράδεισος*), and it was here that the satraps of Syria resided when they came to Phœnicia.

Perhaps there was another factor in the change. As a result of its destruction and re-foundation by Esarhaddon Sidon received a very mixed population; and even although, after the fall of the Assyrian monarchy, the Phœnicians recovered the ascendancy, the foreign elements (as in Samaria) continued strongly to assert themselves; indeed, we can still trace them even in the scanty materials that have come down to us.[2] We can thus understand how in Sidon the national narrowness may have been counteracted, and the rejuvenated commonwealth have acquired an international character which had a favourable influence also upon its trade. Hence we find in Sidon, during the whole Persian period, in spite of the opposing political interests and

[1] In Aradus has been discovered a fragment referring to his deputy Psamtik-nofer (Renan, *Miss. en. Phen.* 26 *ff.*) De Rougé connected it with Psamtik I., but hardly with justice. W. M. Müller (*Mitth. d. vorderas. Ges.* Hft. 4, 1896) tries to detect a king of Byblos on a very mutilated Egyptian monument of this time from Phœnicia (published *TSBA* 16 91); but this is highly problematical.

[2] See Rühl, *Rhein. Mus.* 48 577. It is perhaps significant that the reign of Baal II. came to an end with that of Nebuchadrezzar, whilst Merbaal's begins with that of Nabuna'id.

[3] In its second treaty with Rome (348) Tyre is named along with Carthage, though it is not mentioned in the first, about 503 (?) (Pol. 3 24).

[1] The 'oracle on Tyre' (Is. 23) is too uncertain to be referred to here (see 'Isaiah' in *SBOT*, and cp Che. *Intr. Is.* 138-145, and the commentaries).

[2] The fact has been recognised by Winckler (*AT Unt.* 1892, p. 117). The tomb of 'Ασέπτε Συμσελήμου Σιδωνία (*i.e.*, Asephat, daughter of Ešmunšillem, of Sidon) in Piræus (*CIS* 1 119; *CIA* 2 119) was erected by Yatonbel, son of Ešmunšilleḥ, chief priest of Nergal (רב כהנם אלם נרגל). We see that the Assyrian god Nergal is worshipped even in the Sidonian colony at Athens. Moreover the name Yatonbel is compounded from that of the Assyrian Bel, not from that of the Phœnician Baal. Similarly a Sidonian in Carthage (*CIS* 1 287) bears the name of עבדבל, 'Abdbel.

repeated hostility between the Greek and Phœnician fleets, the traces of a singularly strong and ever growing Philhellenism.[1] We find this in its highest degree under King Straton (probably a corruption for 'Abd'ašt-art) in the first half of the fourth century. He maintained a most luxurious court, and brought together from all parts of Greece singing and dancing women, who competed at his feasts for prizes in their art (Theopomp. fr. 126 in Athenæus 12 531; Ælian, *Var. hist.* 7 2).[2] He had close relations with Athens, and gave his support to the embassy which went to the Persian court in 367. In return the Athenians granted him and his successors the right of *proxenia* and the Sidonian merchants staying at Athens were exempted from all taxes (*CIA* 2 86.) The same king's name probably occurs in the bilingual inscription from Delos in *CIS* 1 114, where only the beginning of his name ... עבדע is preserved; perhaps also in *CIS* 1 4.

In other respects the conditions of Phœnicia seem to have altered but little under the Persians. Now as before it consists of four states—Tyre, Sidon, Byblos, Arados. All four are in separate existence in the time of Alexander the Great (Arr. ii. 13 7 15 6 *f.* 20 1 = Curtius 4 1 6 *ff.*), whilst Herodotus (7 98) in his catalogue of Xerxes' fleet mentions only the kings of Sidon, Tyre, and Aradus. He does not name Byblos at all; plainly in his time this city occupied politically and commercially a very subordinate position, and partook of the character rather of a country town.

Also the cities which took part in the settlement of a level strip of coast near the northern end of Lebanon beyond the Theouprosopon, called by the Greeks Tripolis (its Phœnician name is unknown) were the same three—Arados, Tyre and Sidon. Each of these had a special quarter to itself, surrounded by a wall and separated from the others by an interval. Here, as Diodorus (following Ephorus) informs us, the Phœnicians were wont to hold a federal meeting and joint political council; the king of Sidon attends it with 100 councillors. (Scylax, 104; Diod. 16 41 45; Strabo 16 2 15.) It is hardly probable that the town, or this attempt to bring the whole nationality under a combined organisation, was older than the Persian period.

From the end of the fifth century the Phœnician states also began to introduce the employment of coinage—that is, the issue of pieces of precious metal of a standard money weight, bearing the emblem and often also the name of the state or of the lord of the issuing mint. The Persian kings since Darius had already, as we know, been in the habit of coining, and reserving the right of gold coinage as a royal privilege, whilst the issue of silver money was left to the discretion of the vassal princes and communities and of the satraps. Arados coined by the Persian standard, the three other cities by the Phœnician. We are able to determine with absolute certainty, however, only the coins of Byblos, which invariably bear the name of the king (Elpa'al, Adarmelek, 'Azba'al, and 'Ainel) and of the city; the names of two other—earlier—kings of Byblos we know through the stele of Yeḥawmelek. Of Tyre, Sidon, and Arados, also many coins are still extant; but the name of city and ruler is either absent or inscribed in characters that cannot be clearly made out. Their assignment to the three cities seems to have been satisfactorily determined by the researches of Six and Babelon;[3] on the other hand the attempt to determine the name of the individual king, and hence establish fresh historical data, as for example the reign of a certain Euagoras in Sidon, is highly precarious.

[1] This is visibly brought before us in the sarcophagi of the Sidonian royal sepulchres discovered by Hamdy Bey. See Hamdy-bey and Th. Reinach, *Nécropole royale à Sidon*. On the interpretation and on the place of the sarcophagi in the history of art, see especially Studniczka, 'Ueber die Grundlagen der geschichtlichen Erklärung der sidonischen Sarkophage' in *Jahr. d. archaeol. Inst.* 10 (1894). But the present writer cannot concur in Studniczka's dating of the tombs of Tabnit and Eshmuna'zar (see below).

[2] Probably the sarcophagus of the Mourning Women dates from his reign.

[3] Six, *Numism. Chron.* 1877; *Rev. numism.* 1883; Babelon, *Bull. de corresp. hellen.* 15, 1891, and in *Cat. des monnaies grecques de le Bibl. Nat.* 2 ('Les Perses Achéménides,' 1893).

PHŒNICIA

It is clear that Berytus throughout belonged to the kingdom of Byblos. Then comes the territory of Sidon to which also Ornithopolis N. of Tyre belonged, whilst Sarepta nearer Sidon was a possession of the Tyrians. The coast down to Akko and Carmel is Tyrian. The Palestinian maritime plain during the Persian period was also shared by the two states. Dor, probably also Joppa, was Sidonian; Ashkelon and presumably Ashdod (Azotus) to the N. of it were Tyrian.[1] Only Gaza formed an independent commonwealth of very cosmopolitan character which steadily rose in importance, above all as the goal of the S. Arabian caravans. During the Persian period it issued coins of Attic type and Attic standard.

Of Sidon we have already spoken. Regarding Tyre we possess only the quite legendary narrative preserved in Justin (18 3).

According to Justin's story, the city was long and variously attacked by the Persians, and came off from the struggle, victorious indeed, but so exhausted that it fell into the hands of the slaves who rose in insurrection and massacred their masters. Only one, a certain Straton, was saved by his slaves, and afterwards, after he had shown the superiority of his gifts, made king by the insurgents. In consequence, Alexander at his conquest of Tyre, by way of exemplary punishment, caused all the survivors to be crucified with the exception of the descendants of Straton, whom he reinstalled as rulers. If this narrative contains any historical element at all, the struggles with the Persians of which it speaks can in reality only be the Assyrian and Chaldæan sieges, and it might perhaps be assumed that after these a revolution may have broken out, in which the dependent population made themselves masters of the city. Possibly the introduction of *Suffetes* in the Chaldæan period may have been connected with this. The whole story, however, is of so dubious a character that it is hardly possible for us to give it any place in history.[2]

Arados rose in importance during the Persian period; the whole of the opposite coast was subject to it: on the N. Paltos and Balanaia; then, opposite Arados, Karnos or Karna (so Plin. 5 78), which in the second century B.C. for some time issued coins inscribed קרן (Ant-Arados, mod. Ṭarṭūs, is of later origin and is mentioned only in Ptolemy); then Marathus (on Hellenistic coins מרת), which though never mentioned in the older period had in Alexander's time become a great and prosperous town; finally, Simyra and the regions of the Eleutheros (Arr. ii. 13 7 *f.* = Curt. iv. 1 6; Strab. xvi. 2 12 2 16).

Under the Persian rule Phœnicia, in common with all Western Asia, enjoyed for a period of a century and a half an epoch of peaceful prosperity, within which, apart from the intervention of the Phœnician fleets in the struggle with Greece (480-449) and afterwards in that against Sparta (396-387), there is nothing of importance to relate. It was not until the decline of the Empire had become growingly evident under Artaxerxes II. (404-359) that Phœnicia also became involved in the confusions and contests which again broke out.

Euagoras of Salamis, who in the unceasing conflict between Greeks and Phœnicians for supremacy in the island had once again for a short time secured the ascendancy for the Grecian element in 387, supported by Akoris of Egypt, conquered Tyre also and ruled it for a time (Isocr. *Euag.* 62; *Paneg.* 161; Diod. 15 2). Straton of Sidon (see above) held close relations with his son Nicocles; both became involved in the great Satrap revolt of 362 and, on the victory of the Persians, were compelled to seek their own death—Straton by the hand of his wife (Jer. *adv. Jovin.* 1 45).

Most disastrous was the revolt of all Phœnicia which in 350 Tennes of Sidon in alliance with Nectanebos of Egypt stirred up, embittered by the harsh oppression exercised by the Persian kings over Egypt and by the deeds of violence perpetrated by the satraps and generals in Sidon. The outbreak in Sidon was one of great violence; the populace wasted the royal park, burnt the stores at the royal stables, and put to death as

[1] See the (unfortunately very fragmentary) notice in Scylax, 104.

[2] One is strongly tempted to suspect that it is in some way connected with the story of Abdalonymos (referred by Diodorus to Tyre) and derived from that. This appears to be the supposition of Judeich also (*Jahrb. d. archæol. Inst.* 10 167, n. 2).

PHŒNICIA

many of the Persians as fell into their hands. At first the movement seemed likely to succeed. When, however, Artaxerxes III. advanced at the head of a great army, Tennes and his captain of mercenaries, the Rhodian Mentor—who afterwards played so great a part, as also did his brother Memnon, in the Persian service—surrendered the city to the king, who gave free course to his vengeance. Sidon was given up to massacre and flame. More than 40,000 inhabitants are said to have perished—chiefly by their own hands or in the flames of the conflagration they themselves had kindled. The traitor Tennes himself, after he had served his turn, the Persian king caused to be put to death. Hereupon the other Phœnician cities surrendered (Diod. 16 41 *ff.*). In Sidon we again at a later date find a king Straton installed by the Persians.

22. Macedonian and Roman period.

When Alexander, after the battle of Issus (Nov. 333), marched on Phœnicia, the city-kings with their contingents were with the Persian fleet in the Ægean. The cities, however, opened their gates to him and the Persian fleet dispersed. In Sidon Alexander was received with enthusiasm; he deposed king Straton and elevated to the throne a descendant of the old royal house, Abdalonymos, who is alleged to have been living as a gardener in very humble circumstances.[1] Tyre alone was recalcitrant, and declined to admit Alexander to the island city, where he wished to make an offering to Heracles; plainly its hope was to regain its independence, and as in former days to be able to defy the lords of the mainland. Alexander, however, was too strong for it. The fleets of the other Phœnician cities, those of the kings of Cyprus, as well as ships from Rhodes and Asia Minor, were at his disposal. By a causeway which he constructed in the sea—it has ever since connected the island with the mainland—he brought his siege engines to bear. After a seven month's siege the city was carried by storm (July 332). The entire population, so far as it had survived the horrors of the siege, was sold into slavery, to the number of 30,000; mercy was shown only to those who had sought asylum in the sanctuary of Herakles, among them king Azemilkos, the higher officials, and the members of a festal embassy from Carthage. The city itself had a new population sent to it, and in the period immediately following Tyre figures as one of the chief garrison-cities of the Macedonians.

The subsequent history of Phœnicia can be told very shortly. After Alexander's death the satrapy of Syria fell to Laomedon; but in 320 he was displaced by Ptolemy of Egypt. In 315 Antigonus made himself master of Syria, and maintained himself there despite repeated attempts of Ptolemy to dislodge him. He died on the battlefield of Ipsus (301), and his kingdom fell to pieces. Demetrius secured, amongst other fragments, Sidon, Tyre, and portions of Palestine; it was not until he went to Greece in 296 that Seleucus came into possession. Among the many cities which he founded, we must probably reckon Laodicea, to the S. of Tyre, the ruins of which are now known as Umm el-'Awāmīd. After the death of Seleucus (281) Ptolemy II. became master of Palestine, Cœlesyria, and Phœnicia, and not only he but also his successors continued to hold them despite all efforts of the Seleucidæ to dispossess them, till 197. Aradus alone and its territory (also Orthosia; see Euseb. *Chron.* 1 251, ed. Schœne) were retained by the Seleucidæ, who greatly favoured that city.

The era of Aradus dates from the year 259, which may be taken as marking the termination of the native kingdom; it is probable that in that year the city along with the republican constitution granted by Antiochus II. took at the same time the position of a free city—*i.e.*, became exempt from the jurisdiction of the satraps, like the cities of Ionia. Seleucus II. (247-225), having been supported by Aradus in his struggle with his brother Antiochus Hierax, added the further privilege that it was not compelled to surrender a subject of the Seleucidæ who had taken refuge there, but was permitted to intern him—a concession that greatly raised the prestige of the city (Strabo, xvi. 2 14). In 218 the city is completely free, and enters into a treaty of alliance with Antiochus the Great in the war against Ptolemy IV. (Polyb. 5 68).

Marathus, on the other hand, seems to have made use of the political situation to emancipate itself from Aradus; from 278 onwards it coins money after the Seleucid era, but with the heads of Lagid kings and queens.[1] The other Phœnician possessions of Aradus also seek to gain independence; in 218 Antiochus the Great mediates between them and Aradus. At a later date Karnê also for some time issued autonomous coins. But the Aradians were in the end successful in reasserting their supremacy. About 148 they attempted, after having bribed Ammonius the minister, to destroy Marathus with the help of the royal troops by an assault which, at the last moment, after the Aradians had already put to death the ambassadors of the hated city contrary to the law of nations, was frustrated by the warning of an Aradæan sailor, who by night swam over to Marathus (Diod. 33 5). Finally, in the time of Tigranes, with whom (or soon afterwards) the coins of Marathus come to an end, they achieved their object, Marathus was destroyed and its territory like that of Simyra divided into agricultural lots (Strabo, xvi. 2 12). Under the Roman rule, the whole coast from Paltos to the Eleutherus belonged to them.

Of the cities of the Ptolemæan domain Sidon is again the only one of which we know anything. Here the kingship continued to subsist for a long time. When Ptolemy I. in 312 became for the time lord of Phœnicia he appears to have made his general Philokles, son of Apollonides, king of Sidon, for this title is borne by Philokles in inscriptions of Athens and Delos (*CIA* 2 1371; *Bull. Corr. hell.* 4 327 14 409, cp 407, etc.). His rule can have been only quite transitory, however, although he continued to take the title, for in 311 Phœnicia and all Syria had already been reclaimed and readministered by Demetrius the son of Antigonus. Philocles, although as already said he continued to wear the title, appears in the immediately following years as Ptolemy's commander-in-chief on the Ægean.[2] In the third century we again meet with a native royal family which also exercised the priesthood of Astarte (see above); to it belong kings Eshmunazar I., Tabnit (pronunciation quite uncertain; perhaps identical with Τέννης) and Eshmunazar II., all of whom we know of through the sarcophagi of the two last named.

The sarcophagi are Egyptian, in mummy form; that of Tabnit bears the epitaph of an Egyptian general Penptah, and seems to have been stolen from an Egyptian tomb, perhaps in the conquests of Artaxerxes III., and then to have passed into the hands of the king of Sidon. Both coffins bear a Phœnician inscription with imprecatory formulas against the violator of tombs;[3] that of Eshmunazar also enumerates his buildings and other benefactions to Sidon. The date of these inscriptions has been much disputed, but should most probably be assigned to the Ptolemæan period and to the middle of the third century B.C.[4] The preference shown for poor Egyptian coffins, and these stolen, over the splendid Greek works of art which the kings of the Persian period had caused to be made, certainly shows an amazing degeneracy of taste, a native reaction against the Greek polish of Straton and Abdalonymus. In priests of

1 The story is related in thoroughly romantic style by Curtius (iv. 1 15 *ff.*) and Justin (11 10). In Diodorus (17 47) it is referred to Tyre, and in Plutarch (*De fort. Al.* 2 8) even to Paphos, and the house of the Cinyradæ. Abdalonymos of Sidon is mentioned also in Pollux (6 105).

1 For this and subsequent data derived from coins see Babelon, *op. cit.*

2 That the case was so has been shown by Homolle in *Bull. Corr. hell.* 15 137. Formerly a later date was given to him.

3 [For the inscription of Tabnit, cp Driver, *TBS*, Introd. pp. xxvi-xxix.]

4 Eshmunazar designates his overlord as 'Lord of kings' (ארן מלכם), which is the standing title of the Ptolemies in Phœnician inscriptions (*CIS* i. 93 95, inscriptions of Ma'ṣūb. and of Larnax Lapithu; transferred to the Seleucidæ, *CIS* 1 7). So far as we know, the Persian king always took the title 'king of kings,' מלך מלכם. At present we must allow decisive weight to this argument of Clermont-Ganneau.

Astarte, however, and under the rule of the Ptolemies such a phenomenon presents nothing surprising. The Ptolemies were never favourable, as the Seleucidæ were, to Hellenism and the fusion of nationalities and civilisations, but dealt with the native populations as subject races sharply separated from the ruling Macedonian Greek race.

Eshmunazar II. reigned for 14 years in conjunction with his mother Am'aštart the sister and wife of Tabnit. 'In compensation for the great tribute paid by me, the lord of kings presented us with Dor and Joppa, the magnificent grain lands[1] in the plain of Sharon, and we added them to the territory so that they became for ever the possession of the Sidonians.' The old Sidonian possessions on the Palestinian coast thus came back to them once more. Eshmunazar died while still young, leaving apparently no children. On his death perhaps, or at all events not long afterwards, a republican constitution was introduced in Sidon.

To this, not to the later era of 111 B.C., must be referred the era by which a bilingual honorary decree of the Sidonian colony in the Piræus is dated: 'in the 15th year of the people of Sidon.'[2] The inscription (Renan, *Rev. Arch.* 3 ser. t. 11 [1888], p. 5 *f.*; Hoffmann, 'Ueber einige Phœn. Inschr.,' in *Abh. Gött. Ges.* 1889, p. 36) belongs, as Köhler observed (*CIA* ii. suppl. 1335 *b*), to the third century or only a little after it.

In Tyre the same thing occurred in 274; it is by the era of 'the people of Tyre' (274-3) that one of the inscriptions of Umm el'Awāmid (*CIS* 1 7) and of Ma'ṣūb is dated. This district accordingly must have remained Tyrian. On the other hand, Akko became independent. Coins are extant, with Phœnician legends (עכא), dated most probably according to the Seleucidan era, down to the year 47 (=267 B.C.),[3] when Akko was changed by Ptolemy II. into a Greek city bearing the name Ptolemais (first mentioned Polyb. 4 37). With regard to Byblos we have no information. Tripolis had doubtless been an independent commonwealth from the beginning of the period of the Diadochi (Diod. 19 58 85); Babelon attempts to make out for it an independent era from the year 156, the place of which was afterwards taken by the Seleucidan era. Berytus also issued autonomous coins for some time during the second century.

From 197 onwards all Phœnicia belonged to the Seleucidæ; but not for long. Soon after, with the death of Antiochus Epiphanes (164 B.C.), began the collapse of the kingdom—the revolt of the Jews, the appearance of rival claimants to the throne, the loss of the eastern provinces. At last came the complete break up at the end of the second century. For some time the kingdom was in the hands of Tigranes of Armenia (82-69).

Phœnicia was affected in various ways by these confusions. Berytus was destroyed by Diodoros Tryphon (141-138; Strabo, xvi. 2 19). On the other hand Tyre, probably in 126 B.C., 'for a small sum' (Strabo, xvi. 2 23), and Sidon in 111, received complete autonomy; with these years new eras begin for each of the respective cities. Aradus in the time of Tigranes destroyed Marathus (see above), and regained all its old territory. On the other hand Arabian robber tribes established themselves in Lebanon, wasting the territories of Byblos and Berytus, and seizing Botrys and other places on the coast (Strabo, xvi. 2 18). In Byblos and Tripolis usurpers or 'tyrants' (Strabo, *l.c.*; Jos. *Ant.* xiv. 3 2) arose, as in so many other places in Syria.

To this intolerable state of affairs an end was put by Pompey in 64. He made Syria a Roman province and established order everywhere. The robber tribes were subjugated, the tyrants of Byblos and Tripolis put to death. The privileges and the territories of Aradus, Sidon, and Tyre were confirmed and enlarged (Strabo, xvi. 2 14 2 23; Jos. *Ant.* xv. 4 1). In an inscription

[1] Or 'lands of Dagon'; see DAGON, DOR, § 3.

[2] As long as the kingship lasted, dates were given by the regnal years; when it ceased the dating was given according to the years of 'the people'—*i.e.*, of the republic (where not along with, or exclusively by, the Seleucidan era).

[3] Cp Babelon, *op. cit.* clxxvii.

Tripolis also is called ἱερὰ καὶ ἄσυλος καὶ αὐτόνομος καὶ ναυαρχίς. In the main these arrangements proved permanent, though of course not without certain modifications. Thus Augustus on account of internal disturbances deprived Tyre and Sidon of their freedom; that is, he placed them under the direct oversight of the imperial legate (Dio Cass. 54 7; in 20 B.C.). Their civic self-government, however, with aristocratic institutions, he preserved and maintained in the Phœnician communities as elsewhere throughout Syria.

In the centuries that followed Alexander's time, the Greek influence in Syria became continually stronger. The Phœnician language occasionally appears in conjunction with the Greek legends on coins down to the second century A.D., and in the mouth of the common people was superseded, as in the case of the Jews, not by Greek but by Aramaic, as Philo of Byblos shows (see above, § 15). Greek everywhere makes its appearance alongside of it, however, and in the inscriptions Greek rules alone from the beginning of the Roman period. Relations with the Greek world become continually more and more active; here Sidon takes the pre-eminence by far. Among the Phœnicians who are named in Greek inscriptions the Sidonians form a majority.

As early as the end of the fourth century we find a Sidonian—Apollonides son of Demetrius (he may have been the father of king Philocles mentioned above)—receiving, on account of the services he had rendered to Attic merchants and sailors, the honour of a Proxenos and Benefactor, and the right to acquire landed property in Attica (*CIA* 2 171). Of a still earlier date is the decree in favour of two Tyrians (*ib.* 170).

From the second century the sons of Sidonians, Berytians, and Aradians enter the corps of the Attic ephebi (*CIA* ii. 482 467 469 471 482), and among the victors in gymnastic games there figure in Athens (*ib.* 448 498 966 968 970) and elsewhere (*Bull. corr. hell.* 5 207 [Cos], 6 146 [Delos]) Sidonians, Tyrians, Berytians, Byblians. Soon we meet with artists (*e.g.*, *CIA* 2 1318) and philosophers who come from Sidon and Tyre (Strabo, xvi. 2 24); and, however much they may try to preserve their native traditions, they become imbued with Greek elements, as Philo's exposition of the Phœnician religion visibly shows.

The Roman rule introduced also a Latin element. Augustus in 14 B.C. caused Berytus to be rebuilt as a Roman colony, and settled in it two veteran legions (Strabo, xvi. 2 20, etc.). From that time Latin became the official and prevailing language of the city, which was endowed with an extensive territory reaching as far as to the source of the Orontes. Under Claudius, Ptolemais, under Septimius Severus, Tyre, and under Elagabalus, Sidon became Roman colonies.

The trade and prosperity of the Phœnician towns received a great impetus under the peaceful, orderly rule of the Roman emperors and their governors. On the other hand the Phœnician speech and nationality—like so many others—became extinct within the same period. In N. Africa alone did they continue to drag on a further existence for some centuries longer—how degenerately, is conclusively attested by the language and writing of the inscriptions.

23. Literature. Among works dealing with Phœnician history or portions of it, after Bochart's *Phaleg et Canaan* (1646), special mention is due to Movers' *Die Phönizier* (1842-1856), which long enjoyed a great reputation. In reality it is quite uncritical and unscientific, and at every opportunity falls into the most fantastic combinations; it is impossible to warn the reader too earnestly of the need for caution in its use. Good and very useful, on the other hand, are the short surveys by von Gutschmid (art. 'Phœnicia' in *EB*(9) 18 801 *ff.*; in German in the 2nd vol. of his *Kleine Schriften*) and by Pietschmann, *Gesch. der Phoenizier*, Berlin, 1889 (in Oncken's *Allgem. Gesch. in Einzel-darstellungen*). See further the Phœnician sections of the larger works on ancient history; in particular, Duncker's *Gesch. d. Alterthums*, Maspero's *Hist. anc. des peuples de l'Orient*, and E. Meyer's *Gesch. d. Alterthums*. Also H. Winckler's 'Zur phönizisch-Karthagischen Geschichte,' a number of often very bold hypotheses (*Altor. Forschungen*, 1 [1897] 421-462). For Carthage Meltzer's *Gesch. d. Karthager* (2 vols. as yet; 1879, 1895) is thorough. On Phœnician religion see further Baudissin, *Stud. zur semit. Rel.-gesch.* 1 [1876], 2 [1878], Baethgen, *Beitr. zur*

sem. Rel.-gesch. [1888], Nöldeke in *ZDMG* 42 470 *ff.*, several articles of E. Meyer in Roscher's *Lex. d. Griech. u. Röm. Mythologie*, in particular the article 'Baal,' 1 2867 *ff.* (the older articles 'Astarte' and 'El' are antiquated) and W. R. Smith, *Rel. Sem.*(2), 1894. E. M.

PHŒNIX (חוֹל, or [the reading of the Massoretic school of Nehardea and of the Western recension, Ginsb. *Introd.* 515, but cp Ḳimḥi, *Bk. of Roots*, who attests only the former] חוּל, 𝔊 below).

The name of a certain long-lived bird, Job 29 18 RVmg. (text of EV has 'sand,' which can hardly be right). This rendering harmonises with the preceding stichus in MT, which EV renders, 'Then I said, I shall die in my nest' (*i.e.*, in my home), but RVmg. more correctly, '. . . beside [Heb. with] my nest.' An allusion is supposed (Ew., Hi., Del., Bu., Du.) to the story of the bird called the Phœnix (Herod. 2 73), which lived 500 years, and then consumed itself and its nest with fire, to rise again as a young Phœnix out of the ashes. Franz Delitzsch even produces linguistic justification for the identification of חֹל, *ḥōl*, or חוּל, *ḥūl* (so pointed to preclude the rendering 'sand') with the Phœnix. But though Ezekielos, the Jewish dramatist of Alexandria (2nd cent. B.C.), introduces the Phœnix into his drama on the Exodus (Del. *Gesch. d. jüd. Poesie*, 219, quotes the passage in its context), it is most unlikely that the Phœnix myth was known to Jewish writers as early as the composition of Job. There are three further objections to Ewald's view—viz. (1) that the next verse leads us to expect a figure from a tree rather than from an animal, (2) that there is considerable difficulty in explaining 'with my nest,' in the first stichus, with reference both to Job and to the Phœnix, and (3) that 𝔊 points to a different and much more natural form of the text.

𝔊 renders *v.* 18 thus,—

εἶπα δέ, ἡ ἡλικία μου γηράσει·
ὥσπερ στέλεχος φοίνικος πολὺν χρόνον βιώσω.

This suggests reading for עִם־קִנִּי, 'with my nest,' בְּזִקְנִי, 'in my old age,' and for וְכַחוֹל, 'and as the sand' or 'and as the phœnix,' וּכְנַחַל, 'and as the palm tree'[1] (cp Che. *JQR*, July 1897). When we remember that the Phœnix of later literature is merely a materialised form of one of the fine old Egyptian symbols of the sun-god (of which another is the CROCODILE [*q.v.*]), we can give up Job's supposed reference to the fable without a pang. On the Phœnix, see art. 'Phœnix' in *EB*(9) (where references are given); Delitzsch on Job 29 18; Bochart, *Hieroz.* 6 5; Charles, *Secrets of Enoch*, 12 *f.*; James, *Texts and Studies*, v. 1 88 (4 Bar. 6), and cp ON, 2. For the Midrashic stories see Hamburger, *RE des Judenthums*, 2 908.

PHRURAI (φρουραι [BLℵ]), Esth. 11 1 RV, AV PHURIM. See PURIM.

PHRYGIA (φρυγια [WH Ti.], Acts 16 6, 18 23, doubtful whether as noun or as adjective [χωρα understood]. In 2 Macc. 5 22 the ethnic [Φρυ.] is applied to Philip, governor of Jerusalem under Antiochus Epiphanes—*i.e.*, about 170 B.C.).

1. Geography. Phrygia, the country of the Phryges, was the name given to a vast and ill-defined region in central Asia Minor. Speaking generally, we may say that it embraces the extreme western part of the plateau and the fringing mountains, from the confines of Bithynia to those of Pisidia. 'The more eastern portion of this country consists of broad open valleys, gradually merging into the great steppe which forms the centre of Asia Minor; to the west it is more broken; it has several important mountain ranges; and its cities lie in mountain valleys, through which pass the main-lines of communication [*e.g.*, the valley of the Lycus]. Throughout it run the two great roads [the old Royal Road, and the Eastern Trade Route] which have at different periods connected the sea-coast and the interior; and Phrygia has in consequence always had a double history—on the one side linked with the central plateau and the East, on the other with the sea-coast towns and the Greek peoples of the West' (Headlam, in *Authority and Archæology*, 363 *ff.*). The original extent of Phrygia was much wider than is indicated above; but it was only for a short time that there was an independent Phrygian kingdom.

The Phryges were a group of invaders from Macedonia (Herod. 7 73) who split up the old empire (Hittite?) that had its capital at Pteria in Cappadocia. Crossing the Hellespont, the Phryges spread over Asia Minor, eastwards across the Sangarius as far as the Halys, and south-eastwards to Lycaonia and the Taurus. In the south-east, Iconium was the last city of Phrygia. In the opposite direction, they bordered upon the Hellespont and the Propontis (cp the Greek tradition of a Phrygian Thalassocracy lasting twenty-five years from 905 B.C.; Diod. 7 11; Hom. *Il.* 24 545). The Trojan city and the dynasty of Priam belonged to this people. Tribes from Thrace, the Mysi, Thyni, and Bithyni, crossed the Bosporus and severed Phrygia into two parts—Hellespontine or Little Phrygia, an undefined strip along the southern shore of the Propontis, of no account in history, and Great Phrygia (*Phrygia Magna*) the remainder (Strabo, 571).

The centre of power of Great Phrygia lay in the region of the Midas Tomb (see Murray's *Handbook to AM*, 134 *ff.*): with this kingdom are connected the names of Gordius and Midas; and to it the early kings of Lydia (the western fragment of the old Hittite [?] monarchy) owed allegiance. (For echoes of the Phrygian power, cp Hom. *Il.* 3 187 2 862; Hom. *Hymn to Aphrodite*, 112.)

The Cimmerian invasion (about 675 B.C.) broke the Phrygian power, and caused a reversal of the relations

2. History. with Lydia, which now developed into a great kingdom, and ruled as suzerain over Phrygia as far as the Halys (see LYDIA). There was henceforward no unity in Phrygian history; for the old conquering race itself was absorbed by the native race which it had conquered: the Phryges 'sank to that placid level of character which belonged to the older subject population and is produced by the genius of the land in which they dwelt—the character of an agricultural and cattle-breeding population of rustics, peaceful and good-humoured' (E. Meyer, *GA* 1 300). This absorption was already complete when, in 278 B.C., the Gauls entered Asia Minor. As the result of their victories over the then unwarlike Phrygians,[1] and of their defeats at the hands of Attalus I., king of PERGAMUM (*q.v.*), the Gauls were finally restricted to north-eastern Phrygia, which thus became known as Galatia.[2] The northern part of Phrygia also gained a special name about 205 B.C. As the outcome of war with Prusias, king of Bithynia, Attalus I. made himself master of the region in which lay Cotiæum and Dorylæum, which henceforth was called Phrygia Epictetus (Acquired Phrygia: Strabo, 576).

The south-eastern corner, between the ranges now called *Emir-Dagh* and *Sultan-Dagh*, was called Phrygia Paroreus (Παρώρειος); it contains the cities Polybotus, Philomelium, Tyriæum, and others (Rams. *Hist. Geogr. of AM* 139 *f.*). S. of the *Sultan-Dagh*, as far as the Taurus, came the district known as Pisidic (Pisidian) Phrygia, or Phrygia towards Pisidia (Strabo, 576, ἡ μεγάλη Φρυγία . . . ἐν ᾗ ἔστιν ἥ τε παρώρειος λεγομένη Φρυγία καὶ ἡ πρὸς Πισιδίᾳ. Cp Polyb. xxii. 5 14, Ptol. v. 5 4);[3] its one important city was Antioch (Ἀντιόχεια ἡ πρὸς Πισιδίᾳ, Strabo, 557, 569, 577).

When Phrygia came to form part of the Roman provincial system it was dealt with in a way that did violence to history and ethnology. For, on the one hand, the eastern portion in which lay Iconium, and the southern portion in which lay Antioch, were attached to the province Galatia, whilst the rest fell to the province Asia; on the other hand, the name Phrygia was extended in the W. to embrace all the Lycus valley, and in the SW. to embrace all the country towards Lycia. That part of Phrygia which belonged to Galatia was called *Phrygia*

[1] Cp Ecclus. 50 12, where נחל = φοῖνιξ. See PALM.

[1] Cp Herod. 9 32, App. *Mithr.* 19, ἀνδράσιν ἀπολέμοις.
[2] The Gauls also extended their conquests eastwards, over territory claimed by the Pontic kings and the Cappadocians.
[3] See Rams. *Cities and Bish. of Phrygia*, 1 316 *f.*

Galatica; that which belonged to Asia was *Phrygia Asiana* (Galen, 4 312 [Kuhn, 6 515]).[1] Hence many inscriptions enumerate Phrygia as a component part of the province Galatia (*e.g.*, *CIL* 3 6818, where the parts are Galatia, Pisidia, Phrygia, Lycaonia, Isauria, Paphlagonia, Pontus Galaticus, and Pontus Polemoniacus; date, after 63 A.D.). Phrygia experienced many vicissitudes; but these fall outside the province of the student of NT history (for details, see Rams. *Hist. Geogr. of AM* 151 *ff.*).

3. Jews in Phrygia. The Jews were much favoured by the Seleucid kings, who planted large colonies of them on the routes leading from the Syrian Antioch through Lycaonia into Lydia and Phrygia. Antiochus the Great settled 2000 Jews in the cities of Lydia and Phrygia about 200 B.C. (Jos. *Ant.* xii. 3 3, § 148 *f.*). Seleucus Nicator had granted the Jews full rights of citizenship, equal to those of Greeks and Macedonians, in all his foundations (*id.*, *Ant.* xii. 3 1, § 119), and the later kings maintained this policy. Hence the Jews were members of the aristocracy in the Phrygian cities (see on this Rams. *Cities and Bish. of Phrygia*, 2 667 *ff.*). The Phrygian Jews were considered in the Talmud as the Ten Tribes (for many of them had been transplanted from Babylonia); and it is said of them that the baths and wines of Phrygia had separated them from their brethren—by which we must understand that they had failed to maintain their own peculiar religion, and had approximated to the Græco-Roman civilisation by which they were surrounded (cp Neubauer, *Géogr. du Talmud*, 315; Rams. *St. Paul the Traveller*, 142 *ff.*). The marriage of the Jewess Eunice to a Greek at Lystra, and the fact that Timotheus, the offspring of the marriage, was not circumcised, is an illustration of this declension from the Jewish standard (Acts 16 1). The result was that the Jews had in their turn strongly influenced their neighbours, and thus prepared unconsciously a favourable field for Paul's teaching (cp the many proselytes at Antioch, Acts 13 43 50). On the other hand, the Phrygian Christians were strongly inclined to Judaism (Gal. 1 6 4 9), for there was no strong racial antipathy between the natives and the Jews (cp Rams. *Hist. Comm. on Gal.* 189 *f.*).

4. Phrygia in the NT. The distinction between Galatic and Asian Phrygia which held during the first century A.D. (§ 2), explains the passage in Acts 16 6 (*τὴν Φρυγίαν καὶ Γαλατικὴν χώραν*, AV 'Phrygia and the region of Galatia'; RV 'the region of Phrygia and Galatia'). The word *Phrygian* is here an adjective, connected with the following 'country' (*χώραν*); and the whole phrase denotes that territory which was at once Phrygian and Galatian—Phrygian from the point of view of history and local feeling, Galatian from the point of view of the Roman provincial classification, *i.e.*, 'the Phrygo-Galatic Region,' or, 'the Phrygian or Galatic Region.'

Even if 'Phrygian' (*Φρυγίαν*) in this passage be regarded as a noun, the interpretation must be the same. Paul was at Lystra (*v.* 3); and unless he abandoned his intention of visiting the brethren 'in every city' in which the word had been preached (Acts 15 36), he must necessarily have crossed the frontier of Lycaonia a few miles N. of Lystra (cp Acts 14 6) into Galatic Phrygia, the region (*χώρα*, *Regio*) in which the cities of Iconium and Antioch lay.

This interpretation is entirely independent of any view that may be held with regard to the whereabouts of the churches of Galatia. [See, however, GALATIA, §§ 10-14.]

More difficult is the explanation of Acts 18 23, where the same words are found, but in reverse order (*τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*, AV 'the country [RV region] of Galatia and Phrygia'). The phrase in Acts 18 23 covers a larger extent of ground than does that of Acts 16 6; for the latter, we saw, fell NW. and W. of Lystra, but Derbe and Lystra are now included. The order of words is also important; whereas in Acts 16 6 two epithets are attached to one noun following them, in Acts 18 23 an epithet and noun are connected by 'and' with a following epithet (if *Φρυγίαν* be an adjective here also) to which the preceding noun must be supplied.[1] The explanation set forth by Ramsay is that *Φρυγίαν* is here an adjective—the 'Phrygian Region' being simply the briefer description of the territory spoken of in Acts 16 6 as the 'Phrygo-Galatic Region.' The region is combined with another, lying E. of it, the region containing the towns of Derbe and Lystra—*i.e.*, Galatic Lycaonia, as opposed to Antiochian Lycaonia which was ruled by king Antiochus (see LYCAONIA). This explanation involves the assumption that the titles *Lycaonia Galatica* and *Lycaonia Antiochiana* could become 'Galatic region' (*Γαλατικὴ χώρα*) and 'Antiochian region' (*Ἀντιοχιανὴ χώρα*), respectively, in the mouth of a Greek (or of Greek-speaking Paul) passing through the country. Put in this way the parallelism is deceptive. On the one hand, of the Latin titles only the second, *Lycaonia Antiochiana*, has been found (*CIL* 10 8660), whilst the other is inferred from the analogy of *Pontus Galaticus;* on the other hand, of the Greek terms only the second '(*Ἀντιοχιανὴ χώρα* : Ptol. v. 6 17) occurs. The use of the term 'Galatic region' (*Γαλατικὴ χώρα*) for the Roman part of Lycaonia (and even its supposed Latin equivalent, *Lycaonia Galatica*), however possible on grounds of analogy and desirable in the interests of symmetry, is not yet proved. On this ground, not on that of its complexity, we reject Ramsay's explanation. Its weakness lies in the necessity of taking the passage in close connection and comparison with Acts 16 6.

Still, even so, what is there to suggest the contrast with the non-Roman part of Lycaonia whereby alone the expression 'Galatic region' (*Γαλατικὴ χώρα*) is justified and explained? In Acts 16 6 'Galatic region' (*Γαλατικὴ χώρα*) receives its explanation and limitation precisely from the word 'Phrygian' (*Φρυγίαν*) with which it appears in combination; but in Acts 18 23 the defining words 'of Lycaonia' (*τῆς Λυκαονίας*; cp Rams. *St. Paul the Traveller*, 104) have to be supplied by reference to Acts 14 6 (where Lystra and Derbe are called 'cities of Lycaonia'). On formal grounds also the expression 'the Galatic region and *Phrygian*' (*τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*) becomes objectionable if explained as Ramsay explains it. For the adjective 'Galatic' in the first member of it indicates the province, and the part (Lycaonia) is to be supplied by the reader; but the adjective 'Phrygian' (*Φρυγίαν*) in the second member of it indicates the part, and the province (Galatia) is to be supplied by the reader; for, according to Ramsay, the expression means 'the Galatic Region (of Lycaonia) and the Phrygian Region (of the province Galatia).' Cp GALATIA, § 12.

It is a mistake to insist upon the parallelism of the two phrases; Acts 18 23 must be interpreted independently of Acts 16 6. In 16 6 'Phrygian' (*Φρυγίαν*) is an adjective, in 18 23 it is a noun. In Acts 18 23 'Phrygia' is not *Phrygia Galatica* but *Phrygia Asiana;* the words 'the Galatic region' sum up the whole breadth of the province Galatia from Derbe to Antioch, including, therefore, both the Galatic part of Lycaonia (which, in Acts 14 6, is described as 'Lystra and Derbe' and 'the region that lieth round about') and the Galatic part of Phrygia (which, in Acts 16 6, is described as the 'Phrygo-Galatic Region'). See GALATIA, § 9, col. 1598. On this view, Paul travelled westwards from Antioch (Pisidian) and struck the eastern trade route perhaps at Metropolis (in the *Tchal-Ova*); but, instead of following the road through Apameia and the Lycus valley, he took the more direct road through Higher Phrygia, by way of Seiblia (see Rams. *Cities and Bish. of Phrygia*, 2 579 *f.*). This journey through Phrygia is described in Acts 19 1 as a journey 'through the upper coasts' (*τὰ ἀνωτερικὰ μέρη*, RV 'the upper country'). It is vain to explain this phrase as having reference to the distinction between High Phrygia and Low Phrygia (Rams. *Church in Rom. Emp.*(5) 94) if non-Galatian Phrygia has not previously been mentioned, but only Galatic Phrygia; for that distinction had no validity for Galatic Phrygia. The phrase in

1 'Δορύλαιον ἥ ἐστι μὲν ἐσχάτη τῆς Ἀσιανῆς Φρυγίας.

1 For the grammatical point here involved, see Ramsay, *Church in Rom. Emp.*(5) 486; *St. Paul the Traveller*, 210 *f.*

Acts 19 1 refers back to, and is an expansion of, the word *Phrygian* (Φρυγίαν) in Acts 18 23.

Phrygia is also mentioned in Acts 2 10 (on this list, see PONTUS). If we are not to admit here a cross-division (the names of Roman provinces being used indiscriminately with pre-Roman national divisions embraced by them), Phrygia must be taken to stand for Galatia; *Phrygia Galatica* being, from the point of view of Jews, the most important part of the Phrygian province (cp Acts 13 14 *f.* 14 1).

5. Christianity in Phrygia.

Christianity was introduced into Galatic Phrygia by Paul and Barnabas on the 'first missionary journey' (Acts 13 14 *f.*, Pisidian Antioch; Acts 14 1 *f.*, Iconium; both revisited, 14 21). On the 'second journey' Paul and Silas traversed Asian Phrygia, probably from (Pisidian) Antioch to Dorylæum (Acts 16 6 *f.* See MYSIA); but no public preaching was attempted as they were 'forbidden to preach the word in Asia.' On the 'third journey,' *Phrygia Galatica* was traversed a fourth time, and *Phrygia Asiana* a second time; but we have no record of the establishment of churches in the latter region. There is, however, no reason at all for imagining that the churches of the Lycus valley (Colossæ, Laodiceia, and Hierapolis) were the earliest foundations in Phrygia; although it is clear from Rev. 1 11 that Laodiceia was the representative church, at any rate in SW. Phrygia, in the first century A.D. The tradition that Bartholomew was the apostle of the Lycaones makes it probable that central Phrygia was the scene of his labours, for the Lycaones lay NW. of Synnada (Rams. *Cities and Bish. of Phrygia*, 2 709). In the history of Christianity in Asia Minor, Phrygia holds an important place, and from it comes a larger number of inscriptions claimed as Christian than from any other part of the world except Rome itself.

Christian remains come from four districts: (1) central Phrygia, the region of the Pentapolis. From it comes the famous tomb-inscription of Avircius Marcellus, bishop or presbyter of Hierapolis (192 A.D.).[1] He was the leader of the anti-Montanist party, a 'disciple of the pure Shepherd, who feedeth flocks of sheep on mountains and plains,' who, 'with Paul for a companion followed while Faith led the way' (Rams. *Cities and Bish. of Phrygia*, 2 709 *ff.*); (2) the districts of Eumeneia and Apameia; (3) Iconium and the country N. and NE. from it (Rams. *Hist. Comm. on Gal.* 220); (4) N. Phrygia, the valley of the Tembris (Rams. *Expos.*, 1888, 2 401 *f.*).

'These facts point distinctly to three separate lines of Christian influence in Phrygia during the early centuries. The first comes up the Mæander valley, and reaches on different lines as far as Akmonia, and the Pentapolis and Apameia and Pisidian Antioch; the second belongs to Lycaonia and the extreme SE. district; the third belongs to the NW. The spheres of these three influences are separated from each other by belts of country where early Christian inscriptions are non-existent' (Rams. *Cit. and Bish.* 2 511). Ramsay would trace all three centres to a Pauline source (*ibid.* and 715). The persecution of Diocletian practically destroyed Christianity throughout Phrygia.

See Ramsay's monumental work, *The Cities and Bish. of Phrygia*, of which only two parts—i., Lycos Valley; ii., West and West-Central Phrygia—have as yet appeared. W. J. W.

PHUD (φουδ [BℵA]), Judith 2 23 AV, RV PUT (*q.v.*).

PHURAH, RV **Purah** (פֻּרָה; as if 'vat'; cp יֶקֶב זְאֵב, Judg. 7 25, but see below; φαρα [BAL]), Gideon's attendant, or armour-bearer, Judg. 7 10 *f.* That a mere attendant's name is recorded, is remarkable. Purah must either be, or spring from, some clan-name, either פֻּוָּה (see GIDEON, § 1, n. 2, PUAH), or more probably Ophrah (Judg. 6 11 etc.) or Ephrath. Cp MEONENIM, MOREH. T. K. C.

PHURIM (φρουραι [BLβ]), Esth. 11 1, AV. See PURIM.

PHUT (פּוּט), Gen. 10 6 1 Ch. 1 8 AV, RV PUT (*q.v.*).

[1] [The view that this inscription owes its origin to a Christian is extremely doubtful. A mass of literature on the subject is cited, for example, in *Rev. de l'hist. des rel.* 1897, p. 418 *f.* The most noteworthy defence of its pagan origin is in Dietrich, *Die Grabschrift des Aberkios*, Leipsic, 1896.]

PHUVAH (פֻּוָּה), Gen. 46 13 AV, RV PUVAH = 1 Ch. 7 1 PUAH (*q.v.*).

PHYGELLUS, RV better, **Phygelus** (φυγελος, ℵCD), is mentioned in 2 Tim. 1 15† beside Hermogenes as having become alienated from Paul. Pseudo-Dorotheus speaks of both (see HERMOGENES), and represents Phygelus as having been a follower of Simon (Magus), and afterwards bishop of Ephesus. Otherwise the voice of legend is silent.

PHYLACTERIES (φυλακτηρια), Mt. 23 5. See FRONTLETS.

PHYLARCHES (ο φυλαρχης), 2 Macc. 8 32 RV$^{mg.}$, AV PHILARCHES, RV 'the phylarch.'

PHYSICIAN (רֹפֵא, Gen. 50 2 etc.; ιατρος, Mt. 9 12 etc.). See MEDICINE.

PIBESETH (פִּי־בֶסֶת; βουβαστος [BAF], στομα εμπειρα [Q]; *Bubastus*), a city of Egypt which along with On-Heliopolis is threatened with destruction by the Babylonian armies (Ezek. 30 17).

1. Name.

In view of the connection with cities on the Western frontier of the Delta (Tahpanhes, *v.* 18) and the renderings in the versions, we must recognise here the famous city not far from the W. entrance to Goshen. Its ruins, which are still known as Tel(l) Basṭa, are situated just S. of the modern city and railway-centre Zaḳāziḳ.

The earliest Egyptian name of the city was (*W*)*bst*[1] (signification unknown), probably to be pronounced *Ubēset.* The place acquired a religious importance so high that its divinity, a cat (sometimes also in form of a lioness) or cat-headed goddess, had no other name than (*W*)*bstt*,[2] *Ubastet*, 'the one of Ubeset.' Later, the city was called 'house (or temple)[3] of Ubastet,' *P* (originally *Per*)-*ubaste*(*t*). The Greek rendering of this form changes the P to B, as always before w,[4] and drops the ending in accordance with the vulgar pronunciation. The Coptic version of the OT gives the rather old form φουβαςθι. The Hebrew orthography has hardly been handed down correctly; it is certainly influenced by the analogy of פִּי, 'mouth,' (cp 𝔊^Q as above). Besides, the vocalisation *-beseth* instead of *-bast* must have been introduced at a quite recent date after an analogy of Hebrew grammar. Originally, the name must have been pronounced by the Hebrews also like Pubast(e?). The modern shortening Basṭa(h) is as old as the Arabian conquest.

2. History.

Our knowledge of Bubastus has been greatly increased by the excavations of Ed. Naville, in the winters 1887-89, described in Memoir 8 of the Egypt Exploration Fund (1891), where also the literature relating to the city and its history are collected.

The city, the capital of the eighteenth nome of Lower Egypt, must have been very old. Naville found remains of buildings by the pyramid-builders Cheops and Chephren (*Ḫwfw*[*i?*] and *Ḫa'f-rē'*). At a still earlier date, the local goddess *Ubastet*-Bubastis (presupposing the existence of the city) is mentioned in the texts of the pyramids (cp EGYPT, § 46). This goddess was called Artemis by the Greeks; the

[1] . Cp Brugsch, *Dict. Geog.* 206.

[2] The singular freedom of Egyptian writing allows the suppression of the initial in the common orthography. Occasionally, however, it is written, and the form of the name is made certain by the foreign transcriptions.

[3] .

[4] Cp ETHAM. Notice that the classical writers give Bubast*us* for the city, Bubast*is* for the goddess. The confusion between the forms which, unfortunately now prevails, is due to Herodotus, who does not distinguish (in the present text).

Egyptians emphasised her joyous and benign nature as contrasted with various warlike goddesses in lioness-form. Cp the feasts of Bubastis at which hundreds of thousands of pilgrims from all Egypt assembled for the revelries so vividly described by Herodotus (2 60). Of course, the goddess, like all important divinities, soon received a solar character, and one of her chief titles is, 'eye of the sun-god,' by which evidently she is designated as the sun-disk itself. The cat was sacred to Bubastis, and consequently there was near the city an enormous cemetery for cats (and ichneumons), which in our prosaic time has been exploited for manure. That the cat was considered sacred not only in Bubastus but also throughout all Egypt proves the general worship of Bubastis. Male divinities worshipped along with her were Nefer-tēm and Ma-ḥes, in lion-forms.

Various kings of all dynasties (6, 12, etc.) built at Bubastus, even the Hyksos-rulers Ḫeyān and Apopi; above all, however, the pharaohs of dynasty 22 among whom Lower Egypt had completely gained the upper hand over the Thebaid. Osorkon II. erected there a very large hall in commemoration of one of those jubilee-festivals called *ḥeb-sēd* by the Egyptians, *τριακονταετήριδες* (Inscr. Rosettana, 3) by the Greeks. See for the curious sculptures of that building Memoir 10 of the Egypt Exploration Fund. The twenty-second and twenty-third dynasties seem to have had their residence in Bubastus; for the question, why Manetho calls them Bubastide kings, see EGYPT, § 64. Herodotus gives a very impressive description of the temple. Later it was enlarged by Nectanēbēs (*Neḫtnēbef*), one of the last Egyptian kings. Diodorus (16 49) narrates the capture of the place by the generals of Artaxerxes Ochus. Although the Greek and Roman rulers do not seem to have expended much on the temple, Bubastus continued to be a flourishing city down to Arab times. During the middle ages, it was abandoned; the present ruins do not offer many attractions to tourists.

W. M. M.

PICTURES. The rendering is found only in AV.

1. שְׂכִיּוֹת, *śekiyyōth*, Is. 2 16, RV 'imagery,' RVmg. 'watch-towers.' 'Figured works' would be the most natural rendering; but we expect something tall to be mentioned. There seems to be corruption in the text. 'Ships of Tarshish' in *v.* 16*a* cannot be right; they do not come in at all naturally after 'high towers' and 'steep walls.' To correct שְׂכִיּוֹת into סְפִינוֹת, 'ships' (Siegfr.-Stade), is therefore unsatisfactory, even apart from the fact that this word, well known in Aramaic, only occurs in the late Book of Jonah [1] (Jon. 1 6). We can hardly defend it by 𝔊BℵA, *πᾶσαν θέαν πλοίων κάλλους*, which is paraphrastic. See EBONY, § 2 (*e*).

2. מַשְׂכִּיּוֹת, *maśkiyyōth*. (*a*) Nu. 33 52 (*σκοπιαί*), rather 'figured (stones),' as RV; cp Lev. 26 1, אבן משכית, 'figured stone' (AVmg., RV), and see IDOL, § 1 *f.* (*b*) Prov. 25 11 (on 𝔊 see BASKET), RV 'baskets'; but the 'baskets of silver' are as doubtful as the 'pictures.' See BASKET.

PIECE OF MONEY, PIECE OF SILVER, or **OF GOLD.**

1. קְשִׂיטָה, *keśîṭāh* (Gen. 33 19 and ‖ Josh. 24 32 [RV; AV has 'pieces of silver']; also Job 42 11). A doubtful reading. See KESITAH.

2. *στατήρ*, Mt. 17 27† AV, EVmg. 'stater,' RV SHEKEL (*q.v.*).

3. אֲגוֹרַת כֶּסֶף, *'ăgōrath késeph* (*ὀβολοῦ ἀργυρίου*; *nummum argenteum*, 1 S. 2 36; EV 'a piece of silver'). Doubtful (see SPELT).

4. In 2 K. 5 5 EV has 'six thousand [pieces] of gold' for ששת אלפים זהב. RVmg. suggests 'shekels' for 'pieces'; cp Zech. 11 12 *f.* '[pieces] of silver.' See MONEY.

5. In Lk. 15 8 *f.* the 'piece of silver' is *δραχμή* (EVmg. 'drachma; a coin worth about eightpence'). The 'pieces of silver' of Mt. 26 15 27 3 *ff.* are *ἀργύρια*; the fifty thousand pieces of silver in Acts 19 19, *ἀργυρίου μυριάδες πέντε*.

PIGEON (גּוֹזָל, Gen. 15 9; יוֹנָה, Lev. 12 8). See DOVE, FOWL.

PI-HAHIROTH (פִּי־הַחִירֹת; in Ex. ΤΗϹ ΕΠΑΥΛΕΩϹ [BAFL], in Nu. ϹΤΟΜΑ ΕΠΙΡΩΘ [B], ϹΤ. ΕΙΡΩΘ [B^{ab}AFL]; *Phihahiroth*) Ex. 14 2 9 Nu. 33 7; also HAHIROTH (הַחִירֹת; ΕΙΡΩΘ [BAFL]; *Phihahiroth*) Nu. 33 8. See EXODUS i., § 11; also BAAL-ZEPHON, and MIGDOL, 1.

[1] Gunkel (*Schöpf.* 50) thinks שְׂכִיּוֹת to be a rare word for 'ships'; but his theory has no solid basis.

PILATE, PONTIUS (ΠΟΝΤΙΟϹ ΠΙΛΑΤΟϹ [ΠΕΙΛΑΤΟϹ ℵBD]).

1. Name and titles.

In Mt. 27 2 *Πειλάτῳ τῷ ἡγεμόνι*; thereafter *ὁ Πειλᾶτος* or *ὁ ἡγεμών* simply; Mk. 15 1 *Πειλάτῳ* simply, thereafter *ὁ Π.*; Lk. 3 1 *ἡγεμονεύοντος Ποντίου Πειλάτου* (here only and Acts 4 27 the double name); for the title cp 20 20; in other places *ὁ Π.* as in 23 1 *ff.* or *Π.* simply (as also in Acts 3 13); Jn. 18 29 *ff.* has 4 27 only *ὁ Π.*

The NT, as above shown, uses only the title *ἡγεμών*, = Lat. *præses*, a general term (cp *ἡγεμονία* used in Lk. 3 1 of the emperor, in which place it is translated 'reign,' EV), used also by Josephus in speaking of the 'governor' of Judæa (*Ant.* xviii. 3 1, § 55). Josephus also often employs the word *ἔπαρχος* (*Ant.* xix. 9 2, § 363) or *ἐπιμελητής* (*Ant.* xviii. 4 2, § 89); but the specific title of the governor of Judæa was *procurator*, in Greek *ἐπίτροπος*, and so he is called by Jos. *Ant.* xx. 6 2, § 132, *BJ* ii. 8 1, § 117, 9 2, § 169 and elsewhere (cp Tac. *Ann.* 15 44—the only passage in which Pilate is mentioned by a Roman writer). For an account of this office see PROCURATOR.

Pilate's birthplace is unknown; but the legends offer an ample choice (Müller, *Pont. Pil.* 48 *f.*). His *nomen* Pontius suggests a connection with the famous Samnite family of the Pontii; his *cognomen* Pilatus, if it were really derived from the word *pileatus* (*pilleatus*), 'wearing the *pilleus*, or felt cap of the manumitted slave,' would suggest the taint of slavery in the history of his family (cp the case of Felix, who although actually only a freedman held the procuratorship of Judæa). The word Pilatus may, however, just as probably be connected with *pilatus* (*pilum*) or *pilatus* (*pilo*), either of which derivations would start us upon a very different train of imagination, the conclusion of which would equally have no historical validity whatever.

On the death of Archelaus in 6 A.D. his kingdom, which had included Judæa, Samaria, and Idumæa, was made a Cæsarian province (see HEROD [FAMILY], § 8). Of the seven procurators who administered the province between 6 A.D. and 41 A.D. Pontius Pilate was the fifth; he held office for ten years (26-36 A.D. Cp Jos. *Ant.* xviii. 4 2, § 89).

2. Story of imperial image.

According to Philo, Agrippa I. in his letter to Caligula describes Pilate as 'inflexible, merciless, and obstinate' (*τὴν φύσιν ἀκαμπὴς καὶ μετὰ τοῦ αὐθάδους ἀμείλικτος*), and charges him with 'corruption, violence, robbery, ill-usage, oppression, illegal executions, and never-ending most grievous cruelty' (Phil. *Leg. ad Caium*, 38). The few incidents recorded of his career are supposed to furnish completely satisfactory evidence of this undoubtedly overdrawn characterisation. So 'the very first act by which Pilate introduced himself into office was characteristic of him who treated with contempt the Jewish customs and privileges' (Schürer, *GJV* 1 400; ET i. 2 83). In order to satisfy Jewish scruples it was a standing order that the image of the emperor borne upon Roman military standards should be removed before troops entered Jerusalem; but on one occasion, probably soon after Pilate's entry upon office, it was discovered that this rule had been evaded by a detachment which had entered the city by night (Jos. *Ant.* xviii. 3 1, § 56; *BJ* ii. 9 2, § 169). For five days Pilate was deaf to the protestations of the crowd which gathered before his palace at Cæsarea. On the sixth day the malcontents were surrounded by troops in the race-course; but their fanatical obstinacy was proof against this display of power, and Pilate was obliged to give way. It was his first experience of that strange intractable temper which made the Jews so difficult to govern; he learnt now, at the outset of his career as governor, how far the people were prepared to go for

the sake of their religious scruples. That a massacre of the mob was seriously contemplated, it would be foolish to assert; for the imperial system was a sensible attempt to govern by means of sensible men. The utmost that can be extracted from the narrative, in our ignorance of the exact circumstances of the breach of regulations, is the conclusion that the procurator erred through inexperience of the people and an inopportune insistence upon a point of honour. Pilate's Roman sentiments must claim weight equally with the punctilios of the Jewish mob; but this is often overlooked.

The other instances of friction will be found upon a fair review to bear a very different interpretation from that usually put upon them.

3. Other stories. The treasure accumulated in the temple was in part appropriated for the construction of an aqueduct to Jerusalem. This excited vehement opposition, and a visit of the procurator to the city was made the occasion of a great popular demonstration. Pilate having received previous information of the intended outburst issued the necessary orders, and the soldiers mingling with the crowd dispersed the rioters with bludgeons, and effectually silenced all open opposition to the scheme; this was not accomplished without some loss of life (Jos. *Ant.* xviii. 3 2; *BJ* ii. 9 4).

The incident to which reference is made in Lk. 13 1 ('the Galilæans, whose blood Pilate had mingled with their sacrifices') is not elsewhere recorded. When account is taken of the disturbed state of the country, due to the fanatical mutual hatred of the various religious groups (cp, for example, the act of the Samaritans who threw bones into the temple just before the Passover in order to pollute it—Jos. *Ant.* xviii. 2 2, § 30), we must recognise in the incident only the strong hand of a governor concerned to carry out impartially the duty which was in fact the prime requirement of a provincial governor—the maintenance of order (cp Ramsay, *Was Christ born at Bethlehem?* 174 *f.*). The permanent difficulty of this task in the case of Judæa is evidenced by the insurrection in which Barabbas had been prominent (Mk. 15 7 Lk. 23 19), and also by that collision between the government and the Samaritans which led to Pilate's recall. These Samaritans, under the leadership of an impostor, who promised to reveal the sacred utensils which were supposed to be concealed on Mt. Gerizim since the time of Moses, gathered in great numbers armed at the mountain, but were dispersed with bloodshed by Pilate's troops, and those of repute and influence among them executed. The Samaritans made complaint to Vitellius, who had come as *legatus* to Syria, and Vitellius sent Pilate to Rome to answer for his conduct, making over the administration of Judæa to Marcellus (Jos. *Ant.* xviii. 4 2).

The true nature of the two incidents last sketched is clear. Upon the whole, we must refuse to subscribe to

4. Pilate's administration. that unfavourable verdict which has been passed upon Pilate on the strength of evidence derived from hostile sources, whether Jewish or Christian. The peculiar misfortune of Pilate, that he was connected with the tragedy of Jesus (see ROMAN EMPIRE), has resulted in all treatment of his career being merely a search for evidence in support of a foregone conclusion. His ten years' tenure of office (a length of tenure equalled only by that of his predecessor Valerius Gratus, 15-26 A.D.) is evidence of the general success of his administration; for the reason assigned by Josephus (*Ant.* xviii. 6 5), that long tenure was due to deliberate intention on the part of Tiberius to secure if possible a mitigation of official rapacity, on the principle that 'it is better to leave the gorged flies on a sore than to drive them off' is simply foolish if taken as more than the *jeu d'esprit* of a malcontent (for other assigned reasons, cp Tac. *Ann.* 1 80). Pilate's suspension and dismissal to Rome just before the death of Tiberius (Tac. *Ann.* 6 32) proves only the greatness of the pressure brought to bear upon the newly-appointed legate of Syria, or at most the desire on the part of the central government to go still farther on a path of conciliation, signs of which tendency had not been wanting even before this event. For Pilate had already been compelled by imperial mandate to remove to Cæsarea certain votive shields, without figures, gilded only and inscribed with the emperor's name, which he had hung up in the palace at Jerusalem, 'less for the honour of Tiberius than for the annoyance of the Jews,' as the letter of Agrippa I. unfairly puts it (Philo, *Leg. ad Caium*, 38). This was probably after the death of Seianus (31 A.D.) if it be true that Seianus was an arch-enemy of the Jews (cp Schürer, *GVI* 1 411; ET i. 286 note). Here a correct interpretation will see, not 'a piece of purely wanton bravado on the part of Pilate,' but a small concession on the part of his imperial master overriding and correcting the attitude of a subordinate, in deference to a petition supported by powerful names. This new departure was entered upon very energetically by Vitellius (for the details, see Jos. *Ant.* xviii. 4 3), and had its natural sequel in the favour shown by Caligula to Agrippa I. and the great advancement of Agrippa by Claudius (see HEROD, FAMILY OF, § 12).

Pilate has won notoriety through his connection with the trial and sentence of Jesus (Mt. 27 2 *f.* Mk. 15 1 *f.*; more fully in Lk. 23 1 *f.* Jn. 18 28 *f.* adds much to the Synoptic accounts). See, further, ROMAN EMPIRE.

Of Pilate's end nothing is known. Before he reached Rome Tiberius was dead (Jos. *Ant.* xviii. 4 2). Various

5. Legends. traditions were current. Eusebius (*Chron.* and *HE* 2 7) asserts, on the authority of unnamed Greek or Roman chroniclers, that he fell into such misfortunes under Caligula that he committed suicide. In the apocryphal *Mors Pilati*, his suicide follows upon his condemnation to death by Tiberius for his failure to save Jesus. His body was cast into the Tiber; but evil spirits disturbed the water so much that it was carried to Vienna (*Vienne*) and cast into the Rhone, and after various vicissitudes, ended in the recesses of a lake on Mt. Pilatus, opposite Lucerne (for this legend and its origin, see Müller, *Pont. Pil.* 82 *f.*; Ruskin, *Mod. Paint.* 5 128). In the apocryphal Παράδοσις Πιλάτου it is related that Tiberius called Pilate to account for the crucifixion of Jesus and condemned him to death; and both he and his wife died penitent, and were assured of forgiveness by a voice from heaven (see Tisch. *Evang. Apocr.* 449 *f.*). According to other accounts, Pilate's execution occurred under Nero (so Malalas, ed. Dind. 250 *f.*; and authorities quoted by Schürer, *op. cit.* 88 n.). The tendency of the tradition to represent both Pilate and his wife as embracing Christianity is easily understood, and is in contrast with the unsympathetic estimate of later times (cp Tertull. *Ap.* 21, *jam pro sua conscientia Christianus*, 'already in conviction a Christian,' at or immediately after Jesus' death; *Gosp. of Nic.* 2; Orig. *Hom. on Mt.* 35; Stanley, *East. Ch.* 13). Tradition gives the name of Pilate's wife as Claudia Procula or Procla, and by some she has been identified with the Claudia mentioned in 2 Tim. 4 21.

6. Literature. G. A. Müller, *Pontius Pilatus der fünfte Procurator von Judæa*, etc., 1888; with full list to date of the literature on Pilate. Arnold, *Die neronische Christenverfolgung*, 116 *f.* Articles in *Expos.* ser. 2. vol. 8 (1884), 107 *f.* (Cox), and ser. 6, vol. 1 (1900), 59 *f.* (Macgregor). Taylor Innes, *Trial of Jesus Christ, a legal Monograph*, 1899. The many *Lives of Christ* may also be consulted, but with little profit as regards obtaining a correct view of Pilate himself. For the so-called *Acts of Pilate* (*Gospel of Nicodemus*) consult J. C. Thilo, *Codex apocr. NT* i., 1832, 118 *f.* 487 *f.*; R. A. Lipsius, *Die Pilatus-Akten*, 1871.

W. J. W.

PILDASH (פִּלְדָּשׁ), b. NAHOR (Gen. 22 22: φαλλαc [AD'? L], -λ [D*]). The name, however, looks doubtful, and may have been partly assimilated to the name ידלף which follows (Che.).[1]

[1] Dillmann (*ad loc.*) cites a Nab. name פלרשו; but the reading is more than doubtful.

PILEHA, RV **Pilha** (פִּלְחָה; cp Palm. פלחא), signatory to the covenant (see EZRA i., § 7), Neh. 10 24 [25] (φαδαεις [B], -εω [א], φαλαει [A], φαλλ. [L]).

PILLAR. 1. (עַמּוּד, עַמֻּד, *'ammûd* [√עמד, to stand]; στυλος; thrice κιων; once στασις). See Judg. 16 25 *ff.* 1 K. 7 2 6 21 (Jachin and Boaz) Job 9 6 (pillars of earth), 26 11 (pillars of heaven) Ps. 75 3 [4] etc. Judg. 16 25 *ff.* gives the story of Samson's last feat of strength. The Philistines, both men and women, were making merry (at Gaza) at a sacrifice to Dagon, and Samson was sent for to make sport before them, and was stationed between the two middle pillars on which the house[1] rested. But it was deadly sport that he made, for he took hold of the pillars, 'bracing himself against them' (Moore's rendering), and the house fell upon the lords and upon all the people. Perhaps these two pillars are analogous to the pillars called Jachin and Boaz in the temple at Jerusalem (see JACHIN AND BOAZ), which appear to have been symbols of the vast 'mountain of God' (or, of the divine beings). See CONGREGATION [MOUNT OF THE]. To pull down these pillars, which represented the most immovable thing in the material world (there is a moral world too which has its 'pillars,' Ps. 75 3 [4]), was a proof of supernatural strength, which justifies us in supposing a (perfectly harmless) mythical element in the Samson story, to some extent analogous to the mythical element in the Babylonian story of Gilgameš. For only of a divine being can it be said, 'who shakes the earth out of its place, so that the pillars thereof (here the mountains) tremble' (Job 9 6). Cp SAMSON.

For pillars of the tabernacle and temple, see TABERNACLE, TEMPLE. By the חֲשׁוּקִים, *ḥăšûḳîm* (EV 'fillets') of the tabernacle Gesenius (*Thes.*) and others understand connecting rods joining the tops of the pillars, from which curtains were hung. Dillmann, Holzinger, and others (see BDB) prefer the meaning 'fillet' or 'ring' (clasping or 'binding' the pillars); to these rings the nails bearing the curtains were fastened.

A pillar is the emblem of firmness and steadfastness (Jer. 1 18 Rev. 3 12), and of that which sustains or supports (Gal. 2 9 1 Tim. 3 15).

In 1 K. 7 18 RV reads עַמֻּדִים for רמנים; the clause, however, should be transferred to *v.* 17 (The., Sta., Klo., Ki.). הָעַמּוּדִים at the beginning of *v.* 18 should be הָרִמֹּנִים (cp 𝔊). Cp POMEGRANATES.

2. מָצוּק, *māṣûḳ*, 1 S. 2 8 (𝔊 otherwise; of the 'pillars' of the earth). The only other occurrence of the word is in 1 S. 14 5, 'the one crag *rose up*' (RV for מצוק), on which see MICHMASH, § 2, *ad fin.*

3. מַצֵּבָה, *maṣṣēbāh*. See MASSEBAH.

4. נְצִיב, *nĕṣîb* (στήλη), Gen. 19 26 (pillar of salt). On 1 S. 10 5 13 3 *f.*, see SAUL, § 2, note; cp EZION-GEBER.

5. מֻצָּב, *muṣṣāb*, Judg. 9 6 (στάσις), see GARRISON; cp Is. 29 3, AV 'mount,' RV 'fort.'

6. אֹמְנוֹת, *ŏmenōth*, 2 K. 18 16† = doorposts; ἐστηριγμένα.

7. מִסְעָד, *mis'ād* (√סעד, to support), 1 K. 10 12†; EVmg. rails, props; BDB 'precise meaning unintelligible,' ὑποστηρίγματα.

8 and 9. תִּימָרָה,* 'pillars of smoke,' Cant. 3 6 (στέλεχος), Joel 3 3 [2 30], Acts 2 19, 'vapour (ἀτμίς) of smoke,' and תֹּמֶר, Jer. 10 5, RVmg. See SCARECROW. T. K. C.

PILLAR, PLAIN OF THE (אֵלוֹן מֻצָּב), Judg. 9 6 AV, RV OAK OF THE PILLAR. See TEREBINTH, § 3 (4), and MASSEBAH, § 1.

PILLAR OF CLOUD AND FIRE. In the stories of the Exodus and the subsequent wanderings in the wilderness, cloud as indicative of the divine presence is frequently referred to. The pillar-like form of the appearance is alluded to only in the two earliest Hexateuchal strata (J, E); but the references to 'the cloud' in the later narratives (D, P) as well as in some narratives outside the Hexateuch are so closely related that they must be discussed together.

In immediate connection with the Exodus, J relates that Yahwè led the people by going before them in a pillar of cloud (עַמּוּד עָנָן) by day, and a pillar of fire (עַמּוּד אֵשׁ) by night; and that this mode of guidance was continuous (note the participle הֹלֵךְ, Ex. 13 21), and perpetual (Ex. 13 22)—*i.e.*, presumably, till the end of their journeyings. One exception to the continuity is related. When the Hebrews, on becoming aware that the Egyptians were in pursuit, were seized with fear, the pillar of cloud removed to the rear and prevented the approach of the Egyptians (Ex. 14 19*b* 20*b*). In the morning watch of the same night Yahwè looked out on the Egyptians and confounded them (Ex. 14 24), the narrative perhaps implying that the confusion was occasioned by terrifying phenomena connected with the cloud (cp Di. *ad loc.*; Ew. *Hist.* 2 74). The only other reference in J to cloud as indicative of the divine presence is to a different phenomenon: when Moses ascended Mt. Sinai Yahwè descended in the cloud and stood with him (Ex. 34 5). In this case, the purpose of the cloud was no doubt to conceal the form and dangerous brightness of Yahwè.

1. The conception in J.[1]

In E the appearance of the pillar of cloud is regarded as intermittent: moreover it serves a different purpose and appears in a different place from that indicated by J; nor is any fiery appearance of it ever alluded to. It came down from time to time and stood at the door of the 'tent of meeting,' which was pitched *without* the camp. When Moses went thither to consult Yahwè and Yahwè spoke with Moses, as often as the people observed it they rose up and worshipped at their tent doors, Ex. 33 7-11 (the tenses are throughout frequentative). For special instances of the appearance of this pillar of cloud, see Nu. 12 5 Dt. 31 15; and of 'the cloud' Nu. 11 25; note also the reference to the departure of the cloud in Nu. 12 10.

2. In E.

There is therefore no real point of contact between the representations in J and E beyond the fact that both record a pillar-like appearance of cloud as indicating the divine presence. The theophanic character of the pillar of cloud is particularly marked in E in Ex. 33 9, where it speaks with Moses; cp the identification of the angel of Yahwè and Yahwè (see THEOPHANY).

There are, however, other references to cloud in E. As in J, so in E, cloud accompanies the theophany on Sinai, Ex. 19 9 16.

Dt. 1 33 is dependent on J, though the term pillar is not used. The only other references in Dt. are to the clouds on Sinai, 4 11 5 19 [22].

3. References in D.

As in the earlier narratives, so in P, cloud covers Mt. Sinai at the giving of the law (Ex. 24 16-18); it forms the accompaniment of the fiery appearance of the glory of Yahwè (*v.* 17), and the envelope of the divine being (*v.* 16). This forms the starting point of P's narrative of the cloud which indicates the divine presence: subsequently it is frequently, as in this first instance, associated with the glory of Yahwè. It first appears in the camp on the day of the completion of the tabernacle; it then covered, while the glory of Yahwè filled, the building, preventing Moses from entering (Ex. 40 34 *f.* Nu. 9 15). For other instances of the association of the cloud and the glory of Yahwè, see Ex. 16 10,[2] which belongs to a narrative that must originally have *followed* the record of the completion of the tabernacle in Ex. 40 (Di., We., Bacon, etc.), and Nu. 16 42 [17 7], and in 𝔊, 14 10. The presence of the cloud, which became fiery at night, was permanent from the day of the completion

4. In P.

[1] For conjectures respecting this 'house,' see Moore on *v.* 27, and cp VESTRY.

[1] The account of the different conceptions given in the text rests on a critical analysis which has commanded very general acceptance. The only disagreement of importance is Kuenen's reference (*Hex.* 151) of the *whole* of *vv.* 19-22 of Ex. 14 to E. We have followed Dillmann in regarding the phrase ועננך עמד עליהם in Nu. 14 14, and the present form of Nu. 10 34 as due to R.

[2] Where restore הַמִּשְׁכָּן, 'the tabernacle,' for the senseless redactorial הַמִּדְבָּר, 'wilderness.'

of the tabernacle till the journeys of the Israelites were over, Ex. 40 38 Nu. 9 16; with this Nu. 16 42 [17 7] might appear to conflict, but cp Di. (*ad loc.*), who distinguishes between the permanent abiding of the cloud *over* the tabernacle and the intermittent complete envelopment of the tabernacle by the cloud indicated by the word 'cover.' This explanation fails to take account of Nu. 9 16, or the equivalence of Ex. 40 34 *f.* In any case the permanence of the cloud is quite unambiguously asserted in Ex. 40 38 Nu. 9 16.

Thus P differs from E in making the phenomenon permanent and connecting it with the *centre* of the camp, where according to P the tabernacle was placed; and from both E and J with regard to the form of the phenomenon. Not only does P never use the term 'pillar'; he speaks of the cloud in ways which do not suggest, and perhaps exclude, such a form: thus the cloud 'covers' (כסה) or 'abides over' (שכן על), or 'goes up from resting over' (נעלה מעל) the tabernacle; contrast with these expressions those of E with whom the pillar of cloud stands (עמד) at the door. With J, P agrees in making the phenomenon permanent and a means of guidance on the march; he differs, however, as to the place of appearance, the time of its first appearance (in J it appears directly after leaving Egypt, but in P not till after Sinai has been reached), and the manner in which it directed the march—in P it simply indicates by rising or falling that the march is to begin or cease (Nu. 9 15-23 10 11 *f.*), in J it actually precedes and leads the host.

The appearance of Yahwè over the mercy-seat also is in cloud (Lev. 16 2). Whether this cloud is rightly identified by Dillmann with the cloud perpetually resting over the tabernacle may be questioned, though he is probably right in rejecting the suggestion that the cloud intended by the writer is the cloud of incense (cp Lev. 16 13).

Such are the various accounts of the cloud in connection with the wanderings. It must suffice to allude, without discussion, to (1) similar accounts of the later history—viz., those of the cloud that filled Solomon's temple when the ark was brought in (1 K. 8 11 = 2 Ch. 5 14, cp Ezek. 10 3), and of the great cloud of fiery appearance that enveloped the chariot of Ezekiel's vision (Ezek. 1 4); (2) allusions in biblical literature to the cloud of the wanderings (Is. 4 5 Ps. 78 14 105 39 Wisd. 10 17 1 Cor. 10 1 *f.*); (3) the part played by the cloud in the transfiguration (Mt. 17 5 Mk. 9 7 Lk. 9 34), the ascension (Acts 1 9), and pictures of the Parousia (Mt. 24 30 26 64 Mk. 13 26 14 62 [all modified citations from Dan. 7 13] 1 Thess. 4 17).

5. Origin of conception.

It has been very generally held that the idea of a pillar of cloud preceding the people in the wilderness had its origin in the custom of carrying braziers containing burning wood at the head of an army or a caravan, the smoke by day, the fire by night serving to indicate to all the line of march.

Such a custom is vouched for by ancient authorities and modern travellers; Curtius (v. 2 7) relates it of Alexander's march through Babylonia and (iii. 3 9) of the Persians generally; Harmer of Arabian caravans, and Pococke of a night-journey made by himself from the Jordan to Jerusalem (Pitts in Harmer, *Observations* (4), 2 278). The accounts given by Clement of Alexandria (*Strom.* i. 24) of a fiery pillar guiding Thrasybulus by night, and by Diodorus Siculus (16 66) of Timoleon being guided to Italy in a somewhat similar manner, may be cited as legendary parallels to the biblical story.[1]

The form which the story has assumed in the narratives as we now possess them evidently owes much to the more general ideas concerning theophanies (see THEOPHANY), and in particular to the idea that, even when God manifested his presence by a physical appearance, some screening of the effulgence of his brightness was requisite. In brief, the cloud was the physical sign of Yahwè's presence, and its movement in guidance of the host, the indication that Israel's way through the wilderness was of Yahwè's ordering. In P's conception of the cloud that abode over or covered the tabernacle, the smoke rising from the altar *may* have been the physical basis, for the Heb. *'ānān* denotes a cloud of smoke (*e.g.*, Ezek. 8 11) as well as atmospheric cloud; but here again the writer of course intends much more; it is the visible sign of Yahwè's presence in the camp and, at the same time, the covering of the brightness of his glory. G. B. G.

[1] For further references to earlier literature on these points, see Rosenmüller, Kautzsch, or Di. on Ex. 13 21. [Cp also Frazer, *Golden Bough* (2), 1 305.]

PILLOW (כְּבִיר [constr.], 1 S. 19 13 16; כְּסָתוֹת [plur.], Ezek. 13 18 20). See BED, § 4.

PILOT (חֹבֵל), Ezek. 27 8 27 29; also Jon. 1 6, where EV 'shipmaster.' See SHIP.

PILTAI (פִּלְטָי; cp PALTIEL), head of the priestly b'ne MAADIAH (*q.v.*), Neh. 12 17 (om. BN*A, φελητει [Nc.a mg.], αφεληθι [L]).

PIN (יָתֵד), Ex. 35 18; also 'tent-pin,' 'stake.' See TENT, § 3.

PINE occurs in AV as the rendering of two words.

1. *'ēṣ šémen*, עֵץ שֶׁמֶן, the oleaster, in Neh. 8 15 AV 'pine,' but 'oil tree' in Is. 41 19. See OIL TREE.

2. *tidhār*, תִּדְהָר (Is. 41 19 60 13†, RVmg. in 41 19 'plane,' Tg. מְרָנִין), is the name of some large tree growing on Lebanon. The word has been very variously interpreted. Celsius (2 271 *ff.*) finds the uncertainty too great to allow of his offering an opinion. Lagarde (*Uebers.* 130), however, has thrown fresh light upon the matter by comparing and indeed identifying תדהר with Syr. *daddār*, *deddār* (see Payne Smith, *Thes.*), which denotes occasionally the oak, but usually the elm (Löw, 98 *ff.*). The πτελέα of Sym. and *ulmus* of Vg. in Is. 41 19 would thus be justified as against the πεύκη of 𝔊 (60 13; where Sym. has πύξος with πεύκη for תאשור). The only difficulty is that the common elm—*Ulmus campestris*, L.—though found in northern Palestine, is uncommon (*FFP*, 411). N. M.

PINNACLE. 1. שֶׁמֶשׁ, *šémeš*, Is. 54 12, RV. See BATTLEMENT.

2. πτερύγιον, Mt. 4 5, RVmg. 'Wing.' See TEMPLE.

PINON (פִּינֹן), a 'duke' of Edom (Gen. 36 41; φινεc [A], φ[ε]ινων [DEL]; 1 Ch. 1 52, φ[ε]ινων [BA], φινα [L]). Eusebius and Jerome (*OS* 299 85; 123 9) speak of a little village called Fenon (φαινων or φινων) in the Idumæan desert between Petra and Zoar, where mining was carried on by convicts; cp the ruins called Kal'at Phenan (Lagrange, '*Phonnon*,' *Revue biblique*, 7 [1898] 112 *ff.*).

The φεννήσια μέταλλα, 'metalla ad Phœnum,' are referred to by classical authors among the places to which Christian confessors were often condemned.

This Pinon is doubtless the PUNON (פּוּנֹן) of Nu. 33 42 *f.* (פינן [Sam.], φ[ε]ινω [BAL], φινων [F]), a station of the Israelites in their wanderings.

PIPE. 1. חָלִיל, *ḥālīl* √חלל, bore, pierce; αὐλός; *tibia*: 1 S. 10 5 1 K. 1 40 (𝔊BA χοροῖς; so χορῷ in the two Psalm passages; cp also א in Is. 5 12) [Ps. 149 3 150 4, read חליל for מחול, with Che.]; Is. 5 12 30 29 Jer. 48 36 1 Esd. 5 2 Ecclus. 40 21 1 Macc. 3 45 1 Cor. 14 7; cp Mt. 9 23 Rev. 18 22 αὐλητής.† See MUSIC, § 4 *a*.

2. עוּגָב, *'ūgāb*, Vg. *organum*; AV 'organ'; Gen. 4 21 (κιθάρα); Job 21 12 30 31 (ψαλμός), Ps. 150 4 (ὄργανον). See MUSIC, § 4 *b*. In Ps. 150 4, for בְּמִנִּים וְעוּגָב Cheyne (*Ps.* (2)) reads בְּנְעִימַת עגב, 'with the sweet sounds of the flute'; cp Ecclus. 45 9 (Heb.). מִנִּים, 'strings' cannot be defended by Ecclus. 39 15 (Heb.), where כלי מיני is a corruption of כנורות, 𝔊 ἐν κινύραις (Hal.); nor by Ps. 45 9*b*, where we should perhaps read מָנֵי כַרְכְּמִישׁ לָךְ, 'minas of Carchemish (they will bring) unto thee' (Che. *Ps.* (2)); cp MANEH.

3. נֶקֶב, *nékeb*, Ezek. 28 13† ἀποθήκη? *foramen?* Most, as BDB, explain as a 'term techn. of jewellers' work, probably some hole or cavity'; it is best at present, to abstain from a translation, the text being corrupt (see CHERUB, § 2).

PIRA (πειραc [B]), 1 Esd. 5 19, AV = Ezra 2 25, CHEPHIRAH.

PIRAM (פִּרְאָם, *i.e.*, perhaps, stripping off the gentilic ending, פֶּרֶא, 'wild ass'; but cp Ass. *purimu*

'wild ass,' and *pir'u*, 'a sprout, scion,' also used as a prop. noun [see below]), the king of JARMUTH (*q.v.*) defeated by Joshua (Josh. 10 3; φειλων [B], φεραλμ [A], φελαμ [L]). In the time of Sargon the king of the N. Arabian land of Muṣri was called Pir'u (see MIZRAIM); but this gives no support to the view that the Jarmuth of Josh. 10 3 was in the coast-lying region to the S. of Palestine, where it is possible (but not certain) that the Yarimuta of Am. Tab. was situated.

For Max Müller's bold suggestion that the original reading in Josh. 10 3 was 'Pharaoh of Jarimuta,' and that 'king' was inserted after the name had become unintelligible, see *MVG*, 1897, 327 *ff.*

PIRATHON (פִּרְעָתוֹן; φαραθωμ [B], φρααθων [AL], φαραθω [Jos.]), originally no doubt a clan-name (= Pir'ath), but in Judg. 12 15, and virtually in 1 Macc. 9 50, a place-name.

1. ABDON (*q.v.*), the **Pirathonite** (פִּרְעָתוֹנִי; Judg. 12 13 15 *ὁ φαραθωνείτης* [B], *ὁ φραθωνίτης* [A], *ὁ ἐφρα-αθωνίτης* [L]), was buried 'in Pirathon in the land of Ephraim, in the hill-country of the Amalekites' (RV). Most scholars identify this Pirathon with the mod. *Fer'atā*, 6 m. WSW. of Nāblus (but see OPHRAH, 3). It is to be observed, however, (1) that in 1 Ch. 8 23 8 30 (= 9 36) Abdon appears as a Benjamite family name. Benaiah, one of David's thirty, was also a **Pirathonite** (פִּרְעָתֹנִי; 2 S. 23 30, ? *του εφραθαιου* [BA; om. L]; 1 Ch. 11 31, *φαραθων[ε]ι* [BAL], *φαραθωθει* [א*], *φαραφωνει* [א c.a]; 1 Ch. 27 14, *ὁ ἐκ φαραθων τῶν υἱῶν εφρ.* [BAL]); surely he was more probably a Benjamite than an Ephraimite. That Abdon was really an Ephraimite, now becomes doubtful. (2) Another important point is that the situation of Pirathon is described twice over, and that the second description is extremely difficult to reconcile with the first.[1] The text therefore must be suspected. אפרים may be a corruption of ירחמאל (as in 1 S. 1 1 9 4, etc.). Saul's hill-country (see SAUL, § 1) appears to have been known as Jerahmeelite; in this region Pirathon may have been situated. Probably we should read in Judg. 12 15, 'in Pirathon in the hill-country of Jerahmeel,' הר and ארץ being variants, and עמלקי, like אפרים, a corruption of ירחמאל. Judg. 12 15 is thus reconciled with 1 Ch. 8 23 30. Were it not for the passage in 1 Ch. we might place Pirathon in Judah, where there seems to have been a clan-name פרעה or פרעת (Par'ah or Par'ath); see PAROSH, BITHIAH.

2. We also meet with PHARATHON (AV PHARATHONI), *i.e.*, Pir'athon, in 1 Macc. 9 50; it was one of the 'strong cities in Judæa' fortified by Bacchides. Perhaps, as G. A. Smith suggests (*HG* 355), it stood at the head of the Wādy Fāri'a, an important strategical position.

In 1 Macc. 9 30 𝔊ᴬᴺⱽ gives *καὶ τὴν θαμναθα φαραθων*. Probably *καί* has dropped out before *φαρ.*; it is supplied, with correct insight, by Jos., Syr., and Vet. Lat. (The absence of *τήν* is of course unimportant; cp Jos. *Ant.* xiii. 1 3. So Schü., *GJV* 1 170). T. K. C.

PISGAH (הַפִּסְגָּה; φαсгα). In Dt. 34 1 as the text stands, the 'top of the Pisgah' (κορυφην φαсгα [BAFL]) is identified with MOUNT NEBO (*q.v.*). Elsewhere (in D) 'the Pisgah' appears as the mountain from which Moses surveyed the promised land, Dt. 3 27 (*λελαξευμενου* [B], *του λ.* [AFL]), and was perhaps so regarded by JE (*κορυφην φ.* [BAFL]), who certainly name it as a station in Nu. 21 20 (*του λελαξευμενου* [BAFL]) and, as a place where Balak sacrificed (cp ZOPHIM, BAMOTH-BAAL) in 23 14 (*λελαξευμενου* [*ibid.*]). Elsewhere in D it is a boundary mark; we hear of 'the slopes of Pisgah' Dt. 3 17 (*ασηδωθ την φ.* [BAL], *α. τ. φαραγγα* [F]), 4 49 (*ασηδωθ την λαξευτην* [BAFL]), Josh. 12 3 (*μηδωθ φ.* [B], *ασηδωθ φ.* [AF], *μεσιδωθ φ.* [L]); cp also Josh. 13 20 (P: *ασηδωθ φ.* [BA], *ασιδωθ φ.* [L]).

φασγω, *Fasga*, was still used for the region of Mount Nebo in the time of Eusebius (*OS* 216 69 89 10 13). The name has disappeared; for the combination of it with *Rās el-Feshkha* on the NW. coast of the Dead Sea (Buhl) is surely very doubtful. (For a suggestion of new critical problems connected with the names of Nebo and Pisgah, see NEBO.) F. B.

PISGAH, SLOPES OF (אַשְׁדּוֹת הַפִּסְגָּה), Dt. 3 17, etc. RV, AV ASHDOTH-PISGAH (*q.v.*).

PISHON, AV **Pison** (פִּישׁוֹן; φ[ε]ιсων, *PHISON*), one of the four arms of the river of Paradise, Gen. 2 11; coupled with Tigris, Ecclus. 24 25†. Eusebius (*OS* 298 59) copies Josephus, who says (*Ant.* i. 1 3) that *φεισων* means multitude, and identifies it with the river called by the Greeks Ganges. The current explanations of the name are:—(1) from the Ass. *pisan(n)u*, (*a*) a repository of clay, (*b*) a conduit of clay or wood (Del. *Ass. HWB* 532 *f.*, but with ?). Cp Del. *Par.* 77. To this Nestle (*Marg.* 5) objects that we should in this case have expected the form פִּישָׁן, cp נִיסָן סִינָן; (2) from √פּוּשׁ, 'to spring up' (𝔊 *σκιρτάω*), of calves, as Jer. 50 11 Mal. 3 20 [4 2], or of horses, as Hab. 1 8, and (cp Syr. *paš*) 'to spread oneself,' as Nah. 3 18. Nestle (*l.c.*) renounces Nah. 3 18 and Hab. 1 8 as probably corrupt, but thinks Jer. 50 11 Mal. 3 20 safe. In both passages, however, the text probably needs a slight alteration, so that we should read תִּמְפְּשׁוּ, מְפַשְׁתֶּם, from מפשׁ, 'to be fat' (so too Grä. in Mal.). The presumption therefore is that 'Pishon' is corrupt. For a probable key to its meaning, see PARADISE.

T. K. C.

PISIDIA (η πιсιδια [WH], Acts 14 24; Acts 13 14, αντιοχειαν την πιсιδιαν [Ti. WH after אABC], της πιсιδιας [TR]; on the ethnic in Acts 13 14 see end of art.), the broad mountain-region of the western Taurus, intervening between the plateau of Phrygia and the coast-plain of Pamphylia, and extending for about 100 m. between Lycia and Isauria (Cilicia Tracheia). It is one of the wildest and most picturesque regions of Asia Minor, the birth-place of the three Pamphylian rivers (the Cestrus, Eurymedon, and Melas), and the country of the beautiful lakes *Egirdir Göl* (ancient Limnai), *Bey-Shehr G.* (anc. Caralis), *Buldur G.* (anc. Ascania), and others of less size. (See Murray's *Handbook to AM*, 150 *ff.*)

1. Geography.

2. History.

The Pisidian highlanders occupied the ridges of the Taurus, and its offshoots on the N. and S. (Strabo, 570: *οἱ μὲν εἰσι τελέως ὀρεινοί, οἱ δὲ καὶ μέχρι τῶν ὑπωρειῶν καθήκοντες ἐφ' ἑκάτερα*). They were ruled by hereditary chieftains, and, like the western Cilicians, were born brigands, continually descending upon the lowlands and defying subjugation (Strabo, 571: *ὑπὲρ δὲ τῆς κάτω τῆς τε ἐν τῇ Παμφυλίᾳ καὶ τῆς ἐντὸς τοῦ Ταύρου διεμάχοντο πρὸς τοὺς βασιλέας ἀεί*). Their conquest was taken in hand by the Galatian Amyntas, who reduced many of their fastnesses (Strabo, 569), but finally lost his life in operations against the Homonades lying on the skirts of Lycaonia (25 B.C.). The Romans were thus compelled to undertake the work of pacification themselves.

To this end Augustus, in 6 B.C., established a series of Roman Colonies or garrison towns on the flanks of Pisidia. In western Pisidia he founded Olbasa, Comama, and Cremna, all connected by a military road with the Pisidian Antioch. From Antioch another military road ran south-eastwards to Parlais and Lystra, the Colonies which held in check eastern Pisidia and Isauria (see Ramsay, *Hist. Geog. of AM*, 398).

The policy of the Imperial government was to protect the existing Hellenic civilisation of Asia Minor, without attempting to force Roman civilisation upon the people in its place. The mountaineers of Pisidia, however, were practically untouched by Hellenic influences, and the attempt directly to Romanise this region was imperatively demanded in the interests of peace. Inscriptions show that the rural population, here as in Phrygia, spoke little or no Greek (cp Ramsay 'Inscr. en Langue

[1] Cp AMALEK, and Moore, *Judges*, 311.

Pisidienne,' in *Rev. des Univ. du Midi*, 1895, p. 353 *f.*; cp id. *Hist. Comm. on Gal.* 150).[1]

Politically the whole country formed part of the Roman Province of Galatia, until 74 A.D., when great part of it was joined to the new double province Lycia-Pamphylia. After this date the name Pisidia gradually drifted northwards until it included most of southern Phrygia.

3. Paul's visits. On his first journey Paul passed through Pisidia, apparently without stopping on the way, to Antioch (Acts 13 14). On the return, Paul and Barnabas 'passed throughout Pisidia' (Acts 14 24 AV, *διελθόντες τὴν Πισιδίαν*; RV 'passed through'), which seems to imply preaching (see Ramsay in *Exp.* May, 1895, p. 385); but apparently little success attended the effort.[2]

Nevertheless, there seems to remain a trace of Paul's presence in Pisidia, in the name *Kara Bavlo* given to the imposing ruins of the town Adada (Ἄδαδα), the only important city on the direct road from the Pamphylian coast to Antioch. *Bavlo* is simply Παῦλο: the modern town, also called *Bavlo*, lies 5 or 6 m. to the S. of the ancient site. A fine church of early date stands in ruins about 1 m. S. of the remains of Adada. (See Ramsay, *Church in the Rom. Emp.*(5) 20 *f.*)

In passing through this region, Paul may have experienced those 'perils of waters,' and 'perils of robbers,' of which we hear in 2 Cor. 11 26 (*κινδύνοις ποταμῶν, κινδύνοις λῃστῶν*). The 'perils of waters' are very real in this country of mountain torrents (cp the implication in Strabo's remark, p. 571, *γέφυραι δ' ἐπίκεινται ταῖς ὁδοῖς*. See also the dedication in *Bull. de Corr. Hell.* 3 479). The danger from robbers is illustrated by the inscriptions referring to the corps guarding estates (*ὀροφύλακες, παραφυλακῖται*: Ramsay, *Hist. Geogr. of AM*, 174); and by the epitaph on a tomb near Hadrianopolis dedicated by his parents to *Σούσου υἱῷ ὀροφύλακι ἰσφαγέντι ὑπὸ λῃστῶν* (Sterrett, *Epigraphic Journey in AM*, no. 156; cp Ramsay, *op. cit.* 178). An inscription found on the borders of Pisidia proves that in later times there was a distinct corps charged with the maintenance of order in the mountains (Ramsay, *Cities and Bish. of Phryg.* 1 328, no. 133: *Αὐρ. Εἰρηναῖος εἰστρατιώτης ἐστρατεύσετο ἐνδόξως, πολλοὺς ὤλεσε λιστὰς διὰ χιρῶν κ.τ.λ.*).

In Acts 13 14 occurs the ethnic Πισιδία, 'Pisidian,' applied to Antioch, the proper style of which was Ἀντιόχεια ἡ πρὸς Πισιδίᾳ. The adjective was used by a natural development in order to distinguish the town from others of the same name. It was not until a much later period that it could be correctly described as τῆς Πισιδίας 'in Pisidia' as translated in AV (see ANTIOCH, 1, col. 184, and col. 1597, n. 2).

In Mk. 14 3, *νάρδου πιστικῆς* (cp Jn. 12 3), Jannaris conjectures Πισιδικῆς, and refers to Strabo 570 *f.* (the ointments of Selge).

W. J. W.

PISPAH (פִּסְפָּה), b. Jether, in a genealogy of ASHER (*q.v.*, § 4, ii.), 1 Ch. 7 38 (φαcφαι [B], -φα [AL]).

PISTACHIO NUTS (בָּטְנִים), Gen. 43 11 RVmg., EV NUTS (*q.v.*).

PIT. The words to be noticed are:

1. בּוֹר, *bōr*. For its uses see CONDUITS, § 1, 1, and cp PRISON. The phrase 'those that have gone down to the pit' (Is. 38 18 Ps. 28 1 cp 30 4 [3], 88 4 [5]) sounds strangely. 'Pits' were not commonly used for burial; Jer. 41 9 is of course no proof that they were. בּוֹר 'pit' or 'cistern' and בְּאֵר 'well' are used metaphorically for Shĕōl, which was regarded as spacious below but narrow at the top (cp Ps. 69 16 [15]). See Gunkel, *Schöpf.* 132, n. 8, and cp 2.

2. בְּאֵר, *bĕ'ēr*. See SPRINGS. Note that בְּאֵר, like בּוֹר, sometimes = Shĕōl (Ps. 55 24 [23], 69 16 [15]). In the latter passage 'the mouth of the בְּאֵר' is spoken of.

3. שַׁחַת, *šáḥath*, שוחה *šūḥāh* and שִׁיחָה *šīḥāh* (√שׁוּחַ, to sink down, to be sunk into mire), literally a pit made to serve as a snare for animals or for men by being deceptively covered over with branches or with slight matting. Hence used figuratively (cp Eccles. 9 12), Ps. 16 10 30 10 [9] 49 9 [10] 55 24 [23] Job 17 14 33 24 28. In some of these passages EV, following 𝔊 (which in Ps. 9 16 16 10 30 10 has *διαφθορά*, but in Ps. 7 16 94 13 15 Prov. 26 27, *βόθρος*, and in Job 14 7 33 18, etc., *θάνατος*), gives 'corruption'; but the supposed derivation from √שחת 'to destroy, corrupt' is unnecessary and improbable.

4. גֶּבֶא, *gébhe'* (√גבא, to gather together), rendered 'pit' in AV Is. 30 14. See CONDUITS, § 1, 2.

5. שְׁאֹל, *šᵉ'ōl*. See SHEOL.

6. גּוּמָּץ, *gūmmāṣ*, *βόθρος*, Eccles. 10 8.

7. פַּחַת, *páḥath* (2 S. 17 9 18 17). Used figuratively in Is. 24 17 *f.*, Jer. 48 43 *f.*, Lam. 3 47. Cp SNARE. On Jer. 48 28 see DOVE, § 4, iv.

8. The Gr. *βόθυνος* (Mt. 15 14, etc.) = *βόθρος* (no. 3 above), signifies any hole or hollow.

9. *φρέαρ* (Lk. 14 5 Jn. 4 11) corresponds rather to no. 2 above, an artificial excavation; for *τὸ φρέαρ τῆς ἀβύσσου* (Rev. 9 1 *f.*) see ABYSS.

10. For *ὑπολήνιον* (Mk. 12 1 RV) see WINEPRESS.

PITCH. 1. זֶפֶת, *zépheth*, Ar. *zift*, perhaps a loan word from Aram. *ziphtā* (Fränkel); Ex. 2 3 (בחמר ובזפת, αcφαλτοπιccα, *bitumine ac pice*), Is. 34 9 (πιccα, *pix*); Ecclus. 13 1 (Heb. נוגע בזפת תדבק ידו, 'Whoso touches pitch, it cleaves to his hand' [so Syr.]; 𝔊, ο απτομενοc πιccηc μολυνθηcεται); also Bel 27 Dan. 3 46 𝔊 [Song of Three Children, 23]. A wide term including both vegetable and mineral pitch (see Is. 34 9, which Sir W. J. Dawson regards as a description of a bitumen eruption, *Exp.*, 1886 *b*, p. 76). On Ex. 2 3 cp BITUMEN.

2. כֹּפֶר, *kṓpher*, *ἄσφαλτος*, *bitumen*, Gen. 6 14†. See BITUMEN.

PITCHER. 1. כַּד, *kad*, *ὑδρία*, Gen. 24 14. See CRUSE, 1.

2. נֵבֶל, *nébhel*, Lam. 4 2. See BOTTLE.

3. *κεράμιον* Mk. 14 13 Lk. 22 10. See POTTERY, cp BOTTLE.

PITHOM (פִּתֹם; πειθω [B], πιθωμ [A], πιθωθ [F*], φιθωθ [F1mg], πιθω [L], πειθων [etc., cp פיתון, Sam.]), one of the store (? see below) cities built by the Israelites during the Egyptian oppression, according to Ex. 1 11. We assume it to have been identical with ETHAM (*q.v.*).

1. Tell el-Maskhûta. Uncertain as the geography of Goshen and of the Exodus remains in most points, the locality of Pithom is now generally assumed to have been determined by the excavations of E. Naville (in the spring of 1883), described by him in vol. 1 of the *Egypt Exploration Fund Memoirs* under the title: 'The Store City of Pithom and the Route of the Exodus,' to which the reader is referred (1st edition 1885, reprinted and revised three times since then).

The ruins excavated by Naville are situated in the E. of the Wādy Ṭūmilāt, between the railway to Ismā'ilīye-Suēz and the new (Ismā'ilīye) sweet-water canal. The place is now called Tel(l)-el-Maskhûṭa, 'hill of the statue,' from a granite group of Rameses II., which represents the king standing between the two sun-gods Rē'-Harmachis and Atum. Lepsius (*Chron.* 348, etc.) concluded from this sculpture that it indicates a place where Rameses II. was worshipped as a local deity (no cogent argument), and that, consequently, we have here the locality of the biblical city of Rameses. This hypothesis led the engineers engaged in excavating the Ismā'ilīye canal to call the temporary railway-station at that place 'Ramsès,' and some maps still retain that name, although Lepsius's theory has not been confirmed by the excavations. Some former visitors called the place Abû-Keïsheïb (or Kashab, Kêshêb, Keïsheïd); the correct Arabic form seems to have been *ḥašab*. After the removal of the monuments (the group just mentioned, sphinxes, etc.) to Ismā'ilīye, very little remained to indicate the site of the city. Naville, however, traced a great square brick wall, enclosing about 55,000 square yards, and inside of it ruins of a temple and

[1] Cp *id.* Phrygian Inscriptions of the Roman Period, in *Zeitschr. f. vergl. Sprachf.*, 1887, p. 381 *f.*

[2] If any church was founded, it would be accounted Galatian, and be included among those to which the Ep. to Gal. was sent.

of store chambers (see below, § 4). Several inscriptions were found, from which Naville concluded that the name of the city was *P-atûm*[1] (or *etôm*, earliest form *etômu*), 'house (*i.e.*, abode) of Atum.'[2] The city Pithom had its name from the sun-god of Heliopolis, the protector of the whole valley of Goshen, which was considered as a dependency of On-Heliopolis. The god Atum, represented in human form with the royal crown of Egypt on his head, was by later theology distinguished from other solar deities as the representative of the sinking sun. See ON. It is to be observed that the Coptic version of the OT has the more correct form ⲡⲉⲑⲱⲙ (see below). Herodotus (2 158) states that the canal dug by Necho and Darius 'ran somewhat above the city Bubastis at the side of Πατουμος, the Arabian (*i.e.*, eastern) city. It runs into the Red Sea.' This description is evidently very vague. Formerly scholars inferred from it the identity of the place where that canal branched off to the E. with Patumos.[3] This conclusion was, however, always uncertain, Patumos being probably mentioned by Herodotus only—as the most important city on the shore of the canal—to determine its direction.[4]

2. Old names.

The geographical lists of the ancient Egyptians mention *P(er)-atûm* (or *etôm[u]*, see above) as the capital of the Heroopolitan nome of Ptolemaic time, the 8th of Lower Egypt, and describe it as situated 'at the Eastern entrance of Egypt.' For the most part the name *Ṯku* (read *Ṯuku*?) is connected with that place. Elsewhere (EXODUS, § 10) the question of identity or distinction of the names Pithom and *Ṯ(u)ku* (Succoth?) has been touched on. It might almost be assumed that the one was the sacred, the other the profane name. Naville's (p. 5) hypothesis is that *Ṯ(u)ku* was originally the name of the region and was at a later date transferred to the town. The present writer would rather prefer the theory that the two names marked two neighhouring places (*Petōm* being evidently the younger foundation) which had grown together by expansion so as to form one city. Cp the passage, Pap. Anastasi, 6 4 16, speaking of 'a royal frontier castle (*ḫtm*) of *Ṯ-ku* close by the pools of Pithom.' In the monuments found by Naville at Tel(l) el-Maskhûṭa the name *Ṯku* is used very often and refers undoubtedly to the place of the excavations, whilst the other name, 'house of Atum,' occurs rather rarely,—in the great inscription of Ptolemy II., *l.* 14, together with *Ṯku*. Thus we seem to have the two biblical places Pithom and Succoth so closely adjoining each other that their names might be interchanged (as is done in the geographical lists) without their being fully identical. Finally, the biblical ETHAM seems to be the same place. Ex. 13 20 could, of course, not indicate a full day's march between Succoth and Etham, notwithstanding Nu. 33 6 which is usually understood thus.

The excavations have shown that the city was founded by the coloniser of Goshen, the great Rameses II. See GOSHEN. It has to be added that the tradition in Strabo, 38 (Sesostris first connected the Nile with the Red Sea) contains an element of truth. It refers to the construction of a canal through Goshen to the Bitter Lakes, which canal, however, was evidently intended only to furnish a regular water supply. We have no proof that Rameses II. connected the Bitter Lakes with the Red Sea, which connection alone would have allowed successful navigation to the E. The traces of a large ancient canal, near Tel(l) el-Maskhûṭa, belong,

3. History.

[1] Formerly *pr*, *per*. Cp ETHAM, PIBESETH, etc.

[2] 

[3] Lepsius, accordingly, tried to identify Pithom with the ruins of Tel(l) Abû Islêmân near that junction, before the entrance to the valley of Goshen.

[4] Naville tried to alter the text, so that it would read: 'at the side of Patumos, etc., it (the canal) runs into the Red Sea.' Unfortunately, this alteration is rather violent.

probably, to the later constructions of Necho, Darius, and Trajan. The kings of dynasty 22 left traces of their building activity in Tel(l) el-Maskhûṭa, later Nectanebo. It must have been a very important place under the later dynasties and the Ptolemies, after the connection between the Bitter Lakes and the Red Sea had made it a port of trade. The Greeks, who called it Heroopolis or Heroönpolis,[1] describe it as such. Passages which speak of Heroopolis as a port of the Red Sea seem to refer to its situation on the canal (about the middle of its course) and not to mean that it was actually on the Red Sea. For the objections to the popular theory that a gulf of the Red Sea extended, at that time, as far as to Pithom-Succoth, see EXODUS. [A large inscription of Ptolemy II., Philadelphus, was found there, commemorating various expeditions to the coast of Eastern Africa sent forth from that place.] The Romans built there a large fortified camp, Hero Castra, for which they seem to have destroyed most of the earlier monuments, much to the disadvantage of modern archæology. The Thou of the Itinerarium Antonini, however, does not seem to be Pithom as was assumed by Lepsius, etc. Only two MSS read *Thoum*; the Notitia Dignitatum has the better reading *Thohu*, and the situation, 50 R. m. from Heliopolis, 48 from Pelusium, does not agree with our Pithom (thus, correctly, Naville). The Coptic versions render the Heroonpolis of Gen. 46 29 𝕲 by ⲡⲉⲑⲱⲙ, thus proving that the place retained its old Egyptian name by the side of the Greek one, even in the Christian period.

It remains to speak of the designation of Pithom, Rameses (and On, 𝕲) as 'treasure' (AV) or 'store' cities. The word used in Ex. 1 11 is מִסְכְּנוֹת which seems to mean 'cities for magazines.' Cp STORE CITIES. The translation of 𝕲, 'fortified cities,' is inadequate (although, of course, such frontier places must have been fortified, and we have read of fortifications above, Papyrus Anastasi, 6). It is very remarkable that on the spot of Naville's excavations large store-houses or granaries were found for the first time. Naville (p. 9-10) describes them: large buildings with thick walls, 2 to 3 yds. thick, of crude bricks, consisting of a great number of rectangular chambers of various sizes, none of which had any communication with each other. These are the granaries which, according to numerous pictures, were filled from the top and could be emptied from above or through a reserve door in the side. The hieroglyphic sign *šnwt*,[2] 'granary,' represents two such magazine chambers without connection between each other, constructed on a thick layer of beaten clay to keep the rats from digging into them. No other examples have been excavated besides those in Tel(l) el-Maskhûṭa, which is a very significant fact, and may serve as a confirmation to the translation given above. Whether those large royal granaries of Pithom-Succoth had a special (military or other) intention cannot be determined at present [cp *Crit. Bib.*]. W. M. M.

4. Store cities.

PITHON (פִּיתוֹן, 1 Ch. 8 35, פִּיתֹן 9 41†, cp PUTHITE [פּוּתִי]; φ[α]ιθων [B; ℵ in 9 41], φιθων [A], φιθωθ [L]), descendant of Saul mentioned in a genealogy of BENJAMIN (*q.v.*, § 9 ii. β), 1 Ch. 8 35 = 9 41.

PLACE, ABSALOM'S (יַד אַבְשָׁלוֹם), 1 S. 18 18. See ABSALOM, end; and MONUMENT.

PLAGUE (מַכָּה, מַגֵּפָה, נֶגֶף, נֶגַע), cp DISEASES, col. 1104; also LEPROSY, and PESTILENCE. For **Plague-boils** (עפלים; Dt. 28 27 RVmg., 1 S. 5 *f.*) see EMERODS, begin.

PLAGUES, THE TEN.[3] The signs and judgments which preceded the deliverance of the Israelites from

[1] We have other examples in which the Greeks translated the name Atum, Etōm, by 'hero.'

[2] .

[3] Cp EXODUS (BOOK), § 3, ii.

the Egyptian bondage. They are described in detail in Ex. 7 8-11 10, to which 12 29 14 26-29 form an appendix, and are epitomised in Ps. 78 42-51 53 *b*, 105 27-36[1]; see also rhetorical references in Wisd. 16-19. The common term 'plague' is not strictly accurate. Some of the occurrences referred to have the character of 'reprisals'; they are divine 'strokes' (נֶגַע, *nĕga'*, מַגֵּפָה, *maggēphāh*) or judgments on the obstinate king of Egypt. Others are rather 'signs,' 'portents,' 'significant wonders' (מוֹפֵת, *mōphēth*) and serve to accredit Moses and Aaron as Yahwè's ambassadors; they are, however, not without a strong magical tinge, and it is even possible for the Egyptian magicians to reproduce, or at least attempt to reproduce, the same thing at Pharaoh's command.

So much by way of preliminaries. Further details will follow as soon as we have given some attention to the circumstances under which the events are reported to have occurred.

1. Circumstances.

It should be noticed that, however patriotic the writers are, they enable us to look at things to some extent from Pharaoh's point of view; probably enough, the story which they severally reproduce is based on a much simpler tradition, which said nothing of 'portents' or 'plagues,' and traced the Exodus of the Israelites to the apprehensions caused to the Miṣrites[2] by the excessive multiplication of their visitors, which occasioned frequent and bitter racial strifes, and also to a matter of profound religious importance to which we shall return. The later editors of the tradition are therefore perhaps, in spite of themselves, not wholly unjust to Pharaoh. This is what stands in Ex. 1 8 (J):

Now there arose a new king who knew not Joseph. And he said to his people, Behold, the people of the b'ne Israel are too many and too mighty for us; come, let us deal cleverly with them, lest they multiply (further), and when any war happens, they join themselves to our enemies, and fight against us, and (so) withdraw from the land.

We learn in the sequel that Pharaoh set the Israelites to great public works, treating them with the oppressiveness usual to Oriental rulers in such cases, and that Moses, who enjoyed the immunity from personal violence proper to a prophet, and could therefore approach Pharaoh, asked leave for the Israelites to go three days' journey into the wilderness to hold a *ḥag* (see FEASTS, § 6, DANCE, § 3) to their God. Now begins that strange contest between the two great powers, in which we cannot but blame the imperfect truthfulness (cp MOSES, § 9) alike of Pharaoh, who breaks his word, and of Moses, who (according to J) attempts to mystify the Egyptian king by making believe that the Israelites only desire to go three days' journey into the wilderness. It must be admitted, however, that both E and P ascribe a higher moral standard to Moses, whom they represent as saying with the utmost plainness, 'Thus saith Yahwè, Let my people go'[3] (5 1; cp 6 11), and that the imperative demands of Egyptian patriotism explain, if they do not altogether excuse, the conduct of Pharaoh. All Egyptian kings understood the danger to which the state might be exposed by the machinations of fugitives from Egypt. Ebers has already referred to a provision in the treaty between Rameses II. and Ḥetasar, the prince of the Ḥeta, relative to such fugitives (*Durch Gosen*, 86). Pharaoh might well have thought that a combination of the Israelites with other Semitic tribes would have imperilled his kingdom. Hence, we can understand how, trusting in the protection of his own great god (Amen-rē' ?), and acting on the advice of his priests and prophets, the 'Pharaoh of the Exodus' could turn a deaf ear to the Semitic prophet. It was only natural too that, when entangled in a net which enfolded him the more tightly the more he sought to break from it, he gave way for a moment, and sought to impose conditions on the spokesman of the Israelites. At first they were not all to go; then, they were not to go very far away (*i.e.*, not to leave the land of Egypt); then, they were to leave their flocks and herds behind as a pledge of their return. To this last demand Moses replies that 'not a hoof' shall be left, and the enraged king threatens even Moses with death if he enters his presence again.[1] The Hebrew leader rejoins with cutting irony, 'Thou hast spoken well; I will see thy face again no more.' Thereupon Moses announces what should be Yahwè's final judgment—the death of the firstborn (though Yahwè still has in reserve another known only to himself). The threat is fulfilled. In hot haste the Israelites are dismissed—apparently however, in Pharaoh's intention, only for a time,[2] and the king even beseechingly says, as he dismisses them, 'bless me also'—*i.e.*, save me by your potent influence with your God from a prolongation of his wrath.

We now return to the plagues. It has long ago been remarked that, with the exception of the first (the rod and the serpent, 7 8-13), which has the character of a magical performance, all stand connected with definite natural occurrences, and that the plagues related by P have a specifically Egyptian character.

2. Threefold representation.

Nevertheless all these natural events have such intensifying details and occur in such rapid succession that we feel that we are not reading the record of an extraordinarily bad year but that a supernatural agency is at work. It is, however, a threefold representation that we have before us. The purpose of the wonders, as we have seen, is expressed in two different ways. It may be added that the agency is represented in three modes. At one time it is Aaron who is the wonder-worker, stretching forth his rod at the bidding of Moses; at another it is Moses himself who does so at the command of Yahwè; in yet other cases it is Yahwè who works the wonder after having announced it by Moses.

This threefold mode of representation corresponds to a threefold literary source (P J E). According to E, Moses has received from Yahwè the potent rod, or staff, of God (cp 4 17 20, and cp MOSES, § 8). We may therefore attribute to E all those instances in which Moses is the wonder-worker. According to P, Yahwè sends Moses and Aaron to Pharaoh (cp 7 1 *ff.*); thus we may assign to P all the passages in which Aaron works the wonders on the instructions of Moses. To J there will belong all those 'plagues' properly so called which are sent directly by Yahwè after being announced by Moses.

It is fortunate that in some cases the narratives of P and J have been preserved intact, so that we know the scheme or plan of representation adopted in these two documents, and, where there is a fusion of elements, can restore the original form of the respective accounts. The usual frame-work of P is as follows:[3]

[1] The epitome in Ps. 78 is the more important; that in Ps. 105 appears to imitate Ps. 78. The writer of Ps. 78 draws his material from J, on which Rothstein (*ZWT*, 1890) bases a theory that underlying our Ps. 78 is an earlier and shorter psalm of pre-exilic origin. It is perhaps more probable, however, that the contents of our Ps. 78 are a selection from a longer poem on the edifying use of the history of Israel, and that this poem had a wider range as regards the Egyptian plagues. Duhm's theory that 78 49 *f.* is an interpolation 'which originally had probably nothing at all to do with the Egyptian plagues' is based on the unemended MT. 'Their soul,' however, in *v.* 50 refers, not to the Egyptians in general, nor to 'godless Israelites,' but to the firstborn of the Egyptians, who are described in the (doubtless) true text as 'the sons that they delighted in,' ויצו למלאך משחית להשפיל בני תאותם. (See Che. *Ps.*(2).)

[2] 'Miṣrites,' to leave the question open, whether Egyptians or Muṣrites of N. Arabia are meant. See MOSES, § 6.

[3] We assume (with Bacon) that the words 'that they may hold a feast (וְיָחֹגּוּ) to me in the wilderness' (5 1) are a harmonistic insertion.

[1] Moses, then, can hardly have been resident in an outlying province of Egypt. The old tradition seems to have placed the Israelites in the midst of the land of their sojourn (see Beke, *Orig. Biblicæ*, 1 277; MOSES, § 4).

[2] Only for a time,—otherwise 12 31*b* and 32 would be superfluous; note also כאשר דברתם (*v.* 32, 𝔊 om.) and כְּדַבֶּרְכֶם (*v.* 31, Knob. Di. Rys.).

[3] See Baentsch's full and lucid note on the Plagues in his commentary.

PLAGUES, THE TEN

Then Yahwè said to Moses, say to Aaron, Stretch forth thy rod . . . and there shall be . . . And they did so and Aaron stretched forth his rod and there was . . . And so did the magicians with their enchantments . . . And Pharaoh's heart was hardened, and he did not listen to them, as Yahwè had said.

J's formula is quite different :

And Yahwè said to Moses, Go in to Pharaoh, and say to him, Thus saith Yahwè, the God of the Hebrews, Let my people go that they may worship me, and if thou refuse to let them go, behold I will . . . And Yahwè did so and sent . . . And Pharaoh called for Moses and said Entreat for me that Yahwè cause to depart . . . And Moses went out from Pharaoh and cried to Yahwè. And Yahwè did according to the word of Moses and caused to depart . . . But Pharaoh hardened his heart and did not let the people go.

It is noticeable here that the delivery of the divine command to Pharaoh by Moses and the refusal of Pharaoh to let the people go, are not expressly stated. The formula of E is best seen in 10 21 *f.* :

And Yahwè said to Moses, Stretch forth thy hand to . . . that there may be . . . And Moses stretched forth his hand to . . . and there was . . . But Yahwè made Pharaoh's heart firm and he was not willing to let them go.

With these data as a clue we are able to assign the various portents and plagues to their several sources thus :

P	J	E
1. Rod and serpent.		
2. Water into blood.	1. Waters smitten ; fish die.	1. Nile water into blood.
3. Frogs.	2. Frogs.	[2. Frogs ; perhaps.]
4. Lice.		
	3. Flies.	
5. Boils.		[3. Boils ; perhaps.]
	4. Murrain.	
	5. Hail.	4. Hail.
	6. Locusts.	5. Locusts.
		6. Darkness.
	7. Death of firstborn.	7. Death of firstborn.

It will be noticed that in P there are only five plagues. P's object is to make them all specifically Egyptian. The second, third, and fourth follow the natural order of certain phenomena which are of regular recurrence in Egypt (cp Macalister, 'Plagues,' Hast. *DB* 3 892*b*, but see criticism below, § 3). They are also wrought by Aaron by means of his rod or magic staff. Hence their co-ordination with the rod-and-serpent miracle, and their separation from the death of the firstborn and the destruction of the Egyptians in the *yam sûph* (see RED SEA). These two events, however, serve as an appendix to the list of 'portents' ; in the case of the *yam sûph* the stretching forth of the 'rod' is specially mentioned. Thus even with P the sacred number seven is duly recognised.

In J the 'plagues' strictly deserve the name : their one object is to break down the resistance of Pharaoh. Hence nothing is said about the rod and the serpent, and the death of the firstborn can be included. There is no human agency in the sending and in the removal of these calamities. All that Moses has to do is to announce the plague, and at Pharaoh's request to intercede for its removal. Moreover the events are described realistically. It is only in the circumstances that the miraculous element appears. Natural succession has nothing to do with this arrangement ; they are in an ascending scale of severity. Moreover, it is only the first three that are quite specifically Egyptian.

E, as we have seen elsewhere (MOSES, § 8), coincides to some extent with P in the importance attached to the wonder-working staff. Hence the wonderful works are at once credentials of Moses (who is the agent), and proofs of the might of him by whom Moses is sent. That E's heptad is less perfectly preserved than J's is a mere accident.

The last of the plagues is the only one that is dated ; the death of the firstborn was in the spring—in the month of Abib.

3. Period.

P gives one the impression that blow follows on blow without any pause. E, too, since there is no mention of constantly renewed negotiations, presupposes a rapid succession of blows. Still, one of the plagues requires three days (Ex. 10 22 *f.*), and afterwards the Israelites have time enough to obtain ornaments from the Egyptians. It is in J that the longest time is required for the due observance of solemn formalities, etc. Even in J, however, it is a question only of days, not of months ; otherwise, indeed, Pharaoh would have had time to plan new measures of oppression. We can hardly therefore venture with Macalister (Hast. *DB* 3 392*b*) to suppose that, in the intention of the narrators, the plagues are to be spread over the period between August and the following April.

It is unnecessary to give a complete investigation here of the natural phenomena described in the narratives.

4. Details.

See the various illustrative articles—*e.g.*, LICE, FLY, BOIL, HAIL, LOCUST, FIRSTBORN. Let us notice, however, that P's first sign—that of the rod and the serpent (Ex. 7 9)—is the converse of the common juggler's trick of benumbing venomous serpents so that they are as stiff as rods (cp SERPENT, § 3). Macalister (Hast. *DB* 3 889*a*) states that he has seen both a snake and a crocodile thrown by hypnotism into complete rigidity. Unintentionally supplementing this, Ohnefalsch-Richter (*Kypros*, 195 *f.*) compares the snake-staves (staves ending with the heads of snakes) of Cyprus, which he thinks originally belonged to sorcerers.

The plague of the water made blood is no mere natural phenomenon, though it may seem to resemble one. The Nile in Egypt towards the close of June changes colour from the successive floods turbid with mud. 'In eight or ten days it has turned from grayish-blue to dark red, occasionally of so intense a colour as to look like newly shed blood.' The Red Nile, however, is not unwholesome like the Green Nile (Maspero, *Dawn of Civ.* 23), and when a famous hymn to the Nile (*RP*(1) 4 3 ; *RP*(2) 3 51) speaks of the unkindness of the Nile as bringing destruction to the fishes, it is the Nile at its lowest (first half of June) that is meant.

The plague of frogs is one that would frequently occur in Egypt but for the ibis. 'The bird, by seeking its proper food, does the country a singular service, freeing it from vermin, which, were they to remain and rot, would certainly occasion a stench mortal to men and beasts' (Hasselquist, *Voyages*, 86).

It is stated respecting the locusts that they were brought by an east wind (רוח קדים, 10 13). It is not often that this wind brings locusts to Egypt ; on the other hand, it would be a perfectly natural phenomenon in Palestine where the writer lived. The writer of 𝔊, living in Egypt, substitutes the *νότος* or south(-west) wind. That locusts were in fact dreaded by ancient agriculturists in Egypt is attested by Erman, though Hasselquist (*Voyages*, 233) states as the result of inquiry, that they 'at least never occasion a *plague* to the country (Egypt), as they do in other places.'

The plague of darkness reminds one forcibly of the darkness of a great sand-storm such as the Ḥamsīn (S. or SW.) brings in early spring. This electrical wind may be expected during the twenty-five days before and the twenty-days after the vernal equinox (hence its name *ḥamsin* = 50). It blows, however, only for two or three or four days at a time. The French traveller Denon (*Voyages*, *ap.* Di.) remarks that the dust-clouds of the Ḥamsīn sometimes travel in streaks, so that some parts of a country might be free from the pernicious blast (cp Ex. 10 23*b*, 'but all the bne Israel had light in their dwellings').[1]

It has been thought by some that the death of the firstborn was due to plague. The parallelism of 2 K. 19 35 Is. 37 36 might suggest this ; but though a pestilential disease might, as Dr. C. Creighton points out, fall upon one class of people and spare another, the narrative distinctly confines its incidence to the Egyptian firstborn of men and beasts, which cannot be called a class in Dr. Creighton's sense. We are evidently to suppose the direct agency of a supernatural being called

[1] Elsewhere E presupposes that Israelites and Miṣrites dwelt together. See Baentsch's note, and Beke, *l.c.*

'the destroyer' (see DESTROYER); cp Ex. 12 23 Ps. 78 49 *f.* (for emendation see col. 3785, note 1).

A fresh light, however, seems to be thrown on the story by the well-grounded theory that the scene of the striking narrative in Gen. 22 1-14 was originally placed in Jerahmeelite or Muṣrite territory, not far (probably) from Kadesh; see MORIAH, and cp Winckler, *GI* 2 44, n. 1.

5. Death of firstborn.

The object of that legendary narrative was to oppose the practice of sacrificing firstborn sons which must have been prevalent in the land of Muṣri where Israelitish clans (represented alike by Abraham and by Moses) probably sojourned (cp ISAAC, JACOB, MOSES). It is difficult not to think that the tradition on which the narrative in Ex. 12 29-36 was based had a similar object.[1] The clans of Israel, it was probably said, came out from Miṣrim, from the house of the Arabians (Ex. 13 3, emended, see MOSES, § 11), because Yahwè had told them not to go on sacrificing their firstborn sons, but to redeem them (Ex. 13 11 *ff.*). There was a time when the divine voice had spoken otherwise (cp Gen. 22 2); but now that voice bade them leave their native land, like Abraham, rather than persist in an antiquated and undesirable religious practice. When the story of the peaceful Exodus (see MOSES, § 11) from Miṣrim (Muṣri) was transformed into the story of an Exodus in trembling haste from 'the land of Miṣraim (Egypt), from the house of servants,' it became necessary to reshape the old tradition, so as to make the slaying of the firstborn of the Egyptian Miṣrites the punishment inflicted upon the foreign oppressors by the offended Yahwè. In a word, it became a 'plague,' and the imagination of great narrators was at once stirred to produce other plagues to accompany it.

Taking the institution of the Passover (*pěsaḥ*) in connection with the slaying of the firstborn of the Miṣrim, one may ask whether the original tradition must not have represented the paschal sacrifice as Israel's *substitute* for the sacrifice of the firstborn of men (cp Gen. 22 13). We are not at all obliged to accept this representation (cp *RS*(2) 365); the simplest and most natural view of this characteristically Arabian practice (cp *RS*(2) 227) is different. See FIRSTBORN, PASSOVER. But it is one which would naturally suggest itself at a certain stage of religious reflection.

It is useless to appeal in behalf of the historicity of the 'ten plagues' to the threefold tradition of JEP, or to the comparatively accurate local colouring. Egyptologists inform us that Min-mes was the name of the chief magician under Rameses II., and that Me(r)neptaḥ lost a son. What critical use can we possibly make of these facts? Egyptian history is silent on all the points of real critical importance. Even OT critics have thought it worth while to conjecture that some calamities which may have fallen upon Egypt and facilitated the Exodus may have been transformed into the so-called plagues. A needless suggestion, even from a conservative critical point of view. The fact of the migration, and the supernatural powers of the leader being granted, it was natural to make the departure of the Israelites as full of the marvellous as possible, in order to enhance the greatness of Yahwè.

In truth it is a 'theologoumenon' that we have before us, and as such the story of the plagues is of deep interest.

6. Religious characteristics.

Let us close this article with a description (from Baentsch, p. 57) of the distinctive religious characteristics of the three great narrators.

'The Yahwè of J is the Yahwè who personally interferes with the course of nature, and manifests himself as lord of the elements, who makes his personal presence everywhere felt, and transacts history under our very eyes. E's conception of God is more abstract; still more so is that of P. In both Yahwè is seated above the world and does not interfere personally in its affairs. The growing tendency to introduce intermediate agents between God and the world finally led to the later development of the doctrine of angels.' Above all let us in conclusion remember that God is not banished from the history of Israel even if the Exodus was attended by no physical signs and wonders, no slaughter of the Egyptian firstborn, no drowning of a hostile king in the Red Sea.

T. K. C.

[1] The connection between the story in Ex. 12 29 *ff.* and that of the sacrifice of Isaac has been pointed out by Frazer, *Golden Bough*(2), 2 49, who, however, works out the idea quite differently.

PLAIN, corresponds to seven Hebrew words in OT and one Greek word in NT.

1. אָבֵל, *'ābēl*, 'a meadow' (§§ 89-100); so Judg. 11 33, mg. (ABEL-CHERAMIM).

2. אֵלוֹן, *'ēlōn*, 'oak' (?), or perhaps rather 'sacred tree' (see OAK, TEREBINTH). Only in place-names; thus Gen. 12 6, see MOREH; 13 18 14 13, see MAMRE; Judg. 4 11 9 6 37, see BEZAANANNIM; 1 S. 10 3, see TABOR, ALLON-BACHUTH. Here AV, like Vg., is guided by the euphemistic rendering of the Targg. (מֵישְׁרֵי), but 𝔊 and Pesh. render correctly.

3. בִּקְעָה, *biḳ'āh*, 'a highland plain' (see VALLEY).

4. כִּכָּר, *kikkār*, 'circle,' often applied to some part of the Jordan valley, primarily the district of Jericho, see JORDAN, § 2 (𝔊 generally ἡ περίχωρος or τὰ περίχωρα [BℵADEFL], less often ἡ περίοικος [BADEL], and in two passages treated as a proper name; 2 S. 18 23, κεχαρ [BL], καιχαρ [A]; Neh. 3 22, αχεχαρ [B], αχχεχξαρ [A], χεχαρ [ℵ], where 𝔊L confusing כ with ב has πρωτοτοκου) called by Jos. (*BJ* iv. 8 2) τὸ μέγα πεδίον a still common name for which is no. 6. In Neh. 3 22 the word 'plain,' RVmg. 'circuit,' probably means 'district' (of Jerusalem). On 2 S. 18 23 ('by the way of the plain,' RV) see MAHANAIM, and cp Wi. *GI* 2 235.

5. מִישׁוֹר, *mīšōr*, 'level land,' as, *e.g.*, in Is. 40 4 ('the rugged shall become a level land'; AV 'the crooked shall be made straight'), but very often in the specialised sense of 'the table-land of MOAB' [*q.v.*, and cp SHARON], *e.g.*, Josh. 13 9 16 *f.* (AV in Dt. 4 43, 'plain country' = τῇ γῇ τῇ πεδινῇ [BAL]). 𝔊 oftenest treats it as a proper name (μ[ε]ισωρ [BℵAFQL], βισωρ [A once]), but sometimes renders πεδίον, πεδινή.

6. עֲרָבָה, *'ărābāh*, preserved in RV (and Josh. 18 18 AV) as a proper name, Arabah, meaning the whole depression from the Sea of Galilee to the Gulf of 'Aḳăba, the S. part of which is still called W. el 'Araba; see DESERT, §§ 2 (4), 3 (2). We also hear of the 'plains (*'arbōth*) of Jericho' (*e.g.*, 2 K. 25 5); for this phrase and also for 𝔊's renderings see ARABAH, but cp MOAB, § 1, n. 1. In 2 S. 15 28 and 17 16 Ḳr., 'the plains of the wilderness' (ערבות המדבר) might mean 'the plains of Jericho' (cp 2 K. 25 5); still, though the versions (but see L) support Kr., the Kt. reading, 'the fords of the wilderness' (adopted by RV; AV 'plain,' 'plains'), is preferable. See FORDS; FERRY-BOAT. L in 2 S. 15 28 ἐπὶ τῆς ἐλαίας ἐν τῇ ἐρήμῳ (cp *vv.* 18 23).

7. שְׁפֵלָה, *šephēlāh*, 'lowland,' very frequent, *e.g.*, Jer. 17 26 Ob. 19 Zech. 7 7; usually rendered in AV 'vale, valley, valleys,' by RV everywhere correctly 'lowland.' See SHEPHELAH.

In EVmg. of Gen. 14 5 שָׁוֵה ('a level place'), regarded in the text as part of a pr. n. (see KIRIATHAIM and cp SHAVEH in *v.* 17), is rendered 'plain,' as is אֵיל, 'tree' (τερ[ε]μίνθου [AE], τερεβινθου [L], similarly Pesh.; Vg. *campestria*) in AVmg. of Gen. 14 6. See EL-PARAN, and cp the explanation above under (2).

8. The only Greek word in the NT to be recorded is πεδινός (both πεδ[ε]ινός and πεδίον are frequent in 𝔊 and Apoc.). In Lk. 6 17 AV, 'stood in the *plain*' should be 'stood on a spot in the plain' (ἐπὶ τόπου πεδινοῦ), *i.e.*, at the foot of the mountain (according to Mk. and Lk. probably some definite hill near Capernaum) referred to in *v.* 12. RV renders 'on a level place,' as if some flat place on the side of the mountain. Plummer remarks that this would suit the multitudes bringing sick people to be healed better than a plateau high up the mountain. πεδίον Judith 1 5 (borders of Ragau) 1 6 (of Arioch) 1 8 (of Esdraelon) 2 21 (of Bectileth) 2 27 (of Damascus) 3 3 [BA] (fields of wheat) 4 5 (fields) 4 6 (open country near Dothaim) 5 1 (champaign countries) 6 4 (fields) 6 11 (plain) 7 18 (plain) 8 3 (field) 14 2 (field) 15 2 (plain) Wisd. 19 7 Ecclus. 24 14 1 Macc. 3 24 (plain = Shephelah) 4 6 14 *f.* 21 5 52 10 71 73 77 83 11 67 *f.* 12 49 13 13 14 8 16 5 11 2 Macc. 14 33.

PLAIN, CITIES OF THE (עָרֵי הַמִּישֹׁר), Dt. 3 10. See ADMAH AND ZEBOIM, SODOM AND GOMORRAH, BELA, ZOAR; also (Dt. 3 10) MOAB.

PLAISTER. Passing over with brief mention 'the plaister (Dan. 5 5, גִּיר, *gīr*; κονιαμα) of the wall' on which MENE, MENE (*q.v.*) was written, directions as to 'plaistering' anew the leprous house (Lev. 14 42, טוּחַ, ἐξαλειφω), the 'plaister' in Jer. 30 13 (RVmg. for תְּעָלָה, but inconsistently not in 46 11), and the verb 'to plaister' (מָרַח) in Is. 38 21, the last two of which references have to do with wounds (see MEDICINE, and for

Is., *l.c.*, FIG, § 3), we pause on the command of Moses in Dt. 27 2 that the Israelites set up great stones *and plaister them with plaister* (שַׂדְתָּ בַּשִּׂיד, ΚΟΝΙΑCΕΙC ΚΟΝΙΑ, *calce levigabis*). If the text is correct, the 'plaistering'—which means here giving a coat of gypsum (see LIME)—stands in close relation to the recording of 'the words of this law.' The word used for this recording is כָּתַב, which, according to Dillmann, means writing with ink (cp 17 18 31 9), but, according to Driver, inscribing with some special pigment analogous to that employed in the wall-paintings and inscriptions of Egypt. The exegetical question, however, must be subordinated to a historical and text-critical one.

If—as many converging phenomena show—there was an older story of the migration of certain Israelite clans, which said nothing of crossing the Jordan, and represented the immediate goal of the migration to be the Negeb (see MOSES, § 6; NEGEB), and if the text of Dt. 1 1 and 11 29 has been correctly restored elsewhere (SUPH, MOREH), it follows that the text of Dt. 27 2 needs careful revision in accordance with those passages. The duty is in fact urgent, for the commentaries are by no means satisfactory, and we are justified in building on the well-grounded textual emendations referred to. The scene of the address of Moses to the Israelites was originally represented as 'opposite Zarephath' (1 1), and the 'mountains' spoken of in 11 29 were in 'Arab-jerahmeel, at the entrance of Cusham, in the land of the Kenites.' Consequently it becomes natural to emend 27 2 thus, 'When ye have passed through Jerahmeel to the land . . . thou shalt set thee up great stones *in Zarephath of Miṣṣur.*' (Cp ZAREPHATH.) See *Crit. Bib.* The 'words of this law' were presumably to be engraved (cp Now. *Arch.* 1 290, and WRITING), not, however, on the altar-stones (as the writer of Josh. 8 32 supposed), but on the 'great stones,' which were of course not unhewn like the altar-stones.

T. K. C.

PLAITS (תּוֹרִים), Cant. 1 10 *f.* RV. See NECKLACE.

PLANE (מַקְצֻעָה, ΠΑΡΑΓΡΑΦΙC [? Aq. in Q^mg.] BℵAQΓ om.), Is. 44 13†. 𝔊 incomplete and corrupt. Cp HANDICRAFTS, § 2.

PLANE TREE AV **Chestnut Tree** (עַרְמוֹן, *'armōn*; ΠΛΑΤΑΝΟC, Gen. 30 37; ΕΛΑΤΗ, Ezek. 31 8† [Th. ΠΛΑΤΑΝΟC]). The Hebrew name is most likely connected with a root meaning 'to scale off' (Ges. *Thes.*), and is thus appropriate to the plane (*Platanus orientalis*, L.) which peels annually. According to Tristram (*NHB*, 345)—who says 'we never saw the chestnut in Palestine, excepting planted in orchards in Lebanon'—the plane 'is frequent by the sides of streams and in plains, both on the coast and in the northern parts of the country. . . . It is common on the banks of the Upper Jordan, and of the Leontes, where it overhangs the water.' The identification is supported by nearly all ancient authorities, though 𝔊 goes astray in Ezek. 31 8. The mistaken rendering of AV is of Jewish origin.

For the תִּדְהָר, *tidhār*, of Is. 41 19 60 13† RVmg., see PINE, 2.

N. M.

PLANETS (מַזָּלוֹת), 2 K. 23 5 EV. See STARS.

PLANTINGS OF ADONIS (נִטְעֵי נַעֲמָנִים), Is. 17 10 RVmg. See ADONIS.

PLATE. 1. EV rendering of צִיץ, *ṣīṣ*; πέταλον; lamina), the golden object in the high priest's mitre, Ex. 28 36 etc. See MITRE, § 3 *f.*

2. לוּחַ, *lūăḥ* (𝔊 om.), an obscure term in the description of the bases of the 'molten sea,' 1 K. 7 36.

3. סְרָנִים, *s^erānīm* (τὰ προσέχοντα), axles of bronze belonging to bronze wheels, 1 K. 7 30.

4. פַּחִים, *paḥḥīm* (λεπίδες), thin plates of metal, Ex. 39 3 Nu. 17 3 [16 38]. Cp EMBROIDERY, OUCHES.

PLATFORM (עַמּוּד), 2 K. 11 14 23 3 RVmg., EV PILLAR (*q.v.*).

PLATTER (ΠΙΝΑΞ), Lk. 11 39. See CHARGER, 3; also meals, § 9.

PLEDGE (חֲבֹל, *ḥăbōl*; ΕΝΕΧΥΡΑCΜΟC or -ΜΑ, Ezek. 18 12 16 33 15 [𝔊A ἐνεχυρον], or עֲבוֹט, *'ăbōṭ*, ἐνέχυρον, Dt. 24 10 *ff.*; also עֵרָבוֹן, *'ērābōn* ἀρραβών, Gen. 38 17 18 20, whilst עֲרֻבָּה, *'ărubbāh*, occurs once in a general sense (1 S. 17 18, 'token,' see BDB; 𝔊A ὅσα ἂν χρῄζωσιν, 𝔊B omits, 𝔊L τὸ ερουβα) and when used in a technical legal sense means 'security' (Prov. 17 18†). The corresponding verbs are עָרַב, 'to give in pawn,' 'to pledge,' and also 'to become security,' and חָבַל, 'to take something in pawn or pledge.'

Elsewhere (LAW AND JUSTICE, § 16) it is pointed out that the old legislation as to pledges goes on the supposition that indebtedness between Israelites can only have its origin in the poverty of one of the parties which compels him to have recourse to his more prosperous brother for a loan of the means of subsistence. The provisions even of the oldest legislation on this subject, and still more those of Dt., have therefore the express tendency and intention to protect the poor debtor against the oppression of his creditor. The usual method adopted by the creditor to secure his money was to exact a pledge. Houses and vineyards were so given (Neh. 5 3), although as to the form in which this was done we learn nothing. From Neh. 5 3 *f.* compared with 5 5 it would appear that the mortgaged land passed into the possession of the creditor and was redeemed only by repayment of the loan. So far as earlier times are concerned, we read nothing about the mortgaging of lands, nor yet does the law mention such a thing; we are thus left in ignorance as to what the ancient custom was in this respect. If the needy person had no land he could give his sons and daughters in pledge; when this happened they passed into the possession of the creditor as slaves (Neh. 5 5; see SLAVERY); where loans of comparatively small amount were concerned the creditor took such pledge as suited him from the household goods of the debtor—such as clothing, hand-mill, or other domestic implement, staff or signet-ring (cp Gen. 38 18).

1. Practice.

The old law in the Book of the Covenant intervenes in behalf of the debtor so far at least, as to enact that if the pledge be the upper garment or mantle it must be returned to its owner before nightfall, 'for it is his only covering: wherein shall he sleep?' (Ex. 22 26 *f.*). Garments seem, as a rule, to have been favourite pledges (Am. 2 8 Job 22 6 Prov. 20 16 27 13).

2. Laws.

Dt., with the humane disposition which it everywhere displays (cp DEUTERONOMY, § 32, col. 1093), extends the law of the Book of the Covenant just stated so as to prohibit the pledging of necessaries altogether. That articles necessary to life must not be pledged is the plain meaning of Dt., although the law does not express this generally but only in a series of detailed enactments: the garments of a widow, the hand-mill, or even only a part of it, may not be taken in pledge, for that would be to take a man's life in pledge (Dt. 24 6 17). In particular—and this is an important check upon the exorbitance of the rich creditor—the creditor is no longer to have the right he seems formerly to have had, of going in person into the house of the debtor and choosing a pledge at his own discretion, but must stay outside before the door of the borrower and wait to receive what the latter may choose to give by way of pledge. The proviso that the pledge must be restored before nightfall is repeated here also; although the expression is worded generally, we ought, no doubt, to see here a reference to the mantle in the first instance, as in the case of the earlier law, for it is added: that he (the debtor) may sleep in his own garment (Dt. 24 10-13). That the law was abundantly justified in its interposition against the merciless abuse of the system of pledging, but also that on the other hand it did not succeed in doing away with all hardship and even sometimes played into the hands of the unjust rich in their oppression and overreaching of the poor is clear from the many complaints upon the subject (Am. 2 8 Ezek. 18 7 12 16 33 15 Job 22 6 24 3 Prov. 20 16 27 13 Neh. 5 2 *ff.*).

In later Jewish times the law of pledges often supplied the means of evading the strict sabbath law which forbade any payment of money on that day; the buyer gave, instead of the

money for goods received, a pledge—usually his upper garment—which was redeemed when the sabbath ended, at sunset.

3. Security. Security, that is a pledge given by a third party, is strangely enough never mentioned in the earlier period, nor alluded to in the Book of the Covenant or in D. It is not till the later literature is reached that many warnings against the danger of suretyship show how common it was, and with what disastrous results it was often attended (Prov. 6 1 *ff.* 11 15 17 18 20 16 22 26 *f.* Job 17 3 Ecclus. 8 12 *f.* 29 14 *ff.*). Cp DEPOSIT, EARNEST. I. B.

PLEIADES (כִּימָה; παντα [BAQ] in Am. 5 8? αρκτουρον in Job 9 9? [so Aq. Am. 5 8] πλειαδες in Job 38 31? with Sym. and so Sym. Th. Am. 5 8), either Sirius, if this is not rather the 'bow-star' of Job 38 36, or the Pleiades (which may, however, be the 'Ayish of Job 38 32; see STARS, § 3 *c*, and Che. *JBL* 17 [1898] 105).

PLOUGH. See AGRICULTURE, § 3 *f.*

PLUMBLINE (אֲנָךְ; αλαμας [BAQ], *trulla* [trowel] *cæmentarii*), Am. 7 7 *f.*†. See LEAD and HANDICRAFTS, §§ 1, 2.

PLUMMET.[1] 1. מִשְׁקֹלֶת, *miškōleth* (2 K. 21 13, *στάθμιον* [B], *σταθμόν* [AL]), or מִשְׁקֶלֶת, *miškéleth* (Is. 28 17, *σταθμοί* [BℵAQΓ], *mensura*). See HANDICRAFTS, §§ 1 *f.*

2. In Is. 34 11 RV has 'plummet of emptiness' for אַבְנֵי־בֹהוּ, *'abnē bóhu* (AV 'stones of emptiness'; 𝔊 reads differently, but *γεωμετρία* seems to stand for אבני, *perpendiculum in desolationem*).

3. הָאֶבֶן הַבְּדִיל, *hā-ében habbĕdīl*, Zech. 4 10; lit. 'the stone, the tin,' so AVmg.; *τὸν λίθον τὸν κασσιτέρινον* [BℵAQΓ, *κασσιδεριον* ℵ*]; *lapidem stanneum*). But 'the stone of tin' (AVmg.) is scarcely grammatical,[2] nor is 'plummet' the term that is wanted here, but rather הָאֶבֶן הָרֹאשׁ (cp *v.* 7)—*i.e.*, 'the top-stoning.' אבן, however, would suffice here, and since הבדיל cannot have sprung out of הראש, it is better to suppose that it is either an incorrect gloss (Marti, Nowack) or a corruption of ביד זרבבל, or of some name corresponding to זרבבל (see ZERUBBABEL). T. K. C.

POCHERETH-HAZZEBAIM (פֹּכֶרֶת הַצְּבָיִם, or, Neh., הַצְּבָיִים) AV, RV POCHERETH OF ZEBAIM. The names of two families reckoned among the 'sons of Solomon's servants' (or rather 'men of Salmæan Arabia,' see SOLOMON'S SERVANTS, CHILDREN OF) rolled into one.

Ezra 2 57 (*υἱοὶ φασραθ υἱοὶ ασεβωειν* [B], . . . *φακεραθ* . . . *ασεβωειμ* [A], . . . *φακεραθ τῶν σαβωειμ* [L]; Neh. 7 59 . . . *φακαραθ* [B], *φαχαρατ* [ℵ], *φαχαραθ* [A], . . . *σαβαειμ*; . . . *φακεραθ* . . . *σαβωειμ* [L]).

In 1 Esd. 5 34, however, as in 𝔊 above, Zebaim (AV SABI, RV SABIE; *σαβ(ε)ιη* [BA], *τῶν σαβωειμ* [L]) is distinct from Pochereth (AV PHACARETH; *φακαρεθ* [BA], *φακεραθ* [L]), and the sense 'hunter of gazelles' is in itself improbable for a family-name (see, however, NAMES, § 96). AV is, therefore, more correct than RV, except that 'sons of' should have been prefixed to Zebaim. Pochereth is parallel to HASSOPHERETH (*q.v.*) in *v.* 55, which we take to mean ZAREPHATH (a N. Arabian place). It is grouped with Shephati[ah] (*i.e.*, Zarephathite), with Hattil (*i.e.*, Ahit[al] = Rehobothi), with Zebaim, and with Ami or rather 'Adlon (see 1 Esd. 5 34, *υἱοὶ αδλων*, cp SHAPHAT, 5) = עדלם, probably a corruption of ירחמאל (MT עֲדֻלָּם, Adullam). On the analogy of SOPHERETH for Zarephath, we may read 'Rehoboth' for 'Pochereth,' so that two Rehobothite clan-names (misread Hattil and Pochereth) are mentioned together. Zebaim, too, seems to be a place-name; cp צְבֹאִים (see ZEBOIM). T. K. C.

POETICAL LITERATURE

1. Amount of poetry in OT. Poetry occupies a large space in the OT, even if we take note only of the poetical books in the stricter sense, viz., Psalms, Proverbs, Job, Canticles, Lamentations. The number of these will be increased if we include Kōhéleth on the one hand, in which the restraints of metrical form give place to the freedom of poetic prose, and on the other hand Ecclesiasticus, Wisdom, and the Psalms of Solomon, which were not received into the canon.

In reality, however, poetry plays a much greater part than this in the literature of the OT. In the Tōrāh and the Former Prophets (Josh.-2 K.) we find many songs and lyric fragments, and the Later Prophets (Is.-Mal.) are full of poetry.

2. Complete survey impossible. Yet we have not the means of obtaining a complete survey of the history of Hebrew poetry, and for the following three reasons:—

(i.) *Much lost.* First, it is plain that only a small fraction of the poetical pieces once in existence has been preserved in the OT. The earliest collections are lost. We no longer possess the 'Book of the Righteous' (AV 'of Jasher'; RV 'of Jashar'; סֵפֶר הַיָּשָׁר, Josh. 10 13 [om. BA]; 2 S. 1 18 [*βιβλίον τοῦ εὐθοῦς*, or *εὐθέως*] 1 K. 8 53 [*β. τῆς ᾠδῆς*: BAL] = השיר, *i.e.*, הישר, the whole phrase being omitted in MT [see JASHAR, BOOK OF]), or the 'Book of the WARS OF THE LORD' (Nu. 21 14, סֵפֶר מִלְחֲמֹת יהוה; *βιβλίῳ Πόλεμος τοῦ κυρίου* [B], *βίβλῳ Π. [τοῦ] κυρίου* [AL]), or the 3000 proverbs and 1005 songs that 1 K. 5 12 *f.* [4 32 *f.*] assigns to Solomon—which have nothing in common with the collections traditionally associated with his name that are still extant. Of the wealth of popular poetry—wedding-songs, dirges, drinking-songs (Am. 6 5), recitations of rhapsodists (Nu. 21 27)—nothing has reached us but a few specimens and illustrations. Of the older devotional poetry too (Am. 5 23) we have not now the means of forming any true idea. Naturally the men to whom we owe the selection and arrangement of the sacred writings sternly suppressed all those old poetic productions that were too obviously in conflict with the spirit of the (later) religion of Yahwè.

(ii.) *Uncertain date and authorship.*—Secondly, even in regard to the poems that have been preserved, we can only occasionally determine the date of composition, still more rarely the authorship. Much as the Israelites wrote, they were devoid of the real spirit of the man of letters, and never cared for what we call the history of literature. Neither did the poets themselves work for future literary glory, nor did the general public trouble itself much about the authorship of what it read or sang. We must not be misled by the superscriptions in Psalms and Proverbs. It is not on any tradition or even a primitive literary criticism that they rest. They are prefixed to the poems with the arbitrariness and undiscerning recklessness that characterise the historical attempts of the last centuries, B.C. [Cp PSALMS, PROVERBS.]

Besides, a comparison of the Hebrew, Greek, Syriac, and other Aramaic texts, shows that the superscriptions varied greatly in different MSS. So long, therefore, as we know hardly a single poet, and only exceptionally the occasion and object of the poems, and their date and manifold mutual relations, a history of poetry cannot but be incomplete.

iii. *Lack of information about metre and music.*—A third consideration adds to our uncertainty. We know that the Israelites used definite metrical forms, and that their songs were provided with an accompaniment of more or less artistic instrumental music (see MUSIC). We have, however, but few positive data on the subject, and these, some of which are concealed in the Psalm superscriptions, are, for the most part, unintelligible to us. We are consequently often in doubt where prose passes into metrical poetry, and one commentator will find clearly marked verses and strophes, where another will find plain prose, or at best a poetical

[1] *i.e.*, *plumbet.*
[2] Cp C. H. H. Wright, *Zechariah*, p. 550.

style. Almost the whole of the prophetic literature is involved at the present time in this ambiguity.

3. Three periods. If, notwithstanding these difficulties, the attempt must be made to determine the great outstanding periods in the history of Hebrew poetry, the following must be distinguished.

i. The period of *popular* poetry, from the beginning of Israelitish history to the age of written prophecy. [Cp § 10, B. 'Popular poetry.'] From the earliest times down to Solomon we may call the pre-literary age; much was sung, but little written. Its most important documents are the 'Song of Deborah' (Judg. 5), the 'Blessing of Jacob' (Gen. 49), and the elegies of David (2 S. 1 3).[1] From Solomon onwards the art of reading and writing seems to have spread widely in Israel. Since the popular connection—attested by the author of 1 K. 5 12 *f.* [4 32 *f.*]—of the proverbs and songs referred to above with the name of Solomon, can hardly be entirely destitute of foundation of some kind, we may probably assume that Solomon had the 3000 proverbs and fables treating of all beasts and plants written down, either in whole or in part, for the glorification of his power, though it is quite improbable that so many fables and maxims replete with cosmopolitan wisdom should have originated within the limits of Israel, much less have been composed by the king himself. If we are to credit Solomon with this step it could not fail to lead to further production, and may have laid broader foundations for the rise of a poetic literature, of which unhappily we possess few relics.

ii. The second period, from Amos to Ezra, we may call the *prophetic*. Judged by such remains as have reached us, the prophets are, in both the stricter and the wider sense of the term, the most distinguished poets of this age, and even the poems that we owe to other authors—Job, Lamentations, the songs of the Servant of Yahwè—are subject to their influence. If we exclude a very few narrative pieces, Amos, Hosea, Micah, Isaiah, Nahum, Habakkuk, Deutero-Isaiah, and (to coin a new term) Trito-Isaiah (Is. 56-66) write in strict poetic form. The same seems to be true of the original notes of Jeremiah, although these are now indeed in great measure obscured by additions, made either by himself or by others, which are more or less of the nature of prose. Ezekiel frequently intersperses poetical pieces among his prose writings.

iii. The third period likewise contains many prophetic poems; but it is pious *lyric* and *didactic* poetry that preponderates—poetry founded on the Law and on a scheme of ethics, the key-word of which is the 'fear of God.' Little secular poetry has found a place in the Canon (examples are Ps. 45 Is. 23 15 *f.*).

We should reach about the same results if we adopted as a principle of classification the various species of poetry.

4. Species of poetry. i. *Common life.*—The poetry of *common life* is common to all periods. Mourning women skilled in the dirge, 'wise women,' mothers, teaching their daughters to lament the dead, are known to Amos (5 16) and Jeremiah (9 17 19) as well as to the NT (see MOURNING CUSTOMS, § 1). And equally common will have been the songs of joy to which women in their processional dances played the tabret and carousers plucked the guitar (see MUSIC, § 3 [1]; DANCE, § 5). The Song of the Well (see BEER), which Nu. 21 17 *f.* assigns to nomadic times, could also have been produced 1000 years later.

ii. *Epic.*—On the other hand, epic poetry is for us confined to the first period. Unfortunately so little of it has been preserved that before the decipherment of the cuneiform literature it was even supposed that the Semites had no epic poetry.

(1) In reality, however, Israel actually possessed epic poems with *mythical* features. The reference to the primeval contest between the god of light and the

[1] See JUDGES, § 7; GENESIS, § 8 (*b*); SAMUEL (BOOKS).

powers of chaos in Is. 51 9 and in Job 7 12 9 13 26 reminds us of the cosmogonic myths of the northern Semites (see CREATION, LEVIATHAN, RAHAB). These myths, however, which, though a product not of religious instinct, but of poetic philosophic thought, spring up only on the soil of nature-religion, must have undergone a radical transformation when poetically wrought up by an adherent of Yahwè, the god of plain history. In Gen. 6 1-4, too, we seem to detect features of the poetry of mythic epos; it bespeaks a poetic original, *e.g.*, when we read in *v.* 1 that daughters were born to men—a prose writer would have spoken of sons and daughters.

(2) Other poems again take us from the realm of myth more into that of *legend*. From the culture-legend of the people of Kain (cp CAINITES), of which we have an abridgment in Gen. 4 16-24, we have (*a*) the Song of Lamech (*v.* 23 *f.*). Then there are fragments of song telling of Yahwè's coming down from heaven, the material of which is not Israelitish in origin. One of these underlies the narrative of (*b*) the Babylonian tower-building[1] (Gen. 11 1-9), the author of which rather clumsily mixes up prose and verse. The following is in verse:—

v. 3. Come, we will make brick,
And bake them till they are hard.

v. 4. Come, let us build a city,
And a tower with its head in heaven,
And let us make us a landmark,
That we be not scattered over the earth

v. 7. Come, let us go down,
And confound there their speech.

It is clear that the last distich belongs to the poetic original, as the prose writer has already made Yahwè come down in *v.* 5. Some strophes of (*c*) a second song have been subsequently inserted into the Yahwistic story of the overthrow of Sodom (Gen. 18 *f.*), a story which they do not at all suit. The first strophe (18 20 *f.*) plants us in heaven:—

The cry of Sodom and Gomorrah, ah! it is great;
And their sin, ah! it is very grievous;
I will go down and see whether . . .
Or, if it be not so, I must know.

Here the poet must have told of Yahwè's coming down. Farther on we read (19 24 *f.*):—

And Yahwè rained on Sodom and Gomorrah,
Brimstone and fire came from Yahwè out of heaven,
And he overthrew the cities and the whole district,
And all that dwelt in the cities and all the fruit of the ground

That these strophes are not the work of the Yahwist is clear, apart from their poetic diction, from the following considerations:—(1) 19 24 *f.* separates the prose account of Lot (*v.* 23) from that of his wife (*v.* 26); (2) the Yahwist always speaks simply of Sodom, whilst these strophes, and later allusions to them, speak also of Gomorrah; (3) according to the Yahwist Sodom is destroyed by the two men that came thither, whilst, according to the poet, this is the work of Yahwè from heaven; (4) the determination of Yahwè (18 20 *f.*) 'to go down' conflicts with the prose narrative—it is either a descent into the vale of Sodom that is meant, in which case the Yahwist does not after all make Yahwè go down at all, or it is a coming down from heaven to earth, in which case the determination is quite out of place in chap. 18, where Yahwè is already on earth.

That the subject-matter of the poems is not old Israelitish seems sufficiently proved by the fact of Yahwè's being thought of as dwelling in heaven. The Sodom legend is pre-Israelite; the story of the Tower of Babel must have grown up among people to whom the tower served as a landmark—the caravans of the desert.

(3) Not only myth and legend, however, but also real *history* is represented in song. The rhapsodists, whose recitations kept alive the lays of popular history, are called in Nu. 21 27 *Mōšĕlīm* (מֹשְׁלִים), and would seem, to judge from the usage elsewhere of the word *māšāl* (cp PROVERB), to have also recited satirical songs on living persons. In the earlier days songs, treating of the fights and heroes so dear to the heart of peoples still in their youth, are, for the most part, improvised by the women,

[1] See BABEL, TOWER OF, and cp *Crit. Bib.*

and naturally only in exceptional cases handed down to later generations. It appears to the present writer possible that (*a*) Ex. 15 21, the couplet that extols in glad wonder the unimagined might of the desert god :

> Sing to Yahwè, for he hath greatly exalted himself;
> The horse and his rider hath he cast into the sea,

is really to be attributed to Miriam, whilst the long poem *vv.* 2-19 is certainly a quite late artificial product (cp EXODUS [BOOK], § 6). Moreover it is probable that a poem underlies the description of (*b*) the Red Sea catastrophe in Ex. 14 24 *f.* The song (*c*) in Nu. 21 27-30 is, perhaps, not earlier than the monarchy. Of the ancient song of victory on (*d*) the fight at Gibeon we have some fragments in Josh. 10 10 *ff.* which do not everywhere stand out from the prose framework, but are still sufficient to show that the supposed marvel of sun and moon standing still, rests on the early poetic conception of the stars as warlike beings lingering here as sympathetic spectators of the deeds of Yahwè, just as in (*e*) the Song of Deborah they actually take part in the fight (Judg. 5 20).

This Song of Deborah (Judg. 5) is the most important document of the whole period from Moses to David. In support of the view that it is of later date than the age of Deborah, no serious grounds have as yet been adduced. The song is the composition of some one who was more interested in the marshalling and organising of the forces than in the fight itself, and who had authority to speak in the name of the mal'ak Yahwè (see THEOPHANY); for this reason we are justified in regarding Deborah herself as the author. The 'song' spoken of in *v.* 12, however, cannot be urged in proof of this; it is rather the warlike benediction with which this Veleda of ancient Israel sends the warriors to the fight. The poem is composed in six-line strophes, the dialect is N. Israelitish (according to *v.* 15 Deborah belonged to Issachar), the text very corrupt. Cp JUDGES (BOOK), § 7.

It is to the early days of the monarchy, when David was king at Hebron, that we are inclined to assign (*f*) the 'Blessing of Jacob' (Gen. 49 1-27), which, though inferior to the 'Song of Deborah' from an æsthetic point of view, does not fall far below it in historical value. Its author, who prophesies a time of glory for Shiloh and Judah, might conceivably be Abiathar, the last scion of the priestly clan of Shiloh, and faithful friend of David. Cp GENESIS, § 8 (*b*).

The author hopes that Judah, brother of the Israelitish tribes, enriched and become great by plunder, may not lose its leader David, as Benjamin lost its Saul, till at Shiloh he attains to the hegemony of the tribes. The early monarchy suits the utterances about the other tribes: Issachar, which, fleeing from its seat on the overthrow of Saul (1 S. 31 7), returns later to its but too attractive abode, only to submit to the yoke of the Philistines; Gad, which under the leadership of Abner gallantly defends itself; Reuben, which has lost its leading position (see 1 Ch. 5 10); Levi and Simeon, whose stubborn adherence to the old, wild, Bedouin life was irreconcilable with the milder spirit of a now agricultural people; Dan, clearly no longer living, as at the time of the Song of Deborah, by the sea, but already removed to Laish (Judg. 17 18), and yet still self-governed—a proof that a monarchy after the Solomonic type does not yet exist. Only the saying about Joseph, differing as it does also in other respects from what is said of the other tribes, may be assigned to the days of the monarchy, at least if the expression נְזִיר אֶחָיו (EV 'him that was separate from [RVmg. 'that is prince among'] his brethren'), *v.* 26, is to be rendered 'the crowned one of his brethren.'

To the category of historical songs of the first rank belong also (*g*) David's lament over Saul and Jonathan (2 S. 1 19-27), and (*h*) the lament on the death of Abner, of which only a four-line fragment (2 S. 3 33 *f.*) has reached us, unless part of *v.* 38 *f.* also should be assigned to it—songs that give us a most favourable idea of David's character and poetic gifts. Much less certain, though not after all impossible, is the Davidic origin of (*i*) the 'swan-song,' 2 S. 23 1-7. See DAVID, § 13; JASHAR, BOOK OF, § 2.

What remains is confined to some fragments. Mention should be made of (*j*) the song about Saul and David that the women sang as they danced (1 S. 18 7); (*k*) the insurrectionary song of Sheba with which the Israelites renounced their allegiance to the Davidic as an alien dynasty (2 S. 20 1 1 K. 12 16); (*l*) the tetrastich on the temple building put into the mouth of Solomon,[1] though certainly belonging to a later time, 1 K. 8 12 (see 𝔊 1 K. 8 53); finally (*m*) the popular song of N. Israel mentioned in Is. 9 9 [10]:—

> Bricks are fallen
> But we build with hewn stone,
> Sycamores are cut down
> But we set in their place cedars.

(4) Of the *didactic* poetry of the earlier times once so abundant (1 K. 5 12), all that remains to us, if we pass over the unmetrical fable of 2 K. 14 9, is the fable of Jotham (Judg. 9) and perhaps the riddle of Samson (Judg. 14 14). Jotham's fable marks the Israelitish peasants' low estimate of the monarchy, to win which none would give up his useful work. The determination of its date is, as always in the case of fables, a precarious undertaking.

(5) The question whether the Israelites possessed a *dramatic* literature, may most probably be answered in the affirmative. It is true the OT gives not the slightest hint that they had a theatre like the Greeks or Indians. But a dramatic character belongs even to the primitive cultus, the festive processions and dances, certainly also many rites in which pilgrims to the various shrines had to take part, a liturgy making use of question and answer (cp, *e.g.*, Ps. 24), and those songs, mostly improvised, in which leader and choir alternately perform. If here those taking part do so in their own proper persons, the women who yearly bewailed the daughter of Jephthah (Judg. 11 39 *f.*) played the part of another, and the same is true after all of the mourning-women when they raised the common cry for a stranger: Ah, my brother! Ah, Lord! (Jer. 22 18); and every wedding was a small drama. It is therefore not without reason if the question whether the so-called 'Song of Solomon' is a kind of drama, is more and more generally answered in the affirmative. Difference of opinion is practically confined now to the question whether it is a sort of peasant's drama, like those still performed in Syria at weddings, perhaps, too, simply a collection of songs composed for such occasions, or on the other hand, a drama in the ordinary sense, or rather a sort of operetta akin to the miracle-plays of mediæval times. The second alternative appears to the present writer the more natural [cp Driver, *Introd.* ch. 10, § 1]; it does not of course require us to assume an artificial stage or other theatrical accessories, nor any professional actors. The 'Song,' or operetta, falls into twenty lyrico-dramatic passages, developing a very simple plot, in which true love gains the day over all the efforts of Solomon to part the attached lovers, and make the maiden of Shulem (Shunem?) his favourite wife (see CANTICLES). The songs are sung partly by individuals—the Shulamite, Solomon, the young swain—partly by choruses: the maidens of the harem, the women of Zion, the friends of the bridegroom, the bridesmaids, the kinsmen and kinswomen of the lover. Some of the songs are in dialogue form; but the dialogue remains throughout in the background as in the oldest dramas of the Greeks.

The composition is of N. Israelite origin, and belongs to the century following Solomon, when the bitterness engendered among the N. Israelites by the severity of that king's rule had disappeared, but when it was still not unpleasing to give a burlesque description of his character. In spite of a certain Oriental redundancy the work contains many passages of a graceful and tender poetry. Specially worthy of mention is the fine psychological insight in the poetical treatment of the heroine. (On the disputed questions involved, see CANTICLES.)

(6) With Amos begins for us the age of *prophetic* poetry. We refer not merely to poems explicitly indicated as such by the prophets themselves, such as Am. 5 1 *f.* Mic. 1 8 *ff.* 2 4 Is. 5 1 *ff.* Jer. 9 19 *ff.* etc. On the contrary, by far the greatest part of the prophetic literature consists of poems, which, if not sung, were also not declaimed

[1] [See JASHER, BOOK OF, § 3, and cp Cheyne, *Or. Ps.* 212, 475, where further references are given; Driver, *Intr.*(6) 192; *Expositor*, 1891 (1), pp. 398 *ff.*]

after the manner of Demosthenes, but delivered with ecstatic fervour. Probably the *hithnabbē* (הִתְנַבֵּא, see PROPHET, § 1 [1]) or γλώσσαις λαλεῖν of the NT (see SPIRITUAL GIFTS) resembled in the first place the ecstatic babbling of the Pythia, and was then, if the subject-matter were sufficiently important, brought, as in the case of the Pythia, into a certain metrical form, when the ecstasy (בְּחֶזְקַת הַיָּד, 'when the hand grasped' Is. 8 11) had ceased, but the exaltation of spirit had not yet vanished. Hence the earliest oracles (cp, *e.g.*, Gen. 25 23, or the Balaam speeches [Nu. 23 *f.*], as well as the 'Blessings' uttered under divine influence [Gen. 9 25 *ff.* 24 60 27 27 etc.]) are also in poetic form; and the musician who was set to excite the enthusiasm of Elisha will have likewise accompanied his words. The prophets were, moreover, aware that, like the *vates* of the Romans, they were prophets and poets in one, since they not seldom make use, in speeches designated 'the word of Yahwè,' of poetical artifices such as the refrain (*e.g.*, Is. 9 8 [7] *ff.* Am. 1 3 *ff.* 4 6 *ff.*). In fact religion is the mother of all arts, and it was originally not a form of speech when poets addressed the gods as the actual source of their creations.

That the prophetic addresses are really not speeches but songs, is sufficiently clear from their brevity, but still more from their being divided into equal strophes. Most common are the four-line strophes in which, *e.g.*, Hosea invariably writes; but more artificial forms are quite frequent. In so far as the utterances of the prophets give expression to the objects and demands of the divine ruler, and are addressed to the body of the people or the ruling classes, dealing therefore with foreign and home politics, they are political poems. Often indeed must the poet speak for himself, and in the case of Jeremiah the political element often gives place to the personal and even the lyric, so that of all the prophets he is most markedly a poet in the proper sense of the term. From the time of the exile, however, when the nation as a political power ceased to be, there begin to make their appearance—*e.g.*, in a Deutero-Isaiah—those elements which suggest the spiritual song of a later time: it is to Jeremiah and Deutero-Isaiah, therefore, that such spiritual song traces its pedigree. Unhappily it was for the most part with ill-preserved, mutilated, and illegible texts that the later collectors of the early writings had to deal, and they made them still worse by glosses, additions, erroneous conjectures, and transpositions. Hence not seldom, in addition to internal criticism and comparisons of the Hebrew text with that of the LXX, metrical considerations have to be laid under contribution to secure a text representing in some measure the original. What a confusion, for example, now prevails in such passages as the following:—(*a*) Am. 5 4-17. In *vv.* 4-6 14 *f.* we have the following poem:—

5. True nature of prophetic addresses.

Seek Yahwè and live,
And seek not Bethel,
And to Gilgal come not,
And to Beersheba go not over.
Seek Yahwè and live
Lest there break out a flame,[1]
Fire in the house of Joseph,
And consume with none to quench.
Seek good, not evil,
That ye may live,
And so Yahwè be with you,
As ye have said.

Between *vv.* 6 and 14 has been inserted a genuine piece (*vv.* 7 10-13) belonging to *v.* 16 *f.*, and a later addition (*v.* 8 *f.*). Only *v.* 15, though its beginning is different, may belong to the same poem:—

Hate evil and love good,
And establish in the gate justice;
Perhaps Yahwè will be gracious,
The god of hosts to the remnant of Joseph.

1 Read יצלח לַהַב אֵשׁ and take אש with the next clause. The letters לה will have fallen out from their resemblance to the preceding pair.

POETICAL LITERATURE

We add some further examples of prophetic poems (*b*) Hos. 5 14-6 6:—

I am like a lion unto Ephraim,
    And like a young lion unto the house of Judah;
I, I rend and go away,
    I carry off, none rescuing.

I will go back to my place,
    Until they are brought to nought,[1]
And seek my face,
    In their distress search after me:

Up, let us return
    To Yahwè our God;
For he hath rent, and will heal us,
    And smitten,[2] and will bind us up.

He will revive us after two days,
    On the third day make us stand up,
That we may live before him,
    And know . . .

We will pursue after Yahwè;
    As we seek him, so do we find him;[3]
And he will come as a winter rain for us,
    Like a late rain that waters the earth.[4]

What should I do unto thee Israel (Ephraim?)
    What should I do unto thee, Judah,
Your love being like morning clouds,
    And like dew that early disappears?

(*c*) Mic. 3 9-12:—

Hear, ye heads of Jacob,
    And chiefs of the house of Israel,
Who abhor judgment,
    And make all that is straight crooked;

Who build[5] Zion with blood,
    And Jerusalem with iniquity,
Where the chiefs give judgment for a bribe,
    And the priests give counsel for hire;

Where the prophets prophesy for silver,
    And lean on Yahwè saying:
Is not Yahwè in our midst?
    There cannot befall us any evil!

Therefore on your account
    Zion like a field shall be ploughed,
And Jerusalem become heaps,
    And the temple mount a wooded height.[6]

(*d*) Jer. 4 23-26:—

I saw the earth and lo a chaos!
    (I looked) to the heavens, and their light was gone;
I saw the mountains, and lo, they quaked,
    And all the hills had begun to totter.

I saw and lo man was gone,
    And all the birds of heaven were fled;
I saw and lo, the fruitful spot was desert,[7]
    And all its cities were overthrown before Yahwè.

(*e*) Jer. 20 7-12:—

Thou didst infatuate me, Yahwè, and I became infatuated,
    Thou seizedst me, and didst prevail;
I became a laughing-stock every day;
    Every one mocks me.

As often as I speak I cry out violence,
    I bewail outrage.
The word of Yahwè became to me a reproach,
    And an insult every day.

And I said: I will no more think of him,
    Nor speak in his name;
And it became in my heart as burning fire,
    An oppression[8] in my bones.

And I became weary of bearing it,
    And hold not out;
For I heard the whisper of many:
    'Denounce! we will denounce him.'

All men of mine acquaintance
    Watch for my fall;
'Perhaps he will be infatuated, and we can master him,
    And take our revenge.'

But Yahwè [of hosts][9] is with me
    As a mighty hero,

POETICAL LITERATURE

Therefore shall my pursuers stumble
And not prevail :

They shall be greatly ashamed,[1]
For they have no insight ;
Their shame lasts for ever,[2]
Will not be forgotten.

Yahwè is a righteous judge,
Seeing reins and heart ;
I shall see my revenge upon them,
For on thee have I rolled it.[3]

6. Lam., 'Servant of Yahwè,' Job.

To the prophetic period belong (*a*) the five Lamentations, which, it is true, exhibit a metre favoured by Jeremiah, and are in the Greek text ascribed to him, but are a later artificial product and come probably from different authors. So also (*b*) the 'Servant of Yahwè' Songs (Is. 42 1-4 49 1-6 50 4-9 52 13-53 12), prophetic lyrics of deep import and noble diction, belonging to the time of the post-exilic community. Probably also (*c*) the Book of Job (apart from the pre-exilic prose introduction and conclusion) was written before Ezra, although a later date is possible. The poem deals with that deep problem which called Buddhism into being—the problem of misfortune—in an unrestrained, yet deeply religious, anything but philosophical spirit, and with a keen polemic against the Deuteronomistic theory of retribution. See JOB [BOOK].

Noteworthy, in a poem wholly based on the ethics of the prophets, is the absence of any reference to the prophetic hope of a better world ; this lack of the thought of a redemption, which gave such immense help to Christianity, as it did to Buddhism, explains how the theodicy does not turn out satisfactory, and the poet found more opponents than followers. The text is very badly preserved and has received many foreign additions (especially 12 4-6 7-10 24 1-24 30 2-8 28 32-37 40 15-41 26 [34]); both the original and the added speeches are in tetrastichs, only 12 4-6 24 30 2-8 being written in tristichs.

7. Lyric and didactic.

If some prophetic poems were still produced in the time following Ezra, most of the poems of this period belong to lyric and didactic literature. Single specimens are to be found in the historical books as well as in the prophetic collections. In an age when pseudonymous authorship is prevalent it is a favourite practice to assign to celebrities of the past, not merely prophecies and prayers, but also religious songs, without always noticing whether the songs suit the person or the situation (cp, *e.g.*, 1 S. 2 1-10 Jon. 2 2-9). This predilection for the names of illustrious poets of the past finds special expression in the two great collections of the time—the Psalter, containing the lyric, and Proverbs containing the didactic poetry. Both collections have grown out of smaller collections for the most part still discernible. How late the smaller collections were united appears from 1 Ch. 16 8-36 (see PSALMS [BOOK], § 8).[4] But the songs themselves are also late and refer to the inner and outer struggles of the community of the second temple.

8. Metre.

Had the second temple been preserved and with it the temple song, we should perhaps have had better traditional information regarding the metrical form of Hebrew poetry than is afforded us by the marginal notes of a musical nature, and the late accentual system devised for use in liturgical recitation. Only a few poems are stichometrically arranged (Judg. 5 Ex. 15 Dt. 32 33 2 S. 22), and not even the Psalms.[5] Still less are the strophes indicated ; even the refrains, recurring after a definite number of lines and indicating the end of the strophes, have through the excessive carelessness of the old copyists often fallen out (*e.g.*, in Ps. 46 49 Job 28). Still, the expositor of the OT is in duty bound to take note of the metre, not simply because it offers the greatest assistance to the *textual* critic but also on *æsthetic grounds*, and above all out of respect *for the authors* who certainly did not choose without reason to submit themselves to the restrictions of metre.

(i.) *Distich.*—The real basis of Hebrew metre is the distich. This was already known to the older theologians, who found the characteristic of OT poetry in the 'parallelismus membrorum,' the device namely of having the second 'stichos' reproduce the first not in identical but in similar terms—*e.g.*, Dt. 32 1,

Give ear, ye heavens, that I may speak,
And let the earth hear the words of my mouth.

This parallelism, in stricter or looser form, may be due to the earliest improvised verses having originated in responsive song amongst the women, the chorus taking up, modifying, supplementing, the thoughts expressed by the leader.

(ii.) *Scansion.*—The first question at issue is how the stichos is to be scanned. Opinion has latterly come to be unanimous that the *stresses* are to be counted ; all that remains to be determined is whether the unaccented syllables are also to be counted. Bickell, to whose work we are far more indebted than to that of any other for our understanding of Hebrew metre, holds that they are [so Merx, Gietmann], and since he assumes an unaccented between every two accented syllables, he recognises only iambic and trochaic measures. But although he has succeeded in carrying his system through with wonderful consistency and without excessive violence, it seems to the present writer more prudent to give up counting the unaccented syllables and the rule that between each two accented syllables there must stand one and only one unaccented syllable. It is simpler and less exposed to the risk of artificiality to suppose that Hebrew poetry, just like the German *Volkslied*, attended only to the number of accented syllables, and not to the number or position of unaccented, and allowed the greatest freedom in the treatment of long and short, permitting long syllables in the thesis and even—like German popular poetry—short syllables in the arsis. [So Ley, Neteler, Grimme, and (as repeatedly stated by himself) C. A. Briggs.] In this case we must of course give up the idea of definitely determining the tone syllable in each case ; but that is in any case wise, for we do not now know where the word-stress, which probably did not always agree with the system followed by the Massoretic punctuators, originally fell.

[Sievers claims to have found a uniform and definite rhythm which may be called pseudo-anapæstic, two unaccented syllables of any quantity being followed by a long accented syllable—*e.g.*, וַיִּשְׁמַן יְשֻׁרוּן וַיִּבְעַט, Dt. 32 15. Sievers' researches (on which see Buhl, *op. cit.*, Zimmern, *ZA*, 1897, p. 383) are based on the MT ; see 'Metrische Studien' in the *Abhandl.* of the Saxon Gesellsch. d. Wissenschaften, vol. 21.]

(iii.) *Various metres.*—The distich spoken of above would accordingly have to be regarded as a verse of 3 + 3 accents, or (as Josephus says) a hexameter. Many poems are in this measure—*e.g.*, the whole of Job. Distichs of 2 + 2 accents are not so common, those of 4 + 4 again frequent—the former chiefly in lightly moving popular songs, of which indeed not many have survived, the latter often in the utterances of the prophets.

On this simple basis somewhat more artificial forms of verse were easily reared. The distich could become a tristich, the two stichoi might differ in the number of accents. Specially attractive is the long line produced out of the ordinary 'hexameter' by the dropping of one accent in the second stichos, and containing therefore 3 + 2 accents—it might be called pentameter. It is the favourite verse of Jeremiah, and is also often used elsewhere in poems where feeling predominates, expressing with equal ease the energy of triumph and scorn (Is. 14 47) and the intensity of pain (cp Jer. 20 7 *ff.*

1 Read בּוֹשׁ יֵבֹשׁוּ. 2 Read with 𝔊 כְּלִמָּתָם לְעוֹלָם.

3 Read גִּלִּיתִי, *for a revealing of the quarrel is unnecessary* when Yahwè sees heart and reins.

4 On the still later so-called 'canticles' of the Apocrypha and NT, see also HYMNS, PSALMS [BOOK], § 44.

5 See, however, Ginsburg, *Introduction to the Massoretico-critical Edition of the Hebrew Bible* (London, 1897), p. 17 *f.*: 'In the best MSS the lines [in the Psalter, Proverbs, and Job] are poetically divided and arranged in hemistichs.'

above), the rapture of joy (Is. 40 1-4 9-11), and idyllic repose (*e.g.*, Ps. 23 27 1-6). To call this measure the *Kīnāh*-metre (קִינָה, elegy) would therefore be a mistake, all the more that it is by no means universally chosen for elegies. [See LAMENTATION; but cp König, *Stylistik*, 315 *ff.* According to Grimme, the 'halting metre' took its origin in prophetic oracles.]

(iv.) *Strophes.*—A remarkable controversy has also broken out as to whether or not OT poetry combined those stichoi into strophes. It is indeed easy to understand how gnomic poetry could content itself with the distich form; but that lyric poetry should also have done so would be very strange. The poems, however, —by no means rare—that intersperse refrains after every so many lines, are of themselves enough to prove the opposite. In fact, in spite of the frequent disfigurement of the text, it will force itself upon every reader that it is much easier to find symmetrical strophes in Hebrew poetry than in Greek choruses. The simplest and commonest strophe is naturally the tetrastich originating in the doubling of the distich. [So, *e.g.*, not only in Job and often in Psalms, but also in Ezek. 15; cp Bertholet and Kraetzschmar.] The prophets probably further combine two tetrastichs together, and in Is. 9 8 [7] *ff.* every three tetrastichs are held together by a refrain of two stichoi, the result being a strophe of fourteen stichoi; similarly in Job 28, except that the refrain, which in this poem begins each strophe, has fallen out before *v.* 1 and *v.* 7. In Am. 1 3 2 10, too, the refrain precedes, and is followed by two tetrastichs, which in turn repeat certain phrases. Of strophes of more than fourteen lines, as far as the present writer is aware, there are none.

Tristichs are comparatively rare (*e.g.*, Job 24 1-24 30 2-8 Cant. 3 1-4). Six-lined strophes have arisen from the combination of three distichs, rarely of two tristichs. A stately effect is produced by a strophe of 7 pentameters, as in Is. 13 2-22 14 4-21 47—in the first two cases subordinate groups of 2+2+3 being combined to form each strophe. Five-line strophes of many kinds are also to be met with.

These are the outlines of the Hebrew metrical system. Simple as it is it cannot be charged with monotony, even when we must do without such artificial versification as is indulged in, *e.g.*, in Is. 26 1-19—long lines of 3 × 2 or 2 × 3 accents, in imitation, it would seem, of Greek hexameters.

9. Other artifices.

That advantage was taken of word-plays, assonances, even rhyme, to heighten the colour, every student of the Hebrew text knows, as also how many alphabetic poems were written. There is at least one acrostich (Ps. 119), whilst occasionally a writer of alphabetic songs seems to have interwoven his name (Ps. 25 22 34 23 [22]: Pedaiah). Artifices of this kind show that art is conscious. A complete knowledge of Hebrew versification we could hope to attain only if we were acquainted also with Hebrew music and the way in which prophets recited their productions. Here our knowledge must always be more fragmentary than in the domain of literary history.

H. D.

POISON. 1. חֵמָה, *ḥēmāh*; θυμος, ιος (√יחם, to be hot; Aram. חֶמָא, Arab. *ḥumatun*, Ass. *imtu* 'spittle, breath, poison'), only of animal poison in the phrases חֲמַת זֹחֲלֵי עָפָר (Dt. 32 24), ח׳ תַּנִּינִם (Dt. 32 33), ח׳ נָחָשׁ (Ps. 58 5 [4]), ח׳ עַכְשׁוּב (Ps. 140 4), all referring to the venom of snakes (see SERPENTS, especially § 2), unless Ps. 140 4 be an exception (see SPIDER).

2. רֹאשׁ, *rōʾš*, in the expression רֹאשׁ פְּתָנִים (Dt. 32 33 Job 20 16; also, apparently, Ecclus. 25 15). See GALL, 1.

3. ἰός, Rom. 3 13; cp 𝔊, Ps. 139 3 Jas. 3 8 (the tongue: 'full of deadly poison').

POLITARCHS (πολιταρχαι), Acts 17 6†, EV 'rulers of the city.' See THESSALONICA.

POLLUX. See CASTOR AND POLLUX.

POMEGRANATE, tree or fruit (רִמּוֹן, ροα; Ex. 28 33 *f.* 39 24-26 Nu. 13 23 20 5 Dt. 8 8 1 S. 14 2 1 K. 7 18 20 42 2 K. 25 17 2 Ch. 3 16 4 13 Cant. 4 3 13 6 7 11 7 12 [13] 8 2 Jer. 52 22 *f.* Joel 1 12 Hag. 2 19†), bears the same name in Heb., Aram., Arab. and Eth., and might therefore be supposed to belong to the group of plants—vine, olive, fig, palm—which were known to the common stock of the Semitic peoples before they separated (except the Assyrians and Babylonians; see Hommel, *Aufs. und Abh.* 93), were it not that there is special reason to doubt whether *rummān* (like *tuffāḥ* = תַּפּוּחַ) is a genuine Arabic word at all, and not rather borrowed from Aram. or Heb. (cp Fränkel, 142). The origin and first home of the word are uncertain (Nöldeke, *Mand. Gr.* 123; Guidi, *Della Sede*, 19; Hommel conjectures a source in Asia Minor, *op. cit.* 98). The connection with the divine name Rimmon—if such connection there be (it is denied by H. Derenbourg)—is obscure and throws no light on the etymology (cp Baudissin, *Stud.* 1 306). Cp RIMMON.

1. Derivation.

The pomegranate tree (*Punica Granatum*, L.) is indigenous in Persia, Kurdistan, Afghanistan, and perhaps Beluchistan, also S. of the Caspian Sea and the Caucasus; farther west its growth is mainly connected with cultivation (De Cand. *Origine*, 189). It has been since early times cultivated in Egypt[1] (cp Nu. 20 5), Assyria, Palestine, and most countries round the Mediterranean.

[The pomegranate is a shrub or low tree with small deciduous dark-green foliage, which well sets off the crimson calyx and petals of the flowers, whilst the large reddish-coloured fruit, filled with many seeds, each surrounded with juicy pleasant-tasted pulp, gave it additional value in a warm country. The rind and bark and the outer part of the root are valued as astringents for the tannin which they contain. The fruit is frequently represented on Assyrian and Egyptian sculptures, and was a religious symbol in several ancient cults (see Baudissin, *Studien*, 2 207 *ff.*, but cp HADAD-RIMMON).

2. Description.

According to Ohnefalsch-Richter (*Kypros*, Text, 115) the

[1] It was imported in historical times; see EGYPT, § 8 n.

pomegranate was sacred to Adonis in Cyprus, just as in Crete it was sacred to Dionysus, which throws light, as he holds, on the confusion made in MT between רִמּוֹן, 'pomegranate-tree' and רַמָּן, Rammān (the Assyrian storm-god). See RIMMON.]

3. OT references. The biblical references—especially Dt. 8 8 Joel 1 12 Hag. 2 19—show that the pomegranate was one of the common fruit-trees of Palestine.[1] There was a large tree at Gibeah in the time of Saul (1 S. 14 2). We hear of a pomegranate orchard or garden (פַּרְדֵּס = παράδεισος; see GARDEN) in Cant. 4 13; the beautiful flowers are referred to in Cant. 6 11 7 12 [13]. The פֶּלַח הָרִמּוֹן, Cant. 4 3 6 7 (EV 'piece of a pomegranate') is explained by Wetzstein (*ap.* Delitzsch, 437 *ff.*) as referring to the cleft in the ripe pomegranate, which shows the flesh of the fruit with the seeds shining through it. The mention of pomegranate wine, Cant. 8 2 (EV 'juice'), is illustrated by the account of ῥοίτης οἶνος in Diosc. 5 34.

As is well known, the pomegranate supplied forms (1) for the embroidery at the base of 'the robe of the ephod,' Ex. 28 33, etc. (see BELLS, 1), and (2) for metal ornamentation on the tops of pillars in the temple, 1 K. 7 18, etc.

[According to Flinders Petrie the design of bells and pomegranates is 'the old Egyptian lotus and bud border, such a pattern having lost its original meaning in course of transfer to other lands' (Hastings, *DB* 1 269). If so, the design is misnamed. As the text stands, a small golden bell was to be attached to the hem between each two of the 'pomegranates' (*i.e.*, balls like pomegranates made of threads of the three colours mentioned).] N. M.

POMMELS (גֻּלּוֹת), 2 Ch. 4 12 *f.* AV, RV BOWLS (*q.v.*).

POND. 1. אֲגַם, *'ăgam*. See POOL, 1.

2. מִקְוֶה, *mikweh* (√קוה, in Niph, 'to gather, collect'), in Ex. 7 19 RV (AV 'pool'; συνεστηκὸς ὕδωρ; *lacus aquarum*); used also widely in Gen. 1 10 Lev. 11 36 [see RV]. Cp מִקְוָה, *mikwāh*, 'reservoir,' Is. 22 11 Ecclus. 48 20 *d*† (Heb.); see CONDUITS, § 1 (5).

PONTIUS PILATE. See PILATE.

PONTUS (ΠΟΝΤΟϹ, Acts 2 9 1 Pet. 1 1; ΠΟΝΤΙΚΟΝ ΤΩ ΓΕΝΕΙ, Acts 18 2). The 'maritime' state, in the NE. corner of Asia Minor.

1. Geography. It was, in fact, merely the coast-land of Cappadocia, lying N. of the mountains which separate the central plateau from the sea-board: hence it was called 'Cappadocia on the sea (Pontus)'—Καππαδοκία ἡ πρὸς τῷ Πόντῳ (Strabo, 534). It is a land of mountains and well-watered fertile valleys, and of great natural wealth.

The chief river was the Iris (*Yeshil Irmak*), with its tributary the Lycus (*Kelkit Irmak*). Amaseia (*Amasia*) and Comana Pontica (near mod. *Tokat*) were centres of trade (cp Strabo, 559, ἐμπόριον τοῖς ἀπὸ τῆς Ἀρμενίας ἀξιόλογον, of Comana): the former was the cradle of the power of Pontus, the latter the chief seat of the worship of the great goddess Mâ, around whose shrine dwelt six thousand consecrated courtesans (Strabo, 557 *f.*; cp Comana in Cappadocia, *id.* 535, and the cult of Anaitis in Armenia, *id.* 532).

On the coast were flourishing Greek settlements, of which the most important was Amisus (mod. *Samsun*), the natural outlet for the products of eastern Asia Minor northwards. Farther E. was Trapezus (*Trebizond*), and W., Sinope (*Sinub*), which ultimately became the capital of the kingdom.

2. History. The independent career of Pontus dated from the overthrow of the Persian monarchy (Strabo, 534). Under the sway of the family of Mithridates (from about 280 B.C.) its importance gradually grew, at the expense of its eastern and western neighbours (see sketch by Holm, *Gk. Hist.* ET 4 285 *f.*). The glorious period of Pontic history was during the reign of Mithridates IV., Eupator (111-63 B.C.), who created a great maritime kingdom (cp Holm, *op. cit.* 4 569), and extended his power westwards over the coast beyond the river Halys and over the inland country (Paphlagonia: of which he ruled τὴν ἐγγυτάτω, Strabo, 544),[1] to the borders of Bithynia (Strabo, 540). The campaigns of Lucullus and Pompeius overthrew the Pontic Kingdom, and in 65 B.C. Pompeius organised the double province Bithynia-Pontus.

This was created by combining with the former kingdom of Nicomedes III. (see BITHYNIA) all the western part of the kingdom of Mithridates—*viz.*, the coast-land of Paphlagonia from the Pontic Heraclea (mod. *Eregli*) as far as Amisus, inclusive,[2] together with those parts of inner Paphlagonia that had been acquired by the Pontic kings. The rest of Paphlagonia, together with eastern Pontus, remained non-Roman, being handed over to semi-independent, in some cases priestly, dynasts (Strabo, 541). These territories were, however, from time to time incorporated, not with the province of Pontus-Bithynia, but with that of Galatia.

In 5 B.C. the Paphlagonian kingdom of Deiotarus Philadelphus, brother of Castor, the capital of which was Gangra (mod. *Changra*), was thus incorporated; in 2 B.C., the kingdom of the Gaul Ateporix—*i.e.*, the territory of Karana which had formerly belonged to Zela (mod. *Zilleh*, S. of Amaseia); at the same date the territory of Amaseia was absorbed, along with the district of Gazelonitis (with the exception of its seaboard) on the lower Halys; in 34 or 35 A.D. Tiberius incorporated Comana Pontica and its territory; finally, in 63 A.D., Nero incorporated the kingdom of Polemon II., the only remaining part of Pontus as yet unabsorbed (Pontus Polemoniacus was its name after absorption, to distinguish it from Pontus Galaticus. See GALATIA, § 3).

3. NT references. The word Pontus in the NT has, therefore, two possible significations. It may indicate that part of the Pontic Kingdom which was added to Bithynia (τῆς Ποντικῆς ἐπαρχίας τῆς συντεταγμένης τῇ Βιθυνίᾳ Strabo, 543); or it may stand for the full title of the double province Pontus-Bithynia, just as is the case with the word Bithynia (see BITHYNIA). It is in this latter sense that the word is used in Acts 2 10, in the list of regions from which came certain Jews and proselytes present in Jerusalem at the Feast of Pentecost. That list (cp GEOGRAPHY, § 26, end), in spite of some irregularities, is made on the principle of naming the regions according to four groups (so Page, *Acts of the Ap.*, note *in loc.*), and follows a natural geographical order from Cappadocia in the E., round by the N., and southwards to Pamphylia. Pontus stands for the Province Pontus-Bithynia, in the coast-towns of which Jews would be settled for purposes of trade (cp Acts 18 2). On the other hand, in Acts 18 2, where Aquila is said to have been 'born in Pontus' (so AV; RV, 'a man of Pontus by race'), we must understand the word in the first sense, of Roman or western Pontus, the eastern section of the double province. We may conjecture that Aquila, who was a tent-maker (σκηνοποιός, Acts 18 3), came from the district E. of the Halys, in which Amisus lay, for there alone in the province was wool raised in any quantity (cp Strabo, 546, Gazelonitis ἔχει δὲ καὶ προβατείαν ὑποδιφθέρου καὶ μαλακῆς ἐρέας, ἧς καθ' ὅλην τὴν Καππαδοκίαν καὶ τὸν Πόντον σφόδρα πολλὴ σπάνις ἐστί).

There remains the mention of Pontus in 1 Pet. 1 1. The enumeration 'Pontus, Galatia, Cappadocia, Asia, and Bithynia' employs the terms in the Roman sense and 'sums up the whole of Asia Minor N. of the Taurus range' (Rams. *Church in the Rom. Emp.*(5) 110). Why then are the two names Pontus and Bithynia both employed, and so widely separated? The question depends to some extent upon the date of 1 Peter (see PETER [EPISTLES OF]). If it was written as early as 63 A.D., it is conceivable that Bithynia is used for the double province (as in Tac. *Ann.* 1 74 16 18), and that Pontus = the kingdom of Polemon, the last free relic of

[1] Light is thrown upon the geography of this region by Anderson and Munro in *Journ. of Hell. Studies*, 20 150 *ff.* (1900).

[2] Relying on Strabo, 544, Momms.-Marquardt (*Röm. Staatsv.* 1 350) say that Amisus was not included in the province until after 33 B.C.; but see Rams. *Hist. Geogr. of AM*, 191 *f.*

the old Pontic realm. It is at least more probable, however, that the Epistle belongs to a period not earlier than 75-80 A.D. Pontus will therefore be the eastern part of the double province Pontus-Bithynia, and Bithynia the western part, which bore the name Bithynia before its erection into a province. Nor is such separation without justification in point of fact, for the two parts of the province had a certain independence.

Amastris was the μητρόπολις of the Pontic part, as Nicomedeia of the Bithynian, and the provincial synods (*consilium*, κοινόν) met separately in those towns (see Momms.-Marq. *Röm. Staatsv.* 1 355 *f.*). The only difficulty is then to account for the *order* of the names. On this point the view put forward in Hort's dissertation, 'The Provinces of Asia Minor included in St. Peter's address' (1 *Peter*, 157-184) is the most satisfactory.[1] He shows that the order of names indicates the course of the journey projected by Silvanus the bearer of the letter. Silvanus was to enter Asia Minor by a seaport of Pontus, and thence to make a circuit till he reached the neighbourhood of the Euxine once more. He would, perhaps, land at Sinope (more probably at Amisus), and leave Asia Minor by a port of Bithynia.

As to the date of the planting of the church in Pontus we have no information. Paul had been forbidden to set foot in the western part of the Province (Acts 16 7). We gather from Col. 4 10 and 2 Tim. 5 11 that Mark's work lay in Asia during the years succeeding 61 A.D., and he is mentioned in 1 Pet. 5 13 in a way that suggests that he was known to the eastern congregations. Hence we may conjecture that Mark laboured in the eastern provinces of Anatolia, and that the evangelisation of Pontus was due in part to him. Possibly it was suggested to him by Aquila, who probably saw him in Rome on the occasion of Paul's first imprisonment (cp Rom. 16 3 Col. 4 10 Philem. 24) and at Ephesus some years later (cp 2 Tim. 4 12 and 19).

4. Christianity in Pontus.

The tradition of Peter's work, in association with Andrew, in Pontus and the Provinces of Asia Minor is, probably, merely an inference from the Epistle itself. See SIMON PETER. The earliest authority for the statement is Origen (cp Eus. *HE* 3 1), who simply repeats the list of 1 Pet. 1 1 (with changed order) and says that he seems to have preached (κεκηρυχέναι ἔοικεν). The Syriac *Doctrine of the Apostles* (Cur. *Anc. Syr. Doc.* 33) says that Peter 'laid the foundation of the Church' in Antioch, Syria, Cilicia, and Galatia, even to Pontus; and the route followed is given as starting from the Syrian Antioch and going by way of Tyana in Cappadocia to Sinope, where there was a tradition of Peter's presence (see Lipsius, *Apokr. Apostelgesch.* ii. 1 4 *ff.*).

The route is indeed quite correct, as the road from Syria, through the Cilician gates, and then by way of Tyana and Cæsareia in Cappadocia, was the great N. route to the Euxine, and is to-day the only road between Cæsareia Mazaca and *Samsun* that is practicable for *arabas* (see Rams. *Hist. Geogr. of AM*, 268, 446). The point of issue upon the Pontic coast-land was not, however, Sinope, but Amisus, for 'Sinope is cut off from the interior by broad and lofty mountains, most difficult to traverse' (Rams., *op. cit.*, 28).

We learn from Pliny's correspondence with Trajan that in 112 A.D. renegade Christians were found at Amisus in considerable numbers; and that some claimed to have abandoned Christianity even twenty-five years previously (*Ep.* 96). This would prove that Christianity had obtained a hold in Amisus as early as 87 or 88 A.D.

Ramsay (*Church in the Rom. Emp.* 225) concludes that we may place the introduction of the new religion into this part of Pontus between 65 and 75 A.D.; but he appears to take too narrow a view in ascribing the evangelisation of Asia Minor too exclusively to Paul and Pauline influence, as though Christianity in the northern provinces was due only to infiltration from Ephesus and other centres (Id., *op. cit.*, 284 *f.*).

For the history of the Pontic Kingdom, Th. Reinach, *Mithridate Eupator, roi de Pont* (Paris, 1890). W. J. W.

POOL.[2] The words are:

1. אֲגַם, *'ăgam* (√אגם 'troubled' 'sad'?; Ass. *agāmu*; properly of 'troubled' or muddy pools or marshes; see BDB), applied, for example, to the pools left by the inundation of the Nile (Ex. 7 19 8 1 [5]: AV 'pond'; ἕλος; *palus*) and probably to the 'marsh' of Jordan (1 Macc. 9 42 45; *palus*; see *Comm.*). Frequently used in poetry in contrast with the dry sand of the desert (Is. 14 23 35 7 41 18 42 15; in last three cases ἕλος, *stagnum*); Ps. 107 35 (λιμένας ὑδάτων, *stagna aquarum*), 114 8 (λιμνας ὑδ., *st. aq.*). In Jer. 51 32 (συστέματα) AV renders 'reeds' (cp REED, 3), but RVmg. has 'or *marshes*, Heb. *pools*.' On the אַגְמֵי נֶפֶשׁ, AV 'ponds of fish,' of Is. 19 10 see under SLUICE; also FISH, § 5.

2. בְּרֵכָה, *berēkāh* (?√ברך, of camels kneeling to drink, but cp Ges.-Bu.); κρήνη, κολυμβήθρα; once λίμνη, Cant. 7 4; Vg. *piscina*; once *aquæductus*, Neh. 2 14; cp Arab. *birkeh* and Span. *alberca*. See CONDUITS, §§ 1, 3; also, on the 'pools' (κολυμβήθρα) of Bethesda and Siloam, see JERUSALEM, § 11, and SILOAM.

3. מִקְוֶה *mikweh*. See POND, 2.

[1] The secret of the peculiar order of the list was divined first apparently by Ewald, in his *Sieben Sendschreiben des NB*, 2 *ff.* (see Hort, *l.c.*, 168 *n.*).

[2] Cp POND. When RV in Ex. 7 19 substitutes 'pool' for 'pond' as a rendering for *'ăgam* and 'pond for 'pool' as a rendering for *mikweh*, it seems to be guided by a sense of the probable etymology of 'pool' as akin to πηλός and *palus*.

POOR. Dismissing with a bare notice the word ראשׁ רשׁ, *rāš*, which is the proper term in Hebrew for 'poor' in the sense of 'indigent,' 'without means' (1 S. 18 23, etc., esp. frequent in Proverbs; πένης, πτωχός, ταπεινός) we come to an interesting group of words אביון, *'ebyōn* (πένης, πτωχός, ταπεινός, ἐνδεής), דל, *dal* (ἀσθενής, πένης, πενιχρός, πενόμενος, πονηρός, πτωχός, ταπεινός) and עני, *'ānī* (πένης, πενιχρός, πραΰς, πτωχός, ταπεινός)—all three synonymous in usage but with a different significance and denotation in different books. In legal documents where it is in the absence of material goods that the point of the reference lies, all three terms denote the poor man in the material or legal sense.

1. Terms.

So in the Book of the Covenant (אביון, Ex. 23 6 11, דל, Ex. 23 3, עני, Ex. 22 24 [25]), the Law of Holiness (עני, Lev. 19 10 23 22), the Priestly Code (דל, Ex. 30 15 Lev. 14 21), or Deuteronomy (אביון, Dt. 15 4, etc., עני, Dt. 15 11, etc.), and generally in the Wisdom Literature (אביון, Job 29 16 Prov. 14 31, etc.; דל, Prov. 10 15 28 11, etc.; עני, Job 24 9; Prov. 14 21, etc.).

In the older prophets (Am. 2 6 Is. 3 15, etc.), where the opposition between tyrannical ruler and downtrodden subject is the point to be emphasised, the words denote primarily the lower classes of the people, oppressed and miserable, but relatively righteous; in later prophecy (Is. 14 30 32 29 19 49 13, etc.), and often in the Psalms (Ps. 22 25 35 10, etc.), they serve to denote that pious remnant, still chastened by suffering and oppression, which constituted, ideally at least, the post-exilic Israel.

Of the three terms, *'ebyōn* is the narrowest in connotation, and signifies originally 'in want'—*i.e.*, either (1) of material assistance hence 'poor,' 'indigent' (Esth. 9 22, etc.), or (2) of help in time of trouble or oppression, hence 'afflicted,' 'miserable' (Is. 25 4, etc.): the religious colouring it so often possesses (Jer. 20 13 Ps. 37 14, etc.) is due to frequent association with *dal* and *'ānī*.

Dal on the other hand has the widest range: its root-meaning is that of lowness or dependence and it signifies (1) weak, in poor condition physically (Gen. 41 19), (2) of a family, reduced, insignificant (Judg. 6 15 2 S. 3 1), (3) poor materially (Ruth 3 10 Prov. 10 15, etc.), (4) weak, oppressed, miserable, always with a religious connotation (Am. 2 7 Is. 10 2 Zeph. 3 12, etc.).

Most spiritual in significance of the three terms is *'ānī* which, whilst denoting originally 'one in a humble or servile position' (cp Ass. *enu*, Del. *Ass. HWB* 99, and Arab. *'ānin* a captive, slave), and sharing with *dal* the significations 'poor' and 'oppressed,' tends always to take on less of a material and more of a religious colouring. *'Ānī*, עני, is never opposed to *'āšīr* as poor to rich (but *dal* five times) whilst its by-form *'ānāw*, ענו has never a material significance at all.

On the relation between *'ānī* and *'ānāw* see Driver, art. 'Poor' in Hastings' *DB*, and Rahlfs, עני *und* ענו *in den Psalmen* 53 *ff.* (1892). Rahlfs' determination of the meaning of *'ānāw* by means of the form of the word is too ingenious to be assured of general acceptance, while the line of demarcation between a 'religiously coloured,' and a 'religious,' idea ('religiös gefärbter' and 'religiöser Begriff') is faint: *'ānāw* is merely a by-form of *'ānī* having its origin perhaps in textual corruption but fixed and perpetuated by a Rabbinic taste for fine distinctions. Neither *'ānī* nor *'ānāw*, however, should ever be rendered

'meek'; the cursings of Pss. 69 and 109 are inconsistent with such a rendering, and EV's rendering in Nu. 12 3, 'the man Moses was very meek (*'ānāw*)' can hardly be sustained.[1] On עני see also Lagarde, *Mittheil.*

A loan-word from the Assyrian (Eccles. 4 13 9 15 *f.*†) is מִסְכֵּן, *miskēn* (πένης) from Ass. *muškēnu*, Šafel part. from √כאן to be humble (before the deity).

In the sense of 'poor' the word passed from Assyrian into Aramaic, Hebrew, and Arabic; the Arabs brought it with them to Europe, and it appears in Italian *meschino*, Span. *mesquino*, Port. *mesquinho*, and French *mesquin*. (For another derivation of מסכן see Del. *Prol.* 186, n. 3.)

Other words for 'poor' are *ar'ar* (ערער), Ps. 102 17 (πτωχός S(1) [ταπεινός ABS(2)]), literally 'stripped,' hence 'naked,' 'destitute,' and the doubtful word *ḥēlkah*, חלכה (Ps. 10 8 10 14, 𝕾 πένης, πτωχός).

'That there is no connection with חַיִל, "host," as MT supposed, is obvious. Since Schultens (*Opera minora*, 182 *f.*) must have assumed a word חֶלְכָּה (Ew.) or חֵלְכָה (Kön. ii. 1 118), "dark," "unfortunate"; see BDB. One might also suppose חֶכְלָה; cp חכלילי and Ass. *akkulu* "troubled" (root-idea, darkness), *ikkillu* "lamentation." . . . A strange and as yet unexplained word, says Wellhausen. But we have the key to it, knowing who were the chief oppressors of the Jews in Palestine after the fall of the Jewish state. Read יְרַחְמְאֵל; cp the error in 5 5.' So Che. *Ps.*(2), who reads in 10 8*b*, עֲנִיִּים יְרַחְמְאֵל יְצַפֶּה, 'Jerahmeel watches the sufferers.'

In Lev. 25 25 35 39 (H), 25 47 27 8 (P) the verb מוּךְ, to be low, depressed, is used of impoverished Israelites (𝕾 ἀπορεῖσθαι, πένεσθαι, ταπεινὸς εἶναι, ταπεινοῦσθαι). In Gen. 45 11 (E), Prov. 20 13 23 21 30 9 the Niphal of ירשׁ, 'to dispossess' is found in the sense 'to be impoverished,' 'be poor,' unless, as is probable, the punctuation of the Massoretes is due to misunderstanding and ירשׁ is really a by-form of רושׁ, 'to be poor,' cp Piel, Judg. 14 15, לירשׁני, 𝕾 πτωχεῦσαι ἡμᾶς (A); (see for other instances of duplicate forms, Barth, *Etym. Stud.* 11).

That *'ānī* does not primarily mean 'poor' is indicated by the fact that the corresponding substantive *'ŏnī* (עֳנִי) invariably denotes 'misery,' 'wretchedness,' and only once 'poverty' (1 Ch. 22 14, 𝕾 πτωχεία), the proper Hebrew terms for which are רִישׁ, רֵישׁ or רֵאשׁ (𝕾 πενία, 7 times in Proverbs), מַחְסוֹר (Prov. 6 11 14 23, etc., 𝕾 ἔνδεια), חֶסֶר (Job 30 3 Prov. 28 22, 𝕾 ἔνδεια), cp also מִסְכֵּנֻת (Dt. 8 9, πτωχεία).

Words signifying 'poor' in the Apocryphal books are ἐνδεής, Wisd. 16 3 Tob. 2 2 (S, etc.); πένης, Wisd. 2 10 1 Esd. 3 19; πτωχός, Tob. 2 2 (𝕾), 2 3 (𝕾), 4 7 (AB), while ἔνδεια occurs Tob. 4 13 (AB), Wisd. 16 4. In the NT we have ἐνδεής, Acts 4 34; πένης, 'poor,' 2 Cor. 9 9; πενιχρός, 'poor,' Lk. 21 2; πτωχός, 'poor,' Mt. 5 3 Mk. 10 21 Lk. 4 18, and 29 times 'beggar,' Lk. 16 20 22 (but Mk. 10 46 Jn. 9 8, προσαίτης), 'beggarly,' Gal. 4 9; πτωχεία, 'poverty,' 2 Cor. 8 2 9 Rev. 2 9; ὑστέρημα, 2 Cor. 8 14 9 12, etc.; ὑστέρησις, Mk. 12 44 Phil. 4 11; χρεία, 'need,' Phil. 2 25 4 16, etc.

2. OT references.

i. In the historical and legal books the poor are the indigent, the hired servant (Dt. 24 14) who cannot wait a day for his wage (*v.* 15), the poor Israelite who has no effects but his *śalmā* (see MANTLE, § 2, 1) (*v.* 13), who has no vineyard of his own (Lev. 19 10 H) and no harvest-field (23 22 H). Although in Dt. 15 4 the promise is made 'there shall be no poor with thee,' the condition on which it turned was never fulfilled, and in view of the facts (*v.* 11) charity is enjoined (Lev. 25 35 [H], Dt. 15 7 *ff.* Ex. 23 11 [E]; see ALMS, § 2) and oppression forbidden (Dt. 24 14). The poor Israelite may neither lose his freedom (Lev. 25 39 *ff.* *v.* 47 *ff.*) nor alienate his property (*v.* 25 *ff.*). To lend to the poor on usury is unlawful (Ex. 22 25 E, Lev. 25 36 H); but a PLEDGE may be taken (Dt. 24 12) if restored at sundown (*v.* 13). Rich and poor are equal in the eye of the judge (Ex. 23 3 6 E), if not in that of the temple assessor (Lev. 14 21 27 8, but cp Ex. 30 15).

[1] Dillmann and Kautzsch, it is true, render 'sanftmüthig'; König (*Lehrgeb.* ii. 1 76), 'demuthig.' It would seem that we must render, either 'very pious' (which indeed may be the meaning of 𝕾's πραΰς) or (as We. in *EB*(9), art. 'Moses') 'heavily burdened.' The narratives do not make Moses live before us as an individual (see MOSES).

ii. It is a dark picture that meets us in the pages of the prophets. The ruling class, both in Israel and in Judah, the elders of the people and the princes thereof (Is. 3 14) with their wives, 'the kine of Bashan' (Am. 4 1, if the text is correct[1]), oppress their subjects; they sell the righteous for silver and the needy for a pair of shoes (Am. 2 6, according to MT[1]), crush the people and grind the face of the poor (Is. 3 15). The great land-owners sell the plebs bad corn, scant measure at double prices (Am. 8 5). The poor man cannot call his own life (Jer. 2 34) or honour (cp 2 S. 11 2 *ff.*) or patrimony (cp 1 K. 21 1 *ff.*). Whilst the rich lie upon beds of ivory and eat the lambs of the flock (Am. 6 4) the poor go naked and hungry (Is. 58 7), as helpless against the oppressor as the widow or the orphan (Is. 10 2 Zech. 7 10): a poor man cannot hope for justice (Am. 5 12 Is. 32 7 Jer. 5 28). And yet, to judge the cause of the poor and needy—is not this to know Yahwè? (Jer. 22 16). To feed the hungry, give shelter to the poor, clothe the naked, is not this the fast he has chosen? (Is. 58 7). To judge the poor with righteousness is significant of the Messiah (Is. 11 4).

iii. The 'poor and needy,' who figure so prominently in the Psalms (35 10 40 18 72 13 74 21 109 16, etc.) represent either the weak and oppressed Israelitish nation, or the pious in Israel afflicted by hostile nations without or the wicked within. The reference in any given case must be determined by such internal evidence as the passage may afford. That the term 'poor' was not inappropriate as a designation of Israel at the time of the exile and immediately after the 'return' may be seen from the account given in ISRAEL, §§ 45, 54 end; and that at the time of the birth of Jesus there actually was a party of pious Jews calling themselves perhaps אביונים, *'ebyōnīm*, and distinguished from the Zealots by their attitude of patient waiting, would seem to be indicated by the narrative at the beginning of Lk. (see esp. Lk. 2 25 38). Cp Renan, *Les Évangiles*, 44 *ff.*

These *'ebyōnīm* were not a political party like the Zealots; the bond between them was little more than the sympathy inspired by a common hope; and if, as is probable, their political inactivity was a necessary consequence of their poverty and social insignificance, they may well have been an earlier form of the later Ebionites. In the Psalms they are represented as suffering persecution (Ps. 10 2 102 1), but waiting patiently for Yahwè (40 2), who hears their cry (34 7), answers them (34 5), delivers them (35 10) and bestows of his goodness upon them (68 11) whilst the wicked perish (37 2).[2]

iv. In Proverbs, Ecclesiastes, and Ecclesiasticus, a store of practical wisdom has been preserved to us on the subject of poverty. The causes of the evil are found in sloth (6 11 10 4), gluttony and drunkenness 23 21), love of pleasure (21 17), or gossip (14 23), in over-carefulness (11 24), want of thoroughness (21 5), refusal of correction (13 18), the following after vain persons (28 19). The disabilities which it entails are loss of friends (19 4), the hatred of neighbours (14 20) and brethren (19 7 Ecclus. 13 21), and the liability to oppression (Pr. 28 3, where 'needy' [רָשׁ] should of course be 'wicked' [רָשָׁע], see Toy). Even great wisdom and great service cannot secure for the poor man recognition (Eccles. 9 15, an enigmatical passage). At the same time if poverty be his only crime (Pr. 10 15), it is not right to despise or mock him (17 5 Ecclus. 10 23); God made both rich and poor (Pr. 22 2). He that has pity on the poor honours God (14 31) and secures his own happiness (14 21), God will hear him when he calls (21 13). He who helps the poor shall be blessed (22 9), he shall not lack (28 27), God will repay him (19 17). The king who faithfully judges the poor, his throne shall stand for ever (29 14). It is not distinctly implied in these books that the poor man may be presumed to be pious (see, however, Ecclus. 21 5?); but a haughty poor man is asserted by Ben Sira to be incongruous and

intolerable (Ecclus. 25 2). On the propitiatory value of charity see ALMS, § 3.

The poor man is better than the fool (19 1) or the liar (19 22) or the perverse man (28 6). One advantage he has over the rich man; he has nothing to lose (13 8). But the golden mean is best of all (30 8).

From the sayings of Ben Sira (Greek version) two may be quoted here:—

(1) A poor man is glorified for his knowledge;
And a rich man is glorified for his riches.
But he that is glorified in poverty, how much more in riches?
And he that is inglorious in riches, how much more in poverty? (10 30 *f.*).

(2) Wild asses are the prey of lions in the wilderness
So poor men are pasture for rich (13 18).

For the comparison in this distich, and for remarks on its bearings, see HYÆNA.

On the position of the poor in the NT see ALMS, also COMMUNITY OF GOODS, and, on Ebionitic passages in Lk., GOSPELS, § 110.

A. C. P.

POPLAR (לִבְנֶה, 'whiteness'; cp its Syr. name *ḥaurā*). According to EV the *libneh* was one of the trees from which Jacob made white rods (Gen. 30 37, *ῥάβδον στυρακίνην, virgas populeas*); and it is referred to by Hosea as a sacred tree of the paganising Israelites, like the oak and the terebinth (Hos. 4 13, λεύκη). The poplar tree is common enough in Palestine, especially in the country about the Lebanon and Damascus. The varieties known are *Populus alba*, L., and *P. Euphratica*, Ol. (cp WILLOW), which, by the way, forbids us to identify the Baca tree of 2 S. 5 24 with the *P. tremula*[1] (cp MULBERRY). This much is clear: in Hos. 4 13, the storax cannot be intended, whereas it may be meant in Gen. 30 37 (so RVmg., Kau. *HS* etc.).

PORATHA (פּוֹרָתָא), one of the sons of HAMAN [*q.v.*] (Esth. 9 8: φαραδαθα [BL], φαρααθα [ℵ], βαρδαθα [A]). 𝔊's form may presuppose the Persian ending *-data* (*e.g.*, *purdata* 'given by fate'?), with which cp the preceding names PARSHANDATHA, ARIDATHA. See ESTHER, § 3; PURIM, § 3.

PORCH. Among the following five words, note especially 2, in connection with EHUD (*q.v.*).

1. אוּלָם or אֻלָם, *'ūlām*, αιλαμ, 1 K. 6 3 7 6 Ezek. 8 16 40 7, etc. [Co., Ki. אילם]. See PALACE, § 7, and TEMPLE. Cp אֵילָם, Ezek. 40 16 etc., αιλαμ, EV arch(es), RVmg. 'colonnade' doubtfully; Ezekiel's architecture is obscure.

2. מִסְדְּרוֹן, *misdĕrōn*, ἡ προστάς, Judg. 3 23. But 'he (or, it) went out to . . . (*hammisdĕrōnah*)' cannot be treated apart from 'and he (or, it) went out to . . . (*happarshĕdōnah*)' (*v.* 22 end), and וַיֵּצֵא הפרשדנה is one of those cases in which coarsenesses (see AV *v.* 22) are due to corruption of the text (cp DOVE'S DUNG, HUSKS, JEHU, WASHPOT). These troublesome words appear to have been caused by dittography (see *SBOT*, *ad loc.*). Neither פרשדן nor מסדרון, however, can possibly be right; some third word or phrase must underlie both. Read probably, שַׁעַר הַפִּנָּה, 'the corner gate' (see CORNER). After going out by this gate, Ehud shut up Eglon, whom he had killed, in the chamber (עֲלִיָּה).

Moore (*Judges*, 98) suggests that פרשדן, *parshĕdōn* (RVmg. 'antechamber'), may possibly represent προστῷον (a Greek gloss); cp PALACE, § 1 (3) (on ארמון in Kings). He prefers, however, to emend הַפֶּרֶשׁ (so Nö., Bu.)—*i.e.*, 'the *fæces*.' But surely the repetition of וַיֵּצֵא is very suspicious, and the view of the accidental conformation of *parshĕdōn* to *misdĕrōn* is less natural than the view here given.

3. προαύλιον (Mk. 14 16), RVmg. 'forecourt'; see HOUSE, § 2.

4. πυλών rendered 'porch' (cp προαύλιον, above) in Mt. 26 71, is elsewhere in NT rendered 'gate' (Lk. 16 20 Acts 10 17 12 13 *f.* 14 13 Rev. 21 12 *ff.*). A large gateway or portico is meant.

5. στοά, Jn. 5 2 10 23 Acts 3 11 5 12 See TEMPLE. Delitzsch ('Talmud. Studien,' *Zt. f. Luther. Theol.* 17 [1856] 622 *ff.*) even explains 'Bethesda' as בית־סמין, οἶκος στοᾶς. T. K. C.

PORCIUS FESTUS. See FESTUS.

PORCUPINE (קִפּוֹד). Is. 14 23 etc. RV, AV BITTERN, (*q.v.*).

[1] According to Boissier, this is not a Syrian tree.

PORPHYRY (בַּהַט), Esth. 1 6† RVmg. See MARBLE.

PORPOISE (תַּחַשׁ), Ezek. 16 10 Ex. 25 5 RVmg., AV BADGER.

PORTER (שׁוֹעֵר, Bibl. Aram. תָּרָע, Ezra 7 24†; nom. agent. from שׁעֵר, see GATE; θυρωρος [2 S. 4 11 2 K. 7 11 1 Esd. and in NT], πυλωρος only in LXX), used of the guardian of the gate of a city (2 S. 18 26 2 K. 7 10 *f.*), or house (Mk. 13 34 metaph. Jn. 10 3; fem. 2 S. 4 6[1] Jn. 18 16 *f.*), or of the temple.

In 1 Ch. 15 25 *f.*, however, EV has DOORKEEPERS; 'be a doorkeeper' is even retained from AV in RV of Ps. 84 10 [11] for the difficult word הסתופף. It is true the post of doorkeepers (שֹׁעֲרִים) in the temple was assigned to two Korahite families and one Merarite family according to 1 Ch. 26 1-19. It is very doubtful, however, whether הסתופף can mean 'to keep the door.' 'To keep the threshold' would be more plausible. Baudissin (*Priesterthum*, 260) conjectures that in the pre-exilic time to which he refers Ps. 84, there may have been subordinate keepers in addition to the three distinguished keepers of the threshold (2 K. 25 18, EV wrongly 'door'). Certainly the office of keeper of the threshhold cannot have existed in post-exilic times (cp Baudissin, *op. cit.* 218 *f.*), to which Ps. 84 is most reasonably assigned. Another suggested meaning is 'to lie at the threshold' (from סַף, 'threshold'). A layman—and for laymen on pilgrimage Ps. 84 is supposed to have been written—could not set foot in the temple (Bä.). 𝔊 gives παραρίπτεῖσθαι, Jer. *abiectus esse*. There are other obscurities in the verse which suggest the necessity of a close inspection of the text with a view to its amendment (cp Ch. *Ps.*(2), *ad loc.*).

The classing of the doorkeepers under the heads Korah and Merari mentioned above represents a middle stage of development. At an earlier period they were kept distinct from the singers, the Nethinim, and the Levites; and last of all they became thoroughly Levitised, and included among the Korahites and Merarites; see GENEALOGIES i., § 7 (ii.). For the post-exilic 'families' of the porters, see especially Ezra 2 42 Neh. 7 45, and note that some of the names which appear there are elsewhere those of individuals; cp 1 Ch. 9 17 Neh. 11 19 (add also Neh. 12 25, on which see MATTANIAH, 2). Originally, however, they were doubtless place-names or clan-names, and elsewhere it has been conjectured that השערים, the word rendered in EV 'porters,' is a corruption of an ethnic name, most probably of הָאַשּׁוּרִים, 'the Asshurites' (= Geshurites, see GESHUR, 2), parallel in Ezra 2 Neh. 8 to הַלְוִיִּם, 'the Levites,' and הַנְּתִינִים, a distortion of הָאֵיתָנִים, 'the Ethanites' (Che.).

POSIDONIUS (ποσιδωνιον [A], -ιδον- [V*], -ειδωνη [V a]), one of Nicanor's ambassadors to Judas the Maccabee in 161 B.C. (2 Macc. 14 19).

POSSESSION, DEMONIACAL. See DEMONS.

POSTS. The word is רָצִים, *rāṣīm*,[2] literally 'runners.' The passages in which 'posts' or 'state-messengers' are really referred to are Jer. 51 31 (διώκων, *currens*), 2 Ch. 30 6 10 (τρέχων, *cursor*), Esth. 3 13 15 (βιβλιαφόρος,

[1] A fem. שׁערת (ה) is to be read with 𝔊 and most modern critics. For female doorkeepers cp also Acts 12 13.

[2] [At first sight it appears to be the same word as that rendered 'guard' by EV in 2 K. 10 25 11 6, and by RV in 1 S. 22 17 (AV 'footmen'). It is, however, in the highest degree probable that *rāṣīm* in these passages is a mutilated form of *ṣarephāthīm* (Zarephathites), which occurs side by side with פלתי (Pelethites), just as כָּרִי (RV Carites) stands side by side with כרתי (Cherethites). That 'Cherethites' and 'Pelethites' are but conjecturally vocalised corrupt forms of 'Rehobothites' (רְחֹבֹתִי) and 'Zarephathites' (צָרְפָתִי) is maintained elsewhere (see PELETHITES). In 2 K. 10 25 we can still detect a gloss on רצים (*rāṣīm*), which asserts its equivalence to פלשתים (in MT Pĕlištīm), which again is most probably a corruption of צרפתים, Ṣarephāthīm (or פרצתים, Pāreṣāthīm?). (For לרצים ולשלישים read [לפלשתים] לרצים or לצרפתים). The case is parallel to that of הפלשתי הערל (1 S. 17 26 36), where הערל (הירחמאלי) represents a gloss on הפלשתי. See *Crit. Bib.* We must also keep out of our list of words for 'post' the corrupt word רץ in Job 9 25 (δρομεύς, *cursor*), for, probably, we have in the true text the first of three comparisons of Job's fleeting days to swiftly-flying birds (see OSSIFRAGE).—T. K. C.]

cursor), 8 10 14 (*ἱππεύς, veredarius*). In Esther the reference is no doubt to the system of posts said to have been first devised by Cyrus the Great (Xen. *Cyrop.* 8 6 17 *f.*). According to Herodotus (8 98) 'nothing mortal travels so fast as the Persian messengers.' . . . 'The Persians give this system of riding post the name of ἀγγαρήιον.' The ἄγγαροι had authority to press into their service men, horses, or anything that might serve to hasten their journey. Hence the verb ἀγγαρεύω, 'to compel,' in NT (Mt. 5 41 27 32 Mk. 15 21), and the אנגריא (ἀγγαρεία) of the Talmud. The etymology of ἄγγαρος is disputed. Andreas (in Marti's glossary) explains it 'express messenger' (*Eilbote*), and connects it (like Bibl. Aram. אִגְּרָא, Heb. אִגֶּרֶת) with Middle Iranian *hangērt*, etc., new Pers. *angāra*, 'narrative, report.' But אגרת is no doubt = Ass. *êgirtu* (see EPISTOLARY LITERATURE, § 5), and *êgirtu* is certainly not a Persian loan-word. The reverse process is much more intelligible; *i.e.*, ἄγγαρος is of Assyrian origin. Jensen,[1] however, leaves *êgirtu* (√אגר, to pay) out of the question, and derives ἄγγαρος from Ass. and Bab. *agru* (√אגר), one engaged, or pressed, for service.

Jensen argues that the etymology is excellent in itself, and also that its synonyms ἀσκάνδης, ἀσγάνδης (ἀστάνδης), and *berīd* (cp 'veredarius'?) can be satisfactorily explained only from Babylonian; cp also Rawlinson's note on Herod. 8 98.

POT. For 1. סִיר, *sīr;* 2. פָּרוּר, *pārūr;* 3. דּוּד, *dūd;* 4. קַלַּחַת, *ḳallāḥath*, see COOKING, § 5, i. *a, c, d, e;* also *ib.* § 2 for *dūd*, and POTTERY, § 3 [6] for *pārūr.*

For 5. כִּרַיִם, *kīráyim*, see COOKING, § 4.

6. אָסוּךְ, *'āsūk* (2 K. 4 2†), is used of the widow's 'pot of oil'; but אסוך (√סוך) can hardly mean 'pot' (𝔊BA, ὃ ἀλείψομαι; 𝔊L, ἀγγεῖον, but with ὃ ἀλείψ. at end of verse). אם may come from the preceding אם. We expect פַּךְ, *pak* (see BOX, 1), which Klostermann restores.

7. צִנְצֶנֶת, *ṣinṣéneth*† (Ex. 16 33, if correct), of the pot of manna, containing a homer (στάμνος; Pesh. קסטא; Onk. צְלוֹחִית). 𝔊 makes it a golden pot (στάμνον χρυσοῦν); cp Heb. 9 4.

8. גָּבִיעַ, *gābīă'*. See CUP, MEALS, § 12, and POTTERY.

9. שְׁפַתַּיִם, *š*e*phattáyim* (Ps. 68 13 [14]). See SHEEPFOLDS.

10. עֶצֶב, *'éṣeb* (Jer. 22 28†), AV 'idol' (cp IDOL, § 1 *b*), RV 'vessel' (√עצב, to fashion), RVmg. 'pot'; see POTTERY, § 3 [10].

11. מַצְרֵף, *maṣrēph* (Prov. 17 3 27 21). See METAL WORK.

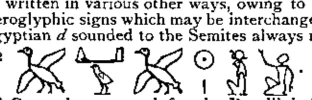
12. στάμνος (Heb. 9 4). See above, 6.

13. ξέστης (Mk. 7 4); Lat. *sextarius*. See WEIGHTS AND MEASURES.

See also PURIFICATION ('waterpots,' Jn. 2 6 *f.*), WASHPOT.

POTIPHAR (פּוֹטִיפַר; πετεφρης [ADEL], see below; *Putiphar*), a high Egyptian official, the master of Joseph, Gen. 39 1 *f.* The name is evidently only a shorter writing of POTIPHERA with which it is identified by 𝔊. On the Egyptian etymology see POTIPHERA. The position of Potiphar is described first as סָרִיס (*sārīs*) of Pharaoh. This word means 'eunuch' (𝔊, Vg.), as well as 'court-official,' (thus Tg. Onk. רבא), the most important offices having been in the Ancient Orient (cp especially Assyria) in the hand of royal slaves who were often eunuchs (cp EUNUCH). The fact of Potiphar's being married decides against the translation 'eunuch.'[2] It has to be mentioned that the word was known also to the later Egyptians in the non-sexual sense. In two rock inscriptions in the valley Hamâmât, Persian officers are called: '*srys* of Persia,' where, evidently, it means 'official.' See EGYPT, § 29, on the fact that no representation or mention of eunuchs has been found, so far, in Egypt, although it must be presupposed that the Egyptians knew eunuchs at least by contact with the neighbouring nations. The chief title of Potiphar was 'chief of the cooks' (שַׂר הַטַּבָּחִים). Thus it is correctly rendered by 𝔊 (ἀρχιμάγειρος). The attempt to explain the title as 'chief of the executioners' (already Onk. Syr.) might be supported by the imprisonment (Gen. 39 20 *f.*) at the command of Potiphar, but has no lexicographic authority. On the other hand, the inmates of the prison—viz., the baker and the butler or cup-bearer decide for the first interpretation of the title. Is the superintendent of the royal kitchen and wine-cellar intended? The inclusion of the cup-bearer under his authority might point to such an extended sphere. At any rate, the office would include the command over a host of officials and slaves so large that the holder might well have a prison of his own. For the interpretation that no private prison is meant but the general royal prison, it might be argued that the office of cup-bearer was higher in rank, at least in dynasties 19 and 20, and could not well come under the authority of the superintendent of the kitchen, so that Joseph's meeting the two royal officials in that prison would be accidental rather than due to Potiphar's position. It is not easy to find a corresponding office in the Egyptian inscriptions. The office of the 'scribe of the royal table' (*sḫ' wdḥ*) who had to register the expenses, was usually different from that of the *mr-st* 'superintendent of the kitchen,' and this one from that of the 'superintendent of the brewery' (*mr-w'bt*), etc. If the words of Genesis be taken literally, the second office would be meant. We do not, however, know the court and its officers sufficiently well in all periods to be able to deny the possibility that all those offices may once have been united in one person.

W. M. M.



[1] See P. Horn, *Grundriss d. Neupersischen Etymologie* (Strassburg, 1893), 29 254.

[2] Exceptional cases of eunuchs having wives will not alter the rule. See Ebers, *Ægypten und die Bücher Mosis*, 299 (who still retained the error of the early Egyptologists who saw eunuchs in representations of fat old men).

POTIPHERA, RV, AV **POTIPHERAH** (פּוֹטִי פֶרַע, πετρεφη [A], πετεφρη [EL], see below), an Egyptian priest of On-Heliopolis whose daughter was married to Joseph by Pharaoh (Gen. 41 45 50 46 20 †). On the fame of the learned priests of On and on that ancient city see ON. The name Potiphera is of great importance, allowing us to recognise its Egyptian etymology and to use it for criticism of the documents of the Pentateuch reporting the story of Joseph.

The consonants of the Hebrew traditions are a faultless rendering of the Egyptian name *p*[']-*edy*[*u*][1]-*p*[']-*Rē'*,[2] 'the one whom the sun-god has given'; cp Greek Heliodorus. In later pronunciation *Pedep*(*h*)*rē';* cp the rendering Πετεφρη in 𝔊EL. The Greek version treats the name Potiphar as identical, and transliterates it, consequently, in the same way. This is, undoubtedly, correct. See for the many similar names Lieblein, *Dict. of Hierogl. Names*, 1056 (the biblical name, however, which points to the local cult of Heliopolis-On is not given there). Names of the same form, 'given by god X' are, *e.g.*, the Egyptian prince *Pedubaste*(*t*) whose name Ašur-bāni-pal renders *Puṭubasti*, *Pedam*(*m*)*ûn*, which, on a bilingual sarcophagus (in Turin), is Hellenised as 'Αμμώνιος, *Pedēset*, in Greek Πετισις; Πετοσιρις, etc. On the question of the antiquity of these formations of names[3] see the discussion in *ZÄ* 30 (1892) 49 *f.* There is no doubt about their rather recent use. No example from the Mosaic time can be furnished as yet, and it is questionable whether any certain examples occur before the time of dyn. 22—*i.e.*, before 950 B.C. In the discussion referred to (*ZÄ*, 1892) it is claimed that such names become frequent only after 700 B.C., and that the writer of Joseph's life (E or E_2) who adduces the name Pedephrē' as belonging to two persons is, therefore, to be placed in the seventh century B.C. (cp JOSEPH, § 4, col. 2588 *f.*). Our material is not exhaustive enough to allow such

[1] The *u*/*w* is later always omitted. Of course, the name can be written in various other ways, owing to the great variety of hieroglyphic signs which may be interchanged. Notice that the Egyptian *d* sounded to the Semites always nearer *ṭ* than *d*.

[2] 

[3] Correctly compared first by Rosellini, *Monumenti Storici*, text i., 117 (Ebers, *Aegypten und die Bücher Mosis*, 296). Champollion, *Système Hierogl.*, had come near the truth in assuming 'the one who belongs (*et*[*e*] for earlier *ente*) to the sun'; but no similar name can be found. See also col. 3728, n. 3.

exact statements. At any rate, however, it must be confessed that in a writer of the period before 1000 B.C., the name could not appear as of characteristic frequency among the Egyptians. On the other hand, the transcription with ט and ע gives a good, archaic impression, and would militate against too extravagant attempts at bringing down the date. W. M. M.

POTSHERDS, GATE OF (שַׁעַר הַחַרְסִית, Kr.; שׁ׳ הַחַרְסוּת, Kt.), Jer. 19 2†. See JERUSALEM, § 24; cp POTTERY, § 7.

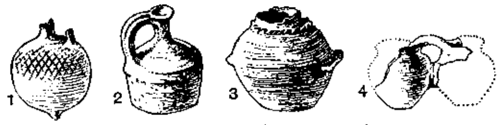

FIG. 1.—'Amorite' or pre-Israelite pottery: before 1500 B.C. (From Bliss, *Mound of Many Cities.* 1. no. 83; 2. no. 92; 4. no. 93. All handmade, with simple incised ornament.)

ably known to the Israelites from an early period, references in Hebrew literature to the manufacture and use of earthen vessels are rare, and for the most part ambiguous.

1. Introduction.

The ample vocabulary of names for vessels is derived mainly from roots descriptive of their forms or uses, not of their material; and more than once (Is. 30 14 Jer. 48 12 Lam. 4 2) an express reference to earthen vessels is attached to words which properly mean vessels of skin. Probably the earliest express reference, though vaguer phrases occur in the Hexateuch, is 2 S. 17 28, where, in a list of supplies, earthen vessels accompany (wooden) beds and (brazen) basons (cp the similar classification, Mk. 7 4, *βαπτισμοὺς ποτηρίων καὶ ξεστῶν καὶ χαλκίων*). It is only in prophetical literature that allusions to the manufacture and characteristics of pottery become at all frequent.

This all corresponds with what the history of the Israelites would lead us to expect.

2. In Egypt and Palestine.

In Egypt, it is true, pottery was in use from the pre-dynastic period onwards; and wheel-made vessels, from the time of the fourth dynasty—though handmade fabrics survived to a much later date.[1]

Into Palestine the use of the potter's wheel seems not to have been introduced until the time of the eighteenth Egyptian dynasty, and then probably from Egypt. A variety, however, of hand-made fabrics for the most part rude though characteristic, and occasionally later of some elegance, were in use among the pre-Israelite populations, and persisted among these and their conquerors after the introduction of the wheel.

The whole series of Palestinian pottery has been fully illustrated by excavations at Tell-el-Ḥesy,[2] the probable site of LACHISH [*q.v.*].

[2] Flinders Petrie, *Tell-el-Ḥesy* (1891); Bliss, *Mound of Many Cities* (1894). Cp also the 'finds' at Tell Zakariya (*PEFQ*, 1899, pp. 102 *ff.*, 1900, p. 11 *ff.*); Tell eṣ-Ṣāfieh (*ib.* 1899, pp. 324 *ff.*); Tell Sandaḥannah (*ib.* 1900, pp. 319 *ff.*), and Tell ej-Judeideh (*ib.* 1900, pp. 199 *ff.*); the examples from Jerusalem (Bliss and Dickie, *Excavations at Jerusalem* [1898], p. 261, pl. 25, Warren and Wilson, *Recovery of Jerusalem* [1871], pp. 472 *ff.*), and those figured in Per. Chip., *Art in Sardinia, Judæa, etc.*, 1 351, fig. 235 *ff.*

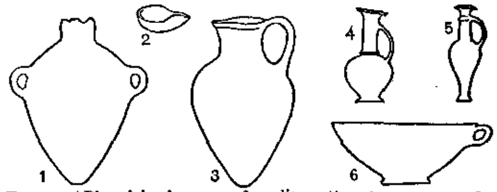

FIG. 2.—'Phœnician' or proto-Israelite pottery: 1500-1000 B.C. Scale about 1/10.
(From Petrie, *Tell el-Ḥesy.* 1. no. 124; 2. no. 137; 3. no. 125; 4. no. 115 [occurs also in Mycenæan Cyprus and in 18th dyn. Egypt]; 5. no. 141 [occurs as no. 4]; 6. no. 110. Almost all handmade, without ornament: the forms often imitated from leathern vessels.)

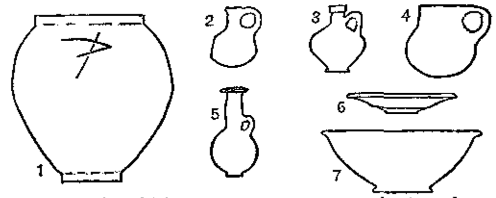

FIG. 3.—'Jewish' pottery: 1000-500 B.C.: scale about 1/10.
(From Petrie, *Tell el-Ḥesy.* 1. no. 201 [with owner's mark, א]; 2. no. 192; 3. no. 202; 4. no. 187; 5. no. 198; 6. no. 218, 7. no. 219. Often wheel-made: the forms analogous to the contemporary pottery of Cyprus, and of Carthage.)

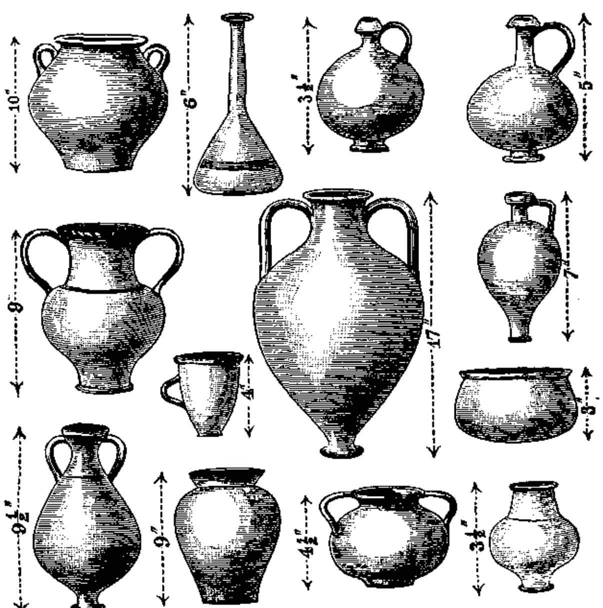

FIG. 4.—Typical Hellenistic and Græco-Roman pottery.

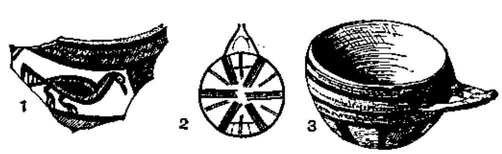

FIG. 5.—Painted pottery showing Cypriote influence.

(1. Bliss, *Mound of Many Cities*, no. 106. buff clay, red and black pigment, wheel-made, resembles Cypriote style; 800-500 B.C.: 2. Petrie, *Tell-el-Ḥesy*, no. 157. bottom view of bowl, like 3; dark clay, white slip, black pigment; hand-made; common in Cyprus, 1500-1000 B.C.: 3. Bliss, *Mound of Many Cities*, no. 181, bowl like 2.)

POTTERY

On this site occur: (1) early, rude, and apparently indigenous fabrics, all handmade, which have been provisionally described as 'Amorite' (fig. 1); (2) some characteristic varieties of the fabrics which have been described as 'Phœnician,' from their frequency in Cyprus, and in foreign settlements in Egypt of eighteenth dynasty date. They occur also occasionally on the less known Syrian mainland (fig. 2); (3) imitations, clumsy and barbaric, of the Phœnician fabrics above mentioned, which have been regarded as very probably 'Jewish,' since examples of the same style recur on a number of sites in Jewish territory. But few of these scattered examples are from undisturbed sites, and none are of accurately determinable date (fig. 3). In the chronological series, as indicated at Tell-el-Ḥesy, their upper limit approximately coincides with that of the Israelite occupation of Palestine; the lower is more vague, for the native forms are gradually modified and give place in the third and second centuries B.C. to (4) degenerate Hellenistic forms, which have persisted almost without change to the present time (fig. 4).

Painted decoration was very rarely applied to pottery either in Phœnicia, or in any other part of non-Hellenic Asia; and, when it occurs, may generally be referred either to Egyptian or to Ægean influence. One imperfect vase from Jerusalem (fig. 6 1), like a modern Egyptian *gulleh*, found only 4-6 metres (19 ft.) deep in the Mūristān (*Recovery of Jerusalem*, p. 478 *f.*, Per.-Chip. *op. cit.* 1 355, fig. 244 *f.*), and a few fragments found near Barclay's Gate and the Genneth Gate (Louvre; Pottier, *Catalogue des Vases*, 92; Per.-Chip., *op. cit.* 1 356 *f.*, fig. 246-8), and fragments from Tekoa (Brit. Mus.) and from Moab (Brit. Mus. A, 1676-77, cp H. de Villefosse, *Notice des Mon. Phén. du Louvre*, no. 7) seem to be influenced by the geometrical style of Cyprus; but their date is quite

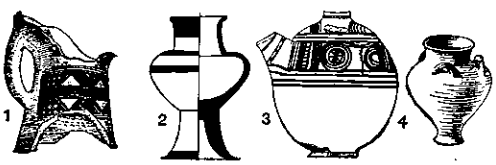

FIG. 6.—Painted pottery showing Ægean influence.

(1. Jerusalem (Muristan), Wilson and Warren, *Recovery of Jerusalem*, 478, geometrical ornament: 2. Tell Zakarīya, *PEFQ*, 1900, p. 13, pl. iii. 1, Ægean form and painted ornament: 3. Tell es Ṣāfieh, *ib.* 1899, p. 314, pl. ii., native copy of Ægean form and spiraliform ornament; on front, a bird like Fig. 5 1 above; buff clay, red and black paint: 4. Tell-el-Ḥesy, Bliss, *op. cit.* no. 179, native copy of characteristic Ægean (Mycenæan) form, unpainted.)

uncertain, and similar fragments, found in Malta (Valetta Museum) seem to be of mediæval Arab fabric. Other fragments from er-R'maīl (Louvre, H. de Villefosse, *Notice des Mon. Phén.* no. 81) have the characteristic (7th-5th cent. B.C.) Cypriote ornament of concentric circles, which occurs also at Kuyunjik on imported—probably Levantine—pottery (Brit. Mus. NH, 18, 28). At Tell-el-Hesy, painted pottery of quasi-Cypriote forms (fig. 5 1), together with the 'painted Phœnician' bowls (which are probably actually Cypriote), begins to appear about the time of the eighteenth dynasty (figs. 5 2, 5 3); but none of the 'Jewish' types are painted (fig. 3). Clear traces of the influence of the Mycenæan civilisation, probably introduced by the seafaring raiders who harried the Levant, appear during the eighteenth and nineteenth dynasties of Egypt. (See PHILISTINES, § 6 *ff.*) But this phase was short-lived.[1]

In a nomadic state, the use of brittle earthenware is reduced to a minimum, owing to the difficulties of transport. Its place is taken by vessels of leather, wood, and gourds, and by metallic utensils where commercial intercourse permits. Such pottery as there is in such circumstances is either very rude and temporary, or is imported and preserved as a luxury.[2]

3. Hebrew terms.

Thus among the Israelites, three words for vessels, *nēbel* (*nébel*), *ḥēmeth*, *nōd*, besides *'ōb*, Job 32 19, properly denote vessels of skin (see BOTTLE, § 1), whilst in the accounts both of the tabernacle and of the temple the great majority, if not all the sacred vessels were of metal (Ex. 38 3 1 K. 7 45 10 2 2 Ch. 4 16 9 20 35 13), and so at the same time of greater intrinsic value, more durable, and less liable to contract pollution (Lev. 6 28 *ff.*). For minor sacrificial purposes earthen vessels are specified more than once in the Levitical code (Nu. 5 17 Lev. 6 21 14 5 50).

The difficulty of determining the usage of the Hebrew terms is increased by the fact that, in all the versions, the words for vessels of pottery and other materials are rendered for the most part quite at random. Least of all, either in AV or RV, is the key-word 'pot' confined to earthenware; it includes vessels of wickerwork, skin, and metal. With this qualification, the following outline gives the forms and uses of pottery which are expressly mentioned in Hebrew literature.

1. כַּד, *kad* (√heave? draw water, ὑδρία, AV 'pitcher'; Gen. 24 14 Judg. 7 16 Eccles. 12 6, κάδος, *cadus*; AV 'barrel'; 1 K. 17 12 18 33) is a capacious vessel large enough to conceal a lighted torch, Judg. 7 16; cp Mt. 5 15, or to serve as a meal tub, 1 K. 17 12 *ff.* (see Robinson Lees, *Village Life in Palestine*, 1897, frontispiece). It was commonly used for carrying water, Gen. 24 14 Eccles. 12 6 1 K. 18 33; cp ὑδρία, Jn. 4 28, and was borne on the shoulder, Gen. 24 14. See COOKING, § 2.

2. בַּקְבֻּק, *baḳbūḳ*, see BOTTLE, § 2 (*a*), CRUSE, 2.

3. פַּךְ, *pak* (√drop, φάκος [lentil]; *lenticula*, EV 'vial,'; 1 S. 10 1; AV 'box,' 2 K. 9 1 3) is a lenticular flask or pilgrim bottle, with a narrow neck between small handles for suspension. The form is derived from a leathern prototype, and is common in 'Phœnician' and 'Jewish' fabrics of pottery, see fig. 2, 3 *f.*

4. גָּבִיעַ, *gābīă'* (√round; κεραμίον, *scyphus*, AV 'bowl' Jer. 35 5) is a large round bowl from which wine could be served out into cups. In Jer. 35 5 it is probably of clay (𝔊); but the same word is used Gen. 44 2 for the 'divining cup' of Joseph, which is expressly of silver (cp DIVINATION, § 3 [3]), though late Chaldæan bowls with magic inscriptions, in Brit. Mus., are of clay. See MEALS, § 12.

5. כּוֹס, *kōs* (√contain; ποτηρίον, *calix*, AV 'cup' freq.) is frequently used for a drinking-cup. Such cups were often of metal; but for common purposes clay was in use at all periods. In Mk. 7 4 ποτηρία are distinguished from ξεστά (wooden) and χαλκία (bronze) vessels, and are presumably of clay; cp κεραμίον ὕδατος, Mk. 14 13 Lk. 22 10, and Is. 30 14. See MEALS, § 12.

6. פָּרוּר, *pārūr* (√be hot; χυτρά, *olla*, 'pot' AV Nu. 11 8 Judg. 6 19 1 S. 2 14 Joel 2 6) seems always to represent the common clay cooking-pot, and is repeatedly distinguished from the metallic cauldron. Cp COOKING, § 5 (i. *c*).

7. כּוּר, *kūr* (√cook, κάμινος, *caminus*, Prov. 17 3 27 21 Is. 48 10 Ecclus. 2 5, *fornax* Dt. 4 20 1 K. 8 51 Jer. 11 4 Ezek. 22 18 20 22) is the earthen crucible or melting pot of the metallurgist (Wilk. *Anc. Eg.*); but in Lev. 11 35 the dual, lit. 'pair of crucibles,' is explained by Jewish commentators as 'a pot with its cover'; 𝔊 χυτρόποδες indicates a clay tripod, such as is occasionally found; hence EV 'range for pots,' mg. 'stewpan'; in any case the utensil was of clay, as it was to be destroyed by breaking in pieces. Cp FURNACE, § 1 (2).

For 8. צַפַּחַת, *ṣappáḥath*, and 9. צְלֹחִית, *ṣĕlōḥīth*, see CRUSE, 1, 3.

10. עָצֶב, *'éṣeb*, Jer. 22 28 (with *nāphūs*, 'broken vessel' [RVmg., 'pot,' AV 'idol'; σκεῦος, *vas fictile*]; cp IDOL, § 1 *b*). The allusion is probably to a broken terra-cotta figurine, a piece of modelled clay, cheap and fragile [cp below, § 5 (2)].

4. Potsherds.

Besides the express terms already mentioned, earthen vessels, *kĕlē ḥéreś* (כְּלִי־חֶרֶשׂ), of undefined form are recorded as being in use:—

1. For ritual purposes (Nu. 5 17 Lev. 4 5 50).

2. For cooking, frequently—*e.g.*, Lev. 6 28 [21], where it is clear that they are of unglazed clay, and consequently absorbent of contamination; cp Ezek. 24 6, where the metaphor is from cooking, and 'rust' of AV, should be 'scum.' Cp Lev. 11 35 AV, 'range for pots,' above (§ 3 7); and Is. 30 14. Cp COOKING, § 5.

3. To preserve documents, Jer. 32 14; cp buried treasure, 2 Cor. 4 7, which is frequently found thus protected.

The word *ḥéreś* (√'scratch,' ὄστρακον, *testa*, *vas fictile*) is used of a *whole* vessel, Prov. 26 23 and as adj. Lev. 6 21 11 33 14 5 50 15 12, as well as of broken pottery; as a ladle, Is. 30 14; as an extemporised brazier, *ib.*, cp Thomson, *The Land and the Book*, 522 (1868); or, on account of the sharpness of its broken edges, as a scraper, Job 2 8.

[1] Cp Welch, 'The Influence of Ægean Civilisation on South Palestine' in *PEFQ*, 1900, pp. 342 *ff.* The pottery in question was found at Tell el-Hesy (Petrie, *l.c.*, figs. 46, 145, 164-7; Bliss, *l.c.*, fig. 179); Tell eṣ-Ṣāfieh (*PEFQ*, 1899, p. 314), and Tell Zakarīya (*ib.* 1900, pp. 11-13).

[2] Niebuhr, *Voy.* 1 188; Benzinger, *Heb. Arch.* 214.

All these makeshifts may be commonly observed still in the East.

4. To these we may add the making of concrete (mod. Ar. *ḥomrah;* cp חֲסַף, *ḥăsaph*, Dan. 2 33 *ff.*, *ὄστρακον*, *fictilis*, *testa;* EV 'clay,' see § 6 below). For this purpose broken potsherds are finely pounded and mixed with lime (cp Roman *opus Signinum*). It is as if for this purpose that Jeremiah is directed to shatter the 'potter's vessel' in Jer. 19 1-11, and the process may still be seen on the same spot outside the city (Neal, *Palestine Explored*, 116 *ff.* [1882]).

Proverbially, mention is made, especially in the later books, of

5. Proverbial references.

1. The plasticity and passivity of clay in the hands of the potter; frequently—*e.g.*, Is. 29 16 45 9 64 6 Jer. 18 2 *ff.*

2. The fragility of pottery in the kiln, Ecclus. 27 5, and in use; frequently—*e.g.*, Ps. 2 9 Eccles. 12 6 Is. 30 14 45 19 Jer. 19 1-11 (cp § 4 [5]) 22 28 Rev. 2 27, cp Judg. 7 19 *f.*

3. Consequently, its small value—*e.g.*, Lam. 4 2 Zech. 4 13 Mt. 27 9.

4. Its menial uses—*e.g.*, Ps. 60 8 2 Thess. 2 20; but *not* Ps. 68 13 AV 'pots,' RV 'sheepfolds' Che. *Ps.*[1] 'dunghills'; Ps. 81 6 AV 'pots,' RV 'basket,' though the reference is, in fact, to work in a brickfield; see below, § 6.

5. Its dry and dusty texture, Ps. 22 15.

The manufacture of pottery among the Israelites may be outlined from the same later sources, especially Jer. 18 1-3 Ecclus. 38 32-34.

6. Clay.

Clay is usually חֹמֶר, *ḥômer;* πηλός, *lutum;* √חמר, 'red,' cp חֵמָר, *ḥēmār;* ἄσφαλτος, *bitumen;* from the frequent red colour of pot-clay, especially of the surface clays of the Levantine limestones; cp our chalk soil; also Bibl.-Aram. חַסְפָּא (חֲסַף, Dan. 2 33, see § 4 [5]); πηλός, *lutum;* once טִיט, *ṭîṭ;* πηλός, *lutum*, Is. 41 25, which is properly 'mud' for sun-dried bricks, Nah. 3 14, or merely 'mire.'

The clay is kneaded with the feet to the proper uniformity and consistency (Wisd. 15 7 Is. 41 25, cp Nah. 3 14, where brickmaking is meant, and Ecclus. 38 33 AVmg., 'tempereth with his feet'). Even prepared clay, however, is liable to fail on the wheel (Jer. 18 4), in which case it can be worked up afresh; or in the furnace (Ecclus. 27 5), in which case it is ruined utterly, and is cast aside among the 'wasters,' which mark the site of many ancient potteries.

The same clay, חֹמֶר, is also used to receive the impress of a seal (Job 38, cp Jer. 32 14); and for baked brick, לְבֵנָה, Gen. 11 3 Is. 45 9, cp Ezek. 4 1. See BRICK.

According to the MT the bronze castings of king Solomon were made *in the clay ground between Succoth and Zeredah, in* the plain of Jordan (2 Ch. 4 17, ἐν τῷ πάχει τῆς γῆς, *in argillosa terra*, cp 1 K. 7 46). The text is corrupt (see ADAM i.); but the Jordan furnishes a strong clay suitable for moulds. Cp BABYLONIA, § 15; BITUMEN, BRICK, CLAY, SEAL.

7. The potter.

The potter (usually יוֹצֵר, *yōṣēr;* κεραμεύς, *figulus*, *plastes;* √יצר, 'mould'; and not confined to this kind of manufacture, Is. 45 7 18; also Bibl. Aram. *peḥḥār*, פֶּחָר; *figulus*, Dan. 2 41) sits at his work, turning the wheel with his feet, and modelling the clay revolving upon it with his hands (Jer. 18 3 Ecclus. 38 32). Like many other craftsmen, the potters in Jerusalem appear to have formed a hereditary guild of the bnē SHELAH (*q.v.*), which is mentioned in 1 Ch. 4 23 at the end of an enumeration of the tribe of Judah (see GEDERAH, 2).

The Potter's Field, Aceldama (mod. Ḥaḳl ed-Damm), is traditionally situated in the lower part of the valley of Hinnom, south of Zion, where traces of former potteries are still seen. The furnaces of the valley of Hinnom were proverbial, and the area in question *may* have extended as far up the valley, and W. of Zion, as the 'Gate of Potsherds' (Jer. 19 2), if not even as far as the 'Tower of the Furnaces' (Neh. 3 11 12 38). See ACELDAMA.

The 'Gate of Potsherds' (Jer. 19 2 Krē, RVmg.) obtained its name perhaps from the waste heaps of these potteries (to which it offered direct access from the city), perhaps from general refuse heaps, as this Gate is probably identical with the Dung Gate (Neh. 2 13 3 13 *f.*), see HAKSITH, HINNOM [VALLEY OF, § 4 (2)], and JERUSALEM, § 24, col. 2423.

8. The potter's wheel.

The wheel (עַל־הָאָבְנָיִם, dual; ἐπὶ τῶν λίθων; *super rotam*, Jer. 18 3, AVmg. 'seats,' 'frames'; τρόχος, *rota*, Ecclus. 38 29; cp Ex. 1 16) appears from the Hebrew to have been originally of stone, but was, perhaps, also later of wood. Two types of wheel, both known in antiquity, and still used in the Levant, would suit the biblical passages.

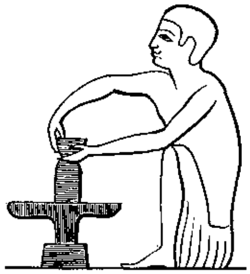

FIG. 7.—Potter's wheel turned by the hand. Egypt; about 1800 B.C.

1. That described by Abulwalid, *Heb. Roots*, Lex. (ed. Neubauer, col. 18), 'The instrument is double [expl. the dual form] upon which the potter turns earthen vessels. It consists of two wheels of wood, like a handmill; the one is larger, which is the lower one; the other is smaller, and this is the upper. This instrument is called '*obnáyim* "a pair of stones," although not made of stone, because of their being like a handmill, which is generally made of stone.' In this (fig. 7), which is the old Egyptian type (Wilk. *Anc. Eg.* 3 164; Rosellini, *Mon. Civ.* Pl. L.; Leps. *Denkm.* 2 13 126; Erman, *Life in Anc. Eg.* 457 [figure[1]), and persisted in the East, though not in NW. Africa (Abulwalid, *l.c.*); the lower 'wheel' is stationary, and serves merely as a base or pivot (Benz. *HA* 214).

2. Both wheels revolve with the same vertical axle, to which they are fixed at some distance apart. The lower is driven by the feet of the potter (Ecclus. 38 29) who sits on a bench (cp the interpretation of אָבְנַיִם in Ex. 1 16, and AVmg. in Jer. 18 3); the upper wheel, as before, supports the clay. This more advanced type is first depicted in Greece in the sixth century B.C. (*Annali dell' Instituto*, 1882, pl. U, 2; Reinach, *Repert. d. Vases Grecs*, 1 346), and has spread over all Europe, and many parts of W. Asia (fig. 8). It appears to be the wooden wheel of the Talmud (סַדָּן, *cippus*, cp 1 K. 7 30 AV 'wheels,' properly trunk of a tree; √סָדַד, bar, cp סַד, 'stocks,' Job 13 27 37 11), and is the common type now, in Syria (Thomson, *The Land and the Book*, 521, at Jaffa). Of these alternatives no. 2 suits Ecclus. 38 32 better than no. 1, as the wheel here is turned with the feet, but no. 1 by the hand, either of the potter or of an attendant (as in Harrison's work cited below, n. 1); in Jer. 18 3 either interpretation may be assumed.

9. The kiln.

The kiln (κάμινος, Ecclus. 27 5 38 34) in which pottery is baked is not clearly distinguished from the furnace of the metallurgist, or the oven of the baker. See FURNACE. The 'burning fiery furnace' of Nebuchadrezzar seems, from its large chamber, in which four men could walk, its side door (*θυρά*, *ostium*), and its moderate normal heat, to have been a pot- or brick-kiln, such as David may be supposed to have used as an instrument of torture מַלְבֵּן, (*malbēn;* πλινθεῖον, *fornax lateraria*, 2 S. 12 31; cp Jer. 43 9 Nah. 3 14).[2] On this mode of punishment see AHAB, 2 (col. 93), FURNACE. The potter's kilns represented on Egyptian (Wilk. *Anc. Eg.* 2 99 192; Rosellini, *Mon. Civ.* 2 251; Leps. *Denkm.* 2 126) and early Greek monuments (*Ann. d. Inst.*, 1882, pl. U, 1) are, how-

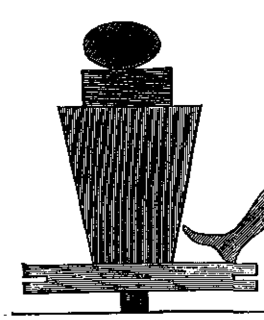

FIG. 8.—Potter's wheel, turned by the foot, showing the *two* stones. Egypt, Ptolemaic.

[1] Cp (in Greece) Harrison and MacColl, *Greek Vase Paintings*, 9.

[2] But see BRICK, § 1, n. 3; DAVID, § 11 *c.* ii., and especially *Crit. Bib.*

ever, on a much smaller scale (fig. 9). Von Ihering (*Evolution of the Aryan*, 100, 416) points out the daily necessity for public kilns, when business documents were preserved, as in Babylonia, on tablets of baked clay.

Though the name of Nebuchadrezzar's furnace refers to its smoke, a clear fire and a clean kiln are essential to the production of fine pottery, and must be maintained night and day (Ecclus. 38 34).

10. Glazing and glass.

The glazing in Ecclus. 38 34 EV (*χρίσμα* [BaאA], *χάρισμα* [B*b], *linitionem*) is properly a smearing with either slip or paint. Smearing with slip is common, in Palestine as elsewhere, on all but the commonest sorts of vessels, but would not call for special remark in this context. Smearing with paint—especially paint of a warm red colour, smeared over the whole surface of the vessel, and frequently polished by hand—is characteristic of the earlier 'Amorite' pottery (§ 2) and persists to a late date. If *χάρισμα* be read, something of the nature of a pattern must be understood (§ 2).

Actual vitrified glazing is rarely, if ever, found on Palestinian pottery before Roman times. The characteristic Egyptian glazed *faience* was imitated in Cyprus, and perhaps also in Phœnicia, from at least the beginning of the Jewish kingdom; and glazed earthenware has been found occasionally on Jewish sites, but never of certainly native fabric, or of clearly pre-exilic date. The 'earthen vessel overlaid with silver dross' of Prov. 26 23 AV has been interpreted of a crucible, or broken potsherd, on which dross has been spilt; but the Hebrew implies *intentional* 'overlaying' (cp 1 K. 6 20), and the use of dross or slag as glaze, though unsubstantiated, is not in itself unlikely, whether merely as a *tour de force*, or as a means of imitating a metallic lustre like the *bucchero nero* of early Greece and Italy.

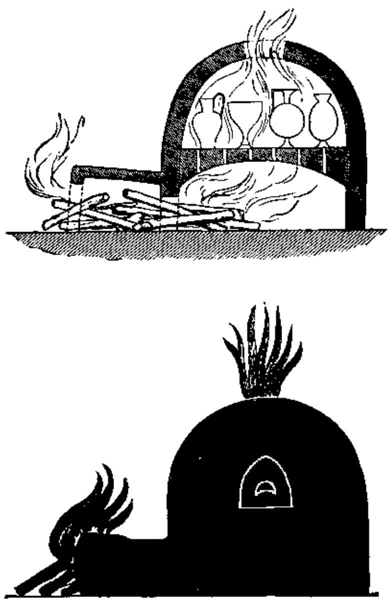

FIG. 9.—Potter's kiln; elevation and conjectural section. Early Greek: the Egyptian kiln is narrower and taller, and has no dome.

GLASS [*q.v.*] itself hardly comes into use in Palestine before late Ptolemaic times, though opaque coloured glass was made in Egypt under the eighteenth dynasty, and imitated in Cyprus and elsewhere. For Palestinian specimens of the later transparent glass see Bliss and Dickie, *Excav. at Jerus.* 362, and Per.-Chip. *op. cit.* 1 358 *f.* fig. 251 *f.* J. L. M.

POUND. 1. *Mānè* (מָנֶה; ΜΝΑ, *mina* or *mna*), Ezra 3 69, etc. Cp MANEH, and see WEIGHTS AND MEASURES.

2. *λίτρα*, Jn. 12 3 19 39. See WEIGHTS AND MEASURES.

POWDERS OF THE MERCHANT (אַבְקַת רוֹכֵל; ΚΟΝΙΟΡΤΩΝ ΜΥΡΕΨΟΥ [BאA, -ΕΨΙΚΟΥ א*], *pulveris pigmentarii*), mentioned along with myrrh and frankincense (Cant. 3 6†). See PERFUME.

POWER OF GOD (Acts 8 10), **POWERS** (Rom. 8 38 1 Cor. 15 24 Eph. 1 21). There were many *δυνάμεις*, or angelic 'powers,' of the same class, but of different degrees; Simon Magus, however, passed as 'that power of God which is called Great' (RV). It has been proposed to take *megalē* (*μεγάλη*) as a transliteration of the Samaritan name of the 'power' (מגלא or מגלי—*i.e.*, 'he who reveals').[1] But Deissmann (*Bibelstudien*, 19, n. 6) quotes from a papyrus this invocation, 'I invoke thee as the greatest power which is appointed in heaven by the Lord God.'[2] See SIMON MAGUS; ANGEL, § 1.

PRÆTOR. On the Roman office of prætor (*i.e.*, *præitor*, 'he who goes before,' 'a leader'), originally a military title, and in classical times a designation of the highest magistrates in the Latin towns, the reader may consult the works of Marquardt, Mommsen, and others; a compendious account will be found in J. G. Frazer's article 'Prætor' in *Ency. Brit.*(9) 19 655 *f.*

In Acts 16 20 22 25 for *στρατηγοί* (RV 'magistrates') RVmg. has 'Gk. prætors.' The meaning of this note is that *στρατηγοί*, the Greek name for the highest magistrates in a Roman colony, corresponded to the Lat. *prætores*. 'The title prætors was not technically accurate, but was frequently employed as a courtesy title for the supreme magistrates of a Roman colony' (Ramsay, *St. Paul*, 218). In Acts 16 19, however, there is already mention of the rulers (*ἄρχοντες*), so that the further mention of the prætors (*στρατηγοί*) is matter for surprise. Meyer-Wendt, *Comm.* 281, explains *ἄρχοντες* as 'the more general,' *στρατηγοί* 'the more specialised' expression. Ramsay admits the difficulty of the text.

'It is hardly possible,' Ramsay says, 'that *v.* 19 *f.* have the final form that the writer would have given them. The expression halts between the Greek form and the Latin, between the ordinary Greek term for the supreme board of magistrates in any city (*ἄρχοντες*), and the popular Latin designation (*στρατηγοί*, *prætores*), as if the author had not quite made up his mind which he should employ. Either of the clauses bracketed[3] is sufficient in itself; and it is hardly possible that a writer, whose expression is so concise, should have intended to leave in his text two clauses which say exactly the same thing' (217 *f.*).

Ramsay's conclusion, with regard to the authorship of the narrative that 'as usual, Luke moves on the plane of educated conversation in such matters, and not on the plane of rigid technical accuracy; he writes as the scene was enacted,' is hardly satisfactory. M. A. C.

PRÆTORIUM (ΠΡΑΙΤΩΡΙΟΝ; Syr. transliterates *pr(a)etorium*), meaning originally the tent of the commander of an army (Liv. 3 5), came to be applied to the residence, whether fixed or provisional, of the governor of a province (Cic. *Verr.* ii. 4 28), and even to the large country villas of noble Romans (Suet. *Calig.* 37; see Rich, *Dict. of Gk. and Rom. Antiqq.*). In the NT it seems to be used of the royal palaces as being temporary residences of the procurators. Thus in Acts 23 35 *πραιτ. τ.* Ἡρῴδου is taken to mean the palace of Herod in Cæsarea (AV 'Herod's judgment-hall,' RV 'Herod's palace'). According to Meyer, the same is meant by *πραιτώριον* in Phil. 1 13 (AV 'palace'); but Lightfoot has contended strongly for the meaning 'prætorian guards' (see *Philippians*, 97-100). Further, some scholars (Keim) suppose the word to be used in the Gospel narrative of Herod's palace at Jerusalem.

1. Meaning of the term.

[1] E. Klost. *Probl. im Aposteltexte*, 15 *ff.*

[2] *ἐπικαλοῦμαί σε τὴν μεγίστην δύναμιν τὴν ἐν τῷ οὐρανῷ ὑπὸ κύριου θεοῦ τεταγμένην* (Pap. Par. bibl. nat. 1275 *ff.*).

[3] They are: [and dragged them into the agora before the magistrates] and [and bringing them to the presence of the prætors].

PRAYER

2. Its occurrence in the gospels. The passages are Mk. 15 16 (EV 'Prætorium') Mt. 27 27 (AV 'the common hall') Jn. 18 28 (AV 'the hall of judgment') 33 (AV 'judgment hall') 19 9 (AV 'judgment hall'). RV has 'palace' everywhere, except Mk. where this rendering is placed in the margin. But even if we could consider the accounts in these passages reliable, the reference might more plausibly be supposed to be to the fortress of Antonia. As is justly pointed out in Meyer-Weiss, *Matth.* 484, Herod's palace would be reserved for his own use. The earliest of these passages (Mk. 15 16), however, is very vague. Jesus is said to have been led away by the soldiers 'within the court, which is the Prætorium' (ἔσω τῆς αὐλῆς, ὅ ἐστιν πραιτώριον). Here, as Brandt says, the words 'which is the Prætorium' are a strange addition and do not fit well into the text, whatever interpretation we may give to them. 'They are a gloss occasioned by the text of Matthew' (*Evang. Gesch.* 107). Mt., not understanding the words ἔσω τῆς αὐλῆς, improves the story by laying the scene at the headquarters of the Roman garrison (Mt. 27 27, παραλαβόντες τὸν Ἰησοῦν εἰς τὸ πραιτώριον συνήγαγον ἐπ' αὐτὸν ὅλην τὴν σπεῖραν). An editor of Mk. added the gloss after comparing the two accounts.

3. The account in Lk. In Lk. the passage is wanting. But the Third Gospel tells us of a trial before Herod of which no mention is made in the other gospels. Several circumstances in this narrative (the mockery by the soldiers, the gorgeous robe) suggest that it owes its origin to Mk. 15 16 = Mt. 27 27. Lk., we may suppose, had some form of Mk. before him. The words seemed to him to suggest that the scene of the mockery by the soldiers took place in the palace of Herod. He therefore introduces Herod himself into the narrative. That he realised the difficulty of the task is shown by such apologetic touches as 23 6 *f.* 12. In our earliest source, therefore, it seems very doubtful whether we have in the gospels any reference to the prætorium. On the narrative in the Fourth Gospel see PAVEMENT.

Westcott (*St. John*, Introduction, p. xii) seems to see no difficulty in the narratives. On the other hand, Brandt (*Die Evang. Gesch.* 167 *ff.*), O. Holtzmann (*Leben Jesu*, 378 espec. n. 2), and Réville (*Le Quatrième Evangile*, 265) point out divergences and difficulties in the accounts of the trial and death of Jesus as given in the Synoptists and in Jn. which seem to require us to treat this part of the Gospel story with some caution. It should be added that certain features in the narratives were perhaps suggested by the ceremonies connected with the sacrifice of the corn- and wine-god. See Frazer, *GB* (2) (2 171 *ff.*, cp. 3 138 *ff.*), and Grant Allen, *Evol. of the Idea of God* (ch. 14 *ff.*). M. A. C.

PRAYER. 1. The ordinary word for 'to pray,' הִתְפַּלֵּל, *hithpallēl*, which, like the word for 'prayer,' תְּפִלָּה, *tĕphillāh*, occurs in writings of all dates, has a root (פלל, Arab. *phalla*) meaning 'to rend' (see Wellh. *IJG*(3) 102, *Reste Arabischen Heidentums*(2), 126).

1. Words. This may possibly throw a light on the original meaning of *tĕphillah* (cp § 5). In illustration, cp Syr. אתכשף, *ethkaššaph*, lit. 'to cut oneself' (WRS, *Rel. Sem.*(2) 321, 337); also התגודד, *hithgōdēd* (see below), 1 K. 18 28 Jer. 41 5, and [so 𝔊] Hos. 7 14 (κατετέμνοντο; 'for corn and wine they cut themselves'). See CUTTINGS (§ 1 *ad fin.*), and compare with what is there said (§ 2) as to the significance of cuttings of the flesh Robertson Smith referred to above. If this is correct, we may contrast *tĕphillah* with the Ass. *ikribu*, 'prayer,' from √*karābu*, 'to show favour,' also 'to do homage,' unless, with some, we suppose an original form *ikribu* from √*ḳarābu*, 'to draw near.' See Muss-Arnolt, *s.v. ikribu*, and cp Franz Del. on Ps. 73 27 *f.*

That 'prayer,' as conceived by the early Israelites, really had a connection with cuttings of the flesh is at once suggested by the later use of טוטפות, '*ṭōṭāphōth*,' for the *tephillin*, or 'phylacteries,' if these prayer-bands are really a substitute for the sacred marks punctured in the flesh of a worshipper in primitive times (see FRONTLETS; CUTTINGS, § 7).

Compare also a striking emendation of Klostermann in 1 K. 17 21. It is usual to render וַיִּתְמֹדֵד (𝔊 ἐνεφύσησε [??], Vg. 'expandit se atque mensus est') in that passage 'stretched himself,' (EV; so Kautzsch, Kittel, etc.), which appears to rest ultimately on a comparison of Ar. *madda*, 'trahendo extendit.' The suggested reading gives this sense, 'And he cut himself for the boy three times, and called on Yahwè, and said,' etc. (נ and מ are frequently confounded.) In the parallel story in 2 K. 4 34 the same word ויתגדד may also be read for the ויגהר (𝔊^L gives both συνέκαμψεν and ιγααδ) of MT; in 1 K. 18 42 ויגהר is more plausible, because of ארצה which follows (but cp § 2). That in the case of Elisha the effectual prayer precedes, whilst in that of Elijah it follows, the physical act, makes no difference: the prayer in either case interprets the ritual cutting. Elsewhere (see PROPHECY, § 6 *f.*) it has been shown that Elijah and Elisha very possibly came from the Negeb, and that the priests of Baal who 'cut themselves' (1 K. 18 28) were probably Jerahmeelites. Elijah may therefore have 'cut himself'; the story of Elijah has older and more recent details. At any rate, the 'cuttings' of the priests of Baal were connected with the prayer, 'O Baal, answer us.'

2. Akin, apparently, to התפלל, *hithpallēl*, in root-meaning is עתר, *'āthar*, Hiph. העתיר; whence *a'tara*, *a'tira*, to sacrifice (see Wellh. *IJG*(3) 103 n.; *Reste*(2) 126, n. 5, and 142, n. 2).

In the Hexateuch only in J (Gen. 25 21, etc.); cp Judg. 13 8. But also in late passages, Job 22 27 33 26. Hence Niph. עתר, to hear prayer, Gen. 25 21 (J), 2 S. 21 14 24 25 Is. 19 22, also in 1 Ch. and Ezra. On עֲתָרַי Zeph. 3 10, EV 'my suppliants,' Vg. 'supplices mei,' but A. B. Davidson (Camb. Bible) 'mine odours (‖ מנחתי),' see *ZATW* 10 203 and *Crit. Bib.* The reading is hardly safe.

3. A different metaphor underlies [פְּנֵי] חִלָּה, *ḥillāh* [*p*e*nē*], 'to mollify, appease' (√חלה, Arab. Aram. 'to be sweet or pleasant'), Ex. 32 11 1 S. 13 12 Mal. 1 9 Ps. 45 13, etc.

4. הִתְחַנֵּן, *hithḥannēn*, to seek or implore favour (√חנן, 'to be inclined towards, to be favourable'), 1 K. 8 33 47 59 Hos. 12 5 Job 8 5; whence תְּחִנָּה, *t*e*ḥinnāh*, Ps. 6 10 55 2 and תַּחֲנוּן, *taḥănūn*, Jer. 3 21 Ps. 86 6, for both EV 'supplication.'

5. פָּגַע, *pāga'*, prop. 'to meet,' 'come upon,' Ruth 1 16 Jer. 7 16 27 18. In Is. 53 12 59 16 Jer. 36 25, EV assigns the sense 'to intercede' to the Hiphil, הפגיע, but this cannot well be sustained; 'to interpose' would be safer.

6. בעא, *bĕ'ā* (Aram.) Dan. 6 14, etc. Cp בעה, 'to seek an oracle,' Is. 21 12† (?).

7. צלא, *ṣĕlā*, prop. 'to bow'; cp. Ass. *sullû*, 'to beseech'; Aram. (in Pael), Dan. 6 11 Ezra 6 10†.

8. שִׂיחָה, *śīḥāh*, Job 15 4 (AVmg. 'speech'; RVmg. 'meditation'); Ps. 119 97 99, 'meditation.' On the former passage, see § 5.

9. לַחַשׁ, *lāḥaš*, AVmg. 'secret speech'; RVmg. 'Heb., whisper' Is. 26 16. But see *SBOT* (Heb.) *ad loc.*, and cp MAGIC.

10. רִנָּה, *rinnāh*, 'a piercing cry,' √רנן, 1 K. 8 28 (R^D), Jer. 14 12, 'when they fast I will not hear their cry,' ‖ תפלה, Jer. 7 16 11 14 Ps. 17 1 61 2. In Hebrew *rinnāh* is used both of shouts of joy and of the cry of suppliants; in Arabic, the root is used mainly of plaintive cries (*Rel. Sem.*(2) 432, n. 2).

11. שִׁוַּע, *šiwwa'*, 'to cry for help,' *e.g.*, Job 30 20 Ps. 28 2 [1]; with noun שַׁוְעָה, *šaw'āh*, Jer. 8 19 Pss. 18 7, etc.

12. זָעַק, *zā'aḳ*, same meaning, *e.g.*, Ps. 22 6 [5].

Besides many other more or less complete synonyms, such as [אלהים, יהוה] דרש, *dāraš* ['*Ĕlōhīm*, *Yahweh*], 'to seek or have recourse to,' *e.g.*, Ps. 34 5 [4], 'I sought (דרשתי) Yahwè, and he answered me.'

13. [אתי, יהוה] בקש, *biḳḳēš* ['*ōthī*, *Yahweh*], 'to seek God,' *e.g.*, Jer. 29 12 13, הִתְפַּלֵּל, *hithpallēl*, and בִּקֵּשׁ, *biḳḳēš*, parallel.

14. קרא, *ḳārā*, 'to call,' *e.g.*, Ps. 4 4 [3] 28 1.

15. שפך נפש, *šāphak nĕpheš*, 1 S. 1 15 Ps. 42 5 [4]; שפך לבב, *šāphak lēbhābh*, Ps. 62 9 [8] Lam. 2 19; and שפך שיח, *šāphak śiaḥ*, Ps. 102 1 (title), 143 3, 'to pour out the soul, the heart, a complaint.'

The commonest Greek word is εὔχομαι, προσεύχομαι, προσευχή. Δέομαι is specially frequent in Lk. and Acts; δέησις is also found there, but is commoner in the epistles. Αἰτέω, 'to ask' (cp Plat. *Euthyph.* 14, εὔχεσθαι [ἐστιν] αἰτεῖν τοὺς θεούς) is also occasionally found, *e.g.*, Mt. 6 8 7 7 11 18 19 Jn. 14 14 16 26 (note distinction from ἐρωτάω), Jas. 1 5 *f.* 1 Jn. 3 22.

Note also ἐντυγχάνω, 'to intercede (for or against any one),' Rom. 8 27 34 11 2 Heb. 7 25; also 'to pray,' Wisd. 16 28; ὑπερεντυγχάνειν, 'to intercede (for),' Rom. 8 26; with noun ἔντευξις, 1 Tim. 2 1 4 5.

Lastly [ἱκετεύω], ἱκετηρία, 'supplication,' 2 Macc. 9 18 Heb. 5 7.

2. Attitudes. No attitude or gesture was prescribed for prayer. The attitudes and gestures adopted were those natural to Orientals (cp the Assyrian and Egyptian monuments). A man might stand or kneel or perhaps sit.

PRAYER

For the first of these attitudes, see 1 S. 1 26 1 K. 8 22 54 2 Ch. 6 13 Dan. 6 10 Mt. 6 5 Mt. 11 25 Lk. 18 11; for the second, 1 K. 8 54 2 Ch. 6 13 Ezra 9 5 Dan. 6 10 [11] Lk. 22 41 Acts 7 60; for the third, 1 Ch. 17 16 (prayerful meditation?).

Whether standing or kneeling, the suppliant either lifted up his hands (Ps. 28 2 134 2 Lam. 2 19 3 41 2 Macc. 3 20), or spread them out (Ex. 9 29 Is. 1 15 1 K. 8 22 2 Ch. 6 12 *f.* Ez. 9 5), originally no doubt towards the altar,[1] but afterwards (1 K. 8 22 54 Lam. 3 41) towards heaven. There were indeed exceptions to this, as when, to express deep contrition, a man smote with his hands on his breast (Lk. 18 13 23 48 where the Curetonian and Lewis-Gibson add in both passages, saying, 'Woe to us, what has befallen us! woe to us for our sins'); or when, for a reason which we cannot easily determine, Elijah is said to have 'bowed himself down (וינהר) to the earth, and put his face between his knees' (1 K. 18 42); or when the whole body was prostrated on the ground (Gen. 24 26 Ex. 34 8 Neh. 8 6 [ויקדו וישתחוו לי׳ אפים ארצה], Judith 9 1). On the so-called *tephillīn* or phylacteries see FRONTLETS.

The exceptional attitude of Elijah in 1 K. 18 42 may perhaps represent the intensity of his feeling; 'he prays with body and soul' is Gunkel's explanation, approved by Kittel. Rosch, however, connects it with some rain-charm, and but for the following word ארצה (*'arṣāh*) we might conjecture that Elijah, like the priests of Baal, performed a ritual cutting. The text may not be quite complete. Delitzsch quotes this passage to illustrate the phrase in Ps. 35 13, 'and my prayer turned back into my bosom'—*i.e.*, as he (with the French translator Perret-Gentil) explains, 'I prayed with my head drooping over my breast.' If this is to be admitted, the canons of exegesis are strangely pliable. But can it be admitted when the whole context of Ps. 35 13 is so strongly corrupt, as the present writer at least hopes to have shown (*Ps.*(2), *ad loc.*)?

3. Times, forms, language.

In early times sacrifice and prayer often went hand in hand;[2] the latter supplied the interpretation of the former (Gen. 12 8 26 25 etc.). Still, prayer was not tied to sacrifice, and in prayer, as well as in sacrifice, the individual had much more freedom than afterwards. It was the need of religious organisation in all departments of life that introduced a change both into public and into private prayer. Three times in the day were specially appointed for prayer,[3] morning, the time of the afternoon sacrifice (about 3 p.m.), and evening.

For the second of these, compare (with Dalman) Dan. 9 21 Ezra 9 5 Judith 9 1 Acts 3 1 10 3 30 (see *PRE*(3) 7 11 and cp DAY, § 2; Schürer, *GJV*(3) 2 293, n. 40; ET ii. 1 290 *f.*, n. 248).

Only once in the Bible are the three times for prayers referred to, viz. in Dan. 6 10 [11], where Daniel is said to have 'kneeled upon his knees three times a day, and prayed (מְצַלֵּא), and given thanks before his God, because he had been wont to do it beforetime.' Some quote also Ps. 55 18 [17]; it is uncertain however (1) whether 'in the evening, in the morning, and at noonday' does not merely mean 'all day long' (so Hupf., Del., Dalman), and (2) whether the text is correct. A similar uncertainty as to the text of Ps. 54 [3] should make us hesitate to quote that passage as referring to the prayers connected with the morning-sacrifice. It may be quite true that, as Wellhausen puts it (*IJG*(3) 102), 'the altar was the wishing-place, and the sacrifice often the introduction to the bringing of some request before the deity,' but it may reasonably be doubted whether in a moment of high excitement a psalmist would have supported a fervent appeal to Yahwè by a reference to his presence (or to the presence of the true Israel) at the morning sacrifice. We can, however, refer to Ps. 141 2 'Let my prayer stand before thee as incense; mine uplifted hands as an evening oblation.'

May we suppose that the custom of saying the first prayer[4]—*i.e.* the benediction יוצר אור, and the Shema (a compound of three sections of the Pentateuch)[5]—at dawn, has any historical relation to the Zoroastrian usage of praying at daybreak, which we may of course assume to be much older than the forms of prayer given in the Khorda Avesta? It is not absolutely necessary to do so. Zealous piety might be supposed to delight in 'preventing' the sun. The author of Wisdom (16 28) clearly thought it a natural duty 'to prevent the sun to give God thanks, and at the dayspring to pray (ἐντυγχάνειν) unto him.' But the contents of the benediction יוצר אור certainly favour the view that it had partly a polemical reference to the fire-worship of Zoroastrianism,[1] and we may perhaps infer from the strange statement in Jos. *BJ* ii. 8 5, '[they offer] to it certain prayers which they have received from their forefathers, as though making a supplication for its rising' (πατρίους τινὰς εἰς αὐτὸν [sc. τὸν ἥλιον] εὐχάς, ὥσπερ ἱκετεύοντες ἀνατεῖλαι) that the Essenes were specially strict in their early prayers, and justified them by the symbolism of the dawn.[2] It is conceivable that some persons may have misunderstood this. 'The biographer of Akbar tells us how his hero "has been called a Zoroastrian, because he recognised in the sun the sign of the presence of the Almighty," and we all know how in Tertullian's time a familiar Christian custom received an equally gross misinterpretation.'[3]

The Mishna (*Yōmā*, 5 1) tells us that eight Benedictions were spoken in the temple on the Day of Atonement in the morning. From the description in *J. Yōm.* 44 *b*, they resembled the last four of the 'Eighteen Benedictions.' This famous liturgical prayer, the composite character of which is well known, together with the Hăbīnēnū and the Ḳaddīsh, are given in a convenient form by Dalman (cp § 6). There were also at an early date special prayers for Sabbaths, new moons, festivals, and half-festivals, and as we learn from *Ber.* 4 4 (*J. Ber.* 8 *a*, 9) shorter formulæ appropriated to journeys.

Words of prayers, however, are not wanting in the OT itself; see, *e.g.*, Dt. 36 5 *ff.* (liturgical), 1 K. 8 23 *ff.* Is. 63 15 *ff.* Ezra 9 6 *ff.* and Dan. 9 4 *ff.* There are also very interesting prayers and aspirations in the Book of Jeremiah (*e.g.*, 11 20 14 7-9 18 19 *ff.* 20 12), though it is possible that, where the prayers are in the name of Israel (*e.g.*, 14 7-9), they may belong not to Jeremiah himself, but to a supplementer (cp JEREMIAH [BOOK], § 18). And there are the prayers of the Psalter, underlying many of which some have ventured to suppose earlier poetic prayers indited in the name of individuals. This theory is perhaps too hazardous to be recommended.[4] The individualistic interpretation, however, naturally arose at a later time, and the Talmud contains many prayers of individual Rabbis.

That Hebrew should be the traditional language of prayer is not surprising. Not only piety, but a regard for the clearness and correctness of religious ideas may have justified the great teachers of the first three centuries of our era in preferring Hebrew prayers. Still, in Alexandria and some of the Hellenised cities of Palestine (*e.g.*, Cæsarea) the prayers of the Jews were offered in Greek. The subject led to keen discussion

1 Nowack, *Heb. Arch.* 2 260 (cp illustration 7, 1 122).
2 See Tiele, *Gifford Lectures*, 2nd ser. lect. 6.
3 See Hamburger, *Real-encycl. des Jud.* 2, 'Morgen-, Mincha-, Abend-gebet.'
4 Cp Grätz, *Gesch.* 2 2, p. 419; Zunz, *Gottesdienstl. Vorträge*(2), 382.
5 Dt. 6 4-9, with 11 13-21, and Nu. 15 37-41.

1 The Zoroastrian precept was, 'Three times a day one must worship, standing opposite the sun' (*Pahlavi Texts*, *SBE*, pt. iii.). The first prayer was to be at daybreak. Cp *Koran*, Sur. 17 80, 'Be thou steadfast in prayer from the declining of the sun until the dusk of the night, and the reading of the dawn; verily the reading of the dawn is ever testified to.' Nowhere in the Koran are the five traditional 'prescribed' (Ar. *farḍ*) times of prayer referred to. In Sur. 11 116 the 'two ends of the day and the (former and latter) parts of the night' are mentioned; in 30 17, morning, noon, and evening.
2 Cp Enoch's early prayer (Eth. Enoch 83 11 84).
3 *OPs.* 448, referring to Malleson, *Akbar*, p. 164; Tylor, *Prim. Cult.* 2 387.
4 See PSALMS, §§ 6 37. Schechter's remark, 'The inconvenient psalms of the later periods were easily neutralised by divesting them of all individualistic tendency,' *i.e.*, by those Christian scholars who had adopted a low theory of the spiritual position of Judaism (*JQR* 8 [1896] 374), can scarcely be meant to apply to all Christian scholars of this country.

in the syncdrium.[1] It may also be noticed that the early Judaism drew no sharp distinction between 'prayers' and 'praises,' and that in Ps. 72 20 (if תפלות is correct) we actually find the 'Davidic' Psalter designated 'the prayers of David the son of Jesse,' praises or thanksgivings and petitions being alike regarded as modes of influencing God—*i.e. tephillōth* (cp וַיִּתְפַּלֵּל, 1 S. 2 1, Jon. 2 2 [1]). Five psalms also are expressly entitled תְּפִלָּה, 'prayer' (17, 18, 90, 102, 142), or six including the Psalm of Habakkuk, and one of these (102) is specially called 'a psalm of the afflicted, when he is overwhelmed, and poureth out his complaint before Yahwè,' presupposing, some think, an individualistic interpretation of the psalms, and the existence of a collection, in which psalms were classified according to their applicability to particular states of mind, and therefore for private use.[2] It is strange but true that certain psalms, like the Vedic and Zoroastrian hymns, came at last to be regarded as charms.

One may admit that an equal value was not supposed to attach to all prayers. In the days preceding the great outpouring of the Spirit it could not well have been otherwise. The prayer of a prophet had a value such as that of no other man could claim.

See 1 K. 18 36 *ff.* 2 K. 19 4 (=Is. 37 4) Am. 7 2 5 Jn. 18 20; also Ex. 8 4 *ff.* (Moses and Aaron), Dt. 9 20 (Moses for Aaron), 1 S. 7 9 (Samuel for the people); cp Jer. 15 1 Ps. 99 6.

Hence the awfulness of the divine prohibition in Jer. 7 16 11 14. James, however, ventures on the statement that 'the supplication of a righteous man availeth much in its working' (*πολὺ ἰσχύει δέησις δικαίου ἐνεργουμένη*), and confirms it by a reference to the prophet Elijah (Jas. 5 16 *f.*). Similarly, Judith being a pious woman (*γυνὴ εὐσεβής*) is asked to pray for the people of Bethulia (Judith 8 31).

4. Places. As to the place where prayer might be made, it is evident that in every period (see *e.g.*, Gen. 24 26 [J] Ezra 9 5 *ff.*) wherever a faithful Israelite might be, there he might meet his God in prayer. 'Call upon me in the day of trouble' (Ps. 50 15) certainly did not mean only in temple or synagogue. Favourite places in the later period were the house-top (Judith 8 5 36 9 1 10 2 Acts 10 9; in Judith 8 5, a tent, *i.e.*, perhaps booth, on the roof); the upper chamber (*ὑπερῷον*: Dan. 6 11 [Aram. עִלִּית = Heb. עֲלִיָּה], Tob. 3 17 [cp *v.* 11], cp 2 S. 18 33); the inner chamber (*ταμεῖον*: Mt. 6 7 24 26 Lk. 12 3 24); mountains (1 K. 18 42 Mt. 14 23 Mk. 6 46 Lk. 6 12); the sea-side or the river-side (see below); and, we may presume, gardens or plantations of trees, such as Gethsemane. Naturally, however, sanctuaries were the chief places 'where prayer was wont to be made.' Such a place existed on the Mount of Olives (2 S. 15 32; see DESTRUCTION, MOUNT OF); such a place, too, in early days was the temple at Shiloh (1 S. 1 10-13). In later times great efficacy was attached (see *J. Ber.* 81) to prayer in the synagogues or *proseuchae*, which were sometimes roofed, sometimes roofless, 'like theatres' (Epiphanius), sometimes by the sea, sometimes by the river side.

Cp Jos. *Ant.* xiv. 10 23 (decree of the city Halicarnassus), ['as many men and women of the Jews as are willing so to do . . .] may make their proseuchae at the seaside, according to the customs of their forefathers,' *τὰς προσευχὰς ποιεῖσθαι παρὰ τῇ θαλάσσῃ κατὰ τὸ πάτριον ἦθος*; also the somewhat obscure passage Acts 16 13 (Paul at Philippi), *παρὰ ποταμὸν οὗ ἐνομίζομεν προσευχὴν εἶναι* (א [A] [B] C; RV, 'where we supposed there was a place of prayer'), or *οὗ ἐνομίζετο προσευχὴ εἶναι* (EHLP; AV, 'where prayer was wont to be made').[3] See SYNAGOGUE.

[1] Hamburger, *RE*, 2 353.

[2] More probably, however, עָנִי is to be understood collectively, like עָנִי זֶה in Ps. 34 7 and עני ואביון in 37 14 40 18 and similar passages.

[3] Tertullian (*Ad Nationes*, 100 13) speaks of the 'orationes litorales' of the Jews; cp also *De Jejuniis*, 100 16, 'quum omissis templis per omne litus quocunque in aperto aliquando jam precem ad cœlum mittunt.' Cf Wetstein, *Nov. Test.*, note on Acts 16 13.

But above all other places of prayer stood the temple at Jerusalem (Is. 56 7, 'my house is called [=is] a house of prayer'; cp Lk. 18 10 Acts 3 1). Those who could not go to this holy house, could at least stretch forth their hands towards it and towards the holy city (1 K. 8 38 2 Ch. 6 34 Dan. 6 10 [11] Tob. 3 11 1 Esd. 4 58; but Ps. 5 7 [8] 28 1 [2] 134 2[1] have a different meaning); one may compare the *ḳibla* of the Mohammedans. This substitute for bodily presence in the temple was not without importance for the development of a purer religion. It enabled Jews of a more advanced piety to superadd to the conception of a spiritual Israel that of a spiritual temple, and with this was naturally combined the conception, which we find in a group of psalms, of a spiritual sacrifice.[2]

5. Retrospect. Let us now look back, and see the contrast between past and present. If it be true that the word *tĕphillah* originally implied the blood-sheddings by which men thought (by sympathetic magic?) to influence the Deity, it will be readily seen what a prolonged effort was needed to purify and transform the popular conception. It is in a prophecy of Isaiah (Is. 1 15) that we first find a truly moral prayer insisted upon, but the prophet cannot have been the first to draw the all-important distinction between acceptable and unacceptable prayer; Isaiah like all other reformers must have had his predecessors (cp Gen. 24 12 15, but hardly 18 23 *ff.*), who held that magic spells (such as to the last were customary in Babylonia) were inconsistent with the elementary principles of true religion. Frazer has recently told us that 'in so far as religion assumes the world to be directed by conscious agents who may be turned from their purpose by persuasion, it stands in fundamental antagonism to magic as well as to science, both of which take for granted that the course of nature is determined, not by the passions or caprice of personal beings, but by the operation of immutable laws acting mechanically.'[3] But the prophetic religion, and its successor, the religion of the best Jews and the best Christians, is fundamentally opposed, equally with that described by Frazer, not indeed to science,[4] but at any rate to all survivals of magic.[5] And this prophetic religion, taught and practised in its purity by Jesus, pervades all the finest of the post-exilic books of the OT. As regards the sacredness of places the writers have not indeed emancipated themselves completely from archaic tradition; but as regards magic spells they have. Hence, whilst even in Zoroastrianism the conception of magic still lowered the character of public prayer,[6] in the best and truest Judaism such a conception is entirely absent.

The Book of Job is perhaps more advanced, religiously, than the Psalter, representing as it does rather a circle (or circles) of thinkers than the society of pious Israelites. One of the interlocutors in this book calls prayer a 'complaint before God'[7] (Job

[1] The worshippers here spoken of were not outside of the temple in its larger sense; they turned, however, towards the היכל in its narrower sense, *i.e.*, the דְּבִיר, which in Ps. 28 2 Driver (*Par. Psalter*) analogically renders 'chancel.'

[2] Cheyne, *Jewish Religious Life after the Exile*, 251.

[3] *Golden Bough*(2), 1 63. By 'religion' Frazer understands 'a propitiation or conciliation of powers superior to man which are believed to direct and control the course of nature and of human life.'

[4] 'This, surely, is the distinctive feature of Christian prayer—its conformity to the will of God.' G. Matheson, 'The Scientific Basis of Prayer,' *Expos.*, Nov. 1901, pp. 363 *ff.*; cp Herrmann, 'Gebet,' *PRE*(3) 6 391.

[5] On the question whether prayer was originally a magic act, see Tiele, *Gifford Lectures*, 2nd ser. lect. 6.

[6] Cp *OPs* 396 *f.* The Gâthâs, however, which are not to be disparaged because of their awkward phraseology, supply grand examples of free, spiritual, prophetic prayer.

[7] The present text of Job 15 4 is unsatisfactory. Budde (on Job 15 4*b*) renders וְתִגְרַע שִׂיחָה לִפְנֵי־אֵל, 'und zerrest Klagen vor Gottes Antlitz.' But 'draggest complaints' seems a very improbable phrase. Perhaps we should read וְתַפְרִעַ שִׂיחָה, 'and

15 4). According to him, Job, by his Titanic pride, 'abolished religion, and ignored complaint before God.' Could the poet of Job have written as he did in this and other passages, if he believed that the presence of a worshipper in a sanctuary was in any degree necessary for true prayer? The psalmists too, with all their love for the temple, recognise to a considerable extent the needs of Israelites who could not frequent the temple. It might be difficult to classify the psalms from this point of view; but we may assume that a part of them was probably written with a view to the frequenters of the prayer-houses or synagogues (see SYNAGOGUE). The Christian narrator who tells of Paul and Silas 'praying and singing hymns unto God' in the prison (Acts 16 25) acted in the spirit of the psalmists; neither he nor Paul can have been the first to regard the Psalter as the prayer-book and hymn-book of all the scattered members of the church of the true God.[1]

We turn with still greater interest to the subject of prayer in the early Christian literature, which it is now possible to study from a wider point of view, owing partly to the discovery of fresh early Christian texts and partly to the progress of Jewish and Christian study of Jewish documents. It is true, Schechter has recently complained[2] of the languid interest of Christian students in the documents which reveal the inner life of the Jews in and after the time of Jesus; but we must surely allow time for the effects of the special studies of men like G. Dalman to become more visible in Christian exegesis.[3] A comparison of the forms of the older Jewish and the older Christian prayers is not enough; we have to compare also the ideas, and as a preliminary to this we have to study such phrases as the 'hallowing of God's name,' 'the father in heaven,' 'the new world,' from a strictly Jewish point of view. As to Jewish forms, we should give special study to the 'Eighteen Benedictions,[4] (שְׁמֹנֶה עֶשְׂרֵה), which was the chief liturgical Jewish prayer at the beginning of the second century, and is said (*B. Ber.* 28 *b*) to have been redacted by Shimeon ha-Pakoli (about 110 A.D.). These Benedictions in their two recensions (Babylonian and Egyptian-Palestinian) are given in Dalman's *Worte Jesu* 1 (1898) 299-304. Next to this great composite prayer the student will find, in two recensions, the so-called 'Hăbīnēnu' (='Make us to understand') a summary of the 'Eighteen,' which, according to R. 'Aḳiba and Gamaliel II., was used at an early date instead of the longer prayer. Its short, pregnant sentences remind us of those in the Lord's Prayer. This is followed, in the same work, by the 'Ḳaddīsh'[5] ('holy,' Aram.), beginning יִתְגַּדַּל וְיִתְקַדַּשׁ שְׁמֵיהּ רַבָּא, 'Magnified and sanctified be his great name,' which also has a certain analogy to the most venerable Christian prayer.

6. Jewish and early Christian prayers.

That the Lord's Prayer has a close relation to parts of the early Jewish prayers, is undeniable, nor need one be surprised at this. Jesus knew the 'soul' of his people, but others had known it before him, and after his time too the spontaneous expression of Jewish hopes and aspirations would naturally assume a form resembling that of petitions in the Lord's Prayer. This most precious form, however,—the original extent of which is a matter for critical inquiry,—need not be discussed at length here, having been treated fully in a special article (LORD'S PRAYER). Probably the earliest Jewish-Christian prayers, if they had been preserved, would have been even more strikingly Jewish in phraseology than the Lord's Prayer.

Far more important, however, than the tradition that Jesus, like his Forerunner (Lk. 11 1, cp 5 33), gave his disciples a short specimen of a fitting prayer, is the tradition that he himself lived a life of prayer.[1] Prayer to him was not an occasional thing, to be used under the pressure of urgent need, or whenever the religious authorities might decree, but a constant aspiration towards God, which did not, however, exclude the more specialised aspiration expressed in words. There was no magic spell in it, no importunate pressing of limited earthly conceptions of what was right and necessary. There is importunity in the prayers of the psalmists; there is argument; there is persuasion. But these last relics of a provincial conception of God had disappeared from the inner life of Jesus, and therefore also from his prayers. Frazer's description of religion (see § 5) as involving the attempt to turn the director of the world from his (apparent) purpose by persuasion, will not apply to the religion of Jesus, nor can his prayers have been religious in Frazer's sense.

7. Prayer as regarded by Jesus Christ.

It is at first sight opposed to this that in Lk. 11 5-8, 18 1-8 (parables of the importunate friend and the importunate widow), Jesus may seem to recommend importunate prayer, but in the present state of the criticism of the life of Jesus we can only venture to lay stress on those fundamental elements in his inner life about which (not merely on the ground of the constant evangelical tradition, but because of the course of subsequent Christian development) no doubt is possible. Of these fundamental elements only one concerns us here, viz., the belief that God is a loving Father whose one great object in his dealings with men is the production of a perfect human character, and who will one day reward those that earnestly seek for 'righteousness.' It follows from this belief that whilst believing prayer is altogether necessary, because to be without it would prove that men had no real longing for the perfect character, stormy, importunate prayer is a proof of imperfect trust in God. 'Not my will but thine be done,' must have been the constant thought of Jesus; importunity is thereby excluded. We must never forget that, as Schmiedel has pointed out (col. 1885), 'we possess only an excessively meagre *précis* of what Jesus said,' and that we know very little indeed of the real occasion of many of his utterances, even granting the essential accuracy of the reported words. To the imperfect and spiritually uncultured men by whom Jesus was surrounded, it is credible, he may have said many things which for a disciple in some distant degree resembling himself he would have altogether recast. That the exhortation in Lk. 11 9-13 is genuine, can hardly be doubted. But if so, Mt. is surely right (see Mt. 7 7-11) in treating it as an independent passage.[2] E. von der Goltz, in his excellent monograph on early Christian prayer, sees no difficulty in admitting these two disputed parables; but surely it is wiser to admit that they are not strictly consistent with the saying 'Your father knoweth what things ye need, before ye ask him' Mt. 6 8); cp GOSPELS, § 40, col. 1792.

Throughout the Synoptic Gospels it is implied that Jesus was an extraordinarily great teacher. There is therefore nothing uncritical in supposing that he often adapted himself to the comprehension of backward and prejudiced minds, and in attaching a normative character only to his greatest sayings. One of these is certainly Mt. 6 33, 'Seek first his kingdom and his righteousness, and all these things shall be added unto you,' and it is

ignorest complaint.' Right complaints before God are approved by Eliphaz (Job 5 8); Job, however, according to him, destroys piety and ignores true devotion.

[1] On this point we are in perfect accord with Prof. Schechter.

[2] 'Some Rabbinic Parallels to the New Testament,' *JQR*, April 1900, p. 429.

[3] Perhaps it is not unfair to refer in this connection to Sanday and Headlam on the Epistle to the Romans (International Commentary).

[5] Hamburger, *Real-encycl.* 2 603-608.

[1] Even in the Fourth Gospel (the Gospel of the Incarnate Logos) the miracles of Jesus are represented as answers to prayer (Jn. 6 11 23 9 31 11 41 *f.*; cp Mk. 6 41 7 34 8 6 *f.* 9 29).

[2] Weizsäcker, *Untersuch. üb. die evang. Geschichte*(1), 158.

reasonable to believe that to his noblest scholars he uttered, not a recommendation of ἀναίδεια or importunity (such as we find in certain psalms), but something like this fine modification of the saying in Mt. 6 33 which we find in Origen, *De Orat.* c. 2 and (the first part at least) in Clem. Alex. *Strom.* i. 24 158,—'seek what is great, and the little things shall be added unto you; and seek what is heavenly, and the earthly things shall be added unto you,' αἰτεῖσθε τὰ μέγαλα καὶ τὰ μικρὰ ὑμῖν προστεθήσεται, καὶ αἰτεῖτε τὰ ἐπουράνια καὶ τὰ ἐπίγεια ὑμῖν προστεθήσεται.[1]

Altogether we may assume that the prayers which, according to Jesus, were most fully justified were those which concerned the work which each of his disciples had to do for God. It is this idea which underlies the saying in Mk. 9 29, that a specially obstinate kind of demons could only be driven out of a sufferer by prayer (to which ℵ^{cb} ACD add 'and fasting' from Mt. 17 21; cp Tob. 12 8, 'prayer is good with fasting'). It was the work of Jesus to bring men into the kingdom of God—*i.e.*, to convince men that God was their rightful king—not by argument, but partly by a self-manifestation which was virtually the revelation of God, partly by the removal of all those hindrances which opposed themselves to the divine rule.[2] Such a self-manifestation and such a removal of hindrances could not be effected without the most intense aspiration (=prayer) on the part of God's agents; on the other hand, such an aspiration (=prayer) could not but succeed. It is true, this saying of Jesus (which, if genuine, must be understood somewhat as it is here explained) was regarded in later ages as 'a receipt for the effectual driving out of demons' (so in Athanasius, *De Virg.* c. 87).[3] But an ascetic fasting and a mechanical use of prayer were far, very far, from the mind of Jesus.

It might seem as if a test of the right kind of prayer were provided by Jesus in Mt. 18 19 *f.*

'If two of you shall agree on earth concerning anything that they shall ask, it shall be done for them by my Father who is in heaven; for where two or three are assembled in my name, there am I in the midst of them.'

Really, however, the saying refers to the small beginnings of the Christian brotherhood, or perhaps to the Master's custom of sending out his disciples two and two together, Mk. 6 7 Lk. 10 1. But even so it shows that the assurance of the fulfilment of prayers is given to the disciples as Christ's assistants. The form of the saying, however, can hardly be relied upon; 'on earth' is clearly a later insertion, and the second half of the saying may possibly have been borrowed (see the parallels in Wünsche's *Neue Beiträge zur Erläuterung der Evangelien aus Talmud und Midrash*) from a Jewish source.

The contributions to the fuller conception of Christian prayer in the Johannine and Pauline writings can hardly

8. In Johannine and Pauline writings.

be considered at length without entering unduly into disputed questions of NT criticism. Contributions of the utmost value and interest they certainly are, whatever view we adopt of their historical origin. They enabled non-Jewish disciples to enter into the spirit of Jesus as such persons would otherwise have been unable to do; they present a fusion of Jewish and Hellenic ideas (using the word 'ideas' in no pale, abstract sense) which is something entirely unparalleled in religious thought, and would only have been possible to the writers on the assumption that these ideas must have been actually realised in the historical Jesus. When they speak to us of the importance of the Person of Jesus for true prayer, we hear of something which Jesus himself cannot with any critical precision be shown to have said, and yet which forced itself by an inner

[1] It must be admitted, however, that τὰ ἐπουράνια and τὰ ἐπίγεια reminds us of a saying of the Johannine Jesus (Jn. 3 12).

[2] Cp Herrmann, *Communion with God* (transl. by Stanyon), 77 *ff.*

[3] Referred to by Von der Goltz, *Das Gebet*, etc., p. 65.

necessity on the minds of the writers, as implied in the unique position of Jesus as the saviour of men.

Certainly it requires no critical acumen to see that Jesus was in the habit of requiring faith in his person before he granted the requests of sick persons, and it was a natural inference that faith in the heavenly Christ was equally necessary for disciples. But even that wonderful idealistic biographer whom tradition calls John can scarcely be quoted as favouring direct prayer to Jesus Christ. The originality of Jn. 14 14 is by no means free from doubt, because just before we find the same promise of the fulfilment of the disciples' prayers without the difficult personal pronouns 'me' and 'I.' *V.* 13 runs thus,—'and whatsoever ye shall ask in my name, that will I do, that the Father may be glorified in the Son' (καὶ ὅ τι ἂν αἰτήσητε ἐν τῷ ὀνόματί μου, τοῦτο ποιήσω, ἵνα δοξασθῇ ὁ πατὴρ ἐν τῷ υἱῷ). Then, strangely enough, comes a correction or interpretation, —'if ye shall ask me anything in my name, that will I do,' ἐάν τι αἰτήσητέ με ἐν τῷ ὀνόματί μου, ἐγὼ ποιήσω (*v.* 14). We may of course omit the με (with ADGKLM, but against ℵBEHU), but then what is the object of the repetition of the promise? One would rather omit 'in my name' but there is no manuscript authority for this. The awkwardness of 'me in my name' may perhaps be taken as a sign of non-originality. That the Fourth Gospel has passed through several phases, may surely be admitted as probable. It must also be remembered that Jesus himself is said in Jn. 4 23 to have uttered these remarkable words, which accurately represent his teaching in the Synoptic Gospels, 'The hour comes, and now is, when the true worshippers will worship the Father in spirit and in truth (reality): for such the Father seeks to worship him.'

Paul, if we may follow the great majority in accepting the Epistles to the Corinthians as his work, gives this expressive description of Christians, 'all that in every place call upon the name of our Lord Jesus Christ' (1 Cor. 1 2). Some (*e.g.*, Seeberg and Zahn) see in this a full confession of the deity of Christ, who therefore can be adored even without express reference to the Father. But it is surely more correct to paraphrase ἐπικαλουμένους thus,—'those that call upon Jesus Christ as intrusted for the salvation of men with the powers of the divine sovereignty.' As Von der Goltz rightly states (p. 100), Paul knows nothing of an adoration of Jesus Christ side by side with the adoration of God. What is characteristic of this great Christian teacher is the close relation to the Spirit into which he brings the prayers of Christian believers. The Spirit makes intercession for us (Rom. 8 26); true prayer is prayer in the Spirit (Phil. 1 19). See SPIRIT. It is the chief weapon in the Christian warfare (Eph. 6 18; Pauline?), more especially when it is practised by a whole Christian community.

That in Acts 7 59 after ἐπικαλούμενον we should understand τὸν Κύριον,[1] seems a probable view. But this passage, if it refers to Christ as the object of invocation, stands alone in the NT (Rev. 22 20 is hardly quite parallel), and, according to Harnack (*History of Dogma*, transl. by Buchanan, 1 184), there are but few examples of direct prayers to Jesus belonging to the first century, apart from the prayers in the Act. Joh. of the so-called Leucius. A valuable collection of early Christian prayers will be found in the appendix to Ed. von der Goltz's comprehensive monograph, *Das Gebet in der ältesten Christenheit* (1901). T. K. C.

PRESBYTER. The English word 'priest' is simply a contraction of the Latin *presbyter*. But, as it was commonly used to translate *sacerdos*, which the Western Church freely employed as a title of the Christian ministry, its meaning was extended to include pre-Christian senses of *sacerdos* as well; and thus a word originally signifying 'an elder' came to be used for the ministers of Jewish or heathen cults. In the AV indeed it is confined to these, and the word employed as the equivalent of *presbyter* is 'elder.'

1. Meaning.

The Greek word πρεσβύτερος, like its English equivalent 'elder,' has various shades of meaning, arising from the natural connection between age, honour, and office; and they can be distinguished only by the context in which the word occurs. In the NT the word is used in reference both to the ancient Jewish polity (§ 2) and to the new Christian Church (§§ 3 *ff.*).

2. Among the Jews.

(*a*) The earliest form of the Gospel narrative contains the phrase 'the tradition of the elders' (Mk. 7 3). Here it appears that the elders are the great religious leaders of the past; just as to-day appeal is made to 'the Fathers.' Somewhat similarly, in Heb. 11 2 we are told that 'by faith the elders obtained a good report.'

(*b*) 'Elder' is also perpetually employed in the Synoptic Gospels and Acts, in conjunction with the 'scribes,' the 'rulers' and the 'chief priests,' to describe certain officials of the community, who are also spoken of collectively as the 'presbytery' or 'body of elders' (τὸ πρεσβυτέριον).

3. In the Christian church.

(*a*) *In Acts.*—In Acts 11 30 we are suddenly introduced by the historian to 'the elders' of the church in Jerusalem. To them Barnabas and Saul bring the contributions collected in Antioch for the poorer brethren in Judæa. The persecution which the believers at Jerusalem had by this time (about 44 A.D.) begun to suffer at the hands of their countrymen had doubtless tended to emphasise their separate existence as a community; and in a community composed of Jews it would be very natural that the leading members should be spoken of as elders. Shortly after this a question of principle was raised at Antioch in reference to the circumcision of Gentile converts. Its decision was certain to be pregnant with issues for the future of the Christian church. After much discussion it was agreed to refer it to Jerusalem for settlement (Acts 15). [See COUNCIL OF JERUSALEM.] It was to 'the apostles and elders' that the delegates of the church in Antioch were sent; 'the apostles and elders' received them on their arrival; 'the apostles and the elders'—the reiteration cannot be accidental—'came together to see about this matter.' A line of action was agreed upon by 'the apostles and elders with the whole church,' and the letter sent to Antioch began thus: 'The apostles and the elder brethren to the brethren in Antioch and Syria and Cilicia that are of the Gentiles, greeting.' Later this letter is again referred to as 'the decisions of the apostles and elders that were in Jerusalem' (16 4). The expression of the letter itself differs from the phrase of the historian by the addition of a single word—'the elder *brethren*.' It is not as an official class, but as the senior members of the church, that they make their voice heard; beneath the precedence of office lies the natural precedence of age and of priority in discipleship. In fact this expression is the key to much of the difficulty that attaches to the use of the word 'elder' in the early Christian writings; a distinction is not always sharply drawn between what we may call natural and official prestige. The word occurs again on another occasion of importance. Paul arrives in Jerusalem, bearing 'the offering of the Gentiles,'—a large contribution which he has gathered among his Greek churches, and now brings, in some anxiety as to its reception, to the church in Jerusalem. His first act is to visit James. On this occasion, we are told, all the elders came together (Acts 21 18); and it was they who suggested a plan by which Paul's personal loyalty to the Mosaic law might be openly affirmed.

Even if this use of the word 'elders' in Acts,—to denote a class of men holding in the Christian church in Jerusalem a position parallel to that of the elders of the Jewish people—were regarded as the usage of a slightly later period, introduced almost unconsciously by Lk. into his narrative of earlier events; or, again, even if (on another theory) the Lucan authorship were set aside and the date of the book slightly depressed; we should still have very early evidence for the existence and title of a class of elders in Jerusalem; for the writer is notably careful in his use of official designations, and verisimilitude would at least require that he should not introduce an institution to which there was not and had not been any counterpart in the Palestinian churches. It is important to bear this in mind as we pass on to the other allusions to Christian elders in Acts.

On their return to Lystra, Iconium, and the Pisidian Antioch, after their work in Derbe, Paul and Barnabas are said to have appointed elders in each of these churches (14 23). It was in itself wholly natural that the two apostles should establish in those communities, which no doubt embraced a large number, if not a majority, of Jews and proselytes, an institution with which, as the history has related, both of them had together come personally into contact in Jerusalem. Moreover, as they were acting in a sense as the delegates of the church of Antioch, we are justified in assuming, what in itself is highly probable, that the same institution already existed in that church as well. On the journey to Jerusalem which led to his imprisonment we are told that from Miletus Paul sent to Ephesus and summoned 'the elders of the church' (20 17 *ff.*). Here then the same organisation is implied for the Ephesian church. The elders are exhorted 'to take heed to themselves and to the whole flock, wherein the Holy Spirit has set them as overseers (ἐπισκόπους)': their duty is declared to be 'to feed (ποιμαίνειν, 'to shepherd' or 'rule') the church of God.' Watchfulness is especially urged upon them in view of the certainty that 'wolves,' or false teachers, will presently attack the flock: the apostle's own example will show them how they should labour with their own hands and assist those who need their help. It is noteworthy that Paul is not represented as himself using the word 'elders' in addressing them: nor does the word occur in any sense in the Pauline Epistles, until we come to the Pastoral Epistles.

(*b*) *In Timothy and Titus.*—In 1 Tim. 4 14 'the hands of the presbytery' are said to have been laid on Timothy; thus we seem to have another reference to the elders of Lystra. In 5 1—'rebuke not an elder'—it is probable from the subsequent reference to 'younger men,' 'elder women,' and 'younger women,' that the idea of age is dominant. In *v.* 17 we have an injunction of considerable importance: 'The elders who preside well (οἱ καλῶς προεστῶτες πρεσβύτεροι) are to be accounted worthy of double honour (διπλῆς τιμῆς), especially those who labour in the word and teaching.' It is not clear whether this 'honour' is in reality an honorarium; nor whether the word 'double' is used in contrast to the provision for 'widows' mentioned just before (cp *v.* 3, χήρας τίμα, κ.τ.λ.), or in comparison with other elders, or somewhat vaguely; nor, again, whether all elders are regarded as 'presiding.' But undoubtedly a distinction is made in favour of such of the elders as exercise the gift of teaching; and it seems on the whole fair to suppose that we have here a class of men whose public services entitle them to public support. In the command which follows—not to entertain hastily a charge against an elder (*v.* 19),—it is probable that the term is used in the same sense as in the previous context.

In the Epistle to Titus we have but one instance of the word, and there it is plainly official: 'that thou shouldest appoint elders in every city, as I commanded thee' (1 5).

(*c*) 1 *Peter.*—In 1 Pet. 5 1-5 we have an example of the recognition of the two elements which co-exist in the term 'elder.' The first words are in themselves

ambiguous: 'The elders among you (or 'the elder among you,' πρεσβυτέρους οὖν ἐν ὑμῖν) I exhort, who am your fellow-elder (ὁ συμπρεσβύτερος).' The reference might be simply to age; or, again, to length of discipleship (cp 'and witness of the sufferings of Christ'). The words of *v.* 5—'Likewise, ye younger, be subject to the elder' (or 'the elders')—seem to point in a like direction. But between *vv.* 1 and 5 comes the solemn charge, 'Feed (ποιμάνατε) the flock of God that is among you,' with a warning against covetousness and despotic rule, and with the promise of a reward from 'the Head Shepherd' (ἀρχιποίμην). It is thus evident that a recognised authority is implied; and when the term 'the younger' is used of those whose duty was to obey, this is because the original significance of the word 'elder' was felt, and because the contrast between rulers and ruled was in the main a contrast between the elder and the younger members of the congregation.

(*d*) *Other Catholic Epistles.*—In the Epistle of James the sick man is bidden to call 'the elders of the church,' that they may pray over him and anoint him for his recovery. Here the institution is clearly attested, and once more for Jewish churches. It is to be observed that here as elsewhere the elders act not individually, but together; the word is never in the NT used in the singular number when any duty pertaining to the office is described.

The second and third Epistles of John are written in the name of 'the elder' (ὁ πρεσβύτερος); but they contain nothing which helps us to fix the precise meaning of the term. Nor is it easy to gain any light from the mention of the twenty-four elders in the visions of the Apocalypse. Apart from these instances the word is not used at all in the Johannine writings.

4. Summing up.

Let us endeavour now to sum up the evidence of the NT as to the meaning and usage of the word 'elder,' as applied to leading men in the Christian church. If we accept the historical character of Acts and regard the letter from the church in Jerusalem as an authentic document, we are able to trace the institution practically from the very beginning. 'The elder brethren,' as they are described in the letter, take rank below the apostles, but above the rest of the church ('the whole multitude,' πᾶν τὸ πλῆθος, Acts 15 12). The expression 'the elder brethren,' as contrasted with the more formal term 'the elders' used by the historian in his narrative, in itself supports the genuineness of the document; it could scarcely have originated with the writer of its historical setting, for five times over he reiterates his own phrase in this connection. Either, then, we may suppose that the senders of the letter purposely modify the more official title by which others spoke of them; or we may gather that at that time, while a body of leading persons actually existed as a recognised authority within the Church, they were still thought of as its senior members, rather than as formal officers strictly corresponding to the elders of the Jewish people. In the latter case we still see that it was natural and almost inevitable that the new institution should attach to itself the familiar title, and that 'the elder brethren' should become the Christian 'elders.' Our choice lies, in fact, between a conscious imitation of the old Jewish institution and an unconscious assimilation to it. The institution thus shaped in Jerusalem is seen to reproduce itself in the earliest churches of Paul's foundation. Whatever his practice may have been later, when he was guiding the Greek churches to a complete independence of Judaism, it was likely enough that in this first missionary journey he should fashion the organisation of his earliest converts on the one existing model of which alone we have any information,—that, namely, of the church in Jerusalem.

We have seen that 'the elders of the church' in Ephesus (Acts 20 17) are not so entitled in the address which the historian puts into the mouth of Paul. This is in strict harmony with the apostle's usage in all his epistles, if we except the Pastoral Epistles. That the historian, on the other hand, should speak of them as 'elders' does not necessarily imply more than that their functions were the same as were exercised by those whom he has hitherto described by this title; in other words, that they *were* 'the elders of the church,' even if they were not commonly addressed as such.

As in the case of Acts, so too in that of the Pastoral Epistles, the question of authorship and date does not seriously affect the evidence which they offer us on this subject. They cannot with any reason be placed so late as to disqualify them as witnesses to actual institutions of the close of the Apostolic age. Even a pseudonymous writer must have some regard to verisimilitude, and in laying down practical rules he will offer important testimony to the conditions of his own, if not of an earlier time. In these epistles, then, we see the same class of 'elders' spoken of for Ephesus and Crete; but we seem to see them in a later stage than that which is represented by Paul's charge to the Ephesian elders in Acts. Paul had formerly encouraged the elders to be self-supporting after his own example; he now comes before us as apparently claiming for them public maintenance, especially in the case of those who are devoting their strength to the labours of teaching. That there is no inconsistency in this is plain from his full discussion of the question in relation to his own practice in 1 Cor. 9 3-14. Incidentally we learn that it was natural and not uncommon that the elders should be not only the rulers but also the instructors of their flock; and we can see that the combination of the two functions was certain to increase the influence of the individual who should exercise them both.

5. Other official terms.

With a view to the question of the relation between the term 'elder' (πρεσβύτερος) and the term 'bishop' (ἐπίσκοπος), it is important to notice that those of the Pauline Epistles which do not contain the word 'elder' do nevertheless refer under various appellations to persons holding a prominent position in the communities to which they are written.

Thus the church of the Thessalonians, immediately after its foundation, is exhorted in these terms: 'to know them that labour among you and preside over you (προισταμένους ὑμῶν) in the Lord and admonish you; and to esteem them very highly in love for their work's sake' (1 Thes. 5 12 *f.*). Some organisation (cp Rom. 12 8, ὁ προιστάμενος ἐν σπουδῇ; 1 Tim. 3 4 *f.* 5 17), whether the title of 'elders' or any other title was connected with it or not, is certainly implied in these words. At the same time, as the second letter still more clearly shows (3 14 *f.*), the community is addressed as a whole, and is held generally responsible for the suppression of disorder among its members. The Corinthian church is likewise called upon as a whole to exercise discipline (cp esp. 1 Cor. 5 3 *ff.*); but at the same time we read of 'governments' (κυβερνήσεις) as 'set in the church' by God (12 28). 'The household of Stephanas,' who were among the earliest converts and had received baptism from Paul himself, clearly held some position of pre-eminence. They had 'devoted themselves to minister to the saints' (εἰς διακονίαν τοῖς ἁγίοις ἔταξαν ἑαυτούς): to such as these subjection was to be rendered (16 15 *f.*, cp 1 16). It is noteworthy that in epistles which deal with so many points of practical order we do not find more definite indications of a constituted authority. The lack of such an authority—if we are justified in pressing the argument from silence—may perhaps in part account for the exceptionally disturbed condition of the Corinthian church.

In the Epistle to the Galatians the main trouble is with false teachings; of organisation we hear nothing.

For the restoration of an erring brother Paul appeals to those who have a spiritual gift (ὑμεῖς οἱ πνευματικοί, 6 1; if this

be not rather intended as a designation of the whole body): the taught (ὁ κατηχούμενος) is to make contributions for the support of his teacher (τῷ κατηχοῦντι), 6 6.

In the Colossian church Archippus is to be warned to fulfil some 'ministry' (διακονίαν), which he has 'received in the Lord'; but it is not further defined. For the case of the Philippian church see BISHOP, § 7.

It would appear that in these Pauline churches such organisation as there was held a very subordinate position at this period. The church as a whole in each place had alike full powers and full responsibility for the exercise of its powers. The authority of the founder and the influence of eminent men who laboured in connection with him were the main elements of guidance, and these at present retarded the development of any local form of government which there may have been.

The Epistle to the Hebrews bids the Christians to whom it is addressed 'remember their leaders' (τῶν ἡγουμένων ὑμῶν) who have passed away, on the ground that 'they spake to them the word of God' (13 7). They are also charged to obey their present 'leaders,' as those who 'watch for their souls' (13 17). At the close the writer salutes all their 'leaders' (13 24). The word thus used is in the present day a technical term (*hegumenos*) for the head of a Greek monastery, as it was in Egypt in the fourth century; but here it must be regarded as simply a description of the ruling class in the church, and it is noticeable that honour is specially claimed for this class on the ground of the spiritual functions of teaching and 'watching for souls.'

Thus far, then, we have found three terms employed to describe the ruling class in the Christian church—'elders,' 'those who preside,' and 'those who lead.' The first appears to be an official title; the second and third are descriptive of the main function which these rulers perform. There is no ground for supposing that more than one institution is pointed to by these three terms.

The question whether the term 'bishop' (ἐπίσκοπος) describes the same or a different institution has been considered in the article BISHOP. To that article reference must also be made for patristic illustrations, and especially for the use of the word πρεσβύτερος in the Epistle of Clement of Rome.

It only remains to be said that in the second century we find the word πρεσβύτερος used by Papias (Eus. *HE* 3 39) and Irenæus (*e.g.*, iv. 27 1) in speaking of 'disciples of the Lord' or 'disciples of the apostles' from whom certain traditions had been received. This sense reminds us of the first meaning of the word to which we made reference above (§ 2) in speaking of the use of the term among the Jews. J. A. R.

PRESENCE (παρουσία), Mt. 24 3, etc., RV^mg. See ESCHATOLOGY, § 84 *ff.*

PRESENCE BREAD (לֶחֶם הַפָּנִים), Ex. 25 30, etc., RV^mg., EV SHEWBREAD (*q.v.*).

PRESIDENTS (סָרְכִין, *sārĕkīn*), Dan. 6 2-7 [3-8]†.

Most commentators take this Aramaic word to be of Persian origin = *sarak*, 'chief,' from *sār*, 'head.' See Bevan, Marti, Driver. In Tg. it is used for שֹׁטֵר. 𝔊 has τακτικός, Vg. *princeps*.

PRESS. 1. גַּת, *gath*, Is. 3 13. See OIL-PRESS, WINE-PRESS.

2. and 3. יֶקֶב, *yéḳeb*, Is. 16 10, etc., and פּוּרָה, *pūrāh*, Hag. 2 16. See WINE-PRESS, WINE-FAT.

PRIEST, a contracted form of PRESBYTER [*q.v.*], a name of office in the early Christian church. But in the EV the presbyters of the NT are called 'elders,' not 'priests'; the latter name is reserved for ministers of pre-Christian religions, the Sem. כֹּהֲנִים (*Kōhănīm*, sing. *Kōhēn*) and כְּמָרִים (*Kĕmārīm*), or the Gk. ἱερεῖς. The reason of this will appear more clearly in the sequel; it is enough to observe at present that, before our English word was formed, the original idea of a presbyter had been overlaid with others derived from pre-Christian priesthoods. The theologians of the Greek and Latin churches expressly found the conception of a Christian priesthood on the hierarchy of the Jewish temple, while the names by which the sacerdotal character is expressed—ἱερεύς, *sacerdos*—originally designated the ministers of sacred things in Greek and Roman heathenism, and then came to be used as translations into Greek and Latin of the Hebrew *Kōhēn*. *Kōhēn*, ἱερεύς, *sacerdos* are in fact fair translations of one another; they all denote a minister whose stated business was to perform, on behalf of the community, certain public ritual acts, particularly sacrifices, directed godwards. There were such ministers or priests in all the great religions of ancient civilisation, and indeed a priesthood in the sense now defined is generally found, in all parts of the world, among races which have a tribal or national religion of definite character, and not merely an unorganised mass of superstitious ideas, fears, and hopes, issuing in practices of sorcery. The term 'priest' is sometimes taken to include 'sorcerer,' just as religion is often taken to include the belief in mysterious or superhuman powers which can be constrained by spells; but this is an abuse of language. Religion begins when the relation of the divine powers to man is conceived—on the analogy of the relations of formed human society—as having a certain stable personal character on which the worshippers can calculate and act. The gods of the ancient religions might do arbitrary acts; but their conduct towards man was not habitually arbitrary. The actions on the part of individuals or of the state by which their favour was maintained, lost, or regained were matter of tradition. It was the business of the community to see that the right course of action was pursued, and on behalf of the community, with which alone properly speaking the gods had intercourse, the right kind of service was performed either by its natural head or by specially appointed officials. There is the closest connection in early times between state and religion.

1. Meaning of word.

It would be too large a task to attempt a general survey of the priesthoods, royal or other, in antiquity. It may be well, however, to notice one or two points which a comparative study of organised religions reveals to us. Priestly acts—that is, acts done by one and accepted by the gods on behalf of many—are common to all antique religions, and cannot be lacking where the primary subject of religion is not the individual but the natural community. But the origin of a separate priestly class, distinct from the natural heads of the community, cannot be explained by any such broad general principle; in some cases, as in Greece, it is little more than a matter of convenience that part of the religious duties of the state should be confided to special ministers charged with the care of particular temples, while in others the intervention of a special priesthood is indispensable to the validity of every religious act, so that the priest ultimately becomes a mediator and the vehicle of all divine grace.

2. Origin of priesthood in general.

This position, we see, can be reached by various paths; the priest may become indispensable through the growth of ritual observances and precautions too complicated for a layman to master, or he may lay claim to special nearness to the gods on the ground, it may be, of his race, or it may be of habitual practices of purity and asceticism which cannot be combined with the duties of ordinary life, as for example, celibacy was required of priestesses of Vesta at Rome.

The highest developments of priestly influence, however, are hardly separable from something of magical superstition; the *opus operatum* of the priest has the power of a sorcerer's spell. The strength of the priesthood in Chaldea and in Egypt stands plainly in the closest connection with the survival of a magic element in the state religion, and Rome, in like manner, is more priestly than Greece because it is more superstitious. In most cases, however, where an ancient civilisation shows us a strong priestly system we are unable to make out in any detail the steps by which that system was elaborated; the clearest case perhaps is the priest-

hood of the Jews, which is not less interesting from its origin and growth than from the influence exerted by the system long after the priests were dispersed and their sanctuary laid in ruins.

Among the nomadic Semites, to whom the Hebrews belonged before they settled in Canaan, there has never been any developed priesthood. The acts of religion partake of the general simplicity of desert life; apart from the private worship of household gods and the oblations and salutations offered at the graves of departed kinsmen, the ritual observances of the ancient Arabs were visits to the tribal sanctuary to salute the god with a gift of milk, first-fruits, or the like, the sacrifice of firstlings and vows (see NAZIRITE and PASSOVER), and an occasional pilgrimage to discharge a vow at the annual feast and fair of one of the more distant holy places. These acts required no priestly aid; each man slew his own victim and divided the sacrifice in his own circle; the share of the god was the blood which was smeared upon, or poured out beside, a stone (cp Ar. *noṣb*, *ghabghab*) set up as an altar or perhaps as a symbol of the deity (see MASSEBAH). It does not appear that any portion of the sacrifice was burned on the altar, or that any part of the victim was the due of the sanctuary. We find, therefore, no trace of a sacrificial priesthood; but each temple had one or more doorkeepers (*sādin*, *ḥājib*), whose office was usually hereditary in a certain family, and who had the charge of the temple and its treasures. The sacrifices and offerings were acknowledgments of divine bounty and means used to insure its continuance; the Arab was the 'slave' of his god and paid him tribute, as slaves used to do to their masters, or subjects to their lords; and the free Bedouin, trained in the solitude of the desert to habits of absolute self-reliance, knew no master except his god, and acknowledged no other will before which his own should bend.

3. Origin of Semitic priesthood.

Hence the other side of Arab religion was to look for divine direction in every grave or difficult concern of life; what could not be settled in the free council of the tribesmen, or by the unenforced award of an umpire, was referred to the command of the god, and the oracle was the only authority by which dissensions could be healed, lawsuits determined, and judgment authoritatively spoken. The voice of the god might be uttered in omens which the skilled could read, or conveyed in the inspired rhymes of soothsayers; but frequently it was sought in the oracle of the sanctuary, where the sacred lot was administered for a fee by the *sādin*. The sanctuary thus became a seat of judgment, and here, too, compacts were sealed by oaths and sacrificial ceremonies.

These institutions, though known to us only from sources belonging to an age when the old faith was falling to pieces, are certainly very ancient. Their whole stamp is primitive, and they correspond in the closest way with what we know of the earliest religion of the Israelites, the only other Semitic people whose history can be traced back to a time when they had not fully emerged from nomad life. In fact, the fundamental type of the Arabic sanctuary can be traced through all the Semitic lands, and so appears to be older than the Semitic dispersion; even the technical terms are mainly the same, so that we may justly assume that the more developed ritual and priesthoods of the settled Semites sprang from a state of things not very remote from what we find among the heathen Arabs.

Now among the Arabs, as we have seen, ritual service is the affair of the individual, or of a mass of individuals gathered in a great feast, but still doing worship each for himself and his own private circle; the only public aspect of religion is found in connection with divination and the oracle to which the affairs of the community are submitted. In Greece and Rome the public sacrifices were the chief function of religion, and in them the priesthood represented the ancient kings. In the desert there is no king and no sovereignty save that of the divine oracle, and therefore it is from the soothsayers or ministers of the oracle that a public ministry of religion can most naturally spring. With the beginning of a settled state the sanctuaries must rise in importance and all the functions of revelation will gather round them. A sacrificial priesthood will arise as the worship becomes more complex (especially as sacrifice in antiquity is a common preliminary to the consultation of an oracle); but the public ritual will still remain closely associated with oracle or divination, and the priest will still be, above all things, a revealer. That this was what actually happened, may be inferred from the fact that the Canaanite and Phœnician name for a priest (Kōhēn) is identical with the Arabic *Kāhin*, a 'soothsayer.'

Note also the intimate connection in 1 S. 6 2 between the *Kōhănīm* and the *Ḳōsĕmīm* of the Philistines. Soothsaying was no modern importation in Arabia; its characteristic form—a monotonous croon of short rhyming clauses—is the same as was practised by the Hebrew 'wizards who peeped and muttered' in the days of Isaiah (Is. 29 4), and that this form was native in Arabia is clear from its having a technical name (*saj'*), which in Hebrew survives only in derivative words with modified sense.[1]

The Kāhin, therefore, is not a degraded priest but such a soothsayer as is found in most primitive societies, and the Canaanite priests grew out of these early revealers.[2] In point of fact there appears to have been some form of revelation or oracle in every great shrine of Canaan and Syria,[3] and the importance of this element in the cultus may be measured from the fact that at Hierapolis it was the charge of the chief priest, just as in the Levitical legislation.

The use of 'Kāhin' for 'priest' in the Canaanite area points, however, to more than this; it is connected with the orgiastic character of Canaanite religion.

The soothsayer differs from the priest of an oracle by giving his revelation under excitement and often in a frenzy allied to madness. In natural soothsaying this frenzy is the necessary physical accompaniment of an afflatus which, though it seems to a rude people supernatural, is really akin to poetic inspiration. It is soon learned, however, that a similar physical state can be produced artificially, and at the Canaanite sanctuaries this was done on a large scale.

We see from 1 K. 18 2 K. 10 that the great Baal temples had two classes of ministers, kōhănīm and nĕbī'īm, 'priests' and 'prophets,' and as the kōhănīm bear a name which primarily denotes a soothsayer, so the nĕbī'īm are also a kind of priests who do sacrificial service with a wild ritual of their own. How deeply the orgiastic character was stamped on the priesthoods of N. Semitic nature-worship is clear from Greek and Roman accounts, such as that of Apuleius (*Metam.* bk. 8). Sensuality and religious excitement of the wildest kind went hand in hand, and a whole army of degraded ministers of a religion of the passions was gathered round every famous shrine.

The Hebrews, who made the language of Canaan their own, took also the Canaanite name for a priest.

4. Beginnings of the priesthood in Israel.

But the earliest forms of Hebrew priesthood[4] are not Canaanite in character; the priest, as he appears in the older records of the time of the Judges, Eli at Shiloh, Jonathan in the private temple of Micah (see MICAH) and at Dan, is much liker the

[1] *Mĕšuggā'*, 2 K. 9 11 Jer. 29 26 [Hos. 9 7]—a term of contempt applied to prophets (cp PROPHETIC LITERATURE, § 1, 3).

[2] On the relation of the Canaanite (or Hebrew) priest to the Arabian *kāhin*, see, further, Sprenger, *Leben Muhammeds*, 1 255; Stade, *GI* 1 (2) 471; Wellhausen, *Heid.* (2) 131 *ff.* Sprenger and Stade consider the priesthood to have arisen out of the seer's function. According to Wellhausen, on the other hand, the *kāhin*, who from the first had been connected with the sanctuary, with the development of the seer's office gradually took over from the priests the principal and most honourable share of their work, and at the same time their title of honour. Thus the priest at last sank to the grade of a mere door-keeper.

[3] See Lucian, *De Dea Syria*, 36, for Hierapolis; Zosimus, 1 58, for Aphaca; Pliny, *HN* 37 58 (compared with Lucian, *ut supra*, and Movers, *Phoenizier*, 1 655), for the temple of Melkart at Tyre; 1 S. 6 2, for Ekron.

[4] The pre-Mosaic priesthood, to the elucidation of which Fr. v. Hummelauer (1899) has devoted a special treatise, can still only be regarded as imaginary.

Arabian *sādin* than the *kāhin*.[1] The whole structure of Hebrew society at the time of the conquest was almost precisely that of a federation of Arab tribes, and the religious ordinances are scarcely distinguishable from those of Arabia, save only that the great deliverance of the Exodus, and the period when Moses, sitting in judgment at the sanctuary of Kadesh, had for a whole generation impressed the sovereignty of Yahwè on all the tribes, had created an idea of unity between the scattered settlements in Canaan such as the Arabs before Mohammed never had. Neither in civil nor in religious life, however, was this ideal unity expressed in fixed institutions. The old individualism of the Semitic nomad held its ground. Thus the firstlings, first-fruits, and vows are still the free gift of the individual which no human authority exacts, and every householder presents and consumes with his circle in a sacrificial feast without priestly aid.

It is thus that Gideon (Judg. 6 17 *ff.*) and Manoah (Judg. 13 19) offer sacrifice, with the express approval of Yahwè, or rather of his *Mal'āk*. As in Arabia, the ordinary sanctuary is still a sacred stone (מַצֵּבָה = *noṣb*) set up under the open heaven, and here the blood of the victim is poured out as an offering to God (see MASSEBAH and cp 1 S. 14 34 2 S. 23 16 *f.*).

The priest has no place in this ritual; he is not the minister of an altar,[2] but the guardian of a temple, such as was already found here and there in the land for the custody of sacred images and palladia or other consecrated things (the ark at Shiloh, 1 S. 3 3; images in Micah's temple, Judg. 17 5; Goliath's sword lying behind the 'ephod' or plated image at Nob [see NOB], 1 S. 21 10; no doubt also money, as in the Canaanite temple at Shechem, Judg. 9 4). Such treasures required a guardian; that they were occasionally liable to be stolen is shown by the story, just referred to, of the images in Micah's temple.

Above all, wherever there was a temple there was an oracle, a kind of sacred lot, just as in Arabia (1 S. 14 41 𝕲), which could only be drawn where there was an 'ephod' and a priest (1 S. 14 18, 𝕲; 23 6 *ff.* 30 7). The Hebrews had already possessed a tent-temple and oracle of this kind in the wilderness (Ex. 33 7 *ff.*), of which Moses was the priest and Joshua the æedituus, and ever since that time the judgment of God through the priest at the sanctuary had a greater weight than the word of a seer, and was the ultimate solution of every controversy and claim (1 S. 2 25 Ex. 22 7 *f.*, where for AV's 'judge,' 'judges,' read 'God'[3]). The temple at SHILOH, where the ark was preserved, was the lineal descendant of the Mosaic sanctuary—for it was not the place but the palladium and its oracle that were the essential thing—and its priests claimed kin with Moses himself. In the divided state of the nation, indeed, this sanctuary was hardly visited from beyond Mount Ephraim; and every man (or tribe) that cared to provide the necessary apparatus (ephod, teraphim, etc.) and hire a priest might have a temple and oracle of his own at which to consult Yahwè (Judg. 17 *f.*); but there was hardly another sanctuary of equal dignity.

The priest of Shiloh is a much greater person than Micah's priest Jonathan; at the great feasts he sits enthroned by the doorway, preserving decorum among the worshippers; he has certain legal dues, and if he is disposed to exact more no one ventures to resist (1 S. 2 12 *ff.*; see *SBOT* [Heb.]). The priestly position of the family survived the fall of Shiloh and the captivity of the ark, and it was members of this house who consulted Yahwè for the early kings until Solomon deposed Abiathar.

Indeed, though priesthood was not yet tied to one family, so that Micah's son, or Eleazar of Kirjath-jearim (1 S. 7 1), or Samuel, and perhaps by preference firstborn sons in general[1] (cp also Ex. 24 5), could all be priests, a Levite—that is, a man of Moses' tribe—was already preferred for the office elsewhere than at Shiloh (Judg. 17 13, see MICAH i., 2), and such a priest naturally handed down his place to his posterity (Judg. 18 30).

Ultimately, indeed, as sanctuaries were multiplied, and the priests all over the land came to form one well-marked class, 'Levite' and legitimate priest became equivalent expressions (see LEVITES). But between the priesthood of Eli at Shiloh, or Jonathan at Dan, and the priesthood of the Levites as described in Dt. 33 8 *ff.*, there lies a period of the inner history of which we know almost nothing.

5. Development of Israelitic priesthood under the monarchy.

It appears that the various priestly colleges regarded themselves as one order, that they had common traditions of law and ritual which were traced back to Moses, and common interests which had not been vindicated without a struggle (Dt. 33 11). The kingship had not deprived them of their functions as fountains of divine judgment. On the contrary, the decisions of the sanctuary had grown up into a body of sacred law, which the priests administered according to a traditional precedent; and when in consequence of the Deuteronomic legislation all sanctuaries except that of Jerusalem were suppressed, the more important judicial cases at least came up for decision before the priesthood of Jerusalem (Dt. 17 8 *f.*). According to Semitic ideas the declaration of law is quite a distinct function from the enforcing of it, and the royal executive came into no collision with the purely declaratory functions of the priests. Priestly functions, on the contrary, must have grown in importance with the unification and progress of the nation, and in all probability the consolidation of the priesthood into one class went hand in hand with a consolidation of legal tradition. Moreover, this work must have been well done, for, though the general corruption of society at the beginning of the Assyrian period was nowhere more conspicuous than at the sanctuaries and among the priesthood (cp, *e.g.*, Micah 3 11), the invective of Hos. 4 equally with the eulogium of Dt. 33 (the author of which was, we may safely conjecture, himself a priest) proves that the position which the later priests abused had been won by ancestors who earned the respect of the nation as worthy representatives of a divine Torah.

The ritual functions of the priesthood still appear in Dt. 33 as secondary to that of declaring the sentence of God; but they were no longer insignificant. With the prosperity of the nation, and especially through the absorption of the Canaanites and of their holy places, ritual had become much more elaborate, and in royal sanctuaries at least there were regular public offerings maintained by the king and presented by the priests (cp 2 K. 16 15). Private sacrifices, too, could hardly be offered without some priestly aid now that ritual was more complex; at the same time we find Elijah sacrificing with his own hand (1 K. 18 33), as also does Elisha

[1] This appears even in the words used as synonyms for 'priest,' שֹׁמֵר הַסַּף, מְשָׁרֵת, which exactly correspond to the Ar. *sādin* and *ḥājib*. That the name of כֹּהֵן was borrowed from the Canaanites appears certain, for out of the multiplicity of words for soothsayers and the like common to Hebrew and Arabic (either formed from a common root or expressing exactly the same idea: יִדְּעֹנִי, *'arrāf*; חֹבֵר, *ḥabir*; חֹזֶה, רֹאֶה, *ḥāzi*; קֹסֵם, cp *istiḳsām*) the Hebrews and the Canaanites have chosen the same one to mean a priest. That they did so independently is, in view of the great difference in character between old Hebrew and Canaanite priesthoods, inconceivable. Besides כֹּהֵן Hebrew has the word כֹּמֶר (pl. כְּמָרִים), which, however, is hardly applied to priests of the national religion (see CHEMARIM).

[2] For the opposite view cannot be urged the etymology of the word Kōhēn as if, possibly derived from כּוּן, it meant from the first 'one who served God at the altar' (Baudissin, 269) or even 'one who sets in order (הֵכִין) the offering (so, for example, Ewald). It is not clear from 1 S. 2 15 whether even at Shiloh the priest had anything to do with sacrifice, whether those who burned the fat were the worshippers themselves or some subordinate ministers of the temple.

[3] [Ex. 21 6 to which WRS also refers perhaps does not belong to this connection; for אֱלֹהִים there possibly denotes the ancestral image; see Schwally, *Leben nach dem Tode*, 38 *f.*; and cp further, Smend, *Rel.-gesch.*(2) 77, n. 3.]

[1] So Baudissin, 267; on the other side, on the alleged priesthood of David's sons (2 S. 8 18), see also Cheyne, in *Expos.*, 1899, pp. 453-457, also MINISTER [CHIEF].

(1 K. 19 21). The provision of Dt. 18 as to the priestly dues is certainly ancient, and shows that besides the tribute of firstfruits and the like the priests had a fee in kind for each sacrifice, as we find to have been the case among the Phœnicians, according to the sacrificial tariff of Marseilles. Their judicial functions also brought profit to the priests, fines being exacted for certain offences and paid to them (2 K. 12 17 Hos. 4 8 Am. 2 8); they also, as we learn from Micah's reproach (3 11), exacted payment for imparting the Torah. The greater priestly offices were therefore in every respect very important places, and the priests of the royal sanctuaries were among the grandees of the realm. As such they were on the other hand largely dependent on the kings (cp 1 S. 2 35 Am. 7 13 2 K. 12 5 *ff.* 16 11 *ff.*), and this close dependence on the monarchy was actually the cause of different development in the cases of the Israelitic and Judaic priesthood. Whilst in the northern kingdom the priesthood became involved in the fall of a dynasty (2 K. 10 11), in Judah it gradually rose with the stability of the royal house to an ever-increasing stability of its own (see specially the story of Jehoiada in 2 K. 11 4 *ff.*). The great priests seem to have had the patronage of the minor sacred offices, which were often miserable enough,[1] the petty priest depending largely on what 'customers' he could find (2 K. 12 7 [8] Dt. 18 8). That at least the greater offices were hereditary was almost a matter of course as society was then constituted. This is already seen in the case of the family of Eli, which, to judge by the name of his son Phinehas (1 S. 4 19), probably traced its descent to Phinehas b. Eleazar (Josh. 22 13 *ff.* 24 33), as also in the case of the sons of Zadok, who succeeded to the royal priesthood in Jerusalem after the fall of Abiathar. There is not the slightest trace, however, of an hereditary hierarchy officiating by divine right, such as there was after the exile. The sons of Zadok, the priests of the royal chapel, were the king's servants as absolutely as any other great officers of the state; they owed their place to the fiat of king Solomon, and the royal will was supreme in all matters of cultus; indeed the monarchs of Judah, like those of Israel (1 K. 12 33) and of other nations, did sacrifice in person when they chose down to the time of the captivity (1 K. 9 25 2 K. 16 12 *f.*; cp 2 Ch. 26 16 *ff.* Jer. 30 21). And as the sons of Zadok had no divine right as against the kings, so too they had no claim to be more legitimate than the priests of the local sanctuaries, who also were reckoned to the tribe which, in the seventh century B.C., was recognised as having been divinely set apart as Yahwè's ministers in the days of Moses (Dt. 10 8 18 1 *f.*).

That at the same time there must have been certain gradations of rank among the sons of Zadok even in the pre-exilic period, at least during the later monarchy, is self-evident. *One* priest stands at their head (*Kōhēn hā-rōsh*,[2] 2 K. 25 18, or simply 'the' *Kōhēn*, 2 K. 12 8 10; the name 'high priest,' however, occurs first, it would seem, in Haggai). Next to him the *Kōhēn mishneh* (2 K. 25 18)[3] holds the second place. The existence of definite special offices is indicated by such designations as those of a *pāḳīd nāgīd* or chief overseer in the temple (Jer. 20 1) or of the 'keepers of the threshold' (2 K. 23 4). On the other hand, the expression *ziḳnē hak-kōhănīm*, 'the elders of the priests' (2 K. 19 2 Jer. 19 1), points to a gradation of the Zadokites according to their several families.[4]

6. Steps towards the post-exilic hierarchy.

The steps which prepared the way for the post-exilic hierarchy, the destruction of the northern sanctuaries and priesthoods by the Assyrians, the polemic of the spiritual prophets against the corruptions of popular worship, which issued in the reformation of Josiah, the suppression of the provincial shrines of Judah, and the transference of their ministers to Jerusalem, the successful resistance of the sons of Zadok to the proposal to share the sanctuary on equal terms with these newcomers, and the theoretical justification of the degradation of the provincials to the position of mere servants in the temple supplied by Ezekiel soon after the captivity, are explained elsewhere (see LEVITES), and only one or two points call for additional remark here.

It is instructive to observe how differently the prophets of the eighth century speak of the judicial or 'teaching' functions of the priests and of the ritual of the great sanctuaries. For the ritual they have nothing but condemnation; but the 'teaching' they acknowledge as part of the divine order of the state, while they complain that the priests have prostituted their office for lucre. In point of fact, the one rested on old Hebrew tradition, the other had taken shape mainly under Canaanite influence, and in most of its features was little more than the crassest nature-worship. In this respect there was no distinction between the temple of Zion and other shrines, or rather it was just in the greatest sanctuary with the most stately ritual that foreign influences had most play, as we see alike in the original institutions of Solomon and in the innovations of Ahaz (2 K. 16 10 *ff.* 23 11 *ff.*).

The Canaanite influence on the later organisation of the temple is clearly seen in the association of temple prophets with the temple priests under the control of the chief priest, which is often referred to by Jeremiah; even the viler ministers of sensual worship, the male and female prostitutes of the Phœnician temples, had found a place on Mt. Zion, and were only removed by Josiah's reformation.[1] So too, the more complex sacrificial ritual which was now in force is manifestly not independent of the Phœnician ritual as we know it from the Marseilles tablet. All this necessarily tended to make the ritual ministry of the priests more important than it had been in old times; but it was in the dark days of Assyrian tyranny, in the reign of Manasseh, when the sense of divine wrath lay heavy on the people, when the old ways of seeking Yahwè's favour had failed and new and more powerful means of atonement were eagerly sought for (Micah 6 6 *f.* 2 K. 21; and cp MOLECH), that sacrificial functions reached their full importance.

In the time of Josiah altar service and not the function of 'teaching' had become the essential thing in priesthood (Dt. 10 8 18 7); the 'teaching,' indeed, is not forgotten (Jer. 2 8 18 18 Ezek. 7 26), but by the time of Ezekiel it also has mainly to do with ritual, with the distinction between holy and profane, clean and unclean, with the statutory observances at festivals and the like (Ezek. 44 23 *f.*). What the priestly Torah was in the exilic period can be seen from the collection of laws in Lev. 17-26 (LEVITICUS, §§ 13-23), which includes many moral precepts, but regards them, equally with ritual precepts, from the point of view of the maintenance of national holiness. The sacrificial ritual of the Priestly Code (see SACRIFICE) is governed by the same principle. The holiness of Israel centres in the sanctuary, and round the sanctuary stand the priests, who alone can approach the most holy things without profanation, and who are the guardians of Israel's sanctity, partly by protecting the one meeting-place of God and man from profane contact, and partly as the mediators of the continual atoning rites by which breaches of holiness are expiated. In P it is the sons of Aaron alone who bear the priestly office. How these stand related to the sons of Zadok mentioned above is an excessively puzzling question to which a conclusive answer is, in the silence of the sources, perhaps impossible. It is probable, however, that the two expressions are not merely different designations for the same class of persons; the new name seems rather to denote a more comprehensive category, so that Aaron includes Zadok.[2]

We know as a fact that Ezra's band included not only priests of the sons of Eleazar (to whom the Zadokites traced their descent, 1 Ch. 6 38) but also sons of Ithamar (Ezra 8 2 *f.*), not to mention that Chronicles at a later date assigns eight out of the

[1] See 1 S. 2 36, a passage written after the hereditary dignity of the sons of Zadok at Jerusalem was well established. See ELI.

[2] [Or hak-kōhēn ha-rōsh? (cp 2 Ch. 31 10). The preceding word ends in ה.]

[3] So read also in 2 K. 23 4 [or in each case *k. ham-mishneh*?]

[4] Cp v. Hoonacker, 215.

[1] 2 K. 23 7; cp Dt. 23 18, where 'dogs' = the later Galli. See DOG, § 3; IDOLATRY, § 6; and cp Driver, *ad loc.*

[2] Cp Kuenen, *Ges. Abh.* 488, where, influenced by the further investigations of Oort and Vogelstein, he modifies his previously published view.

twenty-four orders of priests to the sons of Ithamar (1 Ch. 24 4). But whom we are to understand by the sons of Ithamar—whether they are the priests of Anathoth, the descendants of the deposed Abiathar (1 K. 2 26 *f.*), as Vogelstein (pp. 8-12) supposes, or whether others also are to be reckoned along with these (Kuenen, 490 *f.*)—must be left undecided. We must content ourselves with saying—and the evidence warrants at least so much as this—that apparently, as against the attitude of exclusiveness shown by Ezekiel towards all non-Zadokites, the pressure of circumstances during the exile and perhaps also the prospect of a restoration led to a compromise which conceded to some, though not to all priestly families attached to sanctuaries outside of Jerusalem, the rights assigned to them in D (Kuenen, 489). That over and above this the Zadokites subsequently sought to secure certain special privileges for themselves may perhaps be gathered from such an interpolation as that in Nu. 25 10-13, and the equation Zadokites = Sadducees would seem definitely to prove it.

Still more difficult is the question how, in such a compromise, Aaron came to have the role of common ancestor when previously it had been only, or at least chiefly, the priests of the northern kingdom who had regarded him as their genealogical head (cp on the other hand Ex. 32, a passage of Judaic origin). A noteworthy attempt at a solution of this problem is offered in Oort's treatise *De Aaronieden*, where he goes back to the immigration of this class of priests of Northern Israel who had betaken themselves after Josiah's reformation to Jerusalem, and here after some friction had gradually amalgamated with the sons of Zadok.[1]

The bases of priestly power under this system are the unity of the altar, its inaccessibility to laymen and to the inferior ministers of the sanctuary, and the specific atoning function of the blood of priestly sacrifices.

7. Importance of the post-exilic priesthood.

All these things were unknown in old Israel; the altars were many, they were open to laymen, and the atoning function of the priest was judicial, not sacrificial. So fundamental a change as lies between Hosea and the Priestly Code was possible only in the general dissolution of the old life of Israel produced by the Assyrians and by the prophets; and indeed, the new order did not take shape as a system till the exile had made a *tabula rasa* of all old institutions; but it was undoubtedly the legitimate and consistent outcome of the latest development of the temple worship at Jerusalem before the exile. It was meant also to give expression to the demands of the prophets for spiritual service and national holiness; but this it did not accomplish so successfully; the ideas of the prophets could not be realised under any ritual system, but only in a new dispensation (Jer. 31 31 *ff.*), when priestly Torah and priestly atonement should be no longer required. Nevertheless, the concentration of all ritual at a single point, and the practical exclusion of laymen from active participation in it—for the old sacrificial feast had now shrunk into entire insignificance in comparison with the stated priestly holocausts and atoning rites[2]—lent powerful assistance to the growth of a new and higher type of personal religion, the religion which found its social expression not in material acts of oblation but in the language of the psalms. In the best times of the old kingdom the priests had shared the place of the prophets as the religious leaders of the nation; under the second temple they represented the unprogressive traditional side of religion, and the leaders of thought were the psalmists and the scribes, who spoke much more directly to the piety of the nation.

On the other hand, the material influence of the priests was greater than it had ever been before; the temple was the only visible centre of national life in the ages of servitude to foreign power, and the priests were the only great national functionaries, who drew to themselves all the sacred dues as a matter of right and even appropriated the tithes paid of old to the king.

[1] See Kuenen's criticism on this and cp AARON.

[2] Compare the impression which the ritual produced on the Greeks (see Bernays, *Theophrastus*, 85, 111 *f.*)

The great priests had always belonged to the ruling class; but the Zadokites were now the only hereditary aristocracy, and the high priest, who now stands forth above his brethren with a prominence unknown to the times of the first temple, is the one legitimate head of the theocratic state, as well as its sole representative in the highest acts of religion.

When the high priest stood at the altar in all his princely state, when he poured out the libation amidst the blare of trumpets, and the singers lifted up their voice and all the people fell prostrate in prayer till he descended and raised his hands in blessing, the slaves of the Greek or the Persian forgot for a moment their bondage and knew that the day of their redemption was near (Ecclus. 50). The high priest at such a moment seemed to embody all the glory of the nation, as the kings had done of old, and when the time came to strike a successful blow for freedom it was a priestly house that led the nation to the victory which united in one person the functions of high priest and prince. From the foundation of the Hasmonean state to the time of Herod the history of the high-priesthood merges in the political history of the nation; from Herod onward the priestly aristocracy of the Sadducees lost its chief hold over the nation and expired in vain controversy with the Pharisees. (See ISRAEL, § 83.)

The influence of the Hebrew priesthood on the thought and organisation of Christendom was the influence not of a living institution, for it hardly began till after the fall of the temple, but of the theory embodied in the later parts of the Pentateuch. Two points in this theory were laid hold of—the doctrine of priestly mediation and the system of priestly hierarchy.

8. Influence of the Hebrew priesthood upon Christian thought.

The first forms the text of the principal argument in the Epistle to the Hebrews, in which the author easily demonstrates the inadequacy of the mediation and atoning rites of the OT, and builds upon this demonstration the doctrine of the effectual high-priesthood of Christ, who, in his sacrifice of himself, truly 'led his people to God,' not leaving them outside as he entered the heavenly sanctuary, but taking them with him into spiritual nearness to the throne of grace. This argument leaves no room for a special priesthood in the Christian church; even in the writings of Cyprian, it is not the notion of priestly mediation but that of priestly power that is insisted on. Church office is a copy of the old hierarchy. Now among the Jews, as we have seen, the hierarchy proper has for its necessary condition the destruction of the state and the bondage of Israel to a foreign prince, so that spiritual power is the only basis left for a national aristocracy. The same conditions have produced similar spiritual aristocracies again and again in the East, in more modern times, and even in antiquity more than one Oriental priesthood took a line of development similar to that which we have traced in Judæa.

Thus the hereditary priests of Ḳozaḥ (Κοζέ) were the chief dignitaries in Idumæa at the time of the Jewish conquest of the country (Jos. *Ant.* xv. 7 9), and the high priest of Hierapolis wore the princely purple and crown like the high priest of the Jews (*De Dea Syria*, 42). The kingly insignia of the high priest of the sun at Emesa are described by Herodian (v. 3 3), in connection with the history of Elagabalus, whose elevation to the Roman purple was mainly due to the extraordinary local influence of his sacerdotal place. Other examples of priestly princes are given by Strabo in speaking of Pessinus (567) and Olbe (672).[1]

As there was no such hierarchy in the West, it is plain that, if the idea of Christian priesthood was influenced by living institutions as well as by the OT, that influence must be sought in the East (cp Lightfoot, *Philippians*, 261). The further development of the notion of Christian priesthood lies beyond the scope of the present article. Cp MINISTRY.

9. Literature.

Wellhausen, *Prol.*(2-4) (1883, 1886, 1895; in *Gesch. Isr.*(1) [1878], Chap. IV.: 'Die Priester und Leviten'; the *Archæologies* of Nowack (1894) and of Benzinger (1894). Baudissin, *Die Geschichte des Alttestamentlichen Priestertumes* (1889) contains a very comprehensive collection of facts, but is weak in its method. Along with Oort's 'de Aaronieden' (*Th. T* 18 [1884] 289-335) and H. Vogelstein's *Der Kampf zwischen Priestern und*

[1] See also Mommsen, *Hist. of Rome*, ET 4 150.

Leviten seit den Tagen Ezechiels (1889) it is reviewed by Kuenen in his keen critical essay on the history of the priests of Yahwè and the age of priestly law, *Th. T* 24 (1890) 1-42, translated into German in Budde's *Gesammelte Abhandlungen zur bibl. Wissenschaft von A. Kuenen* (1894), 465-500. Cp also references to priests in *OTJC* (index, *s.v.*).

The critical view of which the foregoing article is an exposition has recently been met with an uncompromising opposition by van Hoonacker in *Le Sacerdoce Lévitique dans la loi et dans l'histoire des Hébreux* (1899), a work which shows great thoroughness of treatment and mastery of its subject, and bears ample witness to the author's acuteness and power of combination as well as to his confidence in the thesis he has taken up, but at the same time displays radical defects of method. Cp Baudissin's review in *TLZ*, 1899, 359-363. Van Hoonacker has two premises which are fundamental and render it impossible for those who do not share them to accompany the author in his arguments or adopt his conclusions; the one is that there was but one sanctuary from the first, the other that Chronicles describes pre-exilic conditions, not those of the time of its composition. On the history of the priesthood in the later period see especially Schürer, *GVI*(2) 1 24, (3) 2 224-305.

W. R. S.-A. B.

PRINCE. 1. נָגִיד, *nāgīd* (ΗΓΟΥΜΕΝΟϹ): root meaning, to be high, conspicuous (cp נֶגֶד, in front). *Nāgīd* is used of the 'governor' of the palace (Azrikam), 2 Ch. 28 7 (ἡγούμενος τοῦ οἴκου: οἰκονόμος would have been better; cp 1 K. 4 6 16 9; on the position of this officer see Is. 22 21 *f.*); of the chief of the temple (1 Ch. 9 11 2 Ch. 31 13); of PASHHUR (פָּקִיד נָגִיד, Jer. 20 1); of the 'leader of the Aaronites' (1 Ch. 12 27; Jehoiada); of the keeper of the sacred treasury (1 Ch. 26 24; Shebuel); of the chief of a tribe (2 Ch. 19 11; Zebadiah); of the 'captains' of the army (1 Ch. 13 1 2 Ch. 32 21); of the eldest son of the king (2 Ch. 11 22, ‖ ראֹשׁ; Abijah, son of Rehoboam); of the king himself, *e.g.*, Saul (AV 'captain,' 1 S. 9 16, etc.); of the high priest, משיח נגיד, 'the (an?) anointed, the (a?) prince' (Dan. 9 25; see RV), נגיד ברית, unless Ptolemy Philometor is meant (Dan. 11 22); see MESSIAH. In Ps. 76 13, the plur. נגידים, EV 'princes' ‖ מלכי ארץ, 'kings of the earth.'

2. נָשִׂיא, *nāśī'*; lit. one lifted up (ἡγούμενος, ἀφηγούμενος, ἄρχων). Used of a Canaanitish prince, Gen. 34 2 (ἄρχων); of princes of Ishmael (Gen. 17 20 [P]); of Abraham (Gen. 23 6 [P]); vaguely, of a secular authority (Ex. 22 28 [27], RV 'a ruler'); of the king (1 K. 11 34); of Zerubbabel (Ezra 1 8).

A favourite word with Ezekiel (*e.g.*, 7 27 12 10 12 21 12 [17], 30 13 34 24 45 7 *ff.* 46 2 *ff.*), who has no place in his picture of Israel for a king, but only for a prince with very limited functions (see EZEKIEL ii., § 23), and with P, especially of the tribal princes (Nu. 7 11 *ff.* 34 18 *ff.*, more fully נְשִׂיאֵי הָעֵדָה, 'princes of the assembly' [see ASSEMBLY], Ex. 17 22 Nu. 4 34). P also uses it of the heads of families (Nu. 3 24 30 35), and of the highest tribal prince of the Levites (*v.* 32; cp 1 Ch. 7 40). *Nāśī'* was also the official title of the president of the Sanhedrin. See GOVERNMENT, § 31; ISRAEL, § 81; SYNEDRIUM.

3. שַׂר, *śar*, corresponding to Ass. *šarru*, 'king' (see KING), a word used of nearly all degrees of chiefdom or wardenship. It is applied to the chief baker of the Pharaoh (Gen. 40 16), to the chief butler (40 2), to the 'ruler over the cattle' (47 6), to the keeper of the prison (39 21), to the taskmaster of the Israelites (Ex. 1 11), to the 'prince of the eunuchs' (Dan. 1 7).

Further, to prefects, civil or military, of very limited or very extensive authority; Zebul, the 'ruler of Shechem' (Judg. 10 30); 'Amon, the governor of the city' (1 K. 22 26); ש׳ המדינות, 'prefects of the provinces (1 K. 20 15); ש׳ עשרת, 'Decurion' (Ex. 18 21); ש׳ חמשים, 'a captain of fifty,' πεντηκόνταρχος (2 K. 1 19); ש׳ מאות, captains (judges) over hundreds (Dt. 1 15); over a thousand (1 S. 18 3), over many thousands (1 Ch. 15 25); ש׳ מחצית הרכב, 'captain over half of the chariots of war' (1 K. 16 9); ש׳ החיל, 'captain of the host' (2 S. 24 2); general-in-chief, ש׳ הצבא (ἀρχιστράτηγος, Gen. 21 22 1 S. 12 9); hence used—after אלהי צבאות, God of hosts—of God himself (Dan. 8 11). It occurs by itself in the stat. absol. as a parallel to 'judge'; 'who has made thee a prince [שר] and a judge over us?' (Ex. 2 14), to 'elder' (Ezra 10 8), to 'counsellor' (Ezra 8 25), to 'king' (Hos. 3 4).

The same term is applied to courtiers and high officers—*e.g.*, those of Egypt (Gen. 12 15 Is. 19 11 13), and of Persia (Esth. 1 3 2 18 6 9 [where 𝔊 gives the technical term φίλοι, see FRIEND]), also to the merchant-princes of Tyre (Is. 23 9). The priests are called ש׳ קדש, chiefs, or princes, of the sanctuary (1 Ch. 25 5, but not Is. 43 28; see *SBOT*, *ad loc.*), and the chief priests again are called ש׳ הכהנים (2 Ch. 36 14). The word came to be used also of guardian-angels of nations—*e.g.*, of Persia (Dan. 10 13 20), of Greece (Dan. 10 20), of Israel (10 21), Michael 'the great prince' (12 1), the chief princes (10 13), שר השרים, 'the Prince of Princes'; God (8 25; cp 𝔊 in Dt. 32 8). The use of שר as guardian-angel (Esau, etc.) is retained in the Midrash; but the word is also applied in the Talmud to 'a hero at the table, a mighty drinker' (*Nidd.* 16, etc.). The fem. שָׂרָה, *śārāh*, **Princess**, occurs (1) of Solomon's wives, 1 K. 11 3, (2) of ladies of the court, Esth. 1 18 RV (AV 'ladies'), (3) as a general term of dignity, Lam. 1 1 (שָׂרָתִי בַּמְּדִינוֹת ‖ רַבָּתִי בַגּוֹיִם); cp the proper name SARAH.

4. נָדִיב, *nādīb* (from נָדַב, which in Hithp. signifies 'to volunteer, to offer spontaneously'), generous, noble-minded, noble by birth (1 S. 2 8 Ps. 47 10 107 40 113 8 118 9 Prov. 25 7, etc.). This word is the converse of the preceding; *nāgīd* means primarily a chief, and derivatively what is morally noble, excellent (Prov. 8 6); *nādīb* means primarily what is morally noble, and derivatively one who is noble by birth or position.

5. אחשדרפן, *'aḥašdarpan*, RV 'satrap.' See PERSIA, SATRAP.
6. סגן, *sāgān*, see DEPUTY, 1.
7. נסיך, *nāsīk*, see DUKE, 2.
8. פרתמים, *partĕmīm*, see NOBLES.
9. קצין, *ḳāṣīn*, see CAPTAIN, 6.
10, 11. רברבן רבים, *rabrĕbān*, *rabbīm*, see RAB.
12. שליש, *šālīš*, see CAPTAIN, 9; ARMY; LORD, 6.
13, 14. רֹזֵן, *rōzēn* (Judg. 5 3 Is. 40 23, etc.); also רָזוֹן, *rāzōn* (Prov. 14 28 †), root meaning, gravity; cp Ass. *ruzzunu* [Prince, *JBL* 16 175 *f.*]. See REZON.
15. חשמנים, *ḥašmannīm*, Ps. 68 31 [32]. For crit. emend. see Duhm and Che. *ad loc.*
16. ἄρχων. Cp RULER.
17. ἀρχηγός (ἀ. τῆς ζωῆς, EV 'prince of life,' RVmg. 'author,' Acts 3 15; cp ἀρχηγὸς καὶ σωτήρ, Acts 5 31; ἀρχηγὸν τῆς σωτηρίας, Heb. 2 10; τῆς πίστεως ἀρχηγόν, Heb. 12 2). See CAPTAIN, 15.
18. ἡγεμών (Mt. 2 6 ‖ Mic. 5 1 [2], MT בְּאַלְפֵי יהודה; 𝔊 ἐν χιλιάσιν Ἰουδα [BAQ], but Mt. ἐν τοῖς ἡγεμόσιν Ἰουδα, *i.e.*, בְּאַלֻּפֵי). See DUKE, 1.

PRINCIPALITIES (ΑΡΧΑΙ), Rom. 8 38 Eph. 3 10 6 12 Col. 1 16 2 10 15; cp 1 Cor. 15 24 Eph. 1 21, where 'all rule,' retained in RV, should certainly be 'every principality.' See ANGEL, § 1.

PRISCA (ΠΡΙϹΚΑ; so Ti. WH in Rom. 16 3 1 Cor. 16 19 2 Tim. 4 19), or, in the diminutive, **Priscilla**[1] (ΠΡΙϹΚΙΛΛΑ; Acts 18 2 18 26 Ti. WH), the wife of AQUILA [*q.v.*]. In Acts 18 18 26 Rom. 16 3, Priscilla is mentioned before Aquila. Her importance is well pointed out by Harnack in his ingenious essay on authorship, etc., of Hebrews (see HEBREWS [EPISTLE], *ad fin.*); cp also id. *Ueb. d. beiden Recensionen d. Gesch. d. Prisca u. d. Aquila in Act. Ap.* 18 1-17 (1899).

PRISON. The references in the OT are too meagre to enable us to give any satisfactory account of early Jewish methods of restraint. As among the Greeks, imprisonment was seldom employed as a legal punishment, and it is not until the post-exilic age that it enters into the judicial system (Ez. 7 26, Bibl.-Aram.); see LAW, § 12. On the treatment of captives, see WAR.

1. References.

Shimei, if not confined within four walls, was practically a prisoner within the bounds of Jerusalem (1 K. 2 36 *f.*); but this kind of treatment may have been rare. Solomon's policy in 1 K. 2 is represented as being exceptionally generous by the narrator. A confinement of a more or less close nature is expressed by the term *mišmār* (see below, § 2 [11]), which, in the case of David's concubines (בֵּית מִשְׁמֶרֶת, 2 S. 20 3 EV 'ward'), and Simeon (Gen. 42 19 EV 'prison,' cp 42 24 33) was hardly severe: 'sur-

[1] A parallel case is that of Livia (Tac. *Ann.* 2 44), the youngest child of Germanicus and Agrippina, who in Suetonius (*Claud.* 1) is called Livilla.

veillance' or 'safeguard' (similar to the treatment of a hostage) may be the best rendering. On the other hand, a confinement of a more rigorous nature would be exercised in the case of the man who broke the sabbath (Nu. 15 34), and the blaspheming Danite (Lev. 24 12), both of whom are placed 'in ward' (EV, בְּמִשְׁמָר), pending Yahwè's decision. Similarly the officers of Pharaoh who have fallen under his displeasure are put 'in ward' as a temporary measure; the sequel is familiar (Gen. 40 E).

In the time of the monarchy a place for the safe-keeping of undesirable persons might often be required. Of such a kind was the Philistine 'house of the captives' at Gaza (Judg. 16 21). As an ordinary precaution Jeremiah was confined in the 'court of the guard' in the king's house,[1] where, however, he was free to conduct his business (Jer. 32). Probably this court was under the control of a military official, and was set apart for the highest class of offenders, or members of the royal household, just as in Gen. 40 3 *f.* the Pharaoh's officers are under the care of the 'captain of the guard' (שַׂר־הַטַּבָּחִים).[2] On the other hand the בֵּית סֹהַר (Gen. 39 21 *ff.* J, see § 2 [9]) was apparently the common prison, the keeper of which is called שַׂר בֵּית הַסֹּהַר. Far more rigorous was the treatment of Jeremiah when confined in the house of Jonathan the scribe (Jer. 37 15, cp *v.* 20*b*), which had been converted into a prison-house (בֵּית־כֶּלֶא, § 2 [8]). Whether the miry pit into which he was cast (Jer. 38 6) was really in the 'court of the guard' may be questioned.[3] The 'pit' (cp § 2 [6]) was the place for the meanest of prisoners (Ex. 12 29, cp Gen. 40 15*b* 41 14), but at the same time the readiest means of imprisonment (cp Gen. 37 24). For appliances for further restricting personal freedom see CHAINS, COLLAR, STOCKS, and § 2 (7) below.

The references to prisons in the NT need little explanation. The probability is that the prisons were constructed on the Greek and Roman plan (cp Smith, Rich, *Dict. Class. Ant.*, *s.v.* 'Carcer'). The 'public ward' of Acts 5 18 (RV) would then answer to the *custodia communis* of the Roman prison, whilst the 'inner prison' (*ib.* 16 23), like the *carcer interior* or *robur*, would (as the context actually shows) be for the worst cases, and was possibly a cell underneath the *custodia communis* (cp illustr. in Rich, *s.v.*).

For the allusion in Acts 12 6*b* cp Jos. *Ant.* xviii. 6 7 [Agrippa], also Acts 28 16 (?), and see CHAINS, 2 (end).

There are fifteen distinct Hebrew and Greek terms to be noticed:—

2. Terms.

1. מַטָּרָה, *maṭṭārāh* (lit. 'place of guarding'), in Jer. 32 2 8 12 Neh. 3 25, etc., 'court of the prison' (RV 'guard'), apparently the same as the שַׁעַר מ׳ Neh. 12 39, 'prison-gate' (RV 'gate of the guard'). The cognate Aram. מטרתא is used in Tg., Gen. 40 3 4 42 19 for מִשְׁמָר.

2. מַסְגֵּר, *masgēr* (√close, shut up), used generally in Is. 24 22 (with סֻגַּר), and figuratively in Ps. 142 7 [8], and Is. 42 7 (‖ בית כלא, cp 8 below). Cp הסגיר of the compulsory seclusion of the leper (Lev. 13 5), סוּגַר, 'cage' (see LION, § 5 end), and מסגרת 'prisons' (?) in the Panammu inscr. of Zenjirli (*ll.* 4, 8).

3. עֹצֶר, *'ōṣer* (√restrain, *e.g.*, with force 2 K. 17 4 Jer. 33 1 etc.), Is. 53 8, AV 'prison,' RV preferably 'oppression.'

4. פְּקַח־קוֹחַ, *pĕkaḥ-kōăḥ*, Is. 61 1 AV 'opening of the prison,' RV preferably supplies the last three words in italics; but the literal meaning of פ׳ requires עִוְרִים rather than אסורים (‖ שבוים) which, in turn, suggests the emendation פתחות (loosing); cp Che. *Is.*(5) (Che. *SBOT* reads ולעורים פקח).

[1] But the '*gate* of the guard' (Neh. 12 39) seems to have been near the temple. Here, too, were the stocks (?) mentioned in Jer. 20 2 (see § 2 [7]).

[2] Cp § 2 (9) below. We may perhaps compare the private prison (*ergastulum*) on the Roman farms.

[3] It is obscurely described as the 'pit of Melchijah' (*v.* 6); in *v.* 11 it is apparently under the treasury (האוצר, which 𝔊BNAQ [not Qmg.] om., is perhaps for החצר). The text is probably corrupt; cp 38 1 (Pashhur b. Malchijah) 7*b* (gate of Benjamin) with the names in 20 1 *f.*

5. בֵּית־הָאֵסוּר, lit. 'house of bondage,' Jer. 37 15, cp בּ הָ[א]סוּרִים Judg. 16 21 25 (Ḳrê), Eccl. 4 14, lit. 'house of the bound [ones]'; cp אֱסוּרִין, 'imprisonment' (Aram. Ezra 7 26) and אָסִיר, *āsīr*, 'prisoner' or 'captive,' Ps. 79 11 102 20 [21]; the verb אָסַר like δεῖν does not *necessarily* imply the use of chains or fetters.

6. בֵּית־הַבּוֹר, *bēth hab-bōr*, lit. 'place of the pit' (see CONDUIT, § 1 (1), col. 881), EV 'dungeon,' in Ex. 12 29 and in an obscure and probably corrupt passage, Jer. 37 16 (החניות [a gloss?], see CELLS). Observe that in *v.* 15 *f.* there are four distinct terms for 'prison.'

7. בֵּית הַמַּהְפֶּכֶת, *bēth ham-mahpĕketh*, 2 Ch. 16 10 'prison-house,' but in accordance with the EV rendering of Jer. 20 2 *f.*, 29 26 'house of the stocks'[1] (so RVmg.). The meaning of the root suggests a punishment compelling a *crooked* or distorted posture (BDB), and כיפתא of the Tg. is, according to the Gĕmārā on *Sanh.* 81*b*, a cramped vault not high enough for the criminal to stand in freely. See STOCKS. It is perhaps not too bold, on the strength of Tg. כ׳ (properly a prison, cp Bibl. Aram. כפת, 'be bound,' Dan. 3 20 *ff.*, apparently also an Ass. word, see Ges. *Lex.*(13)), to read ב׳ המכפתה, 'house of binding' = prison.

8. בֵּית כֶּלֶא, *bēth kéle'*, lit. 'house of restraint' (√כלא, 'restrain,' cp Jer. 32 2, and Ass. *bīt ki*-[or *kil*-]*li*), 1 K. 22 27 (= 2 Ch. 18 26), 2 K. 17 4, etc., pl. Is. 42 22, twice כלוא (Kr. ב׳ כליא) Jer. 37 4 52 31; cp בגדי כ׳, 'prison-garb,' 2 K. 25 29 = Jer. 52 33.

9. בֵּית הַסֹּהַר, *bēth has-sōhar* (ס׳ roundness? as though 'round tower,' cp Ass. *sīru* 'enclosure,' *saaru* 'ring'; Sam. has סחר, with which cp Ass. *siḥirtu* 'enclosure,' Syr. *sāḥarta* 'citadel, palace'), the 'prison' (EV) into which Joseph was cast upon a false charge (J, Gen. 39 20-23, RJE 40 3 5). According to E, on the other hand, Joseph was no prisoner, but the head-servant of the captain of the guard (Gen. 37 36 40), with whom offending officials in Pharaoh's court were placed 'in ward' (40 4 41 10). It is not likely that the servant of a private Egyptian (Joseph's position in 39 J) would be set with the Pharaoh's officers, and the words in 39 20 identifying the בית הסהר with the place where the king's servants were bound may, therefore, be redactional. A servant accused of the crime alleged in J's narrative would certainly have been put to death. J's story is quite out of place, and evidently secondary compared with E's sober narrative. The passages in 40 15*b* 41 14 (RJE), which refer back to J's narrative, and are admittedly redactional, use the word *bōr* (cp no. 6 above), in which case the dungeon (*bōr*) was a particular cell in the בית הסהר; cp Jer. 38 6 (§ 1 above).

10. בֵּית־הַפְּקֻדֹּת, *bēth-hap-pĕḳūdōth* (lit. place of over-seeing), Jer. 52 11, cp use of verb in Jer. 37 21, and perhaps בעל פְּקִדֻת Jer. 37 13 (EV 'captain of the ward,' = captain of the prison?), and שער המפקד Neh. 3 31 (prison gate?).

11. בֵּית מִשְׁמָר *bēth mišmār*, EV 'prison house,' Gen. 42 19, etc., see above (§ 1).

The NT terms are:

12. δεσμωτήριον, Mt. 11 2 (of Machærus), Acts 5 21 23 16 26; cp δεσμοφύλαξ, 'jailer,' Acts 16 23 27 36.

13. οἴκημα, a euphemistic term, Acts 12 7 (RV 'cell'), but in *v.* 4 no. 15 is used.

14. τήρησις, Acts 4 3 'in hold,' but RV 'ward,' ἐν τηρ. δημοσίᾳ 5 18 'in the common prison,' RV 'public ward,' but in *vv.* 19 22 no. 15 is used and in *vv.* 21 23 no. 12.

15. φυλακή, a very common term answering to the Heb. *mišmār*, of a prison, Mt. 14 10 Lk. 3 20 (Machærus) Acts 16 23 *ff.* (but in *v.* 26 no. 12), in Rev. 18 2 twice (AV 'hold,' 'cage,' RV 'hold,' and mg. 'prison') in RV, 1 Macc. 9 53, and EV *ib.* 13 12 14 3 'ward.'

S. A. C.

PROCHORUS (προχορος, Ti. WH]), one of the seven 'deacons' (Acts 6 5)†.

He is mentioned in the lists of the 'Seventy' given by the Pseudo-Dorotheus, and according to Pseudo-Hippolytus was Bishop of Nicomedia. For an account of the *Acts of Prochorus*, which have a wide currency in the Greek church, see Lipsius, *Apokr. Ap.-Gesch.* 1 355-408. According to this apocryphal and very late source, Prochorus was a companion and helper of the apostle John for many years through a great variety of wanderings and adventures, and ultimately suffered martyrdom at Jerusalem. Pseudo-Hippolytus speaks of him as 'the first that departed.'

PROCONSUL, the official designation of the governor of a senatorial province under the Empire. The word is literally rendered in Greek by ἀνθύπατος, for which AV gives 'deputy,' but RV 'proconsul.' On the reference in Acts 13 7 *f.* (Sergius Paulus) see CYPRUS, § 4; on that in Acts 18 12 (Gallio) see ACHAIA and GALLIO; on that in Acts 19 38 see EPHESUS, col. 1303, n. 1.

[1] According to Jos. Ḳimḥi, however, not for the feet, but for the neck or head. The Pesh. חררתא in Jer. 20 2 *f.* may here mean an outhouse (but see Payne Smith, *Thes.* col. 1205).

PROCURATOR (ΕΠΙΤΡΟΠΟC in Jos. *Ant.* xx. 6 2 [§ 132] etc.) was the specific title of the Roman governor of Judæa, who is called in the NT by the more general title ΗΓΕΜΩΝ (see GOVERNOR, 15). The title procurator was employed under the early empire to denote various officials, or rather officials of various degrees of power, for all were alike in respect of the fact that primarily the word connoted a collector or controller of revenue, public or private; in time the procurator's competence extended to other departments of administration.

1. Application of title.

The title has three main applications. (1) The *procurator fisci*, an officer in Cæsarian provinces analogous to the *quæstor* of senatorial provinces, though he is found in these latter also (Tac. *Ann.* 4 15), his functions gradually encroaching upon those of both the quæstor and the governor (*proconsul*); even in the Cæsarian provinces the *procurator* acquired practical independence of the *legatus proprætore* governing the province, and in any case acted as an effective check upon him (cp Tac. *Ann.* 12 60 14 32). (2) Certain of the minor or specially circumstanced Cæsarian provinces were administered wholly by procurators—*e.g.* Rhætia, Vindelicia, Noricum, and Judæa, as also Cappadocia from the time of Tiberius to that of Vespasian. In course of time these were brought under the general imperial system. Under Claudius the powers of the procurators were largely increased, and even if it is not quite true that Judæa was the only province (save Egypt, whose case was peculiar) thus organised under Augustus (cp Hirschfeld, *Unters.* 288), the great provinces of Thrace and the two Maretaniæ were placed by Claudius under the rule of procurators. The procurators of the two classes above described were drawn as a rule from the equestrian order (cp Jos. *BJ* ii. 8 1; Strabo, 840), but some even of the procuratorial governors were, under Claudius, freedmen—*e.g.*, Felix, procurator of Judæa (Suet. *Claud.* 28)—and this was in general the case with (3) that large class of imperial procurators supervising the private estates of the emperor in Italy or the provinces, or charged with various administrative departments in Italy (*e.g.*, *procurator aquarum*, *procurator ad ripas*, *Tiberis*, and many others).

The procurator of the highest class, governing a province, possessed as a matter of course the civil and criminal jurisdiction belonging to any provincial governor, but he appears to have been partly responsible to the nearest *legatus* (governor of a Cæsarian province).[1] The exact limits of this responsibility and subordination cannot be drawn, and perhaps were actually left purposely vague; the deposition of Pilate by Vitellius (Jos. *Ant.* xviii. 4 2; Tac. *Ann.* 6 32) and of Cumanus by Ummidius Quadratus (Jos. *Ant.* xx. 6 3; Tac. *Ann.* 12 54) was by virtue of special commission entrusted to the superior governor, and can hardly stand good as a measure of his supervising authority.

2. NT references.

It is certain that the procurator of Judæa had troops (auxiliary, not legionary) under his orders (Mk. 15 16), their quarters being within the *prætorium* or old palace of Herod, which was also the residence of the procurator when he visited Jerusalem as a precautionary measure during the national festivals (cp Mt. 27 27 Mk. 15 16 Jn. 18 28 33 19 9 Acts 21 31 *f.*). The ordinary headquarters of both the governor and the forces was at Cæsarea on the coast, where also the Herodian palace was the procurator's residence (Acts 23 35, *ἐν τῷ πραιτωρίῳ τοῦ Ἡρώδου*).

The extent of the procurator's judicial authority is indicated clearly in the NT. Over provincials it was absolute—*i.e.*, without right of appeal—as is seen in the case of Jesus (Jos. *BJ* ii. 8 1, *μέχρι τοῦ κτείνειν ἐξουσίαν*. Cp *Id. Ant.* xx. 1 1 5 2 *BJ* ii. 13 2). The release of a prisoner at the Feast of the Passover (Mt. 27 15 Mk. 15 6 Jn. 18 39) must have been authorised, and in fact enjoined (cp Lk. 23 17, 'For of necessity he must release') by special edict of the emperor; but the NT is the only evidence for the custom in Judæa. The case of Paul shows that the procurator's power of life and death extended even to Roman citizens in his province (subject to the right of the accused to demand that the case should be referred to the emperor [Acts 25 11] and the right to appeal to the same authority against a capital sentence of the procurator). In Judæa even under the direct rule of the Romans, the Sanhedrin still enjoyed to a large extent the right of legislating and of administering the law. And although the right of the imperial authorities to interfere in these matters was never formally surrendered (as it was in the case of the so-called 'free cities'), the peculiar difficulties of government in Palestine made the practical effect of that right of little moment. Even Roman citizens were in some respects admittedly within the requirements of Jewish law—*e.g.*, citizenship could not save from execution the Gentile found trespassing upon the inner court of the Temple (Jos. *BJ* vi. 2 4; cp Acts 21 28 24 6). It still remained, however, an essential requirement that a death sentence of the Sanhedrin must be confirmed by the procurator, a requirement which practically guaranteed a right of appeal from the national council to the emperor's vicegerent (cp Acts 25 10 'I stand at Cæsar's judgment seat'). The case of Jesus is a striking example of this principle (Jn. 18 31). It is of course obvious that the limits of Roman toleration in Judæa as elsewhere would vary with the personal character of the governor.

W. J. W.

[1] See Tac. *Ann.* 12 54, and cp the expression of Jos. *Ant.* xvii. 13 5 [§ 355] (*τῆς δὲ Ἀρχελάου χώρας ὑποτελοῦς προσνεμηθείσης τῇ Σύρων*) with *BJ* ii. 8 1 [§ 117] (*εἰς ἐπαρχίαν περιγραφείσης*), in both the reference being to Judæa (cp *Ant.* xix. 9 2 xx. 1 1).

PROFANE. Four words are rendered 'profane' in AV or RV.

1. חֹל, *ḥōl*, Ezek. 22 26, etc.; see COMMON.

2. חָלָל, *ḥālāl*, Lev. 21 7 14, fem. (EV), Ezek. 21 30 [25] 34 [39]. 'Profaned' is better. A woman who has lost her honour, and a prince deprived of the insignia of his rank, can be so designated. AV in Ezek. follows 𝔊 (*βέβηλε*); but Cornill rightly adopts the sense established for חלל in Lev. 21 7 14: 'Disgraced through wickedness,' however, is a forced expression; 'dishonoured prince' is a probable emendation.[1] RV 'deadly wounded wicked one, prince of Israel.' So Ezek. 28 16 (EV); the king of Tyre 'cast as profane [deprived of his sacred character] out of the mountain of God' (cp CHERUB, § 2; PARADISE, § 3). חִלֵּל, *ḥillēl*, 'to profane,' occurs often.

3. חָנֵף, *ḥānēph*, Is. 9 16 [17] 10 6 RV; חֹנֶף, *ḥōneph*, 'profaneness,' Is. 32 16 RV. See HYPOCRITE.

4. *βέβηλος*, 1 Tim. 1 9 Heb. 12 16. 'The word describes a character which recognises nothing as higher than earth, for whom there is nothing sacred' (Westcott). Cp ESAU. It is also used of the tasteless (Gnostic?) oriental religious stories current in the post-Pauline age (1 Tim. 4 7; cp 6 20 2 Tim. 2 16). The verb *βεβηλόω* in Mt. 12 5 Acts 24 6.

PROFESSION (ΟΜΟΛΟΓΙΑ), 1 Tim. 6 12. See CONFESSION, § 4.

PROGNOSTICATORS, MONTHLY (מוֹדִיעִם לֶחֳדָשִׁים), Is. 47 13. See STARS, § 5.

PROPERTY. For laws relating to property see LAW AND JUSTICE, §§ 15 *ff.*

PROPHET, FALSE. See PROPHETIC LIT., § 22 *ff.*, and for 'the false prophet,' Rev. 16 13 19 20 20 10. (ΨΕΥΔΟΠΡΟΦΗΤΗC), cp ANTICHRIST, § 4, col. 180.

[1] שַׂר חָלָל (Che.) instead of חָלָל רָשָׁע (Cornill): רשע and שׂר are sometimes confounded.

PROPHETIC LITERATURE

PROPHET, AND PROPHECY

CONTENTS

1. Hebrew and Greek terms.

The Hebrew terms with an account of which we must begin are five:—

1. נָבִיא, *nābī'*, 'prophet,' נְבִיאָה, *nĕbī'āh*, 'prophetess,' are connected by most with a root meaning in Arabic (cp *nab'at*^{un}) a rustling sound, and in Assyrian (*nabû*) 'to call or name' (hence Nebo is sometimes called the 'prophet' among the gods). If this is correct a prophet is primarily either a giver of oracles, or (so, *e.g.*, König, *Offenbarungsbegriff*, 1 73 *ff.*) a speaker or spokesman. G. Hoffmann (*ZATW* 3 88 *ff.*), however, explains *nābī'* as meaning 'one who utters his words in a loud, violent manner with deep inhalations.' The meaning of 'speaker' at any rate is not in accordance with the earliest accounts that we have of the *nĕbī'īm* (1 S. 10 5; cp 18 10, and the term *mĕšuggā'*, מְשֻׁגָּע, 2 K. 9 11, cp MADNESS). But √נבא may be another form of √נבע, 'to effervesce, to gush,' even if we do not follow Ges. in attributing to √נבא the sense 'to gush out with words.' An analogous term for prophesying would then be הִטִּיף, 'to drip,' Am. 7 16 Mic. 2 6 11 Ezek. 21 2 7 (G. Hoffmann, *ZATW* 3 119, would connect the primary meaning with the drivel symptomatic of an epileptic fit).

The verbal forms נִבָּא, הִתְנַבֵּא are denominative (from נביא). In 2 Ch. 9 29 15 8 Neh. 6 12, *nĕbū'āh*, נְבוּאָה, 'prophecy.' See further Barth, *NB*, § 125 *e*, *Etym. Stud.* 16; BDB and Ges.-Bu. *s.vv.* נבא, נביא.

2. מַטִּיף, *maṭṭīph*, Mic. 2 11. See above.

3. מְשֻׁגָּע, *mĕšuggā'*, EV 'mad fellow,' 2 K. 9 11; cp Hos. 9 7 Jer. 29 26. מְשֻׁגָּע might refer to the rhythmic style of the prophets (cp Ar. *saja'a*, which, though properly used of a sound like the cooing of the dove, is technically employed of the peculiar rhythmic utterances of the Arabian prophets; cp the style of the Koran).

4. חֹזֶה, *ḥōzeh*, EV 'prophet' in Is. 30 10 (οἱ τὰ ὁράματα ὁρῶντες); elsewhere 'seer,' *e.g.* 2 S. 24 11 Am. 7 12 (ὁ ὁρῶν) 2 Ch. 19 2 29 30 35 15 (προφήτης). In Is. 30 10 חָזָה = 'to prophesy.' In Mic. 3 7 חֹזִים, 'seers' is ‖ to קֹסְמִים, 'diviners,' but in Am. 7 12 חֹזֶה, 'seer,' is apparently a synonym of נָבִיא, 'prophet.'

5. רֹאֶה, *rō'eh*, EV 'seer,' 1 S. 9 9; 1 Ch. 9 22 29 29 (ὁ βλέπων), Is. 30 10 1 Ch. 26 28 and 2 Ch. 16 7 10 (προφήτης).

6. προφήτης, -ῆτις are the equivalents of נביא, נביאה in 𝔊, and so προφητεύω = נִבָּא, while μάντις = קֹסֵם, 'diviner' and μαντεύομαι = קָסַם (see col. 1119). In class. Gk. μάντις is the ecstatic announcer of oracles (cp Æsch. *Ag.* 1099), and προφήτης their sober-minded interpreter, who makes the dreams, visions, or enigmatic utterances of the frenzied μάντις intelligible. See the explanation in Plato, *Timæus*, 71 *f.* Oehler therefore assumes that the primary meaning of προφήτης, according to 𝔊 was, not a predicter, but one who speaks forth that which he has received from the divine spirit; cp Ex. 7 1, where even in the Hebrew text Aaron seems to be called a *nābī* (προφήτης) because he is the 'mouth' or spokesman of Moses (Ex. 4 16, cp Jer. 15 19). It is true, however, (1) that προφήτης can have the sense of 'predicter,' and (2) that Philo (2 321 *f.* 343; cp 1 510 *f.*) describes the mental state of the prophet in terms reminding one of what Plato says of the 'enthusiasm' of the μάντις (cp *Phædrus*, 226 5; *Ion*, 534), but also connecting itself with the prevalent notion of the later Jews, in so far as Philo makes the function of the prophet that of purely mechanical reproduction. W. R. Smith compares Jn. 11 51, and the whole view of revelation presupposed in the Apocalyptic literature.

A. THE PROPHETS AND THE PROPHETIC GIFT.

2. Problems of prophecy.

For the student of religion the phenomena of the higher type of prophecy—such prophecy as we find at any rate in the eighth and seventh centuries B.C.—possess a singular fascination. We dare not say that there is absolutely nothing to compare with them in the history of other religions, or, to use religious language, that God left himself without witness save in Israel, for there are the records of Zarathustra (Zoroaster) in the Gathas to confute us (see ZOROASTRIANISM). But this at least we may say without fear of contradiction—that a *succession* [1] of men so absorbed in 'the living God,' and at the same time so intensely practical in their aims—*i.e.*, so earnestly bent on promoting the highest national interests—cannot be found in antiquity elsewhere than in Israel.

The problems connected with the prophets, however, —problems partly of a historical, partly of a psychological character—advance but slowly towards a complete solution. When, for instance, did the higher prophecy begin? In Dt. 18 15 we read, 'Yahwè thy God will raise up unto thee a prophet from the midst of thee, of thy brethren, *like me*'; and in Dt. 34 10, 'There arose not a prophet since in Israel *like Moses*, whom

[1] Not, it is true, a continuous succession.

Yahwè knew face to face.' Was Moses really a prophet? Indeed, can Moses be more than the impersonation of a clan? If so, what is the truth which underlies (or may underlie) the statement that he was a prophet? (See MOSES.) There is also the difficult problem as to the relation of the prophetic gift to the physical state of the prophet. Would it be correct to say that the essence of prophecy (in the highest of its forms) consists in a passive, ecstatic state? This is, of course, not a mere philological question. Whatever the original signification of *nābī* may be, and whether it is an active or a participial form, must we not, in the words of W. R. Smith, 'seek the true mark of the prophet in something higher than passive ecstasy—in the personal sympathy between himself and Yahwè, by virtue of which the God-sent thought approves itself to him inwardly, and not by external authority'? Critical exegesis certainly favours this view. It presents the higher Israelitish prophet to us 'as a man whose life and thoughts are determined by personal fellowship with Yahwè and by intelligent insight into his purpose. No doubt what is personal always rests on a background of the non-personal—a background of merely physical elements which are initially passive under the creative hand of God; but to deal with these elements is not the function of historical inquiry.'[1] One of the chief problems before the student who seeks to go behind the statements of the prophets is, rightly to estimate the relation between the physical and the non-physical elements in the higher prophecy. Nor is this all, so various are the kinds of problems which meet us. We have also to consider the question how the phenomenon of *written* prophecy is to be accounted for. Budde, for instance, agreeing in this with Kuenen and most scholars, writes thus:[2]—

It must have been their very ill-success, the unbelief of the people, that above all else compelled them to resort to the pen. The great mass of the prophets had no such need, for their words were turned at once to deeds as men obeyed them. But the true prophets, who had no successes in the present to record, transmitted their oracles to posterity that there at least they might awaken a response, or at any rate receive the acknowledgment that their contents were true' [cp Is. 30 8].

But is this a complete explanation? And turning to the earliest of the literary prophets known to us we may ask, How came the 'shepherd of Tekoa'[3] to be such a skilled and almost artistic writer? Who transmitted to Amos the literary tradition on which his own work appears to be based? Then, beyond this, lies the greater question (cp MOSES, § 1), how did Amos reach such a lofty idea of God? To quote from Budde again,—

'Surprising in the highest degree, yes, overwhelming is the grandeur of the idea of God which meets us in Amos. It is not [indeed] monotheism, not the belief in one God excluding the existence of all others, but a belief in the unqualified superiority of Yahwè so absolute as to be practically a belief in his omnipotence.'[4]

Lastly, there is the problem of the so-called 'false prophets.' Are there two different views of them in the prophetic narratives and discourses? Or is one of the views merely a development of the other? These are all questions of more or less complexity, and some of them would not receive precisely the same answer from thorough and consistent critical scholars to-day that they received twenty years ago. If we can succeed in placing some of them in a clearer light, and exhibit some neglected data, our first though not our only object will have been attained.

Our course in this article will be as follows:—

A. There is a point in the history of prophecy at which this great religious phenomenon rises—apparently, but surely not really—on a sudden to a higher level. It is necessary to investigate the traditions which relate to the previous period, in order to comprehend and appreciate better the great superiority of the 'higher prophets' of the eighth century. At two important crises—the so-called Philistine and Aramæan wars—prophets play a specially noticeable part; the traditions respecting this have to be examined (§§ 4, 6 *f.*). Where was the chief centre of prophecy? was there a succession, and were there societies, of prophets (§ 8)? and who were the 'seers'—how are they related to the prophets (§ 5)? The results of this first part of the inquiry are not without far-reaching significance, and need careful study. They are connected with textual criticism, which has too often been narrow and mechanical. But the fact that large bodies of men move slowly requires us to warn the student that here as elsewhere the average opinion of Hebrew scholars is not that which receives here the chief prominence. We then proceed (§ 10) to study the origin and historical position of Amos and his great successors. Their pessimistic preaching and its unpopularity are considered and their attitude is explained (§§ 11 *ff.*). We are now in a position to form a sound view of the phenomena of the consciousness of the higher prophets, whose statements we assume (the right critical course, surely) to be veracious. We can examine what they say or suggest of their power of vision, of the process of revelation, and of its outward forms (§§ 14-20). Their qualifications also can now be studied, and the so-called 'false prophets' can be compared and contrasted with them (§§ 22-24); a new point of view is also opened for the Messianic idea. The great question of the fulfilment of prophetic vaticinations has next to be considered (§ 25), and so quite naturally we are led to resume (§§ 26-28) our historical survey to the end of the period of public prophetic activity.

3. Line of inquiry.

B. At the end of A (§ 29) we have glanced at John the Baptist; we now pass on to the phenomena of Christian prophetism (§§ 29-33), especially as illustrated by the *Didachè* (§ 30) and the *Shepherd* (§ 31); historical conclusions are drawn (§ 32 *f.*).

C. We then take a survey of the prophetic literature (first that which we can refer to its authors (§§ 35-42), and next the anonymous, §§ 43-45; cp 28). Our object here is still rather to supplement what has been said already, in accordance with the most recent work, than to cover the whole ground, and with some hints on the mode of detecting the work (so considerable in amount) of the supplementers of the old prophetic records (§ 46), and references to modern helps (§ 47), the article is brought to a close.

Students who bring a single-minded earnestness to this great inquiry, will not complain of a certain amount of originality in the present article. Where young men are easily contented with inherited solutions of problems, older scholars who have had time to work through the same material again and again, are naturally more exacting, and cannot hesitate to apply new methods in addition to those older ones which we owe to our great predecessors. The textual criticism of the prophetic writings, as well as of many parts of the narrative books on which we have to build in this article does not meet our present requirements, and a mere register of prevalent critical views on the history of prophecy based on a largely traditional criticism of the text would be in the highest degree unsatisfactory. The newer critical methods cannot always lead to perfectly certain conclusions; but the results are often in a high degree probable, and possibly better worthy of acceptance (as being more manifestly in the direction of the truth) than those which they aim to supersede, and the way in which the manifold decisions hang together is no slight confirmation of their general accuracy.

4. Prophets in Saul's time.

In an early Samuel-narrative we have an important description of the religious practices of ancient Israelitish *nebī'īm*. The 'seer' Samuel tells Saul that on his homeward journey he will meet a company of *nebī'īm* 'coming down from the *bāmāh* (= sanctuary; see HIGH PLACE) with a lyre, tambourine, flute, and harp before them, while they prophesy' (1 S. 10 5). The forecast is fulfilled; Saul meets the *nebī'īm*; the spirit of God seizes him and he prophesies. Here the prophesying is a form of religious frenzy, for 'the spirit of God' in this context means a fanatical impulse to do honour to

1 *Brit. Quart. Rev.*, April 1870, p. 330.
2 *Religion of Israel to the Exile*, 131.
3 We reserve the question as to the true origin of the prophet Amos (see § 35).
4 *Ibid.* 123; cp AMOS, § 19.

Yahwè by putting aside all the restraints of civil life and social custom, and acting like a madman till physical exhaustion brings the fit of frenzy to an end. A variant of the same tradition (1 S. 19 24) represents Saul in his ecstatic state as stripping off his clothes and lying naked all that day and all that night.[1]

There is no tradition attributing such dervish-like experiences either to Moses or (apart from the late passage, 1 S. 19 20) to Samuel; and some scholars hold[2] that 'prophesying' was unknown to the Israelites till close upon the period when Saul aroused the warlike energies of his people against the 'Philistines,' that it made its way among the Israelites from the Canaanites, and that it was purified in its new home from its wildest extravagances at a later day. Against this view it is urged that the passage which is quoted in support of it (1 K. 18 26-29) refers apparently to prophets of the Tyrian—not the Canaanitish—Baal.[3] The present writer is unable to use this argument, for a reason which will appear later (§ 7). Instead of it he would urge that the two external signs of Israelite prophets, at any rate in the time of Ahab, were the hairy mantle (1 K. 19 13 2 K. 1 8, cp Zech. 13 4) and sacred marks in the forehead (1 K. 20 41). Both these signs point to a N. Arabian origin for the *nebī'īm*. The large mantle (*'abā'*), now commonly worn by the Bedouins, is almost invariably of goats'-hair, whilst the sacred mark on the *nābī'* is most probably a survival of the tribal mark which placed the Kenites under the protection of their tribal god Yahwè.[4] To this it may be added that Elijah, who is evidently brought before us as a typical *nābī'* of the older period, most probably came from a N. Arabian city in Israelitish occupation—Zarephath (see § 6)—and that probably he was accustomed to seek divine oracles outside of Palestine, at Horeb (cp MOSES, § 19).

It was certainly an error (cp SAMUEL ii., § 5) to represent Samuel as a director of the exercises of the dervish prophets (1 S. 19 20).[5] This is susceptible of direct proof. For in the early narrative of Saul's meeting with Samuel (1 S. 9-10) the latter is called not *nābī'* 'prophet,' but *rō'eh* 'seer'; and in 10 5 he clearly distinguishes himself from the *nebī'īm* whom Saul is to meet. It further appears from the narrative (10 11) that the wild behaviour of the prophets was not to every one's taste. For when Saul's old acquaintances saw him yield to the prophetic impulse, they said one to another, 'What has happened to the son of Kish? Is Saul also among the *nebī'īm?*' and two or three times[6] we find the 'prophet' (נָבִיא) called contemptuously a 'madman' (מְשֻׁגָּע). Even if the ecstatic phenomena of prophetism were not always as pronounced as in the case of Saul, the 'hand of Yahwè' certainly did not 'come upon' a prophet (cp 2 K. 3 15) without very striking effects. Scoffers may very naturally have referred to this, especially as the upper class as a rule was by no means responsive to genuine Israelitish religious feeling. No scoffs, however, could prevent the prophets from becoming a recognised sacred element in society, the tendency

[1] The scene of the two narratives is really the same. 'Gibeath-elohim' (1 S. 10 5) and 'Naioth (?) bārāmāh' (1 S. 19 19 *ff.*) have both, we believe, arisen from corruptions of 'Gibeath-Jerahmeel.' 'Ramah,' too, where it occurs separately, comes from 'Jerahmeel.' It is altogether an improbable hypothesis that 'Naioth' means a 'cœnobium' or cloister. See NAIOTH.

[2] So, *e.g.*, Kraetzschmar, *Prophet und Seher*, 9 *f.*

[3] See AHAB, § 3; BAAL, § 5. That the Baal is Tyrian is the ordinary view, from which, however, Kraetzschmar (*op. cit.* 14) dissents. Cp Budde, *Religion of Israel*, etc., 97, n. 1.

[4] See CAIN, § 5, and cp Stade, *ZATW* 14 314 *f.*

[5] For נִצָּב 'standing,' which is tautological, we should perhaps read מְנַצֵּחַ 'directing' (Klo., Bu.), in spite of the lateness of מנצח in usage. להקת, a ἅπ. λεγ. which EV renders 'company,' and G. Hoffm. and W. R. Smith 'fervour' (see *ZATW* 3 89), is really a dittogram of לקחת, and should be omitted. See Ges.-Bu., *s.v.* We do not compare 1 S. 3 20, because *nābī'* is there used in the sense of 'giver of oracles.'

[6] 2 K. 9 11 Jer. 29 26 Hos. 9 7 (?).

of which was to bind classes together by a regard for the highest moral and religious traditions. We cannot indeed prove that there was a succession of prophets from the time of Saul onwards. After the rising against the 'Philistines,' prophetism, so far as we can judge from the narratives, became a less conspicuous phenomenon. It is true, GAD [*q.v.* ii.] is called a *nābī'* in 1 S. 22 5 2 S. 24 11, and NATHAN [*q.v.*] in 2 S. 7 2 1 K. 1 8; and a prophetic discourse is ascribed to Nathan in 2 S. 7 5-16. But Gad's second title—that of 'seer'—is historically much more likely to be correct, whilst the figure of Nathan has too perilous a resemblance to Elijah to be accepted with much confidence; his name (see below, § 6) may indeed be historical, and also his adhesion to the party of Solomon, but beyond this we can hardly venture to go. The name of Ahijah 'the Shilonite' (1 K. 11 29 14 2 18), who supported the pretensions of Jeroboam b. Nebat, may also be historical; the particularity of the description of Ahijah is in favour of this view. See § 6.

5. Seers, prophets, and priests.

At this point, it is best to refer back to that early narrative of Samuel in which (1 S. 9 11 18 *f.*) he is so emphatically represented as a *rō'eh* or 'seer.' The word *rō'eh*, as here applied, is so rare (three of the passages [see § 1]—1 Ch. 9 22 26 28 29 29—are dependent on the narrative before us) that a scribe inserted *v.* 9 as an explanation. This passage runs, 'Formerly in Israel, when a man went to inquire of God, he said, "Come, let us go to the seer"; for he that is now called a prophet (*nābī*) was formerly called a seer (*rō'eh*).' Samuel was probably a priest,[1] and certainly a member of the class of seers (also called *ḥōzīm*, and, as in 1 S. 9 6 *ff.* Samuel himself is titled, 'men of God')—*i.e.*, he was one of those persons who, by an exceptional gift, could disclose to individuals at their request secrets of the present and the immediate future—such secrets as those which are mentioned in 1 S. 9 6 10 2-6. Like diviners, they received fees; Saul's servant suggests giving a quarter of a shekel to the seer of the unnamed city,[2] whose words, as he assures Saul, invariably come to pass (9 6). There is nothing specially Yahwistic about these clairvoyants; there were similar persons among the heathen Arabs, and at the present day there are sheikhs in Palestine who can be induced to perform such a service as was to have been asked of Samuel.[3] It was natural that 'seers' should also often be 'diviners.' In Mic. 3 7 'seers' (*ḥōzīm*) and diviners' (*ḳōsĕmīm*) are parallel, and in Nu. 24 Balaam of 'Pethor' (*i.e.*, REHOBOTH; see PETHOR) appears as a transformed and glorified 'seer' of the future, though his reputed calling was that of a diviner (Nu. 22 7 18).

May we venture to add that the old 'seers' were absorbed into the class of prophets? We find two 'seers' (or perhaps rather—see below, § 6—a 'seer') prominently mentioned again in the story of David (Gad, 1 S. 22 5 2 S. 24 11 *ff.*; Nathan, 2 S. 7 2 *ff.* 12 1 *ff.* 1 K. 1 8 *ff.*) as giving David divine oracles. Afterwards *nebī'īm* seem to take their place (cp the use of *nābī'* in 1 S. 9 9 28 6). It is conceivable that under David and Solomon more settled conditions favoured a gradual change both in the 'seers' and in the prophets. The story of Samuel in 1 S. 9 *f.* might be taken as symbolising the widening of the interests of the class of seers, and the story of Ahijah in 1 K. 11 29-31 (see Kittel) as indicating a parallel development of the prophets. Perhaps, however, it is safest not to generalise, at any rate from the story in 1 S. 9 *f.* There would of course always be 'seers,' just as there would always be diviners; indeed, the seers and diviners would

[1] See 1 S. 1-3, and cp Smend, *AT Rel.-gesch.*(2) 92 *f.*

[2] 'Cp the Arabic *ḥolwānu-'l-kāhin* (see Bokhārī, 4 219). Similar presents were brought to the older prophets (1 K. 14 3), and first-fruits were sometimes paid to a man of God; but the successors of Amos share his contempt for those who traded on their oracles (Mic. 3 5).' W. R. S.

[3] Wellh. *Heid.*(2) 135 *f.*; *ZDPV*, 1889, p. 202 *f.*

naturally outlive the prophets. So much at least is certain, that we cannot understand the consciousness of the later prophets without assuming that they had a natural gift akin to that of the 'seer' or clairvoyant (cp § 17). The prophet was, in fact, in some sense a 'seer' (Is. 30 10)—*i.e.*, he was a foreseer of the future of Israel as determined by God's everlasting laws, both as regards its general character, and sometimes (here a natural gift comes in) as to points of detail. But the prophet differed from the older 'seers' in that all his vision had a direct ethico-religious and national scope, whereas the 'seer's' vision had as a rule a purely secular and personal reference.

According to Robertson Smith,[1] the widening of the functions of the prophet is 'plainly parallel with the change which occurred under the kings in the position of the priestly oracle; the Torah of the priests now dealt rather with permanent sacred ordinances than with the giving of new divine counsel for special occasions. Yahwè's ever-present kingship in Israel, which was the chief religious idea brought into prominence by the national revival, demanded a more continuous manifestation of his revealing spirit than was given either by the priestly lot or by the rise of occasional seers; and where could this be sought except among the prophets? It does not of course follow that every one who had shared in the divine afflatus of prophetic enthusiasm gave forth oracles; but the prophets as a class stood nearer than other men to the mysterious workings of Yahwè, and it was in their circle that revelation seemed to have its natural home. A most instructive passage in this respect is 1 K. 22, where we find some four hundred prophets gathered together round the king, and where it is clear that Jehoshaphat was equally convinced, on the one hand that the word of Yahwè could be found among the prophets, and on the other that it was very probable that some, or even the mass, of them might be no better than liars. And here it is to be observed that Micaiah, who proved the true prophet, does not accuse the others of conscious imposture; he admits that they speak under the influence of a spirit proceeding from Yahwè, but it is a lying spirit sent to deceive' (cp § 23).

The typical 'seer' in the old narratives is Samuel; the typical prophet is Elijah.

6. Elijah—how far historical; his origin.

Unfortunately it is doubtful how far the striking scenes from the biography of Elijah in 1 K. 17-2 K. 2 can be regarded as historical. The subjective character of the narratives, as they now stand, is evident. We need not indeed take exception, on principle, to the wonders which so plentifully besprinkle them. That the prophets represented by Elijah healed the sick is altogether to be expected, nor need we limit them to such wonders, at least if Isaiah, in reliance on his God, really gave king Ahaz freedom to choose any sign that he pleased (Is. 7 11).[2] But the hand of an idealising narrator is plainly to be seen, not only in this or that detail, but also in the whole colouring of the stories. The sublime figure of Elijah, who has some affinity to Moses, has, according to critics, in some respects poetical rather than historical truth.

When, however, Kittel (*Kön.* in *HK*, 138, 174) is half disposed[3] to allow a sceptic to question the historical character of Elijah and Micaiah altogether on account of the singular appropriateness of their names ('Yahwè is my God,' 'Who is like Yahwè?') to their prophetic work, he is needlessly generous. Eliyyāhū and Michāyehū are surely nothing more than popular corruptions of 'Jerahmeel,' and symbolise the fact that the *nebī'īm*, like the *leviyyim*, were ultimately to a large extent of Jerahmeelite or N. Arabian origin (see MICAH, 1). Another corruption of the same name (Jerahmeel) is probably the name Ahijah, borne by the *nābī'* who encouraged the first Jeroboam, and his residence was very possibly not at the northern Shiloh but at Ḥalūṣah, a place in the Negeb consecrated by religious tradition, and mentioned, under strange disguises, not unfrequently in the narrative books (see SHILOH, ii.). Very possibly, too, גָּד הַנָּבִיא (*gād hannābī'*) and נָתָן הַנָּבִיא (*nāthān hannābī'*) —*i.e.*, 'Gad the prophet,' and 'Nathan the prophet'—are really corruptions of גָּד הַנְּדָבִי (*gād hannĕdābi*) and נָתָן הַנְּדָבִי (*nāthān hannĕdābi*)—*i.e.*, 'Gad the Nadabite' and 'Nathan the Nadabite.' Or still more probably, 'Gad' may be really a slightly miswritten fragment of *nĕdābi'*—*i.e.*, Nadabite—so that in 2 S. 24 11, where the text now gives גָּד הַנָּבִיא חֹזֵה דָוִד, 'Gad the prophet, David's seer,' we should rather read הַנְּדָבִי ח׳ ד׳ 'the Nadabite, David's seer,' and the real name of the 'seer' spoken of was Nathan, who as a rule is called הנביא—*i.e.*, הַנְּדָבִי.[1] The Nadabites were a N. Arabian clan.[2]

There is therefore no extravagance in the view, recommended both by textual conjecture and by historical considerations, that Elijah—and not only he but also Elisha (§ 7)—was a native of Zarephath (see TISHBITE), which appears to have been then the extreme S. limit of the Israelitish dominion. From Zarephath-jerahmeel (miswritten תשבי גלעד, 1 K. 17 1) and Rehoboth (miswritten כרית, *ib.* 3 5) he is said to have gone to the land of N. Israel to initiate a religious revolution. In this connection we may fitly quote a much-misunderstood passage of Amos (8 14), which should be emended thus,—'Those who swear by the guilt of Shimron (cp § 35), and that say, As thy God, O Dan, lives, and, As thy genius, O Beer-sheba, lives.'[3]

Whether the prophets represented by Elijah held the same religious position relatively to images of Yahwè as Amos, may be strongly doubted. We quote Am. 8 14 here, not at all to illustrate Elijah's views on images, but to show that the N. Israelites were in the habit of resorting to sanctuaries in the Negeb with which the legendary history of their race was probably connected (cp MOSES, § 17).

The Negeb, in which Horeb or Sinai itself (see SINAI) must have been situated, was the Holy Land of the Israelites; and it is conceivable that prophets of Zarephath, who had been filled with the spirit of Yahwè in the haunts of Moses, and especially at the most sacred of all mountain-shrines, may have wandered to the centre of N. Israelitish national life, and preached anew the austere doctrine of Moses,—viz., that Yahwè, Israel's God, was a jealous God, who could not tolerate a rival divinity, and that injustice and the shedding of innocent blood were contrary to his fundamental laws. Unfortunately, fresh problems have lately arisen, which forbid us to speak of these missionary journeyings as assured facts. We shall return to this subject later (§ 8 *ff.*).

We have spoken of 'the prophets represented by Elijah,' for we can no more believe that Elijah was the

7. Elijah and Elisha; the Aramæans.

only great prophet of Yahwè in the time of Ahab than we can credit the solitariness of the seer Samuel in the time of Saul. Indeed, not only does the independent narrative in 1 K. 22 tell us of Micaiah b. Imlah (and of four hundred[4] [?] more courtly and complaisant prophets of Yahwè who prophesied before Ahab), but the legend of Elijah itself refers to prophets of Yahwè (or Jerahmeel?[5]) whom Ahab's house-steward Obadiah ('Arābī?) hid from the rage of Jezebel in Mearah.[6]

1 Art. 'Prophecy,' *EB*(9).

2 The meaning of the above is that Isaiah would not have ventured on this bold offer if experience had not assured him that he could perform wonderful deeds. The probability must, however, be admitted that an early disciple of Isaiah glorified his master by exaggerating Isaiah's extraordinary power.

3 Only, it should be observed, as an extreme concession.

1 We are thus enabled to meet H. P. Smith's sceptical remark on the statement in 1 S. 22 5, that Gad 'belongs in the later history but not here.' The name Gad is due to misunderstanding, whilst the true name, Nathan, comes from Ethan, a N. Arabian clan-name which goes well with Nadabite (cp NETHANEEL). A N. Arabian seer is obviously quite at home in the early history of David.

2 Cp Nadab the Jerahmeelite, 1 Ch. 2 28; *Jonadab* the Rechabite.

3 See SHIMRON. Another evidence of the predilection of the N. Israelites for N. Arabian sanctuaries is to be found in Am. 5 25 (see SALMA), where the Israelites are distinctly charged with offering sacrifices and offerings to Yahwè 'in the wilderness of the Arabians.' Both Dan and Bethel were in fact most probably in N. Arabia; it was at Dan, or rather at the neighbouring Bethel, that the 'golden calf' was placed. See SHECHEM; also *Crit. Bib.*

4 On the 'four hundred' of 1 K. 22 6 18 19 22, see § 24.

5 In 1 K. 18 4 יהוה and מאה together may possibly represent ירחמאל.

6 In 1 K. 18 4 13, MT, a strange story is told of Obadiah's hiding a hundred prophets 'by fifty in the cave,' and 'feeding them with bread and water.' But ה[א]כלכלם and לחם ומים are surely both corruptions of ירחמאלים; so also perhaps is מאה (=חמא), whilst מערה is presumably a place-name—the Mearah (Zarephath?) of Josh. 13 4, for though, as the text now stands,

PROPHETIC LITERATURE

Did these prophets, according to an early tradition, come from the Negeb, which then belonged to N. Israel? The probability can hardly be denied; in other words, the Negeb was probably a nursery of prophets as well as of Levites. It is at any rate probable that Elijah and his successor Elisha both came from this great home of early Yahwism; and the view which makes the Negeb a prophetic centre will be strongly confirmed if we accept the theory that the Aramæans with whom the kings of Israel contended were not only (or even chiefly) the Syrians but also the Jerahmeelites (sometimes called אֲרַמִּים Arammim). Again and again disputed cities (the 'cities of the Jerahmeelites,' 1 S. 30 29) were captured by the Israelites,[1] and those Israelites who, like Elijah and Elisha, dwelt there were naturally eager for a divine judgment on their implacably hostile kinsfolk. When Elijah had made his complaint to Yahwè at Horeb, what was the divine response? 'Go, return on thy way to the wilderness of Cusham,[2] and when thou comest, anoint Hazael[3] to be king over Aram (Jerahmeel), and Jehu, b. Nimshi (?), to be king over Israel' (1 K. 19 15 *f.*). It is a necessary accompaniment of this view that Jehu, the furious driver, the remorseless shedder of blood,[4] was, like Jeroboam (see JEROBOAM, NADAB), and perhaps Joab (see ZERUIAH), partly of N. Arabian descent (see NIMSHI), and that when he was authorised by a prophet (of his own native town Zephath or Zarephath ?) to seize the crown of Israel, he was engaged in a war with the Arammites—*i.e.*, the anti-Israelitish section of the Jerahmeelites. This improves the historical plausibility of the narrative in 1 K. 19. That an Israelitish prophet should have disposed of the crown of Aram-Damascus is no doubt the reverse of probable. But an Israelitish prophet of Zarephath might conceivably have been mixed up with the political affairs of N. Arabia, like Jonah according to the legend (§ 44), and Jeremiah according to his late biographer (§ 40). The confusion between the two Arams, the two Hazaels, the two Jezreels, and perhaps the two Carmels, may have arisen comparatively early, so that the date of the narratives in 2 K. 9 and 10 in their present form need not be thrown into the post-exilic period.

It was, according to most scholars, the addiction of Ahab to the Tyrian Baal-worship that made Elijah (and the prophets whom he influenced ?) Ahab's open enemy. In reality, however, we believe, it can be proved (though the proof is doubtless complicated) that the form of religion which Ahab adopted and Elijah opposed was of N. Arabian origin.

From the N. Arabian border probably came the original *nebi'im*, and from the very centre of the neighbouring N. Arabian kingdom probably came Ahab's wife Jezebel.[1] The king's choice of a wife was no doubt dictated by political considerations (it has a parallel in the similar conduct of Solomon); but we must not ascribe the predilection of the Israelites for N. Arabian Baal-worship exclusively to Jezebel. The prophets, as we shall see, are continually rebuking the N. Arabian religious tendencies of their people after the time of Ahab, and these tendencies were so natural that we need not suppose them to have arisen in consequence of Ahab's Miṣrite alliance.

How far Jezebel is responsible for Ahab's despotic methods (cp 1 K. 21 7 *ff.*) is also doubtful. At any rate, the court encouraged a form of religion and a method of government which Elijah (and his followers ?) could not sanction. Society appeared to him (or, them ?) to be rotten to the core; only 7000 (a round number) would escape the sword of divine judgment, and become the kernel of a regenerate people (1 K. 19 18). Elijah himself (outdoing the *nebi'im* of the time of Saul, who apparently did not actually resort to violence) is said to have slain the 450 prophets of Baal who 'ate at Jezebel's table,' with his own hands (1 K. 18 40), and to have pointed to Elisha as the supplementer of the destroying operations of Jehu (1 K. 19 17).

We shall return to the narratives of Micaiah and Elijah in connection with the subject of 'false prophets' (§ 24). We now proceed to the somewhat difficult story in 2 K. 1, relative to Ahaziah's embassy to the sanctuary of Baal-zebub (?), and the stern conduct of Elijah towards the 'captains.' The story belongs to the life of Elijah, but was very possibly edited later. Knowing what we do of Elijah's origin, we can in some important respects correct the traditional acceptation of the narrative. The scene of the original tale must have been the Jerahmeelite highlands. BAAL-ZEBUB (or perhaps rather Baal-zebul) was probably the Baal, not of Ekron (עקרון, partly corrupted, partly altered from ירחמאל, as, *e.g.*, in 1 S. 5 10), but of Jerahmeel, and the 'mountain' on which Elijah was sitting was Mt. Jerahmeel (in 1 K. 18 19 42 called 'Carmel'). The Jerahmeelite sanctuaries were favourite places of resort for the Israelites, and Elijah himself haunted the bleak summits in the neighbourhood. It is the biography of Elisha that tells (2 K. 2) how, 'when Yahwè would take up Elijah into heaven,' the prophet was dwelling, together with Elisha, at *haggilgal* (EV Gilgal), whence the two 'went down' to settlements of *bnē hannebī'īm* (*i.e.*, members of a prophetic society) at Beth-el[2] and Jericho. Nowhere else does the tradition bring Elijah into contact with other prophets, except indeed when he meets with the man who is to be appointed[3] prophet in his room. The localities mentioned are probably not those which were named in the original story. Elisha, like Elijah, is a prophet of the Negeb; the present text calls him 'son of Shaphat' (1 K. 19 19), but 'Shaphat,' as usual, is a corruption of 'Zephath'—*i.e.*, Zarephath (see SHAPHAT); and Abel-meholah is a distortion of Abel-jerahmeel, which is equivalent to Abel-mizrim, the name of a place on the border of the N. Arabian Muṣri, where, according to the most probable reading of Gen. 50 11, Joseph made a second mourning for his father. 'Abel-mizrim' is further defined in that passage as being 'in Arab-jerahmeel.'[4] We now see where the Gilgal of 2 K. 2 1 must have been situated. It must have been in the Negeb of Jerahmeel (see,

Mearah was a Zidonian city, it has been shown (see MEARAH) that the original text must have spoken, not of the Zidonians (צירנים), but of the Misrites (מצרים), and further that 'Mearah' (מערה) is probably a corruption of צרפת (Zarephath). We now understand why Obadiah (?) assumes that Elijah knew of his good deed; Elijah was himself a native of Zarephath (see TISHBITE). We can also detect the true name of Ahab's house-steward; 'Obadiah' is probably a later writer's transformation of 'Arābī 'Arabian' (cp § 28), and we can hardly help admitting that the 'Carmel'—*i.e.*, 'Jerahmeel'—of the original tradition was not the famous headland of that name but some part of the Jerahmeelite highlands. It will be noticed that 'fifty' (חמשים) in 1 K. 18 4 13 remains unaccounted for. It is probably a corruption of an ethnic name such as Miṣrim. The prophets were hidden from the fury of Jezebel the daughter of Miṣrim.

[1] 2 K. 14 28 (a desperate passage according to some!), which should probably run, 'how he recovered Cūshām (or less probably, Kidshām) and Maacath-jerahmeel for Israel.' See *Crit. Bib.*

[2] דמשק has, we believe, not unfrequently supplanted the original reading כּוּשָׁם Cusham (=Cush), or perhaps sometimes קִדְשָׁם Kidsham (=Kadesh).

[3] See Schr. *KAT*(2), 207. Possibly there is a confusion between 'Hazael' and Zuḥal ('brilliant'=Saturn), which would be a very suitable N. Arabian name.

[4] There is reason to suspect that the massacre described in 2 K. 10 really occurred at the southern Jezreel (cp col. 3890, n. 1), Jehu having been engaged in a war with the southern Arammites or Aramæans (as maintained above). This only adds one more to the already long list of narratives which have been altered by changes in the geographical setting.

[1] Jezebel (? Baalizebel) is called the daughter of Ethbaal (? Tobiel), king of the Zidonians. But צירנים is one of the possible corruptions of מִצְרִים (Miṣrim), and Elijah's sphere of activity was in the N. Arabian border-land.

[2] Cp 1 K. 13 11, where we read of an 'old prophet' who dwelt at Bethel (a southern Bethel ?). He is certainly not the only one in the place.

[3] In 1 K. 19 16 (end) read, not תמשח, but תָּשִׂים, 'thou shalt appoint.' A metaphorical use of the term 'anoint' is not natural. (See ANOINTING, § 3 *b*.)

[4] For בעבר הירדן we should undoubtedly read בערב ירחמאל.

PROPHETIC LITERATURE

however, GILGAL, § 4); 'Gilgal,' or 'Haggilgal,' is one of the common popular corruptions of Jerahmeel (see SAUL, § 6). 'Bethel,' too, is not the famous Bethel on the central Palestinian mountain range, but a sanctuary in the Negeb, not improbably the sanctuary of Dan, where the golden calf was (cp PENUEL), while 'Jericho' (יריחו) is a corruption of 'Jerahmeel' (ירחמאל), which is probably an abbreviation of Kadesh-jerahmeel. (We may venture in passing to suppose that in the original tradition Elijah, like his great prototype Moses, disappeared from human sight on a sacred mountain-top; in fact, Horeb was probably very near Kadesh.[1]) We thus obtain a confirmation of the theory that the N. Arabian border-land was the true nursery of the *nebī'īm*.

Elijah and Elisha[2] were both men of practical aims; but Elisha saw something which, according to the extant reports, escaped the attention of Elijah—viz., that an extensive, as well as intensive, influence on the affairs of Israel could be exerted only by well-organised societies of prophets under one head. Where did these societies reside? To answer this we must refer to the passages in which the phrase *bnē hannebī'īm* occurs. These are 1 K. 20 35 2 K. 2 3 5 7 15 4 1 38 5 22 6 1 9 1. The first passage relates to a period within the lifetime of Elijah, but has the appearance of being a late insertion (see Kittel); the name of the place from which the prophet came is not mentioned. The passages in 2 K. 2 have been dealt with already (§ 7). In 2 K. 4 1 no place is named, but either Gilgal (cp *v.* 38) or Mt. Carmel (cp *v.* 25) would seem to be intended; in *v.* 38 Gilgal (*haggilgal*) is expressly mentioned. In 5 22 Mt. Ephraim is referred to as the place from which the young prophets have come. In 6 1 and 9 1 one or another of the principal settlements of the prophetic societies must be meant; in the former case, the settlement was within easy reach of the Jordan; in the other, of Ramoth-gilead.

8. Societies of prophets.

In all these passages or their contexts, however, except the first, corruption of the text may be suspected. In 1 K. 4 25 and 38, 'Gilgal' and 'Carmel' are both corruptions of 'Jerahmeel'; some place in the mountain-region of the Jerahmeelite Negeb[3] is evidently meant. The 'Mt. Ephraim' of 5 22 is surely a corruption of 'Mt. Jerahmeel'[4] (as in Judg. 17 1 1 S. 1 1). In 6 1 *ff.* הירדן ('the Jordan'), where the prophets cut down timber, and where the iron was made to swim, is surely an error for ירחמאל, 'Jerahmeel' (as in 1 K. 17 5); some place where there was a well-known piece of water must be meant—perhaps Kadesh-jerahmeel. Lastly, 'Ramoth-gilead,' where Jehu and his brother-officers were (9 1 *ff.*), is very possibly an error for 'Jerahmeel,' or for some compound place-name into which 'Jerahmeel' entered.

We cannot therefore be certain that there were any settlements of prophets in N. Israel. It is possible that when the prophets had any mission to discharge in N. Israel, they only remained there as long as was necessary for their work, and that when this had been done they returned to their southern homes. If it was really at the northern Bethel that Amos prophesied against the house of Jeroboam, we might quote this as a parallel, for Amos was probably (§ 35) a native, not of Tekoa, but of Kadesh-jerahmeel. Elisha himself is said to have resided specially at Gilgal (2 K. 2 1 4 38) and Samaria (2 K. 5 3 6 32 'in his house'). It is remarkable, however, that nothing is said of his having with him any *bnē hannebī'īm*, and that to all appearance he goes to 'Damascus' alone. It may, of course, be said that Elisha (who receives first-fruits [2 K. 4 42] as if a consecrated person) was fenced in by supernatural powers. Still, it is not likely that the original tradition represented either Elijah or Elisha as making such distant journeys alone, for we must take leave to build upon the hypothetical result which we have already reached—that both these great prophets arose on the N. Arabian border—in the so-called Negeb. We have, then, to consider whether 'Damascus' and 'Samaria' may not be due to a misunderstanding. That דמשק (Damascus) in 2 K. 8 7 is miswritten for כּוּשָׁם (Cusham) follows from the right emendation of 1 K. 19 15 (see above, § 7); and when we have realised the existence of a place in the Negeb called שִׁמְרוֹן (see SHIMRON), and the frequency with which the geography of the original traditions has been transformed by editors, we cannot help seeing that Shimron is a much more natural place for a prophet of the Negeb to visit than Shōmĕrōn (Samaria).[1] Shimron is, in fact, most probably referred to again and again in the Book of Amos.

[1] Cp NEBO, MOUNT.

[2] The birth-names of these prophets appear to have been unknown. 'Elijah' as we have seen, comes from Jerahmeeli; 'Elisha' is also, no doubt, a corruption of an ethnic name, very possibly of Išmā'ēlī (Ishmaelite).

[3] It should be added that Shunem in *v.* 8 as in 1 S. 28 4 (see SAUL, § 6) has probably come from ESHEAN [*q.v.*]—*i.e.*, Beer-sheba—and that Baal-shalisha (*v.* 42) in the original story was a place in the Negeb (cp Gen. 46 10, SHAUL).

[4] Cp MICAH, 1; RAMATHAIM-ZOPHIM.

Before summing up our results, we would remind the reader that the only way to solve the most difficult problems of the OT is to keep before us the different possibilities until by a gradual clearing-up of our mental atmosphere one of the possibilities becomes a very strong probability. We have done all that we could to put the facts in a clear light, so that one of two possibilities may be recognised as being in the highest degree probable. The Jerahmeelite Negeb, according to our theory, belonged at this time to the N. Israelites, who made constant pilgrimages to the venerable sanctuaries of this region. It was in the Jerahmeelite mountain-country ('Carmel') that Elijah and the prophets of Baal had their contest. Ahab came thither from the Jezreel in the hill-country of Judah, where he had been residing. After the contest both Ahab and Elijah went to Jezreel. Then Elijah went to Beer-sheba, and from Beer-sheba to Horeb. Possibly it was from Horeb that the original story made the second Moses go up into heaven. Elisha, too, intervened in public affairs as a prophet of the Negeb. It was a N. Arabian and a half-Jerahmeelite whom he singled out (as Samuel singled out Saul, and Ahijah chose Jeroboam) to be kings of Aram (Jerahmeel) and Israel respectively; and his traditional haunts (with the exception of Dothan, 2 K. 6 13) can all, by emendation of the text or otherwise, be identified with places in the Negeb. There is no reason to deny that the story of Elijah and Elisha in this revised form has some basis of fact, though it is possible that, even in what we suppose to have been the original form of the narratives, the interests of the prophetic order led to some unhistoric fictions and exaggerations.

9. Summary of results.

Two of the most interesting passages for the comprehension of prophecy as it really was in the ninth century are 2 K. 3 15 and 4 23. The former passage runs, 'And now bring me a minstrel. In fact, so it was, that as often as a minstrel played, the hand of Yahwè came upon him.' We see from this that a prophet like Elisha still needed artificial stimulants to bring about the psychic condition necessary for the prophetic impulse. The latter passage runs, 'And he said, Why dost thou go to him today? It is neither new moon nor sabbath.' It was usual then to select a specially sacred day for a visit to a prophet, who was presumably to be met with at or near some sanctuary. (See NEW MOON, § 1.)

It is natural to turn now to the singular narrative in the Book of Amos (7 10-17). The passage has been treated already (AMOS, § 1, col. 147); but it is necessary to return to it in this connection. Plain misunderstandings have led to corruptions of the text in other parts of the book, and it is likely that this has been the case also here. That Amaziah the priest of Bethel was the antagonist of Amos, is indeed a fact beyond dispute. A misunderstanding there has certainly been, but it has not affected the reading of the text. The error has lain in supposing that the Bethel to the N. of Jerusalem on the road to Shechem is meant; in reality, we believe, it was the southern Bethel, which probably contained the sanctuary of the 'golden calf,' and was close to Dan (= Ḥaluṣah?). Here a prophet would meet not only with the Israelites of the Negeb but also with representatives of N. Israel, such as those whom he addresses with keenest irony in 4 4 *f.*[2] We have, in fact, no sure evidence that Amos ever left the Negeb.

10. Amos and Hosea; historical position.

[1] Cp 2 K. 2 23 25, from which it appears that the places called in our text Jericho, Bethel, Mt. Carmel, and Samaria were within an easy distance of each other. The names should probably be Rehoboth, Bethel (=Dan), Mt. Jerahmeel, and Shimron, all places in the Negeb.

[2] 'Come to Bethel and transgress; to Haggilgal (Jerahmeel), and transgress abundantly . . . for these practices ye love, O sons of Israel.'

PROPHETIC LITERATURE

Amos himself was 'of Cusham-jerahmeel,' according to a very probable correction of obscure and doubtful words in 7 14 *f.* We shall have to return to this subject in treating of the growth of prophetic literature (§ 35). Suffice it to add here that this result (see § 36, for a similar result as to Hosea) increases our suspicion that, according to the original tradition, Elijah, or the prophets whom Elijah's grandly poetic figure represents, never really left the Negeb. If so, we may justly ask, Was not the want of high-minded prophets living and working in N. Israel one of the chief causes of the moral decadence of the people?

Amos and Hosea mark a turning-point in the history of prophecy. 'Till Amos, prophecy was optimist—even Elijah, if he denounced the destruction of a dynasty and the annihilation of all who had bowed the knee to Baal, never doubted of the future of the nation when only the faithful remained; but the new prophecy is pessimist—it knows that Israel is rotten to the core, and that the whole fabric of society must be dissolved before reconstruction is possible. And this it knows, not by a mere ethical judgment on the visible state of society, but because it has read Yahwè's secret written in the signs of the time and knows that he has condemned his people. To the mass these signs are unintelligible, because they deem it impossible that Yahwè should utterly cast off his chosen nation; but to those who know his absolute righteousness, and confront it with the people's sin, the impending approach of the Assyrian can have only one meaning and can point to only one issue, viz., the total ruin of the nation which has denied its divine head. It is sometimes proposed to view the canonical prophets as simple preachers of righteousness; their predictions of woe, we are told, are conditional, and tell what Israel must suffer if it does not repent. But this is an incomplete view; the peculiarity of their position is that they know that Israel as it exists is beyond repentance.'[1]

11. Pessimism of 8th cent. prophets.

It would be delightful to be able to add that, even when they feared the worst, Amos and Hosea still preserved an earnest faith in the future of their people. Consistent criticism, however, does not permit us to hold this to have been the case (see AMOS, § 17, HOSEA, § 8); and even if we are startled at the result, we cannot deny the grandeur of the men who could live noble lives supported solely by the thought of the unique reality of God. Their inspiring thought seems to have been this.—Let even Israel disappear, so long as Yahwè's righteousness is proved.

Nor can it by any means be regarded as certain that Isaiah modified the stern message of his predecessors so far as to allow room for the salvation of a remnant. He does indeed once appear to entertain the possibility of a national regeneration after the impure elements in the body politic have been removed; but it seems a hopeless task to recover any of the utterances of the prophet on which the present text of 1 2-26 is based,[2] and we cannot feel perfectly sure that 1 25 *f.* expresses his real anticipation at any time. At any rate, in the oracle grafted upon his inaugural vision (6 9-13) Isaiah holds out no prospect for the people but destruction,[3] and his final prophecy closes with the words, 'This iniquity will not be expiated for you till ye die' (22 14; see *Intr. Is.*).

The traditional name of his son 'Shear-jashub' has indeed been thought to be a proof of an at least temporary belief in a 'remnant'; but it is not at all certain that this reading of the name is correct; it neither fits in well with the context, nor suits the analogy of the equally traditional name in Is. 8 3.

Nor is Isaiah's younger contemporary Micah any more cheering in his description of the future. The closing utterance of his genuine prophecy (1-3) announces the desolation of Jerusalem (including the temple) as the centre of all the corruption which spread through the people of Judah (see MICAH [BOOK]). We may admit that a ray of hope may now and then have visited even these notable pessimists; but Giesebrecht (*Berufsbegabung*, 82 *ff.*) makes too much of this possibility through his excessive confidence in the strict authenticity of passages like Am. 5 4 6 14 *f.* 24 Hos. 2 7 16. It is probable that even the first editors of the early prophetic writings (disciples of the prophets?) sought to blunt the edge of too keen denunciations, and certain that exilic and post-exilic editors went to great lengths in neutralising the vehemence of such denunciations by inserting very positive assurances of happiness to a regenerate people of Israel (cp ISAIAH i., § 2).

T. K. C. (§§ 1-11).

12. Prophetic teaching; its reception.

The frank utterance of their convictions by the prophets caused great excitement, and their relations with the mass of the people became very strained (Am. 7 10 *ff.*). For in prophets and people two conflicting conceptions of God were at work. In the popular opinion Yahwè was the national God whose honour was inseparably bound up with the continued existence of Israel; the prophets on the other hand ranked the ethical and the spiritual elements in the idea of God above all besides, so that in their view Yahwè's connection with the nation of Israel was only one out of the many means by which he could carry out his wise purposes.

It would be incorrect, however, to suppose that Amos and Hosea, as the earliest of these prophets, were the originators of the spiritual conception of God in Israel. They themselves declare that the God who sends them has long been known to Israel (Am. 2 9 *f.* 3 1 Hos. 11 1). It is, according to them, not Yahwè but Israel that has changed; it is Israel therefore who must return. They charge the people in the first instance, not with the worship of foreign deities, but with neglect of the law and order that have been established in the name and under the protection of Yahwè, and with observing the still surviving heathenish worship and superstitions of Canaan. They count it a sin that Israel values a heathenish civilisation more than the true knowledge of Yahwè and obedience to his will. Accordingly, they undertake to recall the people to the duty which it long ago assumed, and they point out the choice which lies before it: heathen life and, with it, ruin, or cleaving to Yahwè and consequent national stability.

It cannot indeed be denied that the prophets put Israel's duty on a higher plane than it had hitherto occupied, and to many of their contemporaries the whole region of thought in which Amos and Hosea moved may well have seemed new and strange. The real novelty, however, consisted, not in any hitherto unheard-of doctrine as to the being or will of Yahwè, but in their uniform adoption of the spiritual conception of God as their standard in estimating the attitude of the people towards Yahwè. Before them no one had thought of applying this standard with the same rigour and breadth; and the more they themselves applied it, the more powerfully did the true Israelite conception of God shine out, purified in their own inner being.

Is there any evidence for a similar effulgence of the noble metal from amidst the dross of popular belief in the older period? There is not; but we must unfortunately confess that we have no such means of reproducing the individual Israelite's inner world during that period as we possess in the case of the prophets of the eighth and seventh centuries whose writings are still extant. This, however, at any rate we do know—that from the earlier age the great conception of the peerlessness of Yahwè among the gods had come down to the prophets, so that it was now possible to conceive of Yahwè as the mighty ruler of the world and the controller of its destinies.

The recognition of Yahwè's importance was promoted

[1] WRS 'Prophecy,' *Ency. Brit.*(9).

[2] *SBOT* 'Isa.' (Heb.), p. 110, l. 16. The view that ch. 1 came from Isaiah's pen in something like its present form seems untenable. See *Intr. Is.* on ch. 1.

[3] See col. 2181, n. 1. Even without a complete textual criticism of the whole passage, the improbability of the closing words in MT (see RV's rendering, which, however, wrongly inserts 'so,' as if a part of the text) is very manifest (see Hackmann, *Die Zukunftserwartung des Jesaia*, 72, n. 2).

by the fact that from about 1000 to about 750 B.C. united Israel was the strongest people in Syria, that even Egypt was unable to break its power; and equally propitious was the violent reaction called forth in the eighth century within Israel itself by the conduct of kings like Ahab. That conduct had no doubt its political grounds. Ahab's object was to develop relations of friendship between Israel and the neighbouring heathen nations. Elijah, Elisha, and the guilds of prophets under their influence were opposed to this policy. They had points of contact with the Nazirites and Rechabites, and a similar affinity may be traced between these champions of the original Israelite type of piety and the prophets of the eighth and seventh centuries.[1] It is true, the prophets did not share the repugnance of the ascetics to accepting the good things of civilisation; but they were quite as much bent on extirpating the heathenish element from Israelitish life. Elijah's zeal for Yahwè, which Jehu turned to account in drastic style for the establishment of his own dynasty (2 K. $10_{1\text{-}28}$), revived, but in another form. To banish the Tyrian Baal[2] from the territory of Israel was no longer needed; it was now much more important to combat the dangerous opinion that Yahwè himself was only to be worshipped like one of the Ĕlōhīm. Is Yahwè to be thought of in the heathen or in the Hebrew manner? That was the point on which the prophets of the eighth and seventh centuries wished to instruct their contemporaries. The old antitheses remained; but they had become subtler and were more profoundly apprehended.

13. Attitude of prophets.

From the dogmatic point of view one might feel surprise that men like Amos did not begin with the sentence, 'There is no God but Yahwè.' These prophets, however, clearly did not regard it as their vocation to give instruction in doctrines. Thoroughly penetrated with a sense of the unique greatness and power of Yahwè, they exhorted the people to fear Yahwè, to follow his precepts, and to put their trust in him. It was precisely in this that they maintained continuity with the exponents of the religion of Israel in preceding centuries, who also never doubted Yahwè's sovereign power, as not only Elijah and Elisha, but also the narratives of the Yahwist and still more of the Elohist, abundantly show. The question whether besides Yahwè there are or are not other gods, did not come to the front. What the prophets contended for primarily was the holy law and the morality in which from ancient times the will of Yahwè, Israel's God, had been distinctly made known (Am. 5_{15} $_{24}$ Hos. 8_{11} *f.* Is. $1_{10\text{-}17}$ Mic. 66-8). Elijah himself had already recognised this as the task assigned to him (1 K. 21).

The prophets now referred to were not politicians in any strict sense of the word. We know of no instance in which, like Ahijah (in the case of Jeroboam I.) or Elisha (in the case of Jehu), they brought about a change of dynasty in Yahwè's name. They expressed their mind, from the religious point of view, as to what had happened or was about to happen, and also (*e.g.* Isaiah) claimed to be consulted in political affairs. What they professed to do here, however, was not to give political counsel, but to exhort, to predict; and their predictions and exhortations were of no service to politicians, presupposing as they did the conviction that God alone is to be recognised as the maker of history. For the kings of Israel and the politicians in general (to whom they were mostly opposed) the prophets were very embarrassing persons. By the prophetic utterances adverse to the policy of the rulers they inevitably weakened the popular confidence in the government. The position was complicated by the fact that there were prophets equally claiming to speak for Yahwè, who said the contrary of what was said by those whom we generally call the higher prophets, but who called themselves the true prophets of Yahwè (see § 14). H. G. (§ 12 *f.*)

[1] Cp Budde, 'Das nomadische Ideal im AT' in *Preuss. Jahrbb.*, Bd. 85 (1896), Hft. 1 57 *ff.*, and in *New World*, Dec. 1895.

[2] [According to the ordinary view. But cp § 7.]

[We cannot rightly estimate the lower prophecy, until we have more systematically studied the phenomena of the higher. We therefore proceed to take a survey of the phenomena of the prophetic consciousness, not losing ourselves in a superabundant mass of details, but selecting such as throw most light on the difficult subject before us.]

14. Prophetic consciousness.

What is it, then, that the persons whom their contemporaries, and doubtless for the most part themselves (see Hos. 9 8 [?], Is. 8 3, but cp Am. 7 14), called *nĕbī'īm*, have to tell us respecting their inner experience?

First of all, they declare that their office was not of their own choosing; it was Yahwè who 'took' them (Am. 7 14 *f.*). In more than one case they describe the precise moment at which they first became aware of their prophetic vocation; it was a moment at which, as they express it, they saw God and received their commission from his own mouth (Is. 6 Jer. 1 Ezek. 2; cp Paul in Gal. 1). This final vision is of course but the latest phase in a long process. What the soul of the prophet in the first instance begins to experience is God's drawing it towards himself; emotion is powerfully quickened thereby, and in the vision that ensues it becomes objectively clear and certain to the prophet that the drawing and the emotion of which he was conscious are from Yahwè, and their meaning is made plain. The attitude of the prophet towards this call varies in each case according to individual idiosyncrasy. A straightforward, direct, and simple nature like that of Amos feels himself taken from following the flock[1] (Am. 7 15), quickly rises up and sets forth to carry out Yahwè's command. In Isaiah's case a voluntary and free human resolution goes along with the divine calling; Jeremiah is overmastered only by force (1 6; cp the reluctance of Moses in Ex. 4 10 *ff.*), and subsequently we find him complaining bitterly of the vocation that has been thrust upon him and wishing to withdraw from it (9 1 11 10 20 7 *ff.*); he curses his day (20 14 *ff.*), reproaches Yahwè with having beguiled him and with continually renewing the slavery from which he cannot get free (20 7 *ff.*). Ezekiel after his call feels as if he had been smitten to the ground by a mighty blow, and in the agitation of his spirit he sits silent and astonied for seven days (3 14 *ff.*). It is precisely in the compulsory character of the prophetic vocation that we are to seek the proof of its divine origin. The prophets' assurance of their divine mission is shown in their fidelity to it, even to death and martyrdom, if need be, and in the sharp distinction which they draw between themselves and the so-called 'false' prophets.

15. Prophet's God speaks through him.

In the next place, the prophet gives forth only that which Yahwè has spoken to him. He utters nothing of his own motion, but feels himself to be wholly the instrument of God (Jer. 1 7 cp Ex. 4 15 *f.* with 7 1). Yahwè speaks with the prophet; the prophet stands in the council of God and hears his word (Jer. 23 18 Ezek. 3 4); Yahwè tells him or shows him his purpose beforehand (Am. 3 7 7 1 Is. 18 4); he touches his mouth and put his words into it (Jer. 1 9 Dt. 18 18); the prophet eats them (Jer. 15 16 Ezek. 2 8 *ff.*). Yahwè opens the prophet's mouth (Ezek. 3 27), answers his questions (Hab. 2 1 *ff.*), fills him with the fury and indignation of Yahwè (Jer. 6 11 15 17). The prophet for his part faithfully speaks all the words that Yahwè commands, keeping back nothing (Jer. 26 2). So completely does the prophet refer his utterances to Yahwè as their only source, that he frequently represents Yahwè as being himself the speaker.

[1] [It is only the proximity of a passage which is clearly corrupt (Am. 7 14) that may perhaps make the text of Am. 7 15 appear uncertain. See § 35.]

Let us note the consequence of this. The truth of the words of the prophet is to him absolutely certain because they are the words of Yahwè (Am. 4 2 Hos. 5 9 Is. 17 24 *ff.* Jer. 1 11 *f.* Ezek. 12 28); even when there is delay he doubts not (Hab. 2 3). It is not the fulfilment that first gives the prophet faith in his message; the message carries its certainty in itself.[1] Nay, more; the prophetic word has an inherent energy; it works like a curse or a blessing, which, according to ancient ideas, had the power of bringing divine forces into operation (cp BLESSINGS AND CURSINGS). Thus, the woe which the prophet pronounces in the name of Yahwè works the woe of Israel (Zech. 1 6). Hence, if the text is right, Hosea (6 5) says that Yahwè 'hews' or 'slays' by the prophets; they are, so to speak, like implements in Yahwè's hand; kingdoms are pulled down and set up by their means (Jer. 1 10). The word of Yahwè does not return to him void (Is. 55 11); his word is as fire and as a hammer (Jer. 23 29 5 14).

16. Prophet's task.

The equipment for the prophetic vocation corresponds to the task involved in it. The task is at once general and special.

(1) The prophets are in the first place in a general sense, like other personalities, organs of revelation, or rather of education, whose function it is partly to awaken in other men the power of discerning God, partly to give an example in themselves of fellowship with God. For this vocation God trains his prophet by intimate communion with himself—for example, by constant warnings keeping him close beside him (Is. 8 11 *f.*).

(2) On special occasions the organs of revelation have a special task. The task of the prophet is to declare the divine purpose to the people beforehand. And if we would know more particularly what the prophet's distinctive mission is, we must give close attention to the classical formula for the prophetic utterances. This formula did not run, 'If you do this or that, then this or that will come upon you'; it is, 'Woe unto you who have done thus and thus' (Jer. 5 8 *ff.*), or 'Hear this word, ye that have done thus and thus; verily the judgment of Yahwè shall come upon you' (Am. 4 1 *ff.*). The prophetic utterance is thus, at least in the classical period, apodictical not hypothetical; a feature which we find again in the formula of the preaching of Jesus (Mt. 4 17). True, Yahwè can at any time withdraw the judgment he has decreed, and his threatenings are sometimes uttered for the purpose of bringing about the repentance of the people, and thereby also an alteration in his plan (*e.g.*, Jer. 18 7 *ff.*); but the prophets are not primarily preachers of repentance, as is seen clearly enough in their predictions respecting foreign nations; rather they are announcers of the advent of Yahwè,—it may be for wrath, or it may be for salvation. The prophet may best be compared to a watchman who from his high tower (cp Hab. 2 1) sees the approaching storm and calls out, 'Alas, it comes,' so that any who will may seek shelter while yet there is time.

If now this is the task of the prophet—to declare beforehand the purpose of God—his gift must be that of foreseeing the future. The prophets are seers on a grand scale. They do not utter merely general predictions; they also give particular details (the instruments of the judgment and the manner of it, time and place of punishment, name of the liberator, etc.), and prophecies concerning individuals. As if by a sudden inspiration, they are able to declare to individual men their fate (Am. 7 16 *f.*).[2]

How are we to regard the peculiar power of vision possessed by the prophets? It is not entirely to be explained from their religious and moral discernment—that is put out of the question by the manifold details of the prophecies; neither yet is it to be wholly attributed to 'divine inspiration'—that is excluded by the vacillations and illusions of the prophets.

17. Prophet's power of vision.

The truth is, that the human and the divine lie close together. In many cases, doubtless, a prophet possessed a natural faculty of presentiment or semi-conscious discernment (*Ahnung*), which became intensified both by intercourse with the supersensuous world and by constant occupation with the affairs and occurrences of the time. Thus the familiar converse which Yahwè vouchsafed to the prophet enabled him to form a correct judgment as to the character of the people (Ezek. 2 3 *ff.*) and its public institutions, gave him clearness of vision for the history of the past (Jer. 3 6 *ff.* Ezek. 16), a sound understanding for the signs of the times and for the purposes of the divine governor of the world. The ideal experienced by himself, in advance of his time, in his intimate fellowship with Yahwè, he anticipated for the whole community in the future, and thus made it the subject of prophetic promise (cp Jer. 31 31 *ff.*). By this, however, we are still far from having explained all general and special predictions. Can they be explained without passing out of the region of philosophical theory? Without denying the existence of a background of physical elements, may we not believe that God really made confidential disclosures to the prophets concerning the future?

Let us endeavour to throw light on the matter by going as far back as we can in the historical process of revelation in the OT documents. In Exodus Yahwè made known his jealous exclusion of rival divinities through Moses: 'thou shalt have no other gods before (or, beside) me.' This was the first stage; the religion of Yahwè is already exclusive, but is not as yet ethical. It was through the prophets in the centuries immediately before the exile that the God of Israel revealed his ethical character, and the unchanging character of his historical manifestation. The first, his ethical character, he made known by the prophetic announcement of *judgment;* for in this threatening the demand for higher principles than those current among the people of Israel was unmistakably expressed. The second, his oneness in history, he showed by announcing the judgment *beforehand;* for when the prophecy found its fulfilment, it was a proof that it had been so ordered by God, and that the God of the present was identical with the God of the past. This then is the reason why we assume that God disclosed future events to the prophets —viz., that he thus made himself universally known as the maker of history. The justice of this observation is shown by Is. 40 *ff.*; for the Second Isaiah, the great teacher of monotheism, finds one of his proofs for the uniqueness of Yahwè in this—that he has declared the things that are to come, which was beyond the range of the pretended gods (41 26 43 9 *f.* 44 7 *f.* 45 21, etc.). In this sense the prophets themselves are 'signs and portents in Israel' (Is. 8 18; cp Ezek. 24 24-27.)

The process of revelation itself is obscure.

18. Process of revelation.

1. The prophet himself is helpless. He cannot constrain the revelation to come by means of ecstasy or the like; it comes upon him as a demonic power (Am. 3 8);[1] the hand of Yahwè overpowers him when Yahwè speaks with him (Is. 8 11 Ezek. 1 3). The prophet 'is like a

[1] Jer. 28 9 (cp Dt. 18 21 *f.*) is a later correction of the earlier theory. Cp § 25.

[2] [Perhaps this passage should be taken in connection with Am. 5 27 (see SALMA); Amaziah is a representative of his people.]

[1] [The 'demonic power' of revelation is strikingly shown in the story of Balaam, who is at once a 'seer' of Yahwè and a prophet (MOSES, § 17). 'Rise up, go with them; but yet the word that I shall say to thee, that shalt thou do' (Nu. 22 20). Am. 3 8 may also be quoted, but does the traditional reading, מִי לֹא יִנָּבֵא (EV 'who can but prophesy?'), suit the context? The blowing of the trumpets, the roaring of the lion, the speaking of the Lord Yahwè—all mean the same thing—viz., the utterance of a prophetic oracle, the consequence of which must be general alarm. For יִנָּבֵא Wellh. would read יֶחֱרַד, 'tremble.' It is easier to read יִכְאַב, 'feel pain' (see AMOS § 19, end).]

drunken man, and like one whom wine has overcome, because of Yahwè, and because of his holy words' (Jer. 23 9). He must speak, even when he will not and what he will not; Yahwè is even said to 'deceive' him into speaking (Ezek. 14 9). Vainly does he struggle to 'hold in the fury of Yahwè' (Jer. 6 11); when he would fain be silent, the word burns within him until he speaks (Jer. 20 9); with floods of tears he grieves over the judgment which he is impelled to announce (9 1 [8 23]). On the other hand, he cannot always speak. There come for the prophet times of silence (Ezek. 3 24 *ff.* 24 *ff.*) when he may not answer the questions of the people (Ezek. 14 1 *ff.*). When Yahwè does not will it, there can be no revelation (Am. 8 11 *f.* Lam. 2 9 Ezek. 14 3 20 3); the prophet must take his stand upon his watch-tower until Yahwè makes answer (Hab. 2 1 Jer. 42 4 7).

2. Nevertheless, the special revelations must not be regarded apart from the permanent mysterious relation in which the prophet stands with Yahwè. The prophet not only has the consciousness that Yahwè speaks with him in order to give him ever new communications and commands; he knows also that Yahwè has ever been drawing him—it may be even from childhood—into increasingly intimate communion with himself (Jer. 23 18). The prophet is a 'homo religiosus' in an eminent degree; in its more solemn moments his life reaches far into the supersensuous world whose shapes he sees, whose tones he hears. He belongs to God (Jer. 15 16) and God belongs to him in a peculiar manner. Yahwè is his protector (Jer. 20 11, etc.), his friend (Is. 5 1 7 13), who allows himself to be influenced by the prophet (Am. 7 2 *ff.*); and the prophet for his part lives upon the word of Yahwè (Jer. 15 16), and embraces him, as it were, with his prayer (Jer. 17 14 *ff.*). What he does, he does at Yahwè's command (marriage, Hos. 1 2 *f.*; naming of children, Is. 8 3; symbolical acts); so far as the people resist him, this has been of Yahwè's ordering (Is. 6 9 *f.* Jer. 7 27 Ezek. 33 30 *ff.*). In this close intercourse between the prophet and Yahwè, the initiative and predominant part belongs to Yahwè. There is something exhausting in it for the prophet; Yahwè's is the stronger hand (Is. 8 11), and his dealings with the prophet isolate him from the world and from society (Jer. 1 18 15 17). Thus the prophet produces on his contemporaries the impression that he is mad (Hos. 9 7 Jer. 23 9 29 26 *f.*). More and more, as this intercourse proceeds, the soul of the prophet merges itself in God; he attains moments of exaltation in which God comes specially near to him, and the divine will becomes specially clear.

The outward forms in which revelation comes are two: vision and word.

19a. Its outward forms: vision.

1. The vision is akin to the parable, and appears as a lesson in the art of realising a divine revelation objectively. We are guided to a better comprehension of it by Jer. 18, where God directs the prophet to watch a potter at his work, and thus to interpret to himself God's mode of dealing with men. Either a given visual object gives rise to the corresponding idea, or the idea after much pondering comes at last to receive its plastic representation. (In this connection note the archaic term *ḥăzōn* for 'revelation,' even for 'revelation' by words: Is. 1 1, etc.; cp Jer. 14 14.) Allied to the vision are the symbolical experience (cp Hos. 1 Jer. 32 6 *ff.*) and the symbolical action: the experience to the former kind of vision, the action to the latter. Prophetic vision is not a mere literary form or imaginative creation, but a real occurrence; we have no reason to doubt that the prophets actually had visions. The visions do not by any means always presuppose ecstasy. On the contrary, they can be seen and experienced by the prophet in full consciousness; indeed, in the classical period of prophecy ecstasy is very seldom so much as mentioned, and the abnormal physical conditions referred to in Ezekiel are by no means characteristic of the prophetic nature. The visions should, doubtless, receive a purely psychological explanation; for though the divine disclosures were made to the prophets through visions, these were still only the human form of the divine communication. The so-called 'false' prophets also had their visions. P. V. (§§ 14-19*a*).

19b. Ecstasies.

[The relation of 'ecstasies' to visions needs some further consideration. It was characteristic of heathen μαντεία that it was associated with a state of suspended consciousness—in a word, with ecstasy. As we have already seen, critical exegesis does not favour the view that the higher prophets considered such states the necessary guarantee of a divine revelation. Still, these prophets certainly had them. Jeremiah (15 17) uses the same expression[1] as Isaiah (Is. 8 11) for 'the force with which the divinely produced ecstasy seizes the human medium of the divine word.' In the third of the oracles of Balaam, too, an unknown writer of a prophetic school makes the transformed soothsayer use this language (Num. 24 3*b*)—

> The oracle of Balaam the son of Beor,
> The oracle of the man whose eye is closed.[2]

The eye of a man in an ecstasy is, of course, 'closed' to the outer world. The following lines give the other side of the picture (*v.* 4; cp *v.* 16):—

> The oracle of him who bears divine words,
> [And knows the knowledge of the Most High,]
> Who sees the vision of Shaddai (?),
> Falling down, and having his eyes open.

The 'eyes' here are those of the inner man; 'falling down' describes the effect of the divine impulse (Is. 8 11); 𝔊, paraphrasing, substitutes 'in sleep' (ἐν ὕπνῳ). Another instructive passage is Nu. 12 6 [J]—

'If there is a prophet among you,[3] I make myself known to him in a vision, I speak with him in a dream. My servant Moses is not so; he is faithful in all my house: with him do I speak mouth to mouth, manifestly,[4] and not in riddles, and the form of Yahwè does he behold.'

Here visions and dreams (cp DIVINATION, § 2, vi.) are regarded as the ordinary forms of prophetic revelation; disparagement of dreams as a vehicle of divine communications, such as arose in consequence of the abuse of them by the lower or 'false' prophets, had not yet begun. In contrast with the ordinary prophets, Moses enjoys the specific dignity of holding immediate intercourse with God. This is important as showing the aspirations of the best men; a higher ideal of prophecy corresponded to the loftier conception of God which was emerging in their consciousness. The frenzied dervish-prophets of Saul's time could not satisfy an age of higher religious culture. The prophets of the eighth and seventh centuries speak but little of their ecstasies and visions, with the single exception of Amos, who stands nearer than the others to the time of the ecstatic *nebī'īm*. It is also worth noticing that formulæ implying that the prophet has heard Yahwè speaking to him or, as Tholuck expresses it, has had phonetic oracles (נְאֻם and 'כֹּה אָמַר י), are comparatively rare in the older prophets, whereas from Jeremiah's time onwards they become extremely frequent. This frequency may perhaps be accounted for by the necessity of opposing the 'false prophets,' but no such explanation can be given of the strange frequency of ecstasies in the life of the last of the great prophets—Ezekiel. Three times he tells us that he saw with the inner eye the glory of Yahwè (1 1 *ff.* 3 22 *ff.* 40 1 *ff.*); five times besides he refers to ecstasies

[1] 'I sat alone because of ***thy hand***, for thou hadst filled me with indignation.' On the passage referred to, see Duhm's note.

[2] שְׁתֻם הָעָיִן, a phrase of doubtful meaning; Dillm. virtually reads שְׁתָם. 𝔊, however, renders ὁ ἀληθινῶς ὁρῶν, and Onk. דשפיר חזי, deriving שתם from שׁ (=אשר) and תָּם; so, also, strangely, We. *CH*(2) 112.

[3] Read אִם נָבִיא בָכֶם (Di., etc.).

[4] Read במראה (Sam., 𝔊, Pesh., Onk.; Di., and others).

(8 1 *ff.* 11 1 *ff.* 24 1 *f.* 33 22 37 1 *ff.*), and on some of these occasions (8 16 11 13 24 1) it is apparently implied that Ezekiel saw what took place at a distance.[1] It is not for this, however, that this prophet deserves to be remembered, but for his high moral character. Later writers may have vied with him in ecstasies and visions; but none of them was his match as a preacher of righteousness. One of them, according to some recent critics,[2] has given us (see Is. 21 1-10) a faithful description of the process by which, in the ecstatic state, a revelation came into existence within the seer (not, strictly speaking, the prophet). This, however, is too adventurous; in few passages of the Book of Isaiah is the text more open to suspicion than in this (see *Crit. Bib.*). To theorise on an unrevised text of Is. 21 1-10 is to make bricks without straw.

On ecstasies see, further, Tholuck, *Die Propheten*, 49-74; Giesebrecht, *Berufsbegabung*, 38-72. On the trances and visions of Hindu devotees see *New World*, 9 464, where the effect of mental suggestion in determining the form of visions is pointed out.]

T. K. C. (§ 19*b*).

Revelation by word is not verbal inspiration; it is dependent on the human (religious, ethical, æsthetical) individuality of the prophet. Each prophet took up that which Yahwè said to him ('thus saith Yahwè'; 'oracle [*nĕ'ūm*] of Yahwè'), and gave it shape and utterance according to his own individuality. Whatever knowledge forces itself upon the prophet he traces back to Yahwè; its compelling force makes him believe that it is Yahwè who suggests the words. Sometimes, indeed, he requires a later confirmation, in order that he may be assured of the divine origin of what he has received; cp Jer. 32 6 *ff.* The emphatic clearness with which these intuitive pieces of knowledge emerge in the prophet's consciousness absolutely separates them from the category of dreams and hallucinations (Jer. 23 28); for the prophet, however, the first proof of the divineness of his utterances lies not in the form in which they have been revealed, but in their substance (Jer. 23 29 Mic. 3 8). The prophets believe themselves to be inspired men of God, not because they see divine visions and hear divine words; it is in the fact that they cannot do otherwise than reprove that they perceive their unlikeness to their people and their affinity to Yahwè. It is in fact a feature common to them all that, supported by the prophetic consciousness, they dare—witness Nathan, Elijah, John the Baptist—to bring home their sins to the very highest in the land.

20*a*. Word.

In the classical period we find hardly any mention at all of the *rūăḥ* (רוּחַ) or 'spirit' of Yahwè (Is. 30 1[3] Mic. 3 8 [?]); contrast the phenomena of Ezekiel, who belongs to the period of the decline of prophecy.[4] The prophet is, indeed, אִישׁ הָרוּחַ—'a man who has the spirit' (Hos. 9 7); but this possession shows itself not in momentary excitement, but, like the Pauline *πνεῦμα*, as a habitual supersensuous power. Signs and wonders fitted to gain credence for the word are presumably at the prophet's disposal (Is. 7 11 Jer. 44 29 *f.*); but they are of subordinate importance, and are seldom alluded to.

20*b*. 'Spirit.'

The prophet who is to be deemed worthy of so high a calling must, it is evident, have certain qualifications in addition to a certain natural predisposition to discern hidden things.

21. Qualifications of prophet.

(1) Since it is to be his task to reflect Yahwè himself, to do battle against sin in Yahwè's name, and to promote the cause of righteousness, the prophet must himself, before all else, possess moral elevation of character (cp Mic. 3 8: 'I am full of righteousness [מִשְׁפָּט]').

(2) This however, is not enough; Yahwè lays claim to possession of the entire prophet. The peculiar relation of the prophet to Yahwè is one of unconditional obedience (Ezek. 2 8); it consists in complete self-surrender to God. There is nothing that the prophet has not to forego: social pleasures (Jer. 15 17) and the family life (Jer. 16 2) are not for him; he may not mourn the death of his wife if Yahwè forbids (Ezek. 24 15 *ff.*), must marry a harlot if Yahwè so wills (Hos. 1 2), must not be afraid of the hostile judgments or acts of his contemporaries (Jer. 1 8 17 Ezek. 2 6). Putting off all that cannot be consecrated to Yahwè, the prophet must surrender his personality to Yahwè that he may fill it afresh (Jer. 15 16 6 11), and must turn his purged ear to his God to hear his plans and purposes. This self-surrender may sometimes cost a struggle. Thus, Jeremiah groans under the contumely which he suffers because of Yahwè (20 8); fear induces him to say the thing that is not (38 27), on which account Yahwè rejects him for a while, and has to admonish him to renewed fidelity (15 19).

(3) Moreover, the prophet has to be constantly and eagerly watching the changeful history of his people, and the play of the forces by which the present and the future are being shaped, so that his eye may be trained to discern the divine method of education, and that he himself may become fully qualified as a public counsellor and reprover.

(4) The moral qualification is partly the presupposition of the divine call, partly its necessary result. It is in this above all that the human independence of the prophet manifests itself; this too is the guarantee of the genuineness of his inspiration alike for the prophet himself (Mic. 3 8) and for us in forming a judgment upon him.

The certainty of their divine commission which gave life and soul to the prophets had to assert itself in presence of another phenomenon closely akin to it in form—that of the so-called 'false' prophets.

22. 'False' prophets.

(1) Side by side with the greater prophets there was a class of prophets of inferior rank to which both men and women of Israel belonged (Ezek. 13 17 *ff.*). In the prophetic literature they are not refused the title of prophets. They distinctly claim to have the word of Yahwè (Jer. 5 13, etc., Ezek. 13 6 22 28), they prophesy in the name of Yahwè[1] (Jer. 14 14, etc.), they introduce Yahwè as speaking by them (Jer. 14 13 28 2 11), they have visions (Jer. 14 14 23 16 Ezek. 13 6) and dreams (Jer. 23 25 *ff.*); and they 'hope for the confirmation of their word' (Ezek. 13 6). Whilst the greater prophets stand alone, each for himself, these group themselves into larger companies; they come before us as a leading class, often mentioned in conjunction with the elders and priests. A typical example of the class is Hananiah whom we meet with in Jer. 28 (see § 24).

(2) In the older and more popular conception (1 K. 22) no sharp distinction is as yet made between the oracles of 'false' prophets and those of a prophecy which is truly divine in its origin; they are represented as made use of by Yahwè, but it is not denied that he sometimes leads them into falsehood (*ib.* 22 *f.*). Amos, however, repudiates all connection with these prophets of the masses (Am. 7 14), Micah charges them with flagrant abuse of their gifts (Mic. 3 11), Jeremiah and Ezekiel declare that Yahwè disowns all such prophets; they have no message from him (Jer. 14 14), but steal words

[1] So Kraetzschmar (but cp Giesebrecht, *Berufsbegabung*, 174 *ff.*). The experience described in Ezek. 8 1 may remind us of what Elisha says in 2 K. 5 26 (see 𝔊), 'Went not my heart with thee when a man turned to meet thee,' etc.

[2] See Duhm and Marti on the passage. Similarly Giesebrecht (*op. cit.* 56).

[3] Giesebrecht, *Die Berufsbegabung der Alttest. Propheten*, 137 *f.*

[4] *Ibid.* 123.

[1] [Possibly the wounds 'between the hands' referred to by the 'false prophet' who is introduced in Zech. 13 5 are like those of the *nebî'îm* of Baal in 1 K. 18 28 *f.*, which were designed to renew the bond of union with the deity (cp CUTTINGS OF THE FLESH, § 1, PRAYER). So Duhm.]

of Yahwè from others[1] (Jer. 23 30), or prophesy things of their own devising, mere vanity and lies (Jer. 5 31, etc., Ezek. 13 22 28, cp Is. 9 15 [14] 29 10[2] Zeph. 3 4).

The prophet detects spurious prophets by two criteria: the contents of their message, and their own moral character.

23. Criteria of such.

(*a*) The word of Yahwè must of necessity be a word of woe to a sinful people. These prophets, however, proclaim salvation, they deceive the people as to their true position (Mic. 2 11) and rock it in a false security (Jer. 6 14 8 11, etc.); thus, instead of warning it (Is. 56 10), they confirm it in its sin (Jer. 23 17), and hinder its conversion (Jer. 23 22 Ezek. 13 22); thus they are of no profit to the people (Jer. 23 32 Ezek. 13 5), but rather its bane (Ezek. 13 4), leading it astray (Mic. 3 5 Jer. 23 16 32 28 15 29 31 Ezek. 13 10), 'causing it to forget Yahwè's name' (Jer. 23 27), and preaching what is essentially nothing else than rebellion against Yahwè (Jer. 23 16 29 31; cp Dt. 13 6).

(*b*) The 'false' prophets preach in this tone not from conviction but because they thus gain popularity and thereby prosperity. Thus a prophet of a higher type can also discern their spuriousness by their low moral tone. They prophesy for gain (Mic. 3 11 Ezek. 13 19 21), and so profane Yahwè (Ezek. 13 19), and exploit the people (Ezek. 13 21). They speak as pleasers of men (Mic. 3 5 Ezek. 13 18 *f.*), and espouse the cause of the wicked as against the righteous (Ezek. 13 19); their personal character too is defective (Zeph. 3 4 Is. 28 7); they are even guilty of gross sins (Jer. 23 14 29 23). Hence judgment is to come upon them (Hos. 4 5)—in particular, the withdrawal of the prophetic gift (Mic. 3 6) and public exposure (Jer. 5 13). P. V. §§ 20-23.

In what light are we to regard these prophets? We are in the habit of calling them 'false'; but we should rather, with Volz, regard them as 'prophets of a narrow range of vision.'

24a. Really false? Case of Hananiah.

It is true, the more favourable epithet implies that the colouring of the description of these prophets given in the canonical prophetic books is in some respects too deep.[3] No one, however, who remembers how prone the prophetic writers are to take the darkest possible view of their contemporaries will object to this assumption. We are all glad to admire and reverence Amos, Isaiah, Jeremiah, and others like them, who have no self-regarding thoughts, and are utterly absorbed in the great reality of Yahwè, Israel's righteous God. Still we must not allow ourselves to be unjust to lesser men who, after all, had a necessary function to discharge in the body politic (cp Is. 3 1 *f.*), and who are under the great disadvantage that there is no account of them and of their relation to their prophetic rivals from a friendly hand.

The most important narratives are (*a*) 1 K. 22 1-28, and (*b*) Jer. 28.

(*a*) 1 K. 22 1-28 has been referred to already (§§ 5, 23).

It only remains to be noticed that there is probably a connection between 1 K. 22 1-28 and the story (which in its present form appears to be later) in 1 K. 18. The four hundred prophets of Yahwè mentioned in 1 K. 22 6 *ff.* seem parallel to the four hundred [and fifty] prophets of Baal (see § 7) in 1 K. 18 19 22. In both passages 'four hundred' (ארבע מאות) seems to the present writer to be a corruption and distortion of 'Arab-jerahmeel' (ערב ירחמאל). The redactor of 1 K. 18 gives to the antithesis between prophets of Elijah's or Micaiah's type and the court prophets, who made no distinction between Yahwè and the N. Arabian Baal, a sharpness that was unknown in the age of Ahab.

(*b*) Even the narrative in 1 K. 22, however, cannot safely be regarded as historical in the same sense as a striking passage in the biography of Jeremiah which contains an account of a 'false prophet' (𝔊 Jer. 28 1,

[1] An obscure statement (see Giesebr. and Duhm *ad loc.*).

[2] Both 9 15 [14] as a whole, and words in 29 10, are admitted to be glosses.

[3] Cp Matthes, *De Pseudoprophetismo Hebræorum*; Kuenen, *Religion of Israel*, vol. ii.: and the histories of OT religion.

ψευδοπροφήτης) contemporary with that prophet. Hananiah, b. Azzur, 'the prophet, who was of Gibeon,' takes up his station in the temple (cp 26 2 29 26), and prophesies the return of Jehoiachin and the exiles, with the sacred vessels, within two years. In an ecstasy (we may suppose) he breaks the wooden yoke which Jeremiah (27 2) has on his neck, and declares that so Yahwè will break the yoke of Nebuchadrezzar on the neck of all nations. Jeremiah meets his opponent with a calm appeal to facts; former prophets have had a message of woe; let the event decide whether Hananiah's message of peace is genuine. He also predicts the death of Hananiah within the year (see JEREMIAH, § 2). Clearly this story has upon the whole an historical appearance, and we may justly infer from it that prophets like Hananiah were more nearly related than Jeremiah to the patriotic *nebi'im* who co-operated with Saul in the liberation of Israel.[1] Hananiah doubtless had that predisposition to ecstasies and visions which was apparently one condition of prophecy, and his only or chief fault was that he had not that sobriety of judgment which no *nābī'* of the old school could have had, and consequently confirmed the people in their futile expectation of success for the anti-Chaldæan coalition which was (perhaps) at that time being planned (27 3).[2] Certainly he was under an illusion; but so too was Habakkuk, whose prophecy (Hab. 1 *f.*) 'expected from the Chaldæans freedom and prosperity for Judah' (HABAKKUK, § 6), and so too, according to most critics, was Nahum (cp § 39). Nor does Hananiah show any trace of that vindictiveness which we find in Nahum and Zephaniah (cp § 39 *f.*) and in other parts of the prophetic canon, notably in the prophecies against the nations ascribed to Jeremiah (Jer. 46-51).[3]

In fact Hananiah and the other prophets of his type were, as Robertson Smith puts it, 'the accredited exponents of the common orthodoxy of their day:—and even of a somewhat progressive orthodoxy, for the prophets who opposed Jeremiah took their stand on the ground of Josiah's reformation. . . No doubt there were many conscious hypocrites and impostors among the professional prophets, as there always will be among the professional representatives of a religious standpoint which is intrinsically untenable, and yet has on its side the prestige of tradition and popular acceptance. But on the whole the false prophets deserve that name, not for their conscious impostures, but because they were content to handle religious formulas which they had learned by rote as if they were intuitive principles, the fruit of direct spiritual experience, to enforce a conventional morality, shutting their eyes to glaring national sins, after the manner of professional orthodoxy, and in brief to treat the religious *status quo* as if it could be accepted without question as fully embodying the unchanging principles of all religion. The popular faith was full of heathenish superstition strangely blended with the higher ideas which were the inheritance left to Israel by men like Moses and Elijah; but the common prophets accepted all alike, and combined heathen arts of divination and practices of mere physical enthusiasm with a not altogether insincere pretension that through their professional oracles the ideal was being maintained of a continuous divine guidance of the people of Yahwè.'

One debt to the 'narrow prophets,' not only the

[1] Note that in Jer. 29 26, Shemaiah assumes the probability that the prophet will act like a madman (מתנבא ‖ משגע).

[2] This is the generally accepted view, but is nevertheless open to doubt. From 2 K. 24 2 it would seem that the Edomites (Arammites ?) and the other nations were by no means friendly to Judah, and the passage probably means that they ravaged Judah with the encouragement of Nebuchadrezzar. In Jer. 27 3 'Edom' and 'Ammon' both probably represent 'Aram' or 'Jerahmeel,' and 'Moab,' 'Tyre,' and 'Zidon' represent (in the consonantal text) Miṣṣur—*i.e.*, the N. Arabian Muṣri. The only power on which Judah can be shown to have relied was Egypt (under Hophra).

[3] See JEREMIAH [BOOK], § 12 (Schwally's criticism).

later prophecy, but also the Christian church itself has incurred. According to Volz, it was in the circles of the lower prophets that the idea and the hope known to us as the Messianic took its rise. The characteristic of such prophets was their fanatical patriotism; the Messiah, who is predominantly a political figure, belongs to the same circle of ideas as the 'Day of Yahwè' which the prophets took up from the people, giving it a new significance. The 'Day of Yahwè' and the Messiah are both, if this view is correct, derived from the prophets who had the ear and expressed the hopes of the people. This view is quite independent of the theory (in itself extremely probable) that the Messianic expectation was not taken up by the prophets till after the time of Ezekiel (see § 43). Even if the higher Messianic idea goes back to Isaiah, it forms no part of the genuine prophetic conceptions, and is, strictly, inconsistent with the sole sovereignty of Yahwè.[1] On the Messianic idea in the later writers, see further § 43, and cp MESSIAH.

24*b*. Messianic idea.

Jeremiah, according to his biographer, expresses a pious wish that Hananiah's roseate prophecy might be fulfilled, but declines to recognise him as a true prophet till his oracle of peace shall have been verified by the event (Jer. 28 6 9). The narrative can hardly be accurate in this point, for the context states that Jeremiah was confident that Yahwè's real purpose was very different from what Hananiah supposed. It was, however, no doubt a current axiom that 'when a prophet speaks in the name of Yahwè, if the thing follow not, nor come to pass, that is the thing which Yahwè has not spoken: the prophet has spoken it presumptuously' (Dt. 18 22). On the other hand, it was also said by accredited teachers that even if a prophet or a dreamer should arise, and appoint a sign or wonder, and the sign or wonder should come to pass, Israel was not to be led away to worship other gods, for, though Yahwè had caused the sign or wonder to come to pass, he did it to see whether Israel's heart was firmly fixed on its God (Dt. 13 1-3 [2-4]). Certainly it is evident that the prophets of the seventh century did not attach great importance to the exact fulfilment of their predictions; otherwise they or their disciples would not have perpetuated these predictions by committing them to writing. Kuenen[2] has written an elaborate monograph dealing, among other points, with the fulfilment of OT predictions. The work, however, needs to be done over again from the point of view of a more mature textual criticism and exegesis. Meanwhile we may content ourselves with the general opinion thus expressed by Rudolf Smend (*A T Rel.-gesch.*[(2)] 188):—

25. Non-fulfilment of prophecies.

'When we inquire about the fulfilment of their vision of the future, we must of course leave the details of prophecy entirely out of account. The prophets describe the future with abundance of colour and imagery; but they lay stress only on the main points. Much in the description belongs to the rhetorical form, which may vary, not only with different prophets, but even with the same prophet. Nor is this all. Many prophecies have remained unfulfilled, even as regards their contents. Certainly their illuminated sight discerned the situation, not only of Israel and Judah, but also of Egypt and other peoples in relation to Assyria and Babylon. But most of the prophecies on foreign nations were fulfilled, and this is true in still larger measure of the Messianic prophecies.'

In connection with this subject, however, one or two remarks must still be made. There are some passages in the OT in which the non-fulfilment of predictions is accounted for by a change in the relation of man to God. It was thought that by repentance the threatened judgment could be averted, and that by disobedience the promised blessing could be missed (cp Jer. 18 7-10 Jon. 3 4 Joel 2 12 *f.*). Once, too, when Jeremiah was in peril of capital punishment for having predicted the destruction of Jerusalem, 'certain of the elders of the land' appealed to the case of Micah, who had given the same prediction, which, however, was not fulfilled, owing to Hezekiah's repentance (Jer. 26 17-19). It would, however, be hasty to follow conservative critics in the exegetical inference that the threatenings and promises of the prophets are to be understood as conditional. There is no evidence, unless it be in critically doubtful passages, that any of the great prophets of the eighth century understood their threatenings to be conditional, and it is better to hold (1) that all predictions whether of good or of evil were categorically meant, and (2) that passages like Jer. 18 7-10 represent the reflexions of a later age, not the belief of a great prophet like Jeremiah, who certainly felt only too acutely that the threatened destruction of Jerusalem would certainly come to pass. In fact, the only parts of Jeremiah which can be confidently set down to that prophet are metrical in structure, and 18 7-10 is not metrical. That in 18 3 5 we seem to find Jeremiah speaking in the first person, is no adequate proof that the passage is really autobiographical.

[1] Cp Kraetzschmar's review of Volz's 'Die vorexilische Jahweprophetie,' *TLZ* 22 (1897) col. 676 *ff.*
[2] *De profeten*, etc. (1875); also in an English version.

The illusion under which the prophets, and not only the prophets but apparently also Jesus himself, constantly were, relative to the nearness of the period of 'the end' has been sometimes explained[1] by the so-called 'perspective' character of prophecy.

In a note on Mt. 24 29 in his *Gnomon*, J. A. Bengel thus illustrates the theory:—'Prophetia est ut pictura regionis cujuspiam, quæ in proximo tecta et calles et pontes notat distincte, procul valles et montes latissime patentes in augustum cogit.'

This assimilation of physical and spiritual vision, however, is not only arbitrary; it is unnecessary. When the Second Isaiah predicted the deliverance of the Jews from exile as simultaneous with the opening of the Messianic period, the psychological cause is obvious; it was the impatient longing of a much-tried soul to see his people placed beyond the reach of change and chance—an impatience which could only have been corrected by a clear intuition of the truth of historical development which is one of the more recent acquisitions of the human mind. Why should we look further for an explanation? Besides, the theory of 'perspective' is inconsistent with the important fact that events which might conceivably happen in the time of the prophet are usually represented as the cause of the great events which are eschatologically to follow.

See Elmslie, 'The perspective in prophecy,' *British and Foreign Evan. Review*, April 1872, pp. 326-347; Giesebrecht, *Berufsbegabung*, 27 *f.*; Schwartzkopff, *Die prophet. Offenbarung*, 155-158; and cp ESCHATOLOGY, § 84, i.; B. Weiss, *Leben Jesu*, 2 307.

It was a tragic fate that Jeremiah, the gentlest and most retiring of men, should have had to repeat the old prophetic sentence upon the guilty city Jerusalem. It was needful, however; for certain sides of the teaching of Deuteronomy had so beguiled even the best of the citizens that they for the most part firmly believed in the safety of Jerusalem, partly on the ground that they had upon the whole (though the early zeal for the law had abated) obeyed the Deuteronomic prescriptions, and partly because the escape of Jerusalem in the time of Sennacherib seemed to show that temple and city possessed an inviolable sanctity. There was one person, however, who in all probability questioned the authority of Deuteronomy, and that was Jeremiah. That he did so from the first we cannot venture positively to assert, though it is certainly striking that, when the messengers of Josiah, seek a prophetic counsel with regard to 'this book that is found,' they apply, not to Jeremiah, but to a popular prophetess[2] named HULDAH. The whole tone of Jeremiah's utterances is adverse to the formal religion of Deuteronomy, and in 8 8 he even accuses the 'scribes'

26. Jeremiah.

[1] For example, by Hengstenberg and Oehler. Tholuck's theory (*Die Propheten*, 61 *ff.*) is more subtle, but only slightly less objectionable than the 'perspective' theory.
[2] That she was a favourite of the people appears from 2 K. 22 14 (see HULDAH).

or 'book-men' of making divine law (*tōrāh*) into a lie.[1] Elsewhere too (7 21-26) he represents Yahwè as giving license to the people to eat not only the *zĕbāḥīm* (EV sacrifices) but even the *'ōlōth* (EV burnt-offerings) at their sacrificial feasts (see SACRIFICE), which is interpreted[2] as implying that Yahwè at the Exodus had given no commandment at all relative to sacrifices. This attitude of Jeremiah, though suggested by that of his predecessors Amos, Hosea, and Isaiah, was of decisive importance for the future religion of Israel. Jeremiah was the last great prophet of the pre-exilic period, and his emphatic assent to the declarations of the older prophets seemed to the nobler minds of later generations like the final verdict of Israel's God. They sought indeed to supplement and qualify his statements; but they did not attempt to alter the traditional words of his fragmentary prophecies. Accordingly, mere ritualism had no standing-ground in the later Jewish religion.[3]

In spite of presentiments of a dark future for Israel, Jeremiah appears at first to have had some hopes, and to have striven to persuade his people to repent (see 2 1-4 4 apart from later insertions). As time went on, however, presentiments gave place to a settled sad conviction that all was lost, and that nothing remained but to complain to his God of Israel's impenitence; and to assert over and over again to his people the imminence of judgment. Not even a minority could be excepted from the general condemnation of the sinful people;[4] not a single truth-loving man could be found in the whole of Jerusalem (5 1, cp 8 6 10 13; also 6 27-30 9 2*b* [1*b*]). From this painful, Cassandra-like rôle, Jeremiah never withdrew. It would no doubt have been worthy of this noble prophet (a true patriot, in spite of Renan's adverse opinion) to have advised Jehoiachin's companions to make themselves at home in the land of exile, and to cleave to Yahwè by prayer; but the central statement of chap. 29 that the Babylonian oppression shall last only for a time (seventy years) is certainly unauthentic, and it is not much more probable that the ill-written narrative in chap. 24, in which restoration is promised to the fellow-exiles of Jehoiachin contains a kernel of tradition. Shall we say that Jeremiah's eyes were too much dimmed by tears to look into the distant future? It would be a worthier supposition that, having broken with the idea of sacred localities, he bade the Jewish exiles—as many of them as were capable of repentance under the stern discipline of exile—live the lives which befitted worshippers of Yahwè on a foreign soil. At the same time, since this is not suggested in any of the undoubted writings of Jeremiah (which are all poetic in form), we cannot regard it as more than a pleasing conjecture.

The so-called 'Scythian prophecies' in chaps. 4-6 8 10 12 refer most probably, not to the Scythians (an opinion which has almost become traditional among commentators), but to the N. Arabians, who had already made repeated incursions into Judah, and, from Jehoiakim's time, became foes not less dreaded than the Babylonians, under whose sanction indeed they appear to have conducted their operations. This has an important bearing on the strange prophecy against Gog(?) in Ezek. 38-39 (see below, § 27).

Jeremiah is a much more attractive personality than Ezekiel. Nothing in the whole range of prophecy is more fascinating than his transparently veracious references to his intercourse with his God (cp NAME, § 4); the record of his agonising mental experiences makes us all the more admire him for his ultimate self-subordination to the will of Yahwè, and his unhesitating acceptance of a perilous responsibility.

27. Ezekiel.

Ezekiel, however, is in some respects more interesting to the historian, because endowed with more originality, not indeed as a prophet, but as a thinker. Little did Jeremiah know what a gifted man there was in a priestly family at Jerusalem. It is true, Ezekiel had been deeply impressed by Deuteronomy, with which (in its original form, which no effort of criticism can exactly reproduce) Jeremiah did not sympathise, and in order to understand Ezekiel, we must place ourselves at the Deuteronomic point of view. His conception of religion as a church-system,[1] and of piety as consisting in the fulfilment of certain precepts and ordinances, is largely influenced by the new Covenant Book. Little need be said here of the first part of Ezekiel's ministry. As he was an exile, it was only to a portion of the nation that he could address himself, for he belonged to the first captivity—that of Jehoiachin. But he certainly considered this fragment of Israel to be representative of the whole people, and himself to be Israel's prophet. For six years and a half he proclaimed the imminence of the ruin of Judah, as the consequence of the incorrigible wickedness of the people. Then (587-586) came the fatal blow—expected by none but himself. This not only raised Ezekiel as a prophet in the estimation of his fellow-exiles, who now became eager for the word of Yahwè (33 30), but also changed Ezekiel himself from a 'censor' (3 26, אִישׁ מוֹכִיחַ, EV a reprover) into a 'watchman' (33 7[2]), or, as we should say, a pastor, devoting himself to the task of preparing suitable individuals to become partakers of the great future which he confidently predicted for Yahwè's true people. It was for them that he used his abundant knowledge of ritual and of sacred architecture; for them (not for all who heard him, 33 30-33) that he uttered predictions of judgment on the foes of Israel; for them (but not only for them) that he delivered wonderful discourses on that fundamental principle of individual responsibility which constitutes one of his chief claims to the possession of originality (18 33 1-29). Eschatology, too, became prominent in his thoughts—naturally enough, for the waiting-time was to be so short, that the 'last things' became to him virtually the things of to-morrow; forty years, no more, was to be the duration of the exile (4 6); when these were over, woe to the wicked, both in Israel and among the 'nations,' and joy for the righteous! Though much of Ezekiel's later activity does not concern our present subject (see LAW LITERATURE, §§ 14, 23 *f.*), it is right to allude to it even here because it suggests how continuous the religious progress of Israel was, in that the same man was at once the last of the prophets, the first of the great theological thinkers, and at any rate the most influential of the later students of law and ritual.

It is commonly taken for granted that Ezekiel, together with Jehoiachin and his other fellow-exiles, resided in Babylonia. This, however, is by no means certain. We have seen elsewhere (see OBADIAH [BOOK], § 7) that N. Arabian peoples probably joined the Babylonians in the invasion of Judah and the overthrow of Jerusalem, and that Jewish captives were carried into N. Arabia. Some of the phenomena which are most favourable to this view are to be found in Ezekiel, which, like other prophetic writings, has been much edited, and

1 See JEREMIAH, § 4. Jer. 11 1-14 has led many (*e.g.*, Dahler and, formerly, the present writer) to suppose that for a time Jeremiah was a preacher of obedience to the Deuteronomic law. The phraseology is certainly not characteristic of Jeremiah, and it is only a natural caution, which, after recent criticism of Isaiah, no longer appears justifiable, that has hindered critics from recognising the hand of a post-exilic supplementer. Note how badly the material of 2 28 (certainly Jeremiah's work) is utilised in 11 12 *f.* The credit of the rectification belongs to Duhm.

2 Whether by Jeremiah or by a supplementer, is uncertain (see Duhm).

3 Next to Pss. 40 6 [7], and 50 14 *f.* 23, 51 16 *f.* [17 *f.*] we may refer to Mic. 6 6-8, a passage which excited the ungrudging admiration of Huxley (*Essays*). Note, however, the doubtfulness of the closing words (MICAH [BOOK], § 4).

4 Jer. 5 26 which contains the strange statement, 'For among my people are found wicked men,' belongs to a passage (5 18-31) which, as Duhm (completing the observations of Stade and others) has seen, belongs to a late insertion. The writer is less pessimistic than Jeremiah, and divides the people into a good and a bad half.

1 See Bertholet, *Die Verfassungsentwurf des Hesekiel* (1896).

2 3 16-21, in which the same term occurs, is evidently a later insertion.

in its present form, seems often to misrepresent the meaning of the prophet: 'The river Chebar' should probably be 'the river of Jerahmeel,' and 'TEL-ABIB' [*q.v.*] 'Tel-arab' (mound of Arabia) or, as the Hebrew text underlying 𝔊 may have said, Tel-Jerahmeel (mound of J.).

Some passages in the book are transformed, not without gain to the sense, by similar emendations, notably chap. 28, which has been wrongly supposed to have been directly influenced by a Babylonian myth; for this indeed, if Ezekiel had really resided in Babylonia, there would have been ample opportunity (see PARADISE), but that is just the point which is in dispute. The description of the cherubs in Ezek. 1 has also been supposed to show the direct influence of Babylonia. It is plain, however, that the influence of Babylonia on the Judah of the later regal period was strong enough to have produced the imaginative description in Ezek. 1, even if the writer had never left Jerusalem, and the whirlwind which brought the cloud-enfolded chariot of Yahwè came (according to an extremely probable view) from Zaphon—*i.e.*, the district in the Negeb which contained 'Horeb, the mount of God.' In another vision (17 4) we hear of a great eagle which came to Lebanon and 'cropped off the topmost of the young twigs' of the cedar, and 'carried it into the land of Kenaz (קְנָז, as often, for כְּנַעַן), and set it in the city of Jerahmeel (ירחמאל, as elsewhere, for רכלים).' The strongest evidence, however, in favour of a Jerahmeelite or N. Arabian background is in chaps. 38 *f.*, where 'Gog' and 'Magog' should everywhere be 'Jerahmeel.' The N. Arabian foe became the symbol of the last and most terrible enemy of Israel whom Yahwè would destroy.[1] Ezekiel even gives us the means of proving the correctness of our view by referring (38 17 39 8) to older prophecies of this last hostile irruption; he means, no doubt, Zeph. 1 14 *ff.* Jer. 4-6 8 10 12 (parts), which are often supposed to refer (apart from later modifications) to an apprehended irruption of the SCYTHIANS [*q.v.*], but which may be referred with more probability to the dangerous N. Arabian neighbours of Judah.

With a N. Arabian background, many parts of Ezekiel assume a different aspect.[2] It is no easy task, however, to undo the skilful work of the ancient editor who produced the present text, and who succeeded, not indeed in infusing a large Babylonian element, but at least in well disguising the many striking references to Miṣṣur, Jerahmeel, Geshur, and Ṣaphon.

Another exilic writing, which in a secondary sense may be called prophetic—viz., Is. 40-55, also (according to the present writer's latest criticism) has a N. Arabian background. Its author being unknown, however, we must reserve what we have to say concerning it for a later section (§ 43).

The consciousness of the decline of prophetic inspiration is equally manifest in Haggai and Zechariah (1-8).

28. Last named prophets. Hence probably their repeated assurances that their word is the word of Yahwè. Zechariah's respectful references to the 'former prophets' (1 4 *ff.* 7 7 12), and his mention of an angelic interpreter of his visions (cp Ezek. 40 3) point in the same direction—*i.e.*, they show that the successors of the old prophets are rarely remembered by name because they have no public sphere of activity, in other words are not, strictly speaking, prophets at all; in fact, they pass into the number of literary persons, whose work was always either anonymous or pseudonymous. It is true that in the memoir of Nehemiah (6 10-14) we meet with prophets exercising public functions, of whom two are mentioned by name, one a man (Shemaiah), the other a woman (Noadiah). These prophets, however, were morally unworthy of this venerable official title, and seem to have been akin to the 'false' prophets and prophetesses described by

[1] See GOG, n. 4, col. 1747 *f.*, where for מגדון (Migdon) read ירחמאל (Jerahmeel). The correction was impossible till the key to a large section of the historic and prophetic literature had been found. The enigmatical ראש (38 2) should be אַשּׁוּר (Asshur—*i.e.*, Geshur), משך should be כּוּשָׁם (Cusham); and תבל is probably not an insertion from Gen. 10 2 (MT), but a N. Arabian ethnic (cp Bethul?). On the mysterious הַצְּפוֹנִי in Joel 2 20 (a synonym for 'Gog') see § 44.

[2] This chiefly refers to chapters in which names of countries or peoples occur. But it is probable that fuller knowledge would reveal other passages affected by the N. Arabian place of exile. Soothsaying (as the story of Balaam and the true text of Is. 26 [see *Crit. Bib.*] show) was specially cultivated in N. Arabia, and sacrifices of children were very possibly still practised there, as in the time represented by the story of the attempted sacrifice of Isaac (see MORIAH, and cp MOSES, § 8). This may throw fresh light on the denunciation of diviners in chap. 13, and on the references to the sacrifices of children among Ezekiel's fellow-exiles in 20 31.

PROPHETIC LITERATURE

Ezekiel (chap. 13 22 28). We even find, in a part of the late appendix to Zechariah (13 2-6), the anticipation of the extinction of prophecy, on the ground of its connection with the spirit of uncleanness—*i.e.*, of heathenism. It seems, therefore, that the unknown writer did not regard his own and similar writings as 'prophetic.' We may also refer to Ps. 74 9, 'there is no more any prophet' (in spite of the fact that the words are probably a gloss on the doubtful word יודע, 'one that knows'), for it suggests the belief of the scribes that in great crises, when prophetic counsel might have been looked for, no one with prophetic gifts came forward in public (see col. 2207). It was a very poor substitute for these gifts that some persons (*e.g.*, John Hyrcanus[1]) were believed to be in communication with the heavenly world by means of suddenly heard oracular voices called *Bath-ḳōl* ('daughter'—*i.e.*, echo, 'of the Voice'), a parallel to which in Arabian superstition has been pointed out by Wellhausen.[2]

The exceptions to the rule that the post-exilic prophets are unnamed are Malachi, Joel, and Obadiah. It is doubtful, however, whether we can trust the tradition.

(*a*) As to the name (or title) מלאכי, 'Malachi,' it was probably taken from Mal. 3 1 by the redactor of the Twelve Prophets, who is also apparently the author of the superscriptions in Zech. 9 1 12 1. If so, מלאכי in the heading (Mal. 1 1) should not be reproduced as 'Malachi,' but rendered 'my messenger.'[3] Even if (as the present writer has suggested) מלאכי, both in Mal. 3 1 and in the heading, should be corrected into מִיכָאֵל (Michael) this would not involve the assumption that the name of the prophetic writer was Michael, for 'Michael' in 3 1 would plainly refer to the angelic patron of the people of Israel (Dan. 10 13 21 12 1).

(*b*) As to 'Joel the son of Pethuel,' the probability is that the name was prefixed by the redactor out of his own head. It is likely enough that in some late historical midrash mention was made of a prophet bearing this name.

'Son of Bethuel' (so we should probably read with 𝔊) may very well mean 'inhabitant of (the southern) Bethel,' which we conjecture to have been a place and district in the Negeb, famous in the history of religion (cp Tubal in Ezek. 38 2; see col. 3881, n.). The Negeb in the regal period was, according to our theory, the nursery of prophets of Yahwè; in the (pre-Maccabæan) post-exilic period, however, no Judahite prophetic writer would have been called 'son of Bethuel,' because the Negeb was at that time occupied by the Edomites.

(*c*) As to 'Obadiah' (עבדיה), which is most probably a post-exilic modification of some ethnic, perhaps 'Arābī (עַרְבִי, Arabian), this name, too, is most probably fictitious; 2 Ch. 17 7 shows that it would naturally suggest itself as a companion to Joel (= Jerahmeel?[4]), Jonah (= Jehonathan?[5]), and Micah (= Michaiah).

Most probably, therefore, Zechariah may be regarded as the last prophet of the school of Amos, Hosea, and Isaiah, and though he is but a poor specimen of that great school, and hardly enables us to divine what a wonderful elevation or transformation of nature could result from the prophetic call, we look upon him with reverence as the latest representative of the 'goodly company.' Henceforth it was upon the enemies of Yahwè's people that judgment was to be denounced; for Israel itself the gentle comforter, the earnest exhorter, the wise teacher, the unveiler of times and seasons, not the lion-like announcer of Israel's certain destruction, was the minister of God whom the com-

[1] See *OPs.* p. 39, note kk.

[2] This may be thought to illustrate Mt. 3 17 Jn. 12 28 *f.*; if so, it is the highest glorification of folk-lore. The passage from Jn. may be quoted. 'Then came there a voice from heaven. . . . The people therefore that stood by and heard it, said that it thundered: others said, An angel spake to him.'

[3] Clem. Alex. mentions 'Malachi' as ὁ ἐν τοῖς δώδεκα ἄγγελος (ed. Dindorf, 2 99 22 102 24 105 2 110 15).

[4] 'Ben-hail' in 2 Ch. 17 7 no doubt comes from 'Ben jerahmeel.'

[5] Jehonathan is probably a modification of Nethaniah, which like NETHANEEL (*q.v.*) ultimately comes from the ethnic Ethani (pointing to the Negeb). Cp § 4.

munity required. And so, when for a little while, just before the appearance of Jesus, JOHN THE BAPTIST [*q.v.*] preached in the wilderness of Judæa, he combined with his threatening comfort. The old prophetic writings had before his time been supplemented, and the supplementers had introduced into them bright pictures of the Messianic king. But whereas the supplementers were writers merely, John was a forceful personality of the type of Elijah. To many of his contemporaries, therefore, he appeared like one of the old prophets come back; and to us, at any rate, it is an interesting coincidence[1] that, according to one form of the Gospel tradition, the father of John was 'a certain priest named Zacharias' (Lk. 1 5). It is plain, however, that the message of the Baptist was deeply modified by the parallel announcement of the advent of the Messiah. In fact, between the prophet Zechariah, and John the son of Zacharias, comes the development of apocalyptic, a specimen of which has even been tacked on to the Book of Zechariah (see ESCHATOLOGY, § 46). It is a truly wonderful development, with a style, principles, and method which are all its own, and which have been dealt with elsewhere (see APOCALYPTIC LITERATURE).

29. John the Baptist.

That John the Baptist or any contemporary enthusiast founded a school of prophets, cannot be shown. It is, therefore, all the more surprising, as long as we regard all the sayings in the Sermon on the Mount as authentic words of Jesus, that he should have warned his hearers against 'false prophets,' and announced their miserable fate (Mt. 7 15 19, cp 24 11). If, however, we admit that the discourses ascribed to the great teacher were adapted (as the early Hebrew prophecies were adapted) to a later age by the insertion of sayings not really uttered by the principal speaker, we shall see that later Christian circumstances both may and must be referred to. That there were 'prophets' in the early Christian communities is, indeed, a well-known fact (see, *e.g.*, Acts 13 1 Rom. 12 6 1 Cor 12 28 14 1 *ff.* Eph. 2 20 3 5 4 11 Rev. 18 20 24). It remains to illustrate and explain this phenomenon from the now famous though but recently recovered treatise called the *Didachè*, or 'Teaching of the Apostles.' T. K. C. (§§ 24-29).

B. CHRISTIAN PROPHETS.

The ultimate triumph in the primitive church of the ministry of office, over what we may call the ministry of enthusiasm, has made it difficult for us to realise that there ever was a time when bishops, presbyters, and deacons were not the prominent figures of the ecclesiastical community. It has been the recovery of the *Didachè*, or 'Teaching of the Apostles,' which has been mainly instrumental in opening our eyes to a different state of things; and a large part of the value of this book has lain for us in the fact that it has enabled us to recognise in other early Christian documents parallels, more or less close, to those very features which at first sight strike us as most strange in the Christian society which it describes. Accordingly, we shall bring together some of the later notices of the prophetic office, before considering the references which are made to it in the NT.

30. Prophets in the Didachè.

The chief figures in the church in the locality pictured for us in the *Didachè* are not bishops and deacons, who are only mentioned towards the end of the book, but apostles and prophets. The apostles are missionaries, who travel continually, and do not settle down in any Christian community; their gift is for the world outside. The gift of the prophets, however, is for the church itself, and they may travel or settle, as they choose (chap. 13). Their function is that of speaking 'in the Spirit'—*i.e.*, under the influence of an immediate inspiration, declaring the will of God in the Christian assembly. Especially at the Eucharist the prophet's gift comes into play: he is free from restriction to the otherwise prescribed formulæ, and may 'give thanks as he chooses' (chap. 10). This seems to imply that if a prophet were present he would supersede all others in the celebration of the Eucharist.

The regard in which prophets are to be held demands, first, that their utterances and actions, however strange, are to be above criticism—to oppose them is the sin against the Holy Ghost (chap. 11). Secondly, that they are to be well provided for, and to receive first-fruits of every kind; 'for they are your high priests' (chap. 13). It is clear from this that the prophet has no superior in the community in which he resides.

Here, then, we see the Prophetic Order at its greatest height; but it is to be noted that we already have indications of the dangers which beset it as an institution.

(*a*) There are counterfeit prophets, who must be guarded against. Certain simple rules for discrimination are laid down.

(*b*) There are prophets, apparently genuine, whose actions challenge the gravest suspicion; but they may not be judged by men; they are to be left to the divine judgment. In this, reference is probably made to immoral acts defended as typical of the union between Christ and his church, and further justified as parallel to certain symbolic acts of the OT prophets.

(*c*) Prophecy has been already abused by the covetousness of prophets, who have demanded food or money when speaking under the prophetic influence.

(*d*) Yet more important is it to observe the struggle which is beginning between prophecy, as an institution, and the local administrative order. 'Appoint for yourselves,' we read, 'bishops and deacons worthy of the Lord' (chap. 15). These are 'not to be despised,' as probably they often were by those who esteemed the prophetic enthusiasm as the supreme authority. Prophets are clearly not numerous; a local church may be without any prophet at all. The advent of a prophet to such a church would throw the local ministry at once into the shade. Yet, after all, those functions of the prophet which were essential to the welfare of the church could be sufficiently discharged by the local officers, the bishops and deacons: 'for they also minister to you the ministry of the prophets and teachers.' Here we see the elements of a rivalry, insignificant at first, but destined to overthrow the prophetic institution. Time was too strong for the extemporaneous and enthusiastic, and was all on the side of the regular and permanent authority. The bishops and deacons, still waiting in the background, plainly have the future before them.

Besides these dangers to which prophecy as an institution was exposed, there was another and a very different one, of which we find indications in the 'Shepherd of Hermas.' In turning from the *Didachè* to the *Shepherd* we pass from E. to W. We are no longer among a scattered population, with its churches here and there, visited by eminent strangers with prophetic gifts. We are in the great city of Rome, where the conditions of life are wholly different. We are, moreover, amid heathen surroundings, at a time when the little of earnest religion that survives gathers round magicians and diviners. Here prophecy has other perils.

31. In 'Shepherd of Hermas.'

The date of the Shepherd is much disputed. The book is permeated with the language of 'The Two Ways,' if not of the entire *Didachè*. If it is to be placed so late as the middle of the second century, it must be purposely archaic in form, and intended to be regarded as an earlier production. In this case the picture of the true and the false prophet may be in part a fancy portraiture; we have little or nothing besides to make us suppose that there ever was an order of prophets in the Roman church.

Hermas is shown a vision of the false prophet

[1] To make the coincidence complete, John's father should have belonged to the 'course' of Iddo (cp Neh. 12 4 16) not of Abijah.

(*Mand.* 11). His powers are not unreal, but diabolic; his practices are those of heathen mantic prophecy. He gives answers privately to those who consult him; he is dumb in the assembly of believers. The true prophet speaks only in the Christian congregation; the false prophet prophesies in a corner for reward.

No doubt there was something of this mantic prophecy within the Christian church. Simon Magus, and the legends that cluster round his name, are a proof of it. Moreover the accusation of magic, so often brought against the Christians, was perhaps not always unfounded. The very name of 'prophet' must in any case have suggested it to the heathen mind.

This mantic prophecy was of course wholly different from Christian prophecy. But the confusion was inevitable; and the writer of the Shepherd is at pains to emphasise the true distinction.

Two character sketches of the satirist Lucian throw a lurid light on this possible abuse of the prophetic position. One is entitled 'Alexander, or the false diviner'; it shows us the practice of sooth-saying and oracle-mongering as it flourished in the Greek and Roman world of the second century. The other, 'The death of Peregrinus,' is more directly important for the illustration of our subject. We see here the kind of impostor who then travelled and traded on the religious sentiment. Among other transformations Peregrinus adopts the *rôle* of Christian prophet. He is spoken of as interpreting the sacred books of the Christians, and as writing fresh ones for them. He even goes to prison as a confessor, and is well looked after there by the widows and other members of the church. Presently he is detected and disgraced, and he ends as a Cynic philosopher, burning himself at the Olympic festival in order to gratify the passion of his life, the desire for notoriety. It is to be noted that Peregrinus is distinctly spoken of as a 'prophet,' and that, although previously unknown, he rises at once to a position of pre-eminence in the Christian community.

Thus far, then, we have seen the Order of Christian Prophets, as it is depicted for us in the *Didachè*, a document which, however, it must not be forgotten, represents an imperfect type of Christian society, confined perhaps within a narrow local range. We have seen, too, the perils of various kinds to which that order was by its very nature exposed; and we have seen side by side with it the administrative order, sometimes temporarily overshadowed by it, but destined to abide as the permanent ministry of the church when prophecy as an institution had passed away.

Let us now look back to the NT, and ask what is the position of the Christian prophet there. The conception of a prophet, as it had gradually been worked out in the history of Israel, was that of a man who speaks from God, to warn, to console, sometimes to foretell. Such voices of God had long been silent when John the Baptist recalled the figure of the prophet Elijah. Once more men listened to the divine voice speaking through a man's lips. 'A prophet, and more than a prophet' (Lk. 7 26) had appeared. The work of Jesus himself is several times described as prophetic, and his hearers spoke of him as 'a great prophet' (Lk. 7 16).

32a. In NT.

The new Israel of God could not be thought of as less fully equipped for its divine mission than the old Israel had been. On the day of Pentecost the words of Joel were remembered: 'I will pour out of my Spirit . . . and your sons and your daughters shall prophesy' (Joel 3 1 [2 28]). Agabus, Judas, Silas, the four daughters of Philip, are specially named as prophets and prophetesses (Acts 11 28 21 10 15 32 21 9). Agabus foretold events; but as a rule the function of the prophets was to declare the divine will, as at Antioch, when Barnabas and Saul were sent on their first mission (Acts 13 1 *f.*), or again, when prophecy pointed out Timothy to be the ordained companion of Paul (1 Tim. 1 18 4 14). Besides this it was their part to make exhortation and to give thanks in the Christian assembly (1 Cor. 14 4 *ff.*).

In Paul's earliest letter to a Greek church he has to defend the position of prophecy: 'Quench not the Spirit, despise not prophesyings' (1 Thess. 5 20).[1] In Corinth he has to check the extravagance of some who exercised the gift in a tumultuous manner, and he lays down as a guiding principle, that 'the spirits of the prophets are subject to the prophets' (1 Cor. 14 32). See SPIRITUAL GIFTS. In the Epistle to the Ephesians we read that the church is 'built on the foundation of the apostles and prophets' (2 20); that to 'his holy apostles and prophets' the mystery of Christ is revealed (3 5); and that among the gifts of the ascended Lord to his church, 'some' are 'apostles, some prophets, some evangelists, some pastors and teachers' (4 11)—words which recall an earlier passage, 1 Cor. 12 28: 'God appointed in the church first apostles, secondly prophets.'

The Apocalypse, in its first and last chapters, is distinctly described as a 'prophecy' (1 3 22 7 *ff.*), and the seer in one passage is linked with 'his brethren the prophets' (22 9). 'The saints and apostles and prophets' are called upon to rejoice over the fall of Babylon, which has shed 'the blood of prophets and saints' (18 20 24). In the letter to Thyatira (2 20) 'Jezebel which calleth herself a prophetess,' if not an individual woman claiming inspiration, at any rate represents an abuse of the gift of prophecy for immoral purposes.

It seems probable that there is some connection which has not yet been worked out between the *Didachè* and Second Peter. That epistle gains a new significance when we read it in the light of what we now know of Christian prophecy and the perils which beset it. After a mention of 'the prophetic word, to which ye do well in taking heed' (2 Pet. 1 19), follows a terrific denunciation of the 'false teachers' who are said to correspond to the false prophets of the ancient Israel (2 1 *ff.*) Their immorality and their opposition to constituted authority is emphasised both here and in the parallel section of Jude. They are compared to Balaam who prophesied for hire, and to Korah who resisted Moses and Aaron. The prophecy of Enoch is quoted against them (Jude 14). They are denounced as a disgrace to the Christian love-feasts (2 Pet. 2 13 Jude 12). It may be that the title of prophet is purposely avoided in speaking of them. They have their visions and dreams; but they are 'sensual (psychic), not having the Spirit' (Jude 19). In contrast with such, true prophecy is again mentioned, and the faithful are charged to remember earlier utterances of 'the holy prophets' (2 Pet. 3 2). That in some of these passages we cannot sharply distinguish between OT and NT prophecy is perhaps due to an intentional vagueness on the part of the writer.

The NT, then, leaves us no room to doubt that in the primitive church next in importance to the apostles stood the Christian prophets. Prophecy, like other *charismata*, was an endowment of the church as a whole. This is clear from the scene at Pentecost (for we cannot entirely sever prophecy from the gift of tongues), and also from another significant occasion when prophecy followed the laying on of apostolic hands. But, like other *charismata*, it manifested itself especially in certain individuals. No human choice, however, determined their selection; and this in itself differentiated them from the administrative officers of the church. The prophetic gift was immediately recognised wherever it appeared, and its possession raised the humblest to a position of eminence.

Besides the biblical names which we have mentioned, we hear of Ammia of Philadelphia and Quadratus of Athens as exercising the prophetic gift (Eus. *HE* 5 17), and other prophets and prophetesses appear among

1 [That Paul himself had 'visions and revelations of the Lord' appears from 2 Cor. 12 1 *ff.*; cp Acts 13 9 27 10.]

PROPHETIC LITERATURE

the early sects. The strangely interesting revivalistic movement called the Phrygian heresy, and commonly known as Montanism, was a vast effort to resuscitate prophecy, and to magnify the enthusiastic authority against the administrative.

32b. Other prophets; Montanism.

Montanus and his two prophetesses, Prisca and Maximilla, based their extravagant claims on the great chapters of the Fourth Gospel in which the Holy Spirit is promised as the Paraclete who shall guide the church into all the truth. They claimed that in their persons this promise was at last fulfilled, and that they were new incarnations of the deity, with authority to supersede the teachings of the apostles, and even to say more than had been said by Jesus himself. The spirit of this movement rapidly spread westward. Rome, Carthage, and Gaul were all stirred by it. It was a moment when the church was harassed by persecution, and men's minds were excited and thrown somewhat off their balance. The martyrs of Lyons and the martyrs of Africa alike show sympathy with the movement, though in a tempered form. It seemed to a great spirit like Tertullian's that the church's love had been growing cold, and that it needed some startling revival such as Montanism promised to inaugurate.

It is not clear how far this 'new prophecy,' as it was called, stood in a direct line of succession to the primitive Christian prophets. Those who sought to harmonise it with the Catholic church certainly quoted the earlier prophets in its justification. The movement failed, less perhaps from its early extravagances than from the inherent weakness of prophecy as a system.

It has had several parallels in later history, such as the Anabaptists of the Reformation period, and yet more notably the Irvingites of a recent generation; we might perhaps add to the list the self-denying but extravagant zeal of the Salvation Army. Every such endeavour has witnessed to a truth—a truth which the church in its ordered sobriety is perpetually in danger of dropping out of sight; but it has isolated that truth from other complementary truths; it has divorced enthusiasm from order, and erected it into a supreme authority. Again and again organisation has been too strong for it, and prophecy as an institution has proved to be incapable of permanent resuscitation.

In its most spiritual element the gift of prophecy may be said never to have become extinct in the Christian church. Age after age has seen the rise of great teachers, alike within and without the ranks of the regular ministry: men who were dominated by a sense of immediate mission from God, and filled with a conviction which imparted itself by contagion to their hearers. But prophecy as an institution is what we have been considering, and as such it was destined to pass away, leaving those of its functions which were vital to the church's well-being to be discharged as a rule by the settled ministry, which rose to its full height only on its rival's fall.

33. Conclusion.

In reviewing the causes of the disappearance of the prophetic order, we may give the first place to this necessary rivalry with the administrative authority. To the prophets themselves no administrative functions are ever assigned. This very exemption led to a contrast and ultimately to a conflict between them and the regular church officers. It became intolerable, as time went on, that the ordinary officers should be liable to contradiction and opposition from irresponsible enthusiasts coming and going as they chose. So long as administration was quite subordinate, and the prophets were true expounders of a divine message, all would go well; but the expansion and general settlement of the church gave a growing importance to the official class, and a dual control was inconsistent with the church's unity. Moreover, as we have seen, the institution of prophecy contained the elements of its own dissolution. Even to the genuine prophet the fulfilment of his function brought serious peril. The loss of self-control involved in the ecstatic condition—and ecstasy was a common, though not universal, accompaniment of prophecy—has often been observed to have a weakening effect on morals. Already in the NT we have found indications that immorality was sheltering itself under a prophetic guise. Again, the prestige and emoluments attaching to the prophetic gift made it worth while for unworthy persons to simulate the possession of it. Nor was it easy to discriminate between the true inspiration and the sensual excitement which strove to counterfeit it. Once more, in the Greek and Roman world magic and mantic prophecy was everywhere in full play; and it was inevitable that Christian prophecy should come to be confused with practices which had this at least in common with it, that they claimed to be direct communications with the invisible world.

We need not seek further for the causes of its decay. It had served its turn in the first enthusiastic stage of the Christian church. As the church grew larger and stronger, stress was of necessity laid upon the permanent organisation on which its corporate unity depended. Irregularity was destined to give way to regularity, and the ministry of enthusiasm yielded to the ministry of office. J. A. R. (§§ 30-33).

C. Survey of the Prophetic Literature.

We now proceed to take a survey of the prophetic literature in the narrower sense of the word. We shall treat first of documents whose authors' names are known (§§ 35-42), then of the anonymous writings (§§ 43-45), and we shall pass over narratives other than those imbedded in collections of written prophecies. It is true, by taking this course we shall give the reader no idea of the large influence of prophecy on historical literature and on the religious poetry of the community. This omission (enforced upon us by the limits of our work) is, however, to some extent repaired by anticipation in the article Historical Literature, §§ 3-8, 10; see also Hymns, § 2, and any good commentary on the Psalms. On Christian prophetic literature it is unnecessary to speak here at length. The Apocalypse of John is called a 'prophecy' (Rev. 1 3 22 7 *ff.*), because it declares 'things which must shortly come to pass' (Rev. 1 1), though it was not on this account that it was admitted into the Canon. Prophecy, indeed, had come more and more to be regarded as having to do with eschatology (cp Smend, *AT Rel.-gesch.*(2) 342), and since the 'last things' were thought to be close at hand, the definition of the contents of the Johannine Apocalypse may be applied to apocalyptic writings in general. A recently expressed view[1] that the synoptic Gospels come to us through the (Christian) prophets is not likely to meet with acceptance. See, further, Old-Christian Literature, and on Christian prophets, cp above, §§ 30 *ff.*

34. Introduction.

Our starting-point, therefore, will be taken, not at the so-called oracles of Balaam [*q.v.*], but at the short but important book of Amos, which suggests so many hard problems—textual, exegetical, and historical (see Amos, Book of); we shall assume the results of critical analysis. Most readers, perhaps, have no doubt that the author of the book (see 7 14 *f.*, and cp 1 1) was a herdman of Tekoa, and also a cultivator of sycomore figs. It is not clear, however, how a Tekoite herdman can have interested himself so much in the northern kingdom. 'It required no small courage for a Judæan to enter Israelite territory for the express purpose of interfering in the religious and social life of the nation, denouncing everything as corrupt, threatening swift and utter ruin.'[2] Moreover, how does Amos come to have two occupations, which

35. Amos.

[1] E. C. Selwyn, *The Christian Prophets* (1901).
[2] Dr. J. Taylor, in Hastings' *DB* 1 87*b*.

appear to require two different residences (AMOS, § 2)? Is this at all likely? and if it is a fact, why does Amos take the trouble to communicate it to Amaziah? These difficulties may predispose us to adopt the results of the present writer's most recent textual criticism of the prophecies of Amos, which are connected with the theory that they are in every sense a S. Palestinian work, being specially concerned with the NEGEB [*q.v.*], and that this region in the time of Amos belonged to N. Israel.

For the latter point, see 2 K. 14 25 28 (emended text), 'and they shall oppress you from the region about Maacath to the wady of Arabia.' Cp, however, col. 2406, notes 5 and 6, which are based on the traditional view that the great enemies of Israel before the Assyrians were the Aramæans of Damascus.

According to the theory in question, for example, among the places and regions mentioned in chaps. 1 3-3 3 we find Cūshām (less probably Kidshām), Jerahmeel, Miṣṣūr (see MIZRAIM), Amalek, Rehōbōth, which, in the emended text, take the place of Damascus, Gilead, Moab, Ammon, Rabbah respectively. It is also at a southern Bethel that Amos encounters the hostility of the priest Amaziah (7 10), and among the chief offences of the Israelites it is mentioned that they resort to the southern sanctuaries—'Bethel,' Jerahmeel (= Dan?), 'Dan' (see LUZ, 2), Shimron, and Beer-sheba (4 4 5 5 8 14), which are also not improbably referred to as 'the high places (bamoth) of Isaac' (7 9), ISAAC [*q.v.*] being popularly regarded as the patron of the Negeb. Lastly, the region to which the Israelites are to be carried captive is described as being beyond Cusham (5 27, see SALMA). It now becomes clear where the prophet's native place must have been. תקוע (Tekoa), like יקתאל (see JOKTHEEL), is a perfectly natural corruption of ירחמאל (Jerahmeel), and בנקדים in 1 1 probably comes from בֶּן־חָרִים or בֶּן רֶקֶם, 'a native of Ḥarim,' or 'of Rekem.'[1] The same origin should most probably be assigned to בוקר in 7 14, while בולס in the same passage is not less clearly a fresh corruption of ירחמאל. In 7 15, too, מאחרי צאן ('from behind the flock') is probably a distortion of מכושן ירחמאל, 'from Cushan-Jerahmeel.'

We have called Amos a prophet, and one of the 'higher prophets' he certainly was. Even after removing the various post-exilic insertions, however, there is much in the book that we can with difficulty suppose to have been uttered in public. Was this really the work of Amos? or may we suppose a school of early prophetic writers to have worked up fragmentary notes of the prophecies of Amos, and given them a striking literary form? As a scholar who does not question the traditional view has remarked, 'it might be difficult to trace any connection between the orderliness that Amos displays in his book and his vocation, unless, indeed, we are bold enough to account for it by the leisure enjoyed by the Oriental shepherd.'[2] Another scholar, who is equally faithful to tradition, has endeavoured to prove the existence of the strophic form in the writings ascribed to this prophet.[3] Certainly the prophecies in 1 3-2 16 and 4 6-11 are highly artistic in structure. But is it not the easiest solution of an undeniable difficulty that Amos, whom we can scarcely suppose to have turned his mind to the elegances of the poet's art, gave way to the solicitations of disciples, and permitted them to edit his prophecies for a public which only the disciples ventured to imagine as probable? If this conjecture be accepted, all the more interest attaches to the prophetic visions in chaps. 7-9, because these visions are here described in the autobiographic style.

Biographical too is the opening of the next great literary monument of prophecy (Hos. 1 2-6 8 *f.*). It

36. Hosea. does not indeed tell us who Hosea was; but if we may adopt an explanation of 'Gomer, bath Diblaim' (1 3), based upon textual conjecture, it does mention that Hosea's wife was a Jerahmeelite,[4] and this strongly favours the hypothesis that

[1] חרים (Harim) and רקם (Rekem) are both to be explained as corruptions of ירחמאל (Jerahmeel). For HARIM (Ezra 2 32) cp Ezra 2 31, where 'the other Elam' should be 'Jerahmeel.' For Rekem, cp REKEM, SELA, and altogether see *Crit. Bib.*

[2] Mitchell, *Amos*(2) [1900], 9.

[3] Löhr, *Untersuchungen zum Buch Amos* (1901).

[4] Both גמר and דבלים (1 3) are probably corruptions of ירחמאל. The extraordinary words in 3 2*b* we take to be corruptions of the name of Hosea's wife. This is confirmed by 𝔊's νεβελ οἴνου = נבליין = דבלים = ירחמאל. See *Crit. Bib.*

Hosea, like Amos (probably), was an Israelite dwelling in the Jerahmeelite Negeb.

We can easily understand that either from his own travels or from the statements of the many Israelites who flocked to the southern sanctuaries, such a person would be well acquainted with the moral and political circumstances of northern Israel. At the same time, he would have a not less keen interest in the Negeb. Some place-names in the MT of Hosea which have been thought to refer to N. Israel, in the true text most probably refer to the Negeb,[1] and the 'Asshur' and 'Mizraim' (read rather 'Mizrim') of which he speaks refer to regions to the S. of Palestine. As in the prophecies of Amos, one of the chief offences of the N. Israelites is their resorting to the sanctuaries of (according to the hypothesis) the Negeb. This must be the reason why, according to Hosea's biography, the prophet married a Jerahmeelite wife. The relapse of Israel into a lower form of religion was symbolised by his union with a 'daughter of Jerahmeel,' because Baal-worship, or calf-worship (Hosea identifies 'Baal' with the 'calf'), was practised at the Jerahmeelite sanctuaries. 'Lo-ruhamah' and 'Lo-ammi,' the names of Hosea's children, are no doubt suggested by the name 'Jerahmeel.'[2]

The second chapter (after the later insertions have been removed) is almost a commentary on the biographical fragment; Israel's Baal-worship is its adultery, the punishment of which is desolation of the land. Generally, however, Hosea delights in short abrupt sentences (hence the epithet applied to his style by Jerome: *commaticus*). As the late A. B. Davidson[3] well says, 'he little addresses the people; rather, turning his face away from them, he speaks of them to himself in shuddering, disjointed monologue.' His literary originality is perhaps shown by the fact that there are no important phraseological points of contact between him and Amos.

The burden of Hosea's warnings to northern Israel and the Negeb, however, is surely not uninfluenced by that of the warnings of his older contemporary to the same regions. 'I will cause you to go into captivity beyond Cusham,' says Amos (5 27); they will not return to Yahwè, says Hosea, then they shall return to Miṣrim, to Geshur (Hos. 11 5; 9 3), to Jerahmeel (7 16).[4] EV, it is true, once introduces the Egyptian 'Memphis' into Hosea's threatenings (9 6); but the Hebrew is מֹף, which occurs nowhere else and is doubtless corrupt (see MEMPHIS, NOPH).

Isaiah is a true successor of Amos and Hosea; he combines the ethical severity so transcendently manifest

37. Isaiah. in the former with the emotional warmth of the latter. He is not indeed a N. Israelite; Judah and Jerusalem are the main objects of his prophetic threatenings. But he is well aware of the material strength of the N. Arabian peoples and of the pernicious religious influence which proceeds from 'Jerahmeel.'[5] The primary object of the Jerahmeelites outside of the Israelitish Negeb was to regain the cities which had formerly been in their occupation. But their ambition was not limited to this. They made incursions both into Israel and into Judah, and in Isaiah's time under 'Rezin king of Aram (Jerahmeel)' they even threatened Jerusalem[6] (2 K. 16 5 Is. 7 1). Jerahmeel, however, has ceased to be the instrument of Yahwè's vengeance; it is, according to the present theory of a number of misunderstood passages, one of the four peoples of which Isaiah is commissioned to predict the punishment, the others being Israel, Judah, and Assyria.

Isaiah's poetic capacity is clear from the very earliest of his works (2 5-21). It is plausible to suppose that he had not yet come forward as a prophet when he

[1] Partly by corruption, partly by editorial manipulation, the names have often been miswritten. 'Mizpah' and 'Tabor' (5 1) should probably be 'Zarephath' and 'Rehoboth.' 'Gilgal' (4 15 9 15 12 12 [11]) and 'Gilead' (6 8 12 12 [11]) should be 'Jerahmeel'; 'Shechem' (6 9) should be 'Cūshām.' 'Jezreel' (1 4 *f.*, 11 (2 2)) is no doubt right; but it is probably the southern Jezreel that is meant (see § 7).

[2] Cp Is. 29 1 *f.* (read ירחמאל and לא ירחמאל). לא עמי in עמי very probably (like עמיאל) comes from ירחמאל.

[3] Hastings' *DB*, 2 425 *a*.

[4] The only considerable emendation here is ירחמאל for לא על in 7 16; Pasek warns us to examine the text. See *Crit. Bib.*

[5] In 2 6 מלאו מקדם should certainly be מלאו קסמי ירחמאל, 'they are full of diviners of Jerahmeel,' and in 2 20 the idols which the Israelites cast away are described in the true text as having been made by the Jerahmeelites (see MOLE).

[6] See *Crit. Bib.*; REZIN. A similar case is recorded in 2 K. 12 17. Though this is not yet in the commentaries, the Hazael who 'set his face to go up to Jerusalem' was no doubt a N. Arabian king. Cp also 2 Ch. 14 9 (see ZERAH).

produced this splendid poetic description of the day of Yahwè. At present it stands as the introduction to some prophetic passages such as Isaiah might really have uttered.[1] This position, however, is presumably due to the editor who is responsible for the fitting together of the fragments of prophecy which follow. There is, however, another prophetic poem, the strophic structure of which can be more distinctly made out. In an article on 'prophetic *literature*' it may be permissible to devote a few lines to so remarkable a production.

It would seem at first sight as if the strophic divisions were (*a*) 9 8 [7]-12 [11]; (*b*) 9 13 [12]-17 [16]; (*c*) 9 18 [17]-21 [20]; (*d*) 10 1-4. In the third strophe, however, the two halves do not cohere well. It is probable that only the first half is correct, and that the third couplet of the strophe (9 19 [18] *a*, *b*) should run—

By the wrath of Yahwè the land is overthrown,
And the people become as food for Shĕōl.

The three following couplets (one of which, 'Manasseh, Ephraim,' etc., is probably a gloss) seem to have come from some other context containing a description of anarchy and oppression. How the third strophe closed, we do not know. The fourth stanza can scarcely have been 10 1-4, which belongs probably (without the refrain, *v.* 4*b*) to the grand succession of 'woes' on the sinners of Judah in 5 8-24. Possibly it has taken the place of 5 26-29, which describes the approach of the enemy who is to 'overthrow' the land, and make the people 'as food for Shĕōl.' That the last strophe has no refrain, is quite natural. Very possibly indeed the preceding strophe had none. For after the enemy (Assyria?) had come from afar, and carried the people into exile (figuratively described in *v.* 19 *b*), what room was there for any further blow? Very grand is the refrain ('For all this,' etc.), and surely not less impressive than a thunder-peal; but the poet refused to carry it on when the sense forbade.

The first strophe speaks of the inroads of Rezin and the N. Arabians; the second of a great slaughter (in battle? or in a usurper's insurrection?); the third and the fourth of the ruin brought by an Assyrian invasion. In *v.* 10 [11], צרי, as Lagarde saw, is a miswritten רצין, and (as even this able critic did not see) איביו (as אֹיֵב often in the Pss.) is an error for עַרְבִים 'Arabians.'

Apparently this fine though fragmentary poem refers, not at all to Judah, but to the northern kingdom. This has been doubted, but the unemended text gives no continuous sense, and the result of the emendations is confirmed by the explanation given of 'the people, all of it' in Is. 9 9 [8]—viz., 'Ephraim and the inhabitants of Samaria.' As time went on, we may suppose the poetic impulse declined and the prophetic greatly increased. The ruin of N. Israel is predicted, most think, in 8 4 and in 28 1-6,[2] and inclusively at least in 6 9-13 and 17 1-11.

The last of these deserves special notice because of the combination of Aram or Damascus with Ephraim (N. Israel). It is most usual to date this prophecy before the 'Syro-Ephraimitish war,' chiefly because no reference is made to the joint attack of Syria and Israel on Judah. The general chronological view of the prophecy may perhaps be correct, but at any rate (as recent criticism suggests) 'Ephraim' in *v.* 3 is a corruption of 'Jerahmeel,' and 'Aram' in the same verse means the same N. Arabian people, while 'Dammesek' (Damascus) is miswritten for Kidsām or perhaps rather 'Cūshām,' and 'Aroer' (*v.* 2) for 'Arab' or 'Arbim.' It is judgment upon the ancient foe of Israel that Isaiah here prophesies, but also upon Israel itself, which (if we may infer anything from the combination of *vv.* 1-3 with *vv.* 4-11) has found it necessary or expedient to enter into an alliance with 'Jerahmeel.' Judah, too, in spite of the Jerahmeelite invasion (chap. 7),[3] probably found reason to seek a Miṣrite (Jerahmeelite) alliance at a later day (see col. 2201, n. 1).

It is very possible that notes of Isaiah's discourses were partly worked up by the disciples of whom he speaks in 8 16. For 1 2-26 this view seems to suggest the only adequate explanation of the phenomena; but we cannot venture with any dogmatic positiveness to limit its application to this passage. Nevertheless,

[1] 3 1-15, and 16-24, omitting certain later insertions (see *SBOT*).
[2] See, however, below, on Micah (§ 38).
[3] See REZIN, and *Crit. Bib.*

there appears to be no rashness in adopting the general verdict of critics that Isaiah, take him all in all, is the greatest of the older prophets whose discourses have been committed to writing, though the unique versatility ascribed to him by Ewald may be incapable of strictly critical proof.[1]

Micah, being a younger contemporary of Isaiah, may naturally be expected to show traces of his influence.

38. Micah. So much at least appears to be certain—that both prophets announce the ruin of Judah and Jerusalem (Is. 22 1-14; Mic. 3 12). It is also generally held that both predict the fall of Samaria (Is. 28 1-4 Mic. 1 2-7), though the predictions were written down only after Samaria's fall had occurred.[2] It is very possible, however, that the prevalent opinion is mistaken.

Amos and Hosea, rightly read, both point, we believe, to the southern sanctuaries as the cause of sin to the northern kingdom, and Isaiah (26 20, see above § 37) speaks of 'Jerahmeel' as exercising a baleful influence on Judah. This seems to show what Micah means (1 5) by 'the transgression of Jacob'—namely, שמרון—and the 'sin of the house of Judah'—namely, ירושלם. The former name should in fact probably be read שִׁמְרוֹן SHIMRON [*q.v.*], and the latter ירחמאל Jerahmeel. And in Is. 28 1 3 שכרי אפרים is not improbably a corruption of כֻּשָׁם ירחמאל 'Cusham-jerahmeel'; the reference will in this case be to some important Jerahmeelite city (cp SHECHEM, 2), probably the same as that called 'Shimron' by Micah. Both prophets anticipate the devastation of the Negeb, its cities and its sanctuaries,[3] by the Assyrians.

The historical value of Micah is therefore greater than his religious originality, unless indeed we take in portions of the book which criticism tends more and more to disallow (see MICAH [BOOK]). From a literary as well as a religious point of view, this country prophet contrasts unfavourably with the great city prophet Isaiah. There is, however, in 2 4 (if Stade and Nowack may be followed) a little *ḳīnāh* or dirge which deserves attention as an illustration of Budde's ḳīnāh-metre (see LAMENTATION, § 2).

The next prophet in chronological order, according to most, is Nahum, of whom Driver[4] remarks that 'of all

39. Nahum and Habakkuk. the prophets he is the one who in dignity and force approaches most nearly to Isaiah.' There is, however, much to be done before we can say that we thoroughly understand him (see NAHUM); underneath our present text it is possible to trace a prophecy which related, not to Nineveh, but to the Jerahmeelite capital. The key to the prophecy is in 1 15 [2 1], which, though it forms part of a late alphabetic poem, may nevertheless be used as a commentary on the prophecy. The passage runs (we omit a few words), 'O Judah, keep thy festivals, perform thy vows, for no more shall בליעל pass through thee; he is consumed, cut off.' בליעל is almost certainly miswritten for ירחמאל.[5] The prophet himself describes the city to which he refers as 'city of the Arammites'[6] (Jerahmeelites), and its king as 'king of Assur,' *i.e.*, the southern Geshur (2 1 3 18); in 2 8 3 7 its name is given as נינוה, which is probably miswritten for ירחמאל. The city whose fate is likened to that of נינוה is called (3 8) in MT נא אָמוֹן (RV, No-amon). It may have been Janoah, a city in N. Israel depopulated by Tiglath-pileser (2 K. 15 29)—*i.e.*, Yenu'am? (see JANOAH). If so, Nah. 2 *f.* was written after 734 B.C.; the prophet himself was perhaps a native of the Negeb; 'Elkoshite' may come from 'Eshcolite.'[7] Very possibly we may venture on a

[1] This seems to the present writer certain. See, however, Driver's *Introd.* (ch. 3).
[2] Cp Smend, *A T Rel.-gesch.*(2) 237, n. 2.
[3] Note the reference to the idols (symbols of Yahwè?) in Mic. 1 7.
[4] *Introd.*, 315.
[5] This is one of a group of passages (Is. 35 8 52 1 Joel 3 [4] 17) in which the names of the N. Arabian oppressors of the Jews are cleverly obscured. See *Crit. Bib.*
[6] Reading, in 3 1, אֲרַמִּים for MT's דָּמִים (cp רמים for אֲרַמִּים Ps. 51 16).
[7] Peiser's explanation (see ELKOSHITE) is no doubt attractive; but the evidence pointing towards a southern origin for 'Kish (to which name Peiser refers as a parallel) is strong. נחום

still more definite statement. Relying on requisite emendations of passages in Is. 7 and 8, we may lay it down as in a very high degree probable that the N. Arabians invaded Judah, and that as a punishment Isaiah expected the N. Arabian border of Palestine to be devastated by the Assyrians. It is reasonable to assume that Nah. 2 *f.* was written in the course of this Assyrian invasion, after certain N. Israelitish districts (including the city of Janoah) had been taken, but before Cush or Jerahmeel had felt the heavy hand of the conqueror. That its prediction really was fulfilled we may probably infer from Tiglath-pileser's own mention of a campaign against N. Arabia and Gaza, and from the double notice in 2 K. 15 29 (from the document which Kittel calls K) and 16 9 (from Kittel's A).[1] It was reserved for a post-exilic writer, whose work, however, has been edited in such a way as to destroy the true geographical reference, to produce an edifying story describing how, after an initial act of disobedience, a prophet of Israel, at the divine command, warned the capital of the Jerahmeelites of its danger, not without happy results (see § 44).

This result places Nah. 2 *f.* (in its original form) about a century earlier than the date assigned to it by the new critical tradition. No critic, however, will deny that there are difficulties in the ordinary view (see NAHUM [BOOK]). One of these demands special notice here. If Nahum's oracle really refers to Nineveh, it follows that either Isaiah or Nahum was under a serious illusion; for Isaiah distinctly calls Assyria the 'rod of Yahwè's wrath' (Is. 10 5), whereas Nahum describes the oppression of 'Nineveh' as wicked injustice.[2] It was, however, quite in accordance with the prophetic tradition (see Am. 1 3-5) to accuse Cusham (or Jerahmeel) of transgressions so great that they deserved the severest punishment.

The denunciations of the troublesome Jerahmeelite neighbours still continue; the captivity spoken of in 2 K. 16 9 (?) was therefore only partial. Habakkuk is the true successor of Nahum. For it is plain that the wicked who seeks to annihilate one who is more righteous than he (Hab. 1 13) is the same oppressor whom Nahum (3 19) has already accused of far-reaching wickedness. This oppressor is soon to be put down, and to suffer the fate which he has destined for Judah, at the hand of the Chaldæans. Critics have generally thought of the Assyrians; but the Assyrian suzerainty could hardly have awakened the indignation so energetically and poetically expressed by Habakkuk.[3] We may probably venture, with Driver, to place the prophecy in the reign of Jehoiakim.[4]

Zephaniah is a follower of Isaiah, but lacks that prophet's classic moderation (Zeph. 1 3); nor does he

40. Zephaniah and Jeremiah; Scythians or N. Arabians.

connect the announcement of the 'day of Yahwè' with any high moral purpose, 2 11 and 3 8-10 being, as Smend points out, not part of the original Book of Zephaniah. We must not, however, contrast Zephaniah with Amos, Isaiah, and Jeremiah, on the ground that he 'threatens all nations from Ethiopia to Assyria,'[5] for 'Assur,' as so often, is substituted for 'Geshur,' 'Nineveh' is misread for 'Jerahmeel,' and 'Cush' is the well-authenticated Cush of N. Arabia. Who is the intended instrument of Yahwè's vengeance, is not stated. If, however, the destroyers 'from the north' in Jer. 4 6*b* 6 1*b* are the Scythians, we can hardly suppose that the same destroyers are meant in Zephaniah, for the prophet says (2 13) that Yahwè 'will stretch out his hand *against* the N.' See ZEPHANIAH [BOOK].

In reality, Zeph. 2 13 and Jer. 4 6*b* 6 1*b* represent changes in the prophetic attitude towards the people or peoples referred to. 'The North' in these and in the similar related passages should probably be 'Zaphon.' This is a name connected with the N. Arabian border of Palestine (see PARADISE, § 4), and probably equivalent to Miṣrim (see MIZRAIM, § 2*b*). It appears that not only Jeremiah's late biographer,[1] but even the supplementers of his fragmentary work (see § 45), regarded him as a prophet of N. Arabia as well as of Judah; and in the contexts of Jer. 4 6*b* 6 1*b* occur names which point, in the former case with probability, in the latter with certainty, to an invasion from the S. This view is confirmed by a group of other passages in the little poems ascribed with most confidence to Jeremiah himself.

(*a*) Jer. 4 15 *f.* 'For hark! one declares from Dan, and makes known calamity from Mount Jerahmeel. Miṣrites come from the land of Jerahmeel, and utter their voice (battle-cry) against the cities of Judah.' This presupposes textual corrections. Duhm's defence of the traditional text is a plain makeshift,—'It seems that the remnant of N. Israel at the foot of Antilibanus and on the Ephraimite mountains were still in touch with Judah and Benjamin (cp 41 5 *ff.*).' But the Dan intended must be a southern Dan (= Ḥaluṣah), and 'Ephraim,' as often, is miswritten for 'Jerahmeel'; 41 5 is corrupt.

(*b*) 8 16, 'The snorting of his horses is heard from Dan.' A place situated at the extreme northern limit is not appropriate. (*c*) 6 1, 'Blow the trumpet in Tekoa, raise up a signal at Beth-jerahmeel.' Duhm remarks that, Tekoa and presumably Beth-haccerem (?) being places in the S., the reference to them must be an interpolation. This suits the Scythian theory, no doubt, but is the resource of despair. (*d*) 2 16, 'Also the sons of the impious (read חֲנֵפִים) will break thee to pieces, the sons of Jerahmeel'—*i.e.*, a desolating Jerahmeelite invasion will be Judah's punishment for copying the religion of Geshur (MT 'Shihor' and 'Aššur') and Miṣrim (MT Miṣraim); see *v.* 18. Cp NOPH, TAHPANHES. (*e*) and (*f*) 5 15 *f.* and 22 20 may also probably be added (see *Crit. Bib.*). The former passage is specially important because גוי איתן הוא מעולם הוא seems to be an early explanatory gloss='that is, the Ethanite nation; that is, the Jerahmeelite nation.'

This result is important, not only as confirming our conviction of the perennial influence of N. Arabia on the political and religious history of Judah, but also as supplying fresh material for an opinion on the chronology of Jeremiah's works.[2] In their present form, this prophet's genuine works are certainly monuments of the later period of his ministry.

Tradition connects Jeremiah with a scribe named Baruch. It is probable that, like the pre-exilic prophets

41. Jeremiah continued.

in general, he was too much absorbed in intercourse with his God to think much of the means of perpetuating his revelations. At the same time we can quite well imagine him dictating his prophecies—which are often rather poetic elegies than discourses—to a faithful scribe. Clearly this involves no disparagement to Jeremiah's poetic talent; Baruch, if he was really the author of the biographic sections, or of part of them,[3] was too prosaic a person to have meddled with the structure of his master's poems. It is noteworthy that one of the biographic sections contains a little poem (see LAMENTATION, § 2), consisting of two pentameters, which is ascribed to Jeremiah. In Duhm's opinion it is an elegy on the fate of the people of Judah; but the prophet's biographer had access to more poems of Jeremiah than we now possess.

According to the late A. B. Davidson,[4] the literary remains of Jeremiah are formally less perfect than those of Isaiah; 'the poetical rhythm is not so regular, losing

(Nahum), too, may reasonably be connected with ethnics like NAHAM, NAHAMANI, etc.

[1] גלעד וגליל (Gilead and Galilee) in the former very possibly comes from ירחמאל (Jerahmeel); and דמשק in the latter from קדשם (Kidsām = Kadesh) or rather כּוּשָׁם (Cūshām = Cush, in N. Arabia).

[2] See Smend, *AT Rel.-gesch.*(2), 240 *f.*

[3] That the Jerahmeelites are referred to is also suggested by Hab. 3 7 ('the tents of CUSHAN'). The poem in Hab. 3 must be later than Habakkuk; but the editor who inserted it may have been partly influenced by this reference to the N. Arabian Cush. A certain geographical consistency need not be denied.

[4] On the composition of the book see NAHUM (BOOK OF).

[5] Smend, *op. cit.* 243.

[1] See Jer. 27 3, where צר and צידון are, as in Joel 3 [4] 4, corruptions of מְצוּר Miṣṣur.

[2] The descriptions of the Jerahmeelite invasion, even if only anticipative, can hardly have been written long before the fourth year of Jehoiakim (2 K. 24 2).

[3] Duhm accepts this view. N. Schmidt, however, denies that any part of our present Book of Jeremiah can be ascribed to Baruch. He also rejects the narrative in chap. 36 altogether (see JEREMIAH [BOOK], § 9, 17), whilst Duhm (288) regards this as an 'important narrative on Jeremiah's activity as a writer.'

[4] Hastings' *DB* 2 576 *a*.

PROPHETIC LITERATURE

itself often in elevated prose.' This shows us some of the points to which future study must be directed. We must determine more exactly the extent of the literary remains of these prophets, and in correcting the faults of the traditional text must pay more regard to metre. Criticism has till lately somewhat neglected Jeremiah. Duhm and Cornill, however, have opened up new paths, and a stricter textual criticism may assist us in determining between them where they differ. Comparing their results, we find those of Cornill the less startling. According to him, it would be an error to try to bring the (genuine) poetical passages of Jeremiah into correct strophic pentameters ('Ḳinâh-strophes') or trimeters. Apart from a few lyrical *intermezzi* in strophes of pentameters, Jeremiah does not advance beyond irregular verses ('Knittelversen'); and but for the strophic structure of his poems, we might describe his style as rhythmic prose. Duhm, however, says, 'Most of the poems are very short (on the average containing less than five Massoretic verses); the metre is everywhere the same, quatrains with alternately three and two beats.' He adds that the poetical diction is correspondingly simple and natural, popular in the best sense, and on this account touching and even overpowering, and that in its abundance of striking and original images it reveals a born poet. This characterisation is based on the short poems, about sixty in number, which Duhm assigns to this prophet.

42. Ezekiel to Zechariah. If Jeremiah is distinguished as a poet by his naturalness, Ezekiel is no less conspicuous for his excessive artificiality. His book indeed is much more a work of literature than of prophecy, in the true and original sense of the word 'prophecy' (see EZEKIEL [BOOK], § 2). He himself tells us of a time when from physical incapacity he had to suspend his utterance of the message of woe to his people (3 26); and though we cannot doubt that he addressed assemblies of the exiles—commonly in similitudes (מְשָׁלִים; see PROVERB) of one kind or another (20 49 [21 5])—it is plain that he gave a more elaborate form to these addresses with a view to their publication. He excels in *ḳīnōth* or dirges (for references see LAMENTATION, § 2); but partly from textual corruption, partly from the extensive modifications introduced by an editor, who confounded מָצֻּר (Miṣṣur = the N. Arabian Muṣri) with צֹר (Ṣōr = Tyre) and מִצְרִים (Miṣrim, also = Muṣri) with מִצְרַיִם, it is difficult to reconstruct their original form.[1] According to Kraetzschmar, the book is full of doublets and parallel texts (see especially 1 1-3 13 *f.* 3 4-9 4 9-17; 6 1 *ff.* 7 1-9 8 7 *f.* 9 5-7 10 1 8 *ff.* 12 21-27 17 8-10 16-20 18 21-29 23 40-44 24 22-24 25 3-7 26 2-14 19-21 30 22-26 35 3-15*a* 38 39 43 18-27 45 21 *ff.*). If this critic is right, we may even speak of two recensions of the text, one of which is shorter and speaks of Ezekiel in the third person (see Kraetzschmar on 1 2 *f.* 24 24), and is probably based on an excerpt from the longer one, in which Ezekiel himself is the speaker. The combination of these recensions is obviously the work of a redactor. Since the text of 𝔊 presents the same phenomena as MT, the redaction must have taken place before that version was made.

It has been asserted that the prophets use visions 'as a vehicle in which they bring home to man's highest faculties the providential mysteries with which they feel themselves inspired.' This is at any rate not wholly untrue of Ezekiel and (especially) Zechariah, whose visions seem to be to a great extent artificial and literary. Such visions indeed are distinctively characteristic of the later period of prophetic and semi-prophetic literature. Haggai may have none, and 'Malachi' may have none; but they cannot in this respect be regarded as typical specimens of their age, and Zechariah gives us no less than eight visions (1 7-6 8), of the artificiality of which there can hardly be a doubt (see ZECHARIAH [BOOK]). Certainly, as Moulton says,[1] no other prophecy equals Zechariah's sevenfold (eightfold) vision in the demand it makes on the imaginative powers. From a literary point of view, however, must we not add that it contrasts disadvantageously with the simple, natural, and truly poetic visions of Is. 40-48?

[1] Kraetzschmar has bestowed much pains both on the correction of the text (after able predecessors, especially Cornill) and on the metrical arrangement of Ezekiel's poems. He overlooks, however, the worst corruptions—those of names of countries.

D. JERAHMEELITE THEORY.

43. Semi-prophetic writers: Is. 40-66. The writers called 'prophetic' who chronologically precede Ezekiel, Haggai, and Zechariah are fully prophetic, but only half literary; the nameless writers who follow these transitional personages are in the full sense literary, but at most only half prophetic. That they would have assumed the title of prophets may confidently be denied, and yet the existence of a secondary prophetic element in them is too plain to require proof. Even 'Malachi,' who is on the whole (see MALACHI, § 7) dry and prosaic in style, in 3 1-5 catches something of the old prophetic enthusiasm, whilst the succession of writers of whom we have to speak next really succeed in assimilating much of that which is best in the old prophets, of course apart from their unique authoritativeness. From a literary point of view, we may, if we like, criticise them; but at any rate they care much about style and imagery, and have produced a new style of literature. For us perhaps the most interesting feature of their work is the elaboration of the Messianic idea. We find it first (so at least a strict criticism suggests) in Ezekiel (34 23 *f.* 37 24 *f.*; cp the gloss in Hos. 3 5); the Second Isaiah, however, apparently dispenses with it;[2] Zechariah too, in the original text of Zech. 6 12 *f.*, must have referred, not to a future Messiah, but to ZERUBBABEL[3] [*q.v.*]. When, however, the hopes attached to this prince were disappointed, devout and patriotic men of the semi-prophetic school looked into the future, and found there a son of David, marked out by God as, under him, the king of Israel, the perfect king—the Messiah (Is. 9 6 [5]):

> 'And the angel of Yahwè calls his name,
> Protector of Israel, Prince of prosperity.'[4]

With regard to Is. 40-66, it is important to mention that though the results attained (see ISAIAH [BOOK]) without the help of the new Jerahmeelite theory are to a great extent sound, a number of critical details require re-examination.

For instance, in the light of this theory it becomes at once highly probable that the composition of chaps. 40-55 should be placed in N. Arabia. That this book (as we may fairly call it) has been much edited, is certain, and no one can be surprised that sometimes (though not so often as in Ezekiel) there are traces of an earlier and very different text underlying the present one (see *Crit. Bib.*). Four passages at any rate may be referred to. (*a*) 41 1-4, where the Jerahmeelites and Edomites seem to be called upon to listen to the prophetic writer's argument. This consists of a highly coloured description of the victorious march of Cyrus, which has Jerahmeel—the land where the writer and his fellows are pining in exile—for its goal. (*b*) The second is 42 22, where the Jews are spoken of as despoiled in Edom and plundered among the Jerahmeelites. (*c*) Next comes 43 14, where Yahwè says that he has sent to Jerahmeel, and will lay the Jerahmeelites low; and (*d*) 52 4 *f.*, where it is affirmed that Yahwè's people went down to Misrim to sojourn, but were oppressed by the Geshurites without cause (cp Lam. 5 6, and LAMENTATIONS, § 7), and that the Ishmaelites and Jerahmeelites act madly, and blaspheme the name of Yahwè (cp Ps. 74 10 18, and PSALMS, § 28, v.). It may be added that in at least one important passage of the third part of Isaiah (56-66) there seems to be a reference to Jerahmeelite oppressors (63 19, for מעולם read ירחמאלים[5]), though we are far from asserting that 63 7-64 12 [11] is of the same date as 40-55.

[1] *A Short Introd. to the Literature of the Bible*, 260 (1901).

[2] Sellin (*Studien*, 1 [1901]), however, interprets the 'Servant of Yahwè' in the Second Isaiah as a poetic description of Jehoiachin. See SERVANT OF THE LORD.

[3] See Duhm, *Jeremia*, 181 *f.*

[4] For the emendation of the text here assumed, see *Crit. Bib.*; cp also Lagarde, *Semitica* (*ad loc.*).

[5] The preceding word should possibly be ארנינו ('our lords are Jerahmeelites'); cp 26 13.

PROPHETIC LITERATURE

The work of the Second Isaiah (which can hardly have come down to us in its integrity) is clearly enough only semi-prophetic. The writer is a thinker, a rhetorician, and a poet; possibly he has also been a pastor; but the element of strictly prophetic revelation is secondary, a circumstance with which the anonymity of the work is closely connected. In truth, a prophet was not needed at this period of Israel's history. The discipline of exile and the self-denying labours of Jeremiah, the Deuteronomist, and Ezekiel had produced their due effect on a noble minority of exiles. The truth of the unique greatness of Yahwè, the creator of the world and the maker of history, had been burnt into their inmost being, and to this truth corresponded the sister-truth of Yahwè's election and appropriation of the prophet-people Israel. It was needful, no doubt, to be able to declare in the name of Yahwè that Israel would be 'justified' in the eyes of the world, and would be restored to its own land, there to serve its God, and to give an example of a righteous people. The chief thing, however, was to complete the education of the exiled people, and to quicken the zeal of less advanced individuals, by presenting a many-sided picture of the nature of God. The most distinctly predictive passages are 42 9 43 3 14 19 *f.* 44 26-28 45 1-3 14. Upon the whole, however, the writer regards himself as merely one who has seen or divined beforehand the fulfilment of that series of prophecies which is, to him, among the most decisive proofs of the unique divinity of Yahwè.

44. Other writings affected by this theory: *e.g.*, Joel and Jonah.

The Jerahmeelite theory has also a special bearing on Is. 24-27, on the additions to the Book of Micah, on Joel, on 'Obadiah,'[1] and on both parts of the composite Book of Zechariah; also on the story of Jonah, and on the Book of Jeremiah.

Two of these have been considered in the light of that theory already (see MICAH [BOOK], OBADIAH [BOOK]). As to Is. 24-27 we can here only point out that, on grounds of analogy, אשור and מצרים must be Geshur and Miṣrim. As to Joel, it can hardly be rash to say that chap. 3 [4] is closely akin to the latter part of the Book of Obadiah, referring as it does to the valley of Zephath or Zarephath ('Jehoshaphat,' *v.* 12, is certainly wrong[2]), and to Miṣṣur or Miṣrim[3] and Edom (*vv.* 4 19) as the cruel enemies of Judah who shall receive fitting retribution. It now appears possible definitely to solve the problem of צפוני (2 20); evidently this word should be a N. Arabian ethnic—viz., Sephonite (see § 41). The reference is to the Jerahmeelites, whom Ezekiel has already indicated ('Gog-Magog'; see § 27) as the eschatological foe of Yahwè's people. We now see how necessary it is to view the locusts in Joel 1 2, not as mere locusts, but as harbingers of the Day of Yahwè.[4] Indeed, the presence of the ethnic 'Sephonite' in 2 20 (pointing forward to chap. 3 [4]) is already presumptive evidence against a dual origin of the book. The reconsideration of the problems of both parts of Zechariah must be reserved (see ZECHARIAH [BOOK]).

A still more interesting specimen of editorial manipulation is furnished by the Book of Jonah (author unknown).

Great light has been thrown by a succession of critics on the story in its present form; but criticism cannot stop short here. We have seen (§ 7) that the territory recovered by Jeroboam II. for Israel was really the Negeb, and that the foes from whom it was taken were the Jerahmeelites (אֲרָמִים); also that the prophet Jonah is described, according to an extremely probable emendation of 2 K. 14 25, as a Maacathite[5] (see MAACAH). We have also seen (§ 39) that 'Nineveh' (נינוה) in Nah. 2 8 3 7 has been partly corrupted, partly altered, from 'Jerahmeel' (ירחמאל), and that 'the great city' ([ה]עיר [ה]גדלה) in Gen. 10 12 has sprung out of the same place-name; 'god' (אלהים) and 'king' (מלך) are also familiar distortions of 'Jerahmeel' (ירחמאל). It now becomes highly probable that the mission of Jonah was, not to Nineveh, but to the capital of the Jerahmeelites, and that the story about the 'great city,' the 'city great unto Elohim, a journey . . .,' has developed out of the simple phrase 'the city of Jerahmeel.' The journey of the prophet was therefore not more difficult than that of Elijah or Elisha (both men of the Negeb) to Cusham (1 K. 19 15 2 K. 8 7); and the king of Jerahmeel (not of Nineveh—an unparalleled expression) might not unnaturally listen to his preaching, as Hazael, Elisha's nominee for the crown of Aram or Jerahmeel, listened to Elisha (2 K. 8 8-13, see § 7). The story of Jonah in its original form may, therefore, most naturally be viewed as a Midrash on 2 K. 14 25. Jonah prophesied to Jehoahaz (?) the future reconquest of the Negeb (so 2 K. states); but he also, at the bidding of a merciful God, warned Jerahmeel of its danger, so that by a timely repentance the capital of Jerahmeel escaped destruction. In both its forms the story is presumably post-exilic.

The same editorial tendency to alter the geographical setting meets us over and over again in the prophetic writings; Habakkuk, Haggai, and Malachi are the only ones which seem to have escaped its operation. Of the results in some of these books we have spoken already; and though vastly more remains to be said, all that we can do here is to throw some fresh light on parts of Jeremiah, the extremely interesting phenomena of which book are just now attracting special attention. The parts referred to are the work of post-exilic writers, mostly supplementers.

45. Supplementary parts of Jeremiah.

It has puzzled critics to account for the fact that the place of Jer. 46-51 (the prophecies against foreign nations) in 𝔊 is between 25 13 and 25 15; we should have expected these chapters to have followed, not preceded, the list of nations in *vv.* 15-26. Many other small and great problems have also taxed their ingenuity, among which it is enough to mention the historical difficulty of the unconfirmed reference (cp JEREMIAH [BOOK], § 14) to a battle between Nebuchadrezzar and Pharaoh-necoh at Carchemish (46 2), and the difficulty of finding a historical background for the oracle (so strangely placed in a collection of prophecies ascribed to Jeremiah) against Elam (49 34-39). We are well within the mark, however, in saying that there have been corruption and editorial modification on a large scale, both in the list of nations in 25 15-26 and in chaps. 46-51. As to the list, it is enough to refer to SHESHACH, and to point out that the peoples which are to drink the wine-cup of judgment are, besides Judah, the various N. Arabian populations. The manipulation needed was but slight, and we can with ease, after omitting dittographed names, restore the original form of the passage[1] (cp also 27 3 28 14, and see *Crit. Bib.*). We now see to what extent Jeremiah was, according to Jer. 1 10, 'set over the nations.' With regard to 46-51, some details are given under MIGDOL, NO-AMON, NOPH, TAHPANHES, LEB-KAMAI, MERATHAIM, PEKOD, SHESHACH. It must suffice here to add that דמשק (Damascus!) in 49 23 is necessarily a corruption of קדשם (Kidshām), or כושם (Cūshām), חמת (Hamath!) of Maacath, and ארפד, probably (cp REPHIDIM) of Jerahmeel; and that עילם (Elam!) in 49 34 *ff.*—a late addition, it would seem—is, doubtless, a corruption of ירחמאל (Jerahmeel[2]). How far insertions were made by the later editor to convert the original prophecies on Miṣrim and Jerahmeel into prophecies on Miṣraim and Babel (Babylon) cannot here be discussed. Several of the headings, at any rate (46 2 47 1 49 34), have received additions suggested by the editor's faulty view of the historical reference of the prophecies.[3] The final redaction of Jeremiah

[1] Probably an editor's transformation of Arābī, 'Arabian.'

[2] Till the right key had been applied, it was natural to emend יהושפט into משפט (JEHOSHAPHAT, VALLEY OF). See, however, SHAPHAT.

[3] For צר וצירון read מצור, and for פלשת read צָרְפַת.

[4] See Wellhausen and Nowack on the passage; and cp JOEL [BOOK], §§ 5, 7.

[5] By 'Gath-hepher' is probably meant some southern locality. 'Hepher' appears to have been a southern clan-name (see ELIPHELET, 2).

[1] This restoration (see SHESHACH), together with the fact that there seems to be a tendency (cp MOSES, § 7) to convert *Yeraḥme'ēlīm* into *'ărēlīm* ('uncircumcised'), enables us to restore the original text of Jer. 9 25 *f.*, which is simply an announcement of the judgment impending over the N. Arabian peoples, but was placed where it now stands, *after* the text had become corrupted, as an edifying admonition to the Jews not to rely on their circumcision. Cp, however, JEREMIAH [BOOK], § 16.

[2] So also, most probably, in Is. 11 11 (see PATHROS, SHINAR).

[3] The heading in 46 2 must originally have been simply עַל־חֵיל מֶלֶךְ לְמִצְרִים 'concerning Misrim.' To this was added מִצְרִים אֲשֶׁר הָיָה עַל־נְהַר אֶפְרָת בְּיְרַחְמְאֵל 'concerning the army of the king of Misrim, which was by the river Ephrath in Jerahmeel' (cp *v.* 6, where צָפוֹנָה means 'towards Zaphon').

must therefore have been late, for in the original form of the prophecies in question it was held that Jeremiah (like Nahum, Ezekiel, and the Jonah of the story) was a prophet for N. Arabia. The idea of ascribing this group of prophecies on N. Arabia to Jeremiah was probably suggested by the tradition that he accompanied a band of Jews which sought refuge (?) in Miṣrim—*i.e.*, in N. Arabia.[1]

At this point it is necessary to refer to what is stated elsewhere (ISAIAH [BOOK], § 3 *f.*) relative to the present position of the study of Isaiah, which may without alteration be extended to the case of Jeremiah. Jeremiah, not less than Isaiah, in its present form is a post-exilic work, and we can hardly expect to find that the whole of a long passage is rightly ascribed to Jeremiah. The insertions (we must not say, interpolations) both in Isaiah and in Jeremiah are of great interest for the study of Jewish religion. They range from very small additions, which may have seemed necessary to round off sections or paragraphs, to long compositions with a definite theological purpose. We confine ourselves here to the inserted passages in Jeremiah, which, according to Duhm, have a twofold origin, about 220 Massoretic verses belonging to the biography of Jeremiah by Baruch,[2] and about 850 verses to the writers who supplemented the works of Jeremiah and his disciple. The general object of these supplementers (and the same remark may be made of those who supplemented the first half of our Isaiah) was to produce an instructive and edifying book for popular use, not less comprehensive in range than authoritative in tone, and the supplementary portions were, for the period when they arose, the most important, because they suggested the interpretations and qualifications which the recognised religious leaders imposed on the fragmentary prophecies that formed the kernel of the book. The work in its present form is, therefore, on a much lower level than the Fourth Gospel, because the object of the supplementers is not so much to present Jeremiah's personality in an idealised form adapted to a later age, as to invest their own ideas of Israel's past, present, and future with the authority of the last of the great pre-exilic prophets. From a literary point of view, the merits of this group of writers are not great. Ezekiel is the model for the denunciations, the Second Isaiah for the consolations; Deuteronomic turns of expression are also not unfrequent. Assimilation and reproduction are, in fact, the notes of the prophetic or quasi-prophetic literature of the post-exilic period, which makes it often rather difficult to determine the date of its monuments.

How the work of the original prophet (say, Isaiah or Jeremiah) is to be separated from that of supplementers, it is not so easy to explain briefly to those who have not followed the processes of recent criticism. Nor shall we here attempt this task, which belongs rather to those most useful writers who are now in course of revolutionising our text-books of theological literature. It may be remarked, however, that it is not wise to depend too much on the argument from the use of particular words or phrases, partly because a thorough textual criticism often throws much doubt on the traditional text, and partly because later writers, having before them the object of supplementing the elder prophets, often avoid, so far as they can, words or forms which would be distinct indications of a late age, or even try to reproduce the phraseological colouring of their models. The argument from ideas and social background, and especially, when we can be quite sure of the text, historical allusions, are of much more value. To these we shall soon be able to add the argument from metre (cp POETICAL LITERATURE, § 8). Both Isaiah and Jeremiah have certain predilections as regards metre which ought to assist us greatly in determining the extent of their literary records. It would be premature, however, to attempt as yet a summary of results on this head. For this as well as for other departments of prophetic study, it is urgently necessary that textual criticism should be practised on a larger scale, and to some extent by means of other methods than heretofore. Much that has been done will doubtless remain, and old methods will not be discarded; but virtually new methods will have to be applied on the basis of a large acquaintance with the phenomena of the MT and 𝔊, if progress is to be made in the knowledge of the prophetic writings.

46. How to detect the work of supplementers.

Here, therefore, the present sketch of the prophets, prophecy, and prophetic literature must be brought to a close. There are many points on which much greater fulness would have been easy, if we could only have assumed the correctness of the traditional text, or if we could have devoted space to the text-critical basis requisite for a fuller treatment of the points referred to. We have been obliged to select such points as appeared of most importance, in view of what has been said elsewhere on subjects connected with prophecy; and these we have endeavoured to treat in the only way which seems, in the present position of our study, to be altogether justifiable, namely, in the light of the most thorough textual criticism accessible to us. But we are far from undervaluing the able work done by other methods, without which the more complete view of prophetic problems at which, with mingled hopes and fears, we are aiming would be impossible. For writers of all schools, for Delitzsch and König, not less than for Ewald, Wellhausen, and Duhm, every student of prophecy has the warmest regard; and what English-speaking or English-reading scholar will hesitate to join to these the name of the much-lamented A. B. Davidson?

47. Literature.

In the ancient and mediæval church and in the dogmatic period of Protestantism, there was little or no attempt at historical study of prophecy, and the prophetical books were found instructive only through the application of allegorical or typical exegesis. For details the reader may refer to Diestel, *Gesch. d. AT* (Jena, 1869), and, for the final form of orthodox Protestant views, to Witsius, *De Prophetis et Prophetia*. The growing sense of the insufficiency of this treatment towards the close of the period of dogmatism showed itself in various ways. On the one hand we have the revival of apocalyptic exegesis (by Cocceius and his school), which has continued to influence certain circles down to the present day, and has led to the most varied attempts to find in prophecy a history, written before the event, of all the chief vicissitudes of the Christian church down to the end of the world. On the other hand, Lowth's *Lectures on Hebrew Poetry*, and the same author's *Comm. on Isaiah* (1778), show the beginnings of a tendency to look mainly at the æsthetic aspects of the prophetical books, and to view the prophets as enlightened religious poets. This tendency culminates in Eichhorn, *Die Heb. Propheten* (1816). Neither of these methods could do much for the historical understanding of the phenomena of prophecy as a whole, and the more liberal students of the OT were long blinded by the moralising unhistorical rationalism which succeeded the old orthodoxy. The first requisite of real progress, after dogmatic prejudices had been broken through, was to get a living conception of the history in which the prophets moved; and this again called for a revision of all traditional notions as to the age of the various parts of Hebrew literature—criticism of the sources of the history, among which the prophetical books themselves take the first place. In recent times, therefore, advance in the understanding of the prophets has moved on *pari passu* with the higher criticism, especially the criticism of the Pentateuch, and with the general study of Hebrew history; and most works on the subject prior to Ewald must be regarded as quite antiquated except for the light they cast on detailed points of exegesis. On the prophets and their works in general [stimulus at any rate may even now be got from] Ewald's *Propheten des Alten Bundes* (1840-41,(2) 1867-68, ET 1876-77). The subject is treated in all works on OT introduction (among which Kuenen's *Onderzoek*, vol. ii., claims the first place), and on OT theology (see especially Vatke, *Rel. des AT* 1835). On the theology of the prophets there is a separate work by Duhm, *Die Theologie der Propheten*, 1875 [see also Duhm, *Das Geheimniss in der Religion*, 1896, and his works on Isaiah and Jeremiah]. Kuenen's *De Profeten en de Profetie onder Israel*, 2 vols., 1875 (ET, 1877 *Prophets and Prophecy in Israel*), is in form mainly a criticism of the traditional view of prophecy, and should therefore be compared with his *Onderzoek* and *Godsdienst van Israel*. A sketch of Hebrew prophecy in connection with the history down to the close of the eighth century is given by W. R. Smith, *The*

PROSELYTE. It has appeared elsewhere (see STRANGER AND SOJOURNER, where the various Hebrew and Greek terms will be found) that *gēr* in the Priestly code approximates to its Judaistic use as proselyte (cp also 2 Ch. 30 25). Indeed the *yir'ē yahwè* (יִרְאֵי יהוה, 𝔊 οἱ φοβούμενοι τὸν κύριον), who appear in Ps. 115 9-11 118 2-4 135 19 *f.* as a third class of worshippers of Yahwè, distinct from the house of Israel and the house of Aaron, are probably proselytes—in Acts 13 16, 'men of Israel, and ye that fear God' (Ἄνδρες Ἰσραηλεῖται καὶ οἱ φοβούμενοι τὸν θεόν); the latter class are clearly such, and so also the 'fearers' [of the Lord] (σεβόμενοι [τὸν κύριον]) in the Song of the Three Holy Children, Dan. 3 33 90. With the exception, however, of these late, casual, and vague references, proselytes, in the full religious sense of NT times, do not appear in the OT, and the EV of the OT is entirely justified in always abstaining from the use of 'proselyte' as a translation for *gēr*. The way in which the ancient Israelite *gērīm* and the OT teaching concerning them developed in the direction of the Jewish proselytes and Judaistic ideas about them, may be summarised as follows:—

1. Non-Israelite worshippers of Yahwè in the OT.

Proselyte (προσήλυτος) is the term most frequently adopted by the Septuagint, especially in legal passages, to represent the Hebrew *gēr*. The *gēr*, or more fully *gēr wᵉtōšāb*, is not any 'stranger, but a stranger dwelling in a Hebrew community and enjoying a certain measure of protection. In old time at least the position of such a stranger was no doubt very insecure, for he had no strong kinsmen to take his part, and so, like the widow and the orphan, with whom many passages of the OT associate him, he was liable to oppression. In the law as well as by the prophets he is commended to the humane regard of his neighbours; but it would have been quite foreign to antique ideas to grant him equal rights (see Lev. 25 45 Deut. 23 20). Like the Arabic *jār*, therefore (whose name is at bottom the same), he must have generally sought to attach himself as a client to some individual or community able to protect him, and so we must understand the metaphor in passages like Ps. 15 1 39 12.

[1] Quotations from Prof. W. R. Smith's article 'Prophecy' in *EB*(9), vol. 18, are expressly given as such.

In the old Hebrew kingdom the word *gēr* had a civil not a religious significance, and it would almost seem that a poor Israelite without inheritance might sink to the position of *gēr*, which indeed is scarcely distinguishable from that of the Levite in Judg. 17 8, who went forth to sojourn (*gūr*) where he might find a place. The 'exile' and the 'restoration' made a change in this as in all other aspects of Hebrew society. On the one hand Ezek. 47 22 and Is. 14 1 contemplate that the restored nation shall be recruited by strangers who are received on equal terms; but, since the Jews returned not as an independent nation but as a distinct religious community, this implies especially that the sons of the stranger, by joining Israel, observing the Sabbath, and holding fast to Yahwè's covenant, may gain admission to all the privileges of the temple and its worship. So it is put in Is. 56 6 *f.*, in marked contrast to the restrictions laid down in Deut. 23 3 7 *f.* That the views of the prophets had practical issue cannot be doubted; even the foreign[1] NĔTHĪNĪM (*q.v.*) in the second temple were rapidly transformed not merely into good Israelites but into Levites. The condition of admission to the full privileges of an Israelite, in particular to the passover, is, according to the Priestly Code (Ex. 12 48 Nu. 9 14), circumcision.

The free admission of foreigners to the Jewish church is a mark of the universalistic tendency which, in spite of all the narrownesses of Judaism under the law, accompanied the break-up of the old national system. On the other hand, it presents a different line of transition from the purely civil to the religious meaning of *gēr*. It demands that certain rules shall be enforced not only on Israelites proper but also on strangers sojourning in their land. They are not to eat blood (17 10), commit incest (18 26), sacrifice to Moloch (20 2), or blaspheme Yahwè (24 16); and for murder and other crimes they are to be answerable to the Hebrew authorities according to Hebrew law (24 22).

2. Terms in NT, etc.

The term προσήλυτοι, so frequent in 𝔊 in the sense already explained, occurs only four times in the NT. Proselytes are present at Pentecost (Acts 2 10); one of the 'deacons' was a proselyte (6 5); Mt. 23 15 refers to the zeal of the Pharisees in making them; and in Acts 13 43 (Antioch) we have τῶν σεβομένων προσηλύτων—perhaps a conflate reading But the repeatedly recurring φοβούμενοι τὸν θεόν (Acts 10, Cornelius; 13 16 26, speech at Antioch in Pisidia) and σεβόμενοι τὸν θεόν (13 50, women at Antioch; 16 14, Lydia; 17 4, Thessalonica; 17 17, Athens; 18 7, Justus) are probably synonymous with προσήλυτοι (see below, § 5), as are ἔπηλυς, *de Execr.* § 6, etc., and ἐπηλύτης, *de Monarch.* § 7, etc., with Philo.

3. Methods and causes of proselytising.

Conversions to Judaism were not always spontaneous and disinterested. The Talmud speaks of 'lion' (cp 2 K. 17 25) and 'Esther' (cp Esth. 8 17) proselytes, who became such through fear or for the sake of profit, and of other classes of interested converts (*Hull.* 3*b*, *Yeb.* 24*b* ap. Jastrow). In Alexandria, for instance, the Jews were included among the privileged classes, and men would be attracted to Judaism by the prospect of an advantageous political status. Moreover, the propaganda of the Maccabæan princes was somewhat Mohammedan in its character. The zeal of Simon for the law (1 Macc. 13 48 14 14 35) must have induced many Gentiles to profess Judaism. John Hyrcanus (Jos. *Ant.* xiii. 9 1) compelled the Idumæans, Aristobulus (xiii. 11 3) the Ituræans, and Alexander Jannæus (xiii. 15 4) many cities, etc., especially in Eastern Palestine, to accept Judaism. The inhabitants of Pella refused, and their city was destroyed. When kings like Izates (*Ant.* 20 2) and great nobles became proselytes, many of their subjects and dependents would naturally follow suit.

Many political and social circumstances aided prosely-

[1] [The theory of the foreign origin of the Nethinim, however, may be called in question. In PSALMS (BOOK), § 27, it is maintained that 'Nethinim' is a distortion of Ethanim—*i.e.*, the b'ne Ethan, or Ethanites, corresponding to the bn'e Asaph or Asaphites.]

tising, just as, later, they promoted the spread of Christianity. The Jews were dispersed throughout all the Mediterranean lands, and involved in many commercial dealings with Gentile neighbours. Thus there were countless opportunities for the missionary spirit referred to in Mt. 23 15, and, on the other hand, the Gentile inquirer could always learn what Judaism had to teach him. The Septuagint was an instrument of the enthusiasm of the one, and an answer to the questions of the other. The alliances and wars of the Maccabees and the Herods with Gentile states provided occasions of proselytising. The Hellenising and Romanising proclivities of the Jewish parties and schools represented by the Herods, Philo, and Josephus, rendered them anxious to set Judaism before their foreign patrons in the most favourable light.

Moreover, the prevalent scepticism as to the ancient national religions left a void which many were anxious to fill by faith in some new religion, and Judaism met this craving. Doubtless some conversions were the result of superstition—we read of proselytes converted by the advice of a dreamer or interpreter of dreams,—but others were due to the response of a religious nature to religious teaching. Probably, to some extent the work of Paul and other apostles illustrates the Jewish method of proselytising. Gentiles, too, might often attend a synagogue from curiosity, or as inquirers, and thus become converted. Perhaps, however, the propaganda was mainly due to teaching addressed to families or individuals, as when the Jewish merchant Ananias converted the mother of Izates. Proselytes would naturally attempt to convert their relations and friends.

The treatment of the subject in the Priestly Code is academical, and is rather concerned with the purity of the land and the temple, than with the conversion of Gentiles to Judaism. The other post-exilic literature, within and without the canon, is almost entirely silent about proselytes. This fact, coupled with the condition of the Jews as a subject community, suggests that proselytes were comparatively rare during the Persian period. The world-wide dispersion of the Jews during the Greek period was evidently followed by much proselytising, and we know that Jewish practices were very widely imitated. Josephus (*c. Ap.* 2 39) tells us, 'There is not a single town, Greek, Barbarian, or any other, nor a single nation, to which the observance of the Sabbath as it is found among ourselves has not penetrated; whilst fasting and the burning of lights and many of our laws as to meats are also observed.' This statement is substantially confirmed by many other references to Judaising practices. Such statements do not imply that those who imitated Jewish habits became proselytes; but, doubtless, partial imitation was often a stepping-stone to formal conversion.

4. Numbers of proselytes.

The proselytising zeal of the Jews is spoken of in Mt. 23 15, and by many Greek and Latin writers. Up to the time of Hadrian it was facilitated by the favour generally extended to the Jews by the Roman emperors; and not only on Semitic soil, as at Damascus, where, Josephus (*BJ* ii. 20 2) tells us, most of the women were proselytes, but also throughout the Roman world, many converts were made, especially among women. The most noted conversion was that of the royal house of Adiabene (Jos. *Ant.* 20 2), of which the splendid tomb of Queen Helena, a little way outside of Jerusalem, still remains a monument.

The preponderance of women was due to the deterring effect upon men of the necessity of being circumcised.

The first large bodies of proselytes of whom we read are the forced converts of the Maccabæan princes. Then the clause 'Jews and proselytes' in Acts 2 10 seems to apply to the whole of *v.* 9 *f.*, and to imply that proselytes would usually be found where there was a Jewish community. In NT proselytes are referred to at Jerusalem, Cæsarea, Antioch in Syria, Antioch in Pisidia, Philippi, Thessalonica, Athens, Corinth (see § 2). Josephus (*Ap.* 2 10) tells us: 'Many Greeks have been converted to our laws; and some have remained true; but there are some who have fallen away from want of steadfastness.'

The proselytes must everywhere, as at Corinth (Acts 18 7), have facilitated the access of Christian missionaries to the Gentiles. Christianity had nearly all the attractions which Judaism possessed, and added others of its own. Moreover, the Hellenising and other liberal sections of the Jewish communities seem to have been for the most part absorbed in the Christian Church, leaving the remnant narrower and more exclusive than it was before. Hence the zeal for proselytising declined, and proselytes were a less important feature of later Judaism.

5. Classes, obligations, and status of proselytes.

Till recently, it was usually said that there were two classes of proselytes: (*a*) (גֵּרֵי הַצֶּדֶק) *gērē haṣ-ṣédeḳ*, proselytes of righteousness, who were circumcised, and observed the law generally; and (*b*) (גֵּרֵי הַשַּׁעַר) *gērē haš-šá'ar*, proselytes of the gate, who became worshippers of the one God, and observed the seven so-called Noachic precepts, against idolatry, profanity, incest, murder, dishonesty, eating blood or things strangled, and allowing a murderer to live. The reality of this classification, however, was challenged and disproved in the eighteenth century—*e.g.*, by Lardner (see 'Proselytes' in Kitto, *DB*). Schürer (*GJV*(2) 2 568 n., (3) 3 127 n., ET ii. 2 317) says: 'Throughout the whole of the literature with which I am acquainted I have not been able to discover more than one solitary instance of it [*i.e.*, the expression גר שער], namely R. Bechai (belonging to the thirteenth century) in his *Kad ha-Ḳemach* as quoted in Buxtorf's *Lex.* col. 410.' Proselytes of the gate may therefore be dismissed from the biblical aspect of the subject.

The Mishna distinguishes between *gēr* (Gĕmārā גֵּר צֶדֶק), a proselyte, and *gēr tōšāb*, a resident alien, the OT *gēr*. The σεβόμενοι of the NT have been identified not only with the mythical proselytes of the gate, but also with the *gēr tōšāb*. But this latter identification is unhesitatingly rejected by Schürer and also by Bertholet, who (334) quotes from Maimonides a statement that no *gēr tōšāb* was received into Israel after the captivity of the Eastern tribes.

Schürer, however (*ut sup.*, ET, 311 *ff.*), distinguishes two classes of proselytes: (*a*) φοβούμενοι τὸν θεόν or σεβόμενοι τὸν θεόν, 'God-fearing Gentiles who adopted the Jewish (*i.e.*, the monotheistic and imageless) mode of worship, and attended the Jewish synagogues, but, in the observance of the ceremonial law, restricted themselves to certain leading points, and so were regarded as outside the fellowship of the Jewish communities'; and (*b*) προσήλυτοι, 'who, through circumcision and the observance of the law, became completely incorporated with the Jewish people.' Schürer cites the case of Izates of Adiabene.[1] A Jew named Ananias represented to him that he could worship God without being circumcised; but another Jew named Eleazar, who claimed to be specially orthodox (πάνυ περὶ τὰ πάτρια δοκῶν ἀκριβὴς εἶναι), insisted on Izates being circumcised, and the king obeyed him (Jos. *Ant.* 20 2). History, of course, shows that there were not only two, but many grades of sympathy with, imitation of, and conversion to Judaism; but Schürer's only example suggests that orthodox Jews only recognised one class of real proselytes, and that προσήλυτοι, φοβούμενοι τὸν θεόν, and σεβόμενοι τὸν θεόν are synonymous. Bertholet (328 *ff.*) comes to this conclusion, mainly on the ground that Philo and Josephus only recognise a single class of proselytes, that in Acts neither προσήλυτοι and φοβούμενοι nor προσήλυτοι and σεβόμενοι occur together to denote separate classes; and Paul, in his polemic against the Judaisers, always takes it for granted that circumcision is indispensable to converts to Judaism.

[1] On the story of Cornelius, 'one that feared God,' and yet was regarded as unclean by Jewish Christians, see CORNELIUS.

One condition, therefore, of becoming a proselyte, was that required by the Priestly Code, circumcision—to which the later Jewish usage adds lustration by immersion in water (*tĕbīlāh*, baptism) and the presentation of a sacrifice (*ḳorbān*).[1] The immersion, about which there has been a good deal of controversy, some maintaining that it came into use later than Christian baptism, was really a necessary act for one who had been previously unclean, and may be held to be involved in the general Pentateuchal law of ceremonial washings. The later technical name for a heathen who thus joined the theocracy was גר הצדק, 'proselyte of righteousness' (*Sanh.* 96*b*).

The duties and religious privileges of a proselyte were substantially the same as those of a Jew (Gal. 5 3; Schürer, 326, Bertholet, 335). As regards civil rights, proselytes in Gentile states, and even in the Roman province of Judæa, were not at the mercy of Jewish authorities. In this and in other respects the elaborate discussions of the Talmud are academical discussions of an obsolete jurisprudence, and have little connection with the actual status of proselytes in NT times. *Obiter dicta* which discriminate unfavourably between the Jew and the proselyte chiefly serve to illustrate the strong animus which a large section of post-Christian Jews displayed against proselytising and proselytes.

6. Literature. Schürer, *Jewish People*, ii. 2 291-327; Stapfer, *Palestine in the time of Christ*, ET, 130-132; Bertholet, *Die Stellung der Israeliten u. der Juden zu den Fremden*, 179-349; articles on גּוּר and גֵּר in Jastrow, *Dict. of Targ.* etc., and Levy, *NHWB.* W. R. S.—W. H. B.

PROVERB. The words so rendered in EV are:

1. מָשָׁל, *māšāl.* The root-meaning of משל is simple—to be like, to compare[2]—but it bears a number of derived senses the exact relation of which to the root-meaning and to one another is more difficult to determine.

A. As a general term משל denotes (*a*) a proverb or popular saying—without definite literary form, and with no pretension to be philosophical, but a pithy characterisation of an event or summing-up of a natural law—*e.g.*, 1 S. 10 12 Ezek. 18 2; cp 1 S. 24 14 [13] Ezek. 12 22 (EV 'proverb,' 𝔊 παραβολή).

(*β*) That against which such a saying is directed—tropically, a proverb, by-word.

E.g., Dt. 28 37 1 K. 9 7 2 Ch. 7 20 Jer. 24 9 (in each case ‖ שנינה, 'by-word'), Ps. 44 15 [14] (‖ מנוד ראש, 'a shaking of the head'), 69 13 [12] Ezek. 14 8 (‖ אות, 'sign')—EV 'proverb,' 𝔊 παραβολή, but 1 K. 9 7 Ezek. 14 8 ἀφανισμός.

B. As a technical term in literature משל denotes; (*α*) A sententious maxim, the unit in the aggregation of which the not very philosophical, always empirical, Hebrew philosophy chiefly consisted. Strictly speaking, משל has reference to the form in which such a sentence was expressed, that of a distich *a b*—the juxtaposition of *a* and *b* conveying by comparison or contrast the moral lesson required.

Thus the 376 couplets in Pr. 10 1-22 16 are called (10 1) משלי שלמה (EV 'proverbs,' 𝔊 om.); cp 1 1 (EV 'proverbs,' 𝔊 παροιμίαι), 1 6 (EV 'proverb,' 𝔊 παραβολή, parallels being מליצה, 'figure,' 'enigma'? cp Ecclus. 47 17 and Hab. 2 6 דברי חכמים, 'words of the wise,' cp Pr. 22 17 and חידות, 'dark sayings') 25 1 (EV 'proverbs,' 𝔊 αἱ παιδεῖαι [A^{ℵc.a.} παροιμίαι] αἱ ἀδιάκριτοι) 26 7-9 (EV 'parable') Job 13 12 (‖ זִכְּרוֹן, 'memorable saying') Eccles. 12 9 (EV 'proverbs,' 𝔊 παραβολαί, parallels דברי אמת, כתוב ישר, דברי חפץ, דברי אמת).

(*β*) The distich overflowing into a tristich, Prov. 27 10 28 10, a tetrastich, 26 18 *f.*, even a decastich, 27 23-27—משל acquires the sense of a sententious or didactic poem.

Such as we have, *e.g.*, in Prov. 31 10-31—see Job 27 1 29 1 (EV 'parable,' 𝔊 προοίμιον), Ps. 49 5 (‖ חידה), 78 2 (EV 'parable,' 𝔊 παραβολή). Ps. 78 is, it is true, a historical poem; but it is history with a purpose.

The משלים of 1 K. 5 12 [4 32] (‖ שירות, 'songs') may go under either (*α*) or (*β*).

(*γ*) משל denotes finally any poetical composition.

(*a*) A prophecy, as in Nu. 23 7 18 24 3 15 20 21 23 (all of Balaam), and Is. 14 4, cp Mic. 2 4 (‖ נהי; see LAMENTATION, § 1), Hab. 2 6 (‖ מליצה חידות, see above, B*α*), EV 'parable,' 𝔊 παραβολή, but Is. 14 4 θρῆνος.

(*b*) A parable, Ezek. 17 2 (‖ חידה), 21 5 [20 49] 24 3, EV 'parable,' 𝔊 παραβολή.

(*c*) A historical lay. The *mōšlīm*[1] of Nu. 21 27 recall the Homeric rhapsodists, though they seem to have recited satirical songs on living persons as well, cp A (*β*) and see POETICAL LITERATURE, § 4 (3).

2. חִידָה, *ḥīdāh* (Ar. *ḥāda* to decline, cp מליצה from Ar. *lāṣa*).

In Hab. 2 6 EV renders מליצה חידות (𝔊 πρόβλημα εἰς διήγησιν) a taunting proverb; but the asyndeton in the Hebrew, if not without parallels, is awkward. חידות may be dispensed with as a gloss on the rarer word מליצה. See RIDDLE.

3. παροιμία. In classical Greek παροιμία means 'proverb,' 'by-word': so Æsch. *Ag.* 264; Ar. *Thesm.* 528; κατὰ τὴν παροιμίαν, 'as the saying goes,' Plat. *Symp.* 222 B.

In NT Greek it means (1) a proverb, 2 Pet. 2 22; (2) a figurative discourse, Jn. 16 25 29; (3) a parable, Jn. 10 6. Jn. never uses the word παραβολή, and it might have been better had RV in Jn. 10 6 taken the marginal rendering 'proverb' into the text, just as *vice versa* in Lk. 4 23 RV has 'parable' for AV 'proverb' παραβολή. παροιμία is occasionally used by 𝔊 to translate מָשָׁל, Pr. 1 1 25 1 (A^{ℵc.a.}) (by Sym., Ps. 78 2 Pr. 25 1 Ezek. 12 22, Aq. Eccles. 12 9 Ezek. 18 2), found also Ecclus. 6 35 8 8 18 29 39 3 47 17.

4. παραβολή. 'Proverb' is the AV rendering of παραβολή Lk. 4 23; but RV renders 'parable.' In classical Gk. παραβολή denotes (1) a laying alongside (as of ships in a naval battle), Polyb. 15 2 13, Diod. 14 60; (2) juxtaposition, comparison, *Phileb.* 33 B, Polyb. i. 2 2; (3) illustration, analogy, Isoc. 230 A, Arist. *Pol.* 2 5 24, ἐκ τῶν θηρίων ποιεῖσθαι τὴν π. 'to take our illustration from the animal world.'

In NT Greek it means (1) a figure, illustration—Mk. 4 30 ἐν τίνι αὐτὴν παραβολῇ θῶμεν, perhaps also Heb. 11 19 (but see comm. *ad loc.*); (2) figure, image, type, ἥτις παραβολὴ εἰς τὸν καιρὸν τὸν ἐνεστηκότα, Heb. 9 9; (3) parable, Mt. 13 24 31 37, etc.; Lk. 14 7-11 12-14, are scarcely parables in the strict sense of the word. παραβολή is by far the commonest rendering of משל in 𝔊 (*e.g.*, Ps. 78 2, quoted Mt. 13 35). Found also Job 3 4 Wisd. 5 3, and in Ecclus. twelve times. A. C. P.

PROVERBS (BOOK).

1. Title. The Massoretic title is 'Proverbs of Solomon' (משלי שלמה, *Mišlē Šĕlōmōh*), in the Talmud and later Jewish works usually abridged to *Mišlē*. In the Talmud the book is also cited simply by the name of Solomon (*Dérek Éreṣ*, ch. 6), or as one of the Writings or Hagiographa (*Ab. Nathan*, ch. 2), and often without name.

𝔊 has a longer form: *Proverbs* (παροιμίαι) *of Solomon son of David who reigned in Israel*, and with this agree Syr. and Vg., except that they read *king of Israel*. The superscription in our Gk. MSS is simply παροιμίαι (apparently = Rabbinical *Mišlē*); the subscription is π. [B], π. Σαλ. [ℵ], π. Σολ. [A], π. Σολ. παρὰ ἑβδομήκοντα [C]. In the Vg. title the book is called *Parabolæ Solomonis*, in the superscription *Liber Proverbiorum quem Heb. misle vocant*, in the subscription *Liber Proverbiorum.*

These readings show that in the fourth century of our era the common designation of the book was *Proverbs*, and the title in the Heb. text *Proverbs of Solomon;*

---

1 Mishna, *Pĕsāch.* 8 8, *Kĕrīthōth* 2 1.

2 Attempts (see Ges. *Thes.*, *s.v.*; Fleischer in Del. *Pr.* 43 *f.*: Halévy, *Revue des Études Juives*, 1885, p. 302) to derive the two notions of comparing and ruling from a single root are futile—as witness their very variety. We must assume two distinct roots (1) 'to be like,' Heb. מָשָׁל, Ass. *mašalu*, Syr. *mᵉtal*, Ar. *mathala*, and (2) 'to bear rule,' connected possibly with Ass. *mašâlu*, 'to shine' (see Del. *Heb. Lang.* 55).

1 *Mōšlīm* might almost be rendered 'bards'; the *mōšēl* may be the poet, the 'Dichter,' the setter in order of words or ideas, perhaps he who places side by side the two halves of his verse, cp Germ. 'dichten,' A.S. 'dihtan,' to arrange, set in order. Old English verse has the same well-defined break in the middle of the line that we find in Hebrew. And משל in Nu. 23 7 may mean simply 'poem'—'he uttered his poem,' a stereotyped phrase introducing a fresh rhapsody, like the τὸν δ'ἀπαμειβόμενος προσέφη, etc., of Homer. The author of Job 29 borrowed it (29 1), and the redactor borrowed it from him (27 1); see Budde, *ad loc.*

the expression in the Vss., 'son of David, king of Israel,' may be a scribal insertion (perhaps suggested by the MT title of *Kōhéleth*). It is probable, though not certain, that the ascription to Solomon belonged to the original title (cp the titles of *Kōhéleth* and *Wisd. Sol.*): it may have been given to the earliest collection, 10 1-22 16, and then have been retained when additions were made, or the earliest title may have been 'Proverbs,' and the reference to Solomon (based on 1 K. 5 12 [4 32]) may have been added by Jewish editors; in the discussions of the book at the Synod of Jamnia the name of Solomon does not occur, but the authorship may have been taken for granted.

In early Christian writings Prov. is frequently cited with the formula: 'Solomon says.' In a number of cases also it is designated by the term 'wisdom' (σοφία) or by some expression in which the word 'wisdom' occurs; but it is doubtful whether such appellations are titles proper or merely descriptive phrases. It appears to be called simply *Sophia* by Melito (in Eus. *HE* iv. 26 13 *ff.*) and in *Const. Ap.* 1 10; but, even if these readings are genuine, they hardly prove a general Christian usage. The expression ἡ πανάρετος σοφία (Clem. Rom. *Cor.* 1 57, Eus. *HE* 4 22, etc.), which is used also of Ecclus. and Wisd. Sol., appears to refer not to Proverbs as a book, but to Wisdom as the 'all-virtuous' speaker and teacher.[1] If we may credit Hegesippus, indeed (in Eus. *HE* 4 22), the designation 'Wisdom' is of Jewish origin (from unwritten tradition); but of this there is no proof—the expression 'books of wisdom' which is used in a Rabbinical treatise (*Tōsephōth Bābā Bathrā*, 14 *b*) of Proverbs and Ecclesiastes appears merely to characterise these books by the nature of their material. In any case the infrequency of the appellation makes it probable that it is a description, not a title proper. The prominence of the idea of wisdom in Proverbs accounts naturally for such a designation of the book.[2]

2. Canonicity. At the Synod of Jamnia (about 100 A.D.; see CANON, § 55) the recognition of the book as one of the Kĕtūbīm (Hagiographa) was opposed on the grounds that it contained contradictions (26 4 *f.*) and that some of its descriptions were indecent (7 7-20). The first objection was set aside (*Shab.* 30 *b*) by referring 26 4 ('answer not a fool according to his folly') to worldly things, and 26 5 ('answer a fool, etc.') to things religious; this exegesis is incorrect, but the explanation was accepted. The apparently unseemly passages were interpreted allegorically; see *Ābōth Nāthān*, ch. 1 (in the common recension), and cp ch. 2 of the same work in which amorous descriptions in Canticles are explained as references to Israel. After the discussions at Jamnia the canonical character of the book was not questioned by the Jews, and it has not since been called in question. It is quoted often in NT and Talmud, and by Christian and Jewish writers generally. The citations in NT are almost all of them after the Gk. version, and are usually free; the book was evidently much read, and no attempt was made by NT writers to give its precise words.[3] As to its position, the better attested MT arrangement places it next after Pss. and Job.

So in *Bab. Bath.* 14 *b*, Tg., a number of Spanish Hebrew MSS and in Baer-Delitzsch; but in some Hebrew MSS (mostly German) it stands next to Psalms (so in Hahn); the MT order was probably determined by the length of the books. The MSS of 𝔊 early adopted an arrangement according to contents, putting the poetical books next to the historical (abandoning the division into the three canons), and Proverbs next after Psalms (Melito, in Eus. *HE*, 4 26; 𝔊B, etc.),[4] and this order is followed in Pesh. Syr.; Jerome's order is Job, Psalms, Proverbs. Among succeeding writers there is considerable diversity; modern versions adopt the arrangement of Jerome. See CANON.

3. Heb. text. In respect of accuracy the Massoretic text of *Proverbs* occupies a midway position among the OT books. It has not been subjected to the sweeping revision which we find in certain of the

[1] Cp Frankenberg, *Die Sprüche, Einl.*, § 1.

[2] For a late occurrence of the name ספר החכמה (in a synagogal prayer of the 12th cent.) see H. Deutsch, *Die Sprüche Sal. nach d. Auffassung im Talm. u. Midr.*

[3] For details see works on biblical quotations. The bibliography up to 1884 is given in Toy, *Quotations*; since then have appeared Johnson, *Quotations*, 1896; Dittmar, *VT in Novo*, 1899; Huhn, *ATliche Citate*, 1900. On quotations from 𝔊 in NT and in early Christian writings see Swete, *Introd. to the OT in Greek*, and the bibliography there given.

[4] In 𝔊A the order is: Psalms, Job, Proverbs; see Swete *Introd.*

PROVERBS (BOOK)

prophetical writings, and, among the wisdom books, in *Kōhéleth*; but it abounds in minor inaccuracies. Many of its particular words have been deformed; lines of couplets have been misplaced; not a few passages defy translation or emendation; and some paragraphs (*e.g.*, four short sections in chap. 6) now stand out of their proper connection. On the other hand, there are few insertions or modifications in the interests of theological ideas. The most important instance of such editorial revision is found in the paragraph 3 5-10, which is a theological parallel to the ethical paragraph 3 1-4; and 11 7 and 14 32 are perhaps other instances.[1] The character of the thought seems to have protected the book from violent alterations. Dealing almost exclusively with ethical facts and principles, it rarely comes into conflict with later thought.

In the passage in chap. 7, which called forth discussion at Jamnia, there has been no attempt at alteration. It is doubtful whether we can recognise any deliberate attempt to introduce into the book a doctrine of ethical immortality (as, for example, in 11 7 14 32[2]). The position of Proverbs in the less sacred group of *Kĕthūbīm* appears to have worked in two ways: it relieved the book from theological revision, but gave occasion to many verbal errors from carelessness of scribes.

4. Ancient versions. The following Ancient Versions of Proverbs have come down to us: Greek (Sept., fragments of Aquila, Symmachus, Theodotion, and of several anonymous translations); Old Latin (fragments), and Jerome; Aramaic (Peshiṭta, Hexaplar Syr., Targum); Coptic; to which may be added: Ethiopic and Arabic.[3]

The Septuagint, the most ancient, interesting, and valuable of the versions of Proverbs, is given in the principal uncials (BℵAV, and fragments in C) and in a number of cursives (collated by Holmes and Parsons). Its text, however, is not in good condition; notwithstanding the work so far done on it, a critical edition (a necessary preliminary to its best use for the re-establishment of the Heb. text) is still lacking. Many of its readings are corrupt, it has many passages not found in the Heb., and its arrangement of the divisions of the book is peculiar. It is doubtless a purely Jewish production; there is no clear trace of Christian revision.[4] The manner of its origination may be suggested by the example of the younger Jesus, the translator of Ben-Sira. He rendered his grandfather's work into Greek, in response, he believed, to a popular demand in Alexandria; and so the Jews of the city doubtless desired to have Proverbs in Gk. form. Of the further history of the version we know little or nothing. It is doubtful whether there was one translator or many; there are, however, no such differences in style and accuracy in the different parts as clearly to suggest the presence of more than one hand. In general it appears to represent fairly a Hebrew text—presumably an Egyptian text of about 100 B.C. In certain cases this text differed from that on which our Massoretic text is based. Of the Greek additions the most seem to be translations from Hebrew; but some appear to have been composed originally in Greek.

The natural inference is that there was in circulation a considerable mass of aphoristic material, out of which our book of Proverbs (whether Heb. or Gk.) gives selections. This does not necessarily imply that there were different recensions of the Heb. book in Palestine or in Egypt (though this is possible, and even probable); but it helps to explain the difference in material between the Gk. and the Hebrew. It is also possible that the Greek translators or later Greek scribes simply inserted in the book new material.

It is not likely that Proverbs and Ben-Sira were the only parœmiac productions of the time; in these books, indeed, there are intimations of the existence of other works of the kind (Pr. 24 23 Ecclus. 39 1-11), and in the

[1] Cp Kautzsch, 'Proverbs,' in *SBOT*.

[2] In both of these passages the Hebrew text is uncertain; 𝔊's reading is probably to be adopted in the second, but not in the first.

[3] For details of editions of Versions see art. 'Bibelübersetzungen' in *PRE*(3).

[4] The patristic writers interpret it in a Christian sense, but do not change the text.

schools aphoristic sayings were doubtless cited and commented on. In this way there probably arose a tradition of parœmiac interpretation, which would be of various types, reflecting the various directions of Alexandrian Jewish thought. In the Gk. Proverbs we find allegorising interpretations (as in 2 16) but no definite evidence of rigorous legalism.[1] No doubt the hermeneutical tradition was less well established in the renderings of the Wisdom-books than in those of the Torah and the Prophets, and this fact may account in part for some of the incorrect translations in 𝔊's version of Proverbs;[2] but unsatisfactory renderings occur throughout 𝔊, and must be referred in part to other causes, such as defective Heb. MSS, ignorance of Heb., and corruption of the Gk. text.

It is evident, however, that there was great freedom in the treatment of the Heb. text by translators, and it is to such freedom or caprice that some critics refer 𝔊's arrangement of sub-sections in Pr. 22-31, which is as follows: 22 17-24 22 30 1-14 24 23-34 30 15-33 31 1-9 25-29 31 10-31. In this arrangement an order, not wholly unnatural, is observable: first come strophic passages, ascribed presumably to the 'sages,' then 'miscellaneous instructions [or, proverbs] of Solomon,' finally the description of the ideal housewife. The order may be due to the Gk. editor, or, as the subsections probably circulated in separate form and may have been arranged variously by Heb. scribes, he may have found it in a Heb. MS.[3]

For the criticism of the Gk. text we have the Coptic and Hexaplar Syriac versions, to which may be added the fragments of the Old Latin, the Ethiopic and Arabic translations, and a few verses (9 1-11) of a Christian Aramaic translation (in Land, *Anecdot. Syr.* 4).

The Sahidic Coptic MS ed. by Ciasca contains about half of Proverbs. It follows the Gk. closely, giving the passages which 𝔊 has in addition to our Heb. (and also some which are in neither Gk. nor Heb.). So far it has not been identified with any recension of 𝔊 (the Hesychian naturally suggests itself), nor shown to follow any particular MS; and the same remark appears to hold of the Bohairic material hitherto published.[4] The Hexaplar Syriac (ed. Ceriani) preserves (how precisely it is hardly possible to say) Origen's diacritical marks, and in the margin cites passages from other Gk. translations; it thus in many cases enables us to distinguish additions to 𝔊's text. As to the Ethiopic version, it is a question how far it is based on the septuagint; its age is still undetermined, and it has as yet contributed nothing to the identification of an Egyptian recension of the Greek version. The Arabic rendering of 𝔊 (in Walton's *Polygl.*, and ed. Lagarde) is not without value. The Old Latin fragments are too few to be of great service.[5]

The fragments of other Gk. verss. based on the Heb. (given in Field, *Hex.*) represent our MT, and rarely furnish critical aid, though they are sometimes lexicographically useful. Nearly the same thing is true of the Latin Vulgate; but in its case the question of text is more complicated; it represents in general our MT, but with occasional variations which suggest a different form from ours, and here and there it shows dependence on the Septuagint (reproducing, probably, the Old-Latin). Its interpretations are of interest as giving in part the Jewish tradition of the time; but it cannot be rated high as an aid in the exposition of Proverbs. The history of the Peshitta Syr. text is still more difficult; whilst based on MT, it has been considerably affected by 𝔊, and the details of its revision are obscure.

The Targum, in its present form, generally follows the Pesh. Syriac, yet sometimes gives MT against Syr.; apparently it has been revised after the Heb., though it is possible that it renders a Syr. text different from that which we have, and that it may be used for criticism of the Peshiṭta. Saadia (ed. Derenbourg) gives the Jewish interpretation of the tenth century; he is of little or no use for the text, but abounds in lexicographical and exegetical suggestions.[6]

(*a*) *Divisions.*—The main divisions of the Book, indicated in MT (and also in 𝔊), are as follows:—i. (chaps. 1-9). A series of discourses, descriptions of the nature and function of wisdom and warnings against robbery and unchastity (3 27-35 6 1-19 and 9 7-12 are misplaced; the two first belong in iii. or iv., the last belongs in ii.). ii. (10 1-22 16). A book of aphoristic couplets on the conduct of life. iii. (22 17-24 22 and 24 23-34). Two collections of quatrains, in which there is a wider range of subjects than in the preceding division. iv. (25-29). A collection of couplets. v. (30 *f.*). A miscellaneous collection, having the appearance of an appendix: chap. 30 contains a dictum on the limitations of human knowledge, one on the certainty of God's word, a prayer for preservation from the extremes of poverty and riches, and a group of tetrads consisting of observations on nature and life (*v.* 32 *f.* stand by themselves); chap. 31 consists of two longer passages, one a code of conduct for kings, the other a description of a model housewife.[1]

5. Form.

(*b*) *Rhythm.*—The material of Proverbs, as far as regards its contents, though not poetical, is gnomic, and its literary form is that which appears to have been common in both poetical and proverbial utterances among the Hebrews from an early time. The norm is a couplet, with parallelism of lines; quatrains are common, and there are, less commonly, longer strophes; triplets are rare. The line in Proverbs has usually three beats (a form which may be called ternary), sometimes two (binary), sometimes four (quaternary). The determination of the number of beats is matter of pronunciation and therefore to some extent arbitrary; but it may be said with probability that binary and quaternary lines are to be regarded with suspicion. In a few cases it is difficult to detect rhythm at all; but in such cases there is ground for supposing the trouble to be in the text.[2]

The rhythmical characteristics of the different parts of the book are as follows:—i. consists mostly of quatrains, with synonymous parallelism (3 27-35 9 8 are misplaced); in ii. (couplets) the form is antithetic in 10-15, comparison (with some antitheses) in 16 1-22 16; iii. (quatrains), except 24 16, is synonymous; in iv. (couplets) the form is comparison (or a single sentence) in 25-27, whilst the second half (28 29) is nearly equally divided between antithesis and comparison (or single sentence); v. (quatrains and longer strophes) is synonymous.

It appears that the distichal aphorisms are mostly antithetic, but are sometimes comparisons or single sentences, and that the longer discourses and the quatrains prefer the synonymous form. The rhythmical form is definite and, in general, well maintained, and may be appealed to for criticism of the text.

(*c*) *Composite Character.*—From the divisions indicated in the text and from the variations in the rhythmical form it may probably be inferred that the book is composite in origin.

(*d*) *The Māšāl.*—Proverbial sayings, brief formulations of experience and observation, appear to have been current among the Israelites, as they are among all other peoples. The examples in OT are few but sufficient to show the usage; see 1 S. 10 12 (=19 24), and apparently 2 S. 5 8 20 18 24 14 [13]; an allied form is the riddle (Judg. 14 14), and cp Lk. 4 23 Jn. 4 37 2 Pet. 2 22.[3] These simple sayings were sometimes in ordinary prose form, sometimes in the form of couplets, one line in some way parallel to the other. In the latter case the general name for them is *māšāl*, a term which is employed in OT to designate a great variety of

[1] Heidenheim (in his *Vierteljahrschrift*, 1865, 1866) is disposed to see many signs of the influence of Pharisaic ideas; but the evidence he adduces is not convincing.

[2] So Frankenberg, *Die Sprüche, Einl.*

[3] For a fragment containing Pr. 23 21-24 35 see *The Academy*, Oct. 1892, and Klostermann, *Analecta*.

[4] Cp H. Hyvernat, in *Rev. Bibl.* for 1896.

[5] See Kennedy, Art. 'Lat. Verss., The Old,' in Hastings, *BD* 3; he mentions Pr. 2 1-4 23 15 9-26 16 29-17 12 19 7-27 and some others.

[6] On the versions, see also TEXT AND VERSIONS.

[1] Chajes, in his *Proverbia-Studien*, maintains the view that the central part of the book (10 1-22 16) consists of scattered couplets which at one time (though not originally) were arranged, like Ps. 119, according to the letters of the alphabet, and he tries to restore this arrangement. In this attempt he is not successful (his scheme is highly improbable); but he suggests some good emendations. See also his note in *JQR*, July, 1900.

[2] Valuable remarks on metrical forms in Proverbs are to be found in Ed. Sievers' treatise on 'Hebräische Metrik' in *Abhandlungen der Königl. Säch. Gesellschaft der Wissenschaften*, 1901.

[3] The story in Nu. 21 22-35 may be based on an old fable or beast-story; cp Jud. 9 8-15 and 2 K. 14 9.

PROVERBS (BOOK)

compositions of distichal form, and in fact seems to signify a 'distichal composition';[1] for the various applications of the term see Ezek. 18 2 21 5 [20 49], 17 2 Dt. 28 37 Hab. 2 6 Mic. 2 4 Nu. 23 7 Ps. 78 2 Job 29 1. Though Proverbs now contains gnomic discourses, the title *mišlē* seems to have referred originally to a collection of aphorisms (10 1-22 16).

The etymology of *māšāl* is doubtful; but the probability seems to be that it signifies 'juxtaposition' or 'similarity,' with reference to the things or ideas with which it is concerned.[2] As synonyms of *māšāl* in Pr. 1 6 we have *ḥidāh* (חִידָה) and *mĕlîṣāh* (מְלִיצָה), terms which appear to signify originally 'deflected discourse,' that is, discourse in which there is allusion to something else than that which the words directly express (as, for example, in a riddle, Judg. 14 12 1 K. 10 1); later both terms were used generally for allegorical, visional, derisive, or didactic utterances (Ezek. 17 2 Nu. 12 8 Hab. 2 6 Ps. 49 5 [4] 78 2).

(*a*) Until recent times the greater part of the book (chaps. 1-29) has commonly been ascribed to Solomon.

6. Authorship. Such may be the meaning of the general title or superscription in 1 1, though this may refer to chaps. 1-9 only, especially as Solomon is named as author in the superscriptions in 10 1 (in MT, but not in 𝔊) and 25 1. It is quite possible that he may have composed or collected proverbs of some sort, as is stated in 1 K. 5 12 *f.* [4 32 *f.*]; but the indications in the Book of Proverbs itself (see below, § 7) make it impossible to suppose that he is its author. The tradition of authorship, embodied in the OT titles and in the Talmud, cannot be relied on. It has been conclusively proved that in the Prophets and the Psalms the titles are not authoritative in themselves, and that the lists of authors given in the Talmud rest on no good historical or critical foundation. The titles in Proverbs cannot be supposed to form an exception to the general rule. Some critics, however, while admitting the general doubtfulness of OT titles, make an exception in favour of Pr. 25 1: 'these also are proverbs of Solomon, which the men of Hezekiah, king of Judah, transcribed.' Whence, they ask, this particularity of statement, if it does not rest on good tradition? And it is added that Hezekiah's reign was a favourable time for such literary work. Granted that such work is conceivable for that time, we have only a possibility. There is no hint of it in the historical and prophetical books, and there is much against it. Not only was the period in question one of war and unrest, but it is highly probable, if not certain, that the task of collecting and editing writings did not begin till much later (not before the exile). As to the particularity of the title in 25 1, it is quite in the manner of the Jewish editors—witness the titles of many psalms: to be precise and full was a natural tendency, and the scribes had no historical science to guide them. In this case Hezekiah may have been selected because of his alleged prominence as a reformer (so Is. 38 ascribes a poem to him, and 2 Ch. 19 credits Jehoshaphat with the creation of a sacerdotal judiciary). We cannot, then, base the question of authorship of Proverbs on the titles in the book. As to the ascription of Proverbs and other writings to Solomon, this also was perfectly natural when his reputation for wisdom had once been established.[3] And, as it is now almost universally held

[1] It thus stands in contrast with *šīr*, which seems to designate poetry as something 'sung'; but cp Ass. *šira*, 'oracle' (perh. from √ = 'see').

[2] In the vol. on Proverbs (Heb. text) in *SBOT* (on Pr. 1 6) P. Haupt expresses the opinion that *māšāl* means originally 'equality or equal parts and halves (Ass. *mišlani*)' and then 'simply a line of poetry or verse, each stich consisting of two hemistichs,' that is, the reference is to the linear form and not to the form of expression. Not to speak of the difficulty of giving the meaning 'halves' to the sing. *māšāl*, it is to be observed that we do not find elsewhere, in Semitic, Gk., and Latin, a reference to linear form in terms for 'proverb': cp חִידָה, מְלִיצָה, *παροιμία*, *παραβολή*, *proverbium*, *adagium*; cp also שִׁיר and Ar. *ši'r*, which refer to expression and thought. Further, the sense 'stich' seems to presuppose writing; but the term mašal probably originated before the literary use of writing began.

[3] It need not be doubted that there was some ground for this reputation; but exactly what it was we do not know.

that he did not write Eccles. and Cant., it must be admitted, in spite of the tradition, that it is possible he did not write Proverbs.

(*b*) In 30 1 31 1 two other names of authors are given, Agur ben-Yakeh (Jakeh) and Lemuel (or Lemuel's mother). Cp ITHIEL, LEMUEL. Agur (if the word is a proper name) must be supposed to be an otherwise unknown sage, possibly Jewish, possibly non-Jewish.

By a change of text he may be understood to be called a 'Maššaite,' an inhabitant of the region Mašša, of which nothing is known (Gen. 25 14), or, a 'gnomic writer' (*mōšēl*). Nor is it clear how much of chap. 30 it is intended to ascribe to him; probably his dictum is given in *vv.* 2-4, which are an expression of philosophic (but not irreverent) agnosticism. Lemuel, in like manner, may be 'king of Mašša' (the rendering of RV is impossible), or, by change of text, 'the Maššaite.'

In MT the counsel to kings is ascribed to Lemuel's mother; but this may be due to textual corruption—the words may well have been spoken by a sage. In the present condition of the text we can say of these passages no more than that they belong to the general late material of philosophic and gnomic wisdom (see AGUR, LEMUEL, MASSA). The 'sages' are cited in 24 23 and (in MT) in 22 17, and are mentioned in 1 6 etc.; substantially the whole of chaps. 1-9 is referred to them. They represent the body of philosophical ethical thought of the later time; they are the teachers in the academies and the gnomic writers.

It seems clear that the historical statements of origin, in the book and elsewhere, are not conclusive, and that,

7. Date. for the determination of the date, we must look to the customs and ideas indicated in the book. The data may be arranged as follows: (*a*) the conception of life; (*b*) the social conditions; (*c*) the ethical ideas; (*d*) the religious ideas; (*e*) the relation of Proverbs to other books; (*f*) the linguistic characteristics.

(*a*) *Conception of life.*—When we compare Proverbs with other OT books, especially with the prophetical writings, we are struck by the differences between them in the way in which life, as a whole, is contemplated (see WISDOM LITERATURE). It is not merely that the point of view of other books is national, that of Proverbs individual—they differ also as to what constitutes the basis of good living. For the prophets it is loyalty to the service of Yahwè, God of Israel (conceived of as including obedience to his moral law), in distinction from other deities; for the sages it is loyalty to the universal human conscience,[1] and this loyalty is held to be conditioned on knowledge; throughout the book it is knowledge or wisdom that makes the difference between the good man and the bad—the terms 'fool' and 'wicked' are synonymous (see FOOL). Now, we find also in a few prophetical passages insistence on the necessity of knowledge; but in these passages the import of the term is markedly different from the conception in Proverbs.

Hosea (Hos. 4 6) exclaims that the people are destroyed for lack of knowledge; but it is because they are misled by the priests: 'because thou [O priest] rejectest knowledge, I reject thee from being priest'; the fault lies in the priests' ignorance or disregard of the law of Yahwè. In Jer. 5 4 *f.* 8 8 *f.* 9 22 *f.*, the charge of immorality is made against all classes of the people: they do not know (that is, obey) Yahwè's law, and it is even said that they falsify it. The wisdom of the prince of Is. 11 2 is that of a righteous theocratic judge. Ps. 119 is a glorification of knowledge; but it is knowledge of the words of Yahwè.

In distinction from these prophetical passages, Proverbs makes the instructed conscience the guide of life. The divine control of all things is recognised, and the kernel of wisdom is said to be the fear of the Lord; but this means an attitude of the soul, and not dependence on an external code. It is assumed that he who knows will do right—the ultimate basis of life is a wise perception of the constitution of things. This point of view occurs elsewhere in OT only in Job and Ḳōhéleth. It is a distinct rejection of the prophetical and legal

[1] Cheyne (*Job and Sol.* 119) appositely calls the sages the 'humanists.'

conception, and belongs to a reflective stage that we can seek only in the period when the Jews were scattered throughout the Persian and Greek empires. In Jer. 'wise men' are enemies of truth[1]—in Proverbs they are the sole depositaries of truth. This latter view is specifically Greek, and, without denying that some of the material of Proverbs may be earlier, we may probably refer the present form of the book to the Greek period. This date seems to be demanded also by the personification of wisdom in chap. 8 and the rôle assigned her as the controller of earthly affairs and the companion and friend of God at the creation of the world.[2] Such a personification is foreign to the legal and prophetical writings; in the former there is no such representation, and in the latter it is the 'word' of Yahwè (his revelation or command) on which stress is laid (Jer. 23 29 Is. 55 11, cp Ps. 33 6). On the other hand, the personification of wisdom in Wisd. 7 is manifestly Greek.

(*b*) *Social conditions.*—In the picture of social conditions in Prov. there is much that might belong to any period from David onwards: general goodness and badness, honesty and dishonesty, truth and falsehood, industry and sloth, agriculture, business life, courts of law and kings. There is also much, however, that is out of accord with the pre-exilic time. Monogamy is taken for granted, whereas polygamy is assumed in Dt. 21 15 (7th cent.) and Lev. 18 18 (6th cent.). In the older law (Lev. 20 10) adultery was punishable with death; Prov. 6 32-35 treats it merely as a crime against the man's well-being. The elaborate descriptions of harlots' wiles and denunciations of conjugal infidelity (especially in chaps. 1-9) agree better with a monogamous city-life; in a polygamous community this vice is relatively infrequent—in many cases the harlots of pre-exilic prophecy are temple-prostitutes. Organised robbery, as in 1 10-19, belongs more naturally to later city-life, whether the passage in question refer to literal robbery, or, as some hold, to extortion and oppression under legal forms. The practice of hoarding corn (11 26) probably belongs to the later commercial life. The little treatise on the care of flocks (27 23-27) is hardly an early production; literary treatment of such subjects is elsewhere late (Aristotle, Vergil).

The same thing is true of the manuals of conduct for kings (16 10-15 25 2-5 31 2-9), which relate to royal rulers as a class, without distinction of peoples, and lay the emphasis on the broad administrative virtues, the details being wholly different from those of Dt. 17 14-20, but nearly identical with those of the post-exilic Is. 11 1-5. The instructions (23 1 *f.* 25 6 *f.*) how to conduct one's self at the table of a king are noteworthy; they reflect a time when such social intercourse was not uncommon (else they would not have found a place in Proverbs), certainly not the pre-exilic royal period, but rather the period of the Grecian (and possibly the Maccabæan) princes, when it might happen to any respectable man to find himself at the king's table (see, *e.g.*, Jos. *Ant.* xii. 4 3 9).

Finally, there are, in parts of Prov. (1-9 22 21 24 23), suggestions of an organisation of learning which better suits the late reflective period: the sages are an influential body, and appear to have pupils—so we may infer from the address 'my son,' and from 22 21—that is, academies were in existence. The dictum of Agur implies a habit of discussing theological questions. The quotations in 30 5 *f.* (from Dt. 4 2 Ps. 18 30 [31] and perhaps Job 13 4 10) point to a late time, for Ps. 18 must be regarded as post-exilic.

(*c*) *Ethics.*—In certain points the ethical system of Proverbs agrees with that of the pre-exilic and exilic books on both the positive and the negative sides. The codes given in Ex. 20-23 Dt. Lev. and the prophets include most of the duties of a man to his fellow-citizens. They have nothing to say of courage, fortitude, moderation, self-sacrifice, intellectual truthfulness, love of beauty, international obligations; but this defect, however it may be explained, is not supplied by later books. The motive for right-doing, 'that it may be well with thee,' is the same throughout OT, and the avoidance of speculative inquiry concerning the nature of conscience and the ultimate basis of moral rules is common to all Semitic antiquity. On the other hand, there are injunctions and points of view in Proverbs which appear to indicate an ethical advance over the exilic and pre-exilic books.

Such are the frequent praise of industry (6 6-11 12 24), the scorn of gluttony (23 20), and the homely warning against too much frequenting of others' houses (25 17); the formulation (*passim*) of the character of the scoffer (a conception peculiar to Proverbs), and the special attention paid to fools, kings, and children, classes not considered, from the educational point of view, in other books (Dt. 6 7 Ex. 12 26 *f.*, are not exceptions); the deeper conceptions of responsibility for one's words (10 11 12 18 13 3), of the wisdom of heeding reproof (12 1 17 10), and of the correspondence between deeds and requital (24 12, an advance in universality on Ezek. 18); the reference to the uncertainty of the future (27 1), a sort of reflection of which we find no trace in Law or prophets; the injunction of kindness toward enemies (24 17 *f.* 25 21 *f.*), which goes beyond the rule of Lev. 19 18 (this latter has in mind only fellow-countrymen).

It must be said, moreover, that, though there is in Prov. no recognition of a law of international ethics, there is also no trace of that bitterness toward foreign nations which disfigures the prophetical and the historical books, parts of the Law, and some of the Psalms; the tone of the book is that of men who have been trained by experience to the recognition of a universal humanity. The guide of conduct is the sage—the appeal is to every man's reason and conscience.

Such is the general attitude. Yet the book has also its bitterness and implacableness. It adopts toward the wicked in general the attitude of Yahwè toward the wicked in Israel (Am. 4 Hos. 6 4-6 9 7); they are warned, and exhorted to repent, but, if they do not change, they must die (Prov. 1 20-33). There is not even a trace of the softness which is visible in Ezek. 18 32 Hos. 14 4, or of the recognition of human weakness which is expressed in Ps. 103 14.[1] This difference is doubtless due in great part to the impersonal character of the moral ideal and judge in Proverbs; Yahwè may pity, but Wisdom must be unrelenting. The sages, in fact, set forth a natural law in the moral world, which is no more capable of pity than physical law; the rule is: be wise or perish—it is the rule of the ethical philosopher, not of the patriot or the preacher. In this respect, as in others, we are struck by the modernness of Proverbs: prophets and historians often seem remote from us, and sometimes even the psalms; but Proverbs might almost have been written yesterday.

(*d*) *Religious Attitude.*—Of all the biblical books, if we omit such works as Nahum, Obadiah, and parts of Kōhéleth, there is none with so simple and colourless a theistic creed as Proverbs. It is distinctly and absolutely monotheistic; unlike most of the prophetical writings and some of the psalms it ignores polytheism or the recognition of other gods than Yahwè—for it that question is finally settled; even of angels and demons it makes no mention, though these must have formed part of the general Jewish belief whether before or after the exile—but Proverbs recognises no supernatural element in life but the spirit of God manifesting itself in the thought of man, and omits intermediate agencies as unnecessary. Its theistic faith is firm, calm, and unquestioning. It is enough that God is the creator and ruler of the world. His ethical attributes are taken for granted: there is no discussion of his justice as in Job, no doubt of the moral significance of the world as

[1] There is no sign, however, in the prophetical writings of a class of philosophically sceptical sages; the 'wise men' depended on political shrewdness rather than on the word of Yahwè, and advocated expediency rather than prophetic piety.

[2] In Prov. 8 30 the term אמן is by some taken as meaning 'artist,' 'architect,' in which case it is better pointed אַמָּן; it should rather be written אָמֻן, 'nursling' 'ward'; wisdom is the creation or child of God (*vv.* 22-25) and his companion in his creative work.

[1] See, however, what is said below (under *d*) of God's educative providence. In 26 1 3-12 intellectual folly is treated of humourously or sarcastically.

in Ḳōhéleth.[1] In accordance with this point of view the emotional element in religion is ignored: we find no expression of love to God, of sense of sin and repentance, of joy in the service of God—only the conviction that wisdom's ways are ways of peace and pleasantness. On the other hand, we have (3 11 12) the fine conception of God as training his servants by suffering; here alone in Proverbs is the word 'love' used of God (it is used of wisdom in 8 17). In striking contrast with all other OT books except Ḳōhéleth the main features of the distinctively national Jewish religious faith are passed over in almost complete silence.

There is no mention of prophets[2] or priests or temple; sacrifice is twice alluded to as a popular custom connected with feasting (7 14 17 1), twice (15 8 21 27) sacrifice without righteousness is denounced as abhorrent to God, and once (21 3) it is said that integrity is more acceptable to God than sacrifice—this last declaration is quite in the spirit of the prophets of the period of undeveloped ritual (Am. 5 21-23 Hos. 6 6 Is. 1 11-17 Jer. 7 3-7 22 *f.*), only, perhaps, with a more marked tone of indifference.

In contrast, however, with prophets and psalmists, the devotional element in religion (prayer, praise) is lacking. While there is no reference to a collection of sacred scriptures (such as occurs in the prologue to the Greek translation of Ben-Sira, 132 B.C.), there are two definite quotations (30 5 *f.*); the closest parallel to such employment of earlier writings is the reference to Jeremiah in Dan. 9 2 (165 B.C.), and the suggestion is that Prov. 30 belongs to a late post-exilic period.

In another point the silence of Proverbs is noteworthy. Before the exile the prophets predicted simply the restoration of the nation, but, after the fall of Jerusalem, the figure of the national king was introduced into the picture by prophets and psalmists as the natural political head, leading the nation in a career of conquest (Jer. 33 15 *f.*, Is. 11 1-9, etc.); he was for a long time a part of the national hope. In Proverbs, however, he does not appear: what the book says of kings (14 35 16 10-15 20 26 28 24 21 *f.* 25 2-7) seems to regard them merely as a universal element of society, to be feared and obeyed; when they are spoken of as absolutely just (16 10 20 28), this is a natural idealisation of the office;[3] their utterances are said to be as just as an oracular decision, and wickedness is declared (16 12) to be abhorrent to them. This is the tone of a man who regards society as organised on a moral basis, and feels no interest in an independent Jewish government.[4] Nor do the writers of Proverbs express any interest in the newer eschatological ideas.

The sphere of human activity, the place of struggle and happiness or unhappiness, is the present life on earth; Shĕōl, as in the older literature, has no moral discriminations and no rewards and punishments (the same view is found in Ecclus. and Kōhéleth).

Certain passages in the book are regarded, by some critics, as giving evidence of a belief in ethical immortality, but this interpretation is improbable: 2 19 5 5 refer to physical death (premature death, as in 10 27, being the final penalty of sin); in 10 7 28 11 7 the reference is to the present life;[5] 14 32 may be understood to refer either to the future or to the present; but the text is probably in disorder. Inasmuch as the general position of Proverbs is perfectly clear on this point, a single couplet affirming immortality may naturally be regarded with suspicion. On the other hand, if the book be held to recognise the doctrine, its date must be

1 Agur (Prov. 30 2-4) merely affirms man's incapacity to comprehend God; cp Cheyne, *Jew. Rel. Life*, 174 *ff.*

2 In 29 18 the reference is to people in general (not to the Jewish people particularly) and to law or instruction in general (not to the Jewish Tōrāh), and the word *vision* (חזון) is error of text.

3 Cheyne, however, thinks that there is a real portraiture of the Messiah in these passages; see his *Jew. Rel. Life*, 145 *ff.* Cp Toy, 'Proverbs' (in *Internat. Crit. Comm.*), and art. 'The King in Jew. post-exil. writings' (*JBL*, 1899).

4 A Messianic hope is seen by some writers (*e.g.*, Smend, *AT Rel.-Gesch.* 491) in 2 21 *f.*; this passage, however, hardly affirms anything more than a general trust in God's protecting power.

5 𝔊's rendering of 11 7 appears to assume immortality; but it is not a rendering of our Heb., and may reflect the idea of a later time.

put very late. Of the idea of bodily resurrection (which was adopted by the Jews hardly earlier than the second century B.C.) there is no trace.

The central religious conception of Proverbs is the fear of God, reverence for him as ruler and law-giver; the sages, though philosophers, are distinctly religious. In chaps. 1-9 the expression 'fear of God' represents simply an attitude; the fear is described as the essence of wisdom, and its content is given in ethical terms. In the remainder of the book God is regarded as the protector and benefactor of those who fear him. It must be added that, while 'wisdom' in a part of Proverbs (10-31) generally means sagacity, common-sense or prudence, it has in 1-9 a peculiar religious or divine character which it is not easy to define with precision. In 8 it is both a human (*vv.* 1-21) and a divine quality (*vv.* 22-31).

Whether the author conceived of it as an energy pervading the universe, or as a faculty breathed into man by God, or in some other way, it is difficult to say. For it is not shared by all men, and the only statement that God bestows wisdom on man occurs in an interpolated passage (2 5-8), and does not accord with the rest of the book. Probably the sage did not define the conception to himself, but held generally that true wisdom could dwell in him only who lived in sympathetic and reverent obedience to the Lord of the world. Throughout the book the interest of the writers is in wisdom as such.

The religious feeling of the sages forces them to identify wisdom with the divine government; the definition of wisdom as essentially the fear of God (1 7), the recognition of God as absolute disposer of human affairs (16 1 33 17 3), the affirmation of the happiness of those who trust in him (16 20), and similar statements, may be regarded as sincere attempts to harmonise the philosophical point of view with the national religious conviction.[1]

(*e*) *Relation to Ecclesiasticus.*—The position of Proverbs in the arrangement of OT books, the fact, that is, that it stands in the Third Canon, favours the view that it is late, since the other books in this canon are either exilic or post-exilic. But, more particularly, a post-exilic date is suggested by its relation to Ben-Sira.[2] The two books are so much alike in point of view, spirit, and contents that their relation can be explained only by one of two suppositions: either one imitates the other, or the two are products of the same period. But if Ecclus. imitates Proverbs (and the latter is confessedly the earlier of the two), the more natural explanation of the fact is that they stand near together, just as the earlier part of Enoch and Daniel are near each other in time as in content.

One of the most striking of the similarities between the books is the fact that neither lays claim to divine inspiration, in contrast with the other writings (prophets and Tōrāh) that give the terms of acceptance with God. This fact indicates in general a post-prophetic post-legal period,[3] the period of the sages, who are a branch of the class of scribes, and obviously later than the legal development of the fifth century B.C. In Ecclus. (38 24-39 11) learned men are distinctly recognised as a separate class, sharply distinguished from artisans, and their methods of study and their function are described at length. The picture of them in Proverbs is less sharply drawn, and it may be inferred that an interval of time, though not a very great one, separates the two books.

It thus appears that, since the thought is substantially the same throughout Proverbs, the whole of the book in its present form is post-exilic, not earlier than the second half of the Persian period, and not later than the first half of the Greek period.[4] The external

1 Cp Oort, *Spreuken* (*Th.T*, 1885). A similar harmonisation is found in Ecclus. but not in the original Ḳōhéleth. In the latter there are many harmonising additions, in Proverbs apparently only one, in 2 5-8.

2 See WISDOM LITERATURE, and cp Holtzmann, in Stade, *GVI* 2 292 *ff.*; Cheyne, *Job and Sol.*, and *Jew. Relig. Life*, chap. 4; Montefiore in *JQR* 2 (1889-90).

3 Prophetic and legal material no doubt continued to be produced down to the second century B.C.; but it was fragmentary and complementary. The creative prophetic thought began to die out in the sixth century, but lingered till the fourth; the law-books were practically finished by the year 400 B.C.

4 It is understood, of course, that no little of the general

influences of the time, when the Jews were scattered and brought into intimate intellectual relations with the great world, combined with the natural forward movement of the people, led them in the direction of a philosophical conception of life.

How much, in this movement, is due to Persia and how much to Greece, it may be hard to say; the two streams of influence were doubtless blended and assimilated to the fundamental Hebrew thought.[1] But it would appear that, while the contribution of Persia was mainly in the realm of the supernatural (eschatology, angelology, demonology), that of Greece was mainly philosophical (identification of virtue with knowledge, conception of the unity of the cosmos). It is not impossible also that some material was taken from Egyptian sources.[2]

(*f*) *Linguistic Character.*—The vocabulary of Proverbs necessarily agrees largely with that of other OT books. Its linguistic peculiarities are partly due to the nature of its material, partly belong to the later usage.[3] It is not always possible to say whether a given word is late-Hebrew or poetical; for particular discussions reference must be made to the commentaries. In any case the number of words which may probably be regarded as post-exilic or Aramaic is not large;[4] in this respect Proverbs differs from the lately-discovered Hebrew text of Ben-Sira. It is not clear that there are any Arabic or Greek words.[5] The syntactical constructions are characterised by the curtness and compression which naturally belong to gnomic writing. The general style of the book agrees with what we might expect of the time when Aramaic influence was beginning to make itself felt, and the Hebrew was entering on its later stage—that is, the fourth and third centuries B.C.

8. Process of formation.

The custom of teaching by aphorisms and short discourses is illustrated by the whole of the series of early Jewish philosophical works (in which the *Pirḳē Ābōth* may be included).[6] In the fourth and following centuries B.C. there must have been in circulation a number of proverbial sayings, and out of these our Book of Proverbs was made up.[7] The divisions visible on the face of the book have been mentioned above (§ 5), and the differences between them, in content and form, suggest that they represent separate small collections (very much as in the composition of the Psalter). The same fact is indicated by certain repetitions in the book.

Where merely a line is repeated (as in 11 4 24 6), this need not show difference of editorship or of authorship, for a teacher might naturally vary his expressions. Where, however, a couplet occurs twice in exactly the same form (as in 18 8 26 22 19 1 [as emended] 28 6 22 3 27 12, etc.) we may infer that the two have been inserted by different collectors.[8] Such comparisons do not, however, aid in making out the primary divisions; for this we must depend on form and content.

The central part of the book, 10 1-22 16, stands out by itself, but, if we may judge by the form, is really composed of two smaller parts, 10 1-16 2 and 16 3-22 16; the second of these is mostly made up of comparisons and other single sentences, whilst the first employs the antithetic form. With the second agree 25-27 and part of 28 *f.*; with the first agrees the other part of 28 *f.* These seem to have been the earliest collections (ethical couplets); then came the two groups of quatrains, 22 17-24 22 and 24 23-34, which, by their distincter mention of 'sages' and the freer character of their material, indicate a later time; the more elaborate discourses of 1-9 (omitting 2 5-8 3 27-35 6 1-19 9 7-12) may be still later; and 30 *f.* form an appendix. Within these divisions smaller sections occur (such as 16 3-9 [or, 1-9] 16 10-15 25 2-7 26 1 3-12 27 23-27), which may well have been independent productions. Exactly when and how the various parts were combined into a book it is hardly possible to say, nor is the question very important; the main point is that the process probably went on through the fourth and third centuries, and that the appendix, 30 *f.*, may have been added still later; Agur's dictum somewhat resembles Ḳōhéleth, and the artificial tetradic form in 30 11-31 and the alphabetical poem, 31 10-31 suggest a late time. Apart from the sections and sub-sections no principle of arrangement of couplets and quatrains is recognisable.[1]

9. Hebrew aphoristic literature.

It thus appears that the history of ancient Hebrew aphoristic literature is parallel to the course of such literary developments in other peoples—it belongs to the maturest period of the nation. The proverbs of half-civilised peoples do not deserve to be classed as literature; they are merely shrewd popular observations on the passing affairs of everyday life; those broader and deeper observations that are more properly called aphorisms are the product of cultivated reflection. In Egypt the mature philosophical and ethical maxims that bear the names of Ptaḥḥōtep, Any, and others had their origin in one of the most flourishing periods of the Empire (see EGYPT, § 21). Hindoo proverbial literature falls in a similar period in the history of Indian thought. The Greek proverbs ascribed to Menander are probably to be referred to the time that witnessed the rise of the great post-Platonic schools of philosophy. Similarly Hebrew aphoristic literature appears after the beginning of the philosophical movement that is introduced by the Book of Job; and it maintains itself into the Talmudic period, that is, up to the point when the main Jewish literary activity, abandoning philosophy and apocalypse, devoted itself to the legal and ethical exposition of the Torah. The fall of Jerusalem and the dispersion of the Jews throughout the Roman Empire had as one effect the concentration of attention on the law, which was now the sole bond of union between the scattered communities. But, till this revolution was accomplished, aphoristic literature continued to be cultivated. The Book of Proverbs was followed by Ben-Sira; a number of proverbs are found in Ḳōhéleth; and the sayings in Pirḳē Ābōth ascribed to the great sages doubtless represent the period beginning in the second century B.C. and extending into the first two centuries of our era. These sayings are analogous to those that tradition puts into the mouths of the 'seven wise men' of Greece; philosophy arose early in Greece, late among the Jews. The Book of Proverbs, standing midway in the philosophic development, is the finest philosophical fruitage of the national Jewish spirit broadened and matured by intellectual contact with the best foreign thought of the time.

10. Literature.

i. *Text and versions.*—Vogel (in Schultens), 1769; Jäger, *Observv. in Prov. Sal. vers. alex.*, 1788; Schleusner, *Lexicon*(2), 1829; Lagarde, *Anmerk. z. griech. Uebers. d. Prov.* 1863; Dyserinck, *Krit. Schol.* (*Th.T*, 1883); Oort, *Spreuken*, 1-9 (*Th.T*, 1885); Baumgartner, *Étude crit. sur . . Prov.*, 1890; Bickell (*WZKM*, 1891); Pinkuss, *Die syr. Uebers. d. Prov.* (*ZATW*, 1894); Grätz, *Exeget. stud.* (in his *Monatsschr.*,

thought, theistic and ethical, and some of the particular illustrations, may be older than the fourth century; the present form, however, is not popular but academic.

1 On Jewish borrowing from other nations cp M. Lazarus, *The Ethics of Judaism* (ET), 1 12 *ff.*

2 See Erman, *Ægypten*, 237 *f.*, and cp Griffith, art. 'Egypt. Lit.' in *Library of the World's Best Lit.* (New York, 1897).

3 Cp the lists of words given by Driver, *Introd.*, and Wildeboer, *Die Sprüche.*

4 The following appear to be late: the plur. form אישים, 8 4; מאור, 15 30; נבע, 'to utter,' 1 5, etc.; the expression עלה ביר, 26 9, in the sense 'come into the possession of'; קרת, 8 3; and perhaps זך, 16 2, פתי, 1 4 and some others. Aramaic are the terminations ות and ין, and the words בר, 31 2; חסד, 'sin,' 14 34; כסא, 7 20, and perhaps some others.

5 The obscure word וזר, 21 8, may be Arab., but it is doubtful whether it is the right reading; אלקום, 30 31, is error of text; אטון, 7 16 may be Gk. ὀθόνη, or the Gk. may come from a Semitic term; שמע, 21 28, is textual error.

6 Cp the Gk. 'Menander,' and the Syriac work bearing the same name. The instruction in the Synoptic Gospels is of the same character.

7 These would be of various times and origins, as is the case everywhere. Cp Oort, in *Bible for Learners* [or, *for Young People*], Bk. iii. chap. 7; Back in Graetz's *Monatsschrift*, 1875-1884; Wünsche, *Die Räthselweisheit b. d. Heb.*, 1883.

C. H. T.

PROVINCE (*provincia;* etymology uncertain), in the Roman sense, may be defined as the department or sphere of duty[1] assigned to one of the higher magistrates (the consuls and prætors). When, however, with the spread of the Roman arms, the government of conquered countries grew to be one of the most important duties of the higher magistrates, the term province, from designating the government of a conquered country as one particular duty of a Roman magistrate, came to be used generally as a designation of the country itself.

It is somewhat in this sense that the word is used in EV to translate מְדִינָה, *mĕdīnāh* (apparently from √דין, 'judge,' hence lit. jurisdiction)[2] for which 𝔊 almost always has *χώρα* (*ἐπαρχεία* in Esth. 4 11, *σατραπεία* in Esth. 8 9). A division of Israel into *mĕdīnōth* is mentioned in the time of Ahab (1 K. 20 14 *ff.*; see GOVERNMENT, § 18); *mĕdīnōth* of the Babylonian empire are alluded to in Ezek. 19 8 Dan. 8 2 (Elam), Lam. 1 1 (Judæa); those of the Persian empire are referred to with great frequency in the Book of Esther (1 1, etc.); the Jewish territory was one of them (Neh. 7 6 Ezra, 2 1; cp GOVERNOR, 1; GOVERNMENT, § 25; PERSIA, § 1 *f.*, SATRAPS; TIRSHATHA). The word is also used in a general sense in Eccl. 5 8 (RV^mg. 'the state'); cp 2 8. The frequent use of *χώρα* in Maccabees (where EV has 'country,' but 'province' would perhaps be better) may be noted.

Augustus in 27 B.C. divided the provinces into imperial and senatorial. Those which, from their proximity to the frontier or from the turbulence of their population, required the presence of an army were placed under the direct control of the emperor; those which needed no troops were left to be administered by the senate. (1) The senatorial provinces were ruled by an annual governor as under the republic. Of these provinces Augustus ordained that Africa and Asia should be consular, the rest prætorian; but all the governors of the senatorial provinces were now called proconsuls (cp PROCONSUL). Their powers and dignities were much the same as they had been under the republic, except that they had now no troops, or only a handful to maintain order. (2) The imperial provinces were governed by imperial lieutenants (*legati Cæsaris*), who were nominated by the emperor and held office at his pleasure; all of them had the power of the sword (*jus gladii*). For the administration of the finances these lieutenants had procurators under them, whilst the governors of the senatorial provinces continued to have quæstors as under the republic. Another class of imperial provinces consisted of those which from the physical nature of the country (as the Alpine districts), or the backward state of civilisation (as Mauretania and Thrace), or the stubborn character of the people (as Judæa and Egypt) were not adapted to receive a regular provincial constitution. These were regarded as domains of the emperor, and were managed by a procurator (in the case of Egypt by a præfect), nominated by and responsible to the emperor.

The word *ἐπαρχεία* (EV 'province') occurs in NT. In Acts 23 34 Felix asks concerning Paul *ἐκ ποίας ἐπαρχείας ἐστίν*—of which kind of province he is—whether provincial or senatorial. (Cilicia was probably in the time of Felix an imperial province; cp CILICIA, § 3.) In 25 1 the province of Festus the procurator of Judæa is intended (see GOVERNMENT, § 30, col. 1914; ISRAEL, § 90, col. 2275).

PRUNING HOOK (מַזְמֵרָה; ΔΡΕΠΑΝΟΝ; *falx* [*ligo in* Mic.]), Is. 2 4 18 5 Joel 3 [4] 10 4 3†. See VINE and cp AGRICULTURE, § 7.

PSALM (מִזְמוֹר; 𝔊 Theod. ΨΑΛΜΟϹ; Aq. ΜΕΛΩΔΗΜΑ. Sym. ΩΔΗ, ΑϹΜΑ; Tg. תושבחתא; cp Staerk, *ZATW* xii. [1892] 94 137. On the linguistic affinities see BDB and Ges.-Buhl).

The meaning of the Hebrew word is not clear. According to Lagarde (*Or.* 2 23 *f.*), מזמור, *mizmōr*, came into use as a technical term of synagogue-worship, in contradistinction to *tᵉhillāh*, *tᵉhillīm* (תְּהִלִּים, תְּהִלָּה), which was specially appropriated to the temple cult. Grätz (*Psalmen*, 79 *f.*), with whom B. Jacob (*ZATW* 16 [1896] 164 *f.*) inclines to agree, thinks that *mizmōr* has no musical reference, merely indicating that a new psalm begins: it is equivalent therefore to 'chapter,' and, but for the carelessness of copyists, would stand at the head of every psalm. Delitzsch (introd. to Ps. 3) conjectures that it was an artificial expression coined by David. The word, which occurs exclusively in the headings of 56 psalms and in Ecclus. 49 1 (see PSALMS [BOOK], § 1), and to which the cognate languages offer no corresponding terms except loanwords, is most probably—like so many other terms in the headings—corrupt.

The true word must be one which by its meaning justifies its close connection with the phrases לדוד, לבני קרח, etc., and admits of being corrupted not only into מזמור but also into שיר (a corruption of a correction of מזמור), with which it is so often combined, and which in the sense of 'song' is as superfluous as מזמור in the sense of 'psalm.' The required word is either רָשׁוּם, 'marked' (Dan. 10 21) or רוּשַׁם, 'mark' (Aram.). The Aram. √רשם corresponds to the Heb. חקק, 'to mark' (cp. Tg., Is. 10 1). 'Marked: Of the sons of Korah' is just what we should expect to find at the head of a poem transcribed from the Korahite collection, and in the prefix to the title we cannot be surprised to find an Aramaism. In Ps. 98 1, where מזמור stands, we must supply לְדָוִד, following 𝔊, and on the analogy of Ps. 100 1, where לתודה (like לדוד) is most probably a corruption of לידיתון, 'of Jedithun.'

It is very possible that the familiar phrase 'the Book of Jashar' (סֵפֶר הַיָּשָׁר), for which 𝔊 substitutes 'song-book,' סֵפֶר הַשִּׁיר, should rather be, 'the book of the marked poems' (סֵפֶר הָרָשׁוּם)—*i.e.*, the collection of poems whose source is indicated רשום collectively). W. Robertson Smith considered 𝔊's reading certain; it is at any rate probably very near the truth.

T. K. C.

[1] In familiar language any business was called a province.

[2] In Aramaic and Arabic the cognate word means 'city' (so, too, in Palm. inscriptions, but in bilinguals רחימי מ׳, 'lovers of their city' [in parallelism with 'fearers of their gods'] is represented by *φιλοπάτριδες*; cp Vog. *Syr. Cent.* 13. Bevan, *Dan.* 220). In Arabic el-Medīna is *the* city, *par excellence.*

PSALMS [BOOK]

CONTENTS

I. INTRODUCTORY DISCUSSION

II. RECENT CRITICISM

III. FRESH SURVEY OF PSALTER

I. INTRODUCTORY DISCUSSION

1. Title. The Book of Psalms or the Psalter, the first book of Hagiographa in the Hebrew Bible,[1] bears the Hebrew title תְּהִלִּים, *tĕhillīm*, or סֵפֶר תִּלִּים, *sēpher tillīm*, 'the book of hymns' or rather 'songs of praise.'[2] The singular תהלה, *tᵉhillah*, is properly the infinitive or *nomen verbi* of הלל, *hillēl*, a verb employed in the technical language of the temple service for the execution of a jubilant song of praise to the accompaniment of music and the blare of the priestly trumpets (1 Ch. 16 4 *f.* 25 3 2 Ch. 5 12 *f.*). The name is not therefore equally applicable to all psalms, and in the later Jewish ritual the synonym *hallēl* specially designates two series of psalms, 113-118 and 146-150, of which the former was sung at the three great feasts, the encænia, and the new moon, and the latter at the daily morning prayer (see HALLEL). That the whole book is named 'praises' is clearly due to the fact that it was the manual of the temple service of song, in which praise was the leading feature. For an individual psalm, however, the usual name is *mizmōr* (מזמור; only in titles of psalms [except in Ecclus. 49 1]),[3] which is applicable to any piece designed to be sung to a musical accompaniment. Of this word, ψαλμός, 'psalm,' is a translation, and in the Greek Bible the whole book is called 'Psalms' (ψαλμοί) or 'Psalter' (ψαλτήριον).[4] The title Psalms (ψαλμοί) or Book of Psalms (βίβλος ψαλμῶν) is used in the NT (Lk. 20 42 24 44; Acts 1 20); but in Heb. 4 7 we find another title, namely 'David.'

Hippolytus tells us that in his time most Christians said 'the Psalms of David,' and believed the whole

2. Traditional authorship. book to be his [and even Theodore of Mopsuestia accepted the Davidic authorship of the Psalter as a whole]. But this title and belief are both of Jewish origin. [Thus in 2 Ch. 29 30 David and Asaph appear to be combined as joint-authors of the Psalter, and] in 2 Macc. 2 13 'the [writings] of David' (τὰ τοῦ Δαυειδ) means the Psalter. Besides, the title of the apocryphal 'Psalms of Solomon' implies that the previously existing Psalter was ascribed to David. [Whether, however, we must also assume that the psalms entitled לדוד were necessarily ascribed to king David, is questioned by Lagarde and B. Jacob, and the correctness of the reading לדוד may be strongly doubted, as also the reading of the title לשלמה. See § 12 (*a*) (*d*).] Jewish tradition does not make David the author of all the psalms; but as he was regarded as the founder and legislator of the temple psalmody (1 Ch., *ut sup.*; Ezra 3 10 Neh. 12 36 45 *f.* Ecclus. 47 8 *f.*), so also he was held to have completed and arranged the whole book, though according to Talmudic tradition[1] he incorporated psalms by ten other authors: Adam, Melchizedek, Abraham, Moses, Heman, Jeduthun, Asaph, and the three sons of Korah. [Cp Driver, *Introd.*(6), 7 *f.*; Neubauer, *Studia Biblica*, 2 6-8. Another good authority on Jewish tradition—Dr. B. Jacob—writes thus: 'Not till quite late, according to the Midrash, did David take possession of the entire Psalter. In the second century the most important teachers of the Mishna still debate the questions whether all the psalms are by David (R. Meir), and whether they all refer to David (R. Elasar), or to the community (R. Joshua), who composed the Hallēl, etc. (*Pĕsāḥīm*, 117 *a*). The Church fathers, too, in the earliest age protest against the erroneous opinion that David is the author of all the psalms, and seek for reasons why the whole Psalter is nevertheless named after him' (*ZATW* 16 [1896], 162 *f.*).]

With this it agrees that the [Hebrew] titles of the psalms name no one later than Solomon, and even he is not recognised as a psalmodist by the most ancient tradition, that of 𝔊, which omits him from the title of Ps. 127 (𝔊R inserts the name)[2] and makes Ps. 72 be written εἰς Σαλο[ω]μων, *i.e.*, not by but of him.

The details of the tradition of authorship show considerable

1 [The part of this article signed 'W. R. S.' was originally written in 1886. It was, however, virtually re-indorsed in 1892 in the seventh of the Lectures on Biblical Criticism now so often referred to as *OTJC*(2), in which, as the author states, he has incorporated the main conclusions of his article. Much water has flowed under the bridge since 1892, and the progress of the critical study of other books cannot but react on that of the Psalms. No better starting-point, however, for the study of this great book could be had than the sketch here adopted as the introduction to our article; and if we decline to hold it certain that a renewed investigation of the Psalter from the point of view enforced upon us by the present circumstances of criticism and philology would have led the writer to the same conclusions as in 1886, no disparagement to an enthusiastically admired comrade can be intended by the scholar whose signature is appended to the larger part of the article.]

2 Hippol., ed. Lag., 188; Eus. *HE* vi. 25 2; Epiph. *Mens. et Pond.* § 23; Jerome's preface to *Psalt. juxta Hebræos.*

3 [If the reading of the Cairo Hebrew text be correct, מזמור could be used of secular songs. But Halévy, זמרה.]

4 Similarly in the Syriac Bible the title is *mazmōrê*.

1 The passages are collected in Ḳimḥi's preface to his commentary on the Psalms, ed. Schiller-Szinessy, Cambridge, 1883.

2 [The significance of this fact is changed, if מעלות and שלמה are both corruptions of the same original. See § 12.]

variation; according to the Talmudic view Adam is author of the Sabbath psalm, 92, and Melchizedek of Ps. 110, whilst Abraham is identified with Ethan the Ezrahite (Ps. 89). According to older Jewish tradition attested by Origen,[1] Ps. 92 is by Moses, to whom are assigned Pss. 90-100 inclusive, according to a general rule that all anonymous pieces (ἀνεπίγραφοι, יתומים) are by the same hand with the nearest preceding psalm whose author is named; and Ps. 110, which by its title is Davidic, seems to have been given to Melchizedek to avoid the dilemma of Mt. 22 41 *f.* Origen's rule accounts for all the psalms except 1 and 2, which were sometimes reckoned as one poem (Acts 13 33 in the Western text; Origen, *B. Bĕrākhôth*, 9 *b*), and appear to have been ascribed to David (Acts 4 25). The opinion of Jerome (*Præf. in Ps. Heb.*) and other Christian writers that the collector of the Psalter was Ezra does not seem to rest on Jewish tradition.

3. Number of psalms.

[The number of the psalms both in 𝔊 and in MT is 150, though the mode of arriving at this number is different; 𝔊 unites 9 and 10, 114 and 115, and divides 116 and 147; the apocryphal psalm at the end is not reckoned. The oldest Jewish tradition reckoned 147 psalms (cp Gen. 47 28); Pss. 9 and 10 are one, 70 and 71 are one, 114 and 115 are one, and 117 and 118 1-4 are one, whilst 118 5 begins a separate psalm (see, *e.g.*, the Vienna MS described by Ginsburg, *Introd.* 777). The inaccuracy of an arrangement which divides Pss. 9 and 10, 42 and 43 is manifest.]

4. Psalter—a temple handbook?

Whatever may be the value of the titles to individual psalms, there can be no question that the tradition that the Psalter was collected by David is not historical; for no one doubts that [at any rate] some of the psalms date from after the Babylonian exile. The truth that underlies the tradition is that the collection is essentially the hymn-book of the second temple, and it was therefore ascribed to David, because it was assumed, as we see clearly from Chronicles, that the order of worship in the second temple was the same as in the first, and had David as its father: as Moses completed the law of Israel for all time before the people entered Canaan, so David completed the theory and contents of the temple psalmody before the temple itself was built. When we thus understand its origin, the tradition becomes really instructive, and may be translated into a statement which throws light on several points connected with the book—the statement, namely, that the Psalter was (finally, at least) collected with a liturgical purpose. Thus, though the Psalms represent [according to the writer's earlier view] a great range of individual experience, they avoid such situations and expressions as are too unique to be used in acts of public devotion. Many of the psalms are doxologies or the like, expressly written for the temple; others are made up of extracts from older poems in a way perfectly natural in a hymn-book, but otherwise hardly intelligible. Such ancient hymns as Ex. 15 1 *ff.* [cp EXODUS, BOOK OF, § 6], Judg. 5 1 S. 2 1-10 [cp SAMUEL, BOOKS OF, § 3], are not included in the collection, though motives borrowed from them are embodied in more modern psalms; the interest of the collector, we see, was not historical but liturgical. Again, the temple, Zion, the solemn feasts, are constantly kept in the foreground. All these points go to show that the collection was not only used but actually formed for use in the temple.

5. Necessary qualification.

[The preceding statement with regard to the object and use of the collection would probably have received from the original writer some qualification. Most critics would now admit that many of the psalms were probably never either used in the temple or intended for use in the temple. The synagogues were 'prayer-houses' like the temple, and it is difficult to believe that prayer did not include praise; moreover, the 'missionary psalms' and the so-called 'Puritan psalms' had a special applicability to the Jews of the Dispersion (Che. *OPs.* 12 14 363; Duhm, *Psalmen, Einl.* x.; Briggs, in *New World*, March 1900, 177). Duhm even thinks that many psalms can only have been used for private edification. At any rate, it is safer to call the Psalter the prayer-book and hymn-book of the (post-exilic) Jewish community[1] than to connect it as a whole too closely with the services in the temple. It is thus left open to suppose that many of the psalms were hymns of the Dispersion (see Roy), and at the same time to deny that the religious experiences are ever purely personal.

6. 'I' of the psalms.

Prof. Robertson Smith, at a later date, qualified his original statement respecting 'individual religious experience,' and the following passage (*OTJC*(2) 189, n.) deserves to be quoted.] 'Some recent writers go so far as to maintain that in all (or almost all) the psalms, the speaker is Israel, the church-nation personified, so that the "I" and "me" of the psalms throughout mean "we," "us," the community of God's grace and worship. So especially Smend in Stade's *Zeitschrift*, 8 49 *ff.* (1888). Few will be disposed to go so far as Smend [who has indeed since 1888 taken opportunities of qualifying his original position, and in his *Lehrbuch der AT Rel.-gesch.*(2), 361, says that he is in essential agreement with Cheyne, *Origin of the Psalter*, 261 *ff.*]. But the view that many psalms are spoken in the name of the community is no novelty, and can hardly be disputed. There is, of course, room for much difference of opinion as to the extent to which this method of interpreting the "I" and "me" of the psalms may be applied. Driver, *Introd.*(1) 366 *f.* [389 *ff.*] would confine it to a few psalms [but cp the fuller statement in ed. 6], while Cheyne (whose remarks on the bearing of the question on the use of the Psalter in the Christian Church will repay perusal) gives it a much larger range (*Origin of the Psalter*, 1891, Lecture vi.).' [On this subject see further Schuurmans Stekhoven, *ZATW* 9 [1889], 131 *ff.*; Budde, *TLZ*, May 14, 1892, col. 254; Beer, *Individual- und Gemeinde-Psalmen* (1894); Coblenz, *Ueb. das betende Ich in den Psalmen* (1897); H. Roy, *Die Volksgemeinde u. die Gemeinde der Frommen im Psalter* (1897); D. Leimdörfer, *Das Psalter-ego in den Ich-Psalmen* (1898), and Baethgen's commentary.]

[It is often said that the practice of those who prepare hymn-books for congregational Christian use is against Smend's view, hymns which were originally the expression of the inward experience of individuals in circumstances more or less peculiar to themselves being adapted to more general use by omissions, additions, and other large or small alterations. The comparison, however, is hazardous, the awakening of individual life in the Western nations since the introduction of Christianity having no parallel in the Semitic East. Those hymns in the OT which were traditionally supposed to be the effusions of individuals (1 S. 2 1-10 Is. 38 10-20 Jon. 2 2-9 [3-10]), turn out to be nothing of the kind, but simply expressions of the faith of the pious community of Israel. The same may on the whole be affirmed of the 'Psalms of Solomon.' The truth is, that the controversy as to the 'I' psalms is not so important as has been supposed. It is not a part of the larger question as to the date of the psalms, for the representation of a body of men as a single being is primitive; 'I' psalms might, if the tone of thought and the social background permitted, be pre-exilic. Nor does it greatly affect the exegesis of the psalms, except indeed when by means of forced interpretations Duhm and B. Jacob endow the speakers of the psalms with a vigorous and almost self-assertive personality. Between those who contend that the speaker of a psalm (or of a part of a psalm) is a representative or typical pious Israelite, and those who regard the speaker as the community itself personified, there is, exegetically, but a slight difference. And yet this difference is not to be wholly disregarded. A close study of the psalms, especially in connection with a keen textual criticism, will probably show the greater naturalness (from the point of view of *Völkerpsychologie*) of the latter way of accounting for the phenomena. Occasionally, of course, *e.g.*, in 34 11 [12] 45 2 [1] 78 1 *f.* 106 4 *f.*, there is no possible doubt that it is the poet himself who speaks; but these passages are widely different from those about which somewhat too lively a dispute has arisen among critics of the Psalter. The evidence of the heading of Ps. 102 cannot rightly be brought against the view here recommended; the 'afflicted one' (עָנִי) there spoken of is manifestly the pious community (cp עָנָו, 61 3 77 4).]

[The chief names on the other side[2] are those of Nöldeke, B. Jacob, and Duhm. According to Nöldeke (*ZATW* 20 [1900], 92 *f.*), the 'I' psalms refer as a rule to the poet himself; this is based on the observation that in the songs in the Hebrew text of Ecclus. 51 2-12 and 13-29 it must be Ben Sira who speaks.[3] Very different is the view of B. Jacob (*ZATW* 17 [1897], 544 *ff.*),

[1] *Opp.* 2 514 *f.* ed. de la Rue; cp Hippol. *ut supra;* Jerome, *Ep. CXL* (*ad Cypr.*), and *Præf. in Mal.*

[1] Olshausen (*Psalmen*, 1853) already gives this definition of the Psalter; but he does not give a clear notion of the great Jewish community, which, though conscious of its unity (symbolised even by so apparently trifling a point as the turning of a worshipper towards Jerusalem even when away from the Holy Land), was nevertheless not merely Palestinian but scattered in many lands.

[2] We do not mention König (*Einl.* 400), because he admits the representative character of most of the individuals who are the supposed speakers in the psalms. In Ps. 23, however, the speaker, he thinks, is not the collective community (Smend), but a fugitive, who is cut off from visits to the temple, like David, according to 1 Sam. 26 19. (But surely the speaker in this and parallel psalms is the company of faithful Israelites and diligent frequenters of the temple, who formed the *kernel* of the post-exilic Judæan community.)

[3] This observation of Nöldeke, however, is hardly self-evident so far as 51 2-12 is concerned.

who maintains that psalms were composed for the use of individuals who had some sacrificial rite to perform in the temple, as a means of deliverance from sickness, or as a thank-offering for recovery; and goes so far as to define the Psalter (in opposition to Olshausen and many others) as 'ein Gemeinde-opfergesangbuch—das hat uns סלה gelehrt,—ein Privat(opfer)-gebetbuch—das sollte להזכיר zeigen.' To these we may add Duhm, who, as a commentator, represents the same tendency, and carries the individualising interpretation of the speakers of the psalms to an extreme. The objections to this view will appear to any student of Duhm's always clear and consistent, but too often strained, exegesis. See further, §§ 16, 37.]

The question now arises, Was the collection a single act, or is the Psalter made up of several older collections?

7. Steps in redaction: five books. Here we have first to observe that in the Hebrew text the Psalter is divided into five books, each of which closes with a doxology. The scheme of the whole is as follows:—

Book i., Pss. 1-41: all these are ascribed to David except 1 2 10 (which is really part of 9) 33 (ascribed to David in 𝔊); *doxology* 41 13.

Book ii., Pss. 42-72: of these 42-49 are ascribed to the Korahites (43 being part of 42), 50 to Asaph, 51-71 to David (except 66 67 71 anonymous; in 𝔊 the last two [not 67 𝔊ℵ] bear David's name), 72 to Solomon; *doxology* 72 18 19 followed by the subscription 'The prayers of David the son of Jesse are ended.'

Book iii., Pss. 73-89: here 73-83 bear the name of Asaph, 84 *f.* 87 *f.* that of the Korahites, 86 of David, 88 also of Heman, 89 of Ethan; *doxology* 89 52.

Book iv., Pss. 90-106: all are anonymous except 90 (Moses), 101 103 (David)—𝔊 gives also 104 to David; here the doxology is peculiar, 'Blessed be Yahwè God of Israel from everlasting and to everlasting. *And let all the people say* Amen, Hallelujah.' [On this doxology with the preceding benediction see § 17, end.]

Book v., Pss. 107-150: of these 108-110 122 124 131 133 138-145 are ascribed to David, and 127 to Solomon, and 120-134 are pilgrimage psalms; 𝔊 varies considerably from the Hebrew as to the psalms to be ascribed to David, and assigns some to Haggai and Zechariah; the book closes with a group of doxological psalms.

The division into five books was known to Hippolytus;[1] but a closer examination of the doxologies shows that it does not represent the original scheme of the Psalter; for, while the doxologies to the first three books are no part of the psalms to which they are attached, but really mark the end of a book in a pious fashion not uncommon in eastern literature, that to book iv., with its rubric addressed to the people, plainly belongs to the psalm, or rather to its liturgical execution, and does not, therefore, really mark the close of a collection once separate.

i. In point of fact, books iv. and v. have so many common characters that there is every reason to regard them as a single great group.

ii. Again, the main part of books ii. and iii. (Ps. 42-83) is distinguished from the rest of the Psalter by habitually avoiding the name Yahwè (EV the LORD) and using Elōhīm (God) instead, even in cases like Ps. 50 7, where 'I am Yahwè thy God' of Ex. 20 2 is quoted but changed very awkwardly to 'I am God thy God.' This is due not to the authors of the individual psalms, but to an editor; for Ps. 53 is only another recension [with some peculiar variations[2]] of Ps. 14, and Ps. 70 repeats part of Ps. 40, and here Yahwè is six times changed to Elōhīm, whilst the opposite change happens but once. The Elōhīm psalms, then, have undergone

[1] 'The witness of Hippolytus is found in the Greek (ed. Lag., 193; closely followed by Epiphanius, *De Mens. et Pond.* § 5; see Lagarde, *Symmicta*, 2 157) in a passage of which the genuineness has been questioned; but the same doubt does not attach to the Syriac form of Hippolytus's testimony (Lagarde, *Analecta Syriaca*, 1858, p. 86). The Greek speaks of a division into five books (βιβλία), the Syriac of five parts or sections (*mĕnawâthê*). The latter expression agrees best with Jerome's statement in the *Prologus Galeatus*, 'David quem quinque incisionibus et uno volumine comprehendunt [*scil.* Hebræi].' In the preface to his *Psalt. iuxta Hebræos* Jerome refuses to allow the expression '"five books" which some used' (*OTJC*(2), 194, n. 1). For the oldest Jewish evidence Schechter (*ibid.*) refers to *B. Ḳiddûshîn*, 33*a* ('two-fifths of the Book of Psalms').

[2] [The critics are not of one mind as to the comparative merits of the two recensions. Delitzsch, Duhm, and Wellhausen prefer Ps. 14, but Hitzig, Ewald (at least in 1829, see *St. Kr.* 774 *f.*), Olshausen, and (lately) Budde are in favour of Ps. 53. The text of both 'recensions' is surely very defective. Bickell (*ZDMG* 26 811) finds in Ps. 14 the acrostic אַיֵּה הַשֵּׁם, 'where is God?']

a common editorial treatment distinguishing them from the rest of the Psalter. And they make up the mass of books ii. and iii., the remaining psalms, 84-89, appearing to be a sort of appendix.

iii. When we look at the Elōhīm psalms more closely, however, we see that they contain two distinct elements: Davidic psalms and psalms ascribed to the Levitical choirs (sons of Korah, Asaph).

The Davidic collection as we have it splits the Levitical psalms into two groups, and actually divides the Asaphic Ps. 50 from the main Asaphic collection 73-83. This order can hardly be original, especially as the Davidic Elōhīm psalms [practically 51-71] have a separate subscription (Ps. 72 20). But if we remove them we get a continuous body of Levitical Elōhīm psalms, or rather two collections, the first Korahitic [42-49] and the second Asaphic [50 73-83], to which there have been added by way of appendix by a non-Elohistic editor a supplementary group of Korahite psalms [84 *f.* 87 *f.*] and one psalm (certainly late) ascribed to David [86].

[This very attractive theory is due to Ewald, *Dichter des alten Bundes*(2), 1 249, who remarks that (1) the force of the subscription in 72 20[1] (which indicates that something quite different follows) now first becomes manifest, and (2) Ps. 42-49 50 73-80 are now placed in a natural juxtaposition.]

The formation of books iv. and v. is certainly later than the Elohistic redaction of books ii. and iii., for Ps. 108 is made up of two Elōhīm psalms (57 7-11 [8-12] 60 5-12 [7-14]) *in the Elohistic form*, though the last two books of the Psalter are generally Yahwistic.

iv. We can thus distinguish the following steps in the redaction:—(*a*) the formation of a Davidic collection (book i.) with a closing doxology; (*b*) a second Davidic collection (51-72) with doxology and subscription, and (*c*) a twofold Levitical collection (42-49, 50 73-83); (*d*) an Elohistic redaction and combination of (*b*) and (*c*); (*e*) the addition of a non-Elohistic supplement to (*d*) with a doxology; (*f*) a collection later than (*d*), consisting of books iv. v. Finally, the anonymous psalms 1 2, which as anonymous were hardly an original part of book i., may have been prefixed after the whole Psalter was completed. We see, too, that it is only in the latest collection (books iv. v.) that anonymity is the rule, and titles, especially titles with names, occur only sporadically. Elsewhere the titles run in series and correspond to the limits of older collections.

A process of collection which involves so many stages must plainly have taken a considerable time, and the question arises whether we can fix a limit for its beginning and end, or even assign a date for any one stage of the process.

8. Dates of collections.

i. *External evidence.*—An inferior limit for the final collection is given by the Septuagint translation. This translation itself, however, was not written all at once, and its history is obscure; we only know, from the prologue to Ecclesiasticus, that the Hagiographa, and doubtless, therefore, the Psalter, were read in Greek in Egypt about 130 B.C. or somewhat later.[2] And the Greek Psalter, though it contains one apocryphal psalm at the close, is essentially the same as the Hebrew; there is nothing to suggest that the Greek was first translated from a less complete Psalter and afterwards extended to agree with the extant Hebrew. It is, therefore, reasonable to hold that the Hebrew Psalter was completed and recognised as an authoritative collection long enough before 130 B.C. to allow of its passing to the Greek-speaking Jews in Alexandria. Beyond this the external evidence for the completion of the collection does not carry us.

It appears indeed from 1 Ch. 16 8-36 2 Ch. 6 41 42, that various psalms belonging to books iv. and v. were current in the time of the Chronicler,[3]—that is, towards the close of the Persian or

[1] [Ewald compares Job 31 40 Jer. 51 64, and Robertson Smith (*OTJC*(2), 196, n. 2) refers to a parallel subscription in the Dīwān of the Hodhalite poets (236 end), *tamma hādhā walillāhi 'l-ḥamdu*, etc., showing that the collection once ended at this point. Whether the words 'son of Jesse' always stood at the end of 72 20 has been doubted; see § 12 (*d*), end.]

[2] The text of the passage is obscure and in part corrupt; but the Latin 'cum multum temporis ibi fuissem' probably expresses the author's meaning. A friend has suggested to the writer that for συγχρονίσας we ought perhaps to read συχνὸν ἐγχρονίσας.

[3] [Duhm, however, regards the compilation in 1 Ch. 16 as the insertion of a later hand. Similarly, but in more cautious words, St. *GVI* 2 215, n. 2. See § 17.]

more probably in the earlier part of the Greek period. But it is not certain that the psalms he quotes (96 105 106 132) already existed in their place in our Psalter, or that Ps. 106 even existed in its present form.

ii. *Internal evidence.*—Turning now to internal evidence, we find the surest starting-point in the Levitical psalms of the Elohistic collection. These, as we have seen, form two groups, referred to the sons of Korah and to Asaph. At the beginning of the Greek period or somewhat later Asaph was taken to be a contemporary of David and chief of the singers of his time (Neh. 12 46), or one of the three chief singers belonging to the three great Levitical houses (1 Ch. 25 1 *f.*). The older history, however, knows nothing of an individual Asaph; at the time of the return from Babylon the guild of singers as a whole was called Bnē Asaph (Ezra 2 41), and so apparently it was in the time of Nehemiah (Neh. 11 22 Heb.).[1] The singers or Asaphites are at this time still distinguished from the Levites; the oldest attempt to incorporate them with that tribe appears in Ex. 6 24, where Abiasaph—that is, the eponym of the guild of Asaphites—is made one of the three sons of Korah. But when singers and Levites were fused the Asaphites ceased to be the only singers; and ultimately, as we see in Chronicles, they were distinguished from the Korahites and reckoned to Gershom (1 Ch. 6), while the head of the Korahites is Heman, as in the title of Ps. 88. It is only in the appendix to the Elohistic psalm-book that we find Heman and Ethan side by side with Asaph, as in the Chronicles, but the body of the collection distinguishes between two guilds of singers, Korahites and Asaphites, and is therefore as a collection younger than Nehemiah, but presumably older than Chronicles with its three guilds.

The contents of the Korahite and Asaphic psalms give no reason to doubt that they really were collected by or for these two guilds.

(*a*) Both groups are remarkable from the fact that they hardly contain any recognition of present sin on the part of the community of Jewish faith—though they do confess the sin of Israel in the past—but are exercised with the observation that prosperity does not follow righteousness either in the case of the individual (49 73) or in that of the nation, which suffers notwithstanding its loyalty to God, or even on account thereof (44 79). Now the rise of the problems of individual faith is the mark of the age that followed Jeremiah, whilst the confident assertion of national righteousness under misfortune is a characteristic mark of pious Judaism after Ezra, in the period of the law but not earlier. Malachi, Ezra, and Nehemiah, like Haggai and Zechariah, are still very far from holding that the sin of Israel lies all in the past.

(*b*) Again, a considerable number of these psalms (44 74 79 80) point to an historical situation which can be very definitely realised. They are post-exilic in their whole tone, and belong to a time when prophecy had ceased and the synagogue worship was fully established (74 8 *f.*). But the Jews are no longer the obedient slaves of Persia; there has been a national rising and armies have gone forth to battle. Yet God has not gone forth with them: the heathen have been victorious, blood has flowed like water round Jerusalem, the temple has been defiled, and these disasters assume the character of a religious persecution.

These details would fit the time of religious persecution under Antiochus Epiphanes, to which indeed Ps. 74 is referred (as a prophecy) in 1 Macc. 7 16. But against this reference there is the objection that these psalms are written in a time of the deepest dejection and yet are psalms of the temple choirs. Now when the temple was reopened for worship after its profanation by Antiochus, the Jews were victorious and a much more joyous tone was appropriate. Besides, if the psalms are of the Maccabee period, they can have been no original part of the Elohistic psalm-book, which certainly was not collected so late. But there is one and only one time in the Persian period to which they can be referred, viz., that of the great civil wars under Artaxerxes III. Ochus (middle of 4th cent. B.C.). The Jews were involved in these and were severely chastised, and we know from Josephus that the temple was defiled by the Persians and humiliating conditions attached to the worship there. It would appear that to the Jews the struggle took a theocratic aspect, and it is not impossible that the hopeful beginnings of a national movement, which proved in the issue so disastrous, are reflected in some of the other pieces of the collection.[1]

(*c*) All this carries the collection of the *Elohistic psalm-book* down to quite the *last years of the Persian period* at the earliest, and with this it agrees—to name but one other point—that the view of Israel's past history taken in Ps. 78, where the final rejection of the house of Joseph is co-ordinated with the fall of Shiloh and the rise of Zion and the Davidic kingdom, indicates a standpoint very near to that of Chronicles. The fusion of the separate Korahite and Asaphic psalm-books in a single collection along with the second group of Davidic psalms may very probably be connected with the remodelling of the singers in three choirs which Chronicles presupposes.

(*d*) Now books iv. and v. are, as we have seen, later than the Elohistic redaction of books ii. and iii., so that the collection of the *last part of the Psalter* must, if our argument up to this point is sound, be thrown into *the Greek period*, and probably not the earliest part thereof.

This conclusion (§ 8 *d*) is borne out by a variety of indications.

9. Confirmations of result so far.

i. First of all, the language of some of these psalms clearly points to a very late date indeed.[2] The Jews had even in the time of Nehemiah (Neh. 13 24) been in danger of forgetting their own tongue and adopting a jargon compounded with neighbouring idioms; but the restorers of the law fought against this tendency with vigour, and with so much success that very tolerable Hebrew was written for at least a century longer. But in such a psalm as 139 the language is a real jargon,[3] a mixture of Hebrew and Aramaic, which, in a hymn accepted for use in the temple, shows the Hebrew speech to have reached the last stage of decay.

ii. Again, though no part of the Psalter shows clearer marks of a liturgical purpose, we find that in books iv. and v. the musical titles [if we may follow the majority and admit, comparing Duhm, *Psalmen*, 'Einl.,' 30 *f.*, that there are musical titles] have entirely disappeared. The technical terms, that is, of the temple music which are still recognised by the Chronicler[4] have gone out of use, presumably because they were already become unintelligible, as they were when the Septuagint version was made. This implies a revolution in the national music which we can hardly explain in any other way than by the influence of that Hellenic culture which, from the time

[1] The threefold division of the singers appears in the same list according to the Hebrew text of *v.* 17; but the occurrence of Jeduthun as a proper name instead of a musical note is suspicious, and makes the text of 𝔊BNA [which suggests a twofold division; see GENEALOGIES, § 7, ii. (*a*), n. 3, but cp § 26 (*c*), end] preferable. The first clear trace of the triple choir is, therefore, in Neh. 12 24—*i.e.*, not earlier than Alexander the Great, with whom Jaddua (*v.* 22) was contemporary. [See EZRA-NEHEMIAH, § 11; NEHEMIAH, § 1.]

[1] Ps. 83, in which Judah is threatened by the neighbouring states acting with the support rather than under the guidance of Asshur (the satrap of Syria?), is also much more easily understood under the loose rule of Persia than under the Greeks, and the association of Tyre with Philistia (as in 87 4) agrees with Pseudo-Scylax (see *EB*(9) 18 809), who makes Ascalon a Tyrian possession. If this psalm has a definite historical background, which De Wette and Hupfeld doubt, it must be later than the destruction of Sidon by Ochus, which restored to Tyre its old pre-eminence in Phœnicia.

[2] For details as to the linguistic phenomena of the Psalms, see especially Giesebrecht in Stade's *Zeitschr.*, 1881, p. 276 *f.* The objections of Driver (*Journ. of Phil.* 11 233) do not touch the argument that such psalms as 139 [at least if MT is correct] belong to the very latest stage of biblical Hebrew. [See also Cheyne, *OPs.*, Appendix ii., where, however, as also in Giesebrecht's and Driver's essays, due account is not taken of the uncertainty of MT.]

[3] [So again in *OTJC*(2) 208. But in arrest of judgment see *Ps.*(2), where it is maintained that there is much corruptness in the traditional text.]

[4] [So according to MT of 1 Ch. 15 20 *f.* (RV, 'set to Alamoth,' 'set to the Sheminith'); but see § 26 (*bb*), and SHEMINITH.]

of the Macedonian conquest, began to work such changes on the whole civilisation and art of the East. Cp MUSIC, § 12.

iii. Once more, the general tone of large parts of this collection is much more cheerful than that of the Elohistic psalm-book [42-83].

It begins with a psalm (90) ascribed in the title to Moses, and seemingly designed to express feelings appropriate to a situation analogous to that of the Israelites when, after the weary march through the wilderness, they stood on the borders of the promised land. It looks back on a time of great trouble and forward to a brighter future. In some of the following psalms there are still references to deeds of oppression and violence; but more generally Israel appears as happy under the law, with such a happiness as it did enjoy under the Ptolemies during the third century B.C. The problems of divine justice are no longer burning questions; the righteousness of God is seen in the peaceful felicity of the pious (91 92 etc.). Israel, indeed, is still scattered and not triumphant over the heathen; but even in the dispersion the Jews are under a mild rule (106 46), and the commercial activity of the nation has begun to develop beyond the seas (107 23 *f.*).

The whole situation and vein of piety here are strikingly parallel to those shown in Ecclesiasticus, which dates from the close of the Ptolemaic sovereignty in Palestine. But some of the psalms carry us beyond this peaceful period to a time of struggle and victory.

In Ps. 118 Israel, led by the house of Aaron—this is a notable point—has emerged triumphant from a desperate conflict and celebrates at the temple a great day of rejoicing for the unhoped-for victory; in Ps. 149 the saints are pictured with the praises of God in their throat and a sharp sword in their hands to take vengeance on the heathen, to bind their kings and nobles, and exercise against them the judgment written in prophecy.

Such an enthusiasm of militant piety, plainly based on actual successes of Israel and the house of Aaron, can only be referred to the first victories of the Maccabees, culminating in the purification of the temple in 165 B.C. This restoration of the worship of the national sanctuary under circumstances that inspired religious feelings very different from those of any other generation since the return from Babylon, might most naturally be followed by an extension of the temple psalmody; it certainly was followed by some liturgical innovations, for the solemn service of dedication on the twenty-fifth day of Chislev was made the pattern of a new annual feast (that mentioned in Jn. 10 22). Now in 1 Macc. 4 54 we learn that the dedication was celebrated with hymns and music. In later times the psalms for the encænia, or feast of dedication, embraced Pss. 30 and 113-118 (the so-called HALLEL). There is no reason to doubt that these were the very psalms sung in 165 B.C., for in the title of Ps. 30 the words 'the song for the dedication of the house' (שִׁיר־חֲנֻכַּת הַבַּיִת) which are a somewhat awkward insertion in the original title, are found also in 𝔊 (*ψ. ᾠδῆς τοῦ ἐγκαινισμοῦ τοῦ οἴκου*), and therefore are probable evidence of the liturgical use of the psalm in the very first years of the feast (cp, however, § 24). But no collection of old psalms could fully suffice for such an occasion, and there is every reason to think that the *hallēl*, which, especially in its closing part, contains allusions that fit no other time so well, was first arranged for the same ceremony. The course of the subsequent history makes it very intelligible that the Psalter was finally closed, as we have seen from the date of the Greek version that it must have been, within a few years at most after this great event.[1] From the time of Hyrcanus downwards the ideal of the princely high priests becomes more and more divergent from the ideal of the pious in Israel, and in the Psalter of Solomon (§ 41 *f.*) we see religious poetry turned against the lords of the temple and its worship. [Besides the more recent commentaries, cp Riedel's article, *ZATW* 19 (1899) 169 *ff.* The question of the date of the final redaction will be treated more decisively when the text and the grouping of the psalms has been examined more thoroughly.]

All this does not, of course, imply that there are not in books iv. and v. any pieces older than the completion of books ii. and iii. (§ 8 *d*), for the composition of a poem and its acceptance as part of the Levitical liturgy are not necessarily coincident in date, except in psalms written with a direct liturgical purpose. In the fifteen [so-called] 'songs of degrees' (Pss. 120-134) we have a case in point.

10. Older poems included?

According to the Mishna (*Middōth*, 2 5) and other Jewish traditions [see Delitzsch and Grätz] these psalms were sung by the Levites at the Feast of Tabernacles on the fifteen steps or degrees that led from the women's to the men's court. But when we look at the psalms themselves we see that they must originally have been a hymn-book, not for the Levites, but for the laity who came up to Jerusalem at the great pilgrimage feasts; and the title of this hymn-book (which can be restored from the titles derived from it that were prefixed to each song when they were taken into the Levitical connection) was simply 'Pilgrimage Songs.'[1]

All these songs are plainly later than the exile; but some of them cannot well be so late as the formation of the Elohistic psalm-book.

The simple reason why they are not included in it is that they were hymns of the laity, describing with much beauty and depth of feeling the emotions of the pilgrim when his feet stood within the gates of Jerusalem, when he looked forth on the encircling hills, when he felt how good it was to be camping side by side with his brethren on the slopes of Zion[2] (133), when a sense of Yahwè's forgiving grace and the certainty of the redemption of Israel triumphed over all the evils of the present and filled his soul with humble and patient hope.

The titles which ascribe four of the pilgrimage songs to David and one to Solomon are lacking in the true 𝔊, and inconsistent with the contents of the psalms. [In Ps. 122 the title seems to have been suggested by *v.* 5, the true rendering of which is, 'for there were set thrones of judgment, the thrones of the house of David.'[3]]

[Of the titles of other pieces in book v.] the name of Moses in Ps. 90 and that of David in Pss. 101 103 108-110 138-145 are better attested, because found in 𝔊 as well as in the Hebrew, and therefore probably as old as the collection itself. But where did the last collectors of the Psalms find such very ancient pieces which had been passed over by all previous collectors, and what criterion was there to establish their genuineness? No canon of literary criticism can treat as valuable external evidence an attestation which first appears so many centuries after the supposed date of the poems, especially when it is confronted by facts so conclusive as that Ps. 108 is made up of extracts from Pss. 57 and 60, and that Ps. 139 is marked by its language as one of the latest pieces in the book. The only possible question for the critic is whether the ascription of these psalms to David was due to the idea that he was the psalmist *par excellence*, to whom any poem of unknown origin was naturally ascribed, or whether we have in some at least of these titles an example of the habit so common in later Jewish literature of writing in the name of ancient worthies. In the case of Ps. 90 it can hardly be doubted that this is the real explanation, and the same account must be given of the title in Ps. 145, if, as seems probable, it is meant to cover the whole of the great *hallēl* or *tĕhillah* (Pss. 145-150), which must, from the allusions in Ps. 149, as well as from its place, be almost if not quite the latest thing in the Psalter.

For the later stages of the history of the Psalter we have, as has been seen (§ 8 *f.*), a fair amount of circumstantial evidence pointing to conclusions of a pretty definite kind. The approximate dates which their contents suggest for the collection of the Elohistic psalm-book [42-83] and of books iv. and v. confirm one another, and are in harmony with such indications as we obtain from external sources. But, in order to advance from the conclusions already reached

11. Books i. *f.*: 'Davidic' psalms.

1 Possibly under Simon; compare the other *hallel* (Ps. 146-150) with 1 Macc. 13 50 *f.* [See also *OPs.* 11 *f.*; Peters, *New World*, June 1893, p. 298.]

1 שיר המעלות (מעלה as in Ezra 7 9) seems to be properly a plural [meaning, 'the songs of Pilgrimage'] like בית האבות. [Cp, however, § 12 (*d*).]

2 [For the writer's interesting explanation of 133 2 *f.* see *OTJC*(2), 212, note.]

3 *OTJC*(2), 213.

to a view of the history of the Psalter as a whole, we have still to consider the two great groups of psalms ascribed to David in books i. and ii. Both these groups appear once to have formed separate collections and in their separate form to have been ascribed to David; for in book i. every psalm, except the ntroductory poems Ps. 1 *f.* and the late Ps. 33, which may have been added as a liturgical sequel to Ps. 32, bears the title 'of David,' and in like manner the group Pss. 51-72, though it contains a few anonymous pieces and one psalm which is either 'of' or rather, according to the oldest tradition, 'for Solomon' (cp § 12, *ad init.*), is essentially a Davidic hymn-book, which has been taken over as a whole into the Elohistic Psalter, even the subscription 72 20 not being omitted. Moreover, the collectors of books i.-iii. knew of no Davidic psalms outside of these two collections, for Ps. 86 in the appendix to the Elohistic collection is merely a cento of quotations from Davidic pieces with a verse or two from Exodus and Jeremiah. These two groups [3-41 51-72], therefore, represented to the collectors the oldest tradition of Hebrew psalmody; they are either really Davidic or they passed as such.

This fact is important; but its weight may readily be over-estimated, for the Levitical psalms comprise poems of the last half-century of the Persian empire, and the final collection of books ii. and iii. may fall a good deal later. Thus the tradition that David is the author of these two collections comes to us, not exactly from the time of the Chronicler, but certainly from the time when the view of Hebrew history which he expresses was in the course of formation. It is not too much to say that that view—which to some extent appears in the historical psalms of the Elohistic Psalter [42-83]—implies absolute incapacity to understand the difference between old Israel and later Judaism, and makes almost anything possible in the way of the ascription of comparatively modern pieces to ancient authors.

Nor will it avail to say that this uncritical age did not ascribe the psalms to David but accepted them on the ground of older titles, for it is hardly likely that each psalm in the Davidic collections had a title before it was transferred to the larger Psalter; and in any case the titles are manifestly the product of the same uncritical spirit as we have just been speaking of, for not only are many of the titles certainly wrong, but they are wrong in such a way as to prove that they date from an age to which David was merely the abstract psalmist, and which had no idea whatever of the historical conditions of his age. [But cp § 45.]

(*a*) For example, Pss. 20 *f.* are not spoken by a king, but addressed to a king by his people; Pss. 5 27 allude to the temple (which did not exist in David's time), and the author of the latter psalm desires to live there continually. Even in the older Davidic psalm-book [3-41] there is a whole series of hymns in which the writer identifies himself with the poor and needy, the righteous people of God suffering in silence at the hands of the wicked, without other hope than patiently to wait for the interposition of Yahwè (Pss. 12 25 37 *f.* etc.). Nothing can be farther removed than this from any possible situation in the life of the David of the books of Samuel; and (*b*) the case is still worse in the second Davidic collection [51-72], especially where we have in the titles definite notes as to the historical occasion on which the poems are supposed to have been written. To refer Ps. 53 to Doeg, Ps. 54 to the Ziphites, Ps. 59 to David when watched in his house by Saul, implies an absolute lack of the very elements of historical judgment. Even the bare names of the old history were no longer correctly known when Abimelech (the Philistine king in the stories of Abraham and Isaac) could be substituted in the title of Ps. 34 for Achish, king of Gath.

In a word, the ascription of these two collections to David has none of the characters of a genuine historical tradition. [On the whole question cp § 25.]

At the same time it is clear that the two [Davidic] collections do not stand on quite the same footing. The Elohistic redaction—the change in the names of God—extends only to the second [51-72]. Now the formation of the Elohistic Psalter [42-83] must have been an official act directed to the consolidation of the liturgical material of the temple, and if it left one of the so-called Davidic collections untouched the reason must have been that this collection had already a fixed liturgical position. In other words, book i. is the oldest extant liturgy of the second temple, whilst there is no evidence that the Davidic psalms of book ii. had a fixed liturgical place till at least the close of the Persian period.

And now the question arises: May we suppose that the oldest liturgy of the second temple was also the liturgy of the temple of Solomon?

12. Book i. not pre-exilic.

i. We have it in evidence that music and song accompanied the worship of the great sanctuaries of northern Israel in the eighth century B.C. (Am. 5 23); but from the context it appears probable that the musicians were not officers of the temple, but rather the worshippers at large (cp Am. 6 5). So it certainly was in the days of David (2 S. 6 5) and even of Isaiah (30 29 [but 30 27-33 may be a later insertion, see ISAIAH (BOOK), § 12 *b*]); the same thing is implied in the song of Hezekiah (Is. 38 20); and in Lam. 2 7 the noise within the sanctuary on a feast-day which affords a simile for the shouts of the victorious Chaldæans suggests rather the untrained efforts of the congregation than the disciplined music of a temple choir. The allusion to 'chambers of singers' in Ezek. 40 44 is not found in the text of 𝔊, which is justified by the context,[1] and the first certain allusion to a class of singers belonging to the sacred ministers is at the return from Babylon (Ezra 2 41). The way in which these singers, the sons of Asaph, are spoken of may be taken as evidence that there was a guild of temple singers before the exile; but they cannot have been very conspicuous or we should have heard more of them.

ii. The historical books, as edited in the captivity, are fond of varying the narrative by the insertion of lyrical pieces, and one or two of these—the 'passover song' (Ex. 15) and perhaps the song from the book of Jashar ascribed to Solomon (see *OTJC*(2), 434; JASHER, BOOK OF, § 3)—look as if they were sung in the first temple; but they are not found in the Psalter, and, conversely, no piece from the Psalter is used to illustrate the life of David except Ps. 18, and it occurs in a section which can be shown to be an interpolation in the original form of 2 S.

iii. These facts seem to indicate that even book i. of the Psalter did not exist when the editing of the historical books was completed, and that in music as in other matters the ritual of the second temple was completely reconstructed. Indeed, the radical change in the religious life of the nation caused by the captivity could not fail to influence the psalmody of the sanctuary more than any other part of the worship.

(*a*) The book of Lamentations marks an era of profound importance in the religious poetry of Israel, and no collection formed before these dirges were first sung could have been an adequate hymn-book for the second temple. In point of fact, the notes struck in the LAMENTATIONS (*q.v.*) and in Is. 40-66 meet our ears again in not a few psalms of book i., *e.g.*, Ps. 22 25, where the closing prayer for the redemption of Israel in a verse additional to the acrostic perhaps gives, as Lagarde suggests (*Symmicta*, 1 107), the characteristic post-exile name Pedael as that of the author;[2] Ps. 31, with many points of resemblance to Jeremiah; Ps. 34 *f.* where the 'servant of Yahwè'[3] is the same collective idea as in Deutero-Isaiah; and Pss. 38 41. The key to many of these psalms is that the singer is not an individual but, as in Lam. 3, the true people of God represented as one person; and only in this way can we do justice to expressions which have always been a stumbling-block to those who regard David as the author.

(*b*) At the same time, other psalms of the collection treat the problems of individual religion in the line of thought first opened by Jeremiah. Such a psalm is 39, and above all Ps. 16. Other pieces, indeed, may well be earlier. When we compare Ps. 8 with Job 7 17 *f.* (on the text of which cp JOB (BOOK), § 5), we

1 [For שרים, 'singers,' read שְׁנַיִם, 'two,' with Hitz., Smend, etc.; point לְשָׁכוֹת.]

2 [Lagarde makes a similar suggestion for Ps. 34, where the additional verse begins with פּוֹדֶה יהוה. See Rahlfs, עני *und* ענו *in den Psalmen*, 41, and cp PEDAIAH.]

3 [This involves reading in 34 22 עַבְדּוֹ for עֲבָדָיו.]

can hardly doubt that the psalm lay before the writer who gave its expressions so bitter a turn in the anguish of his soul, and Ps. 20 *f.* plainly belong to the old kingdom. But on the whole it is not the pre-exilic pieces that give the tone to the collection.

Whatever the date of this or that individual poem, the collection as a whole—whether by selection or authorship—is adapted to express a religious life of which the exile is the presupposition. Only in this way can we understand the conflict and triumph of spiritual faith, habitually represented as the faith of a poor and struggling band living in the midst of oppressors and with no strength or help save the consciousness of loyalty to Yahwè, which is the fundamental note of the whole book.

Whether any of the older poems really are David's is a question more curious than important, as, at least, there is none which we can fit with certainty into any part of his life. If we were sure that 2 S. 22 was in any sense part of the old tradition of David's life, there would be every reason to answer the question in the affirmative, as has been done by Ewald; but the grave doubts that exist on this point throw the whole question into the region of mere conjecture.

[Driver remarks (*Introd.*(6), 380), 'The generality of 2 S. 22 1 detracts considerably from its value: there was no "day" on which Yahwè delivered David "out of the hand of Saul." Contrast 2 S. 1 17.']

The contents of book i. make it little probable that it was originally collected by the temple ministers, whose hymn-book it ultimately became. The singers and Levites were ill provided for, and consequently irregular in their attendance at the temple, till the time of Nehemiah, who made it his business to settle the revenues of the clergy in such a way as to make regular service possible. With regular service a regular liturgy would be required, and in the absence of direct evidence it may be conjectured that the adoption of the first part of the Psalter for this purpose took place in connection with the other far-reaching reforms of Ezra and Nehemiah, which first gave a stable character to the community of the second temple. In any case these psalms, full as they are of spiritual elements which can never cease to be the model of true worship, are the necessary complement of the law as published by Ezra, and must be always taken along with it by those who would understand what Judaism in its early days really was, and how it prepared the way for the gospel.

13. Date of second Davidic collection.

The second Davidic collection, which begins with a psalm of the exile (Ps. 51; see the last two verses), contains some pieces which carry us down to a date decidedly later than that of Nehemiah. Thus Ps. 68 27 represents the worshipping congregation as drawn partly from the neighbourhood of Jerusalem and partly from the colony of Galilee [so Wellhausen]. In several psalms of this collection, as in the Levitical psalms with which it is coupled, we see that the Jews have again begun to feel themselves a nation, not a mere municipality, though they are still passing through bitter struggles; and side by side with this there is a development of Messianic hope, which in Ps. 72 takes a wide sweep, based on the vision of Deutero-Isaiah. All these marks carry us down for this as for the other collections of the Elohistic Psalter [42-83] to the time when passive obedience to the Achæmenians was interrupted. Several points indicate that the collection was not originally formed as part of the temple liturgy. The title, as preserved in the subscription to Ps. 72 20, was not 'Psalms' [though 𝔊 gives ὕμνοι = תְּהִלּוֹת[1]] but 'Prayers of David.' Again, while the Levitical psalms were sung in the name of righteous Israel, of which, according to the theory of the second temple, the priestly and Levitical circles were the special holy representatives, these Davidic psalms contain touching expressions of contrition and confession (51 65). And, while there are direct references to the temple service, these are often made from the standpoint, not of the ministers of the temple, but of the laity who come up to join in the solemn feasts or appear before the altar to fulfil their vows (Ps. 54 6 55 14 63 66 13, etc.). Moreover, the didactic element so prominent in the Levitical psalms is not found here.

[1] [Grätz and T. K. Abbott accept this reading.]

14. Why called Davidic.

Such is the fragmentary and conjectural outline which it seems possible to supply of the history of the two Davidic collections, from which it appears that the name of David which they bear is at least so far appropriate as it marks the generally non-clerical origin of these poems. The positive origin of this title must be sought in another direction and in connection with book i. From the days of Amos, and in full accordance with the older history, the name of David had been connected with musical skill and even the invention of musical instruments (Amos 6 5 [but cp DAVID, § 13, n. 3, col. 1034]). In the days of Nehemiah, though we do not hear of psalms of David,[1] we do learn that instruments of the singers were designated as Davidic, and the epithet 'man of God' (Neh. 12 36) probably implies that, agreeably with this, David was already regarded as having furnished psalms as well as instruments. But it was because the temple music was ascribed to him that the oldest liturgy came to be known in its totality as 'Psalms of David,' and the same name was extended to the lay collection of 'Prayers of David,' while the psalms whose origin was known because they had always been temple psalms were simply named from the Levitical choirs, or at a later date had no title.

[At the close of his monograph on the Titles of the Psalms according to early Jewish authorities (*Studia Biblica*, 2 57) Neubauer writes thus:—

15. Technical terms in titles.

'From all these different expositions of the titles of the Psalms it is evident that the meaning of them was early lost; in fact, the LXX and the other early Greek and Latin translators offer no satisfactory explanation of most of them. Of the best Jewish commentators like Ibn Ezra and David Kimḥi, the former treats them as the opening words of popular melodies, the other as names of instruments, both confessing that the real meanings are unknown. Saadyah is no more successful; the Karaitic writers refer them mostly to the present exile, which is more Midrashic than the Midrash upon which the Targum is based. Immanuel [of Rome, the friend of Dante] and Remokh [of Barcelona] put Averroism in them and in the Psalms. The Syriac headings are a comparatively late production and arbitrary. Thus, when all traditional matter is exhausted, the only remaining resource is the critical method, which, however, on the present subject has as yet made no considerable progress' (see § 26).

On musical notes like Neginoth, Sheminith, etc., no suggestion is offered either in the *EB* article on the Psalms or in *OTJC*(2). On one point, however, the writer had reached a definite opinion (cp *OTJC*(2) 209), viz., that a number of the psalms were set to melodies named after popular songs,[2] and that of one of these songs, beginning אַל־תַּשְׁחֵת (see titles of Pss. 57 58), a trace is still preserved in Is. 65 8 (see *OTJC*(2), 209, and cp AL-TASCHITH).]

16. Use of psalms in temple.

From this [interesting feature in some of the musical titles] we may infer that the early religious melody of Israel had a popular origin, and was closely connected with the old joyous life of the nation. From the accounts of the musical services of the Levites in Chronicles no clear picture can be obtained or any certainty as to the technical terms used [cp Neubauer, as above, § 15]. From Theophrastus (ap. Porph., *De Abstin.* 2 26)—perhaps the first Greek to make observations on the Jews—we may at least gain an illustration of the original liturgical use of Pss. 8 134. He speaks of the worshippers as passing the night in gazing at the stars and calling on God in prayer, words suggestive rather than strictly accurate. Some of the Jewish traditions as to the use

[1] *I.e.*, not in the parts of the book of Nehemiah which are by Nehemiah himself.

[2] Compare the similar way of citing melodies with the prep. *'al* or *'al ḳālā*, etc., in Syriac (Land, *Anecd.*, 4; Ephr. Syr., *Hymni*, ed. Lamy). [Cp *OTJC*(2) *l.c.*]

of particular psalms have been already cited; it may be added that the Mishna (*Tāmīd* 7 3) assigns to the service of the continual burnt-offering the following weekly cycle of psalms,—(1) 24, (2) 48, (3) 82, (4) 94, (5) 81, (6) 93, (Sabbath) 92, as in the title. [Cp Neubauer, *op. cit.*, p. 4; Herzfeld, *GVI* 3 163 Grätz, *MGWJ* 27 217 *ff.* The notice in the Mishna is in the main confirmed by the LXX, which for most of these psalms mentions the appointed day of the week in the title; the exceptions are 82 and 81. It is remarkable that in the Hebrew text only the psalm for the Sabbath is indicated, which may confirm the view mentioned below (§ 26 [26]) that ליום השבת is a corruption of לשמינית—*i.e.*, perhaps לאיתנים 'of the Ethanites.'] Many other details are given in the treatise *Sōphèrīm;* but these for the most part refer primarily to the synagogue service after the destruction of the temple. For details on the liturgical use of the Psalter in Christendom the reader may refer to Smith's *Dict. Chr. Ant.*, *s.v.* 'Psalmody.' W. R. S.

II. SURVEY OF RECENT CRITICISM

17. Recent criticism.

If Kautzsch's statement of the case in his *Outline of the History of the Literature of the OT* (1898, with which some pages from his pen in *Th. Stud. u. Krit.* 1891, pp. 577 *ff.*, may be compared) is correct, no very striking progress has been made in the criticism of the Psalter since the first publication of Robertson Smith's article. That there are some pre-exilic pieces in the collection, though none that can plausibly be shown to be Davidic, was stated in 1886 in this article, and Prof. Kautzsch does little more than restate it. These are his words, as given by the translator of his excellent work (p. 143):—

'Our present Psalter in all probability contains a fair number of pre-exilic songs or fragments of songs. To say nothing of the so-called Royal Psalms, 20 21 45, which can only be understood as songs from before the exile, or of the manifold traces of antique phraseology, *one* circumstance in particular supports this. Such energetic denial of the necessity of the sacrificial ritual as is found in 40 7 [6] 50 8 *ff.* and 51 18 [16] *f.* (softened down with much trouble by the liturgical addition, *v.* 20 [18] *f.*) could not have found its way into the temple hymn-book till the psalms which contain it had long been clothed with a kind of canonical dignity' (p. 143).

Elsewhere (p. 145 *f.*) Kautzsch admits isolated Maccabæan psalms in the second collection (Pss. 42-89) and a larger number in the third (Pss. 90-150). He makes no reference, however, to the existence of an imperfectly solved problem, and here Robertson Smith's article is superior to the *Outline*.

It must be admitted that several of the best-known scholars agree on the main point (pre-exilic psalms) with Kautzsch. Thus König (*Einl.* 401 *ff.*) recognises the Davidic origin[1] of some psalms as historically probable (!), and as careful a scholar, Driver (*Introd.*[6] 380, 384 *ff.*), recognises certain pre-exilic psalms, beginning with 2 18 20 21, and ending with 101 110. Among American scholars we find J. P. Peters expressing the opinion[2] that not only Ps. 20 21, but even 'perhaps the greater part' of book i. of the Psalms, is pre-exilic, and that some at least of the psalms of the Korahite and Asaphite collections are *based* on old Israelite originals, Pss. 42 and 46 being ultimately derived from the N. Israelitish temple of Dan, and Pss. 77*b* 80 and 81 from that of Bethel (!). Dr. Peters is also of opinion that Davidic psalms, edited, adapted, added to, and subtracted from, and therefore hardly to be identified, survive in our Psalter.

Kirkpatrick[3] represents a less original type of

[1] When König states that *OPs.* 193 *f.* 205 admits a Davidic element in Ps. 18 he is evidently under a misunderstanding, as will appear from the phrases in *OPs.* ('inspired by the teaching of the higher prophets'; 'inconsistent with Davidic authorship.')

[2] *New World*, June 1893, pp. 303 *f.*

[3] *Divine Library of the OT* (1891), 150-152; *Book of Psalms* (1891-1895), Introd. xxxii *f.*; also pp. 14, 20, 73, etc.

traditionalism. In his commentary he repeatedly speaks of more or less probable, or even certain, Davidic psalms. Elsewhere he refers for pre-exilic psalms in the first place to the royal psalms, and to the psalms of praise for the deliverance of Jerusalem (46 48 75 76), which can 'securely (?) be claimed for the age of the kingdom,' and which 'may carry many others with them,' also to the phrase 'the sweet psalmist (!) of Israel,' which he accepts as the true meaning of 2 S. 23 1*e*,[1] and to the improbability (?) that late psalmists could write fairly good Hebrew.

Budde is more cautious. He expresses the view (1892) that many pre-exilic elements must have passed 'into the flesh and blood of the post-exilic temple-poetry,' though he says that he does not feel at all bound to indicate them,[2] and (1899) that many psalms 'were the expression of such a relation (viz., of blissful intercourse with God) before the community ever appropriated them.'[3]

Wildeboer (*Letterkunde*[1] [1893], 306) says: 'Though it is not possible to tell with certainty which psalms are pre-exilic, and what form they originally had, it is most probable that, especially out of the oldest of the collections which form the foundation of our Psalter, some have been transferred to our Psalter.'

Such are the judgments of the chief critics who support Kautzsch. One of them, however (Budde), gives him only a qualified assent, and it may now be added that Wellhausen, 'the William Tell of critics,' makes up by his consistency for the hesitation of some of his colleagues. In the notes to the English version of the psalms in *SBOT* (1898), this eminent scholar repeats the substance of a sentence which he inserted in Bleek's *Einleitung in das AT*[4], in these emphatic words:—

'It is not a question whether there be any post-exilic psalms, but rather, whether the psalms contain any poems written before the exile. The strong family likeness which runs through the Psalms forbids our distributing them among periods of Israelitish history widely separated in time and fundamentally unlike in character' (163).

Duhm, too, in a work to which no one can deny the merit of acuteness (*Psalmen*, 1899), has altogether broken with the critical hypothesis of pre-exilic psalms; and so too has the present writer, who in 1891 only with some hesitation admitted Ps. 18 to be late pre-exilic—a concession long since retracted, though in 1896 he held it to be not impossible 'that some of the psalms (in an earlier form) were written in Babylonia before the Return—*i.e.*, between 538 and 432, the date of the return of the Golah, according to Kosters.'[4]

At the same time, it is only too plain that even the advanced criticism represented by Wellhausen and Duhm is to a large extent only provisional. Negatively, the position of these scholars may rightly seem to them secure; but positively, they would be the first to admit that often they do but see in twilight. Duhm, for instance, whose criticism of the text is often so unmethodical, cannot feel equal confidence about all the

[1] Can it be probable that the composition of sweet songs for Israel's use would be made parallel to the having received the sacred unction as king? Even if we read זִמְרַת (Ges.-Bu., W. R. Smith ?), and rendered 'the sweet musician of Israel,' we should only gain a parallelism (not phraseological) with 1 S. 16 16; there would still be no parallelism with 2 S. 23 1*d*. 'The favourite of the songs of Israel' (Klost., Kittel) is syntactically easier, but still not parallel to *d*. 𝔊BA seems to have found a difficulty in נעים (εὐπρεπεῖς ψαλμοὶ Ἰσραηλ). The parallel opening of Balaam's third and fourth oracles suggests שֹׁמֵעַ אִמְרֵי אֵל, and this would fit in well with *v.* 2.

[2] *TLZ*, May 14, 1892, col. 252. In *Exp. T.* 12 (1901) 288 he says that, in his opinion, 'the majority of the psalms will have passed through a whole series of phases before reaching their present form.' This opens the door to a large acceptance of pre-exilic elements, and seems an exaggeration; at least, the evidence adduced in Budde's discussion of Pss. 14 and 53 seems hardly to warrant the hypothesis, so far as this psalm in its twofold form is concerned.

[3] *Religion of Israel to the Exile*, 198.

[4] 'The Book of Psalms,' etc., in *Semitic Studies in Memory of A. Kohut* (1897), p. 115. Date of essay, 1896.

details of his system. According to him, the oldest psalm, among those which have a clearly defined date, is 137, which has been adapted from a popular song, written during the Babylonian exile. Yet, strange to say, Duhm cannot mention any psalm which specially suggests the Persian period for its composition. On the other hand he assigns not a few psalms to the pre-Maccabæan Greek period—viz., 3 4 11 16 42-43 (23 27*a*?) 46 48 51 (?) 52 62 76 87 (?); to the Maccabæan struggle, 12 (?) 13 (?) 24*c* (?) 35 44 55 69*a* 74 77 79 83 118 149; to the time of the Asmonæan high priests, 60*a* 66*a* 60*b* 85 99 101 110 1-4; 2 18 (144*a* and *b*), 20 21 45 61 63 68 72 84*b* 89 132, and a large number of psalms, including 9 10 14 56 57 58 59 64 82 92 94 140 (psalms which, he thinks, show a remarkable resemblance to the 'Psalms of Solomon') to the Pharisees as opponents of the Asmonæans. This goes far beyond the views of Wellhausen ('Psalms,' *SBOT*, 1898), and those enunciated by the present writer in 1891 (*Origin of the Psalter*).

Evidently the criticism of the psalms is still only in a vigorous youth. There are still some critics who hold pre-exilic and even Davidic elements in the Psalter to be possible or even probable, and while Budde,[1] Briggs,[2] and Oort[3] have expressed considerable scepticism as to the feasibleness of dating individual psalms, the present writer in 1891 and Duhm quite recently have thought it to be often possible as well as desirable to search for a probable historical setting of psalms, many of the psalms being clearly the offspring of moods produced by definite historical circumstances. As to Maccabæan psalms, which are certainly by no means inconceivable,[4] whilst König (*Einl.* 403) can only see his way to recognise one Maccabæan psalm—viz., 74—many (*e.g.*, Baethgen, Kautzsch, and Cornill) declare that, at any rate, Pss. 44 74 79 and 83 must be early Maccabæan,[5] and Merx (*Festschrift zu Ehren von D. Chwolson*, 1899, pp. 198 *ff.*) undertakes to show that even in book i. there are manifest traces of Maccabæan transformation of earlier psalms, whilst Ps. 2 itself is of the very latest period. Driver (p. 385) appears to stand nearer to Kautzsch than to König; the only member of the group of four psalms which he omits is Ps. 44,[6] but he allows (p. 389) the attractiveness of Robertson Smith's Ochus-theory (§ 23). It is difficult, however, to separate Ps. 44 from Pss. 74, 79, and 83, though certainly there are excellent grounds for questioning its unity. If we accept MT as substantially correct (against which see § 28), it would seem that we must either, with Robertson Smith, assign 44 (or rather 44*b*), 74 (or rather 74*a*), 79 and 83, to the time of Artaxerxes III. Ochus, or (since the evidence for that king's oppression of the Jews is defective [see § 23]) follow the majority of critics and make them Maccabæan. To the latter course Prof. Schechter would object that the parallelisms between Ps. 44 18 [19] and Ecclus. 46 11*c* and between Ps. 74 10 *f.* 13 and Ecclus. 36 6 *f.* 10 exclude a Maccabæan origin.[7] Of these, the first is of no significance. With regard to the remaining parallelisms it would be permissible to suppose that the impassioned prayer in Ecclus. 36 1-17, together with 35 18-20, was inserted during the Syrian persecution, for it is certainly unique in the Wisdom of Ben Sira. Too plainly, there is no agreement as yet with regard to the course to be adopted. Nor are the critics even at one as regards the amount of indirect value to be attached to the headings of the psalms, and the grouping of the psalms in 'minor Psalters.'

18. On Maccabæan psalms.

This uncertainty is regrettable, but need not surprise us. It is only recently that the objections to a post-exilic date for the priestly code, with the attendant narratives, have been generally admitted to be invalid, and it is intelligible that some critics, jealous for the honour of early Israelitish religion, should declare themselves unable to form a satisfactory picture of pre-exilic religion without some distinct evidences that the teaching of the prophets had begun to produce in individuals a sense of personal communion with God. It is also intelligible that the discovery of early Babylonian and Assyrian hymns should have awakened a desire to be able to point to early Israelitish hymns, and that the modern longing to find organic development everywhere should have produced in some critics an inclination to be somewhat easy in the matter of evidence for early Israelitish hymns, which must, as they rightly assume, have been produced, and have influenced the form, if not the ideas, of the later psalms.

19. On pre-exilic psalms.

Nor is it likely that the belief in pre-exilic psalms would hold its ground, even if no fresh critical start were to be made. To those who have passed out of the semi-traditional phase of criticism the arguments offered for pre-exilic psalms in our Psalter cannot appear to have much cogency. Prof. Kautzsch, for instance, claims as such (though without dwelling much on this trite argument) the psalms referring to a king. It is more interesting to find that he rejects the theory that different views were taken in post-exilic times as to the origin and importance of the sacrificial cultus. Such differences, however, are to be found in other great religions (*e.g.*, Brahmanism, Zoroastrianism, Christianity); why not also in early Judaism? No one would be so unwise as to suggest that any of the psalmists, at any rate if temple-singers, were directly opposed to the sacrificial system; but there were probably not a few psalmists who wrote with a view to the synagogue-worship, and, even apart from this, no psalmist who had any affinity to Jeremiah (see Jer. 7 22 *f.* 88) could miss the sublime truth that obedience and thanksgiving were the true 'divine service.'[1] It is highly improbable that Kautzsch regards B. Jacob's treatment of psalms like 40, 50, and 51[2] as adequate and satisfactory. Kautzsch does not deny the spiritualising Jeremianic tone of these psalms; but he accounts for this by the theory that they arose before the priestly code had arisen—*i.e.*, that they are pre-exilic. Now, the theory of late pre-exilic psalms influenced by Jeremiah, formerly held by the present writer (*Book of Psalms*, 1888), will not stand a close examination. Jeremiah's influence was felt not by his contemporaries but by posterity—a posterity which, to do honour to the spirit of prophecy, thought fit to expand largely the contents of the roll of Jeremiah's works. And with regard to the difficulty of conceiving how utterances of a non-sacrificial view of religion could have found admission into the larger Psalter, we may fairly ask how, after Pss. 40 and 51 have been admitted into 'Davidic' collections,[3] and Ps. 50 into a fasciculus of 'Asaphite' psalms, the psalms referred to could have been finally rejected by any editor. We may also express the opinion that the predilection of

1 *TLZ*, 14th May 1892, col. 254; that Budde should guard himself from an extreme statement, was only to be expected.

2 *New World*, March 1900, p. 176.

3 In a passage attached to the posthumous essay of Kosters on the Psalms of Solomon (1898), p. 33.

4 The vague phrase τὰ ἄλλα πάτρια βιβλία (not ἅγια) in the Prologue to Ecclesiasticus permits us to hold that the canon of the Kĕthūbīm was still open. On τὰ τοῦ Δαυιδ, 2 Macc. 2 13, see Wildeboër, *Het Ontstaan van den Kanon des Ouden Verbonds*(3), 137 (a collection of Davidic psalms, such as 3-41).

5 Even Delitzsch held 74 and 79 to be Maccabæan (cp *OPs.* 103).

6 Ps. 83, however, he includes doubtfully.

7 *Wisdom of Ben Sira* (Cambridge, 1899), pp. 26, 37. Schechter overlooks the conventionality of psalm-composition. It would have been better to quote passages from works in which the difficulties referred to were expressly dealt with, except of course so far as relates to Ben Sira. There is no more characteristic doctrine of the early Judaism than the typical character of the early Jewish history. The psalmists knew it well, and acted upon it.

1 See *OPs.* 364-367, and cp JEREMIAH, § 4, end.

2 *ZATW* [1897], 17 67 273-279.

3 We leave the name 'David' as yet unquestioned (see below, § 26 [4]).

the guardians of religious classics for uniformity belongs to a more advanced stage of theological development.

Another remark of the same critic (Kautzsch, in *Th. Stud. u. Krit.* as above) seems to deserve notice. It relates to the 'antique rust' which all the labours of editors of the psalms could not altogether remove from certain early psalms. For a genuine *ærugo vetustatis* we must all have great respect. But the value of the linguistic argument in OT criticism has been exaggerated. Kautzsch himself would surely admit that 'antique' forms, ἅπαξ λεγόμενα, etc., may often be due merely to accidents in the transmission of the texts;[1] and his own very long list of corruptions in the text of the psalms (see *Die heil. Schrift*, 'Beilagen,' 69 *ff.*), which might easily have been made considerably longer, detracts from the force of his remark.

The only other critic whom it is important to notice here is Budde, who, perhaps unintentionally, identifies two statements which ought to be carefully separated. That pre-exilic psalmody may well have influenced the form of post-exilic compositions is one proposition; that pre-exilic psalms, or parts of psalms, have passed into our Psalter is another. As stated above, we have no sufficient grounds for thinking that the religious teaching of the higher prophets found any wide acceptance among the people. Some influence, indeed, it may have exercised (Jeremiah evidently had powerful friends), but not enough to account for the production of poems like our psalms. We may, therefore, reaffirm the position that—

'In spite of the analogies from the Chaldæan, the Vedic, and the Zoroastrian hymns, it is not possible to hold that there is any large[2] admixture of old and new in the Hebrew Psalter; almost every psalm might be appropriately styled 'a new song.' And even if any relatively old songs *were* used as models by the temple-poets, the preference would surely be given to those inspired by the teaching of the higher prophets, such as . . . the lyric fragments incorporated into the Second Isaiah.'[3]

20. Robertson Smith.

Prof. Robertson Smith's criticism, then, when compared with that of other recent critics, may be regarded as fairly representative of that current at the close of the nineteenth century; and it is no disparagement to it to remark that its defect lay partly in its too mechanical character, partly in its want of a sufficiently firm textual basis.

First of all, the critic lays, it would seem, a somewhat exaggerated stress on the Psalters within the Psalter, and on his theory of the development of the singers' guilds. He did not undertake the comparative work required for distinguishing other groups than the traditional ones—viz., those which are proved to exist virtually by close affinities of language and ideas, and deserve not less consideration than those which, judging from the titles and from other external evidence, have still an objective existence as 'minor Psalters.'[4]

In the next place, he did not, it would seem, fully realise the state of the Hebrew text of the psalms, which, when closely examined, turns out to be in very many parts corrupt, nor did he recognise the fact that by a combination of old and new methods the text can often be restored with a high degree of probability, or even with certainty.

To this must be added that he does not appear to have considered the question whether some of the psalms, in addition to those recognised as such by Ewald (19 24 60 [?] 66 108 144), may not be composite.[5]

21. W. Sanday.

A somewhat similar point of view is represented by Sanday, but with a retrogressive tendency not observable in Robertson Smith. In his Bampton Lectures (*Inspiration*, 1893, pp. 256 *f.* 270 *ff.*) Sanday points out that the historical allusions in the Psalter 'are for the most part so vague, and our knowledge of the history of the period into which they are to be fitted is so imperfect, that no satisfactory conclusion can be drawn from them until the more external data have been fully estimated.' He then quotes the opinion of a 'judicious German scholar' (Budde), that the parallel texts, the Elohistic redaction of Pss. 42-83, and the separate collections indicated by the titles, may form an invaluable basis for the history of the Psalter, and proceeds to give 'a specimen suggested by Ps. 79, of the kind of considerations on which stress might well be laid.' These considerations have to do with the steps which must be supposed to have intervened between the composition of this psalm and its inclusion in the LXX version, and taking them together Sanday finds it extremely difficult to get them into the interval between the Maccabæan revolt and the date (100 B.C.?) of the Greek Psalter. He is aware (256, n. 3) that 'even writers so conservative as Driver and Baethgen allow the existence of Maccabæan psalms,' but apparently does not think it safe to admit that the few psalms contended for in the first instance by these scholars made their way into the composite Elohistic collection, the bulk of which is pre-Maccabæan.

A plea for revision of currently-held opinions is always welcome, and we shall wait to see whether any critic attempts to write the history of the formation of the Psalter on the lines proposed by Sanday. For our own part, we do not believe that that vivid realisation of the meaning of the psalms, which is the grand object of exegesis, will be brought nearer to us by such a procedure. We have to open our eyes to the phenomena of the Hebrew text, and learn to detect the true text underlying manifest corruptions; only then will the main problems of the Psalter become revealed to us. Even apart from this, the course recommended by Sanday is not a practical one; we could not wait for the history of the formation of the Psalter before attempting to study the historical allusions. Even to be mistaken would be a less misfortune than to be thrown back on the dim, colourless exegesis of Hupfeld and his school. Robertson Smith himself was by no means an extreme advocate of the external data; indeed, he helped forward the study of the historical allusions when he put forward the 'Ochus theory' (see § 21) in a more plausible form—a theory which may be right or wrong, but pointed in the right direction, and made it possible for some critics to explain Pss. 44 74 79 83 historically, without having to meet the difficulty (be it great or small) inherent in the Maccabæan hypothesis. These critics had no prejudice against the study of external data, though they could not accept Sanday's attempted rectification of boundaries. One of the most obvious gains to be expected from further study is the discovery of some of the sources from which the collectors of the 'minor Psalters' drew, for clear traces of earlier collections are still traceable in the Psalter. It is certain, however, that much greater results than this may be looked for from the adoption of a more frankly critical attitude towards the traditional text.

III. FRESH SURVEY OF PSALTER.

22. Fresh survey of Psalter.

It is now our duty to take a survey of the psalms, assuming the results of such a criticism as is described in the last paragraph. Before doing so (see § 27), however, we have (1) to consider (making our statement as compact as possible in view of the heavy demands upon our space) Robertson Smith's theory that certain psalms refer to the time of Artaxerxes Ochus (§ 23), (2) to take up a position towards G. B. Gray's theory respecting the royal psalms (§ 24), and (3) to put side by side with the traditional readings (which have received such conflicting explanations) of the headings of the psalms in MT, readings suggested by a careful criticism of the text, some of which appear to be approximately certain,

[1] *OPs.* 462.

[2] This cautious adjective might now be omitted.

[3] *OPs.* 194.

[4] Cheyne, in *Semitic Studies in Memory of Alex. Kohut*, 114. The principle of virtually existent groups has been adopted by Ewald (*Psalmen*(3), 1866), by the present writer (*OPs.* 1891), and with regard to a group of eleven psalms (22 25 31 34 *f.* 38 40 49 71 102 109), by Rahlfs (עני *und* ענו *in den Psalmen*, 1892). The date assigned by Rahlfs to the psalms of this group is late in and soon after the exile.

[5] The importance of this has been specially noted by J. P. Peters (*New World*, June 1893, pp. 287 *f.*); the idea was not new, but needed to be brought into greater prominence.

others distinctly probable, and a few, at any rate, more possible and plausible than those which are commonly received (§ 24).

Feeling it difficult to make Pss. 44 74 79 later than the Persian period, Robertson Smith[1] revived an early view of Ewald (*Dichter des Alten Bundes*$^{(1)}$ [1835], 353; *Hist.* 5 120, n.) that the occasion of these psalms is to be sought in the history of Artaxerxes Ochus. Between 363 and 345 there were two Palestinian rebellions against Persia (cp ISRAEL, § 66), and it is at least possible that the Jews may have failed to resist the temptation to take part in one of them. The reputation of Ochus for cruelty is well known (PERSIA, § 20), and it has till lately not been questioned that he punished the Jews severely for their rebellion. We have information of a conflict of the Persians with the Jews which ended in the destruction of Jericho, and the transportation of a part of the Judæan population to Hyrcania and Babylonia. According to Robertson Smith the narrative in Josephus (*Ant.* xi. 7 1) of the pollution of the temple by Bagoses is really 'a pragmatical invention' designed to soften, as being a divine chastisement, the outrages on city and people committed by order of Ochus. Wellhausen too appears to hold (or to have held) a similar view (*IJG*, 146), and Marquart (*Unters. zur Gesch. von Eran*, 25) infers from the passage in Josephus that a part of the Jewish community rebelled against the Persian rule. Many, too, have supposed (with Gutschmid and Nöldeke) that the wars of Ochus form the historical background of the Book of Judith.

23. Ochus theory.

Unfortunately, all this is only plausible. Moreover, one part of the evidence (that relating to the destruction of Jericho) has been shown by Reinach to refer to a much later period (see col. 2202, n. 2), whilst the second-hand evidence of the Byzantine chronographer Syncellus,[2] though accepted by such a keen critic as Marquart, cannot be held decisive. Willrich—a keen though perhaps somewhat too sceptical critic—claims Josephus as a witness against Persian oppression of the Jews, and quotes the passage, *c. Ap.* 2 11, § 134, which states that whereas the Egyptians were servants to the Persians and the Macedonians, the Jews were free and ruled over the cities round about. He holds that in the passage, Jos. *Ant.* xi. 7 1, 'Bagoses [*var. lect.* Bagoas] the general of the other Artaxerxes' (ἄλλου Ἀρτ.), 'other' is an interpolation, and that it was the Christian chronographers who, through identifying Bagoses with BAGOAS (*q.v.*), converted Artaxerxes Ochus into a persecutor of the Jews.[3]

It is true that from an exegetical point of view there is much to be said in favour of Robertson Smith's view which explains Pss. 44 74 79 by cruelties, partly in the nature of vengeance, partly dictated by religious opposition, on the part of this Persian king. Unless we are prepared to assign a good many more psalms than 44 74 79 to the Greek period, it is certainly unadvisable to assign the psalms mentioned either to the time of Ptolemy Lagi (who treated Jerusalem with cruelty[4]) or—a more plausible theory—to that of Antiochus Epiphanes. In the matter of historical criticism, however, we are all, by further experience, becoming more and more exacting, and it appears hazardous to build such an important theory on doubtful statements of uncritical writers.[5]

1 *EB*$^{(9)}$ 20 31; *OTJC*$^{(2)}$ 207 *f.* 438.

2 Ed. Dindorf, 1 486.

3 *Judaica* (1900), pp. 35-39.

4 For the evidence, see col. 2426. That Jerusalem was occupied and severely treated by Ptolemy Lagi, cannot be doubted (cp *OPs.* 114); but Appian's καθῃρήκει makes a very strong demand on our confidence. A much better authority would be required for the theory that the temple itself was destroyed on this occasion.

5 The present writer was the first to accept Robertson Smith's argument in *OTJC*$^{(2)}$ 438 as historically probable (*New World*, Sept. 1892; *Founders*, 220 *ff.*; cp *Intr. Is.* 360 *f.*). Beer (*Indiv. Psalmen*, etc., 1894) also adopted the new theory.

As for Is. 63 7-64 12 [11], though the supposed oppression of the Jews by Ochus would afford a full explanation of its gloom and despondency, we must regretfully hold that this is not the true key to the difficulties of the section, and must look out for a new and more solidly based theory which will account both for this passage and for the related passages of the Psalter. Nor shall we long look in vain (§ 28, v.; PROPHETIC LIT., § 43).

G. B. Gray's theory of the royal psalms (*JQR*, July, 1895, pp. 658-686) is an able attempt to show that even those psalms which, in so far as they refer to a king who is neither Yahwè nor a foreigner, may seem to be necessarily pre-exilic, can be explained as post-exilic without resorting to the improbable hypothesis that they refer to an Asmonæan king (or kings).

24. Gray on royal psalms.

He thinks that in Pss. 2 72 18 89 21 the king referred to is an idealisation of the people with reference to its sovereign functions, and that the expressions used in these psalms can only, or at least most satisfactorily, be explained by the circumstances, not of an individual monarch, but of the (royal) nation. In Ps. 61, probably also in Ps. 63, the poet speaks in the name of the nation, and consequently appropriates the term 'king.' Possibly Pss. 20 and 110 may be analogously explained. In Ps. 33 the reference is purely proverbial, and Ps. 45, the interpretation of which is specially difficult, may excusably be left out of account.

This view[1] does but give a sharper outline to a view to which some of the best scholars have been tending—viz., that the ideal king referred to in certain psalms is a representative and virtually a personification of the people. As the text stands, we find post-exilic Israel spoken of as Yahwè's anointed one in Ps. 28 8 89 38 51 [39 52] Hab. 3 13,[2] and it would have been but a step further to call the people of Israel by the ordinary royal title.

Was this step actually taken? Hardly, if it be true that there are in the prophetic literature distinct announcements of a future ideal Davidic king. The religious phraseology of the Jews would surely have been thrown into hopeless confusion if 'king' sometimes really meant 'king,' and at other times signified 'people.' There were honourable titles enough to give the personified people—'son of Yahwè,' 'servant of Yahwè,' and even perhaps 'Yahwè's anointed one.' The phrase 'Yahwè's anointed one,' if our text is correct in reading it, is specially important, because it 'is either applied or applicable to any one who has received from God some unique commission of a directly or indirectly religious character';[3] in other words, it does not necessarily connote royalty. When we consider that psalms addressed to the king, or relating to the king, had probably come down to our psalmists from pre-exilic times, it is very bold to assume that the psalmists sometimes use the term 'king' as an honorific title for the Jewish people.[4]

A problem, however, still remains to be considered. If it be true (as the present writer has provisionally maintained[5]) that it is only in Pss. 101 and 110 that a historical sovereign is spoken of, how are we to account for the strange addresses in other royal psalms to an as yet non-existent personage, as if he were already on the Messianic royal throne? We must return to this question later (see § 34, end).

With regard to the headings of the psalms, no scholar will presume to disparage the work of many generations of learned predecessors. It is high time, however, to take a step in advance. The theories at present in circulation have for the most part but little to recommend them. Even a phrase at first sight so transparent as לדוד (EV 'of David') occasions no slight difficulty.

25. Psalm headings.

1 See also Smend, *Rel.-gesch.*$^{(2)}$ 373-375; Wellh. *IJG*$^{(3)}$ 207. Smend has now given up the supposed reference of Ps. 2 to Alexander Jannæus (*Rel.-gesch.*$^{(1)}$ 384), and holds with Gray.

2 See *Psalms* in *SBOT* 176 (cp 164, n. on 2 7), and *Isaiah* in the same series, 196.

3 *OPs.* 338.

4 Toy's clear and instructive essay, 'The king in Jewish post-exilian writings,' *JBL* 18 [1899] 156-166, does not directly refer to this question.

5 *Jew. Rel. Life*, 105. A different view is taken in the present article.

According to Keil it was the custom of Arabian poets to attach their names to their works. This, however, cannot be shown. The old poets did not write their poems. Each of them had his *rāwī*, or 'reciter,' who learned each poem, and transmitted it to others.

Nöldeke has shown that late Arabic poems are sometimes ascribed to ancient writers with an object; also that narrators would illustrate dry historical narratives by poetical passages of their own composition which they assigned to their heroes. This is true, but does not touch the case of לדוד, for only by the merest illusion can the so-called Davidic psalms be said to be illustrative of the life of David. It is even more important to observe that the analogy of the titles לבני קרח (EV 'of the sons of Korah') and לאסף (EV 'of Asaph') is directly opposed to the theory that לדוד can mean 'composed by David.' (*Later* writers may have given לדוד this meaning; it seems to be distinctly implied by the subscription in 72 20, 'Ended are the prayers of David the son of Jesse.')

Then, too, how perplexing is the distribution of psalms bearing the title לדוד! If, in spite of 72 20, Ps. 101 was regarded as the work of David, how comes it to have been placed amidst psalms which are plainly later than the time of David?[1] It is true, David was regarded in the time of the Chronicler as the founder of the temple services as they were organised in his own time. That, however, does not account for the selection of particular psalms to bear the honourable title לדוד, and as Sanday remarks,[2] we should have expected that the influence of the Chronicler, who (if it be not rather a later editor) ascribes to David a composite psalm made up of three obviously post-exilic psalms, would have been sufficient to bring the name of David into the titles of the three psalms.

Difficulties of this sort might be multiplied. How, for instance, can לשלמה, in 72 1, mean 'Of Solomon,' when clearly the psalm consists of anticipations of the benefits to be enjoyed under some great king's rule? 𝔊, it is true, renders εἰς σαλο[ω]μων (*i.e.*, 'with reference to Solomon'); but what right has it to be thus inconsistent? And who can say that a perfectly satisfactory explanation has been given of the mysterious לידיתון (EV 'of Jeduthun'), or of the so-called musical notes?

Now if a step in advance is to be taken, we must not dream that it can be done by the application of the so-called inductive method, for which the Hebrew text of the phrases in the titles is ill-adapted. Our only hope can be from a slow and persistent use of the methods, continually becoming more refined and varied, of critical (as opposed to arbitrary) conjecture. The present writer has for a long time past endeavoured to apply these methods. The following conspectus presents his results so far as relates to the statements in the titles concerning the sources from which the psalms were severally derived and (if this be not a mistake) the liturgical use or performance of the psalms. So far as concerns the historical references mentioned in a number of titles, they will be given separately at the end of this article (§ 45). If the results are negative, they are also *positive*; *and who can say that the explanations for which, with extreme deliberation, substitutes are offered, are worthy of their place in commentaries and lexicons which are otherwise, even if far from perfect, at any rate neither unprogressive nor unmethodical?*

26. New explanations.

1. *'Alāmōth, upon* (עַל־עֲלָמוֹת), 46 [49]; *Ma'ălōth, the* (הַמַּעֲלוֹת), and *Ma'ălōth, for the* (לַמַּעֲלוֹת), 120-134 [לם' in 121]; *Maḥălath, upon* (עַל־מָחֲלַת, 53, and with the addition of *Lĕ'annōth* (לְעַנּוֹת), 88; *Nĕḥīlōth, upon the* (אֶל־הַנְּחִילוֹת), 5; *Solomon, for* (לִשְׁלֹמֹה), 72 127.

All these (for ל=אל=על) probably originated in לְשַׁלְמָה or

1 Cp Driver, in Sanday's *Oracles of God*, 142.
2 *Op. cit.* 143.

לְשַׁלְמַת—*i.e.*, of Ṡalmah = b'ne Salmah. In Ps. 9 עַל־מוּת לבן (see 18) should be לִבְנֵי שלמת. See (besides MAALOTH, MAHALATH, NEHILOTH) SOLOMON'S SERVANTS [CHILDREN OF], and observe that 127 combines המעלות and לשלמה—*i.e.*, the error and the *correction*.

The Salmæans then were a division of the singers. It is true, Salmah is a N. Arabian ethnic; but the truth probably is that all the divisions bear names indicating clans of N. Arabian extraction. The result, if accepted, is important. The title, 'song of degrees,' becomes in consequence transformed into 'Marked: of Salmah,'—*i.e.* officially attested (cp PSALM) as belonging to the Salmæan collection. The question as to the relation of the Salmah clan to the Shallum clan (which in Ezra 2 42 is reckoned among the b'nē šō'ărīm, or rather perhaps the b'nē Aššūrīm; see 10, *Jedithun*) cannot here be considered.

2. *Al-tašḥēth* (אַל־תַּשְׁחֵת), 57 58 59 75 and *Aijéleth haš-šáḥar* [*upon*] (עַל־אַיֶּלֶת הַשַּׁחַר), 22. Probably from לְאֵיתָן הָאֶזְרָחִי, 'Of Ethan the Ezrahite.' See (6) *Ethan*.

3. *Asaph, of* (לְאָסָף), 50 73-83. *'Asaph' is evidently an ethnic* name; its proximity to 'Nethinim' (or rather 'Ethanim') in Ezra 2 41, etc. and ‖ passages, suggests as its original 'Zarephath,' through the intermediate form סֹפֶרֶת (Neh. 7 57; הַס', Ezra 2 55). Cp Saph, 2 S. 21 18; *ăsaphsūph*, Nu. 11 4 (see MULTITUDE, MIXED). 'Abiasaph' perhaps comes from 'Arāb-zarephath; cp Obed-edom = 'Arāb-edom, 'Abdê Shĕlōmōh [see 1] = 'Arāb-ṡalmah. It should be noticed that the title הַמְשֹׁרְרִים, prefixed to בְּנֵי אָסָף in Ezra 2 41, may originally have been intended to refer to the בני השערים (rather בני אשורים), the נתינים (rather איתנים) and the בני עברי שלמה (rather בני ערב שלמה); *i.e.*, all these clans were devoted to the service of song.

4. *David, of* (לְדָוִד), prefixed to all the psalms of book i. except 1 2 10 33 (which have no title in MT); to 21 in book ii; to 1 in book iii.; to 2 in book iv.; and to 17 in book v.; in all, to 78. Lagarde says (*Orientalia*, 2 23), 'Just as English professors can be called 'Margaret,' or 'Savilian,' or 'Hulsean,' etc., so in the temple choir one division could be named after David, another after Heman, or Korah, or any one else.'[1] 'It is no objection that some titles refer to events in king David's life, for (1) these appendages are worthless (David had other things *to bring before Yahwè than those mentioned—e.g., in Ps. 3*), and (2) the headings are unknown to the Syriac, and are therefore not an original part of the collections of psalms' (*ibid.*). To this it may be added that these appendages have probably been obtained by recasting a misread text, which said something quite different (see § 24), and which, when we get the key, we can plausibly correct. לדוד (which even Lagarde assumes to be authentic) has most probably come from לירידות (see 13, *Loves, song of*), which in turn comes from לִידִיתוּן, 'Of Jĕdīthūn.' It will be observed that in the titles of Ps. 39 and 62 the two readings, לידיתון or לידותון [עַל־י'] and לדוד, are combined; also that, in 72 20 בֶּן יִשַׁי[2] (son of Jesse), and in 144 10 אֶת־דָּוִד are presumably later insertions, based on misunderstanding. See 10, *Jedithun, of*.

5. *Degrees, song of.* See 1, *Ma'ălōth, the*, and 30, *Song*.

6. *Ethan the Ezrahite, of* (לְאֵיתָן הָאֶזְרָחִי), 89, and *Memorial, to make?* (לְהַזְכִּיר), 38 70 ('to be sung at the presentation of the Azkārā'?[3]—'to confess [sin]'?[4]). 'Ethan' and 'Zerah' are both S. Palestinian and N. Arabian clan-names. Why the editor has given us but one Ethanite psalm is a mystery. Probably, however, 'Jedithun' (see 10) contains the name 'Ethan.' See also 2, *Al-tašḥēth* and *Aijéleth haš-šáḥar upon*, and 26, *Shĕmōnīth, on the*. See ETHAN.

7. *Gittith, upon the* (עַל־הַגִּתִּית), 8 81 84. Corrupt; perhaps from עַל־הַשְּׁמִינִית. See 30, *Shĕmīnīth, upon the*.

8. *Heman the Ezrahite, of* (לְהֵימָן הָאֶזְרָחִי), 88. See 6, 18, also HEMAN.

9. *Higgāiōn* (הִגָּיוֹן), 9 16 [17], followed by סלה (Sélah), and 92 3 [4], followed by 'upon the lyre.' Corrupt (see HIGGAION); it is not a technical term at all.

10. *Jēdī(ū)thūn, of, or upon* (לידיתון, 39; עַל־ידותון, 62; עַל־ידיתון, 77). *Jedithun may come from 'Arāb-'ēthan* (*cp* JEDUTHUN) or less probably from Jerimoth (ירימות) = Jeremoth = Jerahmeel. In 1 Ch. 25 4, 'Jerimoth' is one of the sons of Heman. Obed-edom, or rather 'Arab-edom [or -aram = jerahmeel?], appears in 1 Ch. 16 38 as the son of a Jeduthun. The b'ne

1 Lagarde's view of 'David' as a choir named after David is accepted by Zenner (*Zt. f. kath. Theol.* 15 [1891] 361 *f.*). Against it see König, *Einl.* 395, who is content to explain לְ in לדוד as the ל *auctoris*, remarking that 𝔊 not only has (ψαλμὸς) τῷ Δαυιδ (3 1, etc.), but also τοῦ Δ. (26 1 etc.), quite apart from the differences of MSS (37 1 86 1).
2 The author of this interpolation must have seen in Ps. 72 a prayer of David for Solomon.
3 So Delitzsch and Baethgen.
4 Jacob, *ZATW* 18 52 63 *ff.* (similarly in 1 Ch. 16 4).

Jĕdūthūn were, according to 1 Ch. 16 42, 'at the gate' (לַשַּׁעַר)—*i.e.*, 'door-keepers,' שֹׁעֲרִים—but there is evidently some misunderstanding connected with these door-keepers, and perhaps the original title of the b'ne Jeduthun, as well as of the b'ne Shallum (Ezra 2 42) was אַשֻּׁרִים, 'Asshurites'='Geshurites' (cp 1, end). In 1 Ch. 26 1 4 the same Obed-edom is represented as a Korahite (*i.e.*, Jerohamite?); see 1. Observe (1) that in 39 and 62 לידיתון or על־ידותון is followed by the false reading לדוד; (2) that in the headings of 18 and 36 לְעֶבֶד יהוה ('of the servant of Yahwè') is a corruption of לידיתון (‖ לדוד); (3) that in the heading of 100 לידיתון has become לתודה; (4) that Ps. 70 (71) in 𝔊's Hebrew text had the double heading לדוד and לבני ידתון (υιων ιωναδαβ). On יְדִידֹת in 45 see 13; on עֵדוּת in 60 80 see 28. Cp 4, *David, of.*

11. *Jōnath-ēlem-rĕḥōkīm, upon* (עַל־יוֹנַת אֵלֶם רְחֹקִים), 56. That על־יונת comes from על־נגינות (cp 54 *f.* 61 and see 20, *Neginoth, upon*) may be taken as fairly certain. The interpretation of אלם רחקים given in col. 2572 was affected by the view taken of the difficult למנצח (now at length explained with high probability; see 19). If the explanations of דוד and קרח given here (nos. 4 and 12) are accepted, it will be difficult not to recognise underneath אלם רחקים the phrase אל־הקרחים = לירחמ[אל], 'of Jerahmeel,' which is virtually synonymous with the phrase which follows,—לדוד, *i e.*, לירימות=לידיתון (see 10).

12. *Korah, of the sons of* (לִבְנֵי קֹרַח), 42 44-49 84 *f.* 87 *f.* Korah (*q.v.*) is a southern clan-name. The true name, however, of this guild of singers was probably בני ירחם (as if בְּנֵי יְרֹחָם, 'sons of Jeroham,' but really shortened from בְּנֵי יְרַחְמְאֵל, 'sons of Jerahmeel'). ירחם was distorted (popularly?) into קרחים. See 2 Ch. 20 19, where, although the בני הקהתים and the בני הקרחים are apparently distinguished, we can hardly doubt (consistently with the principles of textual criticism we are applying) that הקהתים and הקרחים are both corruptions of the same name—*i.e.*, ירחמ[אל]. הקרחים occurs only once again, viz., in 1 Ch. 12 6, where it interrupts the list of names, and has evidently come in from the margin, where it stood as a variant to ירחם in the phrase בני יר' (*v.* 7 end). On the possible misconception at the root of the Chronicler's statements as to Korahite doorkeepers, see Porters, and cp 10, *Jedithun.*

13. *Loves, song of* (שִׁיר יְדִידֹת), 45. Shīr and Jĕdīdōth are brought together by a mistake; ידידת is a corruption either of לִידִיתוּן, 'of Jedithun'[1] or of לִירִימֹת, 'of Jerimoth' (from which name 'Jedithun' comes). In either case, we may compare the heading of Ps. 56, where רחקים (קרחים), *i.e.*, ירחם, and דוד are combined.[2] See 30, *Song.*

14. *Maḥălath, upon.* See 1.

15. *Maschīl.* See 19.

16. *Michtām* (מִכְתָּם), 16 56-60. Perhaps from תַּחֲנוּן, 'supplication' (מ=נו; כ=ח); cp חנכת, 30 1 (title), from תְּחִנַּת. See Michtam.

17. *Moses the man of God, of* (לְמֹשֶׁה אִישׁ־הָאֱלֹהִים), in 90. According to Să'adya, לְמֹשֶׁה=לִבְנֵי מֹשֶׁה, 'of the sons of Moses' = 'of the Levites' (1 Ch. 23 14). But the text is corrupt. Most probably למשה comes not from [ל]שלמה, as we might at first suppose (cp 1), but from רָשׁוּם, 'marked' (see 24, *Psalm*); and איש האלהים from לְהֵימָן הָאֶזְרָחִי, 'of Heman the Ezrahite' (see 8). איש אלהים is due to a remodelling editor, who had before him a corrupt text, and made sense of it by the light of Dt. 33 1, הברכה אשר ברך משה איש אלהים. Ps. 90 *b* has in fact two points of contact (*vv.* 13*b* 15), not indeed with Dt. 33, but with Dt. 32.

18. *Mūth-labbēn, upon* (עַל־מוּת לַבֵּן), 9. Most probably from לִבְנֵי שַׁלְמַת, 'of the sons of Salmath.' See 1.

19. *Musician, to the chief* (לַמְנַצֵּחַ), in 55 headings, and in Hab. 3 19.[3] Probably from לְמִשְׁכָּן, 'as a thing deposited'='to be laid up in store' (an Aramaism). *Maschīl* (מַשְׂכִּיל), in fifteen psalms (see Maschil), seems to be another corruption of the same word. The significance of the fact that 𝔊 gives for לַמְ[נ]צח, εἰς τὸ τέλος, and has evidently no idea of a possible use of the verb נצח in a musical connection, is not perhaps generally recognized.[4]

PSALMS (BOOK)

20. *Nĕgīnōth, on* (בִּנְגִינוֹת), 4 6 54 *f.* 67 76 Hab. 3 19 (with superfluous י attached), and once (61) *on Nĕginath* (עַל־נְגִינַת). In 6 בנגינות is followed by עַל־הַשְּׁמִינִית. Both words, Nĕgīnōth and Shĕmīnīth, may be regarded as corruptions of the same original (see 26, *Sheminith, upon*).

21. *Nĕḥīlōth, on the.* See 1.

22. *Praise* (תְּהִלָּה), 145. Cp *v.* 21.

23. *Prayer* (תְּפִלָּה), 17 86 90 102 142. Cp 72 20.

24. *Psalm* (מִזְמוֹר), in the titles of 56 psalms. Probably from רָשׁוּם, 'marked,' *i.e.*, attested by an official statement. See Psalm.

25. *Sélāh* (סֶלָה), 71 times, also in Hab. 3 3 9 13, and (διάψαλμα) Ps. Sol. 17 31 18 10. Perhaps from לְשַׁלֵּם, 'for complementing, supplementing,' whence perhaps Tg.'s לעלמין, Aq.'s ἀεί. Very often סלה may be regarded as a corruption of some word which is an integral portion of the psalm. See Selah.

26. *Shĕmīnīth, on the* (עַל־הַשְּׁמִינִית), 6 12. Probably from לְאֵיתָנִים (א, imperfectly written, having been confounded with ש). The Ēthānim, under the disguise of 'Nĕthīnim,' appear in Ezra 2 58, etc. (see *Amer. Journ. of Theol.* July, 1901). Possibly too לְיוֹם הַשַּׁבָּת in 92 should be read לְאֵיתָנִים, 'of the Ethanites.' Note the ascriptions of Pss. 88 89 90 (see 17). It is not decisive against this view that 𝔊 assigns Ps. 92 to the Sabbath; 𝔊 also assigns other psalms to the other days of the week (except Tuesday and Thursday); see § 16. See also 7, 11, 20, 28).

27. *Shiggaiōn* (שִׁגָּיוֹן), 7, plur. in Hab. 3 1. A corruption of שמינית (מ=גי), Shĕmīnīth; see 26.

28. *Shōshannīm, upon* (עַל־שֹׁשַׁנִּים), 45 69; *Shōshannīm-'ēdūth, upon* (אֶל־שֹׁשַׁנִּים עֵדוּת), 80; *Shūshan-'ēdūth, upon* (עַל־שׁוּשַׁן עֵדוּת), 60. Probably 'Shōshannīm' and 'Shūshan' are corruptions of 'Shĕmīnīth' (see 26), and ''ēdūth' of 'Jĕdīthūn (see 10).

29. *Solomon, of.* See 1.

30. *Song* (שִׁיר), in the titles of 30 psalms, also (ᾠδή) in Ps. Sol. 15 17 (titles). Another corruption (see 24, *Psalm*) of רָשׁוּם, 'marked.'

31. *To bring to remembrance*, or *To make memorial* (לְהַזְכִּיר). See 6.

32. *To teach* (לְלַמֵּד), 60, and in 2 S. 1 18. Either a corrupt dittogram of לדוד, or miswritten for לירחמאל, a phrase synonymous with לירימות (cp 4).

One conclusion from the above emendations (§ 26)

---

[1] So already Staerk (*ZATW* 12 136), with יְדִידְיָה (2 S. 12 25) as an alternative original.

[2] It will be remarked that according to our results 'Jerimoth' (cp 10) and 'Jeroham' both come from 'Jerahmeel.'

[3] According to Nestle (*ZATW* 20 [1900] 167 *f.*), the technical note in Hab. 3 19 is properly the heading of the next psalm in the collection from which this 'psalm' was taken.

[4] Driver, in a communication to Sanday (see the latter's *Oracles of God*, 146), says, 'I doubt greatly whether much weight is to be attached to the ignorance of the LXX. The LXX, in all parts of their translation . . . are apt to stand apart from the Palestinian tradition; they frequently show themselves to be unfamiliar not only with uncommon or exceptional words, but even with those which one would have expected to be well known.' He illustrates this from נִצַּח, the verb of which מְנַצֵּחַ (according to Driver, 'precentor') is the participle. 'It is hardly possible that a word familiarly known in Palestine *circa* 300 B.C., and (in its musical connection) retained in use in the temple services, should have had its meaning forgotten there during the period of one to two centuries which may have elapsed between 300 B.C. and the date at which the LXX translation of the Chronicles and Ezra was made; yet the translators of these books have evidently no idea of its meaning when used in that connection.' It is admitted, however, that there is no passage in Ezra, and but one in Chronicles, in which נצח is used with reference to music, and though Driver says that in 1 Ch. 15 21 the LXX 'show themselves to be entirely unacquainted with the meaning of the verb,' it does not appear that modern philology has succeeded in showing what לְנַצֵּחַ means. BDB states that בְּכִנֹּרוֹת עַל־הַשְּׁמִינִית לְנַ׳ means, 'over the bass voices, leading them with כִּנֹּרוֹת.' But since בכ׳ is separated from לנ׳ by הַשְּׁמִינִית, and since no *proof* of the sense 'bass voices' for שמינית can be adduced, we may venture to question this interpretation which neither of the two other standard Hebrew Lexicons ratifies. Siegfried-Stade rightly questions the text. Aziel and Shemiramoth have probably been wrongly inserted under the corrupt forms, Azaziah and Sheminith, respectively; לנצח should be לְנַצֵּחַ (=תָּמִיד, 166). See Sheminith. The LXX therefore do not deserve the imputation of ignorance of the meaning of נִצַּח in a musical connection, because the word has not yet been proved to have a special musical sense (for an ingenious but very far-fetched suggestion, see Ges.-Buhl); and the fact that they substitute לנצח (see Musician, The Chief) for למנצח suggests that the translator, whose aloofness from Palestine may be exaggerated, knew that there was no real Palestinian tradition on the subject. The Cimmerian darkness can only be mitigated by critical conjecture. A possible and suitable one is offered above.

PSALMS (BOOK)

will be that the history of the development of the guilds of singers has been written with an attempt at undue precision. That the singers originally called b'nē Asaph (but cp 2 Ch. 20 19[1]) gradually split up into many families, some of which called themselves with special emphasis b'nē Asaph, others b'nē Jedithun, others b'nē Heman,[2] is a conjecture entirely based on the traditional Hebrew text. There is no reason why there should not have been from the very beginning of the services in the second temple, several guilds of singers (Neh. 11 17 𝔊BNA scarcely justifies us in limiting the number to two; see BAKBAKKAR, BAKBUKIAH). Their names may have varied somewhat; but whichever names are preferred, they are always (when closely examined) clan-names of S. Palestine or N. Arabia. One might be inclined to surmise that the latest of the names borne by any of these guilds was Ṡalmah, or b'ne Ṡalmah; the reason would be the occurrence of the group of Salmah songs (EV 'songs of degrees') in book v., and the very late collection called ψαλμοὶ Σολομῶντος (*i.e.*, perhaps originally [see § 26 (1)] תְּהִלּוֹת שַׁלְמָה, 'praise-songs of Salmah'). But we must not be too positive as to this. Pss. 9-10, according to one of the statements in the title, belonged to the b'nē Ṡalmah (§ 26 (1), and it is not improbable that משלי שלמה (EV 'Proverbs of Solomon') in Prov. 10 1 25 1 originally meant 'Proverbs of Salmah'; besides, in Ezra 2, etc. (emended text), the Salmæans are co-ordinated with the *Ethanites*. Ethanites, we say, for we can hardly doubt that 'Nethinim,' both in Ezra 2 and wherever else it occurs, is a distortion of 'Ethanim,' and not only 'Ethan' the eponym of the clan has two psalms ascribed to him (and probably many more, see § 26 [10]), but the Ethanim or Ethanites, are mentioned, it would seem, in the titles of two other psalms (see § 26 [26]). Nor must we overlook the fact that what we have suggested as the right meaning of שלמה, and in some cases the reading, had been forgotten, at any rate among the Jewish scholars of Alexandria, as early as the time of 𝔊. As to the phrase 'the sons of Asaph' (= Asaph in the psalm-titles), that Asaph should sometimes (in Ch. Ezra Neh.) represent all the bands of singers, and ultimately be described (see ABIASAPH) as of Korahite affinities, need not surprise us. 'Asaphite' and 'Korahite,' 'Zarephathite' and 'Jerahmeelite' being in their origin virtually synonymous, a vagueness in the genealogical statements was only to be expected.

27. Guilds of singers.

Proceeding now, after dealing with these preliminary questions (§§ 22-27), to take a survey of the Psalter, we begin by taking specimens from different parts of it, with the object of getting a historical point of view, and select 35, 42-43, 44, 60, 74, 79, 83, 120, 137.

28. Historical backgrounds.

i. *Psalm* 35.—Psalm 35 is one of a group of psalms which are parallel both in tone and even in some phraseological details[3] to the Lamentations and to the Jeremianic Literature. Now Lamentations 4 5 (see LAMENTATIONS, §§ 7 *f.*) presuppose that either in the present or in the not distant past the Jewish people has been insulted and oppressed by the Jerahmeelites or Edomites. We have found reason to think that the N. Arabian leaders were principals in the siege and capture of Jerusalem and the captivity of the Jews, and that even during the Persian period and after there had been a return of many of the captives in Edom, the Edomites continued to commit outrages, to annoy, to plunder, and to oppress the pious Jewish community in Palestine. We could not be surprised to find evidence of this state of things in the psalms, and as a fact we find it. In 35 1, underlying very doubtful Hebrew, we find 'the Arabians' and 'the host of Jerahmeel.'[1] In *vv.* 11 *f.*:

'The Jerahmeelites vent their rage upon me, | the Ishmaelites plunder me.
The Rehobothites requite me with evil, | they bring calamity upon me.'[2]

In *v.* 15*b*:

'Those of Jerahmeel surround me, | they cry, We have swallowed him up.'[3]

In *v.* 19:

'Let not the Jerahmeelites rejoice, | the men of strife'[4] (cp 68 31*b* 120 7, below).

ii. *Psalms* 42-43.—In Pss. 42-43, the real or imaginary background is also the oppression, not of the Babylonians (as Theodore of Mopsuestia) but of the Jerahmeelites. We find mentioned the 'tribe of the Arabians' and the 'race of the Jerahmeelites'[5] (42 7 43 1). The speaker is apparently in the Jerahmeelite—*i.e.*, Edomite—region to the S. of Judæa, where Yahwè was not acknowledged (cp 2 Ch. 25 14 20). Speaking in the name of a larger or smaller company, he craves the divine guardianship and to be restored to his true home—the house of God.

iii. *Psalm* 44.—Ps. 44 is composite;[6] 44*a* is apparently the first part of a poetical retrospect of Israel's ancient history (cp 78); 44*b* is a prayer of the innocent martyr-nation. The Davidic king has been set aside, and further resistance has become hopeless. Many of the Jews have been killed or carried captive by 'Jerahmeel'; others seek refuge where they can. Yet Israel is true—sincerely true—to its religious obligations; it is indeed its strictness in this respect that so exasperates its foes. How can Yahwè be angry with his people? The real or assumed background, therefore, is not the time of Hezekiah and Sennacherib (cp Lagarde, *Mittheil.* 2 377), nor that of the Syrian persecution (Baethgen, etc., after Theodore of Mopsuestia) but that of the (Jerahmeelite) exile (see above), soon after the fall of the Davidic dynasty. The psalm is one of a large group of psalms, united by parallelism of contents, but is related most closely to Ps. 60 and 89*b*, the former of which we have next to consider.

iv. *Psalm* 60.—Ps. 60 has been thought to be composite—*e.g.*, most recently (1891) by Winckler (*GI* 2 205), who, like Ewald, thinks he can recognise a pre-exilic element in the psalm. The inconsistencies of the psalm, however, are illusory, and, as to the date, though MT strongly suggests the early Maccabæan period, the present writer's text-critical results make him certain that the oppressors spoken of are N. Arabian. The first stanza reminds us of Ps. 44*b*, the second of 2 and 18 (see below); the third of 89*b*. We can only quote stanza 2, referring for the rest to *Ps.*(2)

For with thee I shall break Geshur,
I shall divide Cusham and Maacath;
I shall measure out Miṣṣur and Aram,
I shall cast the cord upon Zarephath.
Yahwè will conduct me to Miṣṣur,
Yahwè will lead me unto Aram.[7]

v. *Psalm* 74.—Ps. 74 is variously assigned to the

[1] The present narrative, 2 Ch. 20, appears to have been altered from an older narrative (cp NEGEB, § 7, col. 3380).

[2] Köberle, *Die Tempelsänger im Alten Test.* (1899), 150.

[3] Thus 35 21*b* and 25 are parallel to Lam. 2 16.

[1] Read שִׁמְרֵנִי י׳ מֵעַרְבִים | מִמַּחֲנֵה יְרַחְמְאֵל. יריב is recognised by 𝔊 here, but not in Is. 49 25 Jer. 18 19. לחם (Ḳal) is presupposed by 𝔊 both here and in 56 2 3. Both יריב and לחם may fitly be questioned in the present passage (and לחם also in 56 2 *f.*); see *Ps.*(2).

[2] For עֲדֵי חָמָס read יְרַחְמְאֵלִים; and for אֲשֶׁר לֹא־יָדַעְתִּי read יִשְׁמְעֵאלִים. יְשַׁאֲלוּנִי should be יְשַׁלְּמוּנִי, and שְׁכוֹל should be הִכְשִׁילוּ.

[3] Read בְּנֵי יְרַחְמְאֵל כִּתְּרוּנִי קָרְאוּ בִּלַּעֲנוּהוּ.

[4] Read אַל־יִשְׂמְחוּ יְרַחְמְאֵלִים אַנְשֵׁי מָדוֹן.

[5] On the very singular corruption, or editorial manipulation, see *Ps.*(2).

[6] Cp G. A. Barton's article in *Amer. Journ. of Theol.* (3 [1899] pp. 744 *ff.*), which recognises the composite character of the psalm, and distinguishes three strophes, representing (this is the weak part of the theory) three widely separated periods.

[7] On the very interesting corruptions see *Ps.*(2) מִי, in *ll.* 5 and 6, is a fragment of אלהים, which, as usual in these psalms, has displaced יהוה. Winckler, *GI* 2 205, has not observed this.

Chaldæan period ('everlasting ruins,' *v.* 3*a*; 'have set on fire thy sanctuary,' *v.* 7*a*) and to the Syrian or Maccabæan ('the synagogues,' *v.* 8; 'no more any prophet,' *v.* 9; 'blaspheme thy name,' *v.* 10). Of the phrases on which respectively the two theories are based, only that in *v.* 7*a* and that in *v.* 10 remain in the present writer's revised text. Whether the Babylonian warriors felt sufficient bitterness against Judah to blaspheme the name of Yahwè, may be reasonably doubted; it was quite otherwise with the Jerahmeelites or Edomites whom (as also perhaps in Ps. Sol. 2, see § 42) we believe we can recognise in this psalm. There is nothing said in the context about the defeat of Jewish armies (cp 44 11*a* 89 44); but the couplet which not improbably underlies *v.* 3—

Hide thy poor from the wickedness of their neighbours,
The Jerahmeelites, the Arabians, and the Geshurites,—

may probably be explained by 2 K. 24 2, where, according to a critically emended text, the enemies mentioned seem to be the Cushites, the Jerahmeelites, and the Miṣrites, combined with Jer. 39 3, where, originally, the princes named were those of the king of Jerahmeel (see NERGAL-SHAREZER). 'The synagogues' in *v.* 8 should most probably be changed to 'the name of Israel'[1] (let us sweep away from the land). On the complaint, 'there is no prophet' (*v.* 9), see col. 2207. That the historical background is imaginary, seems very probable (see col. 2207). We now see what must be the true explanation of Is. 63 7-64 12 [11]. The inserted passage (*vv.* 12-17) reminds us of 89 12 *f.* Is. 51 9.

vi. *Psalm* 79. In 1 Macc. 7 17 Ps. 79 2 *f.* are applied to the massacre of sixty leading ASSIDÆANS by ALCIMUS, and the phraseology of 1 Macc. 1 37 (*καὶ ἐξέχεαν αἷμα ἀθῷον κύκλῳ τοῦ ἁγιάσματος καὶ ἐμόλυναν τὸ ἁγίασμα*) seems to be suggested by *vv.* 1 *f.* of this psalm. This does not, however, prove that the psalm was known to have been composed during the Syrian persecution. In spite of Hitzig's attempt to show that it cannot have reference to the capture of Jerusalem in 586 B.C., it is perfectly safe to explain it as referring to this, even if we incline to think that in this and the related psalms the historical background is an imaginary one. To deny that there was any slaughter of the Jews 'round about Jerusalem,' and that any other neighbours but the Chaldæans were considered to have afflicted the Jews at this period, is very bold. At any rate, after our revision of the texts, we are precluded from assenting to Hitzig. See 44 23 'For thy sake Jerahmeel has killed us,'[2] and the passage referred to above (2 K. 24 2) as to the hostile 'neighbours' of the Jews. This psalm, however, is far inferior to 74, and has somewhat the appearance of an imitation.

vii. *Psalm* 83.—Ps. 83 has been commonly explained by the light of 1 Macc. 5, though Ḳimḥi, Calvin, Delitzsch, and Lagarde, with what may now at length be recognised as remarkable insight, prefer to explain by 2 Ch. 20, and Robertson Smith, as we have seen, refers the psalm to the time of Artaxerxes Ochus. If, however, we apply to the difficulties of the text the critical processes which we have used elsewhere, the real or supposed occasion of the psalm becomes manifest. It is the banding of the N. Arabian peoples together (cp Ps. 59)—first to harass, and then to destroy the very existence of Israel—between about 602 and 586 B.C., of which the narrative in 2 Ch. 20 may have been like an

1 מוֹעֲדֵי־אֵל is a very improbable phrase for 'the synagogues.' בֵּית וַעַד (*Sōṭā* 9 15) is a synonym for בֵּית כְּנֶסֶת, which certainly does not mean מוֹעֵד אֵל, 'God's meeting-place'; indeed Tg. gives ב׳ כנשתא for the בֵּית הָעָם of MT in Jer. 39 8. מִקְדְּשֵׁי אֵל is the most obvious correction; but the obvious is often not the true. Having regard to 83 5 [4], we should most probably read שֵׁם יִשְׂרָאֵל. The enemy's ultimate object was to destroy, not sanctuaries, but worshippers. שרפו has probably come from נשבית. כל comes from a misplaced לכו. See further *Ps.*(2).

2 הֲרָגָנוּ יְרַחְמְאֵל for הורגנו כל־היום.

anticipation,[1] that is meant. 'Asshur' and 'Geshur' are constantly confounded, and 'Amalek' is only one of the common distortions of 'Jerahmeel.'

viii. *Psalm* 120.—Ps. 120 is admittedly no 'pilgrim-song.' According to Baethgen, it is the record of a time when the party of apostates fanned strife and sedition in Jerusalem, with pernicious consequences for the righteous. Rather it is the sigh of a band of exiles in the land of Jerahmeel (cp 42-43). *Vv.* 4 *f.* should not improbably run thus:—

'Arrows of a warrior are the tongues | of the folk of Jerahmeel:
Woe is me that I sojourn in Cusham, | beside the dwellings of Jerahmeel.'[2]

ix. *Psalm* 137.—According to Duhm, Ps. 137 was originally a folk-song, which arose among some Jews who had fled or migrated from Babylonia not very long after the destruction of Jerusalem. Budde, too (*New World*, 2 [1893]), infers from the metre that it was a folk-song, and consequently dates it early in the exile. But why the pentameter (Ḳina-metre) should indicate a folk-song is not at all clear; Ps. 35 is no folk-song, but it is in pentameters. Nor could a folk-song have contained such a glaring inconsistency—the enemy in *vv.* 1-6 8 *f.* being Babylon, but in *v.* 7 Edom—or have described the scene in such an improbable and scarcely intelligible manner (*vv.* 1 *f.*). The psalm is cleared up by the view that בבל, as in Gen. 10 10 Jer. 39 3, is a corruption of ירחמאל, so that the opening verse becomes:

'On the heritage (נחלת) of Jerahmeel we wept, | remembering Zion'

and *v.* 8 (with other emendations):

'To thee also, O house of Jerahmeel, | plunderers shall come;
Jacob shall uproot thee, and shall overthrow | all thy palaces.'[3]

This must be a near approximation to the truth. The background here, as elsewhere, is imaginary.

We may now approach other psalms with the right key in our hands—viz., the well-grounded theory that the bitterness of so many psalmists and the despondency of still more was caused by the cruel conduct of the Edomites and their neighbours towards the Jews, of which in the concrete we have hitherto formed a very insufficient idea. Let us now return to the royal psalms,[5] viz., 2 18 20 21 (28) 45 61 63 72 (84) (89) (101) (110) (132), to which 1 S. 2 1-10 may be added.

29. Royal psalms:[4] first, 2 18 and 110.

i. *Psalms* 2 18 and 110.—Pss. 2 18 and 110 have a specially intimate connection; the details of this depend somewhat upon our views of textual readings, but the fact of the connection itself cannot be set aside. Let us take first of all the description of the king's warlike energy. Even if we compare 2 8 *f.* 18 30-49 110 5-7 only in MT, we find in all these passages the same extraordinary fierceness which will not stop short of destroying the enemy and establishing an extensive Jewish empire. Until we critically emend the text, however, we do not understand this fierceness, this inhumanity. Ps. 2 8 *f.* runs thus in a text which has been slowly, methodically, and at last with much confidence revised,—

'Ask (this) of me, and I will give thee
The nations as thine inheritance,
The land's utmost parts as thy possession.
Thou shalt subvert Zarephath and Geshur,
Thou shalt beat down Jerahmeel and Miṣṣur.'[6]

With equal clearness the much-misunderstood author of Ps. 18 reveals the secret of his bitterness. The whole

1 The original story has been altered, owing either to mere textual corruption, or to a misinterpretation of history; or to both. Originally it was probably a Jerahmeelite and Miṣrite invasion that was meant.

2 Winckler's restoration of the text (*AOF* 3 417) is very unsatisfactory.

3 גַּם־לָךְ בֵּית יְרַחְמְאֵל | יֵאָתוּ הַשֹּׁלְלִים
יְשָׁרְשֵׁךְ יַעֲקֹב וְנָתַץ | אֶת־הֵיכָלָיִךְ

4 Compare above, § 23.

5 The numbers enclosed in parentheses are those of psalms in which the *word* מלך does not occur.

6 תַּהֲרֹס צָרְפַת וּגְשׁוּר
יְרַחְמְאֵל וּמִצּוּר תְּנַתֵּץ

passage referred to above would be too much to quote; but here is one of the stanzas (*vv.* 44-46 49*c*):—

44*a* Thou didst deliver me from the folk of the Arabians,
49*c* Thou didst rescue me from the men of Maacah;
44*b* Thou madest me the head of the nations,
44*c* People whom I knew not became my servants;
45*b* The sons of Gebal sought me eagerly,
45*a* The Ishmaelites became obedient unto me;
46*a* They brought frankincense and gold,
46*b* They offered chains of choice gold.

Now we see why, as the speaker says elsewhere, he beat his foes 'as small as the dust of the market-place,' and 'swept them away as the mire of the streets' (*v.* 43). It was because of the divine law that men of loyalty should receive the reward of their loyalty, and the proud and violent the retribution of their lawlessness (*vv.* 24-27 [25-28]). The men of loyalty are the Jews; the proud and violent are expressly identified with the Arabians and the Ishmaelites.

Not less fierce is the language of Ps. 110, nor does the ordinary text suggest any palliating considerations. Probably no psalm makes equally heavy demands on the textual critic. Applying our key, however, we seem to see that Ps. 110 is based on that earlier narrative which probably underlies our Gen. 14 (see MELCHIZEDEK, SODOM AND GOMORRAH), and represented the battle of the kings as fought near Kadesh, and the chief of the kings opposed to the king of Sodom as the king of Jerahmeel. To the psalmist this ancient exploit of the divinely favoured Abram was a type of the still greater exploit of Yahwè himself in destroying the people which had so cruelly oppressed the Jews. An approximate view of the original text is,—

5 The Lord will shatter Jerahmeel[1] | in the day of his wrath,
6*a* He will judge mighty kings | for the treason of their pride.
6*b* [The Lord] will smite Geshur[2] | on the land of the Arabians;[3]
The kings of Rehoboth[4] he will destroy, | the princes of Jerahmeel.[5]

Is any one of these three psalms a royal psalm, as referring either to a contemporary king or prince (such as Alexander Jannæus of whom Hitzig and Smend[6] have thought) or to the Messianic king himself?

(*a*) *Psalm* 2.—Certainly Ps. 2 is not. The antithesis throughout is between Yahwè and his people on the one hand, and the Jerahmeelites on the other. Partly through accidental corruption of the text, partly through editorial manipulation, Ps. 2 was made into a psalm of the Messianic king.

In the course of a thorough search for the underlying original text משיחו 'his anointed' and מלכי 'my king' naturally attract suspicion. משיחו has probably arisen out of חֲסִירו (similarly in 20 7 [6] *a* 28 8 84 10 [9] 89 52 [51] 105 15), and the words, so difficult to translate satisfactorily, ואני נסכתי מלכי (*v.* 6), should probably be וְעַל־מִשְׁכְּנֹתָיו יַחְמֹל, 'on his dwelling-place he has mercy.' The reason is (1) that מַלְכֵי (*v.* 2) and מְלָכִים (*v.* 10) are certainly corrupt (read ירחמאלים 'Jerahmeelites'), and (2) that the reading suggested makes the last couplet of stanza ii. correspond to the last of stanza i., which should probably run,—

Let us beat down their sanctuaries,
Let us destroy their palaces.

(*b*) *Psalm* 18.—Can we pronounce a different verdict on Ps. 18? It is natural to think that the psalm is a dramatic utterance of David, and that its exaggerations are to be viewed as virtual predictions of a future son (or future sons) of David, who shall raise his kingdom to a height never attained by the historical David (so *OPs.* 206). This is the view expressed in the liturgical appendix (*v.* 51 [50], unless *c* is a later addition), but is nevertheless wrong. The pious community is the speaker,[7] as is plain from the otherwise far too bold assertion of legal righteousness, and the Deuteronomistic phraseology employed.

It is true, the speaker is equally bold in the assertion of a reward already received for his righteousness. But a poet and a fervent believer in the promises can take this imaginative license. The warlike energy claimed is not more surprising in this psalm than in Ps. 29, or than in 149 6, where we learn that faithful Jews (חסידים) will know (by supernatural teaching?) how to wield a two-edged sword. There is no need, be it said in passing, to bring such psalms down to the Maccabæan period. The bitterness against the Edomites seems to have been perennial, and as they were probably types of all hostile peoples fresh occasion for vehement psalms was always arising.

The Davidic origin of Ps. 18 has been thought (*e.g.*, by Delitzsch, Baethgen, König, and Kirkpatrick) to be guaranteed by the occurrence of the psalm (with variations of reading) in 2 S. 22, a passage which, together with the *māšāl* in 23 1-7, forms probably, as Budde rightly states, the latest addition to the Books of Samuel.[1] When the hymn in question was appended to 2 S., a liturgical appendix (*v.* 51) referring to Yahwè's anointed king and to David and his descendants had already been attached; and the original title had been partly corrupted, partly deliberately altered, so as to make the hymn suit as an illustration of the life of David. The true text of the title (when emended according to the analogy of other titles, see § 45; cp § 12) makes no reference whatever to David. A Davidic, and even, more generally, a pre-exilic date is excluded by the idealistic religious and political outlook in *vv.* 32 44 50, by the Deuteronomic view of the covenant in *vv.* 21-28 and the Deuteronomic expressions in *vv.* 22-24, and by the points of contact between the psalm and the so-called song and blessing of Moses, Dt. 32 *f.* For it took time for the ideas and language of Deuteronomy (which, moreover, is no longer in its original form) to affect religious literature. The psalm, however, appears to be of earlier date, not only than Pss. 116 and 144 Prov. 30 (*v.* 5), and Hab. 3 (*v.* 19), but also than Is. 55 (*v.* 5), unless, indeed, we hold (this theory has much to recommend it) that Is. 55 3-5 is a very late insertion, made after Ps. 18 had become misinterpreted as a triumphal song of David. References to the Jerahmeelites and Arabians in stanzas 13 and 14 complete the parallelism between the second part of Ps. 18 and Ps. 2 (revised text).

(*c*) *Psalm* 110.—Ps. 110 remains. Is this a royal psalm? If so, who is the king or prince referred to? Bickell and G. Margoliouth[2] independently have noticed that *vv.* 1-4 (beginning with שֵׁב) form an acrostic with the name שִׁמְעֹן; the rest of the acrostic apparently was lost, the text of the psalm being mutilated and otherwise in disorder.

The present writer has shown[3] that, if the text is correct, any other Jewish sovereign but Simon the Maccabee is hardly conceivable as the subject of the psalm; on the acrostic, however, it would be unwise to lay any stress,[4] for nothing is easier, but nothing more hazardous, than to discover or imagine such acrostics. If the psalm was addressed to Simon, we can plausibly account for its imperfect form; the omission of the latter part may have arisen out of a desire to facilitate a Messianic reference.[5] The view is plausible; but על־דברתי מלכי צרק (*v.* 4*b*) has not been perfectly explained, and מלכי־צדק in Gen. 14 is explained elsewhere (see MELCHIZEDEK) as a corrupt reading.

Using the experience which long converse with the text of the psalm ought to give, we arrive at the reading (for *v.* 4*b*), 'I establish thee for ever, because of my covenant of loving-kindness' (see MELCHIZEDEK). To whom is this oracle addressed? Evidently to the same person as the promise of the subjugation of his enemies. The defeat of the king of Jerahmeel was a prophecy of the overthrow of all subsequent enemies, provided of course that the children of Abram displayed their father's character. Must not, then, the true subject of

1 ירחמאל several times underlies ימין. Here it is latent in על ימינך.
2 Underlying ראש.
3 Concealed under רבה.
4 Underlying בדרך.
5 Dittographed, and underlying על־כן and ירים.
6 In *Rel.-gesch.*(1) 385; but Smend now holds the people of Israel to be the 'king' referred to.
7 In support of this view we must not refer to the phrase 'of the servant of Yahwè' in the title, for לעבד יהוה, here, as in 36 1 (see § 25 [10]), is corrupt.

1 To assert with Cornill (*Einl.*(3) 107) that Ps. 18 was taken into the Psalter from 2 S. seems not very judicious.
2 See the instructive correspondence in the *Academy* for 1892.
3 *OPs.* 21-29.
4 Duhm (on Ps. 110) and Marti (*Jesaia*, 242) think otherwise.
5 Che. *Jew. Rel. Life*, 105.

the psalm be Abram?[1] On this, however, we lay far less emphasis than on the previous results. All that we can assert with confidence is that the psalm is not a royal one. If the text of *v.* 4*a* is correct, it predicts the perpetuity of a priesthood; if an appeal be made to 'Melchizedek,' we reply that even Duhm, who accepts *v.* 4*a*, is prevented by his critical conscience from accepting *v.* 4*b*, except after cancelling the interpolated (?) 'Melchizedek,' and that if he had listened to his linguistic conscience he must have questioned the prosaic and ambiguous על־דברתי. But though the original psalm is neither royal nor Maccabæan, we may plausibly conjecture that the text was edited and conjecturally restored in early Maccabæan times with reference to Simon.

ii. *Psalms* 20 *f.*—Pss. 20 and 21 may also conceivably have been edited and partly recast in Maccabæan times.

30. Secondly, Ps. 20 *f.*

We might thus account for the vehemence which deforms Ps. 21,[2] and which, unless our well-tested principles of textual criticism are altogether at fault, did not appear in the same intensity in the original psalm. Christian psalms, indeed, they are not; but the bitterness is not so excessive as has been imagined, and can be accounted for by the extreme provocation given to the Jews by the Edomites. The fifth quatrain of Ps. 21 and the first half of the sixth should probably run nearly as follows:—

Thou wilt put an end to the Rehobothites and the Ishmaelites;
Thy presence, O Yahwè! will annihilate them.
The Zarephathites thou wilt make to perish from the land,
And the Misrites from the face of the ground.
Yea, thou wilt put an end to the Aramites and the Cushites,
The Rehobothites thou wilt rebuke to their face.[3]

When Pss. 20 and 21 are looked at as wholes, it becomes plain that the speaker ought, in accordance with parallels elsewhere, to be the pious community, whose salvation in time of trouble brings joy to each and all of its members (20 6*a*), and who can permissibly be described both as a person and as a collection of persons (20 10*a* and *b*; 20 6 21 2).

The only objection is drawn from הַמֶּלֶךְ in 20 10 [9] and מֶלֶךְ in 21 2 [1], from מְשִׁיחוֹ in 20 7 [6], and perhaps from the עֲטֶרֶת פָּז in 21 4 [3]. But the ה in המלך is dittographed; מלך is a corruption of עמך (cp *y* and ל in the Palmyrene script), and משיחו as in 2 2 of חסידו (cp also, especially, 28 8 *f.*). As for the 'crown of choice gold,' it means no more than what is said in 8 6 [5], 'with glory and state didst thou crown him.'

iii. *Psalms* 61 and 63.—Pss. 61 and 63 are obscure only as long as we hesitate to criticise the MT. Ps. 61

31. Thirdly, Pss. 61 and 63.

is composite. Verse 1 [2] is a fragment of a psalm of exile, which is akin to Pss. 42-43; the rest of the psalm illustrates Pss. 2 21 83 110. It is enough to quote *vv.* 4-7 [5-8],—

For thou hast heard my wail,
Thou wilt grant Israel's request;
He will shatter Jerahmeel and Zarephath,
He will beat them down like Moab and Midian.
He will abide before Yahwè for ever,
Lovingkindness and faithfulness will preserve him.[4]

---

[1] לארני is most unlikely. Since ד and ר are scarcely distinguishable, and ני and ם are constantly confounded, we may provisionally read לא[ב]רם, and continue מירחמאל [ב]שב[ו]. ליכיניעד may easily have arisen out of מירחמאל by metathesis and slight corruption.

[2] Duhm once more brings in Alexander Jannæus.

[3] We can only mention here that מותנור (*v.* 10) probably comes from רְחֹבוֹתִים, and אשלעת from יִשְׁמְעֵאלִים. באפו is an editorial insertion; פָּנֶיךָ goes with יְבַלְּעֵם (so point; cp Lam. 4 16). מושכם probably comes from אֲרָם וְכֻשִׁם; בכיתריך from רְחֹבוֹתִים; תכונן from תּוֹכִיחַ.

[4] On the emendations see Ps.(2). We can only mention here that יראי in *v.* 5*b* comes from ישראל, that the following word שמך should be a corruption of יְמַחֵץ, and that ימים and עלימי מלך are both corruptions of ירחמאל (dittographed), while תוסיף is one of the many corruptions of צרפת. מן in v. 8*b* probably comes from a dittographed מרין; the preceding line should run יִתְּצֵם כְּמוֹאָב וּכְמִדְיָן.

PSALMS (BOOK)

Ps. 63 also refers to the hated enemy; but the intemperate language of *v.* 11 [12] is due to textual corruption. The leading idea is simply this—that pious Jews, at a distance from the sanctuary, and in peril of their lives, call upon Yahwè to restore to them their priceless spiritual privileges. At the close of the psalm the speaker expresses his confidence that Yahwè will annihilate Israel's dangerous foes, and that Israel will praise God for his goodness in the temple. Why should a king be referred to? Both Grätz and Toy (*JBL* 18 162) have noticed the problem; but the key was wanting. The clause in question comes after a description of the sufferings caused to the Jews by the N. Arabian populations, and the right reading almost certainly is יְרַחְמְאֵלִים יְמַחֵץ יהוה, 'The Jerahmeelites Yahwè will shatter.'[1]

iv. *Psalms* 89*b* and 132.—Pss. 89 (or rather, 89*b*[2]) and 132 have been thought to refer to the Jewish people

32. Fourthly, Pss. 89*b* and 132.

as Yahwè's anointed. This at least is plain—that the psalmist could not have written the words 'they insult the footsteps of thine anointed' (*v.* 51 [52]), meaning 'they insult thy people in its goings.' Nor is it easy to admit that after promising perpetuity to the family of David (132 11 *f.*) and joy to the pious members of the community of Zion (*v.* 16*b*), a psalmist could proceed to say that on Mt. Zion Yahwè would cause a horn to spring forth to David, and that he had prepared a lamp for his anointed. Thus there is only a slight parallelism between the two psalms—viz., their common reference to the perpetuity promised to the house of David. Ps. 89 records the deep despondency of the community at the apparent failure of the promises;[3] Ps. 132 is a dramatic representation of the culminating point in the traditional life of Solomon, with an underlying reference to the future Messianic king. In the latter psalm, 'mine anointed' (משיחי) needs no alteration; in the former, criticism proves convincingly that עקבות משיחך is a corruption of כְּלִמּוֹת חֲסִידֶיךָ ('the insults of thy loyal ones') ‖ to חֶרְפַּת עֲבָדֶיךָ ('the contumelies of thy servants').[4]

The most various opinions have been held as to the relation between 132 8-10 and 2 Ch. 6 41 *f.* The form in which the passage is given in the psalm is surely the more original (cp Ehrt, *Abfassungszeit*, etc., 66 *ff.*); but that does not prove that Ps. 132 is of later date than Chronicles. An interpolation in 2 Ch. from the psalm seems very probable.

v. *Psalms* 45 72 101.—Pss. 45, 72, and most prob-

---

[1] The parallel line has fallen out.

[2] The composite character of Ps. 89 is plain from the difference both of metre and of subject in the two parts. Verses 1-18 [2-19] are mostly in tetrameters and describe the greatness of Yahwè and the happiness of his people; *vv.* 19-51 [20-52] are in trimeters and describe the promises to David and Israel and their failure. According to Baethgen, 89 18 [19] refers to the ideal king—the Messiah, who is visible only to the eyes of faith. This is most unnatural. Unless we are willing to suppose a ל of emphasis, we must read כי יהוה מגן לנו | וקדוש ישראל מלכנו, 'for Yahwè is a shield unto us, the Holy One of Israel is our king.'

[3] Sellin (*Serubbabel*, 194 *ff.*; *Studien*, 2 191 *ff.*) thinks of ZERUBBABEL [*q.v.*], the unsuccessful Messianic king (?). But the real or imaginary background of Ps. 89*b* is the Jerahmeelite oppression from 600 B.C. onwards.

[4] Verses 51 *f.* [50 *f.*] represent the same couplet in different forms (see *Ps.*(2)). Duhm thinks that עק׳ מש׳ may mean 'the footsteps of thy fugitive king,' alluding to the flight of Alexander Jannæus (88 B.C. ?); cp Jos. *Ant.* xiii. 14 1 *f.* As if any psalmist could have spoken thus of such a miserable king! Besides, in Ecclus. 47 2 there seems to be an allusion to Ps. 89 20 [19]: מורם (cp הֲרִימוֹתִי); and in Ecclus. 45 15*e* to Ps. 89 30 [29]: ולזרעו כימי שמים.

ably 101, however, are royal psalms; the king is the Messiah; every other view is encumbered with difficulties,[1] and the one difficulty specially attaching to the present theory which is enforced upon us by textual criticism, can be surmounted. The Messiah is described in all three psalms as a second Solomon. Of course it is the later legend of Solomon that is built upon.

33. Fifthly, Pss. 45, 72, and 101.

We see this especially in the poetic picture in Ps. 45. Admiring mention is made of the king's singular wisdom and eloquence (cp 1 K. 4 29-33 [5 9-13] 10 6 *f.* 23 *f.*), of his success in war (2 Ch. 8 3), and of his righteous rule (1 K. 3 16-28). Of all these divine gifts, the greatest is the king's inflexible justice (eulogised again in Pss. 72 and 101), of which his political influence, his extensive commerce, and his vast supply of gold (1 K. 10) are the reward. It is the crown of his felicity that he has a queen-consort, beautiful, and richly adorned, who is an Egyptian princess (see translation below, and cp 1 K. 3 1 11 1-3). Lastly, the king addressed has a prospect of a family of sons, whom (with an allusion to 1 K. 4) he may place over the provinces of Palestine.

In Ps. 72 the Solomonic element is much less striking. The king is called the 'king's son,' a phrase suggested by the coronation of Solomon during David's lifetime, and glowing expectations are formed of the justice of his rule. He is tender to the righteous poor but severe to the oppressor, and more especially severe to those Cushites, Jerahmeelites, and Edomites, who were the worst enemies of the Jews in the Babylonian and Persian periods. This contemporary reference is more prominent in Ps. 45 than in Pss. 72 and 101; but of its existence criticism hardly permits us to doubt.

Of these three psalms—the only strictly Messianic ones in the Psalter—brief specimens may be given. The reader will find that where the translation appears most novel, the text as it stands is singularly obscure. A near approximation to the truth is, of course, all that can be asked.

45 6 Upon those that hate thee, O thou hero! thine arrows will descend;
They will fall upon the men of Arabia and Jerahmeel.[2]
7b A sceptre of justice is the sceptre of thy kingdom,
8 Righteousness thou lovest, iniquity thou hatest;
Therefore peoples do homage unto thee,
[All kindreds of the nations serve thee].

*

11 Hearken, O Egyptian maiden,[3] lean thine ear;
Forget thine own people, and thine own father's house:
12 For the king longs deeply for thy beauty;
For he is thy lord [and Yahwè's Anointed]:
13 And unto thee will they bow down, O Egyptian maiden, with gifts,
The richest of [all] people will sue for thy favour.

*

72 5 He shall crush the folk of Cusham,
And destroy the race of Jerahmeel;[4]
6 He shall bring down Maacath and Amalek,
Those of Rehoboth and of Zarephath.

*

[1] As long as we adhere to the traditional text, it is difficult not to look out for a post-exilic king to whom Ps. 45 in particular may be applied, and Smend (*Rel.-gesch.*(2) 376, n. 2) still (1899) applies Pss. 45 and 72 to some Greek king. In (1) (1893) he thought of Ptolemy Philadelphus for Ps. 72. The fullest treatment of the claims of this Ptolemy to be the hero of Pss. 45 and 72 will be found in *OPs.* (1891), pp. 144-146, 156, 168-172, 183. The Messianic hypothesis, however, is adopted in *Jew. Rel. Life*, 106-108. Pratt (*JBL* 19 [1900] 189 *ff.*) finds a reference to the bridal relation between Yahwè and his people, and supposes a nucleus, consisting of a secular royal ode of smaller dimensions. Really, if we presuppose MT, we may form almost any theory. Budde, in his treatment of Ps. 101 (*Exp.T.* 8 202 *ff.*) shows a freer spirit. He thinks that the psalm was originally an utterance of Yahwè, and that it has been transformed to make it suitable for the community. No doubt some passages of the psalm might be applied to Yahwè. No doubt, too, if a historical king wrote the psalm, we might accuse him of self-consciousness. But the psalm is virtually a prophecy, and corresponds to Is 11 3-5.

[2] בלב איבי המלך (*v.* 6) should probably be בערבים וירחמאלים. Duhm's מִלֵּב for בְּלֵב is far too superficial to meet his object.

[3] For בת וראי (*v.* 11) and בת צר (*v.* 13) read בַּת מִצְרַיִם. The original tradition made Solomon's chief wife a Miṣrite; but the tradition was presumably already corrupted in the time of the Psalmist.

[4] וירכא עושק and ייראוך עם שמש are both corruptions of יַדְכָּא עַם כּוּשָׁם. שמשו also covers over ישמ״ד. לפני, as elsewhere, should be לבני. ירח דור דורים comes from ירחמאלים. For the other emendations see *Ps.*(2).

9 Before him those of Cush shall bend the knee,
The Arabians shall lick the dust;
10 The Ishmaelites shall bring gifts,
Those of Sheba shall offer gold.

101 Lovingkindness and justice will I seek, | Yahwè's righteousness will I practise.
To the cause of the orphan I will give heed, | to the suit of the widow.
In Jerahmeel I will destroy | all the wicked ones of the land,
That I may cut off from the land of Yahwè | all workers of wrong.[1]

We have now practically closed our consideration of the royal psalms, for on Pss. 28 and 84 it is enough to refer back to the remark (§ 29, i. *a*; 30, ii.) that משיחו, 'his anointed,' is several times in the Psalter miswritten for חסידו, 'his loyal (or pious) one.' There are no royal psalms in the sense supposed by most critics; there are three, and only three, psalms which are in the narrower sense Messianic, though in the broader sense a large proportion of the psalms deserve this distinctive epithet.

34. Result.

We can now return to the question raised in a former paragraph (§ 24, end), How are we to account for the addresses in certain psalms to an as yet non-existent king? Any interpreter approaching Pss. 45 72 101 for the first time would suppose them to refer to a contemporary king. Yet there are strong reasons for rejecting this view. The psalmists are not ordinary poets. They are all heroes of faith, and some of them, at any rate, hold strongly to the belief in the Messiah, and regard the two kings who were specially idealised by the popular imagination—David and Solomon—as types of the expected ideal king. They trusted God's promise, and prophesied the coming of the king by portraying him in the likeness of Solomon, as if he were already on earth. 'For unto us a child is born, unto us a son is given.'

We will next take a brief survey of four important psalms, which have been traditionally held to contain references to the immortality of the individual. These psalms are two (David) Jedithun-psalms, viz. 16 and 17; one Korah-psalm, viz. 49; and one Asaph-psalm, viz. 73.

35. Psalms of immortality?

i. *Psalms* 16 and 17.—Both 16 and 17 express strong love for the temple, and a sense of security derived from Yahwè's presence in the sanctuary. Both also represent the speaker as exposed to danger from the N. Arabian enemies, *though the references are obscured in* our present corrupt text.

Ps. 17 reminds us strongly of Ps. 22*a*, in which the Jerahmeelite or Edomite oppressors are variously designated (see Che. *Ps.*(2)) as 'lions' and 'wild oxen with pointed horns,' 'traitors' (ברני, misinterpreted in *v.* 19 [18] as בְּגָדַי, 'my garments'), and of Ps. 18 (a part of the description of the terrifying 'snares' and 'floods' given in this psalm recurs in 17 10, restored text). Ps. 16, in its triumphant contempt for outward dangers, reminds us of Pss. 3 4 and 23.

The two psalms (16 *f.*) are connected by their parallel ending; and both are akin to the large group of psalms expressing love of the temple, and especially perhaps to Ps. 27 *a* and to the miscalled royal psalm, 61 (cp 61 8*a* with 16 11 17 15).

In Ps. 16 the speaker rejoices in the sure hope of deliverance. *In spite of his troubles, he continues to praise Yahwè, and his* one delight is to visit the sanctuary, where he renews that sense of the divine favour which keeps his inner being in perfect peace. He is confident that Yahwè will not suffer his 'loyal one' to perish. Does the psalmist mean himself? No; it is Israel who says that in heart, mind, and body it is jubilant. The glorious Messianic time (Messianic, in the wider sense) is at hand. When it comes, life will be life indeed. The way to this life is

[1] For אשירה, אזמרה read אֶשְׁמְרָה, אֲשַׁחֵר (*v.* 1). Also בְּיֵרַחְמְאֵל אַצְמִית (*v.* 2), and אַשְׂכִּיל בִּדְבַר יָתוֹם | בְּרִיב אַלְמָנָה (*v.* 8*a*), and מֵאֶרֶץ יהוה (*v.* 8*b*). Verse 8*a* does not resume what has gone before, but adds a fresh detail. The worst offenders against morality are in the land of Jerahmeel or Edom. Here, too, the Messianic king, who is the speaker, will put an end to the wicked. Thus, as the result of all this purification, Yahwè's land will have none but righteous people (Is. 60 21*a*).

known to Yahwè, who will show it to his people, and fill Israel with joys which are past imagining.

> 10 My soul thou wilt not yield to the nether world,
> Thy loyal one thou wilt not suffer to see the pit;
> 11 Thou wilt make known to me the path of life,
> Thou wilt satisfy me with joys in thy presence.[1]

The prayer for protection in Ps. 17 follows upon an earnest self-justification in *vv.* 2-5. The protection which the speaker craves is guaranteed by the presence of Yahwè in the sanctuary; while stands the temple, pious Israel will stand. Yes; here again there is nothing which according to a strictly critical exegesis points to an individual. It is Israel who, perceiving the imminent danger in which, humanly speaking, he stands, breaks out into a curse—a borrowed curse (see 11 7)—on the enemy. For himself, however, he expresses the sure confidence of Messianic felicity. Israel will behold Yahwè's face in unclouded brightness, and the temple will be richer in spiritual privileges than at present it can be.

> 15 As for me, by [thy] righteousness | I shall behold thy face;
> I shall be satisfied with thy loving-kindness | in thy habitation.

ii. *Psalm* 49.—Ps. 49 too, has nothing to do with the individual, according to a critical exegesis. It deals with a problem very familiar to Jewish sages—viz., the right attitude of the pious in view of the prosperity of the wicked.

The answer, Wellhausen supposes, is that 'death makes all equal, and strikes the man who has much to lose harder than him who has little.' The correctness of this may, however, be doubted, and even Wellhausen holds that *v.* 15 [16] supplements the negative consolation that death closes the happiness of the ungodly by the positive comfort that God may deliver the godly from sudden death ('Psalms,' *SBOT* 185). Duhm, however, is of opinion that the psalmist holds a doctrine of the immortality of the pious, which must, he thinks, have been connected with well-defined ideas as to the place to which a good man was 'taken' after death. (So also *OPs.* 382 406 *ff.*; cp Eschatology, § 31, col. 1346.) Obviously this interpretation has a bearing on the question of the date of the psalm; in fact, Duhm includes Ps. 49 (like Ps. 73) among his Pharisee psalms.

So much at least is undeniable, that for a certain class of persons, according to the psalmist, death has a penal character. But can we stop short here? Is it likely that the psalmist, who wrote not for a remote age but for his own generation, only referred vaguely to the persons punished by death as the rich and the wicked? Certainly not. We have to seek for underlying references to historical people, and if we seek these aright, we shall find them; for Jewish editors were not arbitrary forgers—they did but put the best interpretation they could on inaccurately transmitted passages, and they have left us the means of correcting their errors. The only passage in Ps. 49 which we can safely assign to the editor is *vv.* 3 and 4 [4 and 5]. The remainder is really an attack on the Jerahmeelites or Edomites, who would seem to have settled amongst the Jews, to have amassed great wealth, not always by legitimate means, and to have denied the moral government of God (10 4 11 13 14 1, etc.). The first stanza should probably run thus,—

> 1 Hear this, all ye Edomites,
> Attend, all ye Jerahmeelites,
> 2 Both traitors and deniers,
> The wicked and the impious together.

And the three most disputed verses (13-15 [14-16]) should probably run thus,—

> 13 This is the fate of those that deny God,
> The latter end of those that insult Israel.
> 14 For ever they will be prostrate in the pit,
> They will seek earnestly in the darkness for daybreak.
> *
> The pangs of death will affright them,
> The terrors of Shĕōl will take hold of them.
> 15 (But) surely my soul God will ransom,
> From the hand of Shĕōl he will take me.[1]

1 That the speaker looks for an endless *life* is certain (cp 21 5 [4] 61 8 [7]). But נצח (EV, 'for evermore') has passed out of the revised text. All the stanzas of Ps. 16 have four lines except (at first sight) the fifth. The four preceding lines all have a verb; the fifth has none. This is the more remarkable as the adverb [ל]נצח follows. The truth is that, for נעמות בימינך נצח we should read חסר במשכנותיך. This is also the true close of Ps. 17. By accident, it was copied into Ps. 16 from the column in which Ps 17 was written. See *Ps.* (2).

Stern and uncompromising is the refrain,—

> 12 20 Traitors will not come up from Shĕōl.
> The impious are destroyed in Deathland.

Thus the background of Ps. 49 is the same as that of so very many other psalms—the Jerahmeelite oppression; and the comfort proffered to Jewish sufferers is that there will soon be an end of the oppressors in Shĕōl.

iii. *Psalm* 73.—Ps. 73 has the same historical background as Ps. 49. The Edomites are settled in the land, and their prosperity, which violates the orthodox doctrine of retribution, tempts the Jews to apostasy. It is not very likely *a priori* that such a psalm would express, even as it were by a lightning-flash, the intuition of immortality.

As the traditional text stands, it is natural to suppose this, mainly on account of *vv.* 15-17, where the speaker apparently distinguishes himself from the 'generation' of Yahwè's 'sons'—*i.e.*, the pious community—and also refers to a visit which he paid, during his mental struggle, to the sanctuary of God. If the speaker in the psalm is an individual—as this passage appears to imply,—must we not suppose that in *vv.* 25 *f.* he expresses the assurance of the perpetual duration of his blissful communion with God? Verses 15-17, however, are not altogether correctly read, and the order of the lines has been disturbed. The psalm consists of fourteen quatrains; nos. 8 9 and 10 should be composed of *vv.* 16 and 21; *vv.* 15 and 22; and *vv.* 17 and 18. When we examine the text closely, we find that the 9th and 10th quatrains need emendation. The whole passage should probably run thus,—[2]

> 16 And when I sought to comprehend this,
> Too painful seemed it unto me;
> 21 For my heart was astonished,
> And in my reins I was horror-stricken.
> *
> 15 I myself rejected wisdom,
> Thy loving-kindness and faithfulness I denied;
> 22 I became a dullard, I was ignorant,
> I lacked discernment concerning thee;
> *
> 17 Until I gave heed to the judgments of God,
> And discerned the future of those men:
> 18 How (suddenly) calamities overtake them!
> Thou castest upon them gloom (of Deathland).

A section of the Jewish community (including, it would seem, many of the leading members) had, inwardly at any rate, 'denied God,' even if some of them did not actually join the 'assembly of the impious' mentioned in Ps. 50 (*v.* 18, emended text). Looking back upon this, they saw how foolish they had been, and recognised that they had missed the only possible explanation of the facts, viz. that when God's time (the Messianic judgment) has come, the wicked will be suddenly swept away like grass (cp 92 7 [8]). Pious Israel recovered its balance, and the joyous consciousness of the divine Companion returned to it. No inward temptation nor outward misfortune can cause him to stumble. He longs for Yahwè—the peerless God—to reveal himself by some mighty deed as Israel's eternal portion.[3] No more will he give way to doubt; the denial of Yahwè leads to ruin.

Our conclusion is that there are no immortality psalms

1 The emendations which, the present writer holds, are forced upon us are too many to be all given here (see *Ps.* (2)). A few, however, may be mentioned. In *l.* 1 read זה־דרך מכחשי יהוה; in *l.* 2, ואחרית מחרפי ישראל. The refrain is—

בֹּגְדִים מִשְּׁאוֹל לֹא יַעֲלוּן
נְבָלִים בְּמוֹת נִדְמוּ

2 In *ll.* 5, 6 read—

אֲנִי מָאַסְתִּי חָכְמָה
חַסְדְּךָ וַאֲמִתְּךָ כִּחַדְתִּי

In *l.* 8 read, with Grätz, תְּבוּנוֹת חָסַרְתִּי עִמָּךְ. In *l.* 9, עַד־אַשְׂכִּיל אֶל־מִשְׁפְּטֵי אֵל; in *l.* 10, עֲלֵיהֶם הִפַּלְתָּ צַלְמוּת.

3 Verse 26 has received some accretions. It should probably run thus,

> My flesh and my heart pine for him;
> Yahwè is my Rock and my Portion for ever.

for the individual, only for the community, and that

36. Result. Ps. 73 is not only a psalm of faith in immortality, but also a psalm of doubt of God's fundamental attributes—a doubt from which the community emerged with a full spiritual assurance based on the more deeply realised doctrine of the imminent Messianic judgment. As a psalm of doubt, Ps. 73 has its parallels in Pss. 39*a*, 94*a*, and 116; but we must not here enter on the consideration of these much misunderstood poems. We may, however, state the conclusion, forced upon us by our new textual criticism, that the view of Rudinger, Olshausen, Hitzig, Frankel (*Einfluss der Palästin. Exegese auf die Alexandrin. Hermeneutik*, 1851, p. 233), that at any rate Ps. 73 indicates contact with Hellenism, is incorrect. The problem before the psalmist in this and in the parallel psalms is the prosperity of the wicked rich who had flocked into Palestine from the neighbouring regions, and who ground down the poor and faithful Jews.

From what has been said, it will be plain that a historical sketch of the different phases of thought in

37. Ideas of Psalter varied. the Psalter would be extremely difficult to make. The religious ideas of the Psalter[1] are no less varied than those of the community, nor could we be so rash as to attempt to describe them at the close of a critical article. From what has been said already (see § 2) it must be plain that we have in the Psalter no merely local product. The Psalter is, at least in theory, catholic and œcumenical; meant for synagogues as well as for the temple; for the whole empire of Yahwè as well as for the central Judæan province. That its ideas should be all equally noble, was not to be expected. It is probable, however, that the nett gains from a more thorough criticism of the text of the psalms would be much in excess of the losses, and that the average religious standard of the psalmists would prove to be as much above that which it is commonly supposed to be as the character of their Hebrew style. The imprecatory psalms, in particular, would be seen to be less shocking throughout than they appear to be in the traditional text (see Che. *The Christian Use of the Psalms*, 1899). This, if correct, is of no slight importance, for it is a heavy drawback to the religion of the psalmists that fervent love of God should be accompanied with such intemperate expressions of hostility to 'the wicked.' While these psalms stand in their present form, it is difficult indeed to respect the Psalter as much as we should like, and we can hardly wonder that such a candid writer as Duhm should express such strong repugnance to much that it contains. Only upon the basis of a thoroughly revised text can we, properly speaking, maintain that the Psalter is a record of the religious consciousness of the Jewish Church.[2]

The definition here given of the Psalter is in harmony with the result of the controversy as to the 'I'-psalms (see § 6). It is still more obviously in accordance with the fact that most of the psalms in books iv. and v. are congregational utterances. 'One might illustrate the combination of "I"- and "We"-psalms by parallels from the Greek choruses. But the phenomena of books iv. and v. are perhaps best explained thus. The instinctive personification of the church-people in the "I"-psalms was a survival—an inheritance from antiquity. It was natural that later religious poets should begin to look upon their nation in a more modern light as an organisation of individualities. They did not indeed go so far as those modern hymnists who have half-filled the popular hymnals with lyrics of a strongly personal tone. Rarely do the Hebrew psalmists disclose their personality. They had indeed their private joys and sorrows; but they did not make these the theme of song. The individual consciousness was not sufficiently developed for this. . . . But the later "We"-psalms, though not less national than the others, indicate a perception that, as Kingsley has said, "communities are for the divine sake of individual life, for the sake of the love and truth that is in each heart, and is not cumulative—cannot be in two as one result"' (*OPs.* 265 *f.*).

It must, however, be remembered that not only do books iv. and v. contain 'I'-psalms, but a later uncanonical Psalter (that 'of Solomon'; §§ 41 *f.*) has a number of psalms of the personified community. Individualism needed for its development a new and unique impulse; not yet could the floods of personal feeling and emotion break through the dams, and transform the whole aspect of poetry.

With regard to the chronology of the Psalms, it is not much that we can say, taking our stand on a

38. Chronology of Psalms. carefully revised text. It is, however, reasonable to hold that the groups or collections of psalms—Pss. 90-106 Pss. 107-129 Pss. 135-145, and Pss. 146-150—in which the psalms only occasionally bear titles, contain many works of the Greek period. Among the possible or probable representatives of an earlier age are Ps. 90 at any rate, for the first part of this psalm (90*a*) can hardly be separated from Ps. 89*b*, both being, from the same causes, in the same despondent tone and both (as criticism shows) Ezrahite psalms; also Ps. 94, which interrupts the 'new song' of praise, and goes with the kindred 73rd psalm; also 137, as one of the chief of the anti-Edomite psalms, and the group called שיר המעלות, or rather לשלמה, 'of Salmah,' but best known to English readers as 'Songs of degrees,' which may have been originally enclosed by Hallelujah groups (*i.e.*, before 119 was inserted). Pss. 113-118, called the 'Egyptian Hallēl,' a group which seems filled by the hope of a new and great event comparable to the Exodus (cp Is. 10_{24} $_{26}$)—such a hope as the conquests of Alexander may well have fanned into a flame—and Ps. 146-150, cleverly called by Nachman Krochmal 'the Greek Hallēl,' must surely be allotted to the Greek age. Not, however, to the Maccabæan age. As we have seen, even 149 *b* has its parallels in psalms which we have no reason for bringing down to the time of the Maccabees. We must be careful not to exclude, on grounds of principle, from the psalms of the Greek age all those which have a real or assumed Jerahmeelite or Edomite background. It was of course not till the time of John Hyrcanus that the so-called Idumæa became a Jewish province, and we could well understand that even at a later time 'Edomite' might still be a synonym for 'oppressor.' Beyond this, it is not safe to go. The text binds us—not indeed the Massoretic or the Septuagint text, but that which underlies the tradition, and which can to a considerable extent be recovered by methodical investigation. We cannot, therefore, say with Duhm that Pss. 74 79 83 and 110, being clearly (he thinks) Maccabæan, supply fixed points for the chronology of the Psalter, and the other psalms which this critic regards as revealing their date hardly less distinctly than these—*e.g.*, the so-called royal psalms, which he places in the first rank of evidence for the time of Alexander Jannæus—are, for us, equally devoid of clear references to contemporary history.

Nor can we attach any importance to the widely held theory that Pss. 96 $105_{1\text{-}15}$, and 106_{1} $_{47}$ $_{48}$, and also $132_{8\text{-}10}$, must have been known to the Chronicler[1]—a theory which, as generally expressed (see *e.g.*, Strack, *Einl.*(4) 119), involves holding that the so-called fourth Book of the Psalms was already in existence in the Chronicler's time. This last thesis is not in itself probable. The division between books iv. and v. is not natural, and was probably not made till the final redaction of the Psalter, which cannot plausibly be said to have occurred till after the Chronicler's time. It is also less probable that the dividing doxology in Ps. 106_{48} originally contained the words וְאָמַר כָּל־הָעָם אָמֵן, 'and let all the people say, Amen,' than that these words were taken, with one slight and necessary altera-

1 For the religious ideas of the Psalter, according to the newer criticism, see *OPs.* (1891), pp. 258-452; Smend, *Rel.-gesch.*(1), 1893; (2), 1899.

2 The word 'church' is used in the wider sense, as by Dean Stanley in the phrase 'the Jewish church.' 'Community' is less familiar to us than the corresponding word *Gemeinde* is to Germans; it is also somewhat too narrow a word for use in all connections.

1 Cp Ehrt's comparison of the texts, *Abfassungszeit*, 43 *ff.*

tion, from 1 Ch. 16 36, where we read, at the close of the strange composite psalm, וַיֹּאמְרוּ כָל־הָעָם אָמֵן, 'and all the people said, Amen.' This at least is Wellhausen's view (Bleek's *Einl.*(4) 506, n. 1), which, however, seems to need supplementing. It is probable (1) that the whole of the close of Ps. 106—viz., *vv.* 47 *f.*—is borrowed from 1 Ch. 16 35 *f.*[1] (beginning וְאִמְרוּ הוֹשִׁיעֵנוּ and ending, וְהַלֵּל ליהוה [rather הַלְלוּ־יָהּ]), and (2) that both the close (*vv.* 1-5) and the opening of Ps. 106 are accretions on the main body of Ps. 106, which had been handed down in an incomplete form, and needed some such additions to make it usable. As a consequence, we cannot commit ourselves to the view that 1 Ch. 16 34 is borrowed from 106 1 (which may well be later than the Chronicler). The formula was a conventional one, and occurs in 107 1 118 1 136 1. Nor can we venture to assert positively that it was the Chronicler who copied 96 105 1-15 (see 1 Ch. 16 8-33) and 132 8-10 (see 2 Ch. 6 41 *f.*). The books of Chronicles, like other books, passed under the hands of redactors, and it is very possible that the insertions from the Psalter referred to were made by one of these.[2] We cannot, therefore, safely use the argument which is often based on these insertions to determine the date of at least a few psalms.

That there are no pre-exilic psalms, nor ascertainable fragments of such psalms, is for us at least quite certain. And though there is the abstract possibility that psalms were written in the lands of exile before the arrival of Ezra and his band at Jerusalem, the uniformity of the historical background of the psalms of book i. does not favour the hypothesis. In spite of Duhm, whose chronology of the psalms is opposed (1) to a thorough textual criticism, and (2) to the literary phenomena of the fragments of the Hebrew Sirach, we must hold that at any rate books i.-iii. belong most probably (with the exceptions of the anonymous psalms 1 2 and 33, unless 𝔊 rightly prefixes to 33 τῷ Δαυειδ) to the Persian period, or to the Persian and the very beginning of the Greek period.

It would no doubt be helpful to make out the extent of the indebtedness of the Psalter to Is. 40-66, of Jeremiah, and to Job. Owing, however, (1) to the doubt which in an especial degree hangs round the text of the Psalter and of Job, and (2) to the composite origin of all the three books mentioned, we cannot here lay much stress upon this. In a complete Introduction to the Book of Psalms a phraseological comparison of the Psalter with these books would have to be instituted; but a critical revision of the text of all four books would of course be presupposed. That there is a small element of truth in Hitzig's theory of Jeremianic psalms can hardly be doubted,[3] and even in book i. of the Psalms it is impossible not to recognise some clear points of contact with the Colloquies of Job. It is also beyond question that Pss. 93 and 96-100 are even strikingly parallel to Is. 40-66,[4] and the amount of real parallelism between psalms even in books i.-ii. and the Colloquies of Job is not inconsiderable (cp Barth, *Beiträge zur Erklärung des B. Hiob*, 1876). It would also be important in the Introduction here suggested to sift the comparisons of passages in the Psalter and in the Hebrew text (so far as known) of Ben Sira given by Schechter (*Wisdom of Ben Sira*, 13-25). There seem

39. Phraseological argument.

[1] This passage consists of a current liturgical prayer, and a liturgical benediction and doxology (similar to those placed by editors at the end of books i. ii. and iii.).

[2] Similarly Reuss, Stade, and Duhm (cp § 4, n. 3).

[3] Campe (*Das Verhältniss*, etc., 19 24 27 31 33 35) decides that Jer. 17 8 10 24 20 10 23 12 10 25 13 are the originals of Ps. 1 3 6 2 [1] 31 14 [13] 35 6 79 6 *f.* 135 7. König (*Einl.* 397) pronounces this insecure; but he has perhaps not a good eye for phraseological points of contact. Campe certainly errs on the side of moderation. Ps. 79 6 *f.*, however, is an interpolation. [Cp 𝔊's insertion of Jer. 9 23 *f.* (22 *f.*) in 1 K. 2 10.]

[4] Similarly Driver, *Intr.*(6) 383; cp Ehrt, *Abfassungszeit* (1869), 53-55; Grätz, *MGWJ* 30 (1881) 1 *ff.*; and Delitzsch's commentary.

PSALMS (BOOK)

to be several reminiscences of Ps. 147 in Ben Sira, which is a point of some critical interest. So much, as Nöldeke remarks, is clear—that Ben Sira lived at the time and in the circles in which a great part of the later psalms were written.

The linguistic argument, to which we have referred already (§ 9), has been treated with moderation by König. He computes the number of occurrences of אנכי and אני respectively, of the relative שׁ (only towards the end of the Psalter), and of רַבַּת 'much,' 'often' (also chiefly at end of Psalter), and the designation of 'myriad' by רְבָבָה (3 7 [6] [?], 91 7) and רִבּוֹ (68 18 [17] [?]). J. P. Peters' attempt to account for linguistic peculiarities in the שיר ה[מעלות by the influence of Babylonian environment, assumes, rather too confidently, the accuracy of MT. It is in fact the state of the text of the Psalter that makes it peculiarly difficult to form conclusions which can command general assent. The present writer's inference from a revised text of the Psalms is much in their favour. If the text of the Hebrew fragments of Ben Sira can be trusted, he would be unwilling to bring many of the psalms very near the generally accepted date of Ben Sira's Wisdom. Unfortunately, the correctness of many parts of the Hebrew text of Ben Sira, in its present form, is liable to the greatest doubt, and the present writer would probably go even beyond Nöldeke (*ZATW* 20 [1900] 84 *ff.*) in the extent to which he traces unbiblical words, idioms, and constructions to deep-seated corruption of the text.

40. Linguistic argument.

A singular argument is used by Duhm to confirm the late date which he assigns to a group within the group of what he calls Pharisee Psalms (viz., 9-10 14 56 57*a* 58 *f.*, 64 82 92 94 140, probably also 5 26 54 141). These psalms, he says (*Psalmen*, 'Einl.' 22), which are probably directed against Alexander Jannæus and his adherents, have a striking resemblance to most of the 'Psalms of Solomon.' Elsewhere he expresses surprise that the critics have not recognised how near chronologically the Davidic Psalter is to the Solomonic. Frankenberg too[1] has arrived at a somewhat similar result; only he assigns the Psalms of Solomon, together with a (large?) group of canonical psalms, to the period of the Syrian persecution. The existence of points of contact may be granted; but, as is shown elsewhere (see ESCHATOLOGY, §§ 64, 66), the eschatology of the Psalter of Solomon differs from that of the canonical psalms.[2] To this we must add that, in our judgment, Kosters is right[3] (against Frankenberg) in denying that there is any distinct reference in the Psalter of Solomon to contemporary history. The psalms appealed to by Frankenberg as proving a Maccabæan date and by Wellhausen[4] (cp MESSIAH, § 6) as proving a reference to the capture of Jerusalem by Pompey in 63 B.C., really refer, according to Kosters, to the catastrophe of 586 B.C.

41. Psalter of Solomon.

On this subject the present writer strongly holds with Kosters. He thinks that the references to the capture of Jerusalem may be used in illustration of Pss. 74 and 79, and even thinks it possible that the writer (?) of these psalms continues the tradition of the Jerahmeelite captivity.[5] For want of the Hebrew text we cannot

42. Their background and name.

[1] *Die Datirung der Psalmen Salomos* (1896).

[2] So too Kirkpatrick, *Psalms*, Introd. xxxvii *f.*

[3] *De historische achtergrond van de Psalmen van Salomo* (Verslagen der Koninglijke Akad. van Wetenschappen, 42), 1898.

[4] *Die Pharisäer und die Sadducäer* (Beilage), 1874.

[5] In Ps. Sol. 2 26 [30], where the death of the 'dragon' is related, ἐπὶ τῶν ὀρέων Αἰγύπτου may represent עַל־הָרֵי מִצְרִים 'on the mountains of Miṣrim,' and ἐπὶ γῆς καὶ θαλάσσης עַל־אֶרֶץ יְרַחְמְאֵל 'on the land of Jerahmeel.' So too in *v.* 29 [33] ἐγὼ κύριος γῆς καὶ θαλάσσης may be based on a faulty text, which should have run, אני אֲדוֹן ארץ ירחמאל, and in 17 15 [17] ἐν μέσῳ ἐθνῶν συμμίκτων may be a misinterpretation of בְּתוֹךְ עַמֵּי עֲרָב 'amidst the peoples of Arabia.'

finally prove the latter point; but our experience with the canonical psalms justifies us in regarding it as at least not improbable. Highly imitative the Psalms of Solomon certainly are, and among the signs of this imitativeness we may probably reckon the heading of each of the psalms *ψαλμὸς τῷ σαλωμων*—*i.e.*, מזמור לשלמה—which, consistently with our explanation of מזמור and of שיר המעלות לשלמה (Ps. 127), we may explain 'Marked: of [the sons of] Salmah' (see § 21). In other words, though the old clan-names of the temple-singers had gone out of use, the collector of these Pharisee Psalms (as Ryle and James fitly call them) adopted one of these names as a prefix to the collection and to the psalms within it. Cornill's remark (*Einl.* 295), 'How they came to the designation "Psalms of Solomon" is quite inexplicable,' is, we may venture to hope, too despondent.

Thus the Psalms of David, the Lamentations, and possibly the Psalms of Solomon agree in their assumed historical background, though the want of originality in the text of the third of these collections forbids us to speak as enthusiastically of it as of the two former books.

43. Imitative psalms.

It is true, the Lamentations as well as many of the canonical psalms are imitative; so too the psalms assigned by redactors to Hannah and Jonah respectively (1 S. 2 1-10 Jon. 2 2-9) are imitative, nor is there much originality in the psalms assigned to Hezekiah (Is. 38 10-20) and Habakkuk (Hab. 3; see HABAKKUK, § 9). But amidst these imitative compositions there are at least some, which, if not absolutely original, nevertheless shine out by a true lyric beauty.

No doubt many psalms not only of pre-exilic but also of post-exilic date have been lost. We could wish that gleanings had reached us, as in the case of the proverbs.

44. Psalm-composition.

At any rate, we have late specimens of psalm-composition in the Wisdom of Ben Sira (Ecclus. 36 1-17 50 22-24 51 1-12 51 12 (1) 51 13-29; see Hebrew text), in the Greek Daniel, in Judith and Tobit, in the Assumption of Moses (10 1-10; see Charles), and even in the NT (see HYMNS). Indeed, since prophetic inspiration still appears to have existed in NT times, we can hardly wonder that psalms as well as prophecies are mentioned as characteristic of early Christianity (cp 1 Cor. 14 26). Long indeed is the history of the development of the psalm from the rude cries of the primitive Arabian worshipper on a visit to the sanctuary (see Wellh. *Heid.*(1) 107, (2) 110; WRS, *RS*(2) 340, n. 2) to the carefully elaborated songs of the temple and perhaps too of the synagogue service.

In conclusion we give, conjecturally but not without good grounds, restorations of the historical references in the original titles of some of the canonical psalms.

45. Historical reff. in psalm-titles.

It will be remembered that again and again, in articles dealing with OT narratives and prophecies it has been maintained that these have been altered from earlier narratives and prophecies, partly misread, partly misinterpreted, so that they present historical and geographical statements widely differing from those originally conveyed. These transformed passages are analogous to the transformed psalm-titles. If by taking this course we help to rehabilitate the authors or supplementers of the titles, this can hardly be reckoned to our discredit. Such hard words have been used by critics (cp § 11) respecting the unintelligence and incapacity for clear thinking of the unfortunate editors of the psalms that a plausible critical defence of them may appeal to those who can put aside prejudice, and look at facts with a single eye. We omit the portions of the titles relative to the collections to which the psalms severally belong (on which see § 25 *f.*), and refer for details to *Ps.*(2)

Ps. 3. At the approach of the sons of Arabia and the sons of Ishmael.
Ps. 7. With reference to the Arabians, the Cushites, the Jerahmeelites.
Ps. 18. The words of Israel in the day that Yahwè delivers him from the hand of all the Arabians and from Ishmael.
Ps. 30. A Sabbath (?) supplication.[1]
Ps. 34. When the hosts of those of Jerahmeel and of Geshur fled.[2]
Ps. 51. For the Sabbath (?).
Ps. 52. Against the house of Jerahmeel.
Ps. 54. [Concerning] the Zarephathites.
Ps. 56. At beholding (?) the Zarephathites.
Ps. 57. When the sons of Ishmael and the Arabians drew near.
Ps. 59. Concerning the Ishmaelites and the house of Jerahmeel.
Ps. 60. At the oppression (of Israel) by Aram-jerahmeel and Aram-missur.
Ps. 63. At the goings-up to the house of Yahwè.
Ps. 142. When . . . among the Arabians.[3]
Ps. 143. When the sons of Jerahmeel pursued. (Based on 𝔊.)
Ps. 144. Concerning the captivity. (Based on 𝔊.)

If the truth has not always been reached, the theory that Jerahmeelite oppression is the real or assumed background of very many of the psalms has been confirmed. Neither the authors nor the editors of the psalms and the psalm-titles deserved the disparaging epithets often of late years applied to them.

The study of the psalm-titles in the versions stands aside from our present subject. It need only be said that if the explanations of לדוד and לשלמה given in § 26 are correct, the ascription of certain psalms in 𝔊 to Jeremiah, or to Haggai and Zechariah, would seem to be discredited, as belonging to a time when לְדָוִד and לִשְׁלֹמֹה (explained as giving authors' names) were already found in the titles.

46. Psalm-titles in versions.

See Staerk, 'Zur Kritik der Psalmenüberschriften,' *ZATW* 12 [1892] 91-161; B. Jacob, *ZATW* 16 [1896] 155-166; Baethgen, *Untersuch. über die Psalmen nach der Peschita*, Kiel, 1878 (unfinished); *JPT*, 1882, pp. 405 *ff.* 493 *ff.*; 'Der Psalmencommentar des Theodor von Mopsuestia in syrischer Bearbeitung,' *ZATW* 5 [1885] 53-101; 'Siebenzehn makkabäische Psalmen nach Theod. von Mops.', *ib.* 6 [1886] 261-288 7 [1887] 1-60. Baethgen's communications from the Syriac recast of Theodore's exegesis are very interesting. It is to Theodore that Theodoret alludes in the words, τὰς ἐπιγραφὰς τῶν ψαλμῶν τινες ἀπεκάλεσεν (*Præf. ad Psalmos*). He does not, however, reject the Davidic origin of the psalms, but only the reference of certain psalms to events in the life of David. David often spoke, Theodore believes, prophetically, and assumed the character of men yet unborn. This will not satisfy the Bishop of Cyrus: τολμηρὸν οἶμαι καὶ λίαν θρασὺ ψευδεῖς ταύτας προσαγορεύειν. The influence of Theodore, through the book called *Exegesis*, on early English theology has been well shown by Prof. J. D. Bruce of Bryn Mawr College, Pennsylvania (see 'Literature').

Poetical form, obviously, cannot be treated in a small compass. The subject is of great importance.

47. Poetical form.

As Briggs well says,[4] the study of the measurement of the line, and the strophical arrangement of the psalms, combined with the study of their grouping, throws fresh light upon the Psalter. The most necessary preliminary information is given under POETICAL LITERATURE, §§ 8, 9, where, too, the appended bibliography gives adequate references to the current literature. A metrical arrangement of the psalms ought to go on *pari passu* with textual revision. Unfortunately a thorough textual criticism is still a desideratum, though a thankworthy beginning has been made by Grätz, Lagarde, Duhm, and others. Whether SELAH [*q.v.*] has any relation to the divisions of psalms, is still a moot point. Refrains are clearly marked in Pss. 42-43 46 49; less certainly in Ps. 107 (*v.* 6 destroys the

[1] חֲנֻכַּת הַבַּיִת (what does this mean?) should probably be תְּחִנַּת הַשַּׁבָּת.

[2] It has actually been thought that the historical assignment of this psalm in the present title was suggested by the occurrence of טַעַם in *v.* 9 [8], and that the scribe or editor substituted 'Abimelech' for 'Achish' by a slip. Delitzsch and Kirkpatrick, however, find it hard to suppose such a slip of memory. In reality אבימלך comes from ירחמאל.

[3] It has been strangely supposed (Hupfeld, Duhm) that the title in MT and 𝔊 was suggested by מַסְגֵּר, 'confinement,' in *v.* 8 [7].

[4] *Presbyterian Review*, Oct. 1888, p. 661.

connection). Various forms of alphabetic structure appear in seven psalms (9-10 25 34 37 111 119 145).

Originally no doubt Ps. 9-10 was a perfect alphabetic poem. A later editor, however, broke it into two parts which became independent psalms through the insertion of what now forms 9 20 [19] *f.* The only fairly connected portion of the original psalm which we can with probability indicate, is *vv.* 1-12 [2-13]. In Ps. 25 34 145 (cp Prov. 31 Lam. 4), each letter begins a couplet; but in psalms 25 and 34 the ו couplet is wanting, and there is a supernumerary פ couplet. In Ps. 37, each letter begins a stanza of four lines, and in Ps. 119 each line a stanza of eight lines. For parallel compositions, see ECCLESIASTICUS (§ 16); LAMENTATIONS (§ 1); NAHUM (§ 6). We have no means of ascertaining whether this artificial form of poetry was used in pre-exilic times. The supposed acrostic in Ps. 110 is precarious (see § 14 *a*). Cp König, *Einl.* 399, n. 1; Driver, *Introd.*(6) 367 *f.* T. K. C.

48. Ancient versions.[1] i. The oldest version, the LXX, follows a text generally closely corresponding to the Massoretic Hebrew, the main variations being in the titles and in the addition (lacking in some MSS) of an apocryphal psalm ascribed to David when he fought with Goliath. Pss. 9 and 10 are rightly taken as one psalm, but conversely Ps. 147 is divided into two.

The LXX text has many 'daughters,' of which may be noticed (*a*) the Memphitic (ed. Lagarde, 1875), see also iv. below; (*b*) the old Latin, which as revised by Jerome in 383 after the current Greek text forms the *Psalterium Romanum*, long read in the Roman Church and still used in St. Peter's; (*c*) various Arabic versions, including that printed in the polyglots of Le Jay and Walton, and two others of the four exhibited together in Lagarde's *Psalterium, Iob, Proverbia, Arabice*, 1876; on the relations and history of these versions, see G. Hoffmann, in *Jenaer Literaturz.*, 1876, art. 539; the fourth of Lagarde's versions is from the Peshitta. The Hexaplar text of the LXX, as reduced by Origen into greater conformity with the Hebrew by the aid of subsequent Greek versions,[2] was further the mother of (*d*) the *Psalterium Gallicanum*,—that is, Jerome's second revision of the Psalter (385) by the aid of the Hexaplar text; this edition became current in Gaul and ultimately was taken into the Vulgate of (*e*) the Syro-Hexaplar version (published by Bugati, 1820, and in facsimile from the famous Ambrosian MS by Ceriani, Milan, 1874).

ii. The Christian Aramaic version or Peshittā is largely influenced by 𝔊; compare Baethgen, *Untersuchungen* (see § 25). This version has peculiar psalm-titles taken from Eusebius and Theodore of Mopsuestia (see Nestle, in *TLZ*, 1876, p. 283).

iii. The Jewish Aramaic version or Targum is probably a late work. The most convenient edition is in Lagarde, *Hagiographa Chaldaice*, 1873.

iv. The best of all the old versions is that made by Jerome after the Hebrew in 405. It did not, however, obtain ecclesiastical currency—the old versions holding their ground, just as Anglicans still read the psalms in the version of the "Great Bible" printed in the Prayer Book. Jerome's (important) version was first published in a good text by Lagarde, *Psalterium iuxta Hebræos Hieronymi*, Leipsic, 1874.

[Baethgen's articles, 'Der textkrit. Wert der alten Ueberss. z. d. Ps.' in *JPT*, 1882, should by all means be consulted. On E. W. Budge, *The Earliest Known Coptic Psalter* (1898), see Brightman, *Journ. of Theol. Studies*, 2 275 *f.* See, further, 'Bibliography,' ii. (§ 49), and TEXT AND VERSIONS.]

49. Bibliography. i. *Exegetical Works.*—While some works of patristic writers are still of value for text criticism and for the history of early exegetical tradition, the treatment of the Psalms by ancient and mediæval Christian writers is as a whole such as to throw light on the ideas of the commentators and their times rather than on the sense of a text which most of them knew only through translations. For the Psalms, as for the other books of the OT, the scholars of the period of the revival of Hebrew studies about the time of the Reformation were mainly dependent on the ancient versions and on the Jewish scholars of the Middle Ages. In the latter class Ḳimḥi stands pre-eminent; to the editions of his commentary on the Psalms must now be added the admirable edition of Dr. Schiller-Szinessy (Cambridge, 1883), containing unfortunately only the first book of his longer commentary. Among the works of older Christian scholars since the revival of letters, the commentary of Calvin (1557)—full of religious insight and sound thought—and the laborious work of M. Geier (1668, 1681 *et sæpius*) may still be consulted with advantage; but for most purposes Rosenmüller's *Scholia in Pss.* ((2), 1821-22) supersedes the necessity of frequent reference to the predecessors of that industrious compiler.

Of more recent works the freshest and most indispensable are Ewald's in the first two half-volumes of his *Dichter des alten Bundes* ((2), Göttingen, 1866; ET 1880), and Olshausen's (1853). To these may be added (excluding general commentaries on the OT) the two acute but wayward commentaries of Hitzig (1836, 1863-65), that of Delitzsch (1859-60, then in shorter form in several editions since 1867 [(4)]; ET, by Eaton, from 4th Germ. ed., 1887-89) and that of Hupfeld ((2), by Riehm, 1867, 2 vols.; (3), by Nowack, 1888). The last-named work, though lacking in original power and clearness of judgment, is extremely convenient and useful, and has had an influence perhaps disproportionate to its real exegetical merits.

ii. The question of the text was first properly raised by Olshausen, and has since received special attention from v. Ortenberg (*Zur Textkritik der Psalmen*, 1861), Lagarde (*Proph. Chald.*, 1872, and *Psalterium Hieronymi*, 164 *f.*); Bruston (*Du Texte primitif des Psaumes*, 1873); Dyserinck, in the 'scholia' to his Dutch translation of the Psalms, *Theol. Tijdschr.*, 1878, pp. 279 *ff.*; [H. Grätz, 1882-83], and Bickell (*Carmina VT metrice*, etc., Innsbruck, 1882), whose critical services are not to be judged merely by the measure of assent which his metrical theories may command [cp POETICAL LITERATURE, end]. In English we have among others, the useful work of Perowne ((7), 1890), that of Lowe and Jennings ((2), 1884-5), and the valuable translation of Cheyne (1884, and with comm., 1888).

The mass of literature on the Psalms is so enormous that no full list even of recent commentaries can be here attempted, much less an enumeration of treatises on individual psalms and special critical questions. For the latter Kuenen's *Onderzoek*, vol. 3, is, up to its date (1865), the most complete, and the new edition now in preparation will doubtless prove the standard work of reference. [The new edition was interrupted by the author's lamented death; Part 3 (1), edited by Matthes, closes with Proverbs, but does not include Psalms.] As regards the dates and historical interpretation of the psalms, all older discussions, even those of Ewald, are in great measure antiquated by recent progress in Pentateuch criticism and the history of the canon, and an entirely fresh treatment of the Psalter by a sober critical commentator is urgently needed. W. R. S.

PTOLEMAIS (ΠΤΟΛΕΜΑΙΣ: 1 Macc. 5 15 22 55 10 1 39 56 *ff.* 60 11 3 22 24 12 45 48 13 12 2 Macc. 13 24 *f.* Acts 21 7), or ACCHO, RV ACCO (עַכּוֹ; in Judg. 1 31 ακχω [BAL]). For Josh. 19 30 see below, § 5.

There seem to have been two forms of the native name, for each of them appears through several languages.

1. Name. The Heb. עכו is confirmed by the Assyr. Ak-ku-u (see below, § 6), and is reproduced in the Talmud, עכו (Neubauer, *Géog. du Talm.* 231), and even on crusading coins as *Accon* (De Saulcy, *Num. de la Terre Sainte*, 153).[1] But the earliest extant inscriptions, the Egyptian (below, § 4), give 'A-ka and '-ka;[2] the Phœn. (on coins of Alexander the Great, § 7) was עכא and עך; the Greek was Ἀκη (so Diod. Polyb. Menander [in Jos. *Ant.* ix. 14 2 where, however, Niese reads Ἀρκη], Strabo, xvi. 2 25, and Josephus in *Ant.* viii. 2 3, etc.; see § 7): the Latin *Ace* or *Acce* (Pliny, *HN* 5 17), and the Arabic down to the present day *'Akka*, or *'Akkā*. The difference may have been originally only one of inflection.

From the form 'Akka the Crusaders produced Acre, one of the earliest instances of the vulgar addition of *r* to a terminal *a* (cp vulgar English India*r*). The fuller modern name St. Jean d'Acre was properly the title of the establishment of the Knights Hospitallers, but was carelessly extended to the whole town. On the origin of the name Ptolemais see below, § 7.

2. Site and neighbourhood. At the N. end of the sandy coast of the Gulf of 'Akka, there rises a short rocky promontory, on which lies the modern city. The site is favourable for fortification. On two sides and a half (W., S., and ½ E.) is the sea: round the other side and a half (N. and ½ E.) the disposition of the rock has rendered easy the construction from sea to sea of the present lines of wall and ditch. From the S. end of the promontory a few ruins of crusading times (*PEFM* 1 160) running E. into the sea represent an ancient mole; the remains of another lie under the sea S. from the SE. corner of the present city. The anchorage is good. To the N. the coast extends for some distance unbroken; the nearest coast town is ez-Zīb (ACHZIB) some 9 m. away. Inland the maritime plain extends nearly 4 m., opposite the city, to the foothills of Galilee and farther S. bulges to a greater breadth towards the entrance to Esdraelon. That the plain holds much water, is proved by the Nahr Na'mān, the ancient Belus, which, rising in a marsh (probably the Cendevia of Pliny [36 26]) at the foot of Tell Kurdāneh, becomes in its short course of 5 m. or so a considerable body of water. It reaches the sea a little more than a mile S. from the city. The sandy mouth of the Belus was famed for the manufacture of glass (cp GLASS), and of purple dye (cp PURPLE) from the shells of the murex once gathered there in great quantities and still to be found. 'I have succeeded in extracting the dye from some of these I have collected here' (Laurence Oliphant, *Haifa*(2), 1887, p. 103). There are rich gardens and groves between the river and the town. Indeed the whole plain and the foothills beyond it are very fertile.

All these various opportunities and endowments of the town are represented on its ancient coinage. On a coin of Trajan (De Saulcy, 159), Ptolemais is represented as a woman with a turreted crown, seated on a rock, in her right hand some ears of corn, at her feet a river. On other pieces the cornucopia and ears of corn are frequent, and sometimes an olive tree is given; whilst the command of the sea is symbolised by Neptune or a dolphin or a rudder (*Ib.* 153-169 and Pl. viii.; see also Eckhel, *Doctr. Num. Vet.* iii. 305; Head, *Hist. Num.* 676).

Within a radius of 7 m. from 'Akka there are some villages and ancient Tells—more of course on the foothills than on the plain. There is not, however, and never has been a city large enough to hold 'Akka as its port. Nothing dominates the town. The nearest mound, Tell el-Fokhkhār (96 ft. above sea level) is over ⅜ m. from the present fortifications; but probably the ancient city extended nearly to this Tell. Guérin (*Galilée*, 1 502-525) found remains up to nearly 800 metres E., and about the same distance N. of the present walls. The next mound, Tell eṭ-Ṭanṭūr (260 ft. high), is about three miles and a half distant.

3. Importance. The strength and isolated character of the position, its standing on the coast and near the mouth of the great plain of Esdraelon, the comparative security of the harbour, and the fertility of the neighbourhood form for the town an assurance of fame. It is no exaggeration to say that in and around 'Akka, as much history has been transacted as upon any site in Palestine, with the exception perhaps of two or three. Pietschmann (*Gesch. der Phönizier*, 29 *f.* 79 *f.*) regards 'Akka's political inferiority to Tyre and Sidon in ancient history as due to the absence from its 'Hinterland' of those enormous mountain ranges which so fully protect them. He is wrong, however, in supposing (p. 80) that 'Akka was more shut off than her sister cities from the great lines of traffic across Syria. All commerce between Egypt and Mesopotamia which followed the Phœnician coast must have visited them alike, whilst she lay nearer than the rest to the other line which bent inland to Damascus. Indeed 'Akka, not Tyre or Sidon, is the natural port not only for Galilee and the plain of Esdraelon, but also for Damascus, Ḥaurān, and Gilead, the roads from which reach it without having to cross either of the Lebanons. Not 'a small piece of the world' (as Pietschmann says) but all Galilee, Esdraelon, and the country E. of Jordan found their clearest outlet through 'Akka. At the present day during harvest some thousands of camels enter it daily with the grain of Ḥaurān;[1] and its bazaars contain a greater motley of people than those of any other coast towns. Ḥaurān peasants, and Druses from Jebel ed-Drūz, Damascus merchants, the fellāhīn of W. Palestine and Gilead, merchants from Nāblus—and all this in spite of the recent rivalry of Ḥaifā at the opposite end of the Gulf. The commercial activity of 'Akka cannot have been less in ancient times. It is true that in OT and NT the city is mentioned only twice, possibly thrice: as Acco in Judg. 1 31 (cp

[1] Cp Church of St. Nicholas Acons in Lombard Street (Wilson, in Smith's *DB*(2) 1 22 *a*).

[2] Wi. (*KB* 5) transliterates Akka.

[1] According to Schumacher 4000-5000 daily.

Josh. 19_{30} 𝕲 [below, § 5]), and as Ptolemais in Acts 21_{7}; but the monuments of Egypt, Phœnicia, and Assyria, the Books of Maccabees, Josephus, and Latin and Greek writers supply us with material for a larger estimate of its ancient importance.

'Akka first comes into the light of history during the Egyptian occupations of Syria in the fifteenth and following centuries B.C.

4. Early Egyptian relations.

In the lists of the Syrian conquests of Thotmes III. (1503 *ff.*), No. 47 is read by W. M. Müller (*As. u. Eur.* 181) as 'A-ka; but Flinders Petrie (*Hist. of Eg.* 2_{32}; cp PALESTINE, § 15) reads A'aag (=Ajjah), and neither Tyre nor Sidon is given in the lists. In any case all three cities must have passed at this time, or previously, into Egyptian hands, for in his last campaign Thotmes is said to have taken Arkatu (=Arka) to the N. of them all; he is said elsewhere to have subdued the inhabitants of the 'harbour towns' (Pietschmann, 255), and in the following century 'Akka is represented as (apparently long since) an Egyptian fief. In the Amarna despatches, one of the letters is from Zitaadna of Akku protesting his fidelity to Egypt (Fl. Petrie, *Hist. Eg.* 2_{277}, no. xliv., Wi. *KB* $5_{158\ 160}$) a second is from the same announcing a revolt (Petrie, xlvi., Wi. 159); whilst a third addressed to Amenḥotep IV. (1383-1365) from the king of Karduniyaš complains that Zitaadna has murdered the king's ambassadors and appropriated the gifts they were carrying to Egypt (Petrie, xlviii., Wi. 11). This last shows the position of 'Akka in the line of traffic between Egypt and Mesopotamia. A list of Sety I. in Abydos gives '-ka which Müller (*op. cit.* 191) identifies with 'Akka: in any case 'Akka fell with the rest of Phœnicia as far as the Nahr el-Kelb under Sety's successor Rameses II. It is not mentioned under Rameses III.

'Akka lay within the land assigned by biblical writers to Asher. The MT of Josh. 19_{24-31}, which defines the limits of Asher, does not contain its name,

5. In OT.

but for the first word of *v.* 30, where we should expect to find it, 𝕲ᴮ reads Αρχωβ, which suggests the emendation of the Hebrew עמה to עכה or עכו (ακκω is the reading of a number of cursives in H and P). In Judg. 1_{31} (J) it is stated that Asher did not dispossess the inhabitants of 'Akka. There is no allusion to 'Akka either in the account of transactions between Phœnicia and Judah or Israel, or in any diatribe of the prophets on the Phœnician cities. Its absence from the former is not altogether explicable. 'Akka was of no use in the trading between Solomon and Hiram—Tyre was nearer the cedars and Joppa the port for Jerusalem; whilst between Phœnicia and N. Israel, if all commerce was not by land, Dor and the harbour of 'Athlit would be more convenient for Samaria, the capital of the Israelite dynasty most closely connected with Phœnicia. Yet Dor and the ancient representative of 'Athlit and 'Akka are alike unnoticed by the Books of Kings; as striking a proof as we have of the fragmentary character of those historical records. 'Akka would have been the natural port for the Galilean fugitive, Jonah, to have been brought to in that prophetic narrative.[1] That Joppa has been chosen instead is another indication of the late and Jewish origin of the Book. The absence of 'Akka from the prophetic passages on Phœnicia is due, no doubt, to 'Akka's political inferiority to Tyre and Sidon—a fact amply proved by the Assyrian monuments.[2]

'Akka is not mentioned among the states which Assyria encountered in the fight at Ḳarḳar

6. On the Assyrian monuments.

(neither are Sidon and Tyre) nor does it occur among the Phœnician towns paying tribute about 840 to Shalmaneser II., or about 804 to Adad-nirari. Shalmaneser IV. and Sargon held all Phœnicia subject, but still 'Akka is not mentioned; and its first appearance in the Assyrian annals is as one of the towns of Luli of Sidon, whom Sennacherib overthrew (1 Rawl. 37_{42}). It is noticed in Esarhaddon's annals, and the first Assyrian mention of it, apart from Tyre, is after the subjection of the latter by Ašur-bani-pal, when he reports that he punished Usu and 'Akku at the time (640) that he fought against the Arabians. All this makes it clear that till Tyre fell 'Akka was but one of her subordinate towns, and explains the silence of the prophets. On this Assyrian evidence see Schrader, *KAT*, 173 288 291, ET 1 161 281 284; and Del. *Par.* 284.

'Akka is not much in evidence during the Persian empire; but it is now that we have the first clear instance of its military importance as a place of

7. In Greek times: Ptolemais.

muster for large armies, which distinguished it during the Greek and Roman period, for according to Diodorus Siculus (15_{41}) Artaxerxes Mnemon gathered his troops there for his invasion of Egypt (cp Strabo, xvi. 2_{25}). There are extant a very large number of coins of Alexander the Great struck at עכא or עך as it is called in Phœn. letters on some of them.[1] As Schürer says, they prove the importance of the place from Alexander's time onwards; yet the fact that Heracles not only appears in Greek coins of Ἀκη, as the town is now called, but is associated by a Greek legend[2] with the origin of the town, proves that 'Akka's subordination to, and close connection with, Tyre lasted into Greek times. The town was obviously subject to Tyre religiously as well as politically. After the death of Alexander, 'Akka was at first under Antigonus, then under Ptolemy Lagi, who destroyed it in 312 when Antigonus forced him to retire (Diod. Sic. 19_{93}).

During the next century we have no particular data for the history of 'Akka, and are therefore unable to decide with certainty when it received the official name of Ptolemais (Πτολεμαΐς). This can hardly have been during its brief occupation by Ptolemy Lagi (against Pietschmann, *Gesch. der Phön.* 76), but may have been due to Ptolemy II. whose conquest of Phœnicia was more permanent (see Schürer's note, *op. cit.* 92; he quotes in evidence the *Pseudo-Aristeas*). In any case the name appears to have displaced that of Ἀκη among the Greeks by the close of the third century B.C. In describing the occupation of the town by Antiochus the Great in 219, Polybius (5_{61} *f.*) implies that it was then called Ptolemais; yet a more conclusive proof that the name had been bestowed long before this is found in the fact that the Seleucids did not attempt to alter it, but suffered this record of their enemies' previous possession and patronage of the town to remain on its coins, alongside that of their own.

The inhabitants obtained the envied right to call themselves Ἀντιοχεῖς—οἱ ἐν Πτολεμαΐδι; and received equal privileges with their old superiors of Tyre; the titles on some of the Seleucid coins are ἱερὰ ἄσυλος and ἱερὰ αὐτόνομος (Eckhel, *op. cit.* iii. 305 *f.*; De Saulcy, *op. cit.* 153 *ff.*; Gardner, *Catal. of Gk. Coins in Brit. Mus.: Seleucid Kings*, 41).

We now reach the detailed history of Ptolemais furnished by Greek historians but especially by the Books of Maccabees and Josephus, a history which describes the naturally increasing importance of a town, so favourably situated for the enterprises first of its Greek and then of its Roman masters. For Egypt, for Asia Minor, for the Greek Isles and mainland, and for Italy its harbour was (even after the building of Cæsarea by Herod) the most convenient on the Syrian coast; and its history till the end of the NT period is that of the arrivals of great men from those shores, of the

[1] [Does not this add fresh plausibility to the view of Jonah as traditionally a prophet of the Negeb given in PROPHET, § 44?—T. K. C.]

[2] It should be noted, however, that Reland's suggestion that in Mic. 1_{10} בכו stands for בעכו has found favour with many scholars. But see We. *Kl. Proph. l.c.*

[1] They run from the year 5 to the year 46 of the Alexandrian era—*i.e.*, they were struck with Alexander's name long after his death. See Schürer, *Hist.* ii. 1_{91}, n. 143.

[2] The name Ἀκη was derived from the supposed healing (ἀκέομαι) of Heracles, through a plant discovered on the site, after he was poisoned by the Lernæan Hydra. See Steph. Byzant. Περὶ Πόλεων, *s.v.* Ακη.

muster of large armies, of the winter camps of the invaders of the Syrian Hinterland, and of bitter conflicts between Greeks and Jews.

In 164-3 Ptolemais participated in the general hostility of the Syrian Greeks against the Jews (1 Macc. 5 15). Simon the Maccabee routed the Greeks up to its gates (*ib.* 22; Jos. *Ant.* xii. 8 1 2 6). In 153 Alexander Balas took it from his rival Demetrius (1 Mac. 10 1; *Ant.* xiii. 2 1).

While it was in Alexander's hands Demetrius cleverly bribed the Jews by assigning it and its lands to the Jews 'for the expenses that befit the Sanctuary at Jerusalem' (1 Macc. 10 39). When Alexander defeated Demetrius he married Ptolemy's daughter at Ptolemais in 151-150, and Jonathan the Maccabee met the two kings there and was greatly honoured by them (*ib.* 48-66; *Ant.* xiii. 4 1 6 9). It was at Ptolemais also that Jonathan in 143 by treachery fell into Trypho's hands (1 Macc. 12 45 *ff.*; Jos. *Ant.* xiii. 6 2 *BJ* i. 2 1).

In 104 Alexander Jannæus besieged Ptolemais (*Ant.* xiii. 12 2), but raised the siege out of fear of Ptolemy Lathurus (*ib.* 3), who in turn besieged (*ib.* 4) and took the town (*ib.* 6); which, however, soon after fell into the hands of Queen Cleopatra of Egypt, his mother (*Ant.* xiii. 13 1 2). Soon after 70 it was taken by Tigranes of Armenia (*ib.* 16 4), and relinquished by him under fear of the Romans. The Ptolemaitans received Pacorus of Parthia (*BJ* i. 13 1).

8. Under the Romans.

Herod landed at Ptolemais from Italy (*BJ* i. 15 3; *Ant.* xiv. 15 1), came there from Antioch (*Ant.* xiv. 15 11), entertained Cæsar there (*Ant.* xv. 6 7, cp *BJ* i. 20 3), and endowed the town with gymnasia (*BJ* i. 21 11). The town had an era dating from Cæsar's visit, 47 B.C. (for this see Eckhel, *op. cit.* iii. 425; De Saulcy, *op. cit.* 154 *ff.*). 'Akka had now to suffer the rivalry of Cæsarea; but however fine might be the harbour which Herod built there, and however suitable for official traffic between Jerusalem and Italy, Cæsarea could not compete with Ptolemais for the commerce with Damascus and eastern Palestine. This too was the period of Galilee's greatest prosperity, and Ptolemais was *the* port of Galilee. It does not appear by name in the Gospels; but lying only some 14 m. from Nazareth and in constant communication with the towns on the Lake of Galilee, it must have helped to supply the Jews with that knowledge of Gentile ways which appears in all the evangelists, and Jesus with 'the vision of all the kingdoms of this world.'

The next stage in the history of Ptolemais dates from its establishment as a *colonia* by Claudius (Pliny, *HN* v. 17; *colonia Claudii Cæsarii quæ quondam Ace*; for the coins with *col. Ptol.* see, as cited above, Eckhel and De Saulcy) without, however, the rights of a colony (see Schürer's quotation, 94 n. 161, from the *Digest*). To this point belongs the visit of Paul coasting from Tyre to Cæsarea, the more natural port for his goal in Jerusalem (Acts 21 7).

9. The territory of Ptolemais.

1 Macc. 10 39 mentions a certain territory as 'appertaining to' Ptolemais in the second century B.C., and it is possible from data supplied by Josephus to define the extent of this during the first Christian century. How far N. it extended is uncertain. On the E. it was bounded by Galilee (*BJ* iii. 3 1; 'Ptolemais the neighbour of Galilee'), the border of which lay 60 stadia from Ptolemais (*id.* ii. 10 2), *i.e.*, along the base of the foothills.

BJ ii. 18 9 says that Cestius advanced from Ptolemais ἐπὶ πόλιν καρτερὰν τῆς Γαλιλαίας Ζαβουλὼν ἣ καλεῖται ἀνδρῶν. Schlatter (*Zur Topog. u. Gesch. Paläst.* 355, n. 1)—so also Niese—proposes to read Χαβουλων, *i.e.*, the modern Kābūl, on the plain just off the foothills, and some nine miles SE. from Ptolemais, which Josephus elsewhere mentions as a border town of Galilee (*Vit.* 43-45). Schlatter proposes to delete ἀνδρῶν as a dittography for a subsequent ἀνδρῶν; but ἣ καλεῖται ἀνδρῶν seems rather to be the gloss of some scribe who confused Χαβουλων with another town of Galilee on this Ptolemaitan border, viz., Γαβαρα or Γεβαρα (as if from גִּבּוֹרִים=ἀνδρῶν) to which Vespasian advanced from Ptolemais (*BJ* iii. 7 1; for Γαδαρα read Γαβαρα; cp *Vit.* 15 where Γαδαρεις should be Γαβαρεις, and 25). There is little doubt that it is the modern Kh. Kābrā, due E. from Ptolemais on a direct road from the latter into Galilee—the present Wādy esh-Shāghūr. Farther S. the territory of Ptolemais appears to have run more inland upon the plain of Esdraelon. Josephus *Vit.* 24 cp *BJ* ii. 18 1, iii. 3 1) gives two towns on the border, Geba and Beṣara. Neither has been satisfactorily identified with a modern site;[1] but Josephus's description of the former as on the great plain and on Carmel and 60 stadia from Simonias (mod. Semūniyeh) implies a position well inland on the NE. slopes of Carmel.[2] This would agree with the probability that Carmel itself, which was always in Phœnician or Greek hands, lay within the territory of Ptolemais; and indeed Josephus affirms that the maritime districts of Judæa extended to Ptolemais (*BJ* iii. 3 5).

10. The Civil War.

In the war between the Jews and the Romans Ptolemais formed the main base of the Romans so long as the war was waged in Galilee. Varus (*BJ* ii. 5 1; *Ant.* xvii. 10 9), Vitellius (*Ant.* xviii. 5 3), Petronius (*BJ* ii. 10 3 *ff.*; *Ant.* xviii. 8 2) and Cestius (*BJ* ii. 18 9) all mustered or wintered their troops at Ptolemais, and it was a constant port for Italy (*Ant.* xviii. 6 3). Placidus and Josephus faced each other in front of it (Jos. *Vit.* 43). Ptolemais was also Vespasian's base (*BJ* iii. 2 4; 6 1 *f.*; 9 1), and Titus from Egypt joined him there (4 2). There is a description of the town at this time in *BJ* ii. 10 2.

In Christian times Ptolemais became a bishopric and its bishops were present at the councils of Cæsarea (198), Nice (325), Constantinople (381), Chalcedon (451), and Jerusalem (536). In 638 Ptolemais was taken by the Mohammedans, under whom its political, but not its commercial, importance dwindled. In 1103 it was captured by Baldwin I. and in 1187 it surrendered to Saladin. In 1189 Guy de Lusignan began the long and doubtful siege, which Saladin attempted to raise. He was defeated and the town taken (in 1191) and further fortified. St. Louis increased the fortifications in 1252; but in 1291 the town finally fell to the Saracens (under Sulṭān Melek el-Akraf) and was ruined. Marino Sanuto (1322) gives a plan of the city as it was under the Christians (*Liber Secretorum Fidelium Crucis* in *Orientalis Historia* [1611] Tom. II.) reproduced in *PEF Mem.* 1 163. See also Key, *Monuments des Croisés en Syrie*, 172. There is a double wall round the landward end, with two moles from the SW. and SE. corners. In 1558 the ruins were visited and described by the Chevalier d'Arvieux. In 1749 the Sheikh Dhaher el Amer began the reconstruction. In 1799 Napoleon besieged 'Akka, but was prevented from taking it by a British fleet under Sir Sydney Smith. In 1831 the town was taken from the Turks by Ibrahīm Pasha and the fortifications were partly rebuilt out of the ruins of 'Athlīt. In 1840 it was bombarded by the fleets of Britain, Austria, and Turkey, and has since been in Turkish hands.

Besides the works already cited see Reland's *Palestina;* Robinson, *LBR* 115 *ff.*; and Hildesheimer, *Beiträge*, 11 *ff.*

G. A. S.

PTOLEMY, AV **PTOLEMEUS** or **PTOLEMEE** (πτολεμαιος—*i.e.*, 'the warlike'; *Ptolemæus*), a name apparently of Macedonian origin, which became the dynastic name of the Greek kings of Egypt. For a complete list of these kings see EGYPT, §§ 71-73, and for full details of their history see, besides the histories of Israel, Mahaffy, *The Ptolemaic Dynasty*.

1. Biblical references.

The only Ptolemy expressly mentioned in the Greek Bible is Ptolemy VI. [VII.] Philometor (1 Macc. 1 18 10 51 *ff.* 11 1-18 15 16 *ff.* 2 Macc. 1 10 4 21 9 29; probably also Esther 11 1 [?]). In Dan. 11 25, however, the same king seems to be again referred to as 'the king of the south'; and earlier in the same chapter his five predecessors are alluded to (*vv.* 5 *ff.*). See the Commentaries on Maccabees and Daniel; also the articles MACCABEES [BOOKS] and DANIEL. Cp also Willrich, *Juden und Griechen*.

2. Early Ptolemies.

1. Ptolemy I., Soter, son of Lagos, 322-285 B.C., is alluded to in *v.* 5 of Dan. 11. When, on the death of Alexander the Great, the Macedonian kingdom was divided among his generals, Soter became ruler of Egypt. Subsequently, he acquired possession of CŒLESYRIA [*q.v.*] and Judæa, and afterwards even attacked and captured Jerusalem, taking its defenders unawares on a Sabbath

1 Guérin (*Gal.* 1 395 *f.*) places Geba at Sheikh Abrēk; Schlatter at Kh. el-Medīna; and Besara=Beth Sara=βησαρα at Tell Ṯōra (*Zur Topog. u. Gesch.* 296).

2 Schürer (*Hist.* ii. 1 128, n. 306) denies that Geba can be the present Jebata; but this is by no means clear.

(see JERUSALEM, § 26). He then carried away many Jews and Samaritans to Egypt, but being, as Graetz expresses it, 'the gentlest of the military followers of Alexander' his treatment of the Jews was by no means harsh; he set an example of leniency which was followed by his immediate successors. See DISPERSION, §§ 7, 15. Ptolemy was not allowed, however, to remain long in undisputed possession of Cœlesyria. His ambitious rival Antigonus cast envious eyes on the coveted province; and at length his son Demetrius confronted Ptolemy with an army. The battle of Gaza (312) resulted in the defeat of Ptolemy. Subsequently, Antigonus and Demetrius made a combined attack on their enemy. Ptolemy was at first obliged to retreat, and the possession of Cœlesyria for a time remained doubtful; but at length in 301 Antigonus was severely defeated and lost his life at Ipsus. The kingdom was then divided between Ptolemy and his allies; he himself taking Egypt, while Seleucus received the greater part of Asia. This marks the beginning of the Seleucidean era. See SELEUCIDÆ.

Ptolemy's kindly feeling did much to foster, if it did not start, the growth of the Jewish community at ALEXANDRIA [*q.v.*]. See DISPERSION.

2. Ptolemy II., Philadelphus, 285-247 B.C., is alluded to in Dan. 11 6. His daughter Berenice was given in marriage to Antiochus II., Theos; see DANIEL (BOOK), § 7. In Philadelphus' reign Cœlesyria and Judæa again caused trouble, Antiochus IV. Callinicos instigating them to revolt. It was in this reign that Jewish literature, under the influence of Greek thought, began to undergo such an important development (see HELLENISM, HISTORICAL LITERATURE); and it is commonly supposed that under the patronage of Ptolemy Philadelphus the Greek version of the OT was undertaken (see, however, TEXT AND VERSIONS and DISPERSION, § 19).

3. Ptolemy III., Euergetes I., 247-222 B.C., who is alluded to in Dan. 11 7, was the brother of Berenice, wife of Antiochus II. His history is supposed to have been closely bound up with that of the adventurer Joseph, nephew of Onias. See, however, ONIAS, § 4.

4. Ptolemy IV., Philopator, 222-205 B.C., is alluded to in Dan. 11 11 (cp 3 Macc. 1 1-5). His reign marks the decline of the Ptolemies; for, as Cornill says, 'the fourth Ptolemy, a Louis XV. on the Egyptian throne . . . allowed everything to decay and rot, while at the same time in Antiochus III. incorrectly called the Great, the throne of the Seleucidæ had received at least an enterprising and energetic ruler.' Cœlesyria again became a bone of contention, and Ptolemy was roused from his life of luxury by the approach of Antiochus. Contrary to what might have been expected, Ptolemy contrived to ward off the attack; his adversary was severely beaten at Raphia (217), retired and gave up Cœlesyria. For this reign, cp ONIAS, § 4 *f.*

3. Decline of dynasty.

5. Ptolemy V., Epiphanes, 205-182 B.C., who is alluded to in Dan. 11 14 *f.*, was only a child when he succeeded his father. He was still in his minority when Antiochus returned to the attack. This time Antiochus met with complete success; the Egyptians under Scopas were badly defeated, and Palestine and Cœlesyria became a province of Syria. Ptolemy Epiphanes married Cleopatra, daughter of Antiochus III. (see DANIEL [BOOK], § 7). On his death, Cleopatra held the regency during the minority of Ptolemy VI. [VII.], Philometor.

5*b*. Ptolemy [VI.], Eupator, 182 B.C. He died very soon after his accession to the throne.

6. Ptolemy VI. [VII.], Philometor, son of Ptolemy V. and Cleopatra, 182-146 B.C., is mentioned by name in the Apocrypha (see above). An attempt to recover for Egypt her Syrian provinces resulted in his defeat by Antiochus IV. Epiphanes near Pelusium (170 B.C.). After Philometor's younger brother had been proclaimed king in Alexandria, Antiochus made a second expedition (169 B.C.) into Egypt. He besieged Alexandria without success. The two brothers, whose rivalry had been encouraged by Antiochus for his own purposes, then became reconciled. Thereupon, Antiochus proceeded to attack them both (168 B.C.); and he was again preparing to lay siege to Alexandria when he was stopped by the Romans, who compelled him to evacuate Egypt and consolidated, at least for a time, the peace between the two brothers. It was on his return from this campaign that Antiochus IV. Epiphanes began his persecution of the Jews. See, further, ISRAEL, §§ 70 *ff.*, and SELEUCIDÆ; and on Ptolemy IV.'s attitude towards the Jews, DISPERSION, § 7 *f.* For Ptolemy's brother, PTOLEMY VII., Euergetes II., see also EUERGETES.

Other persons of the name of Ptolemy mentioned in the Apocrypha are: (1) One of the 'friends' (see FRIEND) of Antiochus Epiphanes, who took part in the campaign of 166 B.C. We learn, further, from 2 Macc. —not a very trustworthy authority, yet our only one—that he was son of Dorymenes (4 45),—probably that Dorymenes who opposed Antiochus the Great on his occupation of Cœlesyria (Polyb. 5 61),—that he was surnamed Macron (10 12), that he had been entrusted with the government of Cyprus by Ptolemy Philometor, but had abandoned the island and withdrawn himself to Antiochus Epiphanes, who rewarded him with the governorship of Cœlesyria and Phœnicia. His policy of 'observing justice towards the Jews,' and endeavouring 'to conduct his dealings with them on peaceful terms' led to his being impeached before Antiochus Eupator, the successor of Antiochus Epiphanes, with the result that he poisoned himself (10 12 *f.*). This Ptolemy is not to be confounded with the Ptolemy of Megalopolis, son of Agesarchus, who lived at the court of Ptolemy IV. Philopator, and wrote a history of that king.

4. Other Ptolemies.

2. Son of Abubus, and son-in-law of Simon the Maccabee, whom with two of his sons he murdered (1 Macc. 16 11-16; cp Jos. *Ant.* xiii. 7 4 8 1).

3. Father of LYSIMACHUS, 1.

4. Son of DOSITHEUS, 4; along with his father he carried to Egypt the 'epistle of Phrurai' alluded to in Esth. 11 1 𝔊.

PUAH (פּוּאָה, or [Gen. 46 13, Nu. 26 23, AV **PUA**; RV PUVAH], פֻּוָּה; φουα [BAFL]), father of TOLA,[1] an Issacharite judge (Judg. 10 1), whence *both* names appear in post-exilic lists as 'sons' of Issachar (Gen. 46 13, AV PHUVAH φουλ [L], 1 Ch. 7 1, -τ [B], Nu. 26 23 AV **PUA**, -λα [L]; ethnic *ib.* הַפּוּנִי, PUNITES, φου[α]ει [B] -αι [A] -υι [F], -υλαι [L]). The name is possibly to be read for פֻּרָה (see PHURAH) in Judg. 7 10 *f.*

PUAH (פּוּעָה; φουα [BAL]), the name of one of the Hebrew midwives in Egypt (Ex. 1 15).

PUBASTUM (פִּי־בֶסֶת), Ezek. 30 17, AVmg., EV PI-BESETH (*q.v.*).

PUBLICAN (τελωνης), Mt. 10 3. See TAXATION, ISRAEL, § 90.

PUBLIUS (ποπλιος), the 'chief man' (πρωτος) of Melita (see MELITA, § 3), who received and entertained Paul and his companions after the shipwreck, and whose father was cured of his fever by the apostle (Acts 28 7-8).

Later traditions named him the first bishop of the island, and bishop of Athens after the demise of Dionysus; and according to Jerome (*Vir. Ill.* 19) he died a martyr's death.

PUDENS (πουδης [Ti. WH]) joins in Paul's salutation to Timothy (2 Tim. 4 21). Even if these salutations belong, at any rate, to a Pauline element in the epistle, we have no right to assume that this Pudens is the husband of the Claudia (Quinctilla) who appears in an inscription in *CIL* 6 15,066. See CLAUDIA, and cp Lightfoot, *S. Clement*, 1 76-79.

The name occurs in the list of the 'seventy' given by the Pseudo-Hippolytus; and in that of the Pseudo-Dorotheus it is said that Pudens, Aristarchus, and Trophimus suffered martyrdom at Rome along with Paul. In the apocryphal *Acts of Praxedis and Pudentiana* (his daughters) Pudens figures as a disciple of Paul; in later Roman tradition, he comes into the Peter-legend, and is represented as a senator, and as entertaining Peter at his house on the Viminal.

---

[1] It is perhaps noteworthy that while Tola means the *Coccus ilicis*, the source of the crimson dye, Puah is the *Rubia cinctorum*, Linn., another source of a red dye (Löw, *Pflanzennamen*, p. 251).

PUHITES (פּוּתִי), 1 Ch. 2 53 AV, RV PUTHITES (*q.v.*). See also SHOBAL.

PUL (פּוּל; φουλ [BAQ^mg.] φουθ [ℵQ*]; *in Africam*) Is. 66 19, correct reading פּוּט. See PUT, n. 2.

PUL (פּוּל; φουα [BAL], 2 K; φαλωχ [B], φαλως [A], φουλ [L], 1 Ch.). In 2 K. 15 19 we read that 'Pul, king of Assyria, came against the land (of Israel)'; the historical points raised by this statement are considered elsewhere (see MENAHEM). In 1 Ch. 5 26 the captivity of certain tribes of Israel is ascribed to an impulse divinely given to 'the spirit of Pul king of Assyria, and the spirit of Tilgath-pilneser, king of Assyria.' The language of the Chronicler (we are not here concerned with the historical contents of his statement)[1] led to the supposition that Pul was a different person from Tiglath-pileser III., and several suggestions were made—such as that he was the general of that king; that he was a pretender to the Assyrian throne; and that he was a Babylonian ruler (Berossus[2] represents Pul as a Chaldæan king) who in troublous times had obtained possession of the Euphrates valley, and descended thence upon Syria and Palestine—'Assyria' might be a scribe's error for 'Chaldæa.' This explanation received likewise a certain amount of support from the Canon of Ptolemy, which gives *χινξηρος* and *πωρος* (Ukīn-zēr and Pul) as having reigned, together, five years, namely, from 731 to 726 B.C. The likeness between Pul and Poros was naturally taken as a confirmation of the theory.

No king Pūlu, however, is mentioned in the Assyrian inscriptions, and the Babylonian Chronicle only speaks of Tiglath-pileser, whose reign in Babylonia lasted two years, making, with the three years of Ukīn-zēr, the total of five years given by the Canon of Ptolemy. A second ruler of either country seems, by these statements, to be excluded. There is, therefore, hardly a doubt that the two names indicate one and the same person, and this is confirmed by the fact that the Babylonian Canon (from which the Canon of Ptolemy was to all appearance copied) gives the name of Pūlu or Pul after that of Ukīn-zēr, with the same length of reign as that of Tiglath-pileser, namely, two years (728-726 B.C.). Oppert (*PSBA*, 1898, pp. 43 *ff.*) says that there were two rulers named Pul, the earlier being more than thirty years anterior to the Pul who was the Poros of the Ptolemaic canon 'the antagonist of Tiglath-pileser, whom he turned out from Babylon at least once if not twice.' In order to make room for the earlier Pul he places a gap of 'just forty-six years (the reign of several monarchs),' between Ašur-nirari and Tiglath-pileser, his successor (the Pūlu of the Babylonian canon).

There is more than one possibility as to the reason why this king bore two names. As Pūlu occurs in the Babylonian Canon, the question naturally arises whether he may not have received that name on account of the Babylonian opinion of his character (cp Ass. *bûlu* 'wild animal'). It is more probable, however, that, as Pūlu is otherwise known (Tablet K. 8143 [Johns, *Assyr. Deeds*, 860], col. 2, *l.* 15) as a personal name in the inscriptions of Assyria, it was his original name,[3] exchanged for that of Tiglath-pileser on his coming to the throne on account of the memories connected with those of his predecessors who bore it.[4] Nothing is known of the early life of this king; but the suggestion that he had been a general in the army of his predecessor on the throne of Assyria, Ašur-nirari, is as probable as any other.

The Greek forms Phaloch and Phalos seem to suggest that the translators had an idea that the word was connected in some way with the element *phal* in the Greek form Thaglathphallasar (see TIGLATH-PILESER).

[Another view is proposed in *Crit. Bib.*, where evidence is produced to show that in the case of the names of some of the foreign kings with whom Israel came into contact there has been a confusion of traditions. 'Pul,' it is there held, was really king of the southern Asshur (in N. Arabia), which is supported by the fact that N. Arabia exercised a constant pressure, sometimes friendly, sometimes adverse, on the Israelitish states. 'Pul,' or Phaloch (𝔊^B) may be a corruption of 'Jerahmeel'; cp PHICHOL.]

Literature.—G. Rawlinson, *Five Great Monarchies*, 2 386 *ff.*; *ZDMG* 25 453 *ff.*; *COT* 1 219 *ff.*; Mürdter-Delitzsch, *Gesch. Bab. u. Ass.* 182; Sayce, *Assyria, its princes, etc.* 37; G. Smith, *History of Babylonia*(1), ed. Sayce, 114, and 2nd ed. (1895) ed. T. G. P.

PULPIT, EV^mg. 'tower' (מִגְדָּל; βημα; *gradus*; Neh. 8 4). Read perhaps מַעֲלֶה, *ma'ăleh*, 'raised place,' the word used in a similar context in Neh. 9 4 (cp STAIRS).

PULSE (RV^mg. 'herbs') is the rendering in Dan. 1 12 of זֵרֹעִים† and, *ib.* 16, of זֵרְעֹנִים†. If the reading is correct, זרעים[1] should be = זֵרוּעִים (Is. 61 11, cp Lev. 11 37). The form זֵרְעֹנִים would seem to be a diminutive. It occurs in the Talmud, and may be borrowed from Aram. ܙܪ̈ܥܘܢܐ (Nöld. *Mand. Gr.* 140). The meaning assigned is 'garden herbs'; the context is thought to suggest that fruits or uncooked vegetables are meant (so, *e.g.*, Bertholdt, Marti). The expression, however, is vague and hardly probable.

Cheyne suggests (*Crit. Bib.*) that מן־הזרעים (*v.* 12) may be a corruption of קֶמַח שְׂעֹרִים, 'barley-meal,' and זרענים (*v.* 16) of שְׂעֹרִים, 'barley.' The phrase קמח ש' occurs in 2 S. 17 28. In the same passage of 2 S. EV gets over the difficulty which the repetition of קָלִי occasions by rendering it first 'parched (*corn*),' and then 'parched (pulse).' But קָלִי simply means 'parched grain'; the second קָלִי is most probably a scribe's error.

PURAH (פֻּרָה), Judg. 7 10 *f.* AV PHURAH (*q.v.*).

PURIFICATION, PURIFYING. See CLEAN AND UNCLEAN. The words are:—

1. טֹהַר, *ṭōhar*, טָהֳרָה, *ṭohŏrah*, Lev. 12 4 6 2 Ch. 30 19 Neh. 12 45.

2. חַטָּאת, *ḥaṭṭāth*, Nu. 8 7 (ἁγνισμός) 19 9 17 (ἅγνισμα). AV agrees with 𝔊. RV, however, '(water of) expiation,' 'a sin-offering'; so Dillmann. Cp חִטֵּא, Lev. 8 15 (EV 'purify'), Ezek. 43 22 *f.* (EV 'cleanse'), etc. Cp SACRIFICE.

3. מְרוּקִים, *m^erūḳīm*, תַּמְרוּקִים, *tamrūḳīm*, Esth. 2 3 9 12. Cp PERFUMES.

4. ἁγνισμός, Acts 21 26 (cp *v.* 24) 24 18; ἁγνίζω, Jn. 11 55. In Ex. 19 10 for קִדֵּשׁ. Cp הִתְקַדֵּשׁ, Josh. 3 5 1 S. 16 5 2 S. 11 4, EV 'to sanctify oneself.'

5. καθαρισμός. Of the 'washings' before meals, Jn. 2 6 (cp Mt. 15 2); see MEALS, § 5. Of special 'purifications,' Mk. 1 44 Lk. 5 14 2 22. καθαρίζω repeatedly of leprosy (*e.g.*, Mt. 8 2 *f.*). On the 'questioning about purifying,' Jn. 3 25, see JOHN THE BAPTIST, § 6.

PURIM (פּוּרִים, Esth. 9 26; φρουραι [Bℵ*^vid. AL], -ριμ [ℵ^c.a]), a feast of the later Jews to further the observance of which is the purpose of the book of

1 [Schr. (*KAT*(2) 239, n. 1) remarks that the Chronicler blends the statement of 2 K. 15 29 (which refers to Tiglath-pileser) and 2 K. 17 6 (which refers to Shalmaneser).]

2 Alex. Polyhistor in Eusebius, *Arm. Chron.* 1 4.

3 Prof. Cheyne (in TIGLATH-PILESER) suggests that the Poros of the Canon of Ptolemy may preserve the more correct form—*i.e.*, Būr, 'child,' the second part of the name, which would naturally be the name of a god (*e.g.*, Ninib, in accordance with the usual explanation of Tiglath-pileser), having been dropped. Cp Bur-Ramman, Bur-Sin. See, however, E. Meyer, *Ent.* 30.

4 Another case of a double name is that of Tiglath-pileser III.'s successor, Shalmaneser IV., who is called Ululāa (Elulæus, 'he of the month Elul') in the Babylonian Canon. As a personal name Ululāa is more common than Pūlu, and may likewise have been the original name of its bearer. [Winckler (*GBA* 221) adds the case of Ašur-bāni-pal, the Kandalanu of the Babylonian lists; cp col. 451.]

1 On the form, cp Barth, *NB* 42.

ESTHER (*q.v.*, § 6 *f.*); cp Esth. 11 1, the Epistle of PHURIM (RV PHRURAI, ΦΡΟΥΡΑΙ [BL] -Α [א*] -ΙΜ [א$^{c.a}$]).

According to Esth. 9 26 the name is from PUR (פּוּר; *φρουραι* [Bא*vid. AL] *φρουρ* [א^c]), which is explained in 3 7 as 'lot' (*ἔβαλεν κληρούς* [BאAL]). This derivation of the name, however, has but a slight connection with the story; still it has a better claim on our acceptance than the narrative in which it occurs (cp ESTHER). Because Haman, the arch-enemy of the Jews, cast lots to ascertain the day favourable for the execution of the decree against them, the festival (we are to believe) was called in grim irony 'the Lots.' Nothing, however, in the essentials of the festival itself required that the name of it should be of that meaning. On the other hand, if a good independent reason be found for a name Purim, in the sense of 'lots,' it is worth considering whether the name, being already in existence, may not have suggested the insertion of the episode of Haman's casting lots, into the story, after its association with the festival.

1. Inadequacy of meaning 'lot.'

As actually observed, the institution commenced with a fast observed on the 13th of Adar. This was called 'the fast of Esther,' and explained as in memory of the fast which Esther and her maids observed and which she, through Mordecai, enjoined on the Jews in Shushan (Esth. 4 16). This fast was so integral a part of the observance that if the 13th fell on the Sabbath, the fast was put back to the fifth day of the week, the sixth being impossible for a fast, as the preparation of food for the sabbath and the feast days which would follow necessitated tasting the dishes prepared. The 14th and 15th of Adar were feast days. As soon as the stars appeared on the night of the 13th, when the 14th began, candles were lighted in all the houses, as a sign of rejoicing, and the people repaired to the synagogue. After prayer and thanksgiving, the reading of the Roll (Megillah) of Esther began.

2. Jewish observances at Purim.

This was accompanied by a running translation, with comments, in the vernacular of the district. The reading was dramatic in style so as to bring out the full force of the passages, and the congregation punctuated it with curses on Haman, or 'the ungodly' in general, whenever the name was uttered. This afforded an opportunity to exprobrate Christians as well as Persians, Macedonians, or Amalekites; the name in the narrative being understood to cover the others according to the nationality most prominent as oppressors at the time. After the Megillah is read through, the congregation solemnly curse Haman, Zeresh, idolators in general, and pronounce a solemn blessing upon Mordecai, Esther, the Israelites, and even the Gentile Harbonah, because he hanged Haman.

Then the people return to a light supper of milk and eggs. In the morning of the 14th, after prayers in the synagogue, the lesson from the Law (Ex. 17 8-16) relating to the destruction of the Amalekites, of whom was Agag, the ancestor of Haman (Esth. 3 1), is read and the Megillah is read again in the same manner as before. It is a sacred duty for all to attend this reading. The 14th day is looked upon as the actual day of deliverance, and in 2 Macc. 15 36 is called Mordecai's day. When the ceremony in the synagogue is over, all give themselves up to rejoicings and feastings, which are continued on the 15th. Excess on these occasions is excused. The gifts given to the poor, and the mutual interchange of gifts, are a custom much honoured. So great was the esteem in which the feast was held that its observance was regarded as certain to survive when the temple and the prophets had failed. If a second Adar occurred, the festival was repeated, if not the fast.

There seems no reason to doubt that all this, not intimately connected with the temple, nor altogether in keeping with dominant religious sentiment, was the embodiment of a national feeling of intense joy at some deliverance and a bitter, if veiled, resentment against some specific oppressors. The Jews had but too good reason to perpetuate a feeling of resentment, changing the people aimed at, from time to time.

3. Historical occasion of institution.

The details of the observance may not always have been the same; but in its essential character we can recognise no great change. If we dismiss the account given in the Megillah itself as impossible historically, there seems no event so likely to have been the occasion of the institution as the defeat of Nicanor by Judas Maccabæus, on the 13th of Adar, 161 B.C. (1 Macc. 7 49). This gave rise to a festival kept on that day as Nicanor's day, perhaps afterwards transferred to the 14th, as the day on which the victory became known. Such at least is the view taken by Erbt, *Die Purimsage*, 80. Even the name of Hadassah, Esther's first name, may be a reminiscence of Adasa, where the battle took place. It seems evident that, at this period, no general observance of Purīm by the Jews was in force. In times of such national extremity, popular festivals may have been neglected, even if the religious feasts were kept up.

But the question arises: Was there no Purīm feast before the event just mentioned? Many attempts have been made to assign to it a more general meaning. A full-moon feast of Adar is a natural suggestion, made by Ewald (*GVI* 2 496 *ff.*). Winckler regards Purīm, Saturnalia, Sakaia, etc., as primarily the festival of the supernumerary *ḫamuštu* at the end of the year, which was regentless, and an interregnum in the calendar, whence emerged (by lot?) the consuls, eponyms, or other regular annual rulers. His theory serves to connect many of the Esther personages with astral divinities, but seems to demand the last week in Adar for its celebration.

4. Possible non-Jewish origin of Purim feast.

(*a*) *Oppert and Lagarde.*—The assumptions that there was such a Purīm feast in older times, and that the story of the Megillah is borrowed from non-Jewish sources and is radically connected with Purīm, have led to many attempts to discover the source of both in close combination. Guided by the indications of the Megillah itself, Oppert, *Revue des Études Juives*, 1894, p. 34 *f.*,[1] found many words that he regarded as Persian, more or less corrupted. Lagarde, however, showed that the resemblances were fallacious and involved too great a stretch of the imagination. Above all, he showed that no Persian word for 'lot' could be the origin of Purīm. He fell back on 𝔊 and especially Lucian's reading of the name, as *φουρδια*, as a foundation for the theory that Purīm was a lineal descendant of the Persian Farwardigān, or New Year's Feast. There certainly were elements in the observances of that day which have counterparts in the Purīm. Even, however, if we admit the white-washing, etc., of the tombs, vouched for by Schwally, as Persian in origin, there is no evidence of its essential connection with Purīm, and all the poetic description of the Persian feast given by Lagarde only shows its dissimilarity to Purīm. At both, gifts were distributed to the poor and to mutual friends.

The foundation itself is too slight. The name *φουρδια* may be taken as a mere error for *φουραια* as is done by Erbt, or may be the attempt of a learned Greek to connect the festivals. The Egyptian colouring of the translation throughout, shows rather that the translator was unfamiliar with Persian terms and aimed at finding an etymology in his own tongue. He may have derived Purim from *φουρειν* and given it a form *φουραια* to help his derivation.

The transfer of a New Year's feast to the 14th of Adar remains unaccounted for, and such a change is always a thing difficult to accomplish in practice.

(*b*) *Jensen.*—The publication by Jensen of his *Elamitische Eigennamen* (*WZKM* 4 37, etc.) brought into prominence the Babylonian affinities of some parts of the Megillah. He showed that whilst Esther and Mordecai recall the Babylonian Ištar and Marduk, Haman can be taken to be Ḫumman the Elamite chief

[1] Cp *Annales de philosophie chrétienne*, Jan. 1864.

god, and Zeresh may be Girisă, supposing a ז written in error for ג. Hence, at least some part of the story may go back to a national epos of Babylonia, representing the conflict between the gods of Babylonia and of Elam. Efforts were accordingly made to discover, either in the Creation-story or in the Gilgameš epic, a source for this portion. Although, however, there may be reminiscences, there is no known Babylonian account that could be regarded as the literary source of the story.

The Creation-story does not associate Ištar and Marduk as allies against Elamite gods, as would be required if it were the source. Nor will it admit, in its present form, of their alliance against Tiāmat and her helpers, as Erbt ingeniously attempts to show.

In the Gilgameš-story, even if Gilgameš as a solar hero be confused with Marduk, a sun god, we should have a sun-god and Babylonian tutelary divinity as champion against Ḫumbaba of Elam, rather than against Ḫumman. There is no place for any other of the Esther personages. A story of national conflicts is the most we could recognise. Ištar indeed occurs; but the hero and Ištar are there essentially hostile.

(*c*) *Zimmern.*—At the same time, the resemblances brought out by these attempts do show that the Esther story is indebted for some of its incidents to the sources adduced, unless indeed it is directly drawn from some unknown source, which had already absorbed them. Intimately connected with these attempts was Zimmern's derivation of Purīm from *puḫru*, the Babylonian name for the assemblage of the gods, at the Zakmuku, or New Year's festival, when under the presidency of Marduk the fates of the year were determined (see *ZATW* 11 157-169). With this assemblage of the gods it is possible to connect the earlier portion of the Creation-story, where Marduk takes his place as chief among the gods and controller of the tablets of destiny. Hence it is not impossible that the recitation of this section of the Creation-story may have formed part of the ritual on the Babylonian New Year's Day; but that proves nothing for the month of Adar.

The derivation of Purīm from *puḫru*, however, even after the intervention of the Syriac פוחרא, Mandaic פוהרא, is difficult. The loss of the ḫ is a grave objection. Besides, *puḫru* does not mean 'lot.' Erbt suggests that after the Jewish fashion a Hebrew etymology was found from a root פרר, Assyrian *parāru*, which by meaning 'to break in pieces,' could come to mean 'a small stone,' after the types of גורל and ψῆφος. This, however, does not explain why 'lots' needed to be reached as the meaning of the word. If the feast had to be assigned a name, why fix on Purīm, even if corrupted from Puḫru, unless Puḫru had been the name of the feast already? If that be granted, then Zimmern's view must follow. If, however, the feast was already called Purīm, *puḫru* is a difficult derivation. Nor does Erbt's suggestion that *puḫru* may have already become *pūru* in Babylonian help at all. Certainly Jensen would not venture on such an assertion.

Let us, however, sum up the present position of the inquiry as soberly as possible. It is a fact that in Babylonian *pūru* has these meanings—a small 'round stone,'[1] a 'counter' (the origin of the 'circle' to denote the number 10), a 'vessel' for holding oil, a stone 'urn' or 'jar.' It also means 'lot,' and is used of dividing an inheritance 'by lot.'[2] Further, in Assyrian it denotes a 'term of office,' specially the year of eponymy. These offices were entered upon at the New Year feast in Assyria. Hence whilst that festival may have been called the Puḫru festival, it may also have been called the Pūru festival. Such a name for the New Year festival, however, remains undiscovered in cuneiform literature. If it were fully established, we should still have to account for the transference of the date. As on the New Year festival all officials entered on their offices, however, it is conceivable that those offices were previously fixed in Adar. Then the Puḫru and Pūru festivals would be separate. Marduk's fixations of the fates may have been anticipated by the previous appeal to the 'lot.' True, in historical times, the eponyms appear to follow a regular order, and an appeal to the lot seems out of question. Still, in the later Assyrian times this order is widely departed from, and granting the royal favour to have 'loaded the dice,' we may imagine a formal appeal to the 'lot.'

5. Present position of inquiry.

The Babylonian hemerologies have yet to be consulted as to the observances in Adar. Unfortunately, these await publication. But the 13th of Adar was so far a fast day that on it no fish or fowl might be eaten: in one tablet the 13th is marked 'not good,' whilst the 14th and 15th are 'good'; on another the 14th was marked as 'not favourable,' whilst the 13th is 'favourable.' On this tablet there is no entry preserved for the 15th; but we know that at Sippara, in the ninth century B.C., of the six great yearly festivals of Šamaš, for which Nabū-aplu-iddin left rich vestments and endowments, one was held on the 15th of Adar. Hence, we see that a fast on the 13th, and feasts on the 14th and 15th, are quite in keeping with known Babylonian observances in Adar.

Further, the antagonism of Marduk and Esther outside the Creation-story and Gilgameš-epic is not so complete that one and the same day might not be sacred to Marduk and Ištar, as was actually the case in the second Elul.

Even if it be the case that the real derivation of Purīm carries back both name and meaning to Babylonian times, the association of the stories told in Esther with the Jewish festival may have no parallel in its prototype. Indeed, as de Goeje has pointed out, there are elements of the story to be found in the Arabian Nights. Jensen has also shown reason to suppose Judith another Purīm legend, with the same *motif*, though with different nomenclature. Erbt agrees with this, and has further shown that Esther itself is of composite origin. There seems to have been a somewhat wide circle of stories, more or less closely linked by popular association with the original Babylonian Purīm festival or its Canaanite relative, and some of them are blended into these Jewish tales, adorned with incidents perhaps originally unrelated, but all twisted to serve the purpose of illustrating God's care of his chosen people and his vengeance on their enemies. That Persian editions of some of these stories may have furnished some further modifications is not impossible; but the Persian colouring may be artificial, being within the powers of a Jew even in the Macedonian times. Hence whilst the Nicanor day is probably the starting-point of the specifically Jewish festival, which may be artificial and intentional, the older sources of the Megillah are probably Gentile, Babylonian, with some Persian influence, and a free adaptation of material. The observances are appropriate to an occasion of national rejoicing for deliverance from disaster; but they may preserve non-Jewish features of widely different origin. The time of observance is linked closely with the historic date of institution, but may be identical with previously observed festivals of other origin.

C. H. W. J.

Following Zimmern, J. G. Frazer inclines to hold that Purīm was derived by the Jews, probably at the time of the captivity, from the Babylonian New Year festival of Zakmuk, which fell about the vernal equinox. Further, adopting the view of Br. Meissner, he would identify Zakmuk with the Sacæa, a Babylonian festival described by Berossus (Athenæus,

6. Further developments in 'Golden Bough.'[1]

[1] Cp the present writer's article in *Expos.*, Aug. 1896, pp. 151-154; Jensen, in Wildeboer's *Esther*, 173.

[2] For references to passages see *Assyria, Deeds and Documents*, vol. iii., p. 156 *ff.*

[1] [The condition of critical progress being the full development of a theory, taking in as many data as possible from all sources, we have no hesitation in appending a sketch of J. G. Frazer's view of the origin of Purīm (*Golden Bough*(2), 3 138-200), to which will be added a very brief sketch of the position necessitated by another inquiry which has the closest bearing

14 639 *c*; cp Dio Chrysostom, *Or.* iv.69 *f.* M) and Strabo (xi. 85). A serious objection, however, to identifying Zakmuk with the Sacæa is that, whereas Zakmuk was held in spring, the Sacæa seems to have fallen in summer, probably in July. The two chief features of the Sacæa were (1) its Bacchanalian or orgiastic character, and (2) the appointment of a condemned criminal to be a mock or temporary king (Zoganes), who after enjoying full license for five days, including permission to use the king's concubines, was stript of his royal robes, scourged, and hanged or crucified. Resemblances to these two features of the Sacæa are found (1) in the orgiastic character of Purīm, and (2) in the story of Haman and Mordecai, of whom one sought and the other attained a temporary grant of royal honours, while the unsuccessful aspirant perished on the gallows. Further, a vestige of the leave granted to the mock king of the Sacæa to use the king's concubines may perhaps be discerned in the suspicion of Ahasuerus that Haman intended violence to the queen (Esther 78). Following Jensen and others, Frazer identifies Mordecai and Esther with the great Babylonian deities Marduk and Ishtar, and he further inclines to accept Jensen's identification of Haman and Vashti with the Elamite deities Ḫumman and Vashti. Frazer conjectures, however, that this opposition between the native Babylonian deities on the one hand and the deities of the hostile Elamites on the other hand was not original but sprang from a later misunderstanding. Originally, if he is right, Haman and Vashti on the one side and Mordecai and Esther (Marduk and Ištar) on the other represented the same divine couple viewed under different aspects. Haman and Vashti stood for the god and goddess of fertility regarded as decaying and dying with the old year; Mordecai and Esther stood for the same divine beings coming to life again with the new year in spring. He supposes that at the New Year festival the god and goddess were personated by a human couple, a mock king and queen, whose temporary union was meant to promote, by means of sympathetic magic, the fruitfulness of the earth and the fecundity of the flocks and herds for the year. When the mock king (the Zoganes of the Sacæa) had discharged this function, he was put to death, originally perhaps at the end of the year, and his place was taken by a new representative of the deity, who after a similar union with another mock queen shared the fate of his predecessor. Movers pointed out long ago (*Die Phönizier*, 1490 *ff.*) that the legends of Sardanapalus and Semiramis appear to embody reminiscences, both of the debauchery of these temporary kings and queens and of the violent death of the male partner. Thus, on Frazer's theory, Haman and Vashti were originally the outgoing representatives of the powers of fertility, of whom at the end of the year one was slain and the other deposed: Mordecai and Esther (Marduk and Ishtar) were the incoming representatives of these same powers, who were appointed at the beginning of the year in spring, and after enjoying their regal and conjugal privileges for a season went the way of their predecessors. A reminiscence of a conjugal relation between Mordecai and Esther is preserved in Jewish tradition (J. J. Schudt, *Jüdische Merkwürdigkeiten*, ii. Theil, 316). The whole custom may thus have been the oriental equivalent of those popular European ceremonies which celebrate the advent of spring by representing in a dramatic form the expulsion or defeat of winter by the victorious summer; and it would be intimately related to the custom of personating the powers of vegetation by a king and queen of May. At the Sacæa, at least in later times, the mock king was always a condemned criminal; so that public opinion was not shocked by the custom of putting him to death.

From the *Acts of St. Dasius*, published a few years ago by Prof. Franz Cumont of Ghent (*Analecta Bollandiana*, **16**, 1897, pp. 5-16), we learn that in like manner the Roman soldiers at Durostolum in Mœsia used to appoint one of their number as a representative of the divine king Saturn, who was put to death at the Saturnalia after enjoying a nominal reign of thirty days.[1] In later times the Jews have been wont to make effigies of Haman and destroy them at Purīm. Such a ceremony has not unfrequently been a mitigation of an older practice of putting a man to death. There are some grounds for thinking that all over the ancient world, from Italy to Babylon, there prevailed at a very remote era a custom of annually appointing a human representative of the divine powers of fertility, who exercised his divine and royal functions for the purpose of quickening the earth and the flocks, and then suffered a violent death. Of such a custom both Purīm and the Saturnalia are, on Frazer's theory, mitigated survivals.

J. G. F.

on the criticism of the theories so ably and zealously being elaborated in Germany and England.—Ed.]

7. Probable results of textual criticism.

The hospitality given to rival though closely connected theories which assume that in the main the MT is correct, justifies us in pointing out here that the use of Babylonian material, and the application of a mythological key derived from that material to the problems of the story of Esther is only to a slight extent legitimate if the results of criticism referred to under MORDECAI and VASHTI (cp *Crit. Bib.*) are correct. The critical view of the origin of Esther to which they lead is that this book, like Judith, is based on an earlier narrative, the traces of which are still visible in the proper names, and which had a different geographical and historical setting. That Mordecai has no connection with Marduk, but is simply a corruption of a name such as Carmeli (one of the popular distortions of Jerahmeeli), appears to the present writer, from a text-critical point of view, certain (cp Ezra 22 Neh. 77). Hadassah and Esther seem to be equally remote from Ištar, being simply variants of the same name, which in its original form is Israelith (cp Judith). Haman is Heman or Hemam. Hammedatha is an outgrowth of Hemdan (Gen. 3626). In fact, the original Esther referred to *a captivity of the Jews in Edom* (cp OBADIAH, BOOK). The Persian element has been exaggerated.

If we reserve the bulk of the text-critical evidence, it may suffice to remark here that in 13 חיל פרס ומרי הפרתמים should be emended into יְרַחְמְאֵלִים וְצָרְפָתִים (cp PARAS). With regard to פּוּר (87 [where לפני המן is no doubt an error for לפני אלהים] 924) and פּוּרִים (926, etc.), one must venture to say that, however plausible the connection with Ass. *pūru* 'a round stone' may be, and willing as one may be to admit the possibility that, when Esther was edited in its present form, there may have been a Hebrew word פּוּר with that meaning (cp גּוֹרָל and BDB 174*a*), one can hardly believe that 'the stones'—*i.e.*, 'the lots'—gives the right meaning of Purim. Even from the point of view of a conservative textual criticism, it is difficult to make a connection of Purim with the Babylonian New Year's festival probable, and from a text-critical point of view it is most improbable.

The origin of 'Purīm' cannot be finally settled. In the view of the present writer, however, it is not improbable that Pur and Purīm are corruptions of a place-name, and that place-name very possibly was some collateral form of Ephrath, for there seems to have been an Ephrath in Jerahmeelite[2] territory; cp PARADISE, § 5, end, RACHEL.

It is at Ephrath that the peril and the deliverance of the Jews are localised. It may, however, be cheerfully

1 The analogy between the treatment of this Roman representative of Saturn and the mockery and death of Jesus was first pointed out by P. Wendland (*Hermes*, 33, 1898, pp. 175-179). Frazer has also been struck by this analogy. He conjectures that the Jews may have borrowed from the Babylonians the custom of putting a malefactor to death at Purīm in the character of Haman, and that Jesus may have suffered in that character. For the details of his theory see *The Golden Bough*(2), 3 187 *ff.*

2 Jerahmeelite is here used in its proper sense, referring to the land of the Negeb.

granted that, as in the case of the stories of Abraham, Joseph, Moses, a few elements of mythic affinities may have found their way, in a very pale form, into the Esther story. There were doubtless, many such *motifs*, and narrators could not help using them.

This attempted solution of the problem of Purim (and of Esther) may be supported by a brief reference to a possible similar solution of the problem of the stories of Daniel. 'Daniel,' רנאל, in Ezek. 14 14 20 28 3 is most easily explained as a corruption of 'Jerahmeel,' ירחמאל. It is by no means improbable (when we consider the extent to which the editorial transformation of certain literary works has gone in the OT) that the hero of the stories in our Book of Daniel was originally called by some popular mutilation of 'Jerahmeel' such as Carmeli, that 'Babel,' בבל, is a distortion of רכל=ירחמאל (Jerahmeel), that 'Nebuchadrezzar' comes from Nebrod (named after the great North Arabian hero—see NIMROD), and 'Belshazzar' from 'Baal, prince of Miṣṣur.' This is supported by the theory (see NERGAL-SHAREZER; OBADIAH [BOOK], § 5 *ff.*) that the Miṣrites took part in the siege of Jerusalem, and carried away captives from it, and, in fact, by the arguments already offered in the case of the Book of Esther. It may be added that the force of the evidence for the editorial resetting of biblical traditions is cumulative (see *Crit. Bib.*). T. K. C.

Literature. For the literature of the subject, see Erbt, *Die Purimsage*, 1-5. For a discussion of the distinct Esther and Marduk stories and allied stories which afford more or less close parallels, see Erbt, 45-76. For the Babylonian *pūru* see Zimmern, *Beiträge zur Kenntniss der Bab. Religion.* The indirect contributions of Winckler, *AOF*, 2 101 182 353 381, note, etc., are to be read for their suggestiveness, but hardly account for all the facts.

C. H. W. J., §§ 1-5; J. G. F., § 6; T. K. C., § 7.

PURPLE. The two sorts of purple dye mentioned in the OT are called respectively אַרְגָּמָן, *'argāmān* (in 2 Ch. 2 7 [6] אַרְגְּוָן) and תְּכֵלֶת, *tĕkēleth*. For *argāmān* (a bright red kind) EV gives 'purple'; for *tĕkēleth* (a violet blue) the rendering is 'blue.' The two terms often occur together, like their cognates in Assyrian (*KAT*(2) 154 *f.*). It is remarkable that there is only one biblical mention of purple stuffs of native Phœnician origin; but though it refers nominally to the time of Solomon, it can only be used for the third century B.C. (2 Ch. 26 [7] 13 [14]). According to Ezekiel (27 7) both purple-red and purple-blue stuffs were imported from the 'coastlands of ELISHAH' (*q.v.*), as if the Tyrians preferred expensive foreign to cheaper native products—an improbable idea, which of itself suggests that an examination of the basis of the view that Tyre is the city meant by Ezekiel is not superfluous (see *Crit. Bib.*). Certainly the industry of preparing purple dye in Phœnicia must have been of great antiquity; the Phœnicians indeed were traditionally regarded as its inventors (cp PHŒNICIA, § 1). To this day large accumulations of the shells of the purple-producing murex are to be found in the neighbourhood of Tyre,[1] and remains of the vats in which the dye was prepared are still found at Sidon. In Europe the S. Italian coasts (Elishah?) and those of Laconia and the Euripus, in Asia Minor the coast of Caria, and in North Africa the island of Meninx (SE. of Carthage) and the Gætulian coast are specially mentioned as, besides the Phœnician coast, sources of the murex (cp Plin. *HN* 9 60).

It is not surprising that the costly purple stuffs were much in request for sanctuaries and sacred officers. Van Hoonacker (*Le sacerdoce Lévitique*, 341 *ff.*) takes the trouble to show that the purple and violet of the Jewish high priest's dress are no indication of a royal as distinct from the pontifical dignity. Other priests and high-priests wore purple—*e.g.*, the chief priest of Hierapolis in Syria (Lucian, *De Syr. Dea*, 42), the priest of Zeus at Magnesia in Asia Minor (Strabo, 14 648), the priest of Hercules at Tarsus (Athen. 5 54), and the Roman augurs (Serv. *ad Æn.* 7 612).[2] The blue purple seems to have been more used for sacred purposes than the red. See TABERNACLE.

Supplementing the article COLOURS (§§ 13, 15) we may draw attention to three biblical passages (about each of which there is something new to be said) which are not specially considered there.

(*a*) In Cant. 3 10 MT we read that the centre (AV 'covering,' RV 'seat') of Solomon's grand palanquin was 'of purple.' It is obvious, however, that 'silver-gold-purple-love' form an odd combination. 'Purple' should be *algummīm* = almuggim-wood; 'love' should be 'ebony' (see LITTER).

(*b*) In 1 K. 22 10 MT makes Ahab and Jehoshaphat sit in their robes of state 'in a threshing-floor' (see RVmg.). What the narrator really said was that they seated themselves (at the entrance of the gate of Samaria) '*in purple robes*' (*argaman* for *bĕgōren*; Kamph., Ki.). A writer in a Bible Dictionary (Riehm, *HWB*(2) 1268*a*) says that there is nowhere any reference to the use of purple robes by kings of Israel. If the suggestion just made be accepted this will now be seen to need qualification. It would certainly be strange if so late as the time of Ahab purple robes were unused by the Israelitish kings. The Midianite kings are reported to have worn them (Judg. 8 26), and the Books of Daniel (5 7 16 29) and Esther (8 15) speak of the gift of purple raiment as a signal mark of favour from Babylonian and Persian kings.

(*c*) In Bar. 6 72, to heighten the effect of the sarcasms on idolatry, it is said (cp Jer. 10 9) that the idols are seen to be no gods by the 'purple and * * that rots upon them,' τῆς πορφύρας καὶ τῆς μαρμάρου [BAQ]; Vg. 'a purpura quoque et murice'; EV 'bright purple,' RVmg. 'purple and brightness.' The key to this passage (supposed to be desperate) is Cant. 5 15, where 𝔊 has μαρμάρινος for שֵׁשׁ. The writer of Bar. 6 72 most certainly translates from a Hebrew original; he confounds שֵׁשׁ 'white marble' with שֵׁשׁ 'fine linen.' 'Purple and fine linen' is a natural combination (Esth. 1 6 8 15 בוץ וא׳).

PURSE.[1] 1. כִּיס is thus rendered only in Pr. 1 14; elsewhere it is translated 'bag.' See BAG, 2.
2. βαλάντιον, Lk. 10 4 etc. See BAG, 5.
3. ζώνη, Mt. 10 9 Mk. 6 8. See GIRDLE, 2 *n*.

PURSLAIN (חַלָּמוּת), referred to in Job 6 6 RVmg. The general sense of the context is clear (see FOWLS, § 4); but expositors waver between 'white of an egg' and 'purslain' as the rendering of *ḥallāmūth*. This is not such a trifle as it may seem; the first reply of Job to Eliphaz (see JOB [BOOK], § 5) is so fine that we cannot endure that our impression should be spoiled at the opening by the very poor sixth and seventh verses. It is one step towards the recovery of sense to substitute 'purslain' for 'white of an egg,' if this can be justified.

First, as to 'white of an egg.' This sense is thought to be supported by the Talmudic חַלְמוֹנָא, 'yolk of an egg' (*Tĕrūmōth* 10 12; *'Ăbōdā zārā*, 40*a*), as if the 'slime (?) of the yolk of an egg' were a natural phrase for 'white of an egg.' Next as to 'purslain.' For this the Syrian *ḥ'lemta*, NH חַלְמִית are compared. It is true, this means not strictly 'purslain,' but the *anchusa*, Germ. *Ochsenmaul* (see Löw, *Aram. Pflanzennamen*, no. 120), a plant such as only the poorest would eat, like the *borago*, which indeed is related to the *anchusa*. The English reader, however, would gain nothing by the substitution of *anchusa*; let us therefore conventionally retain 'purslain.'

The rest of the verse, however, is quite impossible, and the correction, though it has been missed, lies close at hand. Instead of AV's

Can that which is unsavoury be eaten without salt,
Or is there any taste in the white of an egg?

we should probably read thus,

Can I eat my morsel with leaves of mallow,
Or drink purslain broth?

'My morsel' is suggested by 𝔊 (ἄρτος); 'leaves of mallow' by Job 30 4 (emended text), a passage fully explained elsewhere (see JUNIPER), which combines these two plants—mallow and purslain (rather *anchusa*), as foods of the poorest and meanest class. Those who read *vv.* 5 and 6 together now, will not be disappointed. Cp MALLOW.

The Hebrew is הַאֹכַל פִּתִּי בְּעֲלֵי־מַלּחַ אִם־אֶשְׁתֶּה מְרַק חַלָּמוּת. The latter part occurs in a corrupt variant in *v.* 7*b*; on *v.* 7*a* (which is misplaced) see Duhm. T. K. C.

PUT, AV (twice) PHUT (פּוּט Gen. 10 6 1 Ch. 1 8 Jer. 46 9 Ezek. 27 10 30 5 38 5 Nah. 3 9 †;[2] φουδ[3] in Gen. [ADE] and Ch. [BA], also Judith 2 23, elsewhere λιβυες [BAQ] except in Nah. της φυγης [BℵA]; AV has 'Libyans' once and 'Libya' twice).

According to the present form of Jer. 46 9 Ezek. 27 10 30 5 38 5 Neh. 3 9, a people which, like Lud (Lydians?),

[1] The late Heb. name for the *murex* is חִלָּזוֹן; in *Shabb.* 26*a* the collectors of the shells are spoken of (See Jastrow, *Lex.*).
[2] The references are from Dillmann-Ryssel (*Ex. Lev.* 342).

[1] From βύρσα; see LEATHER.
[2] On Ezek. 38 5 see PARAS, and on Nah. 3 9 see LUBIM.
[3] 𝔊 BAQmg. also gives φουδ, where MT has פּוּל, in Is. 66 19. Probably פּוּט is the true reading.

supplied mercenary troops to Egypt and to Tyre. Doubt has been thrown, however, on the authenticity of the text of these passages. It is very possible that prophecies which originally referred to North Arabian regions have been so altered, partly by accidental corruption, partly by editorial manipulation, as to refer to Egypt and Egyptian cities and to countries connected, locally or otherwise, with the Nile-valley (see NO-AMON, and *Crit. Bib.*). At any rate, if we grant (see CUSH, § 2) that כוש ומצרים in Gen. 10 6 (1 Ch. 1 8) means the North Arabian regions called Kuš and Muṣur, it becomes reasonable to hold that the region intended there by פוט lay between Muṣur (see MIZRAIM) and Canaan; and the corruption of names being such a common phenomenon in the MT, we can hardly avoid supposing that פוט in Gen. 10 6 comes from צָרְפַת or possibly from פְּלֶשֶׁת or פֶּלֶת, into which (see PELETHITES) צרפת (Zarephath) appears to the present writer to be sometimes corrupted. How important and troublesome a population in early times the Zarephathites were, is shown elsewhere.[1] See ZAREPHATH, and cp LETUSHIM.

1. In Gen. 10 6.

The determination of the locality of the true Put (if we may admit its existence) is not easy. This at least is clear—that Put is not the land of Punt (famous from Queen Ḥa'tšepsut's expedition; see EGYPT, §§ 48, 53), for Punt never supplied Egypt with warriors. Nah. 3 9 (best reading; see LUBIM) suggests a better view of Put and Ludim as the 'helpers' of No-Amon (the Egyptian Thebes) in the latter part of the Assyrian period; cp Jer. 46 9, Ezek. 27 10. Put and Lud (or Ludim) might therefore be the Carian and Lydian mercenaries of the later Egyptian kings. (This suggests a not impossible explanation of Ludim, in Gen. 10 13.) This view may perhaps be confirmed by a cuneiform fragment on the war of Nebuchadrezzar against Amasis, published by Strassmaier, and translated by Sayce (*Acad.* 11th April 1891, 25th July 1892) and Winckler (*AOF* 1 511 *f.*). It is there stated that in the course of his campaign Nebuchadrezzar had to do with an ally of Amasis whose city or land was called Puṭu-Yaman, and is described, with another town of the same prince, as 'far regions in the midst of the sea.' Krall (*Acad.* 23rd May 1891) identified Putu-Yaman with Cyrene, Sayce with Pelusium. It seems more natural, however, to think of some remoter country, such as the island of Samos (so Wi.), or at any rate of some part of the coast of Asia Minor, such as Caria, close to which Samos lay. Such conjectures as these are necessary if we accept the traditional text of the prophetic passages referred to above. But the question is whether 'Put' may not be simply due to textual corruption—whether the editor may not have retained it out of conscientiousness, and without holding any opinion as to the connection of a region called Put with Mizraim or Egypt. T. K. C.

2. Elsewhere.

PUTEOLI (ποτιολοι, Acts 28 13), called by the Greeks Dicæarchia, was a colony from the neighbouring Cyme (Cumæ), itself the first Greek colony planted on Italian soil. It lay on the northern shore of the bay of Naples: about 5 m. eastward was Neapolis (Naples), also a colony from Cumæ. The name Puteoli (= 'Wells'; mod. *Pozzuoli*) was probably given to Dicæarchia by the Romans in 194 B.C., when a citizen colony was planted there (Strabo, 245). The harbour was excellent; and 'Ostia and Puteoli became the great marts, not only for Syrian unguents and Egyptian linen, but also for the faith[2] of the East' (Mommsen, *Hist. of Rome*, ET 3 437).

The transmarine traffic, chiefly one of imports, was concentrated in those two harbours, the traffic in luxuries being mainly directed to Puteoli, in the immediate neighbourhood of which town was a market hardly inferior to that of the capital itself—viz., the district of Baiæ, which was the great resort of the wealthy.

In the last years of the Republic and the early period of the Empire, Puteoli was the great Italian port for the Mediterranean trade (cp Stat. *Silv.* 3 5 75, *litora mundi hospita*), especially for that of its eastern half.[1]

Puteoli had attained this importance even before the ruin of Delos (Strabo, 486); but that event assured its supremacy, and gained it also the name itself of 'little Delos' (cp Festus, 122, *minorem Delum Puteolos esse dixerunt quod Delos aliquando maximum emporium fuerit totius orbis terrarum, cui successit postea Puteolanum*, etc.). Though the town was 150 m. from Rome, travellers going to the capital often preferred to land at it (*e.g.*, Cicero, see *Pro Planc.* 26 65, *cum. . . decedens e provincia Puteolos forte venissem*; from Sicily. Cp Jos. *Ant.* xvii. 12 1 xviii. 7 2; Jews journeying to Rome from Palestine).

The accumulation of sand at the Tiber's mouth compelled the grain-ships also to anchor at Puteoli, if they were not to be unladed in the open sea at Ostia (cp Strabo, 231). In the second year of Claudius a new harbour at Ostia was begun (Dio Cass. 60 11), which was completed under Nero, and known as the *Portus Augusti*. The construction of this harbour sealed the fate of Puteoli (cp *CIL* 10 182 *f.*; Beloch, *Campanien*, 114 *f.*); but some years would elapse before the trade was permanently diverted to the northern harbour. The latter may not yet have been completed when Paul landed at Puteoli (60 A.D.): or the ship, as Ramsay suggests (*St. Paul the Traveller*, 345), proceeded to Ostia. Seneca gives a graphic account of the arrival of the Alexandrian fleet at Puteoli (*Ep.* 77). All ships entering the bay were obliged to strike their topsails (*suppara*), except the grain-ships, which could therefore be distinguished at a distance. It was also the practice to send forward fast-sailing vessels (*tabellariæ*) to announce the coming of the fleet, whose safe arrival meant so much for the populace of Rome (cp Suet. *Aug.* 98).

It was a natural result of the intercourse of Puteoli with the East, that Paul found Christians there (*v.* 14).

After the time of Domitian, the road to Rome went along the coast (the *Via Domitiana*) to Sinuessa, where it joined the great *Via Appia*. In Paul's time the Appian Way was joined at Capua by the cross-road called the 'Campanian' Road, leading from Cumæ Baiæ and Puteoli (cp Suet. *Aug.* 94; Pliny, *HN* 18 29; Hor. *Ep.* i. 15 10 *f.*). W. J. W.

PUTHITE (פּוּתִי, cp PITHON [פִּיתֹן]; μειφειθειμ [B], ηφιθειν [A], αφφουθι [L]; Vg. *Aputhei*; AV, by a misprint [corrected in RV], PUHITE), a post-exilic family of Kirjath-jearim (1 Ch. 2 53). See SHOBAL.

PUTIEL (פּוּטִיאֵל; φουτιηλ [BAL]), apparently the father-in-law of Eleazar (Ex. 6 25 [P]). The name of the child of the 'daughter of Putiel' was Phinehas, and both Putiel and Phinehas have been thought to have an Egyptian origin. In the case of Putiel, indeed, it is of course only the first part which comes into question (cp the hybrid form Pet-baal [Brugsch, GÄ 197 239]); but it is conceivable that the Hebrew *el* was substituted by P for the Egyptian ph-ra (cp POTIPHERA). Upon this theory 'Putiel' means 'He whom El (God) has given.'

[In the Egyptian Aramaic inscriptions and papyri of the end of the fifth and fourth centuries B.C. we often find פט as an element of names (cp Gk. compounds like πετ-οσιρις = Aram. פטוסרי, *CIS* 2 138 A). A still earlier example is quoted from an inscription belonging to Teima in Arabia (see *CIS* 2 113).]

But though Hommel (*AHT* 293) treats 'Putiel' as a genuine Israelitish name of the Mosaic epoch, we must bear in mind the frequency of corruption in the genealogies. Phinehas, too, is most likely corrupt; the name should probably be Jerahmeel. When we remember the strong S. Palestinian connection of Levi, a half-Egyptian origin of Putiel is very improbable. Most likely Puti is an ethnic, and *l* simply an afformative (cp 'Nethaneel,' etc.); on the Put of S. Palestine or N. Arabia, see PUT. T. K. C.

[1] To complete this statement it should be added that חם (Ham) in Gen. 10 5 is not improbably a fragment of ירחמאל (Jerahmeel).

[2] It is significant that the first temple to the living Augustus was erected in Puteoli, by a private person; cp Marq. *Röm. Staatv.* 1 201, n.

[1] Cp *CIL* 10 1797, a dedication to L. Calpurnius Capitolinus by the *mercatores qui Alexandriai Asiai Syriai negotiantur.* See Beloch, *Campanien*, 121 *f.*

PUVAH (פֻּוָּה), Gen. 46 13 RV, AV PHUVAH. See PUAH i.

PYGARG (דִּישֹׁן, *dišōn;* 'leaper' [?]; πυγαργος —*i.e.*, 'white-rumped' [BL], πυγαδαργος [A]; *pygargus*), a clean animal mentioned only in Dt. 14 5† (see CLEAN AND UNCLEAN, § 8). The rendering of EV, derived from 𝔊, is improbable, and the AVmg. 'bison' is almost certainly incorrect. Targ. Pesh. favour 'mountain-goat,' which is the meaning of the doubtless related Ass. word *daššu.*[1] *Dišōn* is identified by Tristram with the Addax[2] (*Addax nasomaculatus*); this denizen of Arabia and Northern Africa, it is true, can hardly be said to have been known in Palestine, in recent times at least; but it is improbable that the ancients distinguished clearly between the species. Herodotus (4 192) uses the word to denote some Libyan deer or antelope; but possibly any antelope with a white rump may have been meant.

The Addax is rather over than under 3 ft. in height, of a yellowish-white colour, with a brown head, neck, and mane; the horns attain a length of nearly 3 ft., measured along the spiral, and are ringed at the base. The Bedouins regularly hunt the Addax in the deserts and wastes which it frequents; the flesh is eaten. The name recurs as that of a Seirite clan; see DISHON.

A. E. S.—S. A. C.

PYRRHUS (πυρρος [Ti. WH]), Acts 20 4, father of SOPATER (*q.v.*).

PYTHON (πνευμα πυθωνα), Acts 16 16, EVmg., EV a spirit of DIVINATION (*q.v.*).

[1] For the Ass. analogy cp Del. *Ass. Studien*, 1 54; Hommel, *Säugethiere*, 391; and see *TSBA* 5 346 and Ball, *PSBA* 11 395 (who translates 'spotted deer'). For the Pesh. ܪܝܡܐ, *raimā*, see UNICORN.

[2] This is supported by *addacem* (in the accus.) which, according to Pliny, is the African name for the Strepsiceros (cp mod. Ar. names *adas*, *akas*; cited by Houghton, Smith's *DB*).
